## SMITH & ELDRIDGE

## Man Attempts to Kill Self

The little town of Sanderson was thrown into quite a furor of excitement last Sunday morning when No. 110 pulled into the yards and word went out that a man had committed suicide.

A passenger on the train named Robert Fox, who was traveling with his wife, was found lying on the floor of the lavatory, in a pool of blood with his throat cut from ear to ear. Dr. Robertson was immediately summoned and after a hasty examination the Dr. ordered that the man be taken to the Kerr Hotel where he could dress his wound and give him proper attention. Employees of the Railroad Company placed the man on a litter and carried him to the hotel where his wounds were dressed by Dr. Robertson.

Mrs. Fox left the train and accompanied her husband to the hotel and remained with him until No. 102 came in, when her husband was placed aboard and they left for San Antonio.

Mr. Fox had attempted to kill himself by cutting his throat with a pocket knife. He had made a very ugly wound extending from ear to ear, but had failed to sever the jugular veins, however his windpipe was cut almost entirely in two. Passengers who were riding in the same coach with Mr. Fox, stated that he had left his seat about twenty minutes before he was found in the lavatory with his throat cut. Falling health was given by Mrs. Fox as the cause for her husband's attempted suicide.

While he was lying on the floor of the lavatory, weeping in his own blood, Mr. Fox scribbled several notes which he threw out of the window. These notes were scrawled with a pencil on the back of blank checks bearing the imprint of the Stockdale, Texas, First State Bank. A reporter for the Times picked up these notes by the side of the track, about halfway between Sanderson and the pump house. These notes when found were covered with blood-stains. On one of the scribbled notes bore the following words: "Very last, I am going to die fighting and will bring four-fold suffering upon her and hers for every hair in my beloved child's head for his and my suffering—so mote it be in the new name. Frame within a frame." On one of the other were the following inscriptions: "The Return of Jesus, The Other Side of Death, The Christian Sabbath, Our Paradise Home, Shadow of the Battle, Vatican and the War." The papers on which the couple were traveling on was also found beside the tracks, which was evidently thrown out at the time the notes were.

Mr. and Mrs. Fox had formerly lived at Stockdale, but of late had been living at Nixon, where Mr. Fox was employed as an operator. Mr. Fox's father also resides at Nixon.

Dr. Robertson reported that the wounded man had a fairly good chance to recover.

It is reported that Fox made two attempts to end his life after No. 102 left Sanderson. One attempt was by trying to tear the bandages from his throat, and the other by trying to jump from the train.

Wear made-to-measure clothes and you will always appear well dressed. Call at the Royal Tailor Shop and let us show you some of the "smartest" samples for suits you ever seen. The cost is low and satisfaction guaranteed.

## School Trustees Elected Saturday

The school trustee election last Saturday brought out more votes than has ever been polled before in a school trustee election in Sanderson. Heretofore in such elections the number of votes polled has ranged from 20 to 30, but last Saturday there was a total of 68 votes cast, more than double the usual amount. 28 of the 68 votes were cast by women.

And a remarkable thing is, this large vote was polled without two opposing tickets in the field. If there had been two opposing tickets to arouse the interest of the voters and get them to the polls, in all probability more than 125 votes would have been cast.

It is a glorious record for Sanderson, one that she may well be proud of, when her citizens take such a deep interest in the election of school trustees, for it is one of the most important elections held.

Your children and your neighbors children spend nearly 9 months out of the 12 at school. And throughout their whole public school period, from the time they enter school until they graduate, these children are in the critical period of their lives—the growing, impressionable period—when their youthful minds and bodies are trained and moulded in accordance with the teachings given them and the conditions surrounding them. Don't you think then that the least you can do is to take enough interest in the welfare of these children to go to the polls on election day and vote your choice for trustees who will have the selecting of principal and teachers and matters pertaining to the management of the school?

When the citizens do not take any interest in the election and only a few votes are cast, the trustees cannot feel that they owe their election to the entire citizenship or that the moral support of the people is back of them. However when the people show an interest and poll a large vote, then the trustees feel that they are responsible to the whole citizenship and that the moral support of the whole town is back of them.

In the election last Saturday, M. A. Cavendar and C. H. White were elected common school district trustees. W. E. Stirman is a hold-over, so this will make the school board stand same as last term, Stirman, Cavendar, and White. Max Bogusch was elected trustee for precinct No. 1, and R. D. Eldridge was elected county trustee-at-large.

The vote was as follows:  
For Common School trustee:  
M. A. Cavendar 53  
C. H. White 55  
Mrs. D. A. Pollard 10  
R. D. Eldridge 9  
Mrs. A. Mitchell 2  
Chester Smith 2  
P. F. Robertson 1  
J. W. Happle 1  
W. E. Stirman 1  
For Precinct Trustee:  
Max Bogusch 21  
R. D. Eldridge 15  
For County Trustee-at-Large:  
R. D. Eldridge 14  
Max Bogusch 13  
Joe Kerr 4  
Chester Smith 2  
Henry Gates 2  
S. C. Bodkin 1

## Say Folks! Look Here!

If you want your house painted, your rooms papered, your car painted, your furniture made to look like new, then see me. Years of experience; all work guaranteed. Phone No. 19.  
H. P. Paula.

## AT THE PRINCESS NEXT WEEK.

Posing as a cook has its drawbacks, especially if you can't cook if the cop on the beat insists upon making love to you, and if you don't dare say a word, because you've told folks you're Swedish and can't speak a word of English. Dorothy Gish becomes involved in a merry muddle like this in "Flying Pat", her latest Paramount comedy-romance, that will be on view at the Princess Theater next Monday and Tuesday.

The story is about a young bride and her husband, who insists that she become more than a kitchen drudge and that she go out and make a "career" for herself. She takes up flying, but an adventure with her handsome instructor leads to domestic strife, and peppy Dorothy flees out into the cold world. Then follows a side-splitting series of events leading to their reconciliation.

There was a number of people over from Fort Stockton to attend the charity ball held last Friday night at the Kerr Hotel. Among those that attended were: Mr. and Mrs. Geo. B. Pace, Mr. and Mrs. D. S. Beeman, Mr. and Mrs. Chas. Webster, Mrs. C. L. Coulson and daughter Francis, Misses Hansen, Francis Malone, Mary McKenzie and Mr. Clayton Williams.

## Pay by Check

When you pay your bills by check, you secure the following important advantages:

Convenience,  
Safety,  
Economy  
and  
System.

We welcome checking accounts, small as well as large.

## SANDERSON STATE BANK

### A Trip Through Goose-Land

A play will be given tonight at the Methodist Church entitled "A Trip Through Goose-Land." Adult tickets 25c and children tickets 15c.

Old-Fashion Basket Picnic on the school grounds, Saturday, 5th of May. Everybody come and bring a basket.

Winners in yesterday evening's athletic contests and last night's declamation contest will appear in next week's Times.

A big hail storm struck Sanderson Wednesday evening.

Phone No. 6, for cleaning and pressing in the most up-to-date and satisfactory manner, and at greatly reduced prices. Clothes called for and delivered.

## THE KERR MERC. COMPANY

Radical on Trial at St. Joseph, Mich.

William Z. Foster and the jury which is trying him at St. Joseph, Mich., on a charge of violating the syndicalism law through attending the communist convention held in the sand dunes near St. Joseph last August.

Sault Ste. Marie Locks Open for Rush of Traffic

At the Sault Ste. Marie locks, the biggest freight locks in the world, the spring breakup of the ice pack, permitting waiting commerce to go through, has just been accompanied by feverish excitement, greater this year than ever before because of the record-breaking traffic. The photograph shows some of the many freighters making their way through the locks.

To Give Indian Temple and Relics

Victor H. Evans, noted patent attorney and chief counsel for most of the Indian tribes in the United States, who is soon to make an offer to congress of an Indian relic temple, housing a rare collection of 5,000 curios, at an approximate cost of \$250,000. The proposed building may be built in the National Zoological park. The only provision in Mr. Evans' offer is that the government donate the ground.

Congressman Takes Orders

Dressed in the regulation "gob" uniform, Representative Albert Johnson of Washington, a member of the party on board the Henderson at Panama, gets a taste of real navy enlisted life. He is shown taking orders from Captain McNamee.

SCRAPS

The earth wobbles a little about its axis. Bamboo trees bloom only twice in a century. Butter was used by the ancients at times as fuel.

The word "Jehovah" occurs 6,902 times in the Bible. Gold was the only metal that interested Neolithic peoples. Hindoos prefer traveling on vessels with more than two funnels. In Europe it is customary to leave visiting cards on the graves of coasts.

TEXAS PROMOTERS MAKE HUGE GAINS

Oil Stock Schemers Reap Rich Harvest From Investors, Declares Inspectors.

Washington.—Oil stock promoters operating in the State of Texas during the last five years have filched more than \$100,000,000 from the public, Postmaster General New was advised Saturday by John H. Edwards, solicitor of the postoffice department and Chief Postal Inspector Simmons, who are in Fort Worth co-operating with the department of justice in the prosecution of mail fraud cases involving oil promoters.

In making public the report, the postmaster general also declared the postoffice department intended to "move into the most vigorous and persistent manner possible for the enforcement of both the criminal and the fraud order statutes against the fraudulent use of the mails not only in the sale of fraudulent oil stocks but all other cases involved in the mails." Mr. New said the government had been appealed to "by disillusioned stockholders to stop the oil stock frauds" after "wildcat promoters" had escaped prosecution by State authorities. Post office inspectors, added have been working since last summer on more than 200 cases, many of which have already gone to the grand jury now in session at Fort Worth.

The report to Mr. New follows in part:—

More than \$100,000,000 is the estimate placed by post office inspectors upon the amount of money filched from the public during the past five years by oil stock promoters operating in the State of Texas. This statement challenged the attention of the country and demands speedy and certain action. Post office inspectors also report that companies and syndicates have been organized, run their course, and passed away by hundreds during these five years, leaving approximately a half million stockholders scattered throughout the United States to mourn the fading of rosy dreams of wealth with the final disappearance of their hard earned dollars.

"No doubt some of these companies were started by men who hoped to strike oil and make money from production, but in practically every case the promoters laid their plan to profit from the stock selling regardless of the result of field operations. Seldom was it that a promoter invested any money of his own.

"Almost all the promoters' concerns operate as common law trusts. Over such organizations the Texas statutes provide no supervision whatever. The promoters appoint themselves trustees with sole and unlimited power to procure and handle the money of their investors as they please without question from any State authority.

"To impose the penalty for using the mails to defraud, the post office department and the agents of department of justice must show sufficient evidence of intent to defraud. The department representatives report that the cases, especially those involving large stock selling schemes, are the most complex and difficult to handle of all criminal cases arising in the federal jurisdiction. For this reason they require months and sometimes years of patient and persevering investigation."

Railroad Gets Charter.

Austin, Tex.—The Waco, Beaumont, Trinity and Sabine railroad was chartered Friday by the Texas secretary of state. The line is a consolidation of the Beaumont and Great Northern and the Trinity Valley and Sabine. The latter formerly was a branch of the Missouri Kansas and Texas, and was purchased by owners of the Beaumont and Great Northern at public auction last December. Consolidation of the lines has been authorized by the legislature.

March Exports for Sabine.

Port Arthur, Tex.—Total exports in March for the district of Sabine amounted to \$1,397,124 in value. Imports were valued at \$917,501. Exports were divided between Port Arthur \$2,318,440, Sabine \$254,641, Orange \$91,803, Beaumont \$662,741.

New Long Range Gun.

Ogden, Utah.—John M. Browning, noted firearms inventor, has completed a new weapon capable of shooting 120 rounds a minute, with a range of six miles and large enough to penetrate airplane armor, it is announced.

Meat Prices Rise.

Paris.—The government has temporarily prohibited the exportation of cattle because of the rapidly rising price of meat.

Prohibition in Turkey.

Constantinople.—The authorities have just put into effect the delayed prohibition order in response to instructions from Angora.

Heavy Snowfall in Michigan.

Escanaba, Mich.—A spring snow storm more intense than any within the recollection of the oldest inhabitants visited the Michigan peninsula last Tuesday. Eight inches of snow fell during the 24 hours.

Democratic Mayor Elected at Chicago. Chicago, Ill.—Judge William E. Dever, running on the democratic ticket, was elected mayor of Chicago over Arthur C. Lueder, republican, Tuesday by a good majority.

HE SAW HIM

Mrs. Pott—Did you see the doctor last night, dear?  
Pott—(absentmindedly)—Yes, I saw him and went him several bet—I mean, I saw him for a moment. I forgot to tell him to call and prescribe for you. I'll telephone for him as soon as I get to the office.

On Their Way.

"We may as well give up trying to get into society," said Newrich in discouragement. "The barrier is insurmountable."

"Nonsense!" returned Mrs. Newrich. "We'll get over it in time."

"What! have we wings?" he expostulated.

"No, but our money has," said his wife.

AN AGONIZING THOUGHT

Miss Gabb—I thought I never should live to tell the tale.  
Miss Keen—For you that must have been suffering indeed.

No Such Luck!

I don't know how a man can live on forty thousand bucks a year. No, I don't know, I wish I did. But never will, I greatly fear.

Old Offender.

There was recently brought before a police judge in Atlanta a culprit to whom, among others, the magistrate put this question: "Where were you born?"

"Memphis."

"And were you brought up there?"

"Yes, Yo' Honor, ve' often."

Long Wait.

The boss sent the bookkeeper out to buy him a ticket to Chicago. After several hours the bookkeeper came back with the ticket.

"Took you a long time," grunted the boss.

"Well, I was just behind a girl who was planning her next summer's tour."

Making Game of Her.

"What was that tiresome old explorer talking about?" inquired the languid lady of her young friend.

"Progressive Patagonia."

"And how do you play it?"

Girls! Girls!

Clara—I don't care what you say, she has a good disposition. She's always willing to kiss and make up.

Madge—She generally does her "making up" first.

Fair Average.

"What do you think of this latest free-verse effusion?"

"I understand twenty-four of its thirty-eight lines."

The Alois Revivig.

"Chorus girls in the aisles, hey?"

"Don't be foolish. Many of our society people come late to the theater."

DIDN'T DO SO BADLY

He—Have you ever loved and lost?  
She—Oh, no; the jury awarded me \$7,000 damages.

Dairy Note.

I've never seen a cow condensed. Not any of that ilk. But every milkmaid knows the cow is pressed to give her milk.

Availability.

"How did you get started in politics?"

"The party needed a candidate," replied Senator Sorghum. "Just at a time when about everybody except me had a job he couldn't afford to leave."

Yes Easy.

First Dentist—What do you think of my new office? You see, the fire escape here makes my waiting room one of the safest places in the building.

Second Dentist—Safe nothing! I lost 12 patients that way.

A Wonderful Deck.

"I've got a hundred acres," said the bridge player enthusiastically. "Whereupon the old poker player, who had never sacked bridge, said: 'I'd like to play my favorite game with a deck like that.'"

HEAVY DAMAGE BY WEEVIL IS FEARED

Cotton Expert Says Backward Spring Is Likely to Cause Much Loss.

Dallas, Tex.—Extraordinarily heavy damage to cotton by the boll weevil on account of the backward spring is predicted this year by John T. Orr, president of the Texas Farm Bureau Cotton Association.

"The late spring will retard cotton to the extent that there will be very little, if any, early cotton," Mr. Orr states. "The late cotton will be fruiting at the right time for the weevil to do serious damage. The ground is still cold, seed that has been planted has either rotted or been killed by the recent freeze."

Cotton which was planted in the southern part of Texas will have to be planted over, and at about the time the cotton in the rest of the state is being planted. This fact will tend to a further advantage for the weevil, as it will create a labor shortage. Labor for planting, chopping and picking, usually moves northward as the season advances. The late spring and the result of uniformity of planting throughout the state will prevent this labor moving. The result will be that much cotton will not be worked properly, and this condition will retard the growth still more. It will be held back for late fruiting, which means that it will be exposed to the boll weevil at the time when they are most plentiful.

"Information gathered by us indicates that the recent freeze had very little effect on the weevil. The weevil multiplies rapidly, reaching the largest numbers late in the season. By reason of this fact farmers try to get their cotton planted and made before the weevils get numerous. The carryover of weevils will be sufficient to produce a large number just at the time the cotton will be fruiting. We can therefore, expect more than the average devastation from the boll weevil this year."

French Expert Asks New Armament Pact

Paris.—The president of the naval committee of the French senate, Gustave De Kerguezec, in a statement Friday, advocated the summoning of a further naval armament conference which would have for its object the actual scrapping of the big navies of the world.

"I guarantee in the name of the French parliament," he declared, "that France will suppress her entire fleet if the other powers will do likewise."

M. De Kerguezec is probably the best informed man on naval affairs in either house of parliament. For six years preceding 1921 he was a member of the chamber of deputies and served on the committee directing the naval budget.

ISSUES NEW RULING ON TEACHERS' EXAMINATIONS

Austin, Tex.—County and city school superintendents have been notified by State Superintendent Marra that a new ruling has been made with reference to registration of applicants for teachers' certificates.

All applicants must register with the county superintendent not later than the twentieth day of the preceding calendar month. Applicants who have not registered for the April examination may be permitted to do so this month. There will be no county examination in May. Applicants who desire to take the June examination, but who have failed to register with the county superintendent before May 26, will secure permission from the state superintendent to enter the examination. Examination fees should not be paid until the date of examination. Applicants who have not arrived at the age of 18 may take the examination and have the certificate issued when they become 18 years of age.

Building to a higher certificate permitted under the old law must be begun prior to Sept. 1, 1923, and completed prior to Sept. 1, 1925.

Russians Execute Priest.

Warsaw.—Monsignor Butchkevitch, whose death was ordered by the Russian soviet government, was executed Saturday morning. He was taken to the cellar beneath the Cheka building, according to advices reaching Warsaw and made to stand with his executioner behind him. He was shot with a revolver through the back of the head.

Entire Democratic Ticket Wins.

Dallas, Tex.—Returns from the city election held Tuesday indicate that all candidates on the democratic ticket had been elected, and that all charter amendments and bond propositions had carried. The Citizens Association, presenting a rival ticket, had asserted that the democratic ticket was in reality the Ku Klux Klan ticket.

Governor Vetoes Textbook Bill.

Austin, Tex.—Governor Neff Wednesday vetoed the bill to nullify the textbook awards of last December because so many changes were made. He criticizes the Pope bill seeking nullification as unconstitutional and as objectionable in public policy.

March Building at Port Arthur.

Port Arthur, Tex.—Of the 188 building permits issued by the city clerk in March, ninety were for residences. Total value of construction is given at \$127,347.

**Sloan's**  
**Rheumatic pain**  
—less every year  
Sloan's is rapidly making widespread suffering from rheumatism a thing of the past. Millions can testify to the grateful relief it brings. The moment you feel the first twinge of pain—apply Sloan's. Its tingling, penetrating warmth gives instant comfort. Before you realize it the pain disappears. Try it—you'll find many everyday uses for Sloan's. Sloan's Liniment—kills pain!  
For rheumatism, bruises, strains, chest colds

**"Cutting teeth is made easy"**  
**MRS. WINSLOW'S SYRUP**  
The Infants' and Children's Regulator  
As all druggists Non-Narcotic, Non-Alcoholic  
Oskland, Nev., Feb. 28, 1922  
Anglo-American Drug Co., Gentlemen:  
I am more than glad to tell you of the experience and result obtained from your wonderful Baby Medicine. Our second baby is now seven months old and has never given us a moment's trouble. The first and only thing she has ever taken was Mrs. Winslow's Syrup. She has four teeth and is always smiling and playing. Cutting teeth is made easy by the use of Mrs. Winslow's Syrup. Most sincerely,  
(Name on request)  
**ANGLO-AMERICAN DRUG CO.**  
318-317 Fulton Street, New York  
Gen. Selling Agents: Harold F. Sipple & Co., Inc., New York, Toronto, London, Sydney

**SLOW DEATH**

Aches, pains, nervousness, difficulty in urinating, often mean serious disorders. The world's standard remedy for kidney, liver, bladder and uric acid troubles—

bring quick relief and often ward off deadly diseases. Known as the national remedy of Holland for more than 200 years. All druggists, in three languages. Look for the name Gold Medal on every box and accept no imitation

Remarkable New Alloy. A young French chemist named Mazarin has invented a new alloy resembling gold and it has been termed "arum." It has the brightness, durability and inoxidizability of gold, which qualities will permit its substitution in jewelry and other manufactures where gold is now used. No particulars as to composition seem available.  
There is nothing new under the sun—not even in love or politics

**GRANDMOTHER KNEW**

There Was Nothing So Good for Congestion and Colds as Mustard

But the old-fashioned mustard plaster burned and blistered while it acted. Get the relief and help that mustard plasters gave, without the plaster and without the blister. Mustard does it. It is a clean, white ointment, made with oil of mustard. It is scientifically prepared, so that it works wonders. Gently massage Mustarole in with the finger-tips. See how quickly it brings relief—how speedily the pain disappears. Try Mustarole for sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosted feet, colds of the chest (it may prevent pneumonia). 25c and 50c. Jar and tubes; hospital size, \$3.00. Better than a mustard plaster

### CHAPTER X—Continued.

Belding paced up and down the room. Jim and Ladd whispered together. Gale walked to the window and looked out at the distant group of bandits, and then turned his gaze to rest upon Mercedes. She was conscious now, and her eyes seemed all the larger and blacker for the whiteness of her face. No one but Gale saw the Yaqui in the background looking down upon the Spanish girl. All of Yaqui's looks were strange; but this was singularly so. Gale wondered if the Indian were affected by her loveliness, her helplessness, or her terror.

Presently Belding called his rangers to him, and then Thorne.

"Listen to this," he said earnestly. "I'll go out and have a talk with Rojas. I'll try to reason with him; tell him to think a long time before he sheds blood on Uncle Sam's soil. That he's now after an American's wife! I'll not commit myself, nor will I refuse outright to consider his demands, nor will I show the least fear of him. I'll play for time. If my bluff goes through . . . well and good. . . . After dark the four of you, Laddy, Jim, Dick and Thorne, will take Mercedes and my best white horse, and with Yaqui as guide, circle round through Altar valley to the trail, and head for Yuma. I want you to take the Indian, because in a case of this kind he'll be a godsend. If you get headed or lost or have to circle off the trail, think what it'd mean to have a Yaqui with you. He knows Sonora as no Granger knows it. He could hide you, find water and grass, when you would absolutely believe it impossible. The Indian is loyal. He has his debt to pay, and he'll pay it, don't mistake me. When you're gone I'll hide Nell so Rojas won't see her if he searches the place. Then I think I could sit down and wait without any particular worry."

The rangers approved of Belding's plan, and Thorne went to the side of the horse.

"Mercedes, we've planned to outfit Rojas. Will you tell us what he wants?"

"Rojas swore—by his saints and his Virgin—that if I wasn't given—to him—in twenty-four hours—he would set fire to the village—kill the men—carry off the women—hang the children on cactus thorns!"

A moment's silence followed her last halting whisper.

Then the Yaqui uttered a singular cry. Gale had heard this once before, and now he remembered it was at the Papago well.

"Look at the Indian," whispered Belding hoarsely. "D—n if I don't believe he understood every word Mercedes said. And gentlemen, don't mistake me, if he ever gets near, Señor Rojas there'll be some gray Aztec knife work."

Yaqui had moved close to Mercedes, and stood beside her as she leaned against her husband. She seemed impelled to meet the Indian's gaze, and evidently it was so powerful or hypnotic that it wrought irresistibly upon her. But she must have seen or divined what was beyond the others, for she offered him her trembling hand. Yaqui took it and laid it against his body in a strange motion, and bowed his head. Then he stepped back into the shadow of the room.

Belding went outdoors while the rangers took up their former position at the west window. Each had his own somber thoughts, Gale imagined, and after that it was clear that the talk became painful and difficult. It ended finally in what appeared to be mutual understanding. Rojas mounted and rode away with his men, while Belding came tramping back to the house.

As he entered the door his eyes were shining, his big hands were clenched, and he was breathing audibly.

"You can rope me if I'm not too good," he burst out. "I went out to negotiate a red-handed little man, and d—n me if I didn't meet a—well. I've no suitable name handy. I started my bluff and got along pretty well, but I forgot to mention that Mercedes was Thorne's wife. And what do you think? Rojas swore he loved Mercedes—swore he'd marry her right here in Forlorn River—swore he would give up robbing and killing people, and take her away from Mexico. He has gold—jewels. The . . ."

a Granger like him. Anyway, without my asking he said for me to think it over for a day and then we'd talk again."

"Shore we're born lucky!" ejaculated Ladd.

"I reckon Rojas'll be smart enough to string his outfit across the few trails out of Forlorn River," remarked Jim.

"That needn't worry us. All we want is dark to come," replied Belding. "Yaqui will slip through. If we think any lucky stars let it be for the Indian. You may go to Yuma in six days and maybe in six weeks. You may have a big fight. Laddy, take the .405. Dick will pack his Remington. All of you go gunned heavy. But the main thing is a pack that'll be light enough for swift travel, yet one that'll keep you from starving on the desert."

The rest of that day passed swiftly. The sun set, twilight fell, then night closed down, fortunately a night slightly overcast. Gale saw the white horses pass his door like silent ghosts. Even Blanco Diablo made no sound, and that fact was indeed a tribute to the Yaqui. Gale went out

to put his saddle on Blanco Sol. The horse rubbed a soft nose against his shoulder. There was nothing more to do but wait and say good-by. Mercedes came clad in leather chaps and coat, a slim strippling of a cowboy, her dark eyes flashing. Her beauty could not be hidden, and now hope and courage had fled her blood.

Gale drew Nell into his arms.

"Dearest, I'm going—soon. . . . And maybe I'll never—"

"Dick, do—don't say it," sobbed Nell, with her head on his breast.

"I might never come back," he went on, steadily. "I love you—I've loved you ever since the first moment I saw you. Do you love me?"

"Yes, yes. Oh, I love you so! I never knew it till now. I love you so, Dick, I'll be safe and I'll wait—and hope and pray for your return."

"If I come back—no—when I come back, will you marry me?"

"I—oh yes!" she whispered, and returned his kiss.

Belding was in the room speaking softly.

"Nell, darling, I must go," said Dick.

"I'm a selfish little coward," cried Nell. "It's so splendid of you all, I ought to glory in it, but I can't. Fight if you must, Dick. Fight for that lovely persecuted girl. I'll love you—the more. . . . Oh! Good-by! Good-by!"

With a wrench that shook him, Gale let her go. He heard Belding's soft voice.

"Yaqui says the early hour's the best. Trust him, Laddy. Remember what I say—Yaqui's a godsend."

Then they were all outside in the pale gloom under the trees. Yaqui mounted Blanco Diablo; Mercedes was lifted upon White Woman; Thorne climbed astride Queen; Jim Lash was already upon his horse, which was as white as the others but bore no name; Ladd mounted the stallion Blanco Torres, and gathered up the long halteres of the two pack horses; Gale came last with Blanco Sol.

As he tied the stirrup, hand on man's and pommel, Gale took one more look in at the door. Nell stood in the gleam of light, her hair shining, face like ashes, her eyes dark, her lips parted, her arms outstretched. That sweet and tragic picture etched his cruel outlines into Gale's heart. He waved his hand and then fiercely leaped into the saddle.

Blanco Sol stepped out.

Before Gale stretched a line of moaning horses, white against dark shadows. He could not see the head of that column; he scarcely heard a soft hooffeat. A single star shone out of a rift in this clouds. There was

no wind. The air was cold. The dark space of desert seemed to yawn. The left across the river flickered a few campfires. The chill night, silent and mystical, seemed to close in upon Gale; and he faced the wide, quivering, black level with keen eyes and grim intent, and an awakening of that wild rapture which came like a spell to him in the open desert.

### CHAPTER XI

#### Across Cactus and Lava.

At the far corner of the field Yaqui halted, and slowly the line of white horses merged into a compact mass. Yaqui slipped out of his saddle. He ran his hand over Diablo's nose and spoke low, and repeated this action for each of the other horses. Gale had long ceased to question the strange Indian's behavior. There was no explaining or understanding many of his maneuvers. But the results of them were always thought-provoking. Gale had never seen horses stand so

silently as in this instance; no stamp—no clasp of bit—no toss of head—no shake of saddle or pack—no heave or snort! It seemed they had become imbued with the spirit of the Indian.

Yaqui moved away into the shadows as noiselessly as if he were one of them. The darkness swallowed him. He had taken a direction parallel with the trail. Gale wondered if Yaqui meant to try to lead his string of horses by the rebel sentinels.

The Indian appeared as he had vanished. He might have been part of the shadows. But he was there. He started off down the trail leading Diablo. Again the white line stretched slowly out. Gale fell in behind. Peering low with keen eyes, he made out three objects—a white sombrero, a blanket and a Mexican lying face down. The Yaqui had stolen upon this sentry like a silent wind of death.

Once under the dark lee of the river bank Yaqui caused another halt, and he disappeared as before. Moments passed. The horses held heads up, looked toward the glimmering campfires and listened. Gale thrilled with the meaning of it all—the night—the silence—the fight—and the wonderful Indian stealing with the slow inevitableness of doom upon another sentry.

Suddenly the Indian stalked out of the gloom. He mounted Diablo and headed across the river. Once more the line of moving white shadows stretched out. Gale peered sharply along the trail, and, presumably, on the pale sand under a cactus, there lay a blanket form, prone, outstretched, a carbine clutched in one hand, a cigarette, still burning in the other.

The cavalcade of white horses passed within five hundred yards of campfires, around which dark forms moved in plain sight. The lights disappeared from time to time, grew dimmer, more flickering, and at last they vanished altogether. Belding's and three steel streaks were out in front; the desert opened ahead wide, dark, vast. Rojas and his rebels were behind, eating, drinking, careless. The somber shadow lifted from Gale's heart. He held now an unquenchable faith in the Yaqui. Belding would be listening back, there along the river.

He would know of the escape. He would tell Nell, and then hide her safely. As Gale had accepted a strange and fatalistic foreshadowing of toil, blood and agony in this desert journey, so he believed in Mercedes' ultimate freedom and happiness, and his own return to the girl who had grown dearer than life.

A cold, gray dawn was fleeing before a rosy sun when Yaqui halted the march at Papago well. The horses were taken to water, then led down the arroyo into the grass. Here packs were slipped, saddles removed. Jim Lash remarked how cleverly they had fooled the rebels.

"Shore they'll be comin' along," replied Ladd.

They built a fire, cooked and ate. The Yaqui spoke only one word: "Sleep." Blankets were spread. Mercedes dropped into a deep slumber, her head on Thorne's shoulder. Excitement kept Thorne awake. The two rangers dozed beside the fire. Gale shared the Yaqui's watch. At the end of three hours the rangers grew active. Mercedes was awakened, and soon the party faced westward, their long shadows moving before them. Yaqui led with Blanco Diablo in a long, easy lope. The heated air lifted, and incoming currents from the west swept low and hard over the barren earth. In the distance, all around the horizon, accumulations of dust seemed like raging, famishing yellow clouds.

Yaqui was the only one of the fugitives who never looked back. Gale gazed back toward the well and the shining plain beyond, there would be reason for it. But when the sun lost its heat and the wind died down Yaqui took long and careful surveys westward from the high points on the trail. Sunset was not far off, and there in a bare, spotted valley lay Coyote tanks, the only waterhole between Papago well and the Sonoyta

oasis. Gale used his glass, told Yaqui there was no smoke, no sign of life; still the Indian fixed his falcon eyes on distant spots and looked long. No further advance was undertaken. The Yaqui headed south and traveled slowly, climbing to the brow of a bold height of weathered mesa. There he sat his horse and waited. No one questioned him. The rangers dismounted to stretch their legs, and Mercedes was lifted to a rock, where she rested. Thorne had gradually yielded to the desert's influence for silence. He spoke once or twice to Gale, and occasionally whispered to Mercedes. Gale fancied his friend would soon learn that necessary speech in desert travel meant a few greetings, a few words to make real the fact of human companionship, a few short, terse terms for the business of the day or night, and perhaps a stern order or a soft call to a horse.

The sun went down, and the golden, rosy veils turned to blue and shaded darker till twilight was there in the valley. Darkness approached, and the clear peaks faded. The horses stamped to be on the move.

"Malos!" exclaimed the Yaqui.

He did not point with arm, but his falcon head was outstretched, and his piercing eyes gazed at the blurring spot which marked the location of Coyote tanks.

"Jim, can you see anything?" asked Ladd.

"Nope, but I reckon he can."

Then Ladd suddenly straightened up, turned to his horse, and muttered low under his breath.

"I reckon so," said Lash, and for once his easy, good-natured tone was not in evidence. His voice was harsh.

Gale's eyes, keen as they were, were lost of the rangers to see tiny needle-points of light just faintly perceptible in the blackness.

"Laddy! Campfires!" he asked, quickly.

"Shore's you're born, my boy."

"How many?"

Ladd did not reply, but Yaqui held up his hand, his fingers wide. Rebels campfires! A strong force of rebels or raiders or some other desert troop was camping at Coyote tanks.

Yaqui sat his horse for a moment motionless as stone, his dark face immutable and impassive. Then he stretched his right arm in the direction of No Name mountains, now losing their last faint traces of the afterglow, and he shook his head. He made the same impressive gesture toward the Sonoyta oasis with the same somber negation.

Thereupon he turned Diablo's head to the south and started down the slope. His manner had been decisive, even stern. Lash did not question it. Yaqui sat his horse for a moment motionless as stone, his dark face immutable and impassive. Then he stretched his right arm in the direction of No Name mountains, now losing their last faint traces of the afterglow, and he shook his head. He made the same impressive gesture toward the Sonoyta oasis with the same somber negation.

he threw this out there was a little water left, sweet, cold water which man and horse shared eagerly. Thus he made even the desert's fiercest growth minister to their needs.

But he did not halt long. Miles of gray-green spiked walls lay before him and that line of rugged, red lava which manifestly he must reach before dark. The travel became faster, straighter. And the glistering thorns clutched and clung to leather and cloth and flesh. The horses reared, snorted, balked, leaped—but they were sent on. Only Blanco Sol, the patient, the plodding, the indomitable needed no gad or spur. Mercedes reeled in her saddle. Thorne bade her drink, bathed her face, supported her, and then gave way to Ladd, who took the girl with him on Torres' broad back. The middle of the afternoon saw Thorne reeling in his saddle, and then, wherever possible, Gale's powerful arm lent him strength to hold his seat.

The fugitives were entering a desolate, burned-out world. The waste of sand began to yield to clinders. The horses sank to their fetlocks as they toiled on. A fine, choking dust blew back from the leaders, and men coughed and horses snorted. But the sun was now behind the hills. In between ran the stream of lava. It was broken, sharp, dull rust color, full of cracks and caves and crevices, and everywhere upon its jagged surface glared the white-thorned choya.

Again twilight encompassed the travelers. But there was still light enough for Gale to see the constricted passage open into a wide, deep space where the dull color was relieved by the gray of gnarled and dwarfed mesquite. Blanco Sol, keenest of scent, whistled his welcome herald of water. The other horses answered, quickened their gait. Gale smelled it, too, sweet, cool, damp on the dry air.

Yaqui turned the corner of a pocket in the lava wall. The file of white horses rounded the corner after him. And Gale, coming last, saw the pale, glancing gleam of a pool of water beautiful in the twilight.

Next day the Yaqui's relentless driving demand on the horses was no longer in evidence. He lost no time, but he did not hasten. His course wound between low cinder dunes which limited their view of the surrounding country. These dunes finally sank down to a black floor as hard as flint, with tongues of lava to the left, and to the right the slow descent into the cactus plain. Yaqui was now traveling due west. It was Gale's idea that the Indian was skirting the first sharp-toothed slope of a vast volcanic plateau which formed the western half of the Sonora desert and extended to the Gulf of California. Travel was slow, but not exhausting for rider or beast.

Thirty miles of easy stages brought the fugitives to another waterhole, a little round pocket under the heaved-up edge of lava. There was spare

Mercedes Must Ride, but the Others Must Walk.

short, bleached grass for the horses, but no wood for a fire. This night there were questions and replies, conjecture, doubt, opinion and conviction expressed by the men of the party. But the Indian, who alone could have told where they were, where they were going, what chance they had to escape, maintained his stoical silence. Gale took the early watch, Ladd the midnight one, and Lash that of the morning. The day broke rosy, glorious, cold as ice. Action was necessary to make useful numbed hands and feet. Mercedes was fed while yet wrapped in blankets.

It was a significant index to the day's travel that Yaqui should keep a blanket from the pack and tear it into strips to bind the legs of the horses. It meant the dreaded choya and the knife-edged lava. That Yaqui did not mount Diablo was still more significant. Mercedes must ride; but the others must walk.

(To Be Continued.)

### REMEMBER FACES ON NOTES

If Handlers of Money Would Do That It Would Discourage Counterfeiting of Money.

The raising of United States currency has become so serious that the secret service division of the United States Treasury department is warning hotels, banks, merchants and others who handle large sums of money, to memorize the portraits which appear on the different denominations of the federal reserve banknotes, writes Carl H. Getz, an authority on the subject of forgery and counterfeiting, in Hotel Management.

"Ninety per cent of the money in circulation in the United States is in the form of federal reserve banknotes," he says. "Ninety-five per cent of the raised currency in circulation are these same notes. Crooks succeed in changing the figures and the letters but they can't change the portraits. If bank tellers, department store cashiers, railroad ticket sellers and others who handle large sums of money would memorize the portraits which appear on the different denominations of federal reserve banknotes, there would be very little passing of raised currency.

"This ought to be easy because the portraits which appear on these bills are ones which everyone remembers from school days. They are:

"On a \$1 federal reserve banknote, Washington; on a \$2, Jefferson; \$5, Lincoln; \$10, Jackson; \$20, Cleveland; \$50, Grant; \$100, Franklin."

Mr. Getz points out that the average man and woman can't tell from memory the difference between a \$1 and a \$5 bill and says that the United States government ought to issue currency with each denomination so distinctly different that everyone could quickly tell the difference between the various denominations.

He explains, too, that counterfeiting is on the increase because of the ease with which counterfeillers are able to pass raised currency and also because they are today devoting themselves to the counterfeiting of checks.

Judging by Looks.

I was spending my summer vacation selling books. I had a different speech for each member of the family. There was one for father, one for mother, one for the daughter, and one for the son. One day I rapped at a door and was greeted by an elderly looking woman who would tip the scales at 200 plus. She ushered me in, where I met a slender young woman of fifteen summers. I began my canvass to both of them, but addressed my appeal to the elder. The young girl gave me an enthusiastic hearing and wanted the book badly, whereupon I made an especially ardent appeal to the other to buy the book for her daughter. She listened for a while and then curtly informed me that she was a fifteen-year-old sister to the younger girl. I missed the sale.—Exchange.

How Snow Complicated.

When two feet of snow fell in the neighborhood of Boston recently the effect on business was serious. The blockade was felt more keenly than would have been the case twenty years ago, for then automobiles and trucks were not depended upon for the movement of traffic. A Boston historian recalls that two hundred and six years ago in February snow fell to the depth of 20 feet in the Boston district. He assures the Yankees that this sort of thing is certain to occur again, and wants to know how they will be able to keep going when all of their movements are effected by the aid of gasoline. The absence of heavy snows is, in fact, one important industrial advantage which the western states will utilize more and more in the future.—Lincoln Journal.

United States Birds.

The most abundant birds in the United States are the robin and the English sparrow, but several others are common enough to make their total numbers run well into the millions. The counts so far show that the most abundant bird on farms in the Northeastern states is the robin; next to this is the English sparrow, followed by the catbird, brown thrasher, house wren, kingbird and bluebird, in the order named. The densest bird population anywhere recorded is near Washington, D. C., where a careful count in 1915 showed 135 pairs of 40 species on five acres. Two city blocks, well supplied with trees, in Alton, S. C., harbored 65 pairs on ten acres.

Fur From Wool.

A newly invented process, whereby certain kinds of fleeces not well adapted to spinning can be manufactured into a rich, furlike material, which is supposed to present valuable hygienic advantage over skin furs for clothing because the material is mounted on a wool foundation, is reported by Consul General T. W. Sammons, from Australia. The inventor claims that this material has an excellent appearance, that it is suitable for all purposes for which fur is utilized, and for clothing where the utmost warmth, the least weight and the maximum of protection are demanded.

Advices Use of Latin.

To universalize the Latin language is a suggestion seriously made by Cardinal Bourne. He reviews the difficulties to be surmounted by the variety of tongues and as a means of overcoming the difficulty proposes that the Latin contains all the elements for world use. He believes many world misunderstandings will vanish if the ancient tongue is brought back into use.

### MRS. EARLS TELLS WOMEN

How Backache and Periodic Pains Yield to Lydia E. Pinkham's Vegetable Compound

Olean, N. Y. — "Every month my blood would go to my head and I would have such a headache, nosebleed, backache and pains that I could not do my work. At night I could not get my rest and nothing seemed to do me any good. I read some of your testimonials about what Lydia E. Pinkham's Vegetable Compound had done for others, so I decided to try it. I had only taken two bottles when I began to be better, and my back did not hurt me nor my head ache. I felt like a new woman. The Vegetable Compound is a splendid medicine and I will always recommend it."—Mrs. A. D. EARLS, 650 N. 5th St., Olean, N. Y.</

### Subconscious Mind of American Tells Him That He Must Not Tarry

By EMILE COUE, in New York World.

Every American man shows in his actions that he believes himself to be a wheel in the complicated great machinery that is at work manufacturing a nation; at least, that is the impression they give me. Their belief in their individual importance may be, and often is, unconscious, but it is always perceptible by the stranger.

It is revealed in his thoroughness, in the feverish haste with which he conducts his business as though working to a hard schedule in order to achieve perfection or success in a given time and the result of suggestion driven into the mind from childhood up. School books teach it and it becomes auto-suggestion.

The subconscious mind of the American man tells him imperiously that he must not tarry. He has no time for leisure; the nation must be built, and if his own little wheel stops it may check the advance of the whole machine, and so the American man is the hardest worker in the world. A pioneer and a slave to a civilization in the making he condemns himself to a premature old age.

And too often he takes them to bed with him. His family life is sacrificed despite his naturally affectionate disposition. Generally a devoted husband and father, the American is only too willing to leave the evening of his home and children to his wife. He will send his whole family away for a holiday or a change regardless of the expense, for money means little to him. He knows subconsciously that he will earn as much as is necessary. That is one of the secrets of his success in business—auto-suggestion of success. The idea of success is in the blood of the nation, for the nation itself is a success—the most gigantic success history has ever recorded.

### Costly Highways Must Distribute Their Benefits and Costs Equitably

By W. H. FINLEY, President Chicago and North Western.

I do not believe that good highways throughout the country are going to ruin the railroads. On the contrary, I think that the more means there are for traveling and shipping the more traveling and shipping increases. When trolley lines were first built there was a hue and cry that they would take all the business from the railroads. Nothing like that happened. They merely created more business for everybody.

The magnificent system of highways that have been and are being built in Illinois will soon make this state one of the greatest transportation powers in the Union. Properly built, regulated, and maintained, they will tend to almost remake our state physically.

The people must realize, however, that all final results are based on taxation. We must see that these costly highways distribute their benefits and costs equitably. Truck loadings should be regulated by law and the people who use our roads for profit should be made to bear their just burden of the maintenance costs.

### "If I Say That I Never Saw the Evil Side of Gregory Rasputin"

By LILI DEHN, in "The Real Tarites."

If I say that I never saw the evil side of Gregory Rasputin I shall be called a liar or a fool—perhaps, more chivalrously, the latter. It is however, the truth when I say that we never saw the evil side of him. May I, therefore, plead for a hearing on the grounds that some men possess dual natures, and that they adapt these to the company in which they find themselves?

I have heard of men who at home have led most moral lives, leading elsewhere existences before which an up-to-date French novel is as naught. Yet they never betrayed themselves to their nearest and dearest. But even if something unforeseen had disclosed the man's secret orchard, his inner life, and his frailties, their existence even then would most probably have been disbelieved by those who had known him intimately for years.

### Issuance of Tax Exempt Securities Saves Nothing to the Taxpayers

By ANDREW MELLON, U. S. Secretary of the Treasury.

Tax exemption, in substance, constitutes a subsidy from the federal government, the cost of which, in the long run, must fall on those taxpayers who do not or can not take refuge in tax-exempt securities.

Even from the point of view of the states themselves, I believe it is clear that the continued issuance of tax-exempt securities saves nothing to the taxpayers in the states, and that, in the long run, it brings heavier taxes.

The tax-exempt privilege, with the facility that it gives to borrowing, leads, in many cases, to unnecessary or wasteful public expenditure, and this, in turn, is bringing about a menacing increase in the debts of states and cities. These debts constitute a constantly growing charge upon the taxpayers in the several states, and will ultimately have to be paid, principal and interest, through tax levies upon these very taxpayers.

### Buildings of Public Interest Should Be Classed as Public Monuments

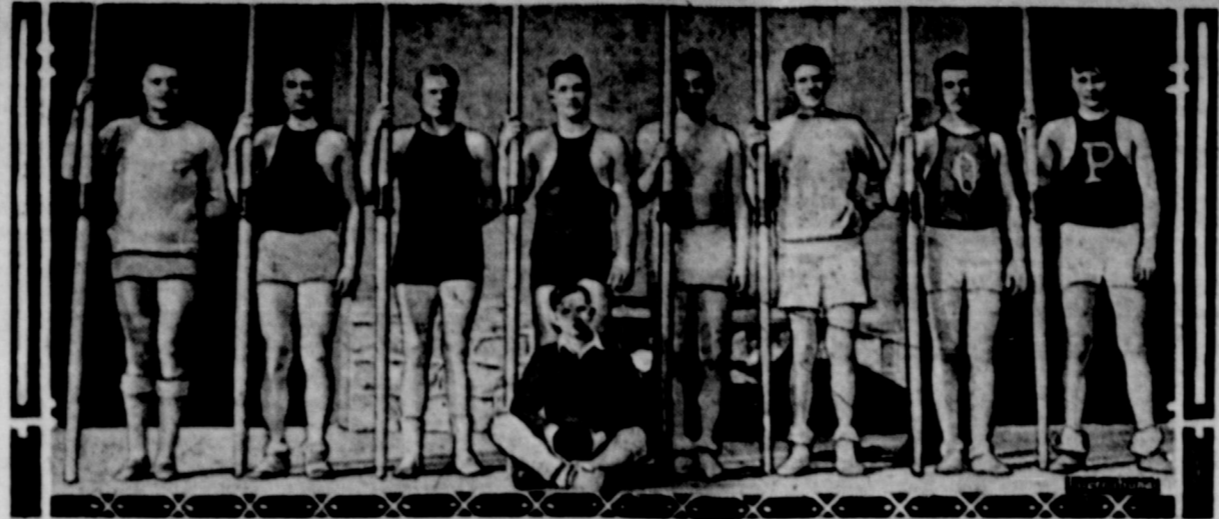

By F. D. GALLATIN, Park Commissioner for Manhattan.

Buildings of public interest should be classified as in France as public monuments. It should be forbidden to alter or destroy buildings so classified except with the consent of these authorities. In return for this a reduction might be made in taxes. Subsidies might be furnished for their upkeep and when necessary, money paid for damages for the diminution of the value of the fee. I believe that if we wish to preserve our country as we have known it and assimilate our newcomers, money could not be better spent. The soul of our country is worth saving.

There is no better way to teach immigrants the traditions and ideals of America than by keeping before their eyes the buildings symbolizing the best of America's past.

It all comes to this. A city is not a mere heap of stone. It is a community whose aspirations are expressed by its architecture and by its loving care of the relics of the past.

## PENNSYLVANIA CREW FIRST TO TAKE TRIAL SPIN ON RIVER

The University of Pennsylvania crew took their first trial spin out on the Schuylkill river the other day and showed the benefits of their indoor training. The boys had been on the indoor sweeps for several weeks and the fine weather provided them with an opportunity to launch the shell. From left to right are Roberts, Hensel, Waldner, McDonnell, Wheeler, Captain Methodolt, Kicker, Jellinek. In front is Coxswain Chase.

### ACES ARE AS COMMON AS BIRDIES IN GOLF

More Than 1,200 "Ones" Reported During 1922 Season—Chicago Leads With 52.

More than 1,200 holes were made in one stroke by golfers during the season of 1922, according to statistics compiled by W. C. Sherwood of Newark, Ohio, who in 1921 formed the Hole in One Club for those who perform the feat. The figures as made public show that the aces were scattered over the country, although Chicago won first place with 52, including three cuckoo's made by women.

The figures more than doubled the 500 aces reported for the first year of the club. Strange as it may seem, all the aces came from the ranks of ordinary players, stars seldom holing from the tee. In fact, Harry Vardon and Chick Evans, known as two of the world's most accurate golfers, have never made a cuckoo, although each has played probably 100,000 holes. Experience has shown that the cuckoo is largely due to luck, although the golfer must play the ball straight for the hole and must have just the required distance. A number of holes more than 250 yards long were made in one last season, but the record for a tournament was set by Ned Allis of Milwaukee, who scored an ace on a 300-yard hole at Flossmoor club, Chicago, several years ago in the western amateur championship.

Among the cities reporting the most aces for 1922 are: Chicago, 52; New York, 33; San Francisco, 24; Kansas City, 18; Omaha, 14; Cleveland, 12; Pittsburgh, 9.

#### Robert C. Bell, Jr.

Mishpimman Robert C. Bell, Jr., is manager of the "leather pushers" of the United States Naval academy. He is one of the most popular athletes at Annapolis and is a cracker-jack lacrosse and football player, besides standing at the top of a class of 400 in studies. His home town is San Francisco, Cal.

#### Steel Stadium at Iowa Being Used as a Model

The all-steel stadium built by the University of Iowa last fall is proving so satisfactory that it is being used as a model for many of the stadiums to be constructed in Europe and South America. Professor Lambert, who designed the stand, has found so many imitators that he has decided to patent his unique innovation.

#### One-Year Rule Adopted at Lehigh University

Beginning the collegiate year 1923-24 no freshman at Lehigh university will be eligible for varsity sports. The rule which covers every branch of sport and establishes a standard of the very highest scholastic work for the freshman was approved and adopted at the regular monthly meeting of the athletic committee.

Young Kelly to Memphis. Ren Kelly, brother of George Kelly, first baseman for the New York Giants, has been sold by the Seattle Baseball club of the Pacific Coast league to the Memphis club of the Southern league. Ren is a pitcher.

#### Golf Does Not Help

Golf is no help in conditioning ball players, believes Ty Cobb. Players at this time of the year must develop running and throwing muscles and develop the faculty of following the ball with their eyes. He must learn to gauge the speed of a thrown or batted ball. Doing these things requires all a player's physical energy. If he plays golf after practice is over then he is overdoing things.

#### Ty Cobb's Double

Gene Valla of the San Francisco club of the Pacific Coast league is described by many sports writers as a double for the famous Georgia peach, Ty Cobb. Valla virtually forced himself into the San Francisco lineup last spring, and during the season acquired the fine batting average of .333, not a figure to be sneezed at. Valla plays left field for the Frisco Seals.

## INTERESTING SPORT NOTES

Polo association has 62 clubs enrolled.

Philadelphia boasts a woman's polo team.

A woman has been appointed swimming instructor on board one of the big transatlantic liners.

G. E. Potter of Orange, Cal., forward, was elected captain of Illinois' 1923 basketball team.

Joey Fox, the English featherweight, intends to take another fling at the boxing game of this side.

Harry Walter, the old Red Sox pastimer, has blossomed into a college baseball coach on the Pacific coast.

Warren E. Steller has been appointed to coach the Wesleyan baseball team. He is an old Oberlin college athlete.

James "Red" Roberts of Somerset, Ky., Centre college football star, signed a contract to coach at Waynesburg college.

James McGraw, brother of John McGraw, has been appointed a sort of business manager and advisor to Roger Bresnahan.

The Argentine Lawn Tennis association announces that Argentina will be one of the contestants for the Davis cup this year.

Ed Kelleher, who coached the 1922-23 Fordham basketball five, has been engaged to direct the destinies of the Maroon quintet next season.

Whatever other clubs, majors or minors, do, Tom Watkins of the Memphis Southern league team means to try out the plan of numbering players this year.

Stanford university athletic authorities announce that they have withdrawn from the annual intercollegiate boxing tournament because California has entered several negro boxers.

Dad Hankins, the new Washington pitching tryout from the Florida State, is said to be the slimmest thing that ever ascended the mound. He stands over six feet, yet weighs less than 150 pounds.

#### Trade George Smith

George Smith of the Phillies, right-handed pitcher, formerly a Columbia star, and once with the Giants, was recently exchanged for Clarence Mitchell of the Brooklyn (N. Y.) Robins, only left-handed spittballer in baseball. No cash changed hands.

#### New York Is Home of Six Boxing Champions

New York city is the home of six boxing champions. They are: Frankie Genaro, American flyweight; Joe Lynch, world bantamweight; Johnny Dundee, New York state featherweight champion and American junior lightweight; Benny Leonard, world middleweight; Johnny Wilson, world lightweight, and Gene Tunney, American light heavyweight.

#### Scout Bob Gilks Says Burney Action Is Fast

Bobby Gilks, veteran scout of the New York Yankees, who picked up Burney Acton, says this Alabama boy is faster than Archdeacon and Paddock put together and that he also can hit. His name should be Burney Acton, according to Gilks, who declares he will win an outfield berth with the Yanks sure.

#### Dates Set for Tennis Singles at Germantown

The Germantown Cricket club at Philadelphia will be the scene of the national singles lawn tennis championship Sept. 7 to 15. Bill Tilden has won the last two years over this turf and can be repeat, in view of his recent injured finger, is the question already being asked.

#### Willie Kamm Pays \$50 for Fielding Gloves

Willie Kamm, highest priced minor leaguer, will make his major league debut with a set of fielding gloves costing \$50. Kamm, for whom the White Sox paid the San Francisco club \$100,000, had four gloves made to order. The work and material for each cost \$50.

#### New Stadium.

Doyers university of New Orleans has approved the project to construct a new football field. It will include a stadium. The first portion of the improvement is to be ready September 1. Sections of the stadium will be constructed as needed.

#### A Golf Squad.

University of Illinois golf squad includes 25 candidates. They will open a six-game schedule April 20 against Indiana.

#### Speaker "Finds" Rookie

A rookie will get the clean-up position for the Cleveland Indians, according to the latest dope. Hoher Summa, from Wichita Falls Texas league club, has been slated for a permanent job at right field, and No. 4 in the batting order. Speaker's outfield will be Charles Jamieson, Tris Speaker and Summa.

# NATIONAL CAPITAL AFFAIRS

## Supreme Court and Flexible Tariff

WASHINGTON.—Coincident with the prospect disclosed here that the flexibility provision of the tariff act is to be challenged in the courts on the ground of unconstitutionality, President Harding has determined to go through with the program outlined by the tariff commission.

The President authorizes Thomas O. Marvin, chairman of the tariff commission to go ahead with the investigation and to send out the notices announcing the proposed investigation into rates on seventeen commodities.

This is a victory for Chairman Marvin and his colleague on the commission, William Burgess, who planned the hearings, and a defeat for Commissioner William S. Culbertson, vice chairman, who wants to work toward a scientific revision of duties.

The forthcoming investigation will in all probability result in litigation to determine the constitutionality of the flexibility provision, vesting in the President the power to change rates of duty. It was questioned during the consideration of the law in congress. Opponents of the plan predicted that the courts would declare it unconstitutional.

It is understood that interests hostile to a flexible tariff have made preparations to carry the question into the courts at the first opportunity. The issue involved is merely whether congress has exceeded its authority in delegating to the President power which under the Constitution lies only in the legislative branch of the government. Defenders of the law hold that, in restricting the President's authority to change rates by not more than 50 per cent, congress has enacted a legal delegation of power.

Representative Tyson (Dem., Ala.) who formerly was chief justice of the Supreme court of his state, declares the flexible provisions of the tariff law are unconstitutional.

"Such provisions never before were incorporated in any bill," he said. "These provisions attempt to confer elastic powers upon the executive. The Constitution clearly imposes upon the legislative department of the government the power to lay and collect taxes, duties, imposts, and excise, to pay the debts and provide for the common defense and welfare of the United States." That power can only be exercised by the congress and is nondelegable.

"The prescribing of the rates of duties upon imported articles is the exercise of a function of legislative power denied to the executive under the Constitution."

## Uncle Sam May "Own His Own" in Paris

IT BEGINS to look as if Uncle Sam might have a really decent-looking embassy building in Paris, one of these days. Anyway the senate before adjournment passed the following bill:

"Be it enacted, etc. That the secretary of state be, and he is hereby, empowered, at a cost not to exceed \$300,000 for both site and building or buildings, to acquire in Paris a site, together with the building or buildings thereon, for the use of the diplomatic and consular establishments of the United States, and the appropriation of the sum of \$150,000 is hereby authorized in addition to a like sum heretofore appropriated for this purpose."

There is a general law authorizing the expenditure annually of not to exceed \$500,000 for the purchase or erection of embassy, legation, or consular buildings in foreign countries. Two years ago was passed a law appropriating \$150,000 for the purpose of an embassy in Paris. That money is still in the treasury unexpended, it having been found impossible to acquire any building suitable for the purpose for

## Yorktown a National Military Park

YORKTOWN is likely to be added to the system of national military parks under the charge of the War department. This system includes the battlefields of Antietam, in Maryland; Chickamauga and Chattanooga, in Tennessee; Gettysburg, in Pennsylvania; and Guilford Court House, in North Carolina. Incidentally, military reservations should be transferred to the national park service of the Interior department, as should the ten of more national monuments administered by the forest service of the Agricultural department.

Both house and senate have passed the following:

"Be it enacted, etc. That the secretary of war be, and he is hereby, directed to investigate the feasibility of establishing a national military park in and about Yorktown, in the state of Virginia, for the purpose of commemorating the campaign and siege of Yorktown in the fall of 1781 and the preservation of said battlefield for historical purposes, and to prepare plans of such park and an estimate of the cost of establishing and acquiring the same and obtain such other information as may enable congress to act upon the matter after being advised. To aid and assist him in this undertaking, the

secretary of war is authorized to appoint a commission of not to exceed three persons, who shall serve without compensation or expense to the government.

"Section 2. That the expense of the investigation herein directed to be made shall be paid from the appropriation 'Contingencies of the Army.'"

Senator King of Utah wanted to know "if ultimately there will not evolve upon the federal government considerable expense for the maintenance of this park." It was explained to him at considerable length that that will depend entirely upon the action of congress. This bill merely directs the secretary of war to inquire into the feasibility of the project and to prepare plans, which will be reported to congress for whatever action it may see fit to take. Congress may or may not adopt those plans; it may or may not establish the park. Of course, if a military park should be established at Yorktown, there might possibly be some expense attached, or it might be arranged that the expense should be borne by various patriotic societies.

Then Senator King made a nice little speech on economy and resumed his seat. Thereupon the bill was passed.

## Next Congress Will Tackle Passports

RESIDENT HARDING'S attempt to put an end to the passport visa nuisance and, incidentally, to terminate the adventure in economy by which traveling Americans are spending \$8,000,000 a year to enable their government to collect \$2,500,000 in visa fees from aliens arriving in this country, failed in the final hours of the Sixty-seventh congress, but will be pressed with determination when the next congress convenes in December.

Since 1921 Americans have not needed passports to leave their own country, which has not greatly altered the situation since they are still required to have them in order to enter nearly all countries. In 1921, also, the American visa requirement was discontinued in the case of all outgoing, but continued for all incoming aliens.

The war had been over nearly two years when congress raised from \$2 to \$10 the fees for issuing passports to Americans and visting the passports of aliens. The plan succeeded in bringing in to the treasury during 1921 about \$1,800,000 in passport fees paid by Americans to their government for passports, and approximately \$4,000,000 paid by aliens. But it kept no Americans at home and it did not check immigration.

Then congress passed the 3 per cent law, the effect of which was to limit to 300,000 the number of the aliens permitted to enter the United States in any one year, and by so doing cut down the revenues from visa fees to about \$2,500,000 annually.

Meantime, other governments promptly followed the lead of the United States by charging American citizens the same fees for visting their passports that the American diplomatic and consular officers abroad, under the act of June, 1920, were obliged to charge for visting the passports of their nationals. A few countries exceeded the American rate.

The effect, of course, has been that an American abroad is obliged to pay from five to ten times as much for his visas in any European country as an European making the same journey.

Again, since an American traveling abroad visits on a conservative average five countries, he pays \$50 in visa fees where an European visting the United States pays \$10 for his American visa, which, plus the cost of passing in to the treasury during 1921 \$12 as against the initial \$10 paid by the American for his passport and \$50 to foreign governments for visa fees, a total of \$60, which can be, and is, increased by another \$10 for each additional country visited.

Ann Adams' Conquest

By HARRIET BRUNKHURST

Ann Adams looked her usual charming self as she sat at her desk beside the window. Her fluffy light hair was dressed as prettily as ever, her blue serge frock was faultlessly pressed and brushed, her white collar and cuffs immaculate.

"Then what," asked Ann, soberly. "I wish you would stay on with us," Lester said. "The future with the Hudson people may be better, but the salary is all that concerns you, for you'll marry, anyway."

"Where does that leave us?" Lester inquired perplexedly. "It doesn't leave us—it starts us," said Ann. "We are engaged. We are going to be happy engaged, and as happy married."

"I—I believe you are right," said Lester, returning her radiant smile.

Lester Sawyer had hesitated, said that he must not stand in her way, then, lighting into most appealing tenderness, he had asked her to marry him, but before he finished his sentence he drew himself up shortly and reverted to his usual office manner.

"Well, think the matter over," he said; "I'll meet them if possible. We can't spare you here."

Ann was puzzled. She was not deeply in love with Lester, but she knew that she could be. However, the present situation was impossible.

"Mr. Sawyer," Ann suddenly whirled in her chair and faced him, "I think it best to accept the Hudson people's offer."

Sawyer looked up, surprised, but had he known it, scarcely more surprised than Ann herself, who had spoken without any clear intention of doing so.

"Mr. Sawyer," Ann suddenly whirled in her chair and faced him, "I think it best to accept the Hudson people's offer."

"Come out for luncheon with me," he pleaded. "There is something I must say."

"All right," said Ann, cheerily, although she ordinarily found it best to refuse all invitations in business hours.

"Only I have quite decided that it would not be fair to ask the firm to meet the Hudson's offer. I'm not worth that salary here."

"Well—," Sawyer's tone was doubtful, "I don't know about that. But—there's something else."

All of Ann's briefly banished confusion and indecision returned, but she concealed it under a smiling nod, and dismissed Sawyer by letting her hands fall upon her typewriter keys.

"At the cozy little table in a far corner of the restaurant Sawyer was one by self—possessed as he perhaps had been approached the matter to be discussed all his ease of manner disappeared.

"I must have seemed a cad the other day," he began without preamble. "I started to ask you to marry me, and I didn't give you a chance to reject me. But I acted as if I thought you were going to accept me—I had absolutely no reason for thinking you would—and I withdrew the offer as impulsively as I made it. I'd like to make it clear that I was thinking only of you."

Ann smiled into his troubled eyes. "It is all very well put," she said, "but it really doesn't make sense."

"I suppose not," said Sawyer. "Did you ever notice that I'm a groncher?"

"Never to me," said Ann, gently. "That's just it," the man answered, bitterly. "Never to you, because I'm not married to you. That is what has fooled every last man in my family and equally deluded the girls that have married into the family. You can smooth me over in any business crisis, you can take care of that lump of an office boy and adjust all the little difficulties, avert the annoyances of the day's routine. That is why you are worth an increase in salary to the firm, because I'm no good without you."

"You were a valuable man when I came to the firm," reminded Ann, oddly moved nevertheless.

"But you have no idea how much you have increased my value," he said, with a tight-lipped smile. "Well—that is the firm's side of it. My own side takes only an explanation. The men of my family are beasts in their homes, my father, my uncles, my grandfathers. There's only one thing to be said for any of them—they don't display their dispositions in public. But I don't intend to bring to any woman's face, least of all yours, the hunted, beaten, fretted look the women who have married into our family wear."

"I'm not afraid of you," said Ann, sweetly, suddenly leaving the safe ground whence she could retreat or advance at will. "You have always shown your real self with me—you always would."

Lester shook his head. "If you'd ever heard my mother excusing this or that or the other gronchiness of father's by quoting some charming incident of their pre-nuptial days, you'd lose faith. Those old stories are worn pretty thin, but they prove conclusively that the family irritability doesn't appear in courtship. And I don't intend to make any woman, least of all you, miserable."

Those old stories are worn pretty thin, but they prove conclusively that the family irritability doesn't appear in courtship. And I don't intend to make any woman, least of all you, miserable."

GOVERNOR CLEANS SLATE OF ALL BILLS

Several Measures Filed Without Signature—Two Bills Vetoes.

Austin, Tex.—Governor Neff Wednesday vetoed two of the remaining legislative measures before him, approved four and filed 12 others to become laws without his signature. Those approved include the Nueces license bill, employers' liability amendment act, sheriffs' fee bill and county commissioners' salary bill. All of the measures were acted upon by the governor before midnight Wednesday night, the latest time at which he could act.

One of the measures vetoed was the Irwin bill, which sought to institute a system of indeterminate sentence for all inmates of the state penitentiary. Under the bill the governor was directed to pardon convicts after serving a certain portion of their sentence if they had conducted themselves satisfactorily. The governor declared the bill to be unconstitutional because the constitution gives the governor sole authority to pardon convicts, while this bill says the governor "shall" pardon under certain conditions.

The county commissioners salary bill increases generally the salaries of such officers on a property valuation basis, and results in increases as high as 50 per cent.

The fee bill increases fees to sheriffs for arrests and other cases from 25 cents in civil cases to \$1.50.

Benefits under the workmen's compensation act are increased under the Rogers bill approved by the governor. The minimum benefit is increased from \$5 to \$7 a week, while the maximum is raised from \$15 to \$20.

Professional nurses are required to obtain licenses under terms of the Dudley bill.

Other measures acted upon are: Fixing compensation of county commissioners in counties of less than 15,000 inhabitants.

Requiring insurance commission to establish classifications of hazards and rates and workmen's compensation act and transferring such duties from Texas compensation bureau.

Providing an emergency fund for water and irrigation districts.

Providing for the appointment of assistant district attorneys and fixing salaries of same in counties of over 150,000 population.

Authorizing organization and incorporation of mutual insurance companies.

Requiring erection of fire escapes on buildings, replacing the former law held unconstitutional.

Regulating banks chartered prior to 1876.

Last Honors Paid Former Governor.

Palestine, Tex.—Not since the death of General John H. Reagan 17 years ago has Palestine seen anything like the demonstration of esteem and devotion to a fellow citizen that characterized the funeral of former Governor Thomas Mitchell Campbell held Wednesday. Thousands of his fellow citizens, including hundreds of distinguished men and women from over the state, were present to pay final tribute to his memory. All business and industrial activities of the city paused during the funeral hour.

Earl of Carnarvon Passes.

Cairo—The Earl of Carnarvon died Wednesday. He was conscious almost to the end. His death was due to blood poisoning through the bite of an insect, with the later development of pneumonia. The death of the Earl of Carnarvon comes soon after the culmination of the exploit that brought him chiefly into public notice—the discovery of the rich tomb of Pharaoh Tutankhamen in the Valley of the Kings in Egypt by the archeological expedition which he headed.

Innes Gets Another Sentence.

Atlanta, Ga.—Victor E. Innes of Texas and Nevada, and late of the Georgia penitentiary, must go back to prison. At the conclusion of the third court chapter of the mysterious disappearance of Mrs. Eloise Nelms Dennis and Beatrice Nelms in San Antonio, Tex., about ten years ago, Innes was sentenced to serve five years in the federal prison and pay a fine of \$1,000 in the United States district court at Atlanta Wednesday.

Richest Indian Recovers \$216,000.

Muskogee, Okla.—Jackson Barnett, the world's richest Indian, will receive \$216,000 paid in income taxes from 1917 to 1920 under the ruling handed down Thursday by the solicitor general of the internal revenue department that Indian oil royalties are non-taxable. Six other Indians will receive returns of from \$30,000 to \$120,000 it is claimed.

Welsh Miners Strike.

Cardiff, Wales—All the miners, numbering about 12,000, employed in the mines owned by Viscountess Rhonda, are involved in a great strike which began recently throughout the Rhonda district of Glamorgan.

City Election at Trinity.

Trinity, Tex.—In the city election held Tuesday, Ed Gilmon, S. F. Vann and F. E. Holloway were elected aldermen. The general stock law for the city was carried by a vote of 99 to 80.

CHILDREN OF RICH MAKE TOYS

The miniature automobiles shown in the photograph were all made by the students of the Chicago Latin school, many of whom come from wealthy families. They are on exhibit at the school rooms. The makers of the toys are grouped around the table.

DIFFERENTIAL IS NOT UNDERSTOOD

Purpose of Mechanism Is to Deliver Equal Amount of Power to Each Rear Wheel.

How many automobile owners know what a differential is and of what use it is? A writer asserts that even a large proportion know little, if anything about it.

On all cars with beveled gear drive such as is used on the modern passenger cars, the differential is located in the rear axle and its purpose is to deliver an equal amount of power from the engine to each of the rear drive wheels, regardless of whether one is going faster or slower than the other.

What Differential Does. In driving a car in a circle, or any part of a circle, the outer wheel has to travel a longer distance than the one on the inside, with the result that it must turn around a greater number of times. If the rear axle were made of one solid piece connecting the two drive wheels, it would then be impossible for one wheel to turn more rapidly than the other, with the result that one would have to slip when rounding a curve. Thus, the differential permits one wheel to turn faster than the other, thereby keeping either of them from skidding on the ground. At the same time, it is so constructed that it will deliver the same amount of turning or twisting torque on the wheel which is turning the fastest as on the other one.

The construction of the differential is similar in principle to an "oener" which is placed back of a team of horses to divide the load between the two. The oener divides the load between the two so that, regardless of whether one horse is ahead of or to the rear of the other, he will be pulling approximately his share of the load.

In the rear axle of a car is placed the differential which divides the load from the engine, equally between the two drive wheels, the same as the oener divides the load between the horses. The equalizing action of the differential can be seen by locking up the rear wheels of the car, then putting the gear lever in low speed. Disengage the emergency brake and turn one of the wheels forward or backward, at the same time watching the effect on the opposite wheel. You will notice that the other wheel turned directly opposite to the way in which the one is going. This peculiar action has led to many interesting stories from new motorists when they have discovered it.

Some Disadvantages. While the differential is a necessity in the average car, it has some disadvantages which have not yet been satisfactorily overcome. In case one wheel drops into a deep mudhole so that the tire cannot get traction, the differential will allow the other wheel to be delivered to the opposite wheel, which might pull the car out were it not for the differential action. Different mechanical devices have been shown at various times to lock two rear wheels together under circumstances of this kind. Due to the complexity nature of these devices, however, they have never come into commercial use.

A great many patented types of differentials have been brought out at different times to do away with this spinning of one wheel when in a slippery spot, but so far the standard type of bevel gear differential is used on practically all standard makes of cars, which seems to prove that nothing better has been brought out so far.

BRUSHES CAUSE OF TROUBLE

Good Plan to Keep Close Watch to See if They are Sparking—Investigate at Once.

Watch the brushes of the generator occasionally to see if they are sparking. This may be due to dirty commutator, rough iron from burning, high mica, or worn out of true. The brushes may not be properly fitted, they may be stuck in the guide, have a weak spring, or be used up. When sparking is noticed have the trouble investigated immediately, as the commutator will be badly damaged and the battery will not receive the proper charge.

Take Care of Car.

An ounce of attention is worth a pound of overhaul. An oiling a day keeps the repairman away. Look before you back. Spare the oil and spoil the car. A rolling car gathers no crowd. A tool in the kit is worth thousands in the garage. Service is as service does. Fools rush in where experts fear to tread. A little knowledge of electrical systems is a dangerous thing. An ounce of instruction may save a pound of repair. A skid to the wise is sufficient.

THEFT BUREAU URGES OWNER TO KNOW CAR

Many Stolen Machines Could Not Be Identified.

A comprehensive report of auto thefts for the last year just issued by the theft bureau of the Automobile Club of Southern California shows that year by year there are more cars being stolen.

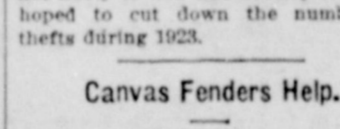

In southern California during 1922 there were nearly \$3,000,000 worth of automobiles taken by thief gangs. It is believed that this tremendous activity is conducted by professional groups of thieves organized on a commercial basis, although a certain per cent of the cars are taken for joy riding purposes.

There were 2,788 machines stolen in Los Angeles alone during 1922, as compared to 2,572 taken in 1921. The figures for 1921 show a material advance over those of 1920, according to the theft bureau report.

An investigation of the facts relating to the theft of each automobile shows that in most instances the car was stolen because the owner failed to lock it or even left the keys in the lock. Such carelessness as this encourages the stealing of machines throughout the state, say the authorities. Although the greatest number of cars stolen have been recovered, great difficulty has been experienced in getting them back because the owners could not give proper information to the detectives in identifying their property, even failing to know their own license or engine numbers.

Every motorist should place private identification marks somewhere on his car in a place where the thieves are not likely to find and destroy it. It is hoped to cut down the number of thefts during 1923.

Canvas Fenders Help.

Owners of a small car, who would like to convert it into a snappy and unique form of roadster, may take this hint. Instead of the regular front fenders a canvas guard may be stretched across the lower end of the springs at the front and will keep the guard from sagging.

AUTOMOBILE NEWS

Clean out carbon and grind valves. Change oil every 500 miles of driving. Have carburetor cleaned and adjusted. A flashlight included in the equipment of a car is considered extremely valuable for emergency use. It should be kept within reach at all times.

REPORT OF MARKETS

Price Range of Cotton, Grain, Hay, Feed, Live Stock, Meats, Fruits, Etc.

Grain.—The wheat market displayed an improved undertone most of the week and prices show net advances. Cold weather and bullish private crop reports were chief incentives for buying. Wheat firm and higher on the 5th. Crop reports generally unfavorable, reporting insufficient rain and green bugs in Oklahoma. Corn market quiet but undertone strong. Good domestic and export demand for corn. Closing prices: Chicago, cash market; No. 2 red winter wheat \$1.32; No. 2 hard winter wheat \$1.23; No. 2 mixed corn 77c; No. 2 yellow corn 78c; No. 3 white oats 45c. Average farm prices: No. 2 mixed corn in central Iowa 65c; No. 2 hard winter wheat in central Kansas \$1.35; closing future prices: Chicago May wheat \$1.21 1/4; Chicago May corn 75 1/2c; Minneapolis May wheat \$1.21 1-8; Kansas City May wheat \$1.13 3-8; Winnipeg May wheat \$1.18.

Hay.—Market practically unchanged with some generally firm. Receipts and country loadings lighter in most markets. Heavier offerings reported at Cincinnati but shipping demand active. Market 50c lower at Pittsburgh. Alfalfa very firm at Kansas City. Prairie prices slightly higher. Quoted April 4: No. 1 Timothy New York \$25, Philadelphia \$23. Pittsburgh \$21. Cincinnati \$19.50. Chicago \$23. St. Louis \$21.50. Memphis \$24.50. No. 1 alfalfa Kansas City \$24.50, Memphis \$30. No. 1 Prairie Kansas City \$15.50, St. Louis \$19.

Feed.—Markets dull and unsettled. All feeds quoted 50c to \$1 lower. Gluten feed prices reduced additional \$2 per ton by manufacturers. Linseed most offerings heavy, stocks increasing. Cottonseed meal quoted by resellers \$1 under mill prices. Transit shipment wheat feeds fair. Storage stocks in east rather large. Offerings by mills for prompt shipment light out deferred deliveries under pressure and quoted at \$3 to \$6 below prevailing prices. Hominy feed situation unchanged, stocks good, demand light, prices steady. Alfalfa meal supplies greater than present demand. Movement fair. Quoted April 4: bran \$27, middlings \$27, flour middlings \$29.50; rye middlings \$26 Minneapolis; gluten feed \$40.65 Chicago; 34% linseed meal \$41 Minneapolis; \$40.50 Buffalo; 36% cottonseed meal \$28.25 Memphis, \$40 Atlanta white hominy feed \$29. St. Louis \$29.50 Chicago.

Fruits and Vegetables.—Eastern round white potatoes nearly steady in city markets for the week; Northern stock slightly weaker. Prices lower at shipping points. Florida stock firm in mid-western cities. Apples firm, spinach higher. Onions and celery steady, strawberries under pressure and quoted at \$3 to \$6 below prevailing prices. Hominy feed situation unchanged, stocks good, demand light, prices steady. Alfalfa meal supplies greater than present demand. Movement fair. Quoted April 4: bran \$27, middlings \$27, flour middlings \$29.50; rye middlings \$26 Minneapolis; gluten feed \$40.65 Chicago; 34% linseed meal \$41 Minneapolis; \$40.50 Buffalo; 36% cottonseed meal \$28.25 Memphis, \$40 Atlanta white hominy feed \$29. St. Louis \$29.50 Chicago.

Live Stock and Meats.—Chicago hog prices ranged from 30 to 45c higher than week ago. Beef steers firm to 35c and butcher cows and heifers 15 to 35c higher; feeder steers steady and veal calves 25 to 50c up. Fat lambs 25c to 50c lower; feeding lambs steady; yearlings steady to 75c off and fat ewes 25 to 50c up. On April 5th hogs were mostly 10c higher some up 15c; beef steers, butcher cows and heifers and stockers and feeders weak to unevenly lower. Handyweight vealers 25c higher. Fat lambs steady to 15c lower; sheep scarce steady. April 5th, Chicago prices: Hogs, top \$8.75; bulk sales \$8.50-\$8.75; medium and good beef steers \$8.25-\$9.00; butcher cows and heifers \$4.40-\$5.85; feeder steers \$6.25-\$5.50; light and medium weight veal calves \$1.75-\$1.25; fat lambs \$12.75-\$14.75; feeding lambs \$13-\$14.75; yearlings \$9.75-\$13.50; fat ewes \$7-25. Stocker and feeder shipments from 12 important markets during the week ending March 30 amounted to: cattle and calves 35,433; hogs 13,684; sheep 4,359. In eastern wholesale fresh meat markets beef is lower to 50c lower; veal and pork loins steady; lamb weak to \$1 lower and mutton \$1 lower to \$1 higher for the week. On April 5 beef was steady to slightly lower; veal and lamb weaker \$1 lower; spring lamb \$1 to \$4 lower; pork unevenly steady to \$1 lower and mutton steady to firm. April 5 prices good grade meats: beef \$13-\$14.50; veal \$14-20; lamb \$21-25; mutton \$14-15; light pork loins \$15.50 to \$18; heavy loins \$11.50-\$14.00.

Cotton.—Spot cotton prices advanced 88 points during the week. New York May future contracts advanced 118 points. Spot cotton closed at 29.35c per pound. New York May futures at 29.35c.

Dairy Products.—Butter markets unsettled during the week; tone weak at the close. Price tendency downward. Approaching spring production and moderate demand, appeared to be factors causing weakness. Closing prices: 92 score butter: New York 49 1/2c; Philadelphia 49c; Boston 51c; Chicago 48 1/2c.

After Every Meal. In work or play, it gives the poise and steadiness that mean success. It helps digestion, allays thirst, keeps the mouth cool and moist, the throat muscles relaxed and pliant and the nerves at ease.

Keep Your Skin Pores Active and Healthy With Cuticura Soap. Soap 25c, Ointment 25c and 50c, Tablets 25c.

Mitchell Eye Salve For SORE EYES. Avoid sleeping around eyes in case of eye ailment. This eye salve is a sure cure for all eye troubles. The old simple remedy that brings instant relief in 10 to 15 minutes.

Kill All Flies! THEY SPREAD DISEASE. Kill all flies, mosquitos, house flies, etc. with this Fly Killer. It kills them as they fly. It is a sure cure for all fly troubles. The old simple remedy that brings instant relief in 10 to 15 minutes.

Stop Laxatives. Nujol is a lubricant—not a medicine or laxative—so cannot gripe. When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus restores regular bowel movements by Nature's own method—lubrication. Try it today.

Why Multimillionaire is "Sore." Multimillionaire—After sending your son to college it must be disappointing to have him run off with a chorus girl. Multimillionaire—I should say it was disappointing—I expected to marry the little lady myself.—London Mail.

It's an easy thing to convince men that honesty is the best policy when it pays better than the other kind.

Live Stock and Meats.—Chicago hog prices ranged from 30 to 45c higher than week ago. Beef steers firm to 35c and butcher cows and heifers 15 to 35c higher; feeder steers steady and veal calves 25 to 50c up. Fat lambs 25c to 50c lower; feeding lambs steady; yearlings steady to 75c off and fat ewes 25 to 50c up. On April 5th hogs were mostly 10c higher some up 15c; beef steers, butcher cows and heifers and stockers and feeders weak to unevenly lower. Handyweight vealers 25c higher. Fat lambs steady to 15c lower; sheep scarce steady. April 5th, Chicago prices: Hogs, top \$8.75; bulk sales \$8.50-\$8.75; medium and good beef steers \$8.25-\$9.00; butcher cows and heifers \$4.40-\$5.85; feeder steers \$6.25-\$5.50; light and medium weight veal calves \$1.75-\$1.25; fat lambs \$12.75-\$14.75; feeding lambs \$13-\$14.75; yearlings \$9.75-\$13.50; fat ewes \$7-25. Stocker and feeder shipments from 12 important markets during the week ending March 30 amounted to: cattle and calves 35,433; hogs 13,684; sheep 4,359. In eastern wholesale fresh meat markets beef is lower to 50c lower; veal and pork loins steady; lamb weak to \$1 lower and mutton \$1 lower to \$1 higher for the week. On April 5 beef was steady to slightly lower; veal and lamb weaker \$1 lower; spring lamb \$1 to \$4 lower; pork unevenly steady to \$1 lower and mutton steady to firm. April 5 prices good grade meats: beef \$13-\$14.50; veal \$14-20; lamb \$21-25; mutton \$14-15; light pork loins \$15.50 to \$18; heavy loins \$11.50-\$14.00.

HAIR STAYS COMBED, GLOSSY.

"Hair Groom" Keeps Hair Combed—Well-Groomed.

Millions Use It—Fine for Hair!—Not Sticky, Greasy or Smelly.

A few cents buys a jar of "Hair Groom" at any drug store. Even stubborn, unruly or shampooed hair stays combed all day in any style you like. "Hair Groom" is a dignified combing cream which gives that natural gloss and well-groomed effect to your hair—that final touch to good dress both in business and on social occasions. Greaseless, stainless "Hair Groom" does not show on the hair because it is absorbed by the scalp, therefore your hair remains so soft and pliable and so natural that no one can possibly tell you used it.

### Try these Bakers' Raisin Pies —save baking at home

THERE are luscious raisin pies just around the corner, at your grocer's or a bake shop.

Baked to a turn—a flaky crust filled with tender, tempting raisins, the rich juice forming a delicious sauce.

Once try these pies that master bakers bake fresh daily in your city and you'll never take the trouble afterwards to make raisin pies at home.

Get a pie now and let your men folks taste it. Made with tender, thin-skinned, meaty, seeded Sun-Maid Raisins.

Raisins furnish 1560 calories of energizing nutriment per pound in practically predigested form.

Also a fine content of food-iron—good food for the blood. Use raisins frequently, therefore, which are both good and good for you, in puddings, cakes, cookies, etc.

You may be offered other brands that you know less well than Sun-Maid's, but the kind you want is the kind you know is good. Insist, therefore, on Sun-Maid brand. They cost no more than ordinary raisins.

Mail coupon for free book of tested Sun-Maid recipes. Learn what you can do with luscious raisins.

## SUN-MAID RAISINS The Supreme Pie Raisin

Your retailer should sell you Sun-Maid Raisins for not more than the following prices:

Seeded (in 12 oz. blue plus) — 20c  
Seeded (in 12 oz. red plus) — 18c  
Seeded (in 12 oz. blue) — 15c  
Seeded (in 12 oz. red) — 15c  
Seeded (in 12 oz. blue) — 20c  
Seeded (in 12 oz. red) — 18c

## THE SANDMAN STORY

### BETTY'S DREAM

“YOU are going to sleep in the four-poster I had when I was married,” said Aunt Polly, opening the door to her guest room and holding the candle so Betty could see, “and this silk quilt is made from pieces of my dresses and those of many of my friends when we were all young and danced as gayly as you do, my dear, though I dare say you think Uncle Peter and I are too old-fashioned to ever have danced.”

“You Are Going to Sleep in the Four-Poster.”

“You are going to sleep in the four-poster I had when I was married,” said Aunt Polly, opening the door to her guest room and holding the candle so Betty could see, “and this silk quilt is made from pieces of my dresses and those of many of my friends when we were all young and danced as gayly as you do, my dear, though I dare say you think Uncle Peter and I are too old-fashioned to ever have danced.”

“Was, no indeed!” answered Betty, as she looked at the pretty bits of silk in the quilt. “I can almost see which turned her completely over, she was so astonished. The silk quilt seemed to have lifted from the bed, and all the bits of gayly flowered silks and the plain ones as well were old-fashioned gowns—the styles were in the days of hoopskirts. One flowered silk gown that seemed to be more aristocratic than the others was rustling with indignation. “To think I am called old-fashioned when I was brought over from France for my lady to wear at the big ball! I am the latest style from abroad.”

“Here,” was the reply which seemed to come from the foot of the bed. “I'm here, friends, but sadly changed. I am really new-fashioned—not the beautiful spirit of the old days, but made into a new and shining disk. Ah, that I too might be called old-fashioned with the rest of you!”

### BAD BREEDING

Silver and gold are not the only coin; virtue, too, passes current all the world over.—Euripides.

IT IS always a temptation for those who discuss matters of politeness and etiquette to become arbitrary and to say that those who do thus-and-thus are ill bred, and that those who do so-and-so are well bred. Such a list would be bound to be unfair and could be interesting largely in giving the point of view of the one who wrote it. In matters of superficial etiquette we should not sit in judgment on others, especially in a land like ours where family and racial traditions vary so extensively. But there are some things that remain the same the world over—little acts of bad breeding that were just as reprehensible a thousand years ago as they are today. Among them are these things:

### “What's in a Name?”

By MILDRED MARSHALL

FACTS about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel.

### MADÉLINE

BIBLE history is responsible for origin of Madeline. The only possible source of the name is the New Testament story of the tragic figure, Mary Magdalen. Magdalen, it seems, is not a surname, but merely translates into “of Magdala,” the village of the sinner woman's birth, and is regarded as an adjective of place.

### A LINE O' CHEER

By John Kendrick Bangs

SOME folks think of Tomorrow, And some of Yesterday, With all the joy and sorrow That lingered on the way, But in this world of foment My task is finding how To seize the passing moment, And make the best of Now.

### Colleen Moore

Unlike many leading ladies of the screen, charming Colleen Moore, the “movie” star, has never been on the speaking stage. She was born in Port Huron, Mich., and was educated in the Convent of the Holy Name in Tampa, Fla. Miss Moore at various times has lived in a number of other cities. In private life, she admits being a plain person, with no hobbies, but a tremendous ambition to make good. Many of her admirers agree with one accord that her ambition has been realized. This is one of her latest pictures.

## PRETTY BUNGALOW FOR CITY OR FARM

Design for Home That Offers Pleasant Possibilities. IS ATTRACTIVE AND “COMFY”

Floor Plan May Be Turned About to Give All Day Rooms Front Outlook —Lends Itself Nicely to Artistic Touches.

By WILLIAM A. RADFORD

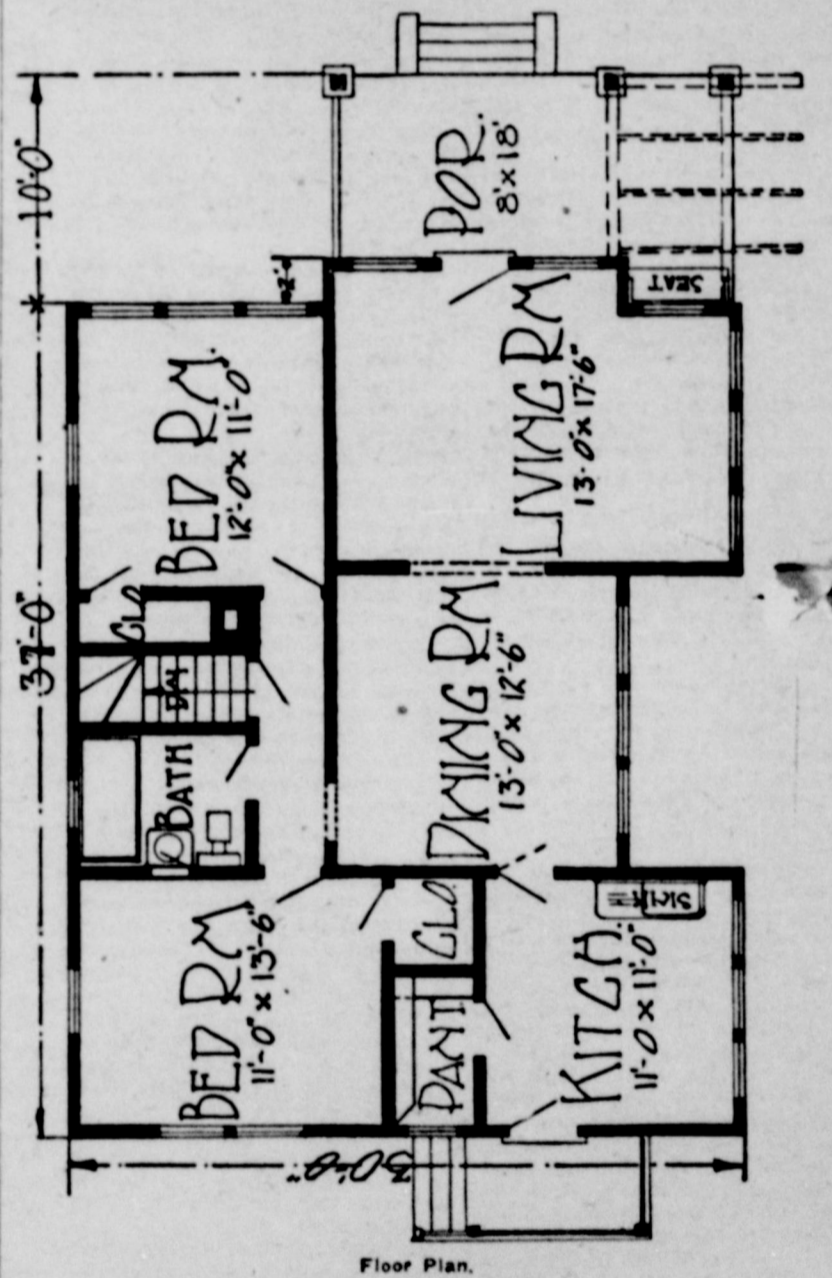

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie Avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

There are not many structural problems connected with the building of this bungalow. Even the decorative touch which is given the veranda by

about; suppose we have the veranda that is now in the front turned to the side. The result is that we have the three day rooms, the living room, the dining room and the kitchen, facing the front yard and the road. Between these three rooms and the porches the housewife will live out the greater part of the working day, consequently no one will begrudge her the pleasant view of the front of the house. Neighbors will be passing and she can wave a pleasant greeting, and the occasional automobile or wagon go by, giving a welcome break to the monotony of the day. The rear porch could be made larger and thus serve for a washroom, and the front porch instead of as shown in the illustration. This would mean no rearranging of the plan, and the vines could be trained to leave an arch of greenery.

One touch which may not be noticed on first observation is the way character has been given to the brick foundation and column supports by stepping out the brick. This does not weaken the structure of the brick wall and in fact helps to throw off moisture.

A bungalow like this could be painted in light green, or brown, or cream yellow, or gray for the body color, and white paint used for the trimming. The shingles, if cedar, could be stained a weathered finish. The walls of the

the vine-hung pergola is accomplished without much trouble, since the required lumber is simply ordinary stock from the mill. Hidden in the illustration, but shown on the plan of the veranda, is an arbor seat under the pergola. The porch or veranda is nicely dimensioned and roomy and leads directly into the living room, 13 feet by 17 feet 6 inches. The dining room is 13 feet by 12 feet 6 inches and opens off the living room. The dividing doorway suggests sliding French glass doors, and the dividing wall could have built-in bookcases on the living room side and built-in china closets on the dining room side, saving furniture outlay and improving each room greatly.

The kitchen is 11 feet by 11 feet and has three windows insuring fine light. It has a windowed pantry and space could be left under the pantry window for outside icing of the icebox. The two bedrooms are connected with the bathroom by a small corridor, and both have good closet space. Between the front bedroom and the bathroom provision has been made for a basement staircase. There might be an extra room in the attic, such as a storage room or playroom or additional sleeping quarters.

So far so good; but the man living on the farm may question the statement that this bungalow is suited for farm residence purposes, simply on the basis of what has been said of it so far.

But, suppose we turn the floor plan

rooms inside could be finished in plain oatmeal wall paper tints, or kaolin-omined or painted in plain colors of gray, ecru, cream or the so-called “neutral” shades, with the furniture upholstery and the window draperies and portieres giving the brighter contrasting shades. Properly done, there is no reason why this simple dwelling should not be pleasing exteriorly as well as within, but a real “home” as well.

### Long a Man of Leisure.

They had been talking for fully three-quarters of an hour. The whole neighborhood had been under review during that time, and characters were at a discount.

“Well,” quoth Mrs. Meggs. “I must be getting along, else my husband will ‘arf’ kill me for being so long.”

“Is he working?” asked she of the straw hat.

“No—I wisn’t were.”

“Ow long has he been out o’ work?”

“Ow long? Lemme see—I ain’t quite sure whether we was married in ‘80 or ‘81.”—London Tit-Bits.

### Porto Rico Raising Less Sugar.

The Sugar Producers’ association of Porto Rico announced its estimate of the sugar crop for 1923 as 392,792 short tons, as compared with 40,936 short tons in 1922. The Guánica Centrale has started the season, and the Aguirre, the second largest mill, and several of the smaller centrals, are also operating.

Toilettes for Afternoon; Reflect Hues of Rainbow

IT MATTERS not how many beautiful gowns one may possess, if a frock of silken crepe is not one of them, then indeed is one's wardrobe sadly incomplete.

"rainbow hat" is inclusive, in that it is not confined to a single individual type, but refers to a most lovely color scheme introduced into present-day millinery.

CREPE AFTERNOON TOILETTE

According to fashion's dictum, in respect to a prevailing number of new gowns, it is a case of ribbons here, ribbons there and ribbons everywhere.

as to produce a color symphony which simulates the rainbow hues. The hat in the center left reveals fold upon fold of crepe georgette in prismatic colors which embrace a range of choice pastel shades.

HATS VERSATILE IN CONTOUR

willing to forego black or navy, alluring new shades are offered, almond green being a favorite with wonderful coons shades, with demand for gray.

season. Many of these for sports wear are made of the popular gypsy and bandanna print silks. Flowers used for hat and bag breathe the spirit of summer.

Julie Bottomley

PROPER CARE OF LAMBS IS URGED

Rapid Development and Profitable Gains During Growing Period Are Important.

FACTORS TENDING TO STUNT

Young Animals Should Not Only Be Properly Nourished But Also Kept Free From Various Ailments—Diseases Cause Loss.

(Prepared by the United States Department of Agriculture.) The rapid development and profitable gains of lambs depend largely upon their freedom from disease and upon the nourishment they get during the first few months of their lives.

The offspring in nearly every case showed improvement also in body conformation, persistency of milk flow and more economical production.

Proper Care Prevents Disease. Lambs from well-fed ewes which are properly cared for have few troubles or diseases. There are, however, several ailments which sometimes appear among lambs which, if not given attention at the proper time, may cause considerable loss or affect their early development and hence their market value and profit.

Some of the infectious diseases of lambs, such as joint ill and others, may cause quite serious losses. Some of these diseases do not respond rapidly to treatment, but they can be prevented by proper sanitary conditions.

Remedy for Constipation. Constipation is one of the most common ailments of young lambs. This may be remedied by giving one or two ounces of castor oil or linseed oil.

CONTROL OF ORCHARD PESTS

Thorough Tillage, Pruning and General Care of Great Importance—Keep Weeds Out.

The thorough tillage, pruning and general care of orchards is of great assistance in pest control. An orchard full of weeds, grass and trash of various sorts offers favorable conditions for the harboring and propagation of some enemies.

FEEDING VALUE OF CLOVERS

Because of High Protein Content They Are Valuable for All Growing Farm Animals.

Clovers make excellent feed whether used as pasture, as hay, or as silage crops. Because of the high protein content they are valuable for growing animals and a good supplement to corn.

CAUSE LAMENESS IN HORSES

Some Are Hereditary and Others Are Environmental—Many Can Be Prevented or Checked.

There are several factors which cause lameness in horses. Some are hereditary and others are environmental. The hereditary ones can be prevented largely in the future by using only good, sound breeding stock, and the environmental effects can only be checked by providing the proper surrounding conditions for the horse.

USE PUREBRED SIRES IN IMPROVING HERD

Fifteen-Year Experiment Recently Ended at Iowa Station.

Milk Production of Scrub Cows Increased 83 Per Cent by Their Half-Blood Daughters—Many Farmers Are Afraid.

The value of purebred sires in building up a dairy herd is shown by a fifteen-year experiment recently concluded at the Iowa Agricultural college. By the use of purebred Holstein bulls, the milk production of the scrub cows was increased 83 per cent by their half-blood daughters and 180 per cent by their three-fourths blood granddaughters.

The superiority of purebreds and grades over scrubs in actual average monthly production is clearly proved by the figures. One of the main reasons the scrubs showed such poor production was their lack of persistency.

Many farmers milking a string of scrub cows want to own better cattle but fear the cost. They are anxious to improve the milking qualities of their herds and really enter in the dairy business. They fear to "buy in" and do not "grow in" because they are unaware of the rapid progress possible in grading up.

TO PROPERLY MIX BORDEAUX

Of Much Importance to Get Quantities of Materials Right—Right Way to Prepare.

It is almost as important to properly mix bordeaux as it is to get the quantities of materials right, and it is of far greater importance in the matter of ease of application.

There is a right way and a wrong way of making up bordeaux. For example, suppose you are making a 5.5-50 batch. This would be made up of five pounds of copper sulphate or blue vitriol and five pounds of freshly burned lime in 50 gallons of water.

Slake the lime, pouring on a little hot water at first, until the lime becomes active, then cold water should be added slowly as the lime slakes until a fairly thin white liquid results.

There is all the difference in the world in bordeaux mixture properly prepared and bordeaux mixture improperly prepared.

SPREAD OF WEEDS ON FARM

Large Percentage of Noxious Plants Are Put on Farm by Improper Planting of Seed.

There are many natural agencies, such as wind, water, animals, etc., which cause the spread of weeds. There is still another way in which weeds are brought on the farm; that is, by sowing seed which has mixed with it many weed seeds.

AVOID SORE EYES OF LAMBS

Trouble Can Be Controlled by Rubbing Back Hairs Which Have Been Scratching Eyeball.

Many a lamb has one or both eyes sore before he is born these days just because the eyelid has turned in against the ball and started irritation by reason of the hairs scratching the eyeball.

Time to Sow Clover.

You can sow clover seed or sweet clover seed any time after the first of the year.

Place for Surplus Manure. If you are in doubt as to where that load of manure should go, put it on the garden.

MRS. M. SNYDER GAINS 20 LBS.

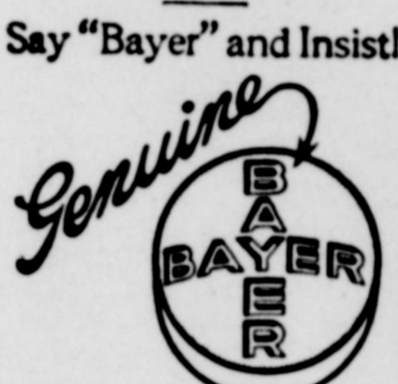

Declares Tanlac Overcame Rheumatism and Stomach Trouble, Restoring Full Vigor.

"Tanlac built me up twenty pounds, and I am as happy over my new health as my little boy was over his Christmas toys," declared Mrs. Mary Snyder, 838 Estes St., Charlottesville, Va.

"For two years I suffered from stomach trouble, rheumatism and a nervous, run-down condition. I was almost a skeleton and got to the point where, when I went to bed nights, I wondered if I would be able to get up in the morning.

No Findings to Report. A new congressman was called before a fussy floor leader, who proceeded to interrogate him.

Aspirin Say "Bayer" and Insist!

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product prescribed by physicians over twenty-two years and proved safe by millions for

Colds Headache Toothache Lumbago Earache Rheumatism Neuralgia Pain, Pain

Difficult to Understand. "It's hard to understand." "What is it?" "The fact that children are such a nuisance to the neighbors who have only a dog."

Some men can't understand why the truth will nearly always serve better than a lie.

Another Whack at Lawyers.

During the course of a trial some years ago, a witness was asked by the prosecuting attorney if he knew what it meant to take an oath.

Cuticura Comforts Baby's Skin When red, rough and itching, by hot baths of Cuticura Soap and touches of Cuticura Ointment.

New Use for Mousetraps. The mousetrap has a new government job. Finding English sparrows, which have been committing serious depredations on the immature corn and mango beans growing in the experimental plots of the federal experiment station at Honolulu, Hawaii, too wary to eat poisoned grain, the mousetrap was called into service.

"MOMUS SPECIAL" PASSES THROUGH SANDERSON

Invitations were extended to the citizens of Sanderson and other Border Cities from Mayor George E. Cryer of Los Angeles to be present at the Monroe Doctrine Centennial and Motion Picture Exposition in Los Angeles delivered by Miss Ruth Roland, scene star, as the "Momus Special" stood in the depot yards, Monday evening, April 9th.

President Warren G. Harding, and a number of cabinet members and diplomats are expected

to attend the celebration, which opens July 2nd and extends through to August 4th. Enthusiasm marked the arrival of the "Momus Special" at the Southern Pacific station and Miss Roland was the center of a group that crowded the observation platform, which was a revelation to the excursionists. At New Orleans the delegation will take the steamship Momus for New York where Will Hays and many motion picture stars are expected to participate in the reception.

Prof. J. E. MacCallmont left last Saturday for Del Rio where he was operated on Monday morning by Dr. Middlebrook. He underwent the operation successfully and is doing well.

Hemstitching and picoting silk 10c and cotton 8c per yard, also braiding. Mrs. Walter DuBose, Box 442, Uvalde, Texas.

RATTLE OF THE RAIL

A new wrecking crane has been received at El Paso.

S. R. Ord went to Del Rio Wednesday on account of sickness in the family.

A doubleheader train with 50 cars of bananas passed through Sanderson Thursday going west.

R. J. Cartwright went to El Paso Monday on account of sickness of his mother.

A special with the San Francisco Chamber of Commerce passed through Sanderson this morning enroute to Mexico City.

R. S. Ingram made a trip to El Paso Monday.

Fireman P. Anderson came down from El Paso Monday to take a regular job out of here.

John Clark returned Tuesday from a trip to El Paso.

Brakeman N. Taylor returned the first of the week from Houston where he had been to attend the funeral of an uncle who died there recently.

Brakeman L. M. Van Zandt was on several trips this week.

Conductor A. C. Clatfelter was out several days the past week.

Yardmaster J. C. Hicks left the first of the week for New Orleans and Birmingham, Ala., where he expects to spend several months visiting friends and relatives. During his absence S. C. Bodkin is acting day yardmaster.

PITY THE JUDGE

Rumor says that Judge Henshaw intended to officiate in the capacity of "mayor" when the "Momus Special" arrived here last Monday. It is said that the Judge had a very flowery speech all fixed up, a literary gem that would have startled the world if it had been delivered, but when the "special" rolled in and the beautiful movie star, Miss Ruth Rowland, with a bewitching smile on her lips and a magnetic twinkle in her eye, stepped out on the platform of the car and in silvery tones asked for the "mayor" of Sanderson to come forward, all of the Judge's courage oozed out, his tongue became paralyzed, and he could neither move nor speak. And that great speech that the Judge had prepared and that some day would have adorned the walls of the hall of fame, was lost on the desert air.

However, rumor also says that a radio message from Lordsburg, New Mexico, stated that when the "special" passed through Lordsburg and Miss Rowland called for the "mayor" of the town to come forward, John Whistler stepped to the front and the beautiful movie star gave him a rousing "smack" by way of introduction. Can you blame the Judge for losing his courage? We should say no!

ISN'T THIS TRUE

Some of our citizens are getting their fishing tackle out of the storage room and overhauling it, and this is a sure sign that spring is here. The hills and valleys are covered with green; red, purple, yellow and white flowers dot the roadside; birds of bright plumage flit from bush to bush; soft breezes blow over the ranges; the sun shines brightly down; the fish are just longing to be landed in the frying pan; the— Oh! pshaw! who can keep his mind on work at this time of the year, anyway?

Eugene Shelton Jr., son of Mrs. O. E. Shelton is attending the Normal at Alpine.

Your clothes will always look neat and clean if you have them pressed and cleaned at the Royal Tailor Shop. Phone No. 6, and we will call for your package and deliver when finished.

Church News of Sanderson

(This column is devoted to the interest of our churches and will be run each Saturday)

Presbyterian Sunday School opened April 8th, with an attendance of only 71, over 25 being absent; some out of town, others on sick list. We miss them.

Bro. McMillan filled his regular appointment last Sunday and preached two fine sermons. Two were received into the church and 3 children baptized.

The Ladies Auxilliary of the Presbyterian church met Monday at the home of Mrs. Stovell. It was a very interesting meeting with a good Bible study. A large number were present and discussed the making of clothing for one adopted baby in orphans home.

The Junior League met at the Methodist church as usual last Sunday. The president was absent, being called away on account of her father being sick.

The Senior League met at 6:30 and had a good study. The time of meeting has been changed to 7 p. m. now.

Rev. Bickley will fill his regular appointment at the Methodist church tomorrow (Sunday.) All are cordially invited to come.

Bro. Adams' regular appointment is Sunday, April 22. All cordially invited.

The Baptist Ladies Aid met at the Presbyterian church last Wednesday. Next Wednesday, April 25th, is work day. All please bring quilt scraps, scissors etc., for work.

Prayer meeting on the 11th was well attended. Mr. Garrison acted as leader. The lesson was the 98th Psalm. All invited to come and help the good work along.

Accordion, box and side pliating; hemstitching, scydl., pinking, braiding, buttons and buttonholes made. Mrs. H. B. Houston, Uvalde, Texas.

Mrs. J. W. McKee returned from Cuero and Austin Monday. Mrs. McKee reports that her daughter, Myrie, who is in her last year at the University is doing fine. Mrs. McKee also attended the Ladies Aid of the Presbyterian Church.

Miss Sydney Lawrence who is attending school at Fort Stockton spent the week-end with her parents, Mr. and Mrs. Hy Lawrence.

Come in and look over our snappy styles for that new Spring suit at the Royal Tailor Shop.

Mrs. Dixie Schupbach and children left Sunday evening for El Paso after receiving word that her father was very ill at that place.

"Pardon My French" a farce comedy featuring Vivian Martin will be shown at the Princess Theater tonight at eight o'clock.

Dudley Jennings was in town Thursday looking like a new man—beardless.
