ARM EQUIPMENT

One thing you'll like about the Ford . it's simple in design and built right. Doesn't take much servicing. Yet when it needs something done here or there, it's easy to do.

For example, we can reline brakes in almost no time...don't have to pull the axle. Transmission, steering . . . every-thing is designed for efficient service.

With this new Ford Tractor, you won't need us often but when you do, you'll like our work. We service all Ford Tractors, and Dearborn Farm Equipment, with genuine parts.

From where I sit ... by Joe Marsh

To Dunk or Not To Dunk?

Dunking doughnuts is Sober Hopkins' favorite morning pastime ... and for a long time Ma Hopkins has been trying to break him of the habit. Feels it sets a bad example for the children.

So one morning she puts a heavy frosting of chocolate on the doughnuts... figuring that will stop him. Sober thinks it over for a while and then: Dunk! Taste? Smile!! And Sober compliments the missus on the lovely mocha flavor!

I guess there'll always be two schools of thought: to dunk or not to dunk. But from where I sit, it's a matter of personal choice and taste-like seme folks prefer beer to cider, ale to beer. And the less we criticize those differences of taste, the better.

In fact, Ma Hopkins got so curious about the flavor of chocolatecovered doughnuts dunked in coffee, that she tried it herself. Nowyou've guessed it-she's a daily dunker, too!

goe Marsh

Surplus Hangar To Become P. E. **Building at College**

building at West Texas State rally derived their name from College began at Pampa Army he prevalence of rabies spread Air Field this week. The first from rabid dogs at that season section was due to reach the of the year, but actually rables campus Friday, announced Dr. accurs at all times of the year. James P. Cornette, president. Contract for moving the han-

gar was let to Ira Stephenson of Amarillo. The huge building, released by the Civil Aeronautics Authority to the college through the War Assets Administration, s expected to be ready for use by next fall. It is 212 feet long by 160 feet. Unobstructed floor by 140 fect wide.

Dr. Cornette said the hangar would be used for physical education classes and a gymnasium Exact location for its erection has not been decided, but it will be north of the present athletic

I N THIS SECTION where winter weather usually gets unpleasant, you'll find a home laundry dryer an economical luxury Just think, no more bundling up to go out to the clothes line, no more waiting for "good drying weather". Just put your wash, fresh from your washing machine, into your home dryer. A gentle stream of warm air will toss your clothes to dryness in just a few minutes. Your family's clothing will last longer, with no bitter wind pulling at them, no burning sun bleaching them.

Best of all, of course, is the fact that with electric service cheaper than ever before, your home laundry dryer will cost just a few pennies a month to operate.

See an appliance dealer soon about a home laundry dryer.

Super Aircraft Carrier Planned by the Navy

This is an artist's drawing of the U. S. Navy's 65,000-ton, flush-deck aircraft carrier. Originally proposed by the late Admiral Marc A. Mitscher, the design of this carrier has been under study since October, 1945. Although the basic design and major characteristics of the ship have been fixed, the location of certain structures, such as the stacks, elevators and the telescopic bridge, is still under study. The artist's conception reflects the Navy's present plans for the carrier. The largest U. S. Naval vessel to be constructed so far, the ship will measure 130 feet longer on the water-line than the 45,000-ton MIDWAY-class carriers. Her overall length will be 1,090 feet. Her water-line beam will be 130 feet and maximum fixed width will be 190 feet. Including temporary structures which may be hinged up or down, the maximum width of the carrier will be 236 feet. Speed will be about 33 knots.
