the latter quietly, with a slightly suggestive gesture with the revolver.

Rebelliously, Waterman obeyed. "And." continued Stanley, "there's

just one other little matter." He took from the breast pocket of his dinner jacket a little yellow chamols bag. "Do you know what this bag contains?" he asked.

Waterman was silent. "No? Very well then, you shall see." And the next moment, in the brilliance that fell from the crystal

chandelier, there flashed the myriad "Well," asked the inquisitor, "have

you had enough?"

"I-I don't know what you mean."

stammered Waterman. Stanley knew that the crucial mo

ment had arrived. "I mean, Rollin," be said in that same cool, level' voice, "I mean just this. You've betrayed your friend; you've stolen your wife; you've ruined

her happiness, and finally, you're a thief, and these are the stolen goods! Again Waterman staggered to his feet, and this time Stanley did not stop him. "I tell you, it's a ile!" he cried.

"At once, or I'll take it!"
"Never!" was the stern answer.

"Then stand aside! Stand aside or by G-d, I'll kill you." Now for the final insult.

"Oh, no, you won't. You haven't the pluck, even though you know that I'm going to publish this story so far and wide that you can never look a white man in the face again-the story of a gentleman who betrayed his friend. You're a skunk and a speak and a traitor, but you haven't the guts to kill !"

Waterman raised the revolver and cried. "Stand aside, I say!" But Stanley made no move. "Then by G-d, take It!"

He pulled the trigger. The hammer mapped harmlessly. With a cry of rage, Waterman broke the pistol, saw that its chambers were empty, cast it aside and with a roar buried bimself on Stanley.

### UNITED STATES NOW OWNS 9,000 ISLANDS

### All Are Outside the Boundaries of States.

Washington.-Acceptance by congress of the Samoan islands as part of the United States' territory definitely adds six more bits of land to the thousands of islands the nation now

### A "Milky Way" of Islands.

"While 9,000 islands are few, perhaps, beside the island collections of Great Britain, Holland and France, yet American territorial islands decorate the oceans like star galaxies ornament the heavens.

"The Philippines are the 'Milky Way' of the United States' Island constellations. They alone comprise approximately eight thousand islands. Everyone knows about Luzon, the monster Philippine Island, as large as Ohlo in area. Almost nothing is known of the seven thousand islets in the Archipelago having an area of one-tenth of a square mile or more.

"Then there is the scarf of Aleutians swung across the blue sea void toward Asia. The United States coast and geodetic survey does not know for sure how many Aleutians there are, but it is endeavoring to find out by airplane surveys. Then, down in the panhandle of Alaska lie many more islands behind whose protecting flanks, steamers thread their way up the Inland passage. Other islands fret the Alaskan coast, including a famous little sandbar of an Island behind which Wilkins and Elelson took off to fly across the top of the world.

"How large is Hawaii? That all depends upon how the territory is measured. By square miles of land the Hawailan islands have an area equal to Connecticut and Rhode Island. By their spread over the Pacific ocean the Islands occupy a region as long from east to west as the United States is wide. The joint protectorate did not work out well, so, by treatles in 1900 and 1904, the United States took control over the eastern half of the islands containing Pago Pago barbor, the finest in all the South seas. Congress, after all these years, has passed a resolution accepting the twenty-yearold gift of the islands from the Sa-

moan chiefs. "In the lists of American territorial possessions one group of islands seldom appears. The status of 70 guano islands scattered all over the Pacific is indefinite. Even the position and existence of some of them is indefinite. By a law passed in 1856 the United States extended temporary protection to American citizens exploiting guano deposits on bird islands. While the United States is not obliged to maintain sovereignity over guano islands, neither has she surrendered all rights. Over some islets and banks such as Navassa island, between Jamaica and Halti, Quita Sueno bank, Roncador cay, Serrana bank, and Swan Islands. all in the western Carribbean, and Gente Hermosa or Swains Island near Samoa, the American flag flies without question."

"We will be quite safe," said Pro fessor Porcupine. "Shall we go for him?" asked one of the children.

"No, my dear," said Professor Porupine, "we shall not go for him. "Let it always be truthfully said of the Porcupine family that our quills are only used when we're in dangernot to hurt other animals.

"If we must use our quills to defend ourselves, very well, but if we don't need to use them, all the better. The dog was now seen running after them. He was growling and snarl

"Towser, Towser," called a man's olce, but Towser paid not attention On he ran for all he was worth. "I'll give you a good shaking," growled the dog as he took hold of one of the Porcupine children. "Now with your quills," called out Professor Porcupine

Back went the dog howling with pain to his master.

"There Towser," said his master kindly, "next time you must obey me." And as he drew out the quills from Towser's shaggy fur. Towser's eyes told his master he would never dis obey again.

And when the Porcupine children returned home they told their mothers and daddles the two important lessons they had learned that day-one that quills were to be used when they were in danger, but that they must never use them unless necessary-and of course they knew-as ignorant people do not know-that their quills may come out easily but that porcupines cannot "throw" their quills,

### Seek Russian Colony in Wilds of Siberia

In an effort to find a lost colony in the wilderness of northern Siberia. which preserves the life and thought of the Sixteenth century, a scientific expedition is about to leave Lenin-

Before the revolution a political extle, M. Zinzinoff, claimed to have penetrated the icebound fastness of the lost colony. He declared that the people spoke old Russian and were unaware of anything that had happened in the world since the Sixteenth century. More recently a man named Arosin arrived in Moscow with a tale of the Russian tribe.

Both reports place the colony some where near the mouth of the Indigirka river, Yakutsk, where it flows into the North Polar sea.

Only about 200 persons form the colony, said Arosin, but scientists think that if the colony has survived for 400 years it must at one time have been far more numerous.

Many Russians fled in the Sixteenth century to the inaccessible parts of Siberia to escape political persecution. It is considered likely that the lost colony is formed by descendants of one of these groups of refugees.
