R. F. Andrews.
Andrews, aged 79 years, died Sunday morning, October 4, at his home here. He was a native of Illinois and the remains will be held to rest here. The funeral will be held Monday morning at 10 o'clock at the home of Mrs. Andrews. He is survived by his wife, Mrs. Andrews, and several children.

Sunbeam Notes.
Sunbeams met Tuesday and had a very enjoyable program. Evelyn Owen was the featured speaker. The next meeting will be held at the church on October 12.

Chicken Supper.
A chicken supper will be held at the school on Friday, October 5, at 6 o'clock.

Bazaar.
The ladies of the Presbyterian church will hold a bazaar on Saturday, Nov. 3, at the Masonic hall. The doors will open promptly at 2:30 and nothing will be sold before the doors are opened. They will have for sale pies, cakes, coffee and tea, candy, and all kinds of fancy work.

The Presbyterian Church.
Happiness is the universal quest of mankind—always has been, always will be. The quest for happiness is a worthy quest—a legitimate quest. Therefore, self-interest alone should prompt everyone to adopt the mode of life that offers the best chance for success in the worthy, legitimate quest for happiness. Having the thought of happiness in mind, Sunday morning's sermon will have as its theme, "The Happy People." The service begins promptly at 11 o'clock and closes promptly at 12 o'clock. The church school begins at 10 a. m. Excellent teachers are here to lead the thought of all ages in Christian truths. This church endeavors to put on a program that is instructive, worshipful and soul-quickening. We think we can help you, and we know you can help us—by your presence. And that "you" means everybody who cares to worship with us. Melvin Pollard will play Sunday.

BAZAAR
The ladies of the Presbyterian church will hold a bazaar on Saturday, Nov. 3, at the Masonic hall. The doors will open promptly at 2:30 and nothing will be sold before the doors are opened. They will have for sale pies, cakes, coffee and tea, candy, and all kinds of fancy work.

OIL NEWS OF TERRELL COUNTY.

(Special Correspondent.)

The prospects toward the path of oil development looks very bright for Terrell County as there are now seven wells in the process of drilling or to be drilled in the near future. The Trans-Pecos Development Company shut their well down a few days ago at 1,700 feet in brown sandy lime, and are now waiting for casing. The Champlin Oil & Refining Company is drilling on the J. M. Corder ranch and reported to be below the depth of 3,700 feet. The Milham Corporation is down over 4,220 feet in their well on section 76, Block Y, and are still drilling in rotten black shale. The Trees Oil Corporation is reported as having trouble in setting casing down to the depth of 1,900 feet on the B. T. Corder ranch on section 41, block 2, C. C. S. D. & R. G. N. G. Ry. Co. Survey.

The Big Bend Oil Corporation has been selling a few spreads to major companies with the view of drilling again on section 155, block D, M. K. & T. E. Ry. Co. Survey. The Phillips Petroleum Company, The Sun Oil Company, The Independent Oil & Gas Company, and The Gibson Oil Corporation are a few of the major companies who have already purchased spreads from the Big Bend Oil Corporation according to the Oil and Gas Lease Records of this county.

Terrell County can look for a big play along the line of drilling operations the latter part of this year or in the early spring of 1929, as the Gilcrease Oil Company and the Vacuum Oil Company have each had the chief geologists of their company doing geological work in this county recently, and the chief geologist for the Gilcrease Oil Company is still in the county with his geological staff. Both of these companies already have quite a bit of acreage leased. There are also a few other geologists working in the county at the present time and refused to let local parties here know their connections.

The oil and gas lease records of this county discloses the fact that there are over fifty-two major or bona fide oil companies already holding leases in this county and many of them have already purchased royalties ahead of development. Terrell County is bound to get a big play as it is only 15 miles south of the famous Yates Pool and is about the same distance west of an asphalt out-crop in Val Verde County. Pecos, Terrell and Val Verde Counties have been fairly well detailed by geologists, but there are quite a few interesting features that have been overlooked.

\$10.95 for 9x12 Gold Seal
goleum rugs at Kerr's, October 1st to October 6th. Other sizes in proportion. Buy rugs for those extra rooms.

Cactus Bridge Club.
The members of the Cactus Bridge Club and a few invited guests were entertained last Thursday afternoon at the home of Mrs. Frank Robertson with Mrs. T. H. Butler as hostess. Flowers in the lovely fall shades were placed throughout the living room.

A fruit bowl was the first prize that was won by Mrs. H. E. Fletcher. Mrs. E. F. Howard made second high score and was given a pair of pillow cases as the prize.

The hostess served a plate lunch consisting of chicken salad sandwiches, olives, potato chips and coffee to five tables of players.

Auxiliary Meets.
The Woman's Auxiliary to the Presbyterian church met Monday at the church for the Bible study meeting. There were 14 members present.

Their social and business meeting will be held next Monday afternoon, October 8, at the home of Mrs. H. L. Stuckey.

W. D. Hunter returned Monday from Del Rio where he spent the week-end on business.

HUDSON-ESSEX DEALER RECEIVES CARS.

Last Saturday afternoon a car load of Hudson and Essex cars were received by Jim Nance, the local agent, and are now on display in the new show and sales room which has just recently been completed and is located next door to the Empire Cleaners and Dyers on Oak Street. In this shipment a Essex Sedan, a Hudson Coupe and a Hudson Sedan was sent. The cars have been reviewed by numerous people this week and Mr. Nance has been busy demonstrating both makes of cars.

HIGH SCHOOL TO PUBLISH A PAPER

The first issue of The Eagle, the new paper of the Sanderson High School, was printed by The Times this week. This paper will be published regularly every month by the following staff: Editor, Albert Schupbach; assistant editor, Hazel Hill; business manager, Ray Quiltrough; assistant business manager, Beverly Franklin; athletic editor, Bill Henshaw; secretary, Evelyn Griffith; Mrs. Murley and Miss Bowers are sponsors for the paper. The Eagle is published in the interest of the high school and will be a help to the students in a literary way as well as for business training. It's publication is made possible by the various business friends who placed their advertisement with the paper. This first issue was well gotten up and is a credit to the staff and to the school.

FOOTBALL GAME

Marfa High School entertained the Sanderson Eagles and their friends in true western style when the local football squad and the girls' volley ball team met the Marfa teams in the first games of the season last Saturday. Although both games resulted in defeats for the Sanderson teams as far as the scores were concerned, it is generally felt by the school that the trip was a profitable one. Hard, daily practices have been the schedule for both volley ball and football this week in preparation for other games.

The visitors were met at Marfa by a large representation from their school. They were shown through their building and grounds. An invitation was extended the Sanderson crowd to a picnic after the football game at Paisano Pass, the camp between Marfa and Alpine where the annual Baptist Encampment is held. Marfa High School will return the games some time within the next two or three weeks.

CRANE CITY TO PLAY HERE SATURDAY

Crane City High School will come to Sanderson this Saturday (October 6) as the guests of the Sanderson High School for the second football game of the season. The game will be played at the baseball park. The exact hour for the game has not been decided.

This is the first home game of the season for the local squad, the boys are anxious to make a good showing. Daily practices have been the main after school sport for the high school boys the past several weeks. Coach Thad Murley is putting the team through hard workouts in preparation for the Saturday and following games.

All the business houses in Sanderson will close Saturday for this game. —The Eagle.

Mr. and Mrs. D. B. Pouncey of Alpine spent last Saturday here as the guest of Mr. and Mrs. H. L. Stuckey Sr.

Bob and Jean O'Dell, contractors at Alpine, spent Sunday here with their brother, John O'Dell and family.

Mr. and Mrs. Robert Duncan were visitors in town this week from their ranch near the Pecos.

Some men have pep
for everything
but work.

SIMPLE BUT SANE

It does not cost a lot of kale to make yourself look nifty. If you're a frugal human male, you can be neat too thrifty. You need not spend a lot of cash if clothing costs unnerved you; for duds may come and duds may go, but we will always serve you!

Empire Cleaners & Dyers

Frank Robertson, Owner & Mgr.

Bazaar

The ladies of the Altar and Rosary Society will hold their semi-annual Bazaar at the Bohman Confectionery on Saturday, October 6. There will be many useful articles for sale, such as aprons, children's bonnets, etc. Pies and cakes will also be sold.

Clyde Deaton was a business visitor in Del Rio last week-end.

A COMPARISON OF SERVICES

Have goods from stores delivered to your home, have a suit of clothes altered, have a professional man perform a service, and you expect to pay for each and every service performed.

Ask a bank to perform any financial service—keep your books, furnish you with supplies, protect your funds, forward or collect your checks and you pay not a single penny.

All your banker asks for his services is the opportunity of making a fair profit.

This can be done only by maintaining a reasonable balance in your checking account.

The service fee at this bank simply gives us the possibility of an even break.

Sanderson State Bank

Sanderson, Texas

Miss Naomi Willard of San Antonio and Mr. and Mrs. B. M. Alvord of Houston were guests of Mr. and Mrs. D. A. Pollard this week.

Mr. and Mrs. Ed Downie, who have been in San Antonio the past few months, came in the first of the week for several days visit.

Mrs. M. H. Goode Jr. from the ranch near Sheffield visited her parents Mr. and Mrs. W. E. Lea and other relatives here this week.

Mr. and Mrs. W. H. Savage and son left Sunday evening for San Antonio where Mrs. Savage went to consult a specialist. She has not been well the past week.

Real Span of Human Education Extends From the Cradle to the Grave

By ANNA BELLE JOHNSTON, Nursery School Expert.

IT IS too often assumed that education begins at the school age of six years. Emotional personality and habitual slants begin at birth.

Children do not go untrained until six years of age. They are being trained somehow, somewhere, every hour of their lives.

The responsibility may rest entirely with the parents, but many of them do not feel they are adequately trained or have sufficient time or proper facilities.

When families become convinced of the desirability of holidays for mothers away from their children a great step in correcting morbid emotional attitudes will have been taken.

This should mean a daily as well as an annual period of freedom. In the former it is the nursery school that is providing the desired separation.

The infant is in the nursery school three hours each day. This gives the mother an opportunity to view her own work and a chance for recreation while the child is receiving the scientific attention it should have during these early years.

The nursery school does not assume all the responsibility. The mother spends one morning a month in the school observing methods followed in handling her child.

Nursery schools aim to provide a laboratory in which the student may learn child care with real children as the subjects of their study.

New Artistic Era Certain to Be the Result of America's Material Activity

By PROF. DE WITT HENRY PARKER, University of Michigan.

History shows that periods of high artistic activity usually coincide with epochs of political and commercial pre-eminence, and into the latter we have already come.

Mechanism will go on its unrepentant way, but play and art will bring us the freedom which we lack. The harmony which we achieve through play is accomplished by an exclusion of worry and work.

We are now fast building a tradition and a culture of our own. The mechanical nature of our civilization has created a need for art.

Unlimited Possibilities of Achievement Offered in the Church Life

By REV. ROBERT S. CHALMERS (Episcopal), Dallas, Texas.

To judge from the articles one reads frequently in all the greater magazines today, the supreme activity of the modern Christian church is either controversy or raising funds.

To hear certain people talk and to read their writings it would almost seem as if the principal objectives of the Episcopal church was to preserve the thirty-nine articles of religion.

Through the school of applied religion the national council of the Episcopal church hopes to create a different impression than that the clergy are always engaged in an every-member canvass.

Treaty for Renunciation of War Inspiring Token of International Love

By REV. E. R. DARLINGTON, New York.

The spirit of the nations who have approved the Kellogg treaty for the renunciation of war is a token of international love. The best use that we can have age-long life for is love.

At first, in the dim ages of Plato's time, all that love desired was the possession of beauty. Again, there is the kind of love where the lover desires not only his other half, but possession of the beautiful and birth in beauty.

The true order of love is to advance from love of one to all fair forms, then to fair practices and lastly to fair thoughts. In this connection, such a gesture as the ratification of the peace treaties would seem to show the highest order of love in nations having advanced to the conception of international justice.

Rid of Constipation, Improved Both Health and Looks

By ANNA BELLE JOHNSTON, Nursery School Expert.

"I suffered from stomach and bowel trouble for a number of years. I finally got so bad that I had no life or energy left, and felt that there was no help for me.

"I am still taking your Milks Emulsion and improving each day. I know I would have been in my grave had it not been for your Emulsion. I love to take it. It is so pleasant and agreeable."

"I only weighed 108 pounds when I began to use Milks Emulsion, and now I weigh 138 pounds. It has cleared up my complexion, made my eyes bright and a difference in my looks, as you will see by the two pictures. I don't look like the same woman. To my mind it is Nature's beautifier."

"I try to get everyone who I meet to take Milks Emulsion as it is the most wonderful medicine in the world."

Yours truly, MISS SARAH KATE KNIGHT, 722 Anderson St., Bristol, Tenn.

Sold by all druggists under a guarantee to give satisfaction or money refunded. The Milks Emulsion Co., Terre Haute, Ind.—Adv.

TRAWLER'S CREW IN FIGHT WITH SHARKS

Captain of Vessel Reports He Saw 7,000.

Fleetwood, Eng.—While fishing for herring at grounds known as Klondyke, which lie between the north coast of Ireland and Barra Head, in the south Hebridean islands, a steam trawler had a thrilling fight with a shoal of sharks.

"During our voyage," Skipper Wright explained when the Castelnau returned to Fleetwood, "we came upon shoals of vicious sharks. There must have been 6,000 or 7,000 lashing the sea into foam for miles around. They completely surrounded our boat and bit huge holes in our net, and it was only with the utmost difficulty that we could haul it in.

Hooked 18 Sharks.

"The hungry sharks were so immediately and we decided to clear the infested water as much as possible. We laid hooks on long poles which we suspended from the side of the ship, but the twine was not strong enough, and as the sharks grabbed the hooks with bait on they gave a violent lurch and carried the hooks and twine away with them.

Drowned One by One.

Wife Sues Poker Club for Husband's Losses

Washington.—The Supreme court was asked to decide whether clubs are liable for damages to wives for depriving them of the companionship of their husband's income.

HinJenburg Dam Makes Ocean-Built New Land

Westerland-on-Sylt, Germany.—Through the building of the Hindenburg dam to the island of Sylt, two years ago, the swift current sweeping between the island and the mainland was checked, with the result that silt began to accumulate in the so-called Watten sea.

THE COLFAX BOOKPLATE

By AGNES MILLER

WNU Service

© by The Century Co.

SYNOPSIS

On a certain Monday morning Miss Constance Fuller, seller of rare books at Darrow's Bookshop, New York, notices that the first customer is a dignified old gentleman, who saunters into the alcove placarded "Medical Works." Peter Burton, one of the employees, amazes Constance by telling her he paid \$150 at auction for an old law book containing a Colfax bookplate. Suddenly a girl's shriek of "Murder!" rings out. The elderly customer is on the floor unconscious with his right wrist slashed. Just before the shrieking girl falls in a faint, she calls out to Peter: "Keep it! Keep it for me!" Peter's sister, Nancy, began that morning working at Darrow's. Nancy tells Constance of her elopement with Brandon Tower, an elopement which was cut short when Tower attempted to make off with Nancy's suitcase. Constance explains Darrow's card-index system to Captain Ashland, a nephew of Mr. Darrow's. They examine the book Peter paid \$150 for and find the bookplate to be a forgery. Constance is asked to assist Detective Almy in his investigation of the murder of the elderly gentleman. The girl who fainted, Julia Grosvenor, turns out to be his granddaughter. She can throw no light on the mystery.

CHAPTER VI—Continued

"It seems that she was the only child of his younger daughter Mary, who has been long dead. With the name or whereabouts of her father, she was never acquainted by any one. She tells me her grandfather would never mention either of her parents. It seems to have had an unreasoning grudge against the girl, which is partially explained by what I can learn of his character. On this point, and on the old gentleman's antecedents, Mr. Henry Ballard has been of some service to us. Mr. Ballard says Mr. Grosvenor never mentioned his granddaughter except once. That occasion was just after the girl had finished her artistic studies in Italy, where she had been for several years learning stained-glass designing, and had come back here to live. Mr. Ballard, knowing his client's health to be rather precarious, made some suggestion to him in regard to making proper provision for the girl in case of his death. This Mr. Grosvenor wholly declined to do. He told Mr. Ballard that his grandson, Charles MacIvor, the son of his elder daughter—he had just the two children—was his only legitimate heir, and he had no wish but to see the whole estate go to him."

"It's a wonder he acknowledged his granddaughter at all if he wouldn't do anything for her," said I.

"As a matter of fact," Mr. Almy reminded me, "he did a number of things for her; more than plenty of people with his disposition and traditions would have done. Mr. Ballard himself admitted. He had her educated properly, her artistic gift was developed, he gave her the protection of a home. The truth was, Miss Fuller, that this Mr. Charles Grosvenor was an unusually proud man. His father bought that fine Normandy terrace house in what was, a century ago, a very exclusive neighborhood, having come to live here about 1820, though a Virginian by birth. The little Mr. Ballard and I can learn about him tells us that he was a distinguished physician; he was especially known for his ability in handling yellow-fever epidemics. Now, Mr. Charles Grosvenor, Mr. Ballard says, was full of typical southern family pride, but it was called on to suffer so many crushing blows that he became embittered, and, indeed, practically a recluse."

"I think I understand," I observed, as Mr. Almy paused a moment. "His younger daughter was the mother of this unwelcome child, and as he had no son, the family name ended; you say his grandson is named MacIvor. That must have been indeed a terrible blow for such a man as you describe Mr. Grosvenor to have been. His wife is not living, I suppose?"

"No, she died, unfortunately, while he was still quite a young man. He outlived all his immediate family. His elder daughter, Charles MacIvor's mother, died a few years ago, after a disastrous marriage which ended in a divorce. Indeed, the whole family history is tragic, and deepens the mystery surrounding Mr. Grosvenor. He had no intimates but his grandson, who was a great favorite with him."

"And he didn't live in New York, I understand?"

"No, his residence was Richmond; actually, however, he spent a good deal of time here, making his home in Normandy terrace. We've found out from his cousin that he's been intending for some time to enter business there, we sent a radio to the liner; but have had no reply as yet."

"Then Miss Grosvenor is alone? A difficult situation for her?"

"I'm afraid her situation has always been difficult. Until about this time she would have been too young, and too dependent upon her grandfather, to show resentment at his ignoring her as he did, or to oppose him; especially

as she is an extraordinarily reticent and delicate sort of girl."

"I was becoming interested."

"You've talked with her?" I suggested.

"Yes. She seems to me the most solitary human being I've ever met. All the family she has now, at the age of twenty, consists of one cousin who is out of the country. Her grandfather sent her away to boarding-school for years, and the young people she knew there, of course, are scattered. Then she went to Italy to study for three years, and came back eight months ago, so that practically all the friends she has now are mere business acquaintances."

"Oh, I think that looks as if she had been intentionally cut off from other people; don't you?" I demanded. Even taking account, he must have realized that she was blameless in that matter, and in all other respects apparently a credit to him. Then, from your description, he was the exact type of old-fashioned man who invariably objects to having any woman connected with him work or enter a profession, and, however badly he treated her, he did acknowledge her as his granddaughter. Oh, I'll never believe that such a total lack of sympathy with her during his life, and a decision to leave her stranded at his death wasn't due to some powerful motive!"

"Feminine intuition, maybe; certainly not pure reason!" commented Mr. Almy, who had heard me out, however. "Well, it might be of the greatest value to find out what the motive was, if it existed. The truth is, that Miss Grosvenor, on her side, had evidently no high regard for her grandfather. She has said nothing whatever against him, but it is evident that she very bitterly resented the way he treated her, and furthermore, this long-pent-up resentment seems to have burst out violently last Sunday afternoon. She does not know this yet, but she and her grandfather were then overheard quarreling bitterly."

"Oh, dear!" I faltered. "About what? I suppose somebody listened?"

"Somebody did; but unfortunately his command of English was not equal to the situation. All he can definitely state is that the quarrel apparently concerned some book. He heard the word 'book' over and over again, and sticks to his story; though a book might seem a strange object of violent dispute between an old man and a young girl."

I managed to give no sign of the fact that that word "book" had made my heart stop short for a second, and then make up six beats at once; nor of the fact that it had spurred me to great eagerness for the proposed visit where I had previously felt only reluctance. I inquired:

"Shall I ask Miss Grosvenor anything special this afternoon?"

"No. Let her talk, rather than get her to talk. Don't under any circumstances press her. She was told you visit her is to thank you for your attention. She asked for you before I told her you were working with me in an attempt to clear up the mystery about her grandfather's death."

"If the invitation still stands, then," said I, thoughtfully. "I can at least go on from there."

So a few hours later I passed between the box-trees flanking Number 14 Normandy terrace; and there in the hall, as he had a right to be, was Ernesto.

"Do you know if Miss Grosvenor's in?" I asked. "I've been sent from Darrow's to see her on business."

"Yes, she's in," responded Ernesto, hesitantly.

"Well, I think she'll see me."

"You could try. She doesn't see anybody but that old fellow—lawyer; he came once—and police."

"She's not all alone here, I hope."

"Her housekeeper sleeps here, now. My wife, she's been to see her, but the young lady don't talk. She don't know many people, see?" Ernesto again hesitated discreetly, but a chance to talk was too much temptation. "That old fellow, her grandfather, he didn't treat her so good."

"I appeared amazed.

"She worked hard, didn't she?" I suggested.

"Sure! And she is beautiful young lady, and the old fellow's rich. But he don't give her the money to her."

"Keep it, did he?"

"Yeah-h-h! And he gives it to the young fellow. You know—grandson—Ernesto here bestow on me a wink of an utterly classic description, which I officially ignored, but readily interpreted to mean that Mr. Charles MacIvor was a good and versatile spender of the ancestral cash. With dignity I ventured on the remark that it was unfortunate that Miss Grosvenor's cousin should be unavailable at this critical time.

"Bah-h-h! He's not so good she couldn't do without him! I know him; he's all the time here. She likes him pretty good, I'm sorry. The old fellow is now as large as that of a swan. It is now highly prized and as such as \$1,500 has been paid for a single one."

ure business! Always a good time if you got money, no? All right, you go see the young lady."

Having mounted the first flight, I rapped with a brass knocker on a black door in the front of the second-story hall. An elderly maid-servant admitted me, and ushered me directly into the front room.

It was a very long room, still used, as designed ninety years ago, for a drawing room. Handsome rosewood furniture filled the apartment. The thick carpet was blue with pink rose wreaths; blue brocade curtains draped the windows, through which I caught a glimpse of the long line of fluted gray balcony columns. In the shadows at the back of the room I caught the glimmer of tall glass-doored bookcases.

The effect of the room was intensely grand, formal, forbidding. Amid pairs of ruby-glass vases, and china dogs, and painted plates, the one touch of individuality was a miniature waltz set work table inconspicuously placed among some books on a little table in a corner. It was complete in every

"And There in Front of Me, Lying on the Floor, I Saw My Grandfather."

detail, though only about ten inches high, and I thought must be very useful to its owner, if she were as fine a sewer as she was an artist. And then a door opened, and she came into that strange, formal, bright-colored room, a sharp setting for a somber, arresting personality.

Julia Grosvenor was in black, as I had seen her before; her face was still perfectly white; but now self-possession characterized her bearing. She came forward with a certain grace despite her limp on the right foot, which I should of course have expected, but which, for some reason, surprised me for an instant. Through my mind unaccountably shot that sentence from Daisy Abbott's story: "After Miss Grosvenor stopped short, she stumbled."

"How do you do?" She touched my hand, and sat down on the long blue sofa opposite me. "I am glad to see you . . . again."

Her voice had that clear ringing note I had heard before. I said:

"Oh, yes, you've seen me at my desk."

"I meant," she rejoined very directly, "that I saw you when you were taking care of me last Monday. I came to one instant when you were

(TO BE CONTINUED.)

Lilac Always Blossom of Love and Lovers

The lilac is an oriental blossom, coming to us originally by way of Turkey and Spain. It is supposed to be the flower of love and lovers, marking the heyday of spring. The love of the "lilac," to give it an Old-world name is varied and pleasant. A spray of white lilac, buried on the eve of a May moon, is a midland charm which maidens practiced, believing that by the time the lilac died they would have the heart of the man they desired. If as many lilac petals as composed the name of a lover were strung on triple threads of white silk, and worn in a little bag next to the heart, before next lilac time came the lover would be won by

this secret charm. If you have lilac in your garden no ghost can enter your house; if white lilac grows beside your door you will never be without love and luck; if you pluck a spray of lilac without your lover's knowledge when walking with him, put one of its petals in his drink; if he swallows it, he is yours forever and a day. A "luck lilac," usually found on white lilac, has five divisions of the petals instead of four. If you are in love, look for a luck lilac, swallow it, and your loved one will be faithful for all time! Thus love and lilac are irrevocably related.

Student of Farm Life

Margie had often seen cows in the pasture and had had the process of supply and demand, as pertaining to dairy products, explained to her by her mother. However, personal contact with the gentler species of the cow had not been her privilege. On a recent visit to the farm, she was taken to the barn just at milking time.

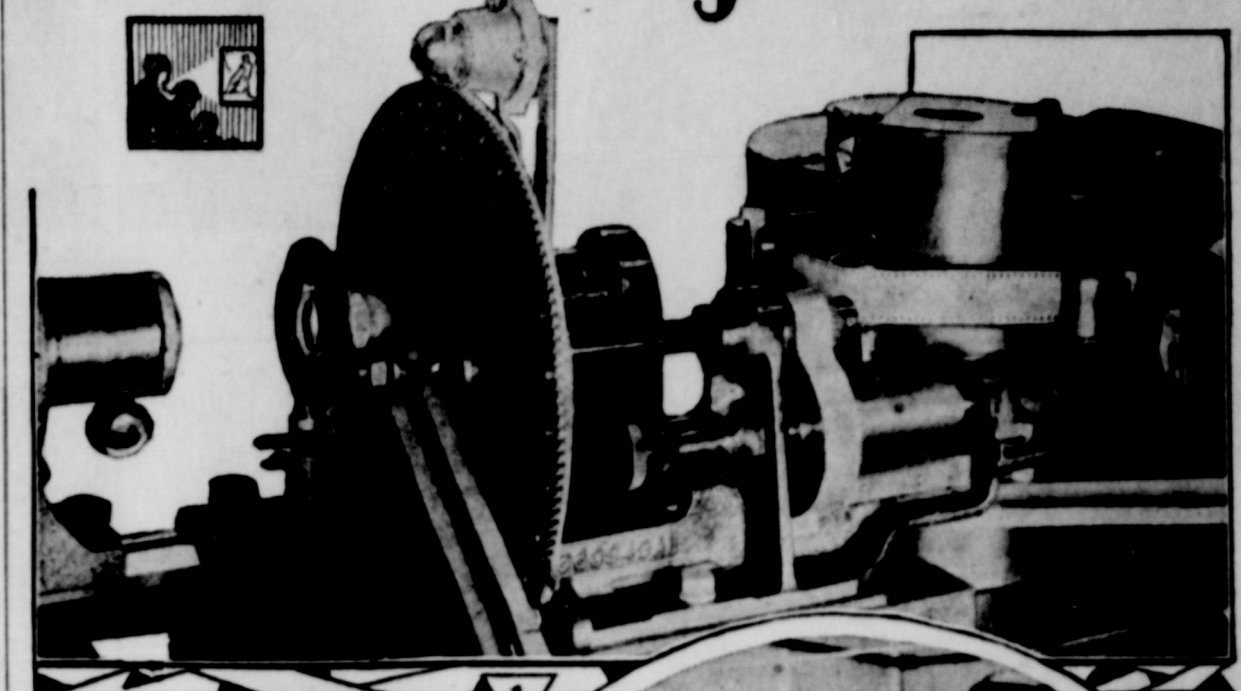

On her return to the house her mother asked her what she saw in the barnyard, expecting her to list the different animals.

Her reply came: "Well, mother, I saw them squirt the cow."

Auk Probably Extinct

The auk was a marine bird belonging to the same family as the razor-bills, gullenots, and puffins. The great auk was at one time a frequent visitor to the Orkneys and the Hebrides islands off the coast of northern Scotland and Iceland, but no living specimens have been seen for sixty years and the bird is believed to be extinct. The egg was as large as that of a swan. It is now highly prized and as much as \$1,500 has been paid for a single one.

"Going to the Movies" While Sitting at Home

By ELMO SCOTT WATSON

GOING to the movies while sitting at home! Doesn't sound possible, does it? It not only is possible, but, judging from a demonstration made in East Pittsburgh, Pa., recently, that seeming miracle may soon become one of the commonplaces of our daily life.

Recently there gathered in the television laboratory of the Westinghouse Electric and Manufacturing company a group of radio leaders, among them representatives of the Radio Corporation of America, the National Broadcasting company, the General Electric company and the Westinghouse company, who saw motion pictures which, broadcasted from a station nearby and transmitted on radio waves, were picked up on a receiver in the laboratory and reproduced before their eyes. It was the world's first demonstration of radio movies and possibly the most astounding of the many advances in the science of radio announced during the past year.

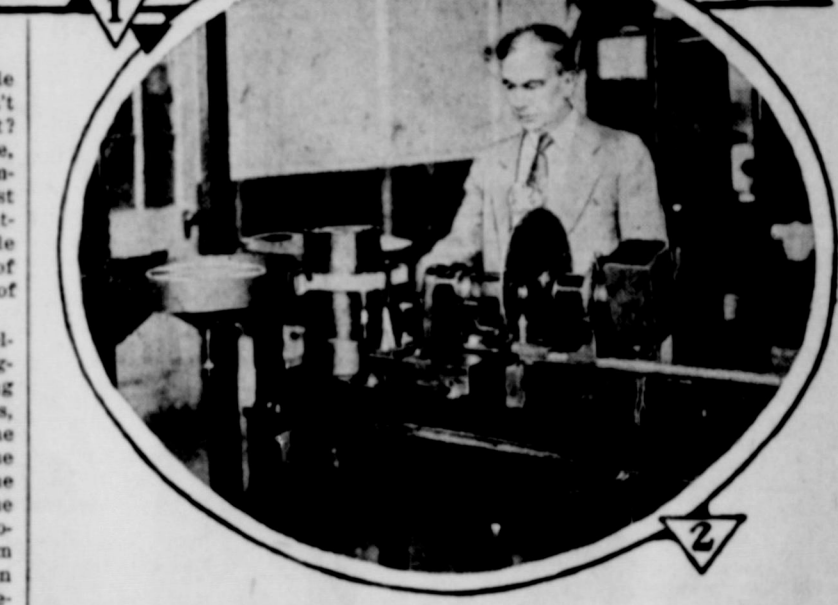

While radio movies are still in the laboratory stage, Westinghouse officials, under whose auspices the demonstration was made, declare that the event heralds the day when the radio listener will sit at home and have that most popular form of entertainment, motion pictures, projected by his individual radio receiving set.

The development of radio movies is a triumph of scientific engineering. During the last summer, the idea came to the mind of Dr. Frank Conrad, in charge of this branch of his company's activities and the fact that in barely two months he brought the device to the laboratory stage in the degree of perfection witnessed at the recent demonstration, is said to have set a record. Radio movies are a step beyond previous developments in television and required the invention of a number of appliances in addition to a great deal of scientific calculation, synchronization and various high-speed mechanisms, and accurate control of light and radio waves.

Although the sending of moving pictures by radio, as may well be imagined, required many complicated and delicate pieces of apparatus, the principles of the art as explained by Westinghouse engineers, are not beyond ordinary comprehension. Photography in its simplest form consists of the reproducing of spots of light and shadow in the same arrangement as they appear in the subject photographed. The screening of a motion picture, of course, requires that a roll of film be operated at a speed which sends sixteen pictures a second before a projecting beam of light. Because of the structure of the human eye, if a series of pictures follow each other at the rate of sixteen or more per second, the human eye sees it as a single moving picture.

All this the broadcasting of radio movies requires, with the addition that the spots of light must be transformed into frequencies, some of which are in the audible range, transferred to a radio wave and broadcast as electrical energy. In receiving the pictures, the process is reversed, the electrical energy is picked up, and the frequencies returned to lights and shadows, which when viewed presents the radio movie.

In the first step of the process a pencil of light traverses each picture,

1. The heart of the television motion picture transmitter. The scanning disc is clearly shown as well as the dot of light which is thrown upon the motion picture film. Above the scanning disc may be seen the synchronizing tube which keeps this disc turning at a predetermined speed.

2. Dr. Frank Conrad, assistant chief engineer, Westinghouse Electric and Manufacturing company and inventor of the television motion picture projector. The scanning disc of the apparatus is immediately in front of him.

four miles; two miles from the laboratory to the broadcasting station by wire and two miles back to the laboratory by radio.

To turn these radio waves back into light, an arrangement which permits the use of a mercury arc lamp is used. By this adaptation the weak radio currents control the action of the many times more powerful current operating the arc lamp. This action may be compared to the action of a radio tube, where the weak radio current on the grid of the tube controls the action of the independent and more powerful plate current.

Thus the mercury arc lamp goes bright or dim as fast as the current changes, and its light at any instant is in proportion to the light that the electric eye sees in the same instant. To return the dots of light to their original pattern, another revolving disc or scanner is also used which is similar to the transmitting scanner. The use of a mercury arc lamp permits the radio pictures to be thrown upon a ground glass or screen, the first time this has been done with television apparatus.

Both these scanning discs turn at exactly the same speed; the hole in the receiving disc must be exactly in the same relative position as the corresponding hole in the transmitting disc. In other words, they must be synchronized.

Westinghouse engineers were the first to develop a feasible method of synchronization, and their method was by means of radio. From transmitting equipment, which may be located in the broadcasting station, they transmit a constant frequency wave of 5,000 cycles. This wave is produced by a tuning fork and transmitted over a special carrier wave from the broadcasting station. The constant frequency note is received on a special receiver and by means of special apparatus controls the speed of synchronous motors, which drive the scanning discs of both transmitting and receiving radio movie equipment. This revolutionary method of controlling equipment indicates, in a measure, the extent to which science must go in order to perfect television or radio movies.

But the developments in radio during the past year, and especially this latest development indicates that the word "impossible" is rapidly being written out of the vocabulary of American electrical engineering genius, and that radio movies for all who care to enjoy them are an assured fact.

Give Her a Radiovisor

Although only three radio stations are regularly broadcasting radiovision or radiomovies, at least seven more are experimenting or testing and installing radio transmitters. The full months will see this number increased rapidly.

At present most of the radiomovies are in patonime only, but increase in "picture quality" will come with experience and perfection of transmitting methods. The recent assignment by the federal radio commission of new and wide bands of short waves for radiovision will spur on the development.—Science Service.

California's Flowers

Some of the wildflowers of California are: Anemone, California poppy, blazing star, baby-blue eyes, white daisy, blue lupine, Clark's elegans and wild Canterbury bells; perennials, Indian paint brush, scarlet larkspur, pride of California, scarlet larkspur, succia, California fuchsia and white evening primrose.

Salts Fine for Aching Kidneys

When Back Hurts Flush Your Kidneys as You Clean Your Bowels

Most folks forget that the kidneys, like the bowels, sometimes get sluggish and clogged and need a flushing occasionally, else we have backache and dull misery in the kidney region, severe headaches, rheumatic twinges, torpid liver, acid stomach, sleeplessness and all sorts of bladder disorders.

You simply must keep your kidneys active and clean and the moment you feel an ache or pain in the kidney region begin drinking lots of water.

Also get about four ounces of Jad Salts from any good drug store here, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine.

This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and is intended to flush clogged kidneys and help stimulate them to activity. It also helps neutralize the acids in the urine so they no longer irritate, thus helping to relieve bladder disorders.

Jad Salts is inexpensive; makes a delightful effervescent lithia water drink which everybody should take now and then to help keep their kidneys clean.

A well-known local druggist says he sells lots of Jad Salts to folks who believe in trying to correct kidney trouble while it is only trouble.

VELVET GOWNS FOR EVENING; BORDERED WOOLENS POPULAR

GORGEOUS EVENING GOWN

QUALITY of the most exquisite, color of subtle beauty, simplicity of utmost sophistication, these three graces unite to the glory of the beautiful evening frocks which are fashioned of the new delicately sheer and transparent velvets.

Though to all appearance formal velvet modes bespeak simplicity, in reality they represent most sophisticated styling. In fashioning them so conspicuously free from super-embellishment the designer employs that "art which conceals art." The lovely gown in the picture is of this sort. It is so charmingly unaffected and yet its superiority is recognized at a glance.

With that touch which only genius gives, the skirt acquires a fluent fullness which at the same time contrives to preserve a slender silhouette. The one-side drape of the hemline and the fitted hipline are also adroitly featured. A motif worked in tiny pearls and rhinestones is positioned at the left hipline where it holds the fullness of the side drape in perfect pose.

So much depends on color choice, this season, for there is genuine class distinction in tones and tints. There are the new off-whites, for instance, they are just enough away from ordinary white, to give an air of supreme refinement. Eggshell is one among many new tints which are adorable. French wens are quite taken with baby blue for evening wear. The velvet of which the classic gown in the picture is fashioned is in this choice color.

Some very unusual effects are being achieved in modern velvet. An enchanting new velvet for the evening frock is in a vanilla tone with an illusive flower print which is only revealed in certain lights. For sumptuous evening wraps velvet with an in-

TWO AUTUMN COATS

roduction of metal design is much employed.

Velvet ensembles for evening present a new and fascinating theme. A banana colored transparent velvet dress and wrap with a cream-tinted fox collar makes a pretty picture and in any other of the fashionable tones and tints it would be equally as effective. Most of the wraps are styled in cape fashion. Perhaps the newest cape modes are those which stress the simple circular style with gorgeous fur collars. However, fanciful velvet creations which are shirred and draped are also prominent in the formal style picture.

Among formal wraps, velvet shawls are a subject of much interest. For these huge squares of sheer velvet are bordered with hand-knotted fringe. They are gorgeously hand-painted, both in modernistic patterning or with colorful floral motifs. These elaborate evening fantasies are in white and pastel shades, also black. Frequently the hand-painted designs are

DR. CALDWELL'S THREE RULES

Dr. Caldwell watched the results of constipation for 47 years, and believed that no matter how careful people are of their health, diet and exercise, constipation will occur from time to time. Of next importance, then, is how to treat it when it comes. Dr. Caldwell always was in favor of getting as close to nature as possible, hence his remedy for constipation is a mild vegetable compound. It can not harm the most delicate system and is not habit forming.

Hot Oil Employed to Wipe Out Mosquitoes

Hot fuel oil, sprayed along the shores of the lakes in the Canal zone, is a most efficacious weapon against malaria-laden mosquitoes. This oil, a big factor in the fight which is culminating in certain abolition of the insect, has destroyed breeding places in the Pedro Miguel and Gatun lakes.

The method used to spray the oil necessitates the use of a rowboat carrying a tank containing 150 gallons of oil, and a crew of three men. One man rows, one works a hand pump and the other handles the spray nozzle. The hot oil is sprayed on the shore line as fast as the boat can be propelled. This surface timing has been found positive and complete.

Wind action and wavelets carry the oil into every nook and cranny, even to a considerable distance from the point of application. A rigid inspection follows every oiling to determine if it has been done thoroughly.

Elsewhere than in the lake areas, mosquito breeding is controlled chiefly by training of streams and by draining and filling.

Cat's Varied Diet

On a farm in Hinsdale, Mass., says the Boston Globe, lives a cat that is positively omnivorous. Like most other felines she eats meat, fish and milk, but her diet does not stop there, however. When the lady of the house was surprised to find bits of cucumber on the ground near the kitchen door, she watched the cat for a while. Finally she saw kitty go to the garden, break off a good-sized cucumber and carry it to the house, where she broke it open and ate it. Since that the cat's appetite has been tested with various other vegetables and it responds heartily.

Small Boy's Logic

Several gaudily colored steins arranged about the railing in a tea shop caught the eye of a five-year-old youngster breakfasting with his parents, sedate Hoosiers.

"Mom, buy me one of those things," the lad pleaded.

"Why, son, I can't; they're decorations," remonstrated the mother.

"Well, get me one for Decoration day then," rejoined the five-year-old, as his parents made wry faces and others within hearing distance laughed heartily.—Indianapolis News.

Repose for the Artists

"Are you going to have a great deal of music when you go speechmaking?" "Not too much," answered Senator Sorghum. "The last time I went on tour I was made to feel that I was merely filling in time between the jazz band selections."

Daddy's Evening Fairy Tale

By Mary Graham Bonner

IN THE PIG PEN

Pinky Pig was very much excited. He came squealing to tell the others about it.

So excited were the others that they thought it must have something to do with food, and yet they knew that Pinky would not be excited about telling them of food.

"I thought at first it might be," said Master Pink Pig, "but I might have known that Pinky Pig was too much of a pig to ever do such a thing."

"Yes, you might have known," said Grandfather Porky Pig.

"No pig would do such a thing," said Sammy Sausage, "as to come and tell us about food to be had for all of us."

"I would be ashamed of the name of pig, if anyone did," said Miss Ham.

"Well, I didn't," said Pinky.

"No, you didn't," they all squealed. "But we don't know what is so exciting," said Grandfather Porky.

"No, we don't know," said Sammy Sausage. "Please tell us, Pinky."

"Yes, please tell us," said all the rest of the pigs.

And Pinky, twisting his little tail and grunting quite hard, said: "Mother has eaten up all her children."

"Horrors!" said all the pigs. That is—all the pigs squealed this except Miss Ham.

"Rather a sensible thing for her to do if she felt nervous or ill," said Miss Ham. "Such a thing would act like a tonic."

"You horrible creature, Miss Ham," said Pinky. "This is the second time that my mother, Mrs. Pinky Pig, has eaten her very own children."

"I'm glad she didn't eat me."

"It would have been one less pig mouth to feed," said Grandfather Porky.

"Oh well," said Sammy Sausage, "we like Pinky and we're glad you're in the pen."

"Thank you," said Pinky.

"Well," said Miss Ham, "I will go right off and see Mrs. Pinky and I will ask her how she enjoyed her little meal."

10 minutes ago-

How many people you know end their colds with Bayer Aspirin! And how often you've heard of its prompt relief of sore throat or tonsillitis. No wonder millions take it for colds, neuralgia, rheumatism; and the aches and pains that go with them. The wonder is that anyone still worries through a winter without these tablets! They relieve quickly, yet have no effect whatever on the heart. Friends have told you Bayer Aspirin is marvelous; doctors have declared it harmless. Every druggist has it, with proven directions. Why not put it to the test?

Entirely by Motor Couldn't Try It

"Did you complete your trip by motor?" "Yes," said Mr. Chuggins; "part in my own car and part way in an ambulance."

A MESSAGE TO UNEMPLOYED SCHOOL TEACHERS.

We have an unusual proposition to offer teachers who are unable to get a school this term. Your literary qualifications fit you admirably to qualify for a business position.

You can finish a course under our new plan in half the time required formerly. A few short weeks and a very few dollars will place you on some substantial business concern's pay roll.

To those who want to continue teaching why not let us prepare you for commercial teaching. Read the following letter which explains itself:

Bienville Parish Schools E. H. Fisher, Supt. Arcadia, La. September 25, 1928. Tyler Commercial College, Tyler, Texas. Gentlemen:

Can you put me in touch with a man or woman for the commercial department here at Arcadia? They should have three years of college work at least. Would want someone who could teach typewriting, shorthand and bookkeeping.

Yours very truly, E. H. FISHER. There seem to be many more teachers than there are public schools while in business or as commercial teachers there are many more openings than there are young people prepared to fill them.

Write your name and address below and mail to us quickly. We cannot extend this unusual offer to more than one hundred young people at this time. Name _____ Address _____

Special Plan Tyler Commercial College, Tyler, Texas. (See editor of the Sanderson Times for scholarship.) Notice Laundry Patrons. In the future we will be responsible for missing articles in your laundry only when a list of the clothes is included in the bundle. O'Bryant Home Laundry.

PRINCESS THEATRE

TONIGHT, Friday, Oct 5.— "Tell It to Sweeney" With George Bancroft and Chester Conklin. Another one of those good comedy crook pictures which made Bancroft famous.

SATURDAY and MONDAY, Oct. 6 and 8.— "Venus of Venice" With Constance Talmadge and Antonio Moreno. A thrilling love story enacted by two of the screens most famous lovers.

TUESDAY and WEDNESDAY, Oct. 9 and 10.— Hoot Gibson in "Galloping Fury"

Story by Peter B. Kyne. A picture brim full of action; and that action as only Hoot, the screen's best western actor can make it. Its a wild west show folks with a beautiful little love story running thru it. If you believe in the West you can't afford to miss this one.

THURSDAY and FRIDAY, Oct. 11 and 12.— Esther Ralston in

"Figures Don't Lie" An entertaining little program picture that will keep you guessing from beginning to end; a picture that will make you forget all your troubles and make you see the world through rose colored glasses.

RATTLE OF THE RAIL.

A number of the 2102 engines have been sent to the Houston Division for service, and a few of the Mallet engines that have been laid aside at Valentine have been placed in service.

Owing to increased freight business the eleventh crew has been placed in service on the Sanderson - Valentine district and the twelfth crew on the El Paso district.

Fireman H. Bochat has been assigned to the night passenger run on the Del Rio district.

Fireman W. C. Barksdale and P. F. Miles attended the B. of F. L. & E. convention in El Paso this week.

Engineer R. M. Luse returned Sunday from a visit to El Paso. D. L. P. Duke, who has been in Cleveland, Ohio, for some time on B. of L. F. & E. work, has returned and now has a freight run on the El Paso-Valentine district.

DRYDEN NOTES.

By Mrs. W. R. House.

The following delivered lambs for shipment last week: S. P. Witt, R. L. Roberts, C. F. Stavley, J. R. Taylor, Ira Deaton and others.

J. T. Hall spent Sunday in Del Rio. Mr. and Mrs. M. H. Goode Sr. spent several days in Del Rio last week.

B. B. Jackson has moved his family to Dryden so his children may ride the bus to the Sanderson High School.

Mr. and Mrs. C. F. Stavley was in from the ranch Monday. Mrs. Stavley and children will move into Dryden soon so as to send the children to school.

Mr. and Mrs. John Taylor made a business trip to Sanderson Thursday.

Mrs. Virginia Bartlett visited the Sanderson High School Monday afternoon.

Murray McCain spent Sunday in Sanderson visiting friends.

A carload of oil well machinery arrived here this week to be used on the new test well which will be drilled on the Sam Bell ranch which is about 15 miles east of here.

W. R. House and family attended church Sunday night in Sanderson.

John Taylor made a business trip to Del Rio one day last week.

Mr. and Mrs. Elmo Taylor made a business trip to Sanderson Sunday.

Mr. and Mrs. John M. Gray were in from the ranch one day last week.

Mrs. B. H. Tate and baby are at home after spending the past three weeks in Del Rio where she underwent a major operation.

Mr. and Mrs. Earl Henning and children of Sanderson spent the week-end with her parents, Mr. and Mrs. Jim Haley.

Don't forget if you don't find the pattern or size in congolesum rug you want we will order it for you at this week's price. Kerr Mercantile Company.

Mr. and Mrs. W. D. Chandler and daughter shopped in Sanderson one day this week.

Friends of Mrs. H. D. Johnson will be glad to know that she is doing nicely after undergoing a major operation in San Antonio last week.

Mr. and Mrs. Ben Brown spent several days this week at the Stavley ranch visiting her people.

The week of October 1st to October 6th will be Congolesum rug week at Kerr's.

Mrs. W. T. Carpenter spent Tuesday with Mrs. M. Miller. Mrs. W. R. House and daughter and Mrs. W. T. Carpenter motored to Sanderson Tuesday where they visited friends and shopped.

Mrs. Mat Turner of Alpine visited relatives and friends here this week. Mr. and Mrs. Tip Frazier and children were in town this week from the Mansfield ranch.

Cut your silk bills in half by using "Run-None." Empress Confectionery.

H. L. Stuckey Jr. and friend, George F. Cox, who are students at Sul Ross in Alpine, spent the week-end here with H. L.'s parents, Mr. and Mrs. H. L. Stuckey Sr.

NOTICE TO CONTRACTORS FOR STATE ROAD AND BRIDGE CONSTRUCTION.

Sealed proposals addressed to the State Highway Engineer of Texas, for the improvement of that part of State Highway No. 82, covered by S. A. P. 780 in Terrell County, will be received at the office of the State Highway Engineer, at Austin, Texas, until 10 o'clock A. M., October 15th, 1928, and then publicly opened and read.

Work consists of construction of grading and drainage structures between Sanderson and Pecos County line known as Big Hill Job, a distance of 1,425 miles.

Time for completion to be 150 working days.

Detailed plans and specifications of the work may be seen for examination, and information may be obtained at the office of John Stovell, Resident Engineer, at Sanderson, Texas, and at the office of the State Highway Department, State Office Building, Austin, Texas.

A certified, or cashier's check for \$3,000.00 is required. The usual rights are reserved.

I have for sale exclusively quite a number of ranches at a bargain. Get your finances ready, make your dates, and rest assured someone else will not get ahead of you.

Also live stock of all kinds at all times. Don't forget "Buys anything any time." "Sells everything every time."

Fats Defeat Leans.

Last Sunday afternoon the fat and lean baseball players crossed bats to play off a tie in games which was won in the twelfth inning by the fats, 13 to 12.

It was a good game all the way through, the leans taking the lead and keeping it until the eighth inning when the fat boys tied the score 12 to 12. The game was won several ways but strength and endurance is what put the fats over victorious.

The leans used several combinations in batteries, but never found one that would hold the fats down. There were two home runs hit by Max Harrell and there were several good batting averages made by some of the other boys.

Captain Grigsby has a good team of leans and is out for a game anytime there is not too much snow on the ground to find first base.

There was a large crowd of baseball fans out to witness the struggle and enjoyed the thrills so much that they were surprised to find that it was almost sundown when the game was over.

Tom Mansfield is the proud owner of a New Ford Roadster which he purchased last Friday from the Ferguson Motor Co.

Mr. and Mrs. O. T. Schuppach came in Tuesday from San Antonio where Mr. Schuppach has been the past few months under special treatment. He is very much improved in health.

Plans are immediately pending for the general reorganization of the work of the church, which will include the election and ordination of a number of new officers and the establishment of an official "cabinet" by the congregation.

At the close of the business conference, which was held at the church, a very delightful social meeting, followed by refreshments, was held at the home of Mr. and Mrs. David A. Pollard, with Mesdames P. F. Robertson, H. D. Williams, R. S. Wilkinson and D. A. Pollard as hostesses.

Mrs. N. E. Charlton and son, John Fisher, returned Monday from Valentine where they spent the past two weeks with their husband and father, N. E. Charlton, who is working on the switch engine there.

Mr. and Mrs. John Nichols returned Monday from an all summer visit with relatives in various points in Tennessee and in East Texas. They report having a wonderful trip and seeing various things of interest while away.

George Middleton, sheep buyer, returned to his home in San Angelo the first of this week. Mr. Middleton has been here for the past month and has bought several thousand ewes and lambs in this county and in Brewster.

W. C. Durbin and son and Joe Tankersley spent a couple of days this week on the Rio Grande fishing.

Mrs. A. M. Hicks and son Lindsay, were in town several days this week from their ranch on the Pecos.

Christian Science Society.

Christian Science services are held each Sunday evening at 8 o'clock at the Masonic Hall. The public is cordially invited.

Birthday Bridge Party.

Mrs. Frank Robertson entertained last Wednesday night at her home with a bridge party in honor of her husband's birthday.

Following the playing of several tables of bridge Mrs. Herbert Buchanan was found to have made high score for the ladies and was given a novelty pin tray. C. A. Wilburn made high score for the men, a cigarette case being the prize. The honoree was presented with a cedar chest of Chesterfield cigarettes.

The hostess served punch and coffee.

Presbyterians Reorganize Work.

At a congregational conference held on the evening of September 26, with Dr. L. E. Seaford of San Antonio, who is fieldman for the Presbytery of West Texas, presiding, members of the Presbyterian Church here made plans for the rearrangement of the church program.

Beginning October 1, the Rev. J. A. McMillan, who has been serving the church for the past six years on a part-time basis, will assume the pastorate of the church for full-time service, holding services here each Sunday in the month.

Plans are immediately pending for the general reorganization of the work of the church, which will include the election and ordination of a number of new officers and the establishment of an official "cabinet" by the congregation.
