

THE SANDERSON TIMES

VOLUME 23

SANDERSON TEXAS, FRIDAY, AUG 8, 1930

NO. 22

BIG COWBOY REUNION AND RODEO, AUG. 29, 30

People of Surrounding Counties Cordially Invited to Come to Sanderson on That Date. A Good Time Assured

H A Johnson of Lubbock, Texas, an old-time cowboy, was in Sanderson visiting the first of this week and met with a number of our leading business people in regard to putting on an old-time Cowboy Reunion or Rodeo here on Friday and Saturday, August 29th and 30th.

The events will include calf roping, goat roping, bronck busting, steer riding and BUFFALO RIDING. Mr Johnson promises to bring some bucking buffaloes here for the occasion, and old-timers here say that a buffalo is far ahead of a steer when it comes to bucking.

Local cowboys and ranchmen are invited to bring their favorite roping horses and take part. Liberal cash prizes will be given in each event. Bring your outlaw horses, there will be riders

here that will ride anything you can tote, drag, drive or ship. Every rider and roper within a radius of 200 miles is invited to be here on the above date. There will be a big cowboy dance each night with a red hot orchestra.

All our merchants and business people seem to be much enthused over the event. They realize that there has not been a rodeo here in several years and they welcome the opportunity to assist in giving to the citizens of Sanderson and Terrell county a show of this kind. One business man said that a big rain always came after a celebration in Sanderson, (and one might come before the celebration.) Anyway let's all forget our troubles for awhile and all get together and have a good time August 29, 30.

Thomason Thanks Sanderson Times

Mrs. Bessie Darling, Editor, Times, Sanderson, Texas.

Dear Mrs. Darling: I want first to thank you for your courtesies, as well as the fair and impartial treatment you and your paper accorded me in my race for Congress. I want you to know that you have my friendship and esteem, and whether or not I am elected in November, I want you to command me whenever I can render you any personal service.

I will also thank you to express to the people of your county, in the next issue of your paper, my deep and lasting appreciation of the splendid vote I received there, as well as throughout the district. The election is now over with me and I am going to work to try to obtain some very substantial results. I expect, if elected in November, to be the representative of all of the people of the district, as well as of every county, town and interest in the district, and to promote the happiness and the prosperity of our people in every way within my power. I will thank any citizen, or group of citizens, to acquaint me with any special needs in their communities so that I can be giving some proper study and be acquainted with the situation at the proper time.

With every good wish, I am
Yours very truly,
R. E. THOMASON.

Murphy Grateful to All the Voters

To the Citizens of Terrell County:

Based upon fairly complete returns from 35 counties in the District, I have been defeated in my race for Congress by about 5000 votes. Hon. R. E. Thomason of El Paso has been nominated by a majority and as a true Democrat I shall support the party nominee against all comers. I have no alibi; Mr. Thomason got more votes than I did and he is therefore entitled to all the glory that his splendid victory will bring. Furthermore he is entitled to our active support. That is our form of government and the foundation stone of our great party—a government by the majority.

Let us therefore forget the differences that have divided us; let us brush aside the petty jealousies of the hour, and present a united party front in the November election. There is no bitterness in my heart, no hatred—only the deepest gratitude for the loyalty of thousands of the best friends and supporters God ever permitted a man to work with. To these loyal fellows I can only say, "I did my best, I fought a hard, fair, honest fight and lost." For those who supported the other man I have the greatest friendship and admiration. So far as I am concerned, the election is over. To all I want to express my deep appreciation for the fairness of the press, for the vote of confidence of my home county and others who gave me their vote, and for the many other courtesies shown me in the contest.

Give Mr. Hudspeth your support during the remaining days of his administration. He is entitled to it. Give Mr. Thomason your support when he takes office in order that he might have further strength to fight our battles in the National Congress. I fought and lost. I will repay the people of your great county by a continued and unflinching service to West Texas. If there is anything I can do to aid any county, community or individual, I crave the opportunity of serving them. Let us stay in there and pitch for a bigger and better West Texas. Good bye—and God bless you!

E. E. MURPHY.

A. A. Henning of Dryden was in Sanderson Monday.

Terrell County Oil Activities

Sanderson, Texas, August 7.—It is reported that the six test wells for oil and gas being drilled in this county at the present time are making diligent progress as all wells have favorable indications from a logging standpoint.

Several oil men from the states of Oklahoma, Colorado, California, Arkansas and Louisiana were in this county last week with the view of purchasing additional oil and gas leases.

The deed records of this county reveals the fact that Hal A. Hamilton of Val Verde county, Texas, recently leased 28 sections of land in Val Verde county and 20 tracts of land in Terrell county containing many thousands of acres. Also that the Black Warrior Company, C. C. Julian Oil and Royalties Co., and the Cosden Oil & Gas Co., recently placed assignments of oil and gas leases of record covering lands situated in this county.

Many individuals in the various portions of the United States have been filing mineral deeds covering small tracts of land in this county.

Kerr Hotel Will Change Hands

The Kerr Hotel of this city will change hands on or about the 15th of this month. The writer being informed from the proper authorities the first of this week.

Mr. and Mrs. F. B. Carter, who are well known throughout the surrounding country and who has been with the Kerr Hotel for the past twenty-three years will be after the 15th of this month located at Dryden, having taken charge of the hotel at that place.

The Many friends of Mr. and Mrs. Carter regret very much their leaving Sanderson, but are also glad that they will be no farther away than our neighboring town, Dryden, which is a very prosperous little town, and one in which we feel confident Mr. and Mrs. Carter will do well. In leaving Sanderson they leave many warm friends who with the Times wish them much success in their new home.

At this writing we have been unable to learn just who will take charge of the hotel here, after the present management.

Announces For County Office

F. L. Burnside announced in the columns of The Times last week for County and District Clerk of Terrell County. We were somewhat crowded for time and space, and as his announcement came in at a late hour we were forced to wait until this issue to make our mention.

Most of you no doubt are better acquainted with Mr. Burnside than the writer, he having been among you for some time, both in a business and a social way.

Friends of Mr. Burnside together with The Times feel that should the above candidate be lucky in acquiring this office for the following term that the people of Terrell County need not fear as to his ability in handling any and all kinds of business connected with the County and District Clerk's office.

Mr. and Mrs. W. D. Chandler were in town this week visiting friends and shopping.

J. D. Nichols and Bill Vaughn motored to Del Rio Saturday, returning Sunday.

OPEN AIR MEETINGS

Beginning Sunday, August the 17th, open air meetings at the Church of Christ. Jesse P. Sewell, evangelist, will begin a series of meetings at Sanderson. Mr. Sewell will be accompanied by R. L. Reynolds, singer.

The Last Hope Left

Advertising isn't meant to be seasonable; advertising the year round will help business the year round. There may not be a direct rush, but it draws a steady trade, and makes transient customers permanent ones. Advertising will build a constant and steady trade that cannot be built by any other method. But it will not sell goods of an inferior quality and it will not improve business in a musty store where goods are displayed unattractively. It will not hold trade at a store where clerks are not polite and considerate. It will not hold customers where service is not reasonably prompt. Competition is keen, but the business man who keeps his eyes open to new ideas and puts those ideas into practice—which includes a steady and liberal use of printer's ink—is bound to get his share of business. The home paper is the last surviving hope of the home merchant in a day when mail-order catalogues and house-to-house salesmen are as thick as flies in this and every other community.—Lime Light.

An optimist is one who don't care what happens just so it dont happen to him

Pajamas Are Liked by the Wee Tots

By JULIA BOTTOMLEY

WIDE WORLD PHOTO

If there's one place more than another where pajama costumes seem to fit into their environment becoming, that place is in the children's realm. Bless their dear hearts, how cunning they look flitting about in their little trouser and blouse outfits, and with what enthusiasm designers are creating pajama styles for wee folks. There are as many kinds of pajama styles for fashionable youngsters as there are for grownups, ranging from lounging to beach types.

For the making of juvenile pajama costumes shantung is proving a most adaptable material. It has so many arguments in its favor, first among which is the fact of its perfect laundering qualities. Then too the lovely colors of shantung fit charmingly into the happy scenes of the lilliputian world.

Shantung in a delightfully cool-looking light green was the choice of the designer who styled the attractive and very practical suit illustrated. Borderings of white shantung make a pretty trimming. A unique feature is the group of tucks down the front, the blouse buttoning at the shoulders.

very prettily with a narrow scarf which is tied in a soft bow over one shoulder.

In all children's style displays nowadays particular attention is called to pajama fashions. Just now the chief attraction is beach pajamas and overalls. A pert little model for beach wear boasts an Eton jacket. The material for this cunning outfit has a red background with huge pink, blue, black and white polka dots floating over its surface like so many toy balloons. The jacket is sleeveless, worn over a sleeveless white dimity blouse. The trousers are very full and finish at the waistline with a picturesque toubadou sash.

Overalls are frequently made of gay as gay can be prints. These are for the most part trimmed with a solid color. It is said that pajama suits for children from seven to fourteen are far outselling nightgowns.

HELPS FOR HOUSEKEEPERS

Goloshes and rubbers should fit the child's shoes but should be large enough for the child to put on and take off.

Let the baby be comfortable in hot weather by dressing him only in the kind of clothing his elders would like to wear.

Children need as much sleep in summer as in winter. Sleeping hours and naptimes should not be shortened by long hours of daylight.

To keep berries, cherries or other small fruit fresh in hot weather, pick them over and spread them out in the refrigerator on a shallow plate or flat wire sieve.

Sun Suits Are Easily Made

(Prepared by the United States Department of Agriculture.)

A sun suit, after all, is only an abbreviated form of rompers, with certain features about its construction which expose as much skin surface

especially in front, and the legs short. At the back the neck is not cut down too much or the suit will tend to slide off the shoulders.

A mother can make a sun suit very easily by adapting a plain romper pattern. If she is adapting a romper pattern, it should be of the fold-in-crotch or "French panty" style, with a drop seat. The main proportions should not be changed. The length from shoulder to crotch and the width through the trunk should be ample enough to permit all normal activity, such as running, jumping, climbing, squatting or swinging.

In a girl's tailored ensemble, the sun suit takes the place of underwear or bloomers. Light blue chambray is used for both the overdress and the panties, which are stitched flat to an open mesh top of matching marquisette. The latter can usually be bought among curtain goods. Plain soft cream scrim or net might be used for the top. The shoulder straps are planned to let out for growth. They are tacked at shoulder level and held down with a button sewed through both thicknesses of goods and stayed with a small piece of tape, since a stay button might scratch.

The long front opening finished with a flat band and three medium sized flat buttons makes it easy for the child to learn to put the sun suit on without help. The buttons are the five-eighths inch size. A pocket for a "hanky" is placed on the panties.

The Under Part of an Ensemble is a Sun Suit.

as possible to the health giving rays of sunshine. The armholes are large and loose, the neck is rounded down,

Handy Self-Starters on Washer Big Help

With the many labor saving devices that are constantly coming on the market the housewife is getting a good share that will help her in her household duties. The power washer has done a great deal to give the homemaker more time to do some of the things she likes to do.

One of the latest conveniences to come to our attention is an electric self-starter for gasoline-powered washing machines. This works just like the starter on your automobile. A touch on the starter sets the engine going.

They're very erratic. Some comets have had as many as six tails, and they won't let people find out much about them.

"They have their own ways and they live their own lives."

"Yet they may let us go through their tails and never say anything."

"Look here, at this very moment you may be going through the tail of a comet."

Cosmo laughed. "Maybe you'd like to know how they got their name."

"The word comes from the Greek word Kometes meaning the long-haired."

"Yes, indeed. As a matter of fact that was planned before we started. You'll see—and you'll also hear!"

More books were published throughout the world last year than ever before. In England, for instance, the number of new books and new editions was 14,386, an increase of 88 over the previous year.

SCENIC PLAYGROUNDS OF AMERICA

By G. M. MILBOURN

Creek That Flows to Both Oceans

A GOOD many scenario writers, probably, have had "Old Jim Bridger" in the movies already, as "atmosphere" for their western thrillers. But some day a drama both entertaining and powerful will be built around Old Jim as a principal figure—and the "theme song" of the picture, if the theme song habit still lives, will be something like, "Well, I'll Be Darned!"

Jim Bridger probably ejaculated that phrase or some more picturesque equivalent as often as any man who ever lived. He was credited by many of his contemporaries with having the most imaginative tongue that ever talked; but if men could not believe Jim's tongue, it was mostly Mother Nature's fault, because there was many a moment when the old trapper could scarcely believe his own eyes, either. Born in Richmond, Va., in 1804, Bridger wandered out to the Rockies so early that at thirty years

Two Ocean Pass.

of age he was already "the Old Man of the Mountains," and with the possible exception of the greatest American question-asker, Benjamin Franklin, probably no man in our national history has been the discoverer of as many interesting and amazing facts as was Jim Bridger. He discovered Bridger pass and the Great Salt Lake, built the historic Fort Bridger on the Green river, and could make a map of any section of the West, according to the many who engaged him as a guide or scout, with a piece of charcoal and a buffalo skin. Probably only a few rangers today know the Yellowstone region as thoroughly as Jim Bridger did eighty or ninety years ago; but he told the truth with such dramatic exaggeration that the world would heed neither truth nor fiction from him.

One of the discoveries which must have made Old Jim scratch his eyes the longest, however, came when he decided to follow a queer little creek (big) on the plateau in western Wyoming. Jim was approaching the continental divide at a point just south of the present Yellowstone National park boundary; but the creek, which should have dwindled away to nothing at all as he neared the divide, remained just as energetic a young torrent as ever. Finally it turned slyly into the woods to the north, and the old scout thought he saw the whole story—a steep wooded canyon in a towering mountain to the north. But as he stalked through the trees, there was a sudden babble of rushing water on the other side of him, too. Sufferin' cats, this creek was twins! For there, right in front of him, the creek started down across a little delta of rock and split in two, as if to just go around a little island. But Jim was standing on that island, and he hadn't crossed any water getting on it. Then the truth dawned on him. This creek ran to both oceans; the island, instead of being a little one, got wider and wider, finally reaching from the Mississippi river to the Pacific ocean!

Jim had discovered Two-Ocean pass. Half of Two-Ocean creek flows into the Missouri river via the Yellowstone, and the other half into the Columbia through the Snake. People thought the story that the oceans meet—in Wyoming!—just another one of "Old Jim Bridger's lies," but fortunately the old scout lived until 1881, long enough to have this as well as the Yellowstone geysers facts confirmed by abundant authority, and to be honored with profuse apologies from his former doubters.

Two-Ocean pass is in the heart of the dude ranch country, and is visited by summer vacationists as part of a seven-day horse trip from Brooks Lake, Wyo. (reached via the Lander gateway, from the Chicago and North Western railway) to Lewis lake within the park. It may also be reached from Moran, Wyo., in the Teton country. The pass may be annexed to the park in the near future if a recent proposal to include the drainage area of the upper Yellowstone, now barely excluded, finds favor.

Evening Story for the Children

By MARY GRAHAM BONNER

Harry, who was adventuring through the sky, had been hearing about comets.

"Well, you might go through the tail of a comet sometime and not know it," Cosmo announced.

"Really? I'll tell that to everyone when I get back to the Earth."

"I'll say."

"Look here, at this very moment you may be going through the tail of a comet."

Cosmo laughed. "Maybe you'd like to know how they got their name."

"The word comes from the Greek word Kometes meaning the long-haired."

"They're very erratic. Some comets have had as many as six tails, and they won't let people find out much about them."

"They have their own ways and they live their own lives."

"Yet they may let us go through their tails and never say anything."

"Look here, at this very moment you may be going through the tail of a comet."

Cosmo laughed. "Maybe you'd like to know how they got their name."

"The word comes from the Greek word Kometes meaning the long-haired."

The Aurora Borealis.

about it! It's certainly a queer old world, Harry."

"It certainly is," Harry agreed.

Cosmo evidently had told the plot to go rapidly after this for the rockets went shooting forth at a great speed, and Harry knew that when the rockets did this the plane was being forced to go rapidly forward.

He thought of how little he had ever imagined as a small boy that the same idea that sent his rockets up into the air when he was sending off fireworks

would be used to give him a trip through the sky.

There were some bright lights ahead, like arches of fiery clouds in the sky. There were beams and streamers of light going across the heavens from east to west.

"The aurora borealis or northern lights," Cosmo pointed out. "We wanted you to see them so put on a special performance for your benefit."

"I've seen those in the winter," Harry said.

"Yes, they're at their best in the winter and at their best far north. They have their own electrical displays and there are many stories connected with them."

"Sometimes they have been called the Merry Dancers. The Eskimos think that they are boys playing football and that the movements of the lights are the players struggling with each other."

"They say that if the aurora fades away and you whistle it will come back again as though to show that they know you like their football game."

"Then some Indian tribes have be-

Some Food Hints

By NELLIE MAXWELL

Who does his duty is a question too complex to be solved by me; but he, I venture the suggestion, does part of two, that plants a tree.

Some of these salads are more adapted for entertaining than for every day's use:

Butterfly Salad.—Split a small banana into halves and dip into lemon juice to keep it from discoloring. On either side of the banana, placed on lettuce, put half slices of pineapple to form the wings of the banana body, the rounded edge toward the banana. Garnish the wing with red and yellow aspics or fruit gelatins. Garnish the banana with chopped ripe olives and capers. Serve with french dressing after being well chilled.

Beach Club Salad.—Fill a scalloped grapefruit shell with shredded lettuce and diced grapefruit which have been well mixed with mayonnaise. Decorate the top with halved cherries. Serve on lettuce leaves.

Cheese Salad.—Arrange a nest of shredded lettuce and place on it finely shredded celery, apples and radishes all cut into small shoestrings. Mix with creamy mayonnaise, using two tablespoonfuls of mayonnaise to a half cupful of shredded lettuce. Decorate with rings of olives in the center of which has been piped a rose of cream cheese. Serve with french dressing.

A dainty dessert and one easy to prepare is always popular with all housewives. Here is one:

Marshmallow Dessert.—Cut into small bits a cupful or more of marshmallows, add a handful of blanched and shredded almonds, cover with a cupful of whipped cream and at serving time serve in sherbet glasses topped with shredded pineapple.

Fruit Salad.—Prepare a bed of shredded lettuce. Place a slice of canned pineapple upon it. Fill one-half of a canned pear with diced bananas and celery mixed with mayonnaise dressing. Lay on top of the pineapple. Garnish with strips of

green pepper. Serve with french dressing.

A potato salad is one of the easiest salads to make and one which is often the poorest. Potatoes are tasteless when cold and should always be marinated with a french dressing for two or three hours before the mayonnaise is added.

Carrot, Coconut and Pineapple Salad.—Take one can of crushed pineapple, two cupfuls of grated raw carrots. One-half cupful of shredded coconut, mix with mayonnaise and serve on lettuce. Sprinkle the top of each with coconut.

(©, 1920, Western Newspaper Union.)

Use Judgment in Choosing Food

(Prepared by the United States Department of Agriculture.)

The thoroughly modern girl—and boy, too—wants to know something about good diet. Whether the main concern is choosing meals at a cafeteria or lunch room, or helping with meals at home, it is clearly important to everybody to know what to eat to keep well and store up energy, and what food combinations are suitable together. The older boys and girls in many families can be of great help if they can from time to time relieve their mothers of the task of planning and preparing meals.

What a real "day off" a mother might have if the meals on Saturdays, for example, could be attended to entirely by one of her daughters, leaving her free to go shopping, visit her friends, attend a club meeting, make a trip to another town, or get caught up on other things! And the daughter would not only enjoy the change from books and lessons, although she would actually be learning something of permanent use to her, but she would have the satisfaction of relieving her mother for a few hours from her daily routine.

A girl of eleven or twelve is not too young to try planning and assembling a simple dinner without help. After she has gained confidence in handling food materials and the kitchen range, she might do this regularly

when school work permits. Perhaps her brother would find it interesting to help her, too, and at the same time learn why there should be more spinach than pie in his menus, and why fried potatoes and doughnuts at the same meal would be a poor combination.

The bureau of home economics of the United States Department of Agriculture, a few years ago, prepared a brief circular on the subject of meal planning, which is just what the beginner in this field needs. It was intended especially for the use of 4-H club members, and is written in simple, readable form, easily followed. Both boys and girls belong to these clubs, and as many of them have to take part in the farm home activities, food selection and meal planning is one of the regular projects in club work. The circular describes each of the five food groups, tells which foods belong in each group, and makes a number of interesting suggestions about combining foods in menus. It points out too that attractive appearance and texture in the foods served at a meal is important as a stimulus to good appetite.

This publication can be obtained free by writing to the United States Department of Agriculture, as long as the supply for free distribution is available.

Fill Ice Chamber to Capacity

Lower Temperatures Result From a Well-Filled Ice Chamber.

(Prepared by the United States Department of Agriculture.)

A well-filled ice chamber in a good refrigerator soon chills the entire box to temperatures at which the more perishable foods can be safely kept. It is important therefore, not to allow the temperatures to rise very much after the box is once properly chilled. The next time the ice man calls he should be asked to fill the ice chamber to capacity again, and continue to keep it filled. If the first large piece of ice that is put in is allowed to melt away until it is half gone or more before another piece is put in, or if only 25 or 35 pounds of ice are added when 50 pounds are needed to bring it up to capacity, the temperatures in the refrigerator will rise above a safe point. Then the new piece of ice will be melted faster to chill the box again below 45 degrees Fahrenheit than if the box were colder when refilled.

The chart, which was made by the bureau of home economics of the United States Department of Agriculture, shows that a box made to hold 80-100 pounds of ice, when filled, will have a temperature of about 42 degrees Fahrenheit in the coldest part directly under the ice compartment when the room is 75 degrees Fahrenheit. It is here that milk, meat, and

other perishable food should be kept. The top shelf may be 10 degrees higher, but this temperature will be satisfactory for storing vegetables or fruits. The dotted line represents a temperature of 45 degrees Fahrenheit, which is considered the maximum for safe holding of milk and meats.

When the ice has melted down to 50 pounds in this box the danger line is almost reached. Both lower and upper shelves will be two degrees higher than they were and the box needs refilling to capacity at the earliest possible moment. In this case a 25 pound piece might do but a 35 pound piece will maintain a steady low temperature better, and last relatively longer.

If the ice is allowed to melt down to 20 pounds before refilling, the lower shelf temperature will rise three degrees more and the upper, four degrees. The addition of 25 or even 35 pounds of ice then will not be adequate, as so much of the ice will be melted in chilling the box that there will not be enough left to keep the box steadily cold until the next delivery. The temperature will begin to rise much sooner than in the other instance and in the long run more ice will be bought with less satisfactory results.

THE STORY

On a pleasure trip in eastern waters, Philip Amory, English World War veteran, now a trader on the island of Papua, New Guinea, saves the life of a musical comedy actress, known as "Gin-Sling". Amory becomes interested in Pia Laurier, member of a wealthy New South Wales family. He tells her of his knowledge of a wonderful gold field on the island. "Gin-Sling" tells him Pia is engaged to Sir Richard Fanshew. His holiday ended, Amory returns to Daru. He meets an Englishman, Spicer, there on development business for a syndicate of which Fanshew is head. Fanshew's name recalls to Amory a long-forgotten incident in which he witnessed the escape of Fanshew from a leper colony. He tells his friend Basset about it and decides to inform Laurier. He goes to Thursday Island to send the message. Amory hears Fanshew dictate a message which indicates that the secret of the gold field is known. Amory meets with an accident that lays him up for three weeks. Recovered, he sails alone for Port Moresby. A storm compels him to put in at Thursday Island where he finds Fanshew. Amory resumes his voyage to Port Moresby. Fanshew follows in a motor boat and attempts to run him down. Amory shoots and kills Fanshew.

CHAPTER VII

-13-

From where I was camped, the whole world seemed to fall away in one huge wave, upon whose crest the boys and I precariously hung. Four days we had toiled to reach this place, four days of hardest work, cutting our road foot by foot through forest that was knitted and tangled together. We were pitted with leech bites, scarred by mosquitoes. I hadn't had enough dinner, and wasn't likely to, for months; comfort was a dream, and danger daily food.

And I was happy, in the way of me who has long thirsted for a thought of the home airs about his nose town, and, after long travel, the difficulty has won back to it at last. I wish I could find words to tell the completeness of that conviction; the certainty—based on no probable facts—that I was in my proper place and doing what I ought to do—here, four days inland from the midwaters of the Romilly river, away from all the world, white men and all their works; here, on the spine of the Dreadnought ranges verging—at last, at last—on the unknown.

From today, I knew, the worst of the work began. I scanned the world below, and decided that I had done well. Grace, the dead miner, hadn't left the Romilly till he came right to the head of the navigable part. I, acting on what was more a guess than a conviction, had branched off from the river halfway up. Nobody knew just what lay a day or two beyond my present camp, but from what I could see and infer, I thought I might succeed in cutting off weeks of work, by going on just as I was going. I might go a longer way round than Grace had gone, but I was likely to get there sooner. So I sat, and smoked, and felt myself at peace. And the sun went down upon my day.

I should have slept well that night. I did not. I lay wakeful, on my grid of sticks, saw, through the open triangle of the tent-fly, the Cross swing round to the movement of the earth about the sun.

"Sleep," I told myself. "You must sleep. Tomorrow's a hard day." But there seemed to be springs in my eyelids, holding them up; the muscles of my limbs were stiff and unrelaxed. I could not sleep.

Toward morning, when I should have been waking, I dropped into confused, tired sleep. The first spears of sunrise woke me like a stab; it is not at sunrise, but before, that the explorer should leave his none-too-downy bed. With a curse at my own laziness, I pulled on boots, and was dressed. Already the carriers had their fire going; they sat round it, blanket-robbed, watching the pot of rice cook over the flames. I looked at them, almost through them; felt, as one feels in such places, that they, the brown men of the country, made scarce a break in the glorious, the intoxicating sense of solitude that a white man knows, on the verge of untrodden lands. Over that nearest ridge, a couple of days' march on, there was no man knew what; but when I topped the mountain, I should know. And I said, in my rashness—"This is good; I ask no more of life."

In the same moment, I turned, looked carelessly down the long cutting in the forest that we had made the day before, and saw a figure seated on a log.

The current of my blood seemed to stop, as the flow of the Romilly river stops, for an instant, when the Gulf bore comes sweeping in, and holds it back. Then, as the bore flies up the river, driving all before it, anger, and sick dismay invaded my soul. There was something else, too—gratified vanity, and a kind of anger love, perhaps,

but they were drowned beneath the uprushing tide. I took ten steps to the place where Jinny Treacher was sitting, and I said to her, "G—d, Jinny, what made you do this?"

She looked up at me. I could see now, in the growing dawnlight, how her beauty was wrecked; how her eyes had sunk back into her head, and her copper hair lost its shine; how she had worn herself to a skeleton, and let her clothes fall into rags. There were sores on her arms and neck—leech bite sores, blue marks of mosquito bites, deep scratches made by lawyer thorn. Her shoes were bandaged onto her feet. Her hat was a tangle of torn straw.

Anger had possession of me, and yet—though I knew that she had practically wrecked my expedition—I could not choose but pity the bright thing, brittle as a butterfly, who had waged her light self against the terrific powers of the unknown; who, before the threshold was well crossed, lay beaten. Nothing but the slow pace enforced on me by the cutting of a track had kept her with me so far. She must have known this; guessed that her only chance of life was to come forward and show herself, fling herself on my mercy, before it was too late. She had obtained a canoe (as I afterward learned) from the village at Romilly mouth, and persuaded a small crew to accompany her. Living and sleeping on board, she was able to keep her boys with her until she landed at the place where I had debarked a few hours earlier. There they deserted, as carriers will, and she had had no food save what she could carry herself, no shelter save the frost, during the four days of my journey towards Dreadnought range. Luckily for her, it was impossible to lose the way, even when she fell behind, since the track we were cutting made our course plain as a macadamized road. I think she went in constant terror; terror of natives, terror of wild beasts, even terror of me; for she must have guessed, all too soon, that her plan of following me right through was madness, and that she would be forced into showing herself.

But I do not think she knew, even suspected, that her coming stamped the expedition into dust. She thought she had merely to placate me, use her woman's tricks, in order to find refuge in my party. She didn't doubt her ability—Jinny had not had much reason to doubt her chance of success, in this or any other test where the weapons of her sex were pitted against man's determination.

But it was not man's determination that barred her now. It was the immense, impersonal might of the untamed wilderness of Papua. Against this, the finest men of the Nineteenth century, the pick of the Twentieth, had fought, struggled, and—most often—lost, paying the loss with their lives. Who was the little dancer, to break lance in such an army?

She did not know. She stood up, and came to me, with the red of sunrise on her red-gold hair, smoothing her torn shirt, and pulling down her tattered breeches, calling to work the smile that had gained a drop of new sweetness from every man who fell victim to it, until now it was a very honey flower wherein the wandering, kissing bee might drown. She knew her work, this Jinny. She made me, in a minute, forget her rags, her stains, her battered weary look, and see her but as I had known her months, weeks ago, on the liner and in Thursday Island. Yet, at the same time, I was angry, and sorry—for her and for myself.

"Jinny, Jinny," I said to her, "and again 'Jinny, Jinny'! It seemed as if I could find no other words.

But Jinny was only too eager to talk.

"My oath, Phil," she declared, catching me by the loose folds of my shirt, as if she feared, that somehow, I might vanish—"My oath! I thought it was all in with me, I did, straight. Last night I couldn't see a sign of your fire anywhere, same as I'd seen it other nights, and I fair gave myself up for dead. And so this morning, I

started off just as soon as I could see me feet, and I said to meself, 'Jinny, my girl, if you don't find him quick, the robins or whatever-it-is will come and cover you with leaves today.' So I hurried and hurried, and when I come on you just like that, it took me queerly, and I had to sit down, because of course I was afraid that you'd be angry—Phil, you're not angry with little Jin, are you? Phil, I just had to come. I don't mind anything, now I've found you, and I know I'm goin' with you."

"Jinny, my dear," I said—and I did not think my black-haired Dian herself would grudge the kiss that went with the words—"Jinny, tell me—for I wanted to put off the bad moment as long as possible—"tell me, have you had any breakfast?"

"No, nor dinner last night," she said. "I hadn't anything left."

"Then you must breakfast at once."

I called a carrier, spoke to him and set him to make tea and bring meat and biscuits.

She had eaten her meat and biscuits; she had thirstily finished her pannikin of tea. Life was creeping back into her tired face, and with it something that I knew my next few words must kill—hope.

"I thought you'd be angry," she said, setting the pannikin down upon the ground. I said nothing. I took her scarred, burned hand, and began smoothing it gently in mine. Angry? She little knew. The very rage of her had been in my heart, when first I looked down the clearing, saw her sitting there, knew what it meant to me, and knew in the same moment, that she could never, if she lived to be a hundred, understand what she had done. How could one be angry?

"Leave go of my hand," she said suddenly. "There's something you aren't telling me, Phil. What is it?"

"Jinny," I said, "there are a great many things you haven't told me, and I propose to know them before very long; but there's plenty of time for all that. Plenty of time," I repeated, "for anything either of us wants to tell the other. On the way."

"Yes," she said. "The way to the place they call Tatataata."

"The way to the mouth of the river, I mean," said I.

"You're goin' back again?" cried Jinny.

"We're going back."

"Because of me?"

"Because I find it necessary to go."

"Phil, I'd have drowned myself rather than—if I'd known, Phil—don't do it, old boy. Let's go on and chance it. I'm not afraid of anything. I'll go till I drop dead. Let me, Phil." She was almost crying; she held my sleeve tightly, and shook me, in her eagerness.

"Jinny," I said, "we're up against hard facts. You'd drop dead, as you call it, before noon today. You—"

"I done well up to this, anyhow. I kept with you, Phil!"

"You kept with me because the work hadn't begun. If you had been an hour—five minutes—later in finding me, Jinny, the meat-stains would have been picking your bones tomorrow, maybe before you were dead. If you came on with us now, we might be able to help you along—"

"Yes?" Her eyes glowed with hope.

"For a day or so—carrying you in a litter where we could, and slinging you up precipices with bushrope like a tied pig. . . . That, Jinny, would cut our day's work down by a third, maybe a half. We should get a little way and turn back. I prefer to turn back now. Don't cry, Gin-Sling; you never cry, you know. What's that war-cry of yours—'Drink hearty, you'll soon be dead?' Let's hear it again." I clapped her on the back, assuming a gaiety I was very far from feeling.

One of the swift changes typical of her sad, merry kind, seized hold on her without warning. She flashed into sudden fury.

"For twopence," she said. "I'd kill him—swine!"

"Who's the swine?" I asked. But she looked at me sideways, and made no reply. I saw she was shaking with rage.

(TO BE CONTINUED)

"Passion Play" Life of Small Bavarian Village

The Passion play, a dramatization of the sufferings in the life of Christ, takes place in the little village of the Bava Oberammergau, nestled in the Bavarian Alps. And this play has been going on every ten years since the plague of 1633. During that year the citizens of Oberammergau vowed that they would enact the piece every ten years as a thanksgiving offering for having been delivered of the plague.

The original text and arrangements were probably made by the monks of Ettal. The music was composed by Rochus Dedler, schoolmaster of the parish in 1814. The production is given in the open air and stands are constructed to accommodate 5,000 spectators. Seven hundred actors are employed in the play, all native villagers. The proceeds go for the public good

after the expenses have been defrayed and a small remuneration made to each actor.

The play is a stupendous manifestation of religious worship and the moral character of each actor is considered as well as his histrionic ability. The principal parts are hereditary. The whole village lives for this production. The inhabitants spend their time at fashioning crucifixes, rosaries and images of the saints to sell to the tourists who flow through their quiet little city year by year.

Golf, Earth, Strength

The ancient Greek, you remember, gained new strength every time he hit the earth. It has that effect on a golfer's language, too.—San Francisco Chronicle.

OIL FORTUNES FAIL TO SPOIL TEXANS

Old Cattlemen Build Up Ranches, Live Simply.

Odessa, Texas.—Production of oil has brought millions of dollars to land owners of Texas. In every oil field there is a fund of human interest stories on the effect which the unexpected acquirement of riches has had upon various landholders.

Although there are in Texas a number of multi-millionaires who were in poor circumstances until the black gold began flowing from wells upon their land, none of them has attempted a spectacular role, such as was credited to "Coal Oil Johnny" of Pennsylvania pioneer days, or to Governor A. W. Tabor of Colorado, silver king, or to the mysterious "Scotty," of Death valley fame.

Ira W. Yates, who owns the land upon which the famous Yates field in Pecos county is situated, during the last four years has piled up a fortune of more than \$8,000,000 from oil royalties. Mr. Yates now makes his home in San Antonio, more than 400 miles from the scene of his 40 years of ranch labors.

Yates Interested in Cattle.

His primary interest since his wealth came to him has been to buy ranches and stock them with high-grade white-face cattle. He now has several ranches in southwest Texas to which he devotes his time. He was on the verge of going bankrupt in the cattle business at the time the discovery of oil was made upon his Pecos county ranch.

Tom Hendrick, of Odessa, is another outstanding producer who has not let money turn his head. Mr. Hendrick, like Mr. Yates, has been ranching in West Texas for more than 40 years. The deflation of the cattle business following the close of the World War brought disaster, and his ranch in Winkler county became loaded with debt. Then came the oil strike. In a short time he had piled up a fortune of more than \$6,000,000. The Hendrick oil field is second in importance to the Yates field.

Travel and large cities have no lure for Mr. and Mrs. Hendrick. In his ranching days Odessa was his trading place, and it was to this town that he moved when fortune smiled upon him. He built a small home here. He is an outstanding hobby. It is that of creating a wild game preserve.

Creates Wild Game Preserve.

He recently purchased 5,000 acres of land three miles from Odessa and fenced it with closely webbed wire, so that no kind of animal could get out and no predatory animal could get in. He has already stocked it with a small herd of buffalo, and is now negotiating for a herd of antelope. Deer and other wild animals native to West Texas will also be obtained and turned loose upon the small ranch.

Many persons in Texas are land poor; that is, they own land which is non-productive and from which only a bare revenue can be obtained by farming. In practically every oil field in Texas, and there are more than 40 recognized fields or pools, there were many poor landowners, each of whom has acquired fortunes ranging from \$50,000 to \$500,000 from oil royalties.

Hornets Fly 6 Miles to Sea; Put Out Gas Buoys

Boston.—Hornets are doing off shore cruising this season, the gas buoys off Cape Ann and Nauset, Cape Cod, having recently been extinguished by the insects creeping under the hood and inside.

The captain of the steamship Camden recently reported that the Cape Ann gas buoy was not burning and the lighthouse tender Azalea was ordered to investigate.

When the first officer of the tender opened the hood hundreds of hornets flew out and he was severely stung. He caught some of the hornets and presented them to Captain Eaton, superintendent of lighthouses, as evidence.

The buoy is six miles off shore.

Newlyweds' Callers Stage Big Rat Killing Bee

Jonesboro, Ark.—You can fetch the pride of some people by entertaining with a lifeless party, but persons who attended a courtesy to a young married couple here recently were unbeatable. Aggravated with the routine of a social, the men folk hoisted stray clubs and chased rats about the barn and corn cribs at the home. In an hour 150 rats were dead.

Cat and Bird Call Truce

Middletown, N. Y.—A cat and a bird called a temporary truce here and amused passers-by who saw the bird alight on the cat's back for a short ride across a lawn. The bird appeared to take delight in flying back and forth from its unusual perch.

Lion Carrying Trap Killed by Hunter

Durango, Colo.—Eucik Maitlen, a trapper working in this vicinity, told of suddenly finding himself face to face with a huge mountain lion, infuriated after carrying a trap on his hind leg for two days.

Maitlen sent two bullets crashing into the animal's skull, killing it.

FRENCH YEGGS TURN TO AMERICAN IDEAS

Auto Thieves Are Widening Their Activities.

Paris.—French crooks are beginning to leave off family operations on which they have concentrated for centuries and are broadening the style conforming to new ideas adopted by their American colleagues.

Automobile thieves are now making their appearance in earnest, but the figures just issued by the prefecture de police reveal that the racket is still in its infancy in France.

In 1929, 3,000 automobiles were stolen in France, but all except 493 were recovered within a short delay, either being found abandoned in the streets or roads within a day or so, or having been discovered by the authorities after they were sold.

Generally the machines stolen are of well-known French makes, Citroens, Renaults, Peugeot's, and all small cars. In some cases the crooks dope up the machines, repaint them, and make other slight alterations to camouflage them, but generally they do not even bother to obliterate the serial numbers of chassis and body.

They rely on selling them quickly at a bargain, and generally the crafty purchasers ask no questions when they can buy a machine worth 15,000 francs in the open market for ten from an unknown character.

With a million and a half automobiles in circulation in France, last year's theft of 3,000, is less than two per thousand.

Until recently most owners did not include a risk against theft in insurance. Dealers assert that because the overwhelming majority of cars in service in France are closed, permitting them to be locked easily every time they are left, also has a large part to do with keeping down the losses.

The latest scandal is the syndicate to obtain driving licenses for applicants too timid or too backward to pass the tests. An official of the prefecture in collusion with one of the testers, stamped as passed examination the application of would-be drivers and sold them for 1,500 francs instead of the normal 30 francs charge. It is estimated there are 1,500 of these fraudulent licenses in existence.

Billy the Kid's Resting Place Will Be Marked

Fort Sumner, N. M.—The grave of Billy the Kid, most famed of southwestern gunmen and outlaws, is to be preserved by this city.

Men who knew the light-haired boy who killed 21 men before reaching his majority have assisted in locating his grave in an old cemetery near here.

The kid is buried next to two other men who helped write the flaming history of the Southwest—Charley Boudrey and Tom O'Phallon.

A concrete curbing has been placed around the graves and a concrete slab over the spot where Billy rests. In time it is planned to erect a marker. Among the old timers who helped locate the kid's grave was Jesus Silva, seventy-two, who was a member of the coroner's jury that sat over the body of the young outlaw.

The summer night in 1881 when the Kid was killed by Sheriff Pat Garrett is well remembered by Silva. That day he had killed a steer at the ranch of Pete Maxwell, where he was a cowboy.

The kid was a visitor at Maxwell's, and was on his way to the ranch house to cut a steak from the freshly killed steer when he encountered Garrett.

Suicide Pace Continues Unabated in Germany

Berlin.—The epidemic of suicides which gripped Germany after the war is continuing unabated. Recent statistics show that in Prussia alone, an average of 26 persons commit suicide daily.

In 1928 a total of 9,530 persons voluntarily ended their lives in Prussia. Of these 6,630 were men and 2,840 belonged to the female sex. More than two-thirds belonged to the town population and only 3,117 were from rural districts.

Thirty-eight per cent of the suicides were due to mental and nervous diseases, 28 per cent were caused by emotional strain, 12 per cent were due to physical sufferings, and 11 per cent to poverty.

U. S. Per-Capita Wealth Put at \$37.30 in Cash

Washington.—Each person in the United States is the possessor of \$37.30 in cash, the Treasury department estimated in announcing the amount of money in circulation. The per capita possession is \$2.32 less than a year ago, when the figure was placed at \$39.62.

In reaching this conclusion an estimated population of 121,213,000 was used for the \$4,521,832.33 in circulation on June 30 last. On June 30, 1929, the money in circulation was \$4,746,296,562.

Rose Bush on Coast Has 40,000 Blossoms

Seattle.—The largest rose bush on the Pacific coast bears a load of 40,000 roses and rosebuds. C. L. Tucker of Calistoga, Calif., planted the double Cherokee variety 31 years ago. He never has pruned back the growth and today the trunk of the rose bush measures three feet in circumference. The largest rose bush in Washington is at Olympia. It is less than two feet in girth.

Summer COLDS

Almost everybody knows how Bayer Aspirin breaks up a cold—but why not prevent it? Take a tablet or two when you first feel the cold coming on. Spare yourself the discomfort of a summer cold. Read the proven directions in every package for headaches, pain, etc.

BLUE STAR OINTMENT

Blonds Have Preference

"Gentlemen prefer blonds," remarked the masher insinuatingly as he sidled up to the titian-haired beauty.

She gave him a cold stare. "Blonds prefer gentlemen," she replied as she moved away haughtily.—The Pathfinder.

She Knew Henry

Pansy—How did you get the truth from reading Henry's letter?

Violet—By reading between the lyn's.

Restless CHILDREN

CHILDREN will fret, often for no apparent reason. But there's always Castoria! Harmless as the recipe on the wrapper; mild and bland as its taste. But its gentle action soothes a youngster more surely than a more powerful medicine.

That's the beauty of this special children's remedy! It may be given the tiniest infant—as often as there is need. In cases of colic, diarrhea or similar disturbance, it is invaluable. A coated tongue calls for just a few drops to ward off constipation; so does any suggestion of bad breath. Whenever children don't eat well, don't rest well, or have any little upset—this pure vegetable preparation is usually all that's needed.

Fletcher's CASTORIA

Sign on Dotted Line

A northern Indiana lad is often an attentive listener to shop talk by a young lady selling books. One warm day recently the lad was eager to go to the swimming pool and, receiving a vague reply to his request, said: "Mother, I wish when I ask you to do things you would sign on the dotted line."

Much reading maketh a full man, likewise much feeding.

People aren't necessarily good because they feel that way.

TOOK IT TO BUILD HER UP

Strengthened by Lydia E. Pinkham's Vegetable Compound

La Junta, Colo.—"After my little daughter was born, one of my neighbors persuaded me to try Lydia E. Pinkham's Vegetable Compound to build me up. The first bottle made quite a change in me. I got an appetite and can sleep much better. I am not so nervous as I was. I have six children and do all my own work. I can do so much more now than I could when I began taking the Vegetable Compound and I shall certainly recommend your medicine whenever I have an opportunity."—Mrs. JOHN OSBORN, R. #2, Box 216, La Junta, Colorado.

I can do so much more now than I could when I began taking the Vegetable Compound and I shall certainly recommend your medicine whenever I have an opportunity."—Mrs. JOHN OSBORN, R. #2, Box 216, La Junta, Colorado.

S. J. R. No. 19
 Proposing a Constitutional Amend-
 ment to Be Voted on November
 4, 1930.

Be it resolved by the Legislature of
 the State of Texas:

Section 1. That Section 5 of Ar-
 ticle 3 of the Constitution of the State
 of Texas be amended so as to here-
 after read as follows:

The Legislature shall meet every
 two years at such time as may be
 provided by law and at other times
 when convened by the Governor.
 When convened in regular Session,
 the first thirty days thereof shall be
 devoted to the introduction of bills
 and resolutions, acting upon emerg-
 ency appropriations, passing upon the
 confirmation of the recess appointees
 of the Governor and such emergency
 matters as may be submitted by the
 Governor in special messages to the
 Legislature; provided that during the
 succeeding thirty days of the regular
 session of the Legislature the various
 committees of each House shall hold
 hearings to consider all bills and res-
 olutions and other matters then pend-
 ing; and such emergency matters as
 may be submitted by the Governor;
 provided further that during the fol-
 lowing sixty days the Legislature
 shall act upon such bills and resolu-
 tions as may be then pending and
 upon such emergency matters as may
 be submitted by the Governor in
 special messages to the Legislature;
 provided however, either House may
 otherwise determine its order of busi-
 ness by an affirmative vote of four-
 fifths of its membership.

Sec. 2. That Section 24 of Article
 3 of the Constitution of the State of
 Texas be amended so as to hereafter
 read as follows:

Members of the Legislature shall
 receive from the public Treasury a
 per diem of not exceeding \$10.00 per
 day for the first 120 days of each
 session and after that not exceeding
 \$5.00 per day for the remainder of
 the session.

In addition to the per diem mem-
 bers of each House shall be entitled
 to mileage in going to and returning
 from the seat of government, which
 mileage shall not exceed \$2.50 for
 every 25 miles, the distance to be
 computed by the nearest and most di-
 rect route of travel, from a table of
 distances prepared by the Comptroller
 to each county sent now or hereafter
 to be established; no member to be
 entitled to mileage for any extra ses-
 sion that may be called within one
 day after the adjournment of a reg-
 ular or called session.

Sec. 3. The foregoing constitu-
 tional amendment shall be submitted
 to the electors of this state qualified
 to vote on constitutional amendments
 at an election to be held throughout
 the State on the first Tuesday after
 the first Monday in November, A. D.
 1930.

 day of this week, going through
 in his car.

S. J. R. No. 7
 Proposing a Constitutional Amend-
 ment to Be Voted on November
 4, 1930.

Be it resolved by the Legislature of
 the State of Texas:

Section 1. That Section 11 of Ar-
 ticle VII of the Constitution of the
 State of Texas be amended so as to
 read as follows:

Section 11. In order to enable the
 Legislature to perform the duties set
 forth in the foregoing section, it is
 hereby declared all lands and other
 property heretofore set apart and ap-
 propriated for the establishment and
 maintenance of the University of
 Texas, together with all the proceeds
 of sales of the same, heretofore made
 or hereafter to be made, and all
 grants, donations and appropriations
 that may hereafter be made by the
 State of Texas, or from any other
 source, shall constitute and become
 a permanent university fund. And
 the same as realized and received into
 the Treasury of the State (together
 with such sums belonging to the
 fund, as may now be in the Treasury),
 shall be invested in bonds of the
 United States, the State of Texas, or
 counties of said State, or in school
 bonds of municipalities, or in bonds
 of any city of this State, or in obli-
 gations and pledges issued by the
 Board of Regents of the University
 of Texas, or secured by such obli-
 gations and pledges, for the construc-
 tion of dormitories and other build-
 ings for the use of the University of
 Texas, or in bonds issued under and
 by virtue of the Federal Farm Loan
 Act approved by the President of the
 United States, July 17, 1916, and
 amendments thereto; and the interest
 accruing thereon shall be subject to
 appropriation by the Legislature to
 accomplish the purpose declared in
 the foregoing section; provided, that
 the one-tenth of the alternate sec-
 tions of the lands granted to rail-
 roads, reserved by the State, which
 were set apart and appropriated to
 the establishment of the University
 of Texas, by an Act of the Legisla-
 ture of February 11, 1858, entitled,
 "An Act to establish 'the University
 of Texas,' shall not be included in,
 or constitute a part of, the permanent
 university fund."

Sec. 2. Said proposed amendment
 shall be voted on by the electors of
 this State qualified to vote on consti-
 tutional amendments at an election
 to be held throughout the State on
 the first Tuesday after the first Monday
 in November, 1930.

(A correct copy.)
 JANE Y. McCALLUM,
 Secretary of State.

QUICK ACTION NEEDED

Only 12 states require all au-
 tomobile drivers to pass tests
 before they are licensed, and in
 12 other states anyone, however
 incompetent, may operate a car,
 according to Dr. Julius Klein of
 the Department of Commerce.

"In the absence of a driver's
 license law," he states, "any or
 all of these potential killers and
 wreckers can be let loose with
 the utmost freedom and impun-
 ity upon the roads of the com-
 munity."

Statistics show that the acci-
 dent rate, in proportion to the
 number of automobiles register-
 ed, has increased much more
 rapidly in states where examina-
 tions of drivers are not re-
 quired than in states where they
 are required.

Even if all the 48 states had
 strict examinations for drivers,
 the accident problem would not
 be solved. But it is the con-
 sensus of much expert opinion
 that nation-wide laws which will
 force potential drivers to learn
 how to drive, are the greatest
 single need. The fact that last
 year 31,000 people were killed by
 automobiles should cause a de-
 mand for quick action in every
 state.

 Alpine, visited Sunday with Mr.
 John O'Dell and family.

H. J. R. No. 11
 Proposing a Constitutional Amend-
 ment to Be Voted on November
 4, 1930.

Be it resolved by the Legislature of
 the State of Texas:

Section 1. That Article VII of the
 Constitution of the State of Texas be
 amended by adding thereto Section
 16, which shall read as follows:

"Section 16. All land mentioned in
 Sections 11, 12 and 15 of Article VII,
 of the Constitution of the State of
 Texas, now belonging to the Univer-
 sity of Texas shall be subject to tax-
 ation for county purposes to the same
 extent as lands privately owned; pro-
 vided they shall be rendered for tax-
 ation upon values fixed by the State
 Tax Board; and providing that the
 State shall remit annually to each of
 the counties in which said lands are
 located an amount equal to the tax
 imposed upon said land for county
 purposes."

Sec. 2. The foregoing Constitu-
 tional amendment shall be submitted
 to the qualified electors of the State
 at the next general election to be held
 throughout the State on the first
 Tuesday after the first Monday in No-
 vember, 1930.

(A correct copy.)
 JANE Y. McCALLUM,
 Secretary of State.

Miles of Conveyors in Ford Plant

This picture shows two types of conveyors in use in the Rouge Plant of the Ford Motor Company.

AN ENDLESS chain conveyor,
 three and a half to four miles
 long, said to be the longest in
 the world, has just been completed at
 the Rouge Plant of the Ford Motor
 Company at Dearborn, Michigan. On
 it parts of Ford cars in the process
 of manufacture are transported from
 one building to another and completed
 parts are carried direct to railroad
 cars for shipment to branch assembly
 plants.

The conveyor, which carries its
 cargo on suspended hooks, has a daily
 capacity for 300,000 parts weighing
 over 2,000,000 pounds. It supplants
 freight cars and trucks which have
 been used for the transfer of many
 parts from one point to another in the
 Ford plant.

This longest conveyor of them all is
 a development of the Ford policy that
 nothing should be done by manual
 labor that could better be done by
 machine.

In the early days of his manufactur-
 ing career, Mr. Ford devised the as-
 sembly line—a moving track on which
 cars in the process of assembly went
 to the workmen instead of the work-
 men carrying parts to the car. The
 assembly line, perfected in many ways,
 is now used by automobile manufac-
 turers generally.

The value of the conveyor in reduc-
 ing physical labor, in saving time, in
 preserving system and in cutting costs
 soon became apparent and its use was
 extended to other purposes about the
 plant. Now there are literally miles of
 conveyors of various types in the Ford
 plant. Some of them carry parts from
 one building to another and are care-
 fully synchronized so that the parts
 arrive at precisely the right moment
 and in the exact spot where they are
 needed. Others transport red hot
 parts of steel weighing nearly a ton
 each. Still others move outgoing ship-
 ments.

If it were not for the conveyor, ac-
 cording to officials of the Ford Com-
 pany, mass production would not be
 possible on its present scale.

**CHEVROLET ANNOUNCES
 DE LUXE WIRE WHEELS
 at no extra cost**

Chevrolet again adds extra value to the Che-
 vrolet Six! Those who prefer may now have
 any passenger model equipped with beautiful
 de luxe wire wheels—at no additional cost!
 These wheels incorporate many important
 features that have won favor on cars much
 higher in price—large chrome-plated hub
 caps, bolts located inside the hub, and an
 unusually large number of spokes.

**A variety of attractive
 new colors**

In addition to this de luxe wire wheel equip-
 ment, Chevrolet now makes available a wide
 choice of new color combinations on all models
 —colors that are rich and distinctive.

You are invited to come in—NOW—and attend
 the first showing of six-cylinder Chevrolet
 models with these new extra-value features.

SIX-CYLINDER SMOOTHNESS AT LOW COST

Casner-McKnight Motor Co., Sanderson, Texas

Mr. and Mrs. George A Edwards and family left Sunday morning of this week for Animos, New Mexico, where they will make their home.

James Ivey Stansell, son of Dr. and Mrs. Ivey Stansell of San Antonio visited with Mr. and Mrs. Ed Downie and family last week.

LOCALS

Mrs. Tina East was here from Alpine Monday, visiting relatives.

Mrs. Hugh Cox left Sunday for Del Rio, where she will receive medical treatment.

Mr. and Mrs. Claude Lee visited Sunday with Mr. and Mrs. Fred Talbot.

C. M. Breeding made a trip to San Antonio Saturday, returning Tuesday.

Mr. and Mrs. Robert Duncan were guests this week of Mr. and Mrs. Prince Dishman.

Mr. and Mrs. Madison Turner are visiting Mr. and Mrs. John Clark this week.

Mrs. Bozark Brown from the ranch visited Mrs. C. M. Breeding this week.

Mrs. Marcus Cowan and children of Houston visited friends here this week.

Mrs. Haass returned from Del Rio Monday where she visited her son and wife, Mr. and Mrs. Ernest Haass.

Mrs. V. B. Brown was in from the ranch and spent Tuesday and Wednesday with Mrs. C. M. Breeding.

Mrs. John Green and daughter, Willie Mae, left Sunday for Valentine to visit Mrs. Green's mother Mrs. Bell.

Mrs. Chester Surratt and son Harold returned Friday from Uvalde; where they visited relatives.

Mr. and Mrs. J. L. Tarver of Fort Stockton visited Mrs. Harry Sharp Wednesday and are visiting Mr. and Mrs. Jones of Del Rio.

"Babe" Turner was relief operator at the G. H. & S. A. depot this week in the absence of operator J. R. Black.

Mrs. Kilpatrick came over from Christoval Sunday to visit with her daughters, Miss Alice Kilpatrick and Mrs. A. A. Shelton.

Mr. and Mrs. Will Cargile and son left the latter part of last week for El Paso where they will spend a two weeks vacation.

Ervin Grigsby returned the latter part of last week from a vacation. While away he visited El Paso, San Antonio and other points.

Mrs. Will Stricklin and children of Los Cruces, New Mexico, visited Mrs. W. H. Savage and Mrs. Jack McKee Saturday and Sunday. Mrs. Stricklin is a sister of Mrs. McKee.

Virgil Cargile left Thursday morning of last week for El Paso where he will accept a position with the Rio Grande Lumber Co., as traveling auditor. His territory will be west Texas and New Mexico.

Mrs. R. E. Griffith and children, accompanied by her sister Miss Dixon Bazoon, left Monday morning of this week for Vernon, Texas, where they will visit their brother, Gilbert Bazoon.

Sunday school next Sunday morning at 10 o'clock. There will be no preaching service either at the morning or the evening hour, the pastor being out of town at that time. Prayer meeting will be held every Thursday evening at 8 o'clock at the parsonage. Everybody is invited to attend these services. Rev. W. M. Justice.

The "Athletics" the Mexican baseball team of Sanderson played two games here last Sunday with the "Eagles" the Mexican ball team from Del Rio. The games was witnessed by a large crowd of Mexicans and Americans. Del Rio won both games by a margin of only one score. "Pete's" band from Del Rio furnished music at the ball games and also at a big Mexican dance at the Catholic Athletic Club Hall Sunday night.

QUALITY OF CITIZENSHIP BASIS OF DEVELOPMENT

"Citizenship is and always has been a tremendous asset in governmental affairs. The higher and finer the quality of citizenship in a country the better the government and the greater the progress and development and well-being of the nation," writes the Lieutenant Governor of Nebraska, George A. Williams, in the United States Daily. He continues, in part:

"In the last analysis, a community, a state, or a nation is just what its people make it. This is particularly true in a representative government like ours, where the people have the right to make and alter their government and to choose their rulers and make their own laws. "How important it is then that we give heed to the character of our citizenship and seek to develop the qualities of patriotism and loyalty in the truest sense of the terms . . .

"America should guard well the foundation pillars upon which the Republic is builded. I speak advisedly when I say America needs today a new baptism of citizenship. And another has said, 'not a mere sprinkling at the altar but a regular orthodox immersion in deep running water.'

"The foundation of our Government is the Constitution. All the power and strength and beauty of this, the greatest Republic of all ages, together with our rights and liberties, can only be preserved to us by a scared regard for and a faithful observance of the principles of the Constitution and the laws founded thereon.

"There is too much disregard for law in our land. There is too much crime, and too many crimes going unpunished. No government is secure when its citizens exercise a choice as to the laws they shall or shall not observe.

"In our courts there are too many lawyers who ignore the fundamentals of our Constitution—justice and equity—and who prostitute their profession in their efforts to save criminals from deserved punishment."

Extends Life Insurance

Announcement has been made that the Sinclair Consolidated Oil Corporation has extended free life insurance privileges to permanent employees of the Pierce Petroleum organization in the United States which was recently acquired and is now a part of the Sinclair organization. Each employee of six months standing will receive \$1,000 life insurance at the expense of the Sinclair company, the insurance to take effect as of July 1. At a later date, eligible employees will have an opportunity of taking out additional insurance at reduced rates and without medical examination under the regular provisions of the Sinclair group life insurance plan.

Mr. and Mrs. A. D. Brown and family, and Mrs. J. R. Black and Miss Bess McAdams are attending the Baptist encampment this week at Paisano.

S. J. R. No. 2 Proposing a Constitutional Amendment to Be Voted on November 4, 1930.

Be It Resolved by the Legislature of the State of Texas, that Art. V of the Constitution of Texas shall be amended by adding a new section to be known as Section 3a, to read as follows:

"Section 3a. The Supreme Court may sit at any time during the year at the seat of government for the transaction of business and each term thereof shall begin and end with each calendar year."

Section 2. That Section 3 of Art. V of the Constitution of Texas shall be amended by repealing the sentence of said section which reads: "The Supreme Court shall sit for the transaction of business from the first Monday of October in each year until the last Saturday in June of the next year, inclusive, at the Capitol of the State."

Section 3. If the Constitution shall not have been previously amended so as to provide that the Supreme Court shall be open at all times, then, in that event the foregoing Constitutional amendment shall be submitted to a vote of the qualified electors of this State, at an election to be held on the first Tuesday after the first Monday in November, A. D. 1930. (A correct copy.)

JANE Y. McCALLUM, Secretary of State.

Who "Invented" the Steamboat?

MODEL OF FITCH'S STEAMBOAT

THE CLERMONT (AFTER AN OLD PRINT)

WHO "invented" the steamboat? Ask ten Americans that question and the chances are that nine out of the ten, remembering a few outstanding names in their school histories, will answer "Robert Fulton," thereby proving more what a strange jumble of fact and fiction is the average American's conception of the history of his country. For the question of who deserves credit for "inventing" the steamboat has recently started another of those controversies over historical matters, which sometimes results in clearing up certain disputed points in the annals of our nation. More often it does not, principally because the partisans never seem able to agree upon a strict definition of terms, without which it is virtually impossible to settle such disputes conclusively.

In this particular case the word "inventor" is the crux of the situation. While popular opinion accords that distinction to Robert Fulton, and in 1900 he was elected to the Hall of Fame at New York university as "the inventor of the steamboat," being the first inventor and the ninth American chosen to membership among "America's Immortals," his right to that title has been challenged on behalf of no less than eight other Americans. Outstanding among these claims is that in behalf of Lieut. John Fitch, who, it is asserted, made a successful trip on the Delaware river in a steamboat which he had designed more than 20 years before Fulton's historic voyage up the Hudson in the Clermont.

Fitch's right to the title of "inventor" is supported by his descendants who are members of the Fitch Family Association. They have nominated his name for inclusion in the Hall of Fame at New York university with the demand that either the name and bust of Fulton be removed or that those of Fitch be added. They are planning a nation-wide celebration in 1935 to mark the one hundredth and fiftieth anniversary of "the invention of the steamboat by Fitch in 1785," and they ask that this celebration be given recognition by the government and that public agencies and national patriotic societies co-operate in it as they did in the Hudson-Fulton celebration of 1907.

They base their contention that Fitch rather than Fulton was the "inventor" of the steamboat upon certain official acts of the government, the chief one being that both houses of congress by a unanimous vote, approved on February 12, 1923, an appropriation of \$15,000 for a suitable monument to Fitch as "the first in the world's history to successfully apply steam propulsion of vessels through water." This memorial was unveiled May 27, 1927, in the public square in Bardonia, Ky., where Fitch died July 27, 1798, in poverty and despair of proving to an unbelieving world the practical value of a steamboat.

They point out, too, that the labels on the models of steamboats in the Smithsonian Institution bears out their contention that he was the "inventor." These labels read as follows: JOHN FITCH'S STEAMBOAT—Designed by John Fitch, built in Philadelphia in 1780, and first tested on the Delaware river July 27 of that year, when a successful public trial was made. Equipped with a gear engine which, connected by geared machinery, sprocket wheel and chain, operated six oars placed vertically in a frame on each side of the boat.

"In 1788 Fitch completed his first commercial boat for carrying passengers, and it was driven in a similar manner. This boat was 60 feet long and 8 feet wide. She made a trip from Philadelphia to Burlington, about 20 miles, in July, 1788, the longest ever made by any steamboat up to that date. October 12, 1788, the boat took 30 passengers from Philadelphia to Burlington in 3 hours and 10 minutes, a speed of over six miles an hour. In 1790 Fitch built another boat which attained a speed of eight miles an hour and continued to run on the Delaware river, carrying passengers and freight, for three or four months."

RUMSEY'S STEAMBOAT—"Propelled by jets of water forced out through the stern. Tested on the Potomac river at Shepherdstown, Va., 1787."

STEAMBOAT CLERMONT, 1807—"Designed by Robert Fulton, built in the city of New York, and made its first trip from that city to Albany in August, 1807."

Of these labels, the one on Fitch's model is the only one which uses words "successful public trial." If, then, a "successful public trial" is proof of "invention," it would seem that there is no doubt as to the right of Fitch to be given the title of "inventor of the steamboat." However, there are those whose definition of "invention" is a vastly different one and they assert that no one person can claim the credit for the invention of the steamboat.

Of the other "inventors" of the steamboat, the volume "The March of Commerce" by Malcolm Keir in the Yale University Press, "Pageant of America," has this to say:

"Samuel Morey of New Hampshire, who began experimenting with a steamboat in 1790, built a paddle-wheel steamer which in 1794 ran from Hartford to New York at a speed of about 15 miles an hour. This boat had the paddle wheel at the stern. A later boat of Morey's, built at Bordentown on the Delaware, was operated with two side paddle wheels. Others who were seized with the 'steam mania,' as it was derisively called at the time, were William Longstreet of New Jersey, whose boat made five miles an hour against the current of the Savannah river in 1790, and Elijah Ormsbee of Connecticut, who made paddles to imitate ducks' feet and operated them by steam in a boat that he nav-

igated from Cranston to Providence and Pawtucket and return.

"Oliver Evans, who invented the high-pressure steam engine and tubular boiler, applied it to moving boats as well as highway wagons and mills. Steam dredges built by him, such as the Oruktor Amphibolos, operated in 1804 through the water under their own power. Robert R. Livingston, afterward associated with Fulton, built a steamboat and ran it on the Hudson. John Evans of Hoboken, N. J., experimented with a half-dozen different steamboats after 1791, and eventually hit upon the idea of the screw propeller in place of the more usual setting poles, paddles, oars, or paddle wheels. Stevens himself, however, soon discarded the screw propeller in favor of paddle wheels, and it was not until years later—in 1839—that the screw propeller received further attention.

"Benjamin Franklin, who had a finger in nearly every pie that was cooking during his lifetime, was a member of an association headed by James Rumsey, a native of Maryland, that proposed to try Franklin's idea of propelling a boat by sucking in water at the bow and ejecting it at the stern. A boat was built and run on this principle by Rumsey in 1787, a steam pump being the means of ejecting the water. Rumsey had in 1784 exhibited a steamboat before General Washington at Bath, Va. In this earlier boat the power had been steam applied by cranks to a series of setting poles. Fitch, who had applied for state monopolies over steamboats, contested Rumsey's invention, so Rumsey took his ideas to London but died there in 1792, before they became practical."

In mentioning the men who contributed to the success of the steamboat there is one name which cannot justly be omitted. Fitch, Fulton and the others had built steamboats which would operate on gently-flowing bodies of water in the East, but it remained for another man to tame the swift waters of the West. Fulton and Livingston tried it and failed. But Henry M. Shreve, whose name is perpetuated in the city of Shreveport, La., succeeded.

Shreve called his boat the Wash- ington and in it he made two round trips between Louisville, Ky., and New Orleans, making the return trip in the then unbelievably fast time of 23 days or less than a fourth of the time it took the bargemen and keelboat polemen to make the same distance. From that time on steamboats went every where, no matter how swift the current they had to back.

Improved Uniform International Sunday School Lesson

By REV. P. B. FITZWATER, D. D., Member of Faculty, Moody Bible Institute of Chicago (© 1930, Western Newspaper Union)

Lesson for August 10

HANNAH, A GODLY MOTHER

LESSON TEXT—1 Samuel 1:9-18, 21-28, 2:19
 GOLDEN TEXT—My son, hear the instruction of thy father, and forsake not the law of thy mother
 PRIMARY TOPIC—Hannah's Prayer Answered
 JUNIOR TOPIC—Hannah's Prayer Answered
 INTERMEDIATE AND SENIOR TOPIC—How Can We Honor Our Parents?
 YOUNG PEOPLE AND ADULT TOPIC—The Value of a Godly Home.

I. Hannah's Sore Trial (1:9-18).
 Hannah had two wives in violation of God's law—God's primal thought for man was one wife. Therefore, for Adam he made Eve. Hannah's sore trial grew out of jealousy which naturally springs up between two women, wives of one man. The violation of this law of God concerning marriage has always been attended with trouble.

1. Her bitterness of soul (v. 10).
 Though Elkanah loved her and sought to lighten her burden, he was unable to bring to her the needed solace.

2. Her vow (v. 11).
 Hannah prayed, asking God for a son. The name Samuel means "asked of God." In connection with her asking this gift from God, she vowed to give the child back to God. Much can be expected of children born into the world under such circumstances.

3. Hannah misjudged by Eli the priest (vv. 12-16).
 The priest observing the motion of her lips and not hearing the sound of her voice concluded that she was intoxicated and demanded that she put away wine. She defended herself against this inference.

4. Blessed by Eli (v. 17, 18).
 Following her explanation he pronounced a blessing upon her, joining in the prayer that God would grant her petition.

III. Hannah Gives Samuel to the Lord (vv. 24-28).
 For a time she cared for Samuel in the home. Always the best nurse for a child is its mother. According to her vow, at an early age she took Samuel to the sanctuary and gave him over to the charge of Eli, the priest, to minister therein. We thus see in his tender years Samuel's ministering before the Lord.

IV. Samuel's Ministry (ch. 3).
 1. His call (vv. 1-10).
 (1) The occasion.
 From his birth Samuel was dedicated to the service of the Lord. While going about his regular duties the Lord spoke unto him. In Samuel we have a striking pattern of child religion. In the Scriptures we have set forth two types of experience: First, the one who experiences God's saving grace after having lived in sin; second, the one brought up in the nurture and admonition of the Lord from infancy.

(2) His obedience.
 When the divine voice was discerned Samuel rendered immediate obedience. He expressed his willingness before he knew what was required. He did not inquire what was wanted and then let his obedience depend upon the agreeableness of the command.

2. Samuel's prophetic message (vv. 11-18).
 The time has now come for him to pass from the authority of Eli to that of the Lord. The first message entrusted to him was a most terrible one. He hesitated to tell it to Eli, but being pressed, he manifested true courage. It must have been a bitter experience to Eli to see Samuel recognized and himself passed by. This fearful visitation of judgment upon Eli's house was due to the sins of his sons. Eli was held responsible for not restraining them. He seems to have been a good man but lax in the discipline of his children. Parental laxity is most cruel. To tolerate evil when one has the power to restrain it is to become party to it.

V. Samuel Established in the Prophetic Office (3:19-21).
 "And Samuel grew, and the Lord was with him, and did let none of his words fall to the ground. And all Israel from Dan even to Beersheba knew that Samuel was established to be a prophet to the Lord." Little did Hannah know that the boy who had been given in answer to her prayer would one day become the spiritual head of the nation. Truly, he that honors God shall be honored by God.

Character Most Important
 The great equipment of the soul-winner is character. It is a false notion that we must meet the world on its own level—drink to win the drinker, smoke to win the smoker, and play the world's games in order to win it to Christ.—Richard Hobbs

An Offering
 Mirth is the sweet wine of human life. It should be offered sparkling with zestful life unto God.—Henry Ward Beecher.

Here's Latest Addition to "Pet Snake" Stories

For his own particular pet Alec Milne of Mount Vernon, N. H., prefers a snake, and for an excellent reason. Most people select pets for companionship or because of a fondness for a particular species. Not so with Mr. Milne; he says he likes his pet snake because it performs a good day's work and asks nothing in return. Mr. Milne is a truck farmer and is hampered in his work by a leg injury, which makes it impossible for him to reach down to remove grubs, worms and insects which destroy plants. So every morning the three-foot striped snake starts out with his master and follows him along through rows of vegetables. The snake enjoys itself immensely, removing the pests and eating them, says the Boston Globe. At the end of the day the "pet" returns to its haunts in a nearby pile of rocks to rest for the night.

Judge Couldn't Overlook Such Flagrant Bragging

"Next case," called out the clerk, and a middle-aged couple were ushered into the court room. They made a pitiful picture—the strong, healthy, tall, broad woman, and her poor, meek, battered little husband. The magistrate adjusted his glasses, then turned to the man and asked, "You are accused of beating your wife. Do you plead guilty or not guilty?" "Guilty, sir," said the little man, without a moment's hesitation. "Thirty shillings or seven days," said the magistrate. After the session was over, one of the court officials asked the magistrate if he hadn't been rather severe in punishing the little fellow. "Oh, no," exclaimed the magistrate. "I had to give him something for bragging."—London Tit-Bits.

New Berry Resists Drought

Fruit growers are interested in a wild variety of black raspberry which was found in the Oregon woods. It thrived during a hot, dry season when domestic kinds languished, did not die down in winter and even produced berries in the late fall.

It is believed the specimen is a hybrid of the black raspberry with some species of blackberry. Its leaves and growing habits are much the same as those of the latter. Experts are examining the fruit to determine if it is suited to commercial shipping and canning.—Popular Mechanics Magazine.

"Evil Spirit" Kills Seven

Superstition has gripped the people of Alim Kara Hissar, in Central Anatolia, following the deaths of seven Turkish women in a ravine. The side of the ravine caved in burying the unfortunates under tons of stone and earth. They were part of a party who were collecting lime to beautify the walls of their homes in preparation of the festival of Kourban Bairam, and as similar accidents happened in 1896 and 1923, the villagers are convinced that an evil spirit dwells in the ravine and at times demands women as victims to appease its anger.

Knew What He Meant

The late Jim Pound had a woman witness on the stand complaining about her husband's persistent refusal to give her money. "The last time you asked him, did he refuse?" asked the attorney. "Well, not exactly. I told him I had to have some and he turned around and knocked me cold without saying a word, but I knew right away what he meant."—Detroit News.

Streamline in Warfare

The streamline projectile was developed and first perfected by an Englishman, Sir Joseph Whitworth, in 1806. The French have used the streamline projectile since 1893. It was used by this country during the World war.

Steady Work

Convict—It's much more pleasant working in prison than outside. "More pleasant? How so?" "Because you're not always being threatened with dismissal."—Lustige Kolner Zeitung.

End of the Debate

Nervous Type of Woman—If I don't get a new dress I'll scream. Her Inscrutable Man—You know you can't holler as loud as the landlord, dear.

It is all very well to throw care to the winds. But often the winds blow it back.

Acidity

The common cause of digestive difficulties is excess acid. Soda cannot alter this condition, and it burns the stomach. Something that will neutralize the acidity is the sensible thing to take. That is why physicians tell the public to use Phillips Milk of Magnesia. One spoonful of this delightful preparation can neutralize many times its volume in acid. It acts instantly; relief is quick, and very apparent. All gas is expelled; all sourness is soon gone; the whole system is sweetened. Do try this perfect anti-acid, and remember it is just as good for children, too, and pleasant for them to take. Any drug store has the genuine, prescriptive product.

PHILLIPS Milk of Magnesia

DAISY FLY KILLER
 Flies anywhere, DAISY FLY KILLER attracts and kills all flies. Fast, clean, unobtrusive and cheap. Lacks all season. Made of metal, may be used on glass, will not soil or injure anything. Guaranteed. Retail upon DAISY FLY KILLER from your dealer.
