

THE SANDERSON TIMES

VOLUME 24.

SANDERSON, TEXAS, FRIDAY, JULY 3, 1931.

NO. 17.

ENDS 43 YEARS OF SERVICE WITH SOUTHERN PACIFIC

Geo. W. McMullen, Veteran Conductor, Retired From Service

When No. 102, fast Southern Pacific passenger train, pulled out of here last Saturday night with Conductor George W. McMullen in charge, it was the last run of the beloved railroad man. At the end of the trip he was retired, concluding 43 years of service with the company.

Mr. McMullen, a railroader with the Southern Pacific since March 5, 1888, goes on the retired list with one of the most admirable records any railroader running out of here ever achieved.

Starting as a brakeman, McMullen served with the Baltimore & Ohio from March, 1881, until May, 1884, when he moved to Ft. Worth. He was yard switchman there for a year. From 1885 to 1888 he worked out of Denison for the M. K. & T. as a brakeman and conductor. He started out as brakeman with the Southern Pacific in 1888 and was promoted to be freight conductor in 1890 and about 1913 he became passenger conductor.

During his 43 years of active service with the Southern Pacific, Mr. McMullen has won innumerable friends up and down the line between here and San Antonio and has won the admiration of all fellow employees with whom he has come in contact.

His many friends here are going to miss him, but wish him well and only hope that he at least pays us a visit here once in a while.

Angora Goat Raisers Prepare for Rocksprings Meet

The world's fair of the goatman, the annual gathering of the Texas Angora Goat Raisers' Association, will be held at Rocksprings on July 8, 9 and 10, when an industry that has felt the kicks and bites of a vicious depression will lay plans for renewing its old-time friendship with that fair and fickle lady known as "Miss Prosperity."

There will be three days of fun-making, serious business discussions and an auction sale of the pick of the State's and Nation's angora goat breeding stock. Rodeo, dancing barbecues and tales told about the camp fires lit on a score of hills will draw the thousands to the event.

The president of the organization is J. E. Robbins, banker of Camp Wood, and a foremost authority on the goat business.

The Texas Angora Goat Raisers' Association numbers its members by the hundreds and has one of the best fair grounds in West Texas and it is at this place that the meeting will be held.

Vice-president Leakey; L. A. Clark, second vice-president, Rocksprings; Arthur Davis, secretary-treasurer, Rio Frio. The directors are: L. A. Clark, Rocksprings; T. C. Hampton, Rocksprings; O. C. Cowser, Rocksprings; J. E. Thurman, of Bracketville; Sim Reid, Con Can; T. O. Smith, New Braunfels; J. A. Ward, Jr., Sonora; Sam F. Cooper, Leakey; W. W. Nipper, Bracketville; Leslie Nunn, Uvalde; Fred Earwood, Sonora; Bob Davis, Rio Frio; M. D. Taylor, Vance; John Guthrie, Rocksprings; J. L. Gulley, Uvalde; W. H. Rawlings, Johnson City; C. A. Pepper, San Antonio; F. O. Landrum, Laguna; J. E. Robbins, Camp Wood; W. B. Patterson, Rio Frio; C. F. Biggs, Del Rio.

On July 9 and 10 an auction sale of the finest angora bucks in the world will be conducted by Colonel Ed McGinnis of McAllen. Two bids will constitute a sale for any animal offered. One dollar a head is charged for each animal present, but that amount will be credited to the sales commission. There will be a big free barbecue on July 10. Last year it was attended by several thousand people. The grounds are owned by the Edwards County Fair Association, are spacious, well drained and watered with plenty of shade and the longest goat shed in the world as well as the best arranged goat shed. Practically every breeder of importance in the State has his goats at the show and sale each year.

U. S. 90 Association To Meet in Del Rio

Highway Group to Convene July 11; Hotel Roswell

U. S. Highway No. 90 Association, (The Border Way) will hold its annual meeting in Del Rio on Saturday, July 11, at the Hotel Roswell at 2 p. m.

Besides winding up the year's business and making plans for the ensuing year, election of officers to serve for the next year will also be held. Routine matters pertaining to the association also will be discussed.

Clay Holland of Alpine, is president of the organization and will preside. A. F. Johnson, also of Alpine, is secretary of the association.

A good attendance of Sanderson people is hoped for.

Masonic Officers Installed

Officers of the Sanderson Masonic lodge, as chosen at their regular annual election June 9, were installed in their respective places for the ensuing year at ceremonies held last Wednesday night, June 24.

S. S. Daggett was installed as worshipful master; J. S. Nance, senior warden; R. H. Murrain, junior warden; Fred Savage, secretary; S. C. Bodkin, treasurer; W. F. Harrell, senior deacon; L. R. Grigsby, junior deacon; Ray Caldwell, tiler; Tom Breeding, senior steward; Vance McLymont, junior steward.

Rev. B. M. Stradley Returns From Toyah, Tex. After Successful Meet

Rev. B. M. Stradley, pastor of the First Methodist Church of Sanderson, returned home Monday morning from Toyah, Texas, where he has been conducting a revival meeting for the past two weeks in which he preached three times each day.

Mr. and Mrs. R. C. Pruitt of Mesa, Texas, directed the organization and the music. The large church filled at every service with four nights of large overflowing crowds, after providing all available space in the church which had been equipped with extra seats. Mr. Pruitt directed the men's work and the congregational singing, and Mrs. Pruitt, the Adult Choir and Children's work.

Mr. and Mrs. Pruitt had an adult choir of 35 to 40 at each service, and a junior choir average of 55 at each service.

Mr. Pruitt directed a male quartet at each night service.

Mrs. Seay of the Progressive Church of Toyah was pianist throughout the meeting. Practically every night of the last week of the meeting the altar was filled with those coming for reconsecration and to renew their church vows.

A total of thirty-eight was received in the four churches co-operating in the meeting, thirty-two on profession and six on church letters.

Rev. Stradley is high in his praise of Mr. and Mrs. Pruitt in their work with the young people and their ability to get a whole town into a union meeting, and says that the success of this meeting is due to the consecrated aggressive leadership of the Lord through these energetic workers.

Dr. Dawson, pastor of the Baptist church of Toyah, after the Sunday night service, asked for a few minutes to speak for the other three churches of Toyah, saying that every working Christian in Toyah said Amen to all that was done during the meeting.

Dr. Dawson was with the Sanderson pastor Sunday morning when Rev. Stradley baptised nineteen men, most of whom were young, in the churches.

Last Sunday afternoon the Sanderson pastor delivered a special message, "Christian Fellowship", at the community building at Saragosa to a well-filled building.

Dr. Willingham, pastor of the Toyah Methodist Church, where the meeting was held, says never has Toyah had such overflow crowds during a series of such services.

Mrs. I. H. Elder, 69, Laid to Rest Wednesday at Kerrville

Former Sanderson Citizen Recent Victim Of Paralysis

Funeral services were held Wednesday morning at St. Mary's Church for Mrs. I. H. Elder, 69, who passed away early Tuesday at the family residence, 601 Main Street. The last rites were conducted by Rev. Father H. M. Kemper. Burial was in Glen Rest Cemetery, under direction of Smith Funeral Home. Active pallbearers were Lee Mason, John Peterson, J. R. Burnett, John Michon, Dr. L. C. Gatz and Bernard Sherlock.

Mrs. Elder was a native Texan, having been born at Clarksville, September 7, 1862. Her father, Patrick Fallon came from Ireland in the early 50's and was one of the early settlers of Red River County. For the past seven years she had resided in Kerrville, and until prevented by ill health, she assisted her husband in the operation of the Main Hotel. On June 3 she was stricken with paralysis and her condition gradually became worse until the end.

Surviving are her husband, I. H. Elder; two daughters, Mrs. Louis B. Brown of Fort Worth and Mrs. Guy Nations of Sanderson; three sons, J. M. Elder of Arlington, P. I. Elder of Sweetwater and J. D. Elder of Rankin; a sister, Mrs. Theresa Whiteman of Brady and a brother, J. D. Fallon of Goldswathe, all of whom were here for the funeral.—Kerrville Mountain Sun.

A. F. Newton Passed Away June 22nd At Bertram, Tex.

Andrew F. Newton of Valentine, Texas, and father of John L. Newton of this city, died at Bertram, Texas, near Austin, on Monday of last week. Mr. Newton had been taken there for medical treatment. He has made his home in Valentine for many years and was a respected citizen. He leaves his widow and three sons: John L. of this city, and Woodrow and Lloyd Dick of Valentine; two brothers, George and Edgar Newton of Valentine.

Burial was at Bertram, where his parents are buried.

Natt Holman of Del Rio was a business visitor here Wednesday.

Times Installs Modern Typesetting Machine This Week

Readers May Look Forward to Better Paper In The Future

With a great deal of satisfaction the editor of the Times announces the installation of a new Linotype. This mechanical marvel qualifies us to serve efficiently the large number of persons who look to our publication for enlightenment and entertainment, and who patronize our job printing department.

The rapidly increasing circulation of the Times, together with our desire to place at the command of our advertisers and others the highest grade of typography, induced us to secure a fine composing machine for the quick and accurate and pleasing presentation of the news of the day, and the production of superior job work.

Our new Linotype enables us to set by machine many forms of composition that previously necessitated tedious work by hand. Our plant is now capable of turning out composition consisting of correct type faces in many different sizes, and the change from one size to another is made very quickly. At a high rate of speed the versatile operator—whose hand is made famous by the Mergenthaler Linotype Company as "the hand that keeps the world informed"—produces line after line of the sort of composition desired.

This installation is a testimonial to the prosperity of Sanderson and vicinity. And that the good people of the community are duly appreciative of our efforts to serve them in all departments of the printing business is manifested by the many compliments received from individual patrons since the arrival of our new machine.

SANDERSON BUSINESS HOUSES TO OBSERVE 4TH

All business firms here will be closed Saturday in observance of July fourth. Business house patrons and buyers are requested to do necessary shopping before Saturday or kindly postpone it until Monday morning.

Mrs. Troxie Daugherty, head of the ladies' ready-to-wear department of Kerr Mercantile Co., is on her vacation and will visit with relatives in Alpine and El Paso.

Bill Vaughn left Thursday for Stephenville, Texas, where he will visit with relatives.

\$6,000,000 OIL FIRM PUT IN THE HANDS OF RECEIVER SATURDAY

Burial Flags For Veterans Available

Postmasters To Hold Supply of U. S. Flags

Regulation United States flags will be supplied to postmasters throughout the country to facilitate their distribution for use at the burial services of war veterans, L. C. Chapman, regional manager of the United States Veterans Bureau in San Antonio, announced recently.

Flags to be used in draping the caskets of deceased veterans may be obtained by making application to the local postmaster by relatives or those in charge of funeral services, Mr. Chapman stated.

DR. A. L. MOORE OF EL PASO TO PREACH HERE ON SUNDAY, JULY 12TH

Dr. A. L. Moore, Ph. D., of El Paso, Texas, one of the most beloved preachers ever to preach in Sanderson, and who is now presiding elder of the El Paso district of the Methodist Episcopal Church, South, will be in Sanderson on Sunday, July 12th, delivering two special messages: 11 a. m., and 8:30 p. m., at the First Methodist Church building, and also preaching at the Dryden Church at 3 p. m. Every out-of-town person attending the 11 o'clock service at the Methodist church Sunday, July 12th, will be an invited guest to dinner at some Methodist home, and all who attend the Sunday evening service to hear Dr. Moore, will be the invited guests to Methodist homes for supper. The music committee of the Methodist Church has arranged for two special vocal numbers at each service: a male quartet, directed by Rev. B. M. Stradley, and a duet by Mrs. A. P. Utterback and Mrs. Katherine McLymont at the 11 a. m. service, an anthem by the choir, directed by Mrs. Utterback, and a mixed quartet, directed by Mrs. Katherine McLymont at the night service.

Dr. Moore always has overflow crowds in Sanderson when he is here, and no minister has ever made so many friends with all denominations as has Dr. Moore, being one of those rare persons possessing a magnetic personal touch, and is a deep scholar and a plain soul-stirring gospel preacher.

All who do not regularly and systematically work, and worship elsewhere are earnestly solicited to hear Dr. Moore, and worship with us.

Parent's Day at C.M.T.C. To Be Held On July 3rd

The officials of the Citizens' Military Training Camp at Camp Bullis, Texas, have announced July 3, 1931 as the annual Parents' Day at camp. They have extended an invitation to all parents to come to Camp Bullis and view the training in progress there. An all-day program has been prepared for their entertainment.

The regular routine of drills and formations and massed calisthenics will last for the early morning and will conclude with a specially prepared battalion review. At 11 o'clock a reception of students and parents will take place, followed by dinner with the students in the company mess halls. The afternoon will be devoted to athletics of all kinds. A swimming meet, four baseball games, eight volley games, a track meet, participated in by 8 teams of "thin-clads", elimination boxing bouts, and tennis tournaments will give plenty of opportunity for everyone to enjoy his choice of athletics.

Those who stay for supper will have the privilege of attending a free movie in the open air theatre.

Camp Bullis may be reached by auto on the Fredericksburg road, about sixteen miles northwest of San Antonio.

Get your Office Supplies from us. The Sanderson Times. Phone 39.

C. C. Julian Oil and Royalties Co. Involved

The C. C. Julian Oil and Royalties Company of Texas was placed in the hands of a receiver here in District Court Saturday. C. B. (Dutch) Wardlaw of Del Rio was named as receiver.

Jones and Lyles, Del Rio attorneys, filed the suits. The petition which was filed here by the lawyers contains 34 pages, and it is said to be one of the most lengthy petitions filed in West Texas in several years.

An injunction has been issued which prevents the sale or other business transactions of the company. A. G. McGalin of Ft. Worth who is a stockholder in the C. C. Julian company, made application for a receiver to be appointed.

Hearing in this case will be about July 13 or 14.

The C. C. Julian Company in Texas is said to be worth about \$6,000,000.

WOMEN'S MISSIONARY SOCIETIES ENTERTAINED ON TOL MURRAH RANCH

Last Monday Mrs. Landen Rose and Mrs. Tol Murrah entertained the Methodist and Presbyterian Missionary Societies with a barbecue at the Tol Murrah ranch.

A total of fifty-five were present from Sanderson. The devotional and educational program was rendered by the Women's Missionary Society of Sanderson, with Mrs. F. S. Garrison presiding.

The topic discussed during the educational session was "The Transformation of China, and its effect on our work for the Lord." Mrs. H. D. Johnson, president of the Baptist Women's Missionary Society, made the chief address on this subject and it was one of the best talks ever to be heard on a missionary subject.

Mrs. Johnson handled her subject in a scholarly manner, yet adding a little spice of humor, but always coming straight to the great spiritual and moral truths, bringing her hearers into the clear light of the needs of the moment in China, and the great need of Christian co-operation in all forward movements.

Mrs. D. C. Derrick made a short inspirational talk which went out to the hearts of her hearers, while Mrs. John V. McCall was introduced, and responded with a short talk. Dr. John V. McCall and Rev. B. M. Stradley made short inspirational talks.

Fifty-five Sandersonites were present and greatly enjoyed the day's meeting. All attending were special invited guests to a delightful barbecue, and noon-day luncheon served which was served out-of-doors.

Mrs. Joe Nichols of the Presbyterian Women's Missionary Society acted as musical director throughout the afternoon. The party returned to Sanderson late Monday afternoon.

The devotional service was directed by Mrs. B. M. Stradley. Mrs. Ware read the prayer hymn, "O, Jesus, I have promised", and Mrs. Stradley read the scripture and gave a short exposition.

Mr. and Mrs. P. J. Holman have returned from a visit with his mother, Mrs. P. H. Holman, in Wichita Falls, Texas.

Attorney R. M. Lyles of Del Rio was a business visitor here Wednesday.

Earl Newberry of New Orleans, La., paid the editor a pleasant visit for a few minutes Tuesday morning. Earl is a former Sanderson resident having lived here several years ago with his parents, Mr. and Mrs. C. Newberry. He was enroute to Los Angeles, Calif., where he will visit his grandmother, Mrs. M. Boozer, and aunt, Mrs. B. H. Ford.

F. H. Hinson is here from Gatesville, Texas, acting as relief operator at the local Western Union during the absence of Miss Kate Frazier, operator and manager, who is spending her two weeks vacation in Tyler, Texas, with her sister, Mrs. Pat H. Beard.

Almost Human In Action Is Linotype

Above is a likeness of the new Linotype machine which was installed in the Times office the first part of this week. Its work is to cast many words of type on a solid slug of metal which saves much labor in the composition of the Times, as well as helps to make a better newspaper. We extend a cordial invitation to our friends to inspect this marvel of the age at their earliest convenience.

Babies, Older Children Need Sunshine

Sunning the Baby in His Carriage.

(Prepared by the United States Department of Agriculture.)—WNU Service.

Babies need sunshine, and so do older children. It has an important effect on their growth. Of course, everyone has realized this in a general way for a long time, but only in recent years have we known the reasons.

Normal growth of bones depends not only on the food that the child eats, but also upon the mineral content of that food and the presence of vitamin D. Vitamin D is found in cod liver oil as well as in certain foods, or it may be supplied to the body by exposure to the direct rays of sunlight. When bones do not form or grow normally, we say the child has rickets.

Where there is plenty of sunshine and children can be out-of-doors in the sun throughout the year, they seldom have rickets. In colder climates, however, where children must be indoors so much, this disease is likely to be prevalent. Mothers should begin very early to take precautions against rickets by providing diets with adequate mineral content supplemented with

cod liver oil during the winter months and sun baths the year around.

Only a part of the sunlight is effective—the ultra-violet rays. Less of these are present in the winter sunlight. These rays do not pass through the ordinary window glass nor through heavy clothing, so it is necessary to put babies frequently where the direct sunlight will fall on their skin. At this season of the year a baby can be placed out of doors in his carriage every sunny day if protected from wind. People used to think it necessary for babies to be carefully shielded from direct sunlight. When a baby was put out-of-doors he was bundled up in many clothes and the hood of the carriage was pulled up to keep out every ray of sunlight.

It has also been believed that a baby's eyes are weak and sensitive to light. The sun does not cause inflammation, but it should never be allowed to shine directly on the eyes whether they are open or closed. The moment the child opens his eyes he gets the full effect of the glare, caus-

ing a shock which the child's processes are not organized to handle. Repeated shocks of this kind may cause permanent injury. There is a way to expose the baby to plenty of sunshine without eye injury, as is shown in the accompanying illustration. The hood of the baby carriage is arranged so that the sun will shine on the baby's cheeks but not in his eyes. He should be turned first on one side and then on the other. His hands, too, are exposed to the sun's rays for a few minutes each day. The illustration is from a chart prepared by the extension service of the United States Department of Agriculture in a series which is called "Build Early for Good Growth."

In sunning a baby care must be taken not to burn his tender skin. A slight reddening of the skin each day will gradually bring about tanning. Get the baby used to sunlight by degrees. Excessive tanning should be avoided because it prevents the ultra-violet rays from penetrating, and therefore makes the sun bath less effective. Every few days the amount of body surface exposed should be increased, at first slowly, but as the days grow warmer, more rapidly. After the face and hands are used to the sun the arms may be bared. Do this for only a few minutes at first, the time being increased daily. Soon the legs may be bared. Later sun baths may be given the whole body. In warmer months the length of time is increased considerably, but the sunning should be given 11 a. m. or after 3 p. m. to avoid the very hot part of the day.

Keep Record of Household Expenses

(Prepared by the United States Department of Agriculture.)—WNU Service.

Making a budget and keeping records of household expenditures have been consistently advocated by home management specialists the last few years. The purpose of keeping accounts is to learn where the family income goes, and, if necessary, to make changes that will result in increased satisfactions for all the family.

Some homemakers in Erie county, Ohio, kept accounts under the direction of the county home demonstration

agent for five years. In making her report to the United States Department of Agriculture the agent said: "A number of interesting points were brought out when the results were summarized and compared. There was great surprise at the number and cost of guest meals—what might be termed the high cost of hospitality. The women also noted the higher cost per meal in a small family than in a large one. All agreed that giving children an allowance develops in them a sense of the value of things. The economy of using home produced foods was greatly emphasized. The meetings resulted also in the development of nutrition standards in meal planning when it was seen that food expenditures and a balanced diet were necessarily related, and that maintaining better nutrition standards even at higher food cost was more important than expenditures for some other items."

Children Need Quart of Milk Every Day

Besides the protein which makes milk such a valuable source of body-building material, it contains other substances which make it a most complete food. Milk is rich in calcium and phosphorus, which are essential for building bones, teeth, and for regulating body processes in general. The iron in milk, though low in amount, is readily available. Vitamins A and B are abundant in milk and vitamins C and D are present in smaller degree. Each child in the family should have a quart of clean, wholesome milk every day.

Pelf Pity

Addressing a financial editor, a mountaineer complains that he bought oil stock from a "slicker" and was "skun" out of his money. "Please what shall I do?" he begs. "If you were 'skun' brother," apprises the editor, "you're in a class by yourself. Be comforted in the thought that 'Many are skinned but few are skun.'"

Children's Evening Fairy Tale

By MARY GRAHAM BONNER

An aquarium, as you know, is a very large tank filled with water where fish from far away and near are brought to live.

All kinds of fishes that are rare are brought there, for an aquarium in the fish world is like a zoo in the animal world.

Now the fairies thought that some time very, very early in the morning they would pay a flying visit to the fighting fishes before any of the aquarium keepers were up and around.

These fishes had come from far away, and the more they fight the more they change colors.

They turn from dull grays into bright reds and blues, and all the time they are fighting they are changing

these colors—changing their very own colors on their very own fish selves!

The fairies arrived when the fishes were resting, but the fishes flew gently over their tank saying:

"Let's play."
Of course, the fairies wanted to see the beautiful colors the fish would turn as soon as they began to play.

So the fairies seated themselves on the edges of the tank until the fishes were quite wide awake.

"What will we play?" asked one sleepy fish.

"Let's run races," said one of the fairies.

So the races began around and around the tank, for the little fishes became very tiny so they could get in the tank—that had been a special

treat from the Fairy Queen—to wave her wand and make them very small for their visit with the fighting fishes.

And sure enough, the fishes became the most glorious of bright red, bright blue and a deep, deep, wonderful pink.

Then the fishes, who were quite wide awake and ready for anything by this time, suggested they should have a battle.

"So you do fight?" asked one of the fairies. "We thought we would suggest playing instead of fighting."

"We won't like fighting and we thought maybe we could see your colors just the same way—and we did."

"Dear me, yes," said one of the fairies, "we fight, but we just have a jolly sort of water battle."

"You could call it playing if you liked."

"We change colors then, just as we have been doing."

So the fairies watched and it was just a jolly water battle, but the colors of the fishes were really wonderful.

It was the talk of Fairyland for days and days, for all the fairies went back and told of all the wonderful fishes they had seen and how their colors changed, and how lovely they were.

It was indeed an unusual trip. (© 1931, Western Newspaper Union.)

A Jolly Water Battle.

These Recipes Will Be Enjoyed

By NELLIE MAXWELL

Upon the shoulders of the past we stand, and to the future turn our questioning eyes. What do we hold in store, what precious prize that we may wrest from out her clasp about hands? —Elizabeth Wade.

A cream puff pastry is very simple to make, but the baking is the test of its perfection. Never remove the puffs from the oven until they feel light when lifted from the pan. Bagged Cream Puffs.—Heat together one cupful of boiling water and one-third cupful of corn oil. When boiling add altogether three-fourths of a cupful of flour mixed with one and one-half table-spoonfuls of cornstarch and one-half teaspoonful of salt, all well sifted together. Stir and mix vigorously until the mixture leaves the sides of the pan. Cool and add one at a time three eggs, beating well after the addition of each; now add one teaspoonful of baking powder and beat well and drop by spoonfuls on a baking sheet, shaping into circular form. Bake from 35 to 45 minutes, depending upon the size of the puff. Cool, cut with a sharp knife near the bottom of the puff, remove any doughy center and fill with the following: Cut one-half a package of dates and

one cupful of marshmallows with the scissors. Dip the scissors into water to keep the mallowa from sticking. Chop one-half cupful of nuts, add one cupful of cream beaten until stiff, add a pinch of salt and a flavoring of vanilla. This amount will make one dozen large puffs.

Irish Kisses.—To one-half cupful of peanut butter add one-half cupful of dates, three-fourths of a cupful of powdered sugar and two unbeaten egg whites. Mix and beat until they are thoroughly blended. Drop by tea-

spoonfuls on buttered baking sheet and bake 15 minutes. This makes 18 kisses.

As the apples which have been kept in cold storage have lost some of their freshness and flavor add a half cupful of grapefruit juice to them when putting to stew, instead of water; the result will be a different and tasty applesauce.

Welsh rabbit mixture makes a fine filling for sandwiches; the ready prepared is always good. (© 1931, Western Newspaper Union.)

Skirt Changed Into Tie-On Cape

By CHERIE NICHOLAS

Here's efficiency for you—the five-way costume. An ensemble fashioned after the manner of the model pictured will solve the biggest part of the vacation clothes problem for by wearing this and that together it can be changed into five smart styles. For the girl with a limited pocketbook it is a real "find."

Worn as you see in the picture it is ideal for traveling. The niftiest thing about this costume is its wrap-around skirt which can be turned in

its little bolero, minus the wrap-around skirt, and when you want to appear quite summery simply lay aside both bolero and top skirt and in your sleeveless gown you are all ready for bridge or afternoon tea at the club.

More and more, now that life is resolving itself into a program of one week-end trip after another, with excess baggage out of the question since the majority of pleasure seekers motor here and there, designers are considering the clothes problem from the standpoint of efficiency.

There is, for instance, the two-jacket dress which is a result of the newly directed effort toward making one costume with variations do duty for several. In addition to its own jacket of self-material the frock adopts another, either of velvet or taffeta.

(© 1931, Western Newspaper Union.)

to a tie-on cape. You will be needing a cape to throw over your other light dresses and here you have it all ready-to-wear—no extra luggage. The print dress looks ever so chic topped with

Timely Household Hints

Leave the screened attic windows open to help keep the house cool.

Comfortable shoes make shopping and holiday entertaining easier for the homemaker.

A quart of milk daily for each child and a pint for each adult in the family is a good standard for health.

Fresh berries keep best if they are carefully picked over and spread out on a shallow dish in the refrigerator.

A spring-clip clothespin with the name of the owner printed on it is a safeguard for children's rubbers both at home and at school.

A tempting appearance adds to the success of a vegetable dinner. Color, attractive arrangement of food on the plate, and daintiness all count.

This and That

Rarely are small boys given handkerchiefs enough.

Measure your mind's height by the shade it casts.—Browning.

Minorities always kick and sometimes grow mighty sarcastic.

Up to his fifteenth suit of clothes, a man doesn't need a valet.

It is the early worm that is on hand an hour before work begins.

But few people who are born fools ever succeed in living it down.

The really wise do not keep still. They let their wisdom be known.

It's usually the man who shakes the tree that gets the least fruit.

Our sense of beauty isn't very sensitive. Else our towns would be prettier.

Love is never lost. If not reciprocated it will flow back and soften and purify the heart.

A man dreads the stitches taken in a wound, but being tattooed is a great deal worse.

The poor as well as the meek inherit the earth. Their children grow up and become rich.

Which do you value most in another man, a happy disposition or a serious helpful one?

Most poetry is a pastime. It is one of those things that people like that they don't expect to pay for.

It is always a mystery why so many people are contented to know so little, when learning, like salvation, is free.

Tuberculosis is the greatest foe of the white race. Heart failure may sometimes outrank it in statistics, but this is a general designation for many diseases.

Audible sound waves, so high pitched as to resemble a terrific squeak, have been employed to kill bacteria by two Texas scientists.—Popular Mechanics Magazine.

Machines That Are Almost Human

By E. C. TAYLOR

The Adding Machine

WILLIAM SEWARD BURROUGHS got tired of keeping books. So he studied mechanics, took a bench in a machine shop and invented one of the most familiar robots, the adding machine.

This robot doesn't resemble a human being in any way, but it performs mathematical computations more rapidly and far more accurately than the human brain. It cannot think for itself, but it has the power of obeying instructions and if the instructions are correctly given, its answer is inevitably correct. This machine cannot make a mistake. Its human master can and frequently does.

The chance of error in giving the adding machine its instructions, however, is much less than the chance of error by human beings to whom the task of making the computations might be intrusted.

All business now relies on these robots for adding, subtracting, multiplication, division and tabulation. They confine their operations to simple arithmetic. Some print the totals on paper and another type shows the totals on dials.

Sets of wheels are shifted as keys are punched on the keyboard of the machine. These keys are numbered from 1 to 9, with a tenth key for zero. The machine takes care of the numerical order of the numbers. For instance, if the number 23 enters into the computation, the 2 key is first depressed, then the 3 key and the mechanism takes care of their order to make them read 23.

Some models can add two or more columns at the same time, also add the totals for all the columns together.

When asked to subtract, some of these robots use complementary numbers on their keyboards; that is, the key number 9 also will have a number 1 on it, and the process of addition is reversed. The robot multiplies by consecutive addition. It divides by subtracting the divisor from the number to be divided as many times as the divisor is contained in that number. The operation is automatically registered on the counting wheels as the quotient.

The calculating machine, similar to the adding machine but considerably more complicated, is generally used for multiplication and division, because it performs these computations more quickly than does the adding machine. The calculating machine not widely used does not keep a printed record of its computations. It indicates the result on dials.

One type of the calculating robot causes the items in the computation to appear immediately on dials when the keys are depressed, the operation of a crank clearing the figures of the dial faces when the computation is completed.

All four arithmetical operations are performed on this robot as variations of simple arithmetic. But the counting wheels are so arranged that they take short cuts over the simpler adding machine.

On another type of the calculating robot the amounts to be computed are first set up on the keyboard and the operation of the machine either by hand or electric motor effects the calculation.

Some of these machines show the figures to be computed on dials before the computation is made, to guard against human error in submitting the problem to the robot.

Totalling dials show the total in addition, the product in multiplication, the dividend and remainder in subtraction and the quotient in division.

A calculating robot that prints a complete record of all its computations has recently been invented. It prints the factors, figures out and prints the answer and accumulates a single total of all the answers with a single operating stroke. Separate dials on its face show the multiplier in multiplication and the divisor in division as a check against error. This machine is capable of twenty multiplications a minute.

This latest calculating robot is used extensively in business. It keeps books, makes out bills, credits partial payments and keeps an accurate record of balances, doing the work of a corps of bookkeepers, and making no mistakes of its own.

Franklin's Tolerance

An interesting letter from Franklin to his sister, Jane Mazon, is in the possession of a Philadelphia firm. "Upon the whole," Franklin wrote in part, "I am much disposed to like the world as I find it, and to doubt my own Judgment as to what would mend it. I see so much Wisdom in what I understand of its Creation and Government, that I suspect equal Wisdom may be in what I do not understand. And these have perhaps as much Trust in God as the most pious Christian."

Coming Out

Young David was enjoying his third birthday with the special privilege of eating at the family table. During most of the meal his eyes had been resting at certain puzzled intervals on the bald head of a visiting uncle whose bald head had not been seen before. In spite of all effort on the part of his mother to avoid any comment, David finally exclaimed: "Mother, Uncle Leonard's head is coming out."

Buried Wealth Is Again Sought

Arkansas Takes to Trails in Search of "Lost Louisiana Treasure."

Fayetteville, Ark.—The quest for the "Lost Louisiana Treasure" has begun again. The backhills of Franklin county, Ark., are being methodically searched for a "tracer" which may lead to that famous cache which has challenged venturesome spirits in the Southwest for more than a century. Hillmen in faded blue overalls are again taking up the old romantic quest with pick and shovel. And as this search for old treasure is renewed, new legends of buried wealth are in the process of being born. Traditionally skeptical, thousands of the backwoods people have had their distrust bolstered by the recent failure of 147 Arkansas banks. Thousands of back country depositors have been left penniless. As one obvious result a new regime of money-burying is beginning, and it will probably continue for years to come. So an entirely new crop of country-side treasure lore is due to come into being.

The Spanish Legend.

Hill-country treasure tales usually fall into one of three definite categories: stories of Spanish treasure and pirates; stories of backhill highwaymen and desperadoes, and tales of miners or thrifty countrymen who did not "confide," banks. Spanish gold is a theme much in men's minds today, and the newly organized attempt to recover the treasures of the lost Louisiana mine illustrates the potency of this type of treasure legend. The legend of the lost Louisiana is prevalent in many parts of the South and Southwest; and, while its details vary considerably with persons and places and with the patience of the listener, the gist of the yarn is pretty much the same.

It all started back when the Spaniards pillaged Old Mexico. The story says that a fleet of Spanish galleons, all heavily laden with gold and silver acquired from the fabulously rich mines of Mexico, was set upon by a squadron of privateers. The Spanish vessels, hard pressed, turned and anchored in a hidden arm of the Mississippi some miles above New Orleans.

Indian Miners Enslaved.

There the conquistadores heard rumors of more gold—of Indians who worked mines somewhere among the hills far to the north. So the Spaniards abandoned their ships, loaded the treasure upon rafts and plied upriver in quest of more. Treasure hunters by profession and fascinated by word of additional treasure, the Spaniards were resolved to find the Indian mines. This they did, accord-

ing to the story, somewhere among the hills which lie beyond the confluence of the Arkansas river and Big Mulberry. Indians were digging gold from quartz ledges which overlooked the mountain river. So the newcomers captured the mines, enslaved the Indians and forced them to labor in their own mines.

But the venture proved unprofitable. Scant gold was forthcoming from the new holdings. Supplies ran low and neighboring Indians were hostile. News of the Louisiana purchase came and of a United States protectorate; American troops were being stationed at various of the river ports. So, according to the story, the Spaniards decided to retire for a time. They buried their treasure in a mine shaft and sealed it well. Then they murdered the enslaved Indians, marked the treasure site, unmoored their rafts and set out downstream again, hoping to reach Mexico, and also to return later and reclaim the wealth of the lost Louisiana. But they never came back. The stories go that their band was beset by attacking Indians and that the survivors suffered a still more terrible death from swamp fevers.

Explorer Finds Field of Ice in British Columbia

Montreal.—Discovery of an immense and accessible ice field of about 350 square miles in the Bridge river district of British Columbia is reported by Maj. F. V. Longstaff, of Victoria, B. C., who, with two Swiss guides, explored the region. He believes it will become an important scenic attraction. In his opinion it surpasses the famed Columbia ice field.

It provides the source of several large rivers, among them the Spanish, Bridge, Whitewater, Lilloet, Tohamand and Southgate. On or near the ice field the explorers noticed a dozen mountain peaks about 10,000 feet high.

The distance from the nearest point of the motor road in the Bridge river valley to the gravel flat of the main glacier is 45 miles by the river trail, the explorer said.

Old Bay Mare at 32 Is Able to Earn Oats

Wantons, Wis.—R. H. Gustis has a bay mare that is thirty-two years old, yet is still doing its full share of farm work whenever three horses are needed. Mr. Gustis has had the horse since it was five years old and intends to keep it as long as it lives.

ADOPTED BY OSBORN

Miss Stella Lee Brunt Osborn, thirty-seven-year-old newly adopted daughter of Chase Salmon Osborn, lecturer, writer and former governor of Michigan, Miss Brunt, who worked her way through night school when she was twenty-one and then worked her way to a M. A. degree at the University of Michigan, had been literary secretary to Mr. Osborn many years.

Wins \$50,000 Verdict for Injury to His Toe

Washington.—Because he can no longer pirouette seven times Alberto Kellman Ferreyros, known to his public as De Lima, has been awarded \$50,000 damages in a suit against the Fox Theaters corporation.

A jury journeyed to the Fox studio here and watched a film of Ferreyros dancing in a Greenwich Village cafe ten months after his injury in an elevator at a Fox theater. The dancer admitted authenticity of the film, but said he could no longer dance as well as before the second toe on his left foot became crippled, and the jury believed him.

Incubator Hatches Egg; It's an American Eagle

Burbank, Calif.—An egg, speckled and about the size of a goose egg, was found by workmen employed on construction of a road in Little Tujunga canyon near here. Amid much speculation as to the kind of egg it was, the men took their find to the Best O'Care hatchery. After a month of incubation a fluffy white eaglet, national symbol of American liberty, picked its way from the shell.

Priests Exhort Fish to Protect Mankind

Tokio.—Recently a boat with Shin priests put out to sea near Shimonomaki and performed a service for the benefit of the fish, or globe fish. This fish, whose meat is esteemed a succulent morsel by the Japanese, is at the same time highly poisonous unless carefully prepared. The priests exhorted the fish to refrain from hurting mankind.

CAP AND BELLS

SAFETY FIRST

"What's the big idea of talking to yourself?" asked his old friend. "I wasn't talking to myself, but to my wife," replied the meek little man. "Why your wife isn't anywhere in sight!"

"I know it, but it's always safer to tell her what I was when she isn't within hearing distance."

Just as If!

Hotel Clerk (writing a form).—Name, please? Guest.—Thammas MacTavish MacHaggis. Hotel Clerk.—Nationality?—Wall Street Journal.

IDEALS

Wife (reading financial page).—I fear we are losing our ideals in the mad rush for wealth. Hubby.—Oh, I don't know. Have you noticed the mad rush for the ball park when there is a game on?

Enhanced Value

The storage egg now makes a hit. The purchaser so meek. Must pay a fancy price for it. Because it's an antique.

Desired Effect

"Why do they play a piece of jazz during the intervals in radio plays?" "Because that is the best way to make the passing of a few moments seem like a long time."

It Does, in Two Ways

Blinks.—Doesn't it make you mad to have the stop light flash on just as you get to the crossing? Jinks.—Yes. It always makes me see red.

Wondering

"Get some dog soap. That dog has fleas." "I wonder if the vacuum cleaner wouldn't do the work."

NEEDFUL SLEEP

"What! You here again for money for a night's lodgin'? Why, I just gave you money for that purpose last night." "I know it, mum, but a feller's gotter sleep more'n wunst."

The Futile Bluff

Many a man has gone through life on nothing but a barefaced bluff. Except in dealing with his wife.—We'll say no more—we've said enough.

Amateur Concert

"What are we in for now?" "The Road to Mandalay! What do you say to that?" "Let's detour."

Not Altogether

Lawyer.—Was the man you found under the street car a total stranger? Witness.—No, sir, only a partial stranger.

Lawyer.—What do you mean? Witness.—Well, you see, one arm and one leg were gone.

Never Is

Bonnet-winner.—Doctor Jaremup's success seems to be firmly established. Neckbreaker.—Yes, he's had "Out to Lunch" painted permanently on his door now.

Careful Lad

Mike.—I didn't wanta hit that gnd because the poor guy had glasses on. Mamie.—You is always so kind an thoughtful, Mike. Afraid of blindin' him, was you? Mike.—Naw! I was afraid I'd cut me fist.

Optimist

First Native.—What's this world coming to, anyhow? Second Feller.—It's coming to Mudville if we get the roads paved this summer.

Italian Bees Are Most Excellent

Superior to German Type and Gather More Honey in Course of Year.

The queen is the "better half" of the bee family. All efforts of the beekeeper bring only failure unless there is a good queen in the hive, according to R. A. Slocum of Cornell university. "No matter how good our equipment, how well we have packed the bees for winter, how generous we are with winter stores of honey and sugar, or how abundant the nectar in the blossoms, the swarm cannot make a large crop of honey," he said, "unless the queen is able to maintain a large colony of strong, active, and healthy bees."

Italian Bees Superior.

Beekeepers, Mr. Slocum said, believe Italian bees are much superior to the German bees, commonly known as black bees, in nearly all respects. They are better workers, swarm less, are more gentle, and are much superior in cleaning out European foulbrood. Unfortunately the black bee was introduced into the United States more than two hundred years before the Italian bee, and therefore the blacks have become fairly well established in all parts of the country. They are now found wild in trees and rocks in every part of Canada. Consequently, one very good reason why beekeepers should rear their own queen bees, or secure them from reputable breeders, is to get rid of the black bees and hybrids.

Prolific Queen Needed.

Every colony must be headed by a good prolific queen. Authorities agree there is not so much difference in the honey-getting ability inherited by the different colonies as there is in the condition of the colonies; that is, they produce large honey crops because conditions within the hives are ideal. This means a large number of strong young bees in healthy condition, with conditions around the hive suitable for them to work effectively. The good queen is extremely prolific and lays around 2,000 eggs a day. Such a queen must be large and should have a deep body. A great number of eggs is necessary because the amount of honey made by the colony varies directly with the number of strong young bees in it.

Tremendous Increase in the Use of Oil Sprays

The use of oil sprays in the East has increased tremendously during the last ten years, mainly because of the prevalence of the European red mite. In consequence, other problems have arisen, such as the combination of oils with fungicides and aphicides which have in turn reacted upon the oil spray business so that better oils are being marketed than ever before. The great variety offered has complicated the proper selection of oil sprays and careful consideration on the basis of cost, safety, toxicity, reliability and compatibility is necessary. Much experimentation is needed in this field. Commercial oil emulsions have not proved to be better killing agents than miscible oils for red mites, a fact which deserves consideration, and, finally, studies of safety of the various products so far indicate caution for pears and plums, together with additional caution on all fruits for the unknown product, especially if the formula is new.

Miscible Oil Must Be Thoroughly Emulsified

Miscible oils and various oil emulsions being manufactured from kerosene and the heavier mineral oils, it is necessary that an emulsion of good quality be produced in order that the oil may be dispersed uniformly through the diluted spray. If the oil separates out, injury to the tree may ensue.

Two types of emulsions are available, one in which the oil is emulsified with soap and cresylic acid or soap alone; the other a nonsoup emulsion in which the oil is dispersed by means of casein or some other protein agent. The latter may be termed a quick breaking type and may be expected to give more trouble than the other.

Excellent Method for Preparing Grafting Wax

There are several rules for making grafting wax. An old method found excellent is as follows:

Four parts by weight of resin, two of beeswax and one tallow. Melt slowly, being careful not to let it boil over on the stove. When thoroughly mixed, pour into cold water, and as soon as it can be handled, work with greased hands like molasses candy. Make into sticks of convenient size for handling. In any ordinary grafting weather this wax will soften sufficiently to be plastic by the heat of the hand.

Control Pea Aphid

Pea growers have on occasion suffered considerably from heavy infestations of pea aphid. These tiny insects increase with incredible rapidity and a good many times it seems as if there is very little that can be done to control them. However, the New Jersey experiment station reports a successful control by dusting with a dust made of 50 pounds of hydrated lime and three pints of Black Leaf Forty mixed and applied immediately

NEW ORLEANS MONEY GAVE SOUTH PET NAME OF DIXIE

Southern Gives Bankers' Convention History of Derivation of Popular Nickname.

Pittsburgh.—When the band strikes up "Dixie" and the crowd joins in singing the song of the South, something quite different from the thought of money serves as the stimulus for its enthusiasm. Yet money was responsible for this nickname of the South. Fred W. Thompson of the First and Merchants' National bank in Richmond, Va., told the young money experts at the American Institute of Banking convention here.

"Money is the essential commodity handled by a bank and I'm going to tell you a little story about money. Money gave the South its pet name of 'Dixie.' The principal bills issued by a bank in New Orleans before the war between the states were in \$10 denominations. They were engraved in

English on one side and in French on the other. On the French side, the word 'Dix' was very prominent; as you know, it means 'ten.'

"The Americans throughout the Mississippi valley who did not know the French pronunciation, called the bills 'dixies,' and Louisiana came to be known as 'the land of the dixies' or 'dixie land.' This inspired Dan Emmett, who in 1859 composed the original 'Dixie Land' for a minstrel show, then performing in New York. He embodied in it the expression he had so often heard: 'I wish I were in Dixie.' This song was later rewritten by Gen. Albert Pike, who gave it the battle thrill that makes 'Dixie' immortal and stamps the name 'Dixie' upon the South."

New Orleans also seems to have been responsible for the expression "two bits," according to Mr. Thompson. "For its early currency," he said,

"New Orleans and some other sections of the country depended upon imported Mexican dollars. To meet the need for fractional change, these dollars were cut into bits. And so, today we refer to a quarter of a dollar as 'two bits.'"

U. S. Leads World as Largest Platinum User

New York.—The United States continues to be the largest consumer of platinum of any country in the world. During the last year more than \$10,000,000 worth of platinum was imported, of which 60 per cent was used by jewelers, and the rest in a great variety of industries.

Cat on Pedestal

Seattle, Wash.—Combined efforts of a lineman, deputy sheriff and several volunteers were required to dislodge a thoroughly frightened Angora tomcat from a telephone pole on which it had been perched for two days.

FRIDAY, JULY 3, 1931.

Mr. and Mrs. W. C. Cargile and Son, Lee Lane, and Mrs. J. W. Lane, Mrs. Cargile's mother, returned Monday from a 5 weeks' vacation on the Pacific coast where they visited friends and relatives in San Diego, Los Angeles and San Francisco. They also report a good week fishing trip to the Sierra Nevada where brook trout are plentiful. On their return trip they visited the Grand Canyon and petrified forest in Arizona, and other points of interest.

LAYMEN MET LAST SUNDAY AT METHODIST CHURCH

In the absence of the pastor, the local Lay Activities Board of the First Methodist Church, directed by Mr. L. A. Lowe, rendered a program last Sunday which was an inspiration to all attending at the evening hour.

Mr. Lowe made a splendid talk on the subject of the needs of experimental faith and the fact of Divine power in the lives of all who are called Christians.

The Old Testament scripture lesson, read responsively, was led by Dr. A. P. Utterback, and the new Testament scripture lesson was read by Mrs. Preston Utterback.

W. A. Powell spoke on the subject of "Power Through Obedience," while C. J. Watts talked on "Power Through Worship," after which H. C. Goldwire spoke at length on the subject, "Power From Prayer and Devotional Scripture Reading".

Every one in the church followed Mr. Goldwire's speech to the word as he brought the great fundamental truths of experimental faith home to the congregation.

Mr. Goldwire is one of the best of our local speakers, as well as an untiring worker for the upbuilding of the Lord's kingdom in Sanderson, and his address was one of the best heard here in many days.

Mrs. A. P. Utterback directed the music, and Mrs. Katherine McLymont, with Mrs. Utterback, rendered a well-prepared vocal duet.

Every person attending the Mens' service last Sunday was high in his words of commendation concerning the program which was organized by the local Lay Activities Board, directed by L. A. Lowe, lay leader.

Mrs. James House and children returned last Friday from a visit with relatives in Carrizo Springs.

Mr. and Mrs. Alex Mitchell were in town several days this week from their ranch in the northern part of the county. Mr. Mitchell reports a good rain fell on his ranch the first of the week.

Miss Beatie House of Carrizo Springs, Texas, is visiting her brother, James House and family.

RATTLE OF THE RAIL

Engineers D. A. Pollard and N. E. Charlton have been assigned to a regular freight run out of this terminal.

A number of the friends of Conductor C. W. McMullen were on hand Saturday evening to greet him farewell on his final departure on train 102 he being retired on pension on his arrival in San Antonio. Mr. McMullen rounded out 50 years in train service, 43 years alone on the Southern Pacific.

Conductor L. P. Walker is now again a regular passenger conductor between San Antonio and Sanderson due to the retirement of Conductor McMullen on pension.

Fireman W. C. Cargile has returned from a lengthy visit on the Pacific Coast and has taken a regular freight run out of here.

Fireman Harry Arfman has returned to Del Rio where he has been assigned to a regular freight run.

Engineer J. P. Potter is now working on the extra list here.

The tenth train crew has been placed in service between Del Rio and Sanderson.

J. C. Harris, master mechanic at El Paso, passed through Tuesday morning having just returned from a visit to several cities in the north.

H. F. Washburn, 3rd pumper for the local Southern Pacific, has returned from the hospital at El Paso.

W. M. S. RENDEKED WORTHY PROGRAM LAST SUNDAY

Last Sunday at the 11 o'clock service, the Womens Missionary Society of the First Methodist Church observed a special service in the absence of Rev. B. M. Stradley, pastor. Mrs. F. S. Garrison presided, and the following women of the Society took part: Mesdames C. J. Watts, B. M. Stradley, Jennie Freeman, R. C. Davis, Charles White, and Allen.

The theme of the consecration service was the subject, "Looking to Jesus."

All present were outspoken in their deep sense of appreciation of the program, and the beautiful consecrated lives of the women taking part in it.

Each of the women spoke on some particular phase of the subject, and showed her devoted earnestness to the Lord's work.

The Methodist Missionary Society also had charge of the 3 p.m. Dryden service Sunday in the pastor's absence, having a good attendance.

The messages brought at this time were highly praised for their worthiness of purpose and depth of thought.

Harry B. Matthews of Ennis, Texas took up his duties as Linotype operator-printer at the Times office the first part of this week.

Mrs. W. H. Cobb and baby have returned from a visit with her sister, Mrs. H. B. Nutter in Girvin.

Miss Bess McAdams has returned from a visit with relatives in Sabin.

Folks, this is your paper and we welcome articles for it. Any news items that you know, won't you please phone it in? Thanks. THE TIMES.

STOCK NEWS

Othro Adams shipped 1 car of horses to Homer B. Adams at San Antonio on Tuesday of this week.

T. E. Terry shipped Tuesday 1 car of horses to Moore, Texas.

Malone Mitchell shipped 2 cars of sheep to the Fort Worth market last Saturday. These were March lambs and averaged 68 pounds and brought \$5.50 a head.

J. C. Mitchell shipped to the Fort Worth market last Sunday 2 cars of sheep.

D. H. Cunningham shipped from Dryden Monday 300 spring lambs to the Fort Worth.

THE STATE OF TEXAS

To the Sheriff or any Constable of Terrell County, Greeting:

You are hereby commanded to summon Levi Garrett Turner, J. M. Turner, Sarah Catherine Turner Wise, F. D. Wise, J. C. Turner, R. I. Turner, Mrs. Viola Walls, Tom Walls, R. J. Turner, Jr., Clara Bertha Cooper, Alfred Cooper, and Wesley (Dick) Green, the residences of all, except the four first above mentioned, of whom are unknown, to appear at the next regular term of the County Court of Terrell County, Texas, to be held at the courthouse thereof, in the city of Sanderson, on the first Monday in August, 1931, being the 3rd day of August, 1931, then and there to answer an application and petition filed in the said court on the 16th day of June, 1931, in the Estate of R. J. Turner, Sr., deceased, No. 77 on the Probate Docket of said court in which J. M. Turner, Administrator of said estate, is applicant for the partition and distribution of the following described real property listed as assets of said estate: The undivided one-half community interest which was owned by the said R. J. Turner, Sr., in three hundred and fifty-three and fifty-one eighths acres out of the south two-thirds of Section 9, Block 151, E. L. & R. R. Ry. Co., Original Grantee, Certificate No. 1615, Abstract No. 268, Terrell County, Texas. You are commanded to so summon such parties, and to serve this citation by making publication of this citation once in each week for four consecutive weeks previous to the return day hereof, in some newspaper published in your county, but if there be no newspaper published in said county, then in any newspaper published in the nearest county where a newspaper is published.

Herein fail not, but have you before said court, on the first day of the next term thereof, this writ, with your return thereon, showing you have executed the same.

Witness: F. L. Burnside, Clerk, County Court, Terrell County, Texas.

Given under my hand and the seal of said court in the city of Sanderson, this, the 16th day of June, 1931.

(SEAL) F. L. BURNSIDE, Clerk of the County Court of Terrell County, Texas.

Issued this, the 16th day of June, 1931.

F. L. BURNSIDE, Clerk of the County Court of Terrell County, Texas.

Neighboring Towns To Celebrate Fourth

Alpine will hold its tenth annual Old Settler's and Cowboy's Round-up in that city today and tomorrow. A good program has been arranged and Alpine has made preparations to entertain several thousand visitors.

Ozona is also holding her annual Stock Show and Rodeo this week-end and offers a good program.

Marathon citizens are to celebrate the national holiday by having a picnic at Fort Pena. Baseball and other attractions will be on the program.

Many of our citizens are planning on going to one of these places for the fourth.

Mr. and Mrs. Ira Harrison spent several days in El Paso this week.

Mrs. Harry Sharp was called to Sonora the first of the week on account of the serious illness of her father, Mr. Stokes.

Mr. and Mrs. F. A. Sharp have returned from a visit with relatives in Llano, Texas.

Minton White left Thursday for several days visit in San Antonio with relatives.

SOCIETY

Bridge Parties

CACTUS CLUB

Members of the Cactus Bridge Club and a few invited guests were entertained last Thursday afternoon with Miss Myrtle Harrell as hostess at her home. Varied colored flowers were used in the living room as decoration.

Following the usual playing of games the high score prize was won by Mrs. Horace Fletcher, while Mrs. Frank Robertson was holder of second high score prize. Novelty handkerchief laundry bags were the prizes given.

A plate lunch consisting of lime-grape salad, pineapple cake, and iced tea, was served to the following guests: Mesdames Frank Robertson, Horace Fletcher, Kendrick Harrell, Wallace Henshaw, Clyde Harrell, S. C. Bodkin, C. F. James, Lucille Mason, J. C. Stansell and Misses Louise and Novis White.

TUESDAY CLUB

Mrs. Bozarth Brown was hostess to the members of the Tuesday Bridge Club at the home of Mrs. C. M. Breeding.

The living room was beautiful with baskets of shasta daisies and dahlias.

After the usual five games of bridge, Mrs. Robert Duncan was awarded a beautiful pillow for high score prize; Mrs. D. A. Pollard, a hand-made scarf for second and Mrs. Jim Nance, a guest towel, for low.

Delightful refreshments were served to Mesdames Robert Duncan, D. A. Pollard, Willie Banner, J. S. Nance, P. J. Holman, F. L. Burnside, John Harrison, H. R. Laurence, R. E. Stirman, Mary Lou Kellar, C. M. Breeding, and H. Franks of Rocksprings.

NIGHT CLUB

Mrs. Clyde Griffith was hostess to the members of the Night Bridge Club at her home last Friday evening. The living room was attractively decorated with cut flowers.

Mrs. Max Bogusch won the ladies high score prize and L. H. Lemons the men's prize; hand made handkerchiefs being the prizes given.

Refreshments of ice cream and

cake were served to: Mr. and Mrs. Max Bogusch, Mr. and Mrs. R. S. Wilkinson, Mr. and Mrs. J. S. Nance, Mr. and Mrs. A. E. Creigh, Jr., Mr. and Mrs. S. S. Daggett, Mr. and Mrs. John Stovell and Mr. and Mrs. L. H. Lemons.

WEDNESDAY CLUB

Members of the Wednesday Bridge Club met this week with Mrs. J. C. Green as hostess.

Mrs. H. R. Laurence won the high score prize and Mrs. Wallace Henshaw won second high score prize. Novelty hanging flower baskets were the prizes awarded.

Refreshments of cherry-nut sundae and angel's food cake were served to the following members and guests: Mesdames Max Bogusch, Clyde Griffith, A. E. Creigh, Jr., L. H. Lemons, S. S. Daggett, H. R. Laurence, R. S. Wilkinson, J. C. Stansell, W. Henshaw, H. D. Williams, S. A. Kernal, D. A. Pollard, Jim Kerr, J. W. McKee, P. J. Holman and John Stovall.

SOCIAL NOTES

The Adult B. Y. P. U. met at the home of Mrs. O. H. McAdams last Friday night for a social. Interesting games were played for two hours, after which Mr. J. E. Black, president, made a short talk in the interest of the union.

Punch and cake were served to twenty-four guests.

W. M. U. MEET

The Baptist W. M. U. met at the church Monday for Bible study. Mrs. Ira Harrison led a very interesting devotional.

Mrs. A. D. Brown taught a very instructive lesson on contentment with scripture references on the subject. Those present were: Mesdames Johnson, Nance, Black, Harrison, Brown, "Strange, Deaton, Mussey, Burnside and McAdams.

Mrs. W. E. Lea returned Thursday morning from Denver, Colo., where she went as a delegate to the convention of the Ladies' Auxiliary of the B. of R. T. She also visited in Colorado Springs, Dallas, San Antonio, and Del Rio before returning home.

WITH THE CHURCHES

CATHOLIC CHURCH

Mass every morning at 7:30. 1st Mass on Sundays at 7:30; 2nd Mass at 9 o'clock.

Rev. John M. Bertrant, Rector.

CHURCH OF CHRIST

Ladies' Bible class on Tuesday afternoon at 5 o'clock.

Mid-week Bible study on Wednesday evening at 8:30 o'clock.

Sunday Bible classes begin at 10 o'clock.

Preaching and Communion each Sunday beginning at 11 a. m. and 8:30 p. m.

Young People's Bible class on Sunday evening at 7:45 o'clock.

A cordial invitation is extended to all.

R. E. GRIFFITH, Minister.

FIRST METHODIST CHURCH

Services—Sunday, July 5, 1931

10 a. m.—Sunday school. "A class for every age, and a trained teacher for each class." A whole family Sunday school.

11 a. m.—Divine Worship—Responsive reading, 23rd Psalm, led by H. C. Goldwire. Violin solo by Henry Goldwire. Special mixed quartet directed by Mrs. Katherine McLymont. Sermon by the pastor. Subject—"The Call for Men."—A special patriotic message. All ex-service men will be especially invited.

7:30 p. m.—Junior Epworth League at the parsonage parlor, directed guests to this service.

gue at the parsonage parlor directed by Mrs. B. M. Stradley, Bertha Mae O'Bryant, leader.

7:30 p. m.—Hi Epworth League in the church auditorium; D. C. Thrift, leader. The young people's mixed quartet will render a special vocal number at this service, and Henry and Billy Goldwire will render a trumpet and violin duet.

8:30 p. m.—Preaching by the pastor; subject: "The Open Door."

"Behold, I have placed before you an open door which no man can shut."

The junior quartet will render a special vocal number directed by Miss Martha Davis.

The male quartet, directed by Carlton White, will sing at this service.

We earnestly solicit all who do not work elsewhere, to come worship, and work for the Lord with us.

—B. M. Stradley, Pastor.

PRESBYTERIAN CHURCH

Sunday School begins promptly at 10 o'clock. A class for young men is to be organized Sunday. Mr. Sims Wilkinson, the superintendent would like to see this class and all classes full Sunday morning.

The Catechism classes will meet with Mrs. McCall Wednesday at 4 p. m.

Dr. McCall will preach on "Consecration" at 11 o'clock and at the close of the service the Lord's Supper will be celebrated. The pastor hopes for a good attendance of the membership at this service.

The subject for the evening sermon is "Redemption".

The monthly meeting of the session will be held at 4 p. m. Sunday in the church.

The benevolent quota for the 1st quarter has been sent off.

The Presbyterians appreciated very much the day spent with our Methodist friends on the Tol Murrah ranch, and are very grateful to Mr. and Mrs. Murrah and Mr. and Mrs. Rose for their hospitality.

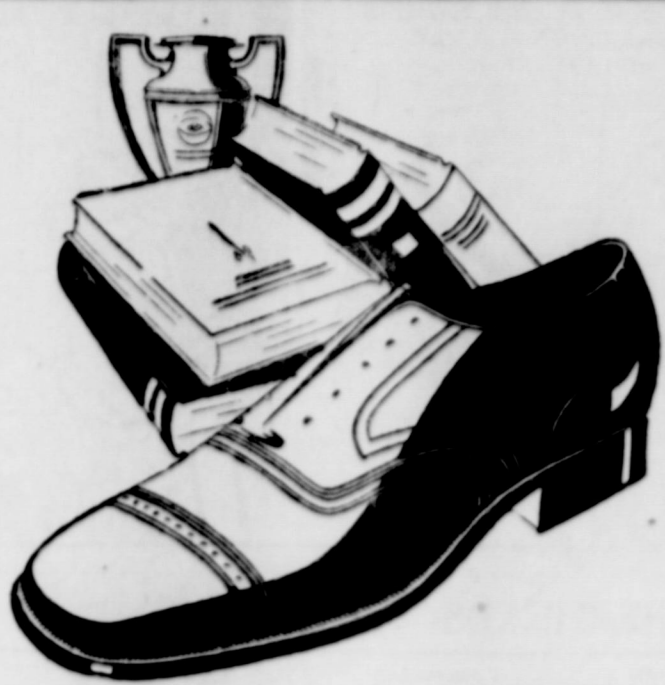

New Method of Docking Lambs Shows Savings

BRADY, Tex., July 2, 1931.—Burdizzo pinchers, which are coming in to common use in West Texas for simple livestock surgical operations have been demonstrated as a paying proposition in docking lambs, by James D. Prewitt, county agent of McCulloch county, on the ranch of D. S. Pumphrey of Mercury. After docking 50 lambs with a pocket knife, resulting in a death loss of four, Mr. Pumphrey recently tried the pinchers on 1200 lambs without a single loss. He estimates that he would have lost 48 lambs worth \$144 had he sustained the same percentage of loss in using the pocket knife on the main lot that he did on the first 50. He notes another important saving in the avoidance of losses of weight and screw worm infestation that often accompany the knife operation.

WANTED—3-room furnished apartment by July 25. Private bath preferred. Call Times office for details.

C. V. McKnight was a business visitor in El Paso several days this week.

NOTICE

NOTICE IS HEREBY GIVEN, that the School Board of Common School District No. 1, of Terrell County, Texas, will receive Sealed Bids, up to 10 o'clock a. m., July 20, 1931, for the Transportation of all School Children from Dryden and vicinity and along Highway No. 3, to Sanderson, for the School Term of 1931-1932, all equipment to be furnished by Bidder.

Specification of Bus and Terms of Contract may be examined at the Office of the County Superintendent, in the Court House, in Sanderson, Texas.

All bids must be Sealed and Mailed to W. E. Stirman, President of the School Board, at Sanderson, Tex., in time to reach said President on or before said time and date, and must be marked on the outside of the envelope: "Bids for the transportation of School Children from Dryden to Sanderson."

Also, Bids may be submitted on said date for the sale of an Automobile School Bus.

The Board reserves the right to reject any and all Bids. -17-3tc.

**HI EPWORTH SOCIAL
GIVEN LAST TUESDAY**

The Hi Epworth League held its regular monthly social last Tuesday evening at the F. S. Garrison home with 35 young people in attendance, who reported a delightful time.

After a variety of games were played on the lawn and which were supervised by the Epworth League Phonology committee, refreshments were served out-of-doors.

Rev. and Mrs. B. M. Stradley were special invited guests.

H. B. Nutter of Girvin was a business visitor in the city over the week-end.

"THE PATHFINDER OF THE SEAS"

By ELMO SCOTT WATSON

THE other day the busts of four great Americans were unveiled in the Hall of Fame of New York university. One of them was that of a President of the United States; another of a great American poet; and the third of a great, perhaps the greatest, American painter. To every American the names of James Monroe, Walt Whitman and James Abbott MacNeill Whistler are familiar enough, but how many would recognize the name of the fourth man thus honored—Matthew Fontaine Maury, an officer in the United States navy? Yet, in his field of activity, Maury was as great if not greater than were the others in theirs. And it is one of the paradoxes of American history that, as a recent biographer of him said, "No other great American has ever received so many honors abroad and so little recognition at home as has Matthew Fontaine Maury."

Related though the recognition has been, it must be said that his countrymen have given that recognition in a somewhat full measure in recent years. Three years ago there was erected in Richmond, Va., the state which claims him as one of her great sons, a beautiful memorial to "the Pathfinder of the Seas" and the recent ceremony at New York university was an added gesture of tribute to the father of modern scientific navigation.

For seafarers the world over know the name of Maury. To this day the pilot charts issued at regular intervals by the hydrographic office bear the notation "founded upon the researches made . . . by Matthew Fontaine Maury." To this day weather forecasting is done in accordance with fundamental principles established by Maury, and to this day his scientific tests, revised in accordance with more recent discoveries, are studied in the schools. Nor were these the only contributions of this Tennessee farm boy who became the leader in establishing man's conquest of the seas. For although the Old Dominion calls Maury hers, Tennessee also has a claim to him.

Born near Fredericksburg, Va., in 1806, Maury was the descendant of a distinguished Huguenot family that settled in Virginia in 1718, a real F. F. V. His father migrated to Tennessee when Matthew was a boy and there in the forests near Franklin, 18 miles north of Nashville, he grew up. From the beginning he was adventurous by nature and he decided to join the navy. Despite the opposition of his father, a midshipman's warrant was secured from Gen. Sam Houston, then a representative from Tennessee. With \$75 which he had saved up, he bought an old gray mare and set out upon the long ride to Virginia. When he arrived at the home of a cousin near Charlottesville he had exactly 50 cents in his pocket. Pushing on to Washington, he was ordered to report to the U. S. S. Brandywine which was about to sail for France to take back a distinguished visitor, Lafayette. Incidentally, one of the midshipmen on this frigate was a youngster named David Glasgow Farragut.

From the beginning young Maury made a name for himself as "a horse for work." Having seen Lafayette safely home, Midshipman Maury's next cruise was along the coasts of South America. In 1829 he joined the Vincennes for a cruise around the world. Being anxious to make speed on this trip he searched for information about prevailing winds and currents and was surprised to find that no such data existed. This gave him the inspiration for the great work which he was to do later.

After finishing this cruise Maury went ashore for awhile, returned to Fredericksburg, married the sweetheart of his youth, Ann Herndon of that city, and lived there for the next seven years. Encouraged by the publication of his narrative on navigating the Horn, Maury decided to become a writer. Fame came to him almost immediately. His book "New Theoretical and Practical Treatise on Navigation," the first work on nautical science ever written by an American naval officer, won such immediate approval that it replaced Bowditch's work, long the standard, as the text

1. Symbolic figure of the world which stands on the pedestal above the statue of Maury at Richmond, Va.

2. Bust of Matthew Fontaine Maury, by F. William Seivers, recently unveiled in the Hall of Fame at New York university.

3. Statue and memorial to Maury at Richmond, Va.

book of junior officers of the navy. Although others share with him the title of "Father of Annapolis," and there were those who anticipated him in urging a naval academy, it must be admitted that his insistence was largely responsible for the founding of such an institution.

All this time Maury was trying to get back to sea duty, but an unfortunate accident in a stage coach which made him a cripple for life prevented his return to active duty. By this time his scientific fame was so great and his usefulness as evident that the secretary of the navy, in order to take full advantage of those qualities, made him superintendent of the depot of charts and instruments which later became that institution of inestimable value, the United States naval observatory. There Maury went further into the study of astronomy, so closely associated with navigation, and became one of the leading astronomers of the period.

But this was only a minor part of his work. Recalling his dream when, as sailing master of the *Falmouth*, he had sought in vain for information which would aid him in sailing that vessel, he set about expanding all of the log books which had been tossed aside as rubbish within a short time after the voyages were completed. In these he discovered a veritable gold mine. By charting the courses of all the vessels recorded there, he saw that it would be possible to figure out the prevailing winds and currents at each season of the year over any portion of the high seas. Realizing that it was too big a job for one man he sought aid from the higher authorities but, as is so often the case with projects of immense importance, he could not communicate the extent of his vision to his superiors. So he went at it alone and after five years of most painstaking labor he published his "Wind and Current Chart of the North Atlantic."

To supplement this he issued an abstract log for navigators, made up of advice upon what he had already learned, with blank pages in which they were to make observations each day. The filled-in blanks were to be returned to Maury for compilation of more sailing directions. To get the co-operation of captains of the various ships, he told them that he could cut the sailing time of some of the voyages from ten to fifteen days, and thus it was to their advantage to aid him in making further studies.

Within a year navigators had taken out five thousand of his charts and three years later he had manuscripts recording over a half a million days' observations in every corner of the globe. By 1853 his work had won such world-wide fame that a naval conference was called in Brussels, Belgium, to which naval experts from many countries came to help work out this marvelous new science, and out this marvelous new science, and Maury returned to America laden with honors and inspired to new endeavor. He had shown the seamen of other nations how to win in their race against time. For instance, previous to Maury's

researches, the trip from New York to San Francisco around Cape Horn was a voyage of 180 days. Maury first showed how to cut this to 133 days, then to 119 days and in 1851 when the famous Flying Cloud made its trip it did it in exactly 90 days.

The value of all this was immediately evident to all maritime nations. Profiting by Maury's work, British commerce was already saving ten million dollars a year and his "Sailing Directions" were becoming increasingly valuable as he added new data and made new computations. One more triumph was to be added to his career before it went into something of an eclipse. During his study of the log books he had discovered much interesting information about the Gulf Stream and this suggested a study of that current and other currents. The result was a book "The Physical Geography of the Sea," a title suggested by the great German scientist, Humboldt, who told the American that it was his observations that founded this new science.

From his study of the soundings recorded in the log books Maury discovered the "Atlantic Plateau" or "Telegraphic Plateau." At this time Cyrus W. Field was trying to lay the first Atlantic cable. Field gave him full credit when he said "Maury furnished the brains, England the money, and I did the work."

Maury was fifty-four years old, at the height of his fame and the light of his powers, when the rumblings of Civil war gave notice of the tragedy which was so soon to follow. Lame and past the age for active service, he might well have remained in his observatory far from the raging conflict, making his charts and carrying on his scientific work. But instead, loyal Virginian that he was, he chose to cast his fortunes with his native state. At three o'clock on April 20, 1861, Lieutenant Maury (for despite his world-wide fame he was still only a lieutenant in the United States navy) with tears in his eyes, turned the records of the observatory over to the next in authority and left the building forever.

He served as a commodore in the Confederate navy, spending the greater part of his time in England in an unsuccessful attempt to secure recognition of the Confederate states. Before going to England he had been engaged in a strenuous effort to gain support for his plan of having the Confederacy adopt before the North's growing navy could overwhelm it. But again the lack of imagination of higher-ups made his efforts useless.

When the Civil war ended Maury found himself an exile in England. The emperor Maximilian invited him to Mexico and he became Imperial commissioner of emigration. One of his projects was for a colony of Virginians south of the Rio Grande, but it never materialized. In 1868 the act of amnesty made it possible for him to return to the United States. He had been offered the directorship of the Imperial observatory at Paris by Napoleon III, with a large salary and every facility for carrying on his researches. But he chose to return to his native, and impoverished, state as professor of physics at the Virginia Military Institute. There he spent the last five years of his life still investigating and still writing books on geography and astronomy. He died in 1873 and his body was buried temporarily at Lexington. It had been his wish to be buried in Goshen Pass on the bank of the North Ann river and almost his last words were "Carry my body through the Pass when the rhododendron is in bloom." In June of that year his body was born through Goshen Pass, the coffin covered with rhododendron blossoms and carried on to Richmond where in Hollywood cemetery, he now lies. But Goshen Pass still remembers him. In it there stands a simple column of granite and on a bronze tablet at the base of an anchor are these words, "Matthew Fontaine Maury, the Pathfinder of the Sea."

(By Western Newspaper Union.)

Kill Queen Ant to Get Rid of Pests

Poison Is Suggested to Kill Off Whole Army.

The best way to get rid of ants is to find their nests and to destroy the queen, according to Prof. Glenn W. Herrick of the New York State College of Agriculture. With the queen killed, no more eggs will be laid and the production of the worker ants stops.

Carbon bisulphide kills the queen and gets rid of the workers. It may be difficult to find the nest, and sometimes when the nest is found it is hard to get at, as in the foundation walls. When the colony is located, however, pour an ounce or two of the liquid into each of several holes made in the nest with a sharpened stick, and then quickly stop up each hole with a clod of dirt. A heavy wet blanket thrown over the nest helps to retain the gas and to make fumigation more effective. The liquid evaporates quickly and the gas permeates the whole nest, destroying the colony. Carbon bisulphide is highly inflammable and explosive and no fire should be brought near the place which is being fumigated.

Professor Herrick also recommends the use of tartar emetic. To make this, mix tartar emetic with extracted honey at the rate of one part to twenty parts of honey. If some of this mixture, poured into individual butter plates, is set in the places where the ants are troublesome, the insects may be driven away.

Every Farm Yard Loses

Much Needed Fertility

Every farm yard has fertility going to waste. It may be little; it may be much. Every piece of undissolved vegetation is the source of fertility if it is properly saved. Every bit of vegetable matter left over or not used in the preparation of feeds or foods would make the greens grow greener in the garden or the flowers grow more beautiful if converted into fertility and properly used.

In other words, select a spot somewhere within easy reach and make a compost pile of all the vegetable tops, leaves, straw bolls, cornstalks, unconsumed hay and so on. Mix in a little good soil; incorporate into the pile as it is made some commercial fertilizer materials; keep it moist if water is available and you will have some excellent fertility to apply to choice spots in the garden, lawn or other part of the farm. Use fertilizer in somewhat the following proportions: To each 100 pounds of dry vegetable matter such as above mentioned, mix in three pounds each of sulphate of ammonia and air slaked lime, and one pound of superphosphate.

Unique Way to Prevent Injury to Grape Crop

Perhaps the best way to avoid injury to grapes from bees consists of spraying the grapes and in growing the grapes to the ripening stage without punctures or injuries. Following this, of course, the grapes should be harvested promptly when they are ripe. If for any reason the grape berries are allowed to hang on the canes and become over-ripe, much injury is liable to occur from bees.

We may summarize by saying that we should grow the grapes in the best possible way in order to secure a high quality, firm, well ripened berry, says a writer in the American Horticulturist. If they are not allowed to become over-ripe, little or no injury will occur from bees.

FARM FACTS

One-year-old trees are the best trees for planting.

Potato spraying should begin early and continue late.

Purslane is a villainous weed, but not to be despised when boiled as "greens."

Bonemeal is excellent for vines and all garden purposes, and may be used freely without danger of burning.

Quack grass is one of the earliest plants to start growth in spring and it grows until freezing weather in the fall.

High-producing cows frequently suffer a severe strain on their calcium reserve, and need to have that reserve replenished.

Heavy pasturing over long periods readily shows that the returns in grass gradually diminish and that the feeding value of the feed is reduced.

Cherry leaf spot is the most important single disease of the sour cherry. It is caused by a fungus which passes the winter in the dead leaves on the ground.

When transplanting a tree be sure to maintain a balance between the root system and the top. If you lose part of the roots cut back the top correspondingly.

Thousands of raspberry, currant, and gooseberry bushes are looting on the job of producing fruit because they are not given an annual pruning to cut out the nonbearing wood.

Improved Uniform International

Sunday School Lesson

(By REV. F. B. FITZWATER, D. D., Member of Faculty, Moody Bible Institute of Chicago, 1891-1911, Western Newspaper Union.)

Lesson for July 5

THE GIFT OF THE HOLY SPIRIT

LESSON TEXT—Acts 1:4-14; 2:1-4. GOLDEN TEXT—But ye shall receive power, after that the Holy Ghost is come upon you; and ye shall be witnesses unto me both in Jerusalem, and in all Judea, and in Samaria, and unto the uttermost part of the earth. PRIMARY TOPIC—Jesus' Friends Carrying on His Work. JUNIOR TOPIC—Jesus' Friends Carrying on His Work. INTERMEDIATE AND SENIOR TOPIC—The Coming of New Power. YOUNG PEOPLE AND ADULT TOPIC—Empowered for a World Task.

1. The Holy Spirit Promised (Acts 1:4-8).

1. The disciples' question (v. 6). They said, "Lord, wilt thou at this time restore again the kingdom to Israel?" They were right in their expectation of the kingdom, for it had been covenanted to David (II Sam. 7:12-16), predicted by the prophets, and declared to be at hand by John the Baptist and Christ himself. However, they were in darkness as to the calling and establishing of the church.

2. Times and seasons in God's hands (v. 7). Christ turned their attention from the desire to know times and seasons, which belong alone to God, to their supreme duty. The Christian's supreme obligation is to preach repentance and remission of sins through the shed blood of Jesus Christ to all the world (Luke 24:46-49) in the power of the Holy Spirit (Acts 1:8).

3. The missionary program (v. 8). The Holy Spirit came to empower them to preach the gospel to the world. a. In Jerusalem. This witnessing was done by the twelve immediately following Pentecost.

b. In Judea and Samaria after the hands of wicked persecutors were laid upon them.

c. Unto the uttermost parts of the earth. Beginning with the first foreign missionary enterprise this work has been carried on with varying degrees of success till the present time.

II. The Holy Spirit Given (Acts 2:1-8).

1. The time of (v. 1). It was on the "Day of Pentecost." Pentecost means fifty. It meant, therefore, the feast that was held fifty days after the wave sheaf was offered (Lev. 23:15, 16). It was observed by presenting two loaves made of new wheat (Lev. 23:17). These loaves were baked with leaven while leaven was excluded from the Passover Feast (Lev. 23:6). The reason for this was that the Passover Feast typified Christ's sacrificial death, while Pentecost represented the Church, composed of Jews and Gentiles—the two loaves.

2. Upon whom the Spirit came (v. 1 Cf. 1:13-15). The twelve and others to the number of 120. The gift of the Spirit was not merely for the twelve but for all believers.

3. Marks of the Spirit (vv. 2-8). a. The sound of a mighty wind (v. 2). This suggests the all pervasive life-giving power of the Holy Spirit.

b. Tongues of flame (v. 3). Each of the 120 was crowned with such a tongue. "Tongues" show the practical purpose of the Spirit's gifts, and "fire" indicates his purifying energy.

c. Speaking in other tongues (v. 4, 8). Men of every nation heard the gospel in their own tongue.

III. The Holy Spirit Working (Acts 2:14-47).

1. Peter's sermon (vv. 14-40). This sermon is as wonderful as the gift of tongues. It demonstrates the presence and power of the Spirit, because Peter was a Galilean fisherman without literary training. His analysis is perfect. He begins with a brief defense and scriptural explanation of the phenomenon of tongues (vv. 14-21), and follows by a threefold argument proving the messiahship of Jesus. In his conclusion he appealed to them to repent and be baptized in the name of Jesus.

2. Three thousand converted (v. 24). Many people were convicted of their sins.

3. The abiding fellowship (vv. 42-47). The evidence that the Spirit had really come and that his work was real was that

a. The converts continued steadfastly in the apostles' doctrine (v. 42).

b. They continued in fellowship with the apostles (v. 42). The surest way to grow is to keep in fellowship with Christians.

c. In using the means of grace (v. 42). They continued in the breaking of bread. God has instituted ordinances in his house.

d. In prayer (v. 42). The apostolic church was a praying church.

e. In praising God (v. 47). The experience of the indwelling Spirit is ours in praise to God.

Everlasting Arms

Christ beareth me good company; he hath ensed me, when I saw it not, lifting the cross off my shoulders, so that I think it to be but a feather, because underneath are everlasting arms.—Samuel Rutherford.

Swords Into Plowshares

If swords are to be beaten into plowshares and spears into pruning-hooks, where must that work begin? It must begin in the individual heart.—J. H. Jowett

SICK HEADACHE From Constipation

Here is a purely vegetable medicine which has benefited thousands of men, women and children, and which you should try when troubled with constipation, indigestion, or biliousness. Mr. H. H. Rogillo, of Lake Charles, La., writes: "When I let myself get constipated, I feel dull and sluggish and all out of sorts, not equal to my work. When one has this feeling it is time to take something before he feels worse. I certainly have found Black-Draught quick to relieve. I used to have severe sick headaches and suffer a great deal. I found this came from constipation, and that Black-Draught would correct it. That is why I began using THEOPHOLD'S."

Black-Draught

Hopeless for Him

He—If you gave me only the least hope— She—I have given you the least hope I have given to any man.—Pete Mele, Paris.

When Bells Ache, Use CARBOL

Why take a chance with home-made poisons or expensive operations when Carboll quickly stops the pain and heals the head often overnight. Get Carboll from druggist. Instant relief. Good for stings, small burns, bites, sores, etc. Generous box 50c. Sparlock-Neal Co., Nashville, Tenn.

How Strange

"What's all this sewer pipe for? Another one of those miniature golf courses, I suppose." "No, ma'am, we are really going to lay sewer pipe here."—Pathfinder Magazine.

Run-down systems recover quickly with

GROVE'S TASTELESS TONIC

LAX-ANA DOUBLE STRENGTH

Small Quarters

Post—When I first started to write I lived a week on a can of sardines. Editor—Then you couldn't have had much to run around on!

And How!

The most critical book reviewer is the banker. He can tell in a minute whether your writing is any good or not.—Augusta Gazette.

Coin Nine-Tenths Pure

A gold twenty-dollar piece weighs 516 grains, of which nine-tenths is pure gold.

Who wants so much liberty in the land that it permits the other fellow to impose on you?

AFTER WEAKENING SICKNESS

If you are run-down, or suffer from a weakened condition,—take Cardui, a medicine used by women for over fifty years. As your health improves, you will share the enthusiasm of thousands of others who have praised Cardui for the benefits they have felt after taking it.

"I had a spell of sickness which left me very run-down and weak," writes Mrs. D. L. Becker, of Ellenton, Va. "I was not able to do my housework. I ached all over my body. My back and sides gave me a lot of trouble. A friend of mine told me to try Cardui. I took it for several months and I got strong and well." Sold at all good drug stores. 75c

Infant Son of Mr. and Mrs. J. M. Fahl Buried

Funeral services were held here last Thursday afternoon for William Robert Fahl, 10-months-old, from the residence of his parents, Mr. and Mrs. J. M. Fahl, with Rev. I. E. Griffith of the Church of Christ, officiating.

The baby died at a hospital in Del Rio last week where it had been carried for medical treatment. It had been ill about three weeks.

Surviving are the parents, two sisters, Mary Nell and Ruthy Ann, and one brother, Jimmy.

The bereaved family has the sympathy of the entire community in the loss of their little one.

THE STATE OF TEXAS

To the Sheriff or any Constable of Terrell County, Greeting:

You are hereby commanded to summon J. C. Turner, R. I. Turner, Mrs. Viola Walls, Tom Walls, R. J. Turner, Jr., Clara Bertha Cooper, Alfred Cooper, and Wesley (Dick) Green, whose residences are unknown, to appear at the next regular term of the District Court of Terrell County, Texas, to be held at the courthouse thereof, in the city of Sanderson, on the 2nd Monday in July, 1931, being the 13th day of July, 1931, then and there to answer a petition filed in the said court on the 13th day of June, 1931, the file number of which is 1865, in which suit, Levi Garrett Turner, J. M. Turner, Sarah Catherine Turner Wise and F. L. Wise are plaintiffs, and J. C. Turner, R. I. Turner, Mrs. Viola Walls, Tom Walls, R. J. Turner, Jr., Clara Bertha Cooper, Alfred Cooper and Wesley (Dick) Green, are defendants; the cause of action being alleged as follows: Suit for partition and distribution of the undivided one-half community interest inherited by said plaintiffs and defendants, as heirs of Sarah J. Turner, Deceased, in three hundred and fifty-three and fifty-one eighths acres out of the south two-thirds of Section 9, Block 151, E. L. & R. R. Ry. Co. Original Grantee, Certificate No. 1615, Abstract No. 268, Terrell County, Texas. You are commanded to so summon such defendants, and to serve this citation, by making publication of this citation once in each week for four consecutive weeks previous to the return day hereof, in some newspaper published in your county, but if there be no newspaper published in said county, then in any newspaper published in the nearest county where a newspaper is published.

Herein fail not, but have you before said Court, on the first day of the next term thereof, this Writ, with your return thereon, showing how you have executed the same.

Witness: F. L. Burnside, Clerk of the District Court of Terrell County, Texas.

Given under my hand and seal of said court in the city of Sanderson, this, the 13th day of June, 1931.

(SEAL) F. L. BURNSIDE,
Clerk of the District Court,
Terrell County, Texas.

Issued this, the 13th day of June, 1931.

F. L. BURNSIDE,
Clerk of the District Court,
Terrell County, Texas.

Mr. and Mrs. Clyde Griffith have as their guests this week his mother and father, Mr. and Mrs. J. D. Griffith of Charlotte, Texas.

Terrell County Oil Activities

By J. CALVIN STANSELL

It is reported that the Trans-Pecos Oil & Gas Company's test well, Jones No. 1, situated on section 18, Block G-15, G. C. & S. F. Ry. Co. survey, over in Brewster county, about twenty-five miles southwest of this city, is resuming its drilling campaign around the depth of 2,820 feet.

Reports from the Jones, et al, No. 1 Packerham, situated on section 43, Block B-2, C. C. S. D. & R. G. N. G. Ry. Co. survey, this county, shows that this well has reached a depth of 2,192 feet, having topped big lime at 1,690 feet. Several geologists have scouted this well this week and reports that they are of the opinion that this well will soon prove a commercial producer.

Mrs. Jessie McPhee is back again from the state of California and is now out in the field with her land man, Mr. Warden, consummating oil and gas deals.

Mr. Harry Nutter of Grand Falls, Texas, was here last week, and is contemplating drilling a few wells in this county for independent companies. Mr. Nutter has recently been drilling an oil well in the Grand Falls district, and reports that his project in that district is exceedingly favorable.

Reports from the Trans-Pecos Development's test well on section 6, Cert. 100, in Cedar Springs block, indicate that drilling operation are getting along fine.

Several men in the oil industry were here last week endeavoring to consummate an oil and gas lease on 20,000 acres of land in Block D-8, just a few miles over the line in Val Verde county.

It is reported that the O. O. Owens No. 1 Mills on section 128, Block 1, I. & G. N. Ry. Co. survey, a few miles east of the Pecos river, will soon resume drilling operations.

Several men in the oil business have recently been endeavoring to lease the Notley M. Scott ranch for oil and gas and sink another test well on this ranch. A couple of years ago the Sun Oil Company drilled a test well on this ranch which had several nice showings of gas at depths which are considered shallow at the present time. It is reported that this well also had a couple of showings of oil, as well.

Mr. M. E. Vargas of San Antonio is still prospecting in this district for Mr. Jay Lewis of 511 Central Trust Building of the Alamo City.

Mr. Greenburg, in company with several other men from Hollywood, Calif. is here now looking out after their interest in the Keck-Pecos trust.

Mr. Vargas has just returned from the country and reports finding a large deposit of mineral commonly called Antimony. He stated that this metal is valuable and is quoted every day on the New York market and is used as follows: valuable in the refining of gold silver, and copper; used in preparation of safety matches; percussion caps; manufacture of fireworks; as a bronzing solution for gun barrels. One of the compounds of Antimony is used in the manufacture of rubber goods and another kind in medicine, in dyeing and calico goods printing. Also, antimony is used in compounding all type metals and in the manufacture of babbitt.

Mr. Vargas was of the opinion that Terrell county will soon be looming in the limelight with many different branches of industry.
