VOLUME 24.

SANDERSON, TEXAS, FRIDAY, JULY 17, 1931.

NO. 19.

BESSIE SHARP TRIAL HERE MON.

HIGHWAY NO. 90 IN PECOS CO. TO BE IMPROVED AND HARD SURFACED IN NEAR FUTURE

\$41,000 State Aid Between Eastern Brewster And Fort Davis

TO COMMENCE SOON

Kinney County Voted On \$150,000 Bond Issue Last Saturday

The eleven mile strip on U. S. Highway No. 90 at the lower end of Pecos county is being made ready for black-topping, according to announcement given out this week by Highway officials. This news will be welcomed by many, as for years this stretch of road has been more or less in bad shape, especially during rainy weather.

The State is furnishing \$41,000 for work now under construction on Highway No. 3, from the eastern part of Brewster county, west to Fort Davis. Many dips will be eliminated along this route, new bridges will be installed and better drainage will be provided.

Last Saturday Kinney county, of which Bracketville is the county seat, passed a \$150,000 bond issue. This will be matched with Federal and State money for completing the pavement of U. S. Highway No. 90 in that county. When this project is completed there will be a paved road all the way from San Antonio into Del Rio.

Most all of the Highway No. 90 through Terrell county has black-topping and the balance is in good condition. In fact, the highway in our county cannot be beaten and roads are in excellent shape.

As soon as the improvements are completed on the Border Route, we should have much of the East-West tourist traffic, for our scenery cannot be beaten.

Mr. and Mrs. R. N. Allen and family have returned from a visit with relatives in Christoval. While away, Mrs. Allen went on to Temple for a medical examination. The many friends here of the Allens will be glad to learn that Mrs. Allen is getting along fine and that the doctors at Temple report that she is recovering splendidly from the goitre operation that she underwent several months ago.

Among those from here who attended the encampment of the Church of Christ which was held this past week at Christoval, were: Rev. and Mrs. R. E. Griffith and family, Mr. and Mrs. E. W. Hargraves and family, and Mrs. E. K. Halbert and sons.

Hon. Joseph Jones, district judge, is in the city this week from Del Rio, holding the regular term of court.

Watch for "It Happened In June."

Dr. C. L. Altfather, pastor of the Fort Stockton Presbyterian Church with Mrs. Altfather, visited Rev. and Mrs. John V. McCall last Tuesday. Dr. Altfather and Dr. McCall were boyhood friends in Weatherford, Texas.

Mr. and Mrs. W. H. Mansfield and family have been spending the past two months with Mr. and Mrs. Tip Frazier and family at their ranch. They returned to their home in Uvalde Tuesday.

Mrs. A. F. Newton and sons who have been visiting their son and brother, John L. Newton and family, have returned to their home in Valentine Monday.

Mrs. John Bell and children of Valentine are visiting relatives here.

Miss Ruby Fletcher of Valentine is visiting her sister, Mrs. Charlie Rogers, and her brother, H. E. Fletcher.

COMMISSIONERS COURT HOLDS MONTHLY MEETING MON.

The regular monthly meeting of the Commissioners court was held on Monday of this week. County Judge G. J. Henshaw and the following commissioners were in attendance: W. E. Sturman of Precinct No. 1, and Eugene Peoples from Dryden, Precinct No. 2.

There was not much business done by the court. At this time the quarterly report of the county treasurer Frank K. Harrell was approved. The application of the Texas Utility Company of McCamey for a franchise to run a power line through this county was deferred until the August term of court. The court at this time transferred from the Highway fund to the Road and Bridge fund \$4,000.00. They ordered that the county treasurer report be published, provided that it did not cost over \$12.

Salvation Army Representative Makes Canvas Here Monday

W. D. Pedigo, campaigner for the Salvation Army, made his annual canvas in Sanderson on Monday of this week under the supervision of the county committee which is composed of the following citizens: Al Craig, chairman, James Kerr and W. J. Ferguson. The sum of \$32 was raised.

Every year Mr. Pedigo makes a canvas of Sanderson as well as other towns in this section, soliciting funds to carry on the work of the Salvation Army. Every cent collected goes into the treasury for the work that is being done by the organization over the county.

Mr. Pedigo extends his sincere thanks for this sum which was donated by the various business firms and individuals of Sanderson, and which will be of great benefit during these trying times.

Mr. Pedigo stated that no other canvases would be made here this year.

Sanderson Mercantile Makes Repairs to Store

The Sanderson Mercantile Company, located on Oak Street, recently went to much trouble and expense in repairing and generally overhauling their store, which has been noticed by many citizens.

In addition to changing the outside front of the store, many new improvements have been added to the interior in the way of rearranged stocks and displays, which all will go to facilitate the turnout of customers, who are to be assured of better and quicker service in the future when trading at this store.

The finished store is a worthwhile addition to the downtown business district and the manager is to be commended for his efforts.

JOHN STOVELL LEFT THURS. FOR BROTHER FUNERAL

John Stovell accompanied by his son, Jack, left last Thursday for Wichita Falls, in response to a message received stating that his brother, Jim Stovell of Tulsa, Okla., had died.

Mr. Stovell, a salesman, is survived by his widow, Mrs. Vera Stovell of Tulsa, his parents, Mr. and Mrs. J. W. D. Stovell of Denver, Colo., and his brother, John Stovell of this city.

Burial was in Colorado Springs, Colo., last Saturday afternoon at 3:30 p.m.

D. H. Cunningham who ranches north of Dryden was a visitor in the city several days this week, having come in to serve on the grand jury.

While here Mr. Cunningham had us to mark his paper up for another year, for which he has our thanks.

Regular Term of District Court In Session This Week

Terrell County Grand Jury Returns Many Indictments

FULL TIME TO BE USED

Jury Makes Quick Work In Disposing Of Many Cases

The regular term of District Court convened here Monday morning for a two week's session. The following men were impaneled on the grand jury: W. J. Banner, foreman, D. O. Bosworth, Chas. Chandler, J. M. Corder, D. H. Cunningham, R. L. Doak, Tip Frazier, R. M. Gatlin, M. R. Lattimore, Tol Murrah, Tom Parsons, and B. C. Farley.

Indictment Returned

The following indictments were returned by the grand jury: Ivey Rankin Bostick, theft; Harry Henry Hopmeyer, arson; also burglary of railroad car; Bessie Sharp, murder; John Martin, 2 indictments, theft of cattle and altering and defacing of brands and theft of cattle; Claude Elliot, theft; Harry Henry Hopmeyer and Claude Elliot, robbery with firearms; Harry Henry Hopmeyer and Claude Elliot, theft.

As yet Willie Burleson, charged with murder in connection with the death of W. Telefus Sharp has not been indicted.

At Wednesday noon the jury recessed until Saturday so that several witnesses from out of the county might be summoned here in connection with a case that is under investigation. The grand jury has been very thorough in its work and at least one more indictment may be returned before its final adjournment.

Civil Cases Heard

The following civil case which were on the docket have been disposed of: H. C. Goldwire vs Lee McCue et al, injunction dismissed by agreement at plaintiff cost; O. W. Adams vs Ben H. Brown, suit to collect commission on debt, dismissed by agreement at cost of defendant; Jesus Martinez vs Angelita Bustamante, suit for divorce, marriage relations annulled as void on account of bigamy of defendant; F. L. Howard vs Trans-Pecos Development Co., application for receivership, dismissed on motion of plaintiff; A. G. McGalin vs. C. C. Julian, et al., partition and injunction, petition and bonds for removal to Federal court at Del Rio approved and entered; Gulf States Life Insurance Co. vs. J. M. Corder, suit on notes, judgment by default for plaintiff against defendant; Seth Breeding vs. Edna Morris Breeding, divorce granted.

The following civil cases were continued for service: Mrs. Nellie Davis vs. Ben F. Davis, divorce; Iva Chandler Nutt vs. Happle E. Nutt, divorce.

Hearing on criminal cases started Thursday and at this time the petit jury reported. The following criminal cases were disposed of: L. W. Loeper, swindling, six indictments, continued for arrest; Clint Roberts, forgery of deed, continued for arrest; Manuel Nieto, bigamy, continued by State; Jesus Flores, child abandonment, dismissed on motion of State for reasons on file; Rex Tumlinson, sale of intoxicating liquors, dismissed on motion of State for reasons on file; Everett Miller, sale of intoxicating liquors, continued by agreement on application of State.

Thursday morning the jury returned a 2-year sentence against Ivey Rankin Bostick for theft of an automobile from Seth Breeding. In the afternoon session the case of Claude E. Elliott and Henry Hopmeyer, for robbery by use of fire-

Arrested by State; Jesus Flores, child abandonment, dismissed on motion of State for reasons on file; Rex Tumlinson, sale of intoxicating liquors, dismissed on motion of State for reasons on file; Everett Miller, sale of intoxicating liquors, continued by agreement on application of State.

Thursday morning the jury returned a 2-year sentence against Ivey Rankin Bostick for theft of an automobile from Seth Breeding. In the afternoon session the case of Claude E. Elliott and Henry Hopmeyer, for robbery by use of fire-

Borderway Assn. Votes To Raise \$3,000.00 Fund

Highway Workers See Tourist Traffic Increase

TO ADVERTISE

Uvalde Fights In Effort To Name C. B. Spangler As President

Re-election of Clay Holland, Alpine, as president following a contest wherein a delegation from Uvalde struggled in vain to place C. B. Spangler into the chair, featured the annual convention here Saturday of Highway No. 90 Association at Hotel Rowell.

When nominations were declared open the Uvalde delegation began to marshal strength to put Spangler into the office to succeed Holland after the Alpine man had been nominated for re-election. But when the final ballot was counted, Holland stayed in by a 15 to 12 margin and Spangler was voted into the vice presidency by floor acclaim.

A. F. Robinson was re-elected secretary of the organization for another year. H. L. Burney was named second vice-president and E. K. Fawcett was named a director to complete the executive roster.

Assessments to total \$2,500 are to be collected from all towns and cities along Highway No. 90 between San Antonio and El Paso for advancement of work the association has in view, it was determined. This money is to be expended in efforts to bring motor tourists down to the Borderway route.

Sign Boards Down

A cash balance of \$317.21 was announced on hand by Secretary-Treasurer Robinson, who listed expenditures of the past year which included erection of several sign boards; which had been blown down, and distribution of advertising literature over a stretch 1,500 miles west of El Paso.

All present expressed enthusiasm over possibilities Highway No. 90 possessed as a drawing card for tourists and were agreed that soon as the financial panic lifts and normal tourist travel is resumed that the "Borderway" will receive an abundance of travel.

It was brought out that between Del Rio and El Paso there were many stretches of the highway in need of repairs and hope was expressed that the ensuing year would see these irregularities removed.

Uvalde was anxious to land Spangler into the presidency due to his friendly connections with the State Highway Department at Austin and due, also, to the fact that Uvalde County has underway a project for five new bridges which will represent a financial layout of some \$500,000, if successfully consummated.

West End Projects

Decision was reached, however, that the west end of the highway has pending some work which incumbents, only, are competent to carry out this year and as a result Holland kept the chair for another year.

Those attending included: Clay Holland, president; A. F. Robinson, secretary; A. C. Easterling and F. L. Childs, Del Rio; P. T. Kincaid, and Andrew F. Smyth, Uvalde; C. B. Spangler, Uvalde; Felix McGaughey, Alpine; E. K. Fawcett, Del Rio; Virgil Deaton, Bracketville; J. F. Provine, Van Horn; E. B. McClintock, El Paso; Marvin Hunter, Jr., Fort Davis; W. J. Dees and W. E. Neill, Van Horn; F. W. Miller, Uvalde; J. T. Moore, Jr., Uvalde; J. Humphre, Marfa; Hal A. Hamilton, Carrizo Springs; H. Lay, Uvalde; Burch Carson, Van Horn; W. A. Yarbrough, Valentine; H. M. Waldrop, Sabinal; D. W. Price, Uvalde, and John F. Robinson, Marfa.—Del Rio Evening News.

Returned Here From San Antonio Last Saturday Night By Sheriff Lee Cook

NO INDICTMENT MADE AGAINST BURLESON

Defense For Mrs. Sharp May Enter A Plea Of Insanity

Mrs. Bessie Sharp, young mother of this county, was indicted on Tuesday by the grand jury for the murder of her husband, W. Telefus Sharp, Big Canyon ranch hand and son of Mr. and Mrs. Harry Sharp of this city.

The case was set for trial Monday and upon request of District Attorney Julian LaCrosse, a special venire of 100 jurors were ordered to be summoned, consisting of 36 regular panel and 64 talesmen.

SPRING WOOL CLIP OF 750,000 POUNDS IS DISPOSED OF

The Sanderson Wool Commission Company has disposed of its entire accumulation of spring wool which amounts to 750,000 pounds.

D. E. Hughes of San Angelo, representing Studley and Emery of Boston purchased 100,000 pounds of long wool, paying 17 to 18 cents per pound. Walter Marston of Brown and Howe of Boston bought 50,000 pounds at 17 and 17½ cents a pound.

Six hundred thousand pounds of 6- and 12-month clip was shipped to the National Wool Marketing Corporation. An advance of 10 to 15 cents per pounds was made.

REV. HARRISON TO HOLD 10-DAY MEET IN RODEO, N. M.

Rev. Ira Harrison, local Baptist pastor, will leave Saturday morning for Rodeo, N. M., where he will conduct a 10-day revival meeting. There will be no services at the Sanderson Baptist Church for Sunday, July 26, but next Sunday's services will probably be conducted by some minister to be secured by Rev. Harrison. Since the pastor will be absent for about two weeks, the members of the local church will be given an opportunity to visit other denominations.

Mrs. J. B. McPhee of Los Angeles, Calif., who has been in the vicinity of Dryden for the past month making of an oil test, returned Thursday of any oil test, returned Thursday from a business trip to Fort Worth.

Mrs. C. P. Peavey and baby have returned from a visit in Marfa with her parents, Mr. and Mrs. Ben Pruett.

Hon. Walter Jones of the law firm of Jones and Lyles, spent several days in the city this week attending district court.

Mr. and Mrs. Ed M. Reeves returned to their home in El Paso last Saturday following a week's visit here with her sister, Mrs. E. P. Halley and family.

Judge and Mrs. James Cornell of San Angelo spent several days in the city this week. Judge Cornell had several cases in district court here.

Miss Gertie Dreyfuss of Chicago, Ill., arrived last Saturday to visit Mr. and Mrs. P. J. Holman.

Mrs. Edith Bond of Sonora came in Sunday to visit her sister, Mrs. Fannie Duncan at the Prosser and Brown ranch.

Mrs. S. C. Dial of Menard is visiting her daughter here, Mrs. John O'Dell.

Mr. and Mrs. H. D. Booth and son of El Paso, spent the week-end with Mr. and Mrs. B. C. Farley.

Mr. and Mrs. G. Mussey have as their guests her sister and husband, Mr. and Mrs. R. Fishback, of Llano.

Watch for "It Happened In June."

To Be Many Witnesses

In a cool, calm and very bold manner, Mrs. Sharp related to the officers on the night of Thursday, May 7, how she administered the deadly potion of strychnine sulphate to her husband, stating as her reason for so doing was so that she might be free to marry Willie Burleson, 23, her clandestine lover. Since her confinement in jail she has showed no remorse for the horrible crime she committed.

Insanity May Be Plea

When Mrs. Sharp comes to trial Monday the sanity test angle may be introduced in connection with her defense. She has been under observation at the Southwestern State Asylum at San Antonio, for the past two weeks, only being returned here last Saturday night. The result of this observation will have a great bearing on the case.

Mrs. Sharp is being defended by Judge R. F. Spencer and C. S. Slatton of San Antonio. Judge James Cornell, San Angelo, has been retained as special prosecutor in the case and will represent the State along with Julian LaCrosse, district attorney.

DR. A. L. MOORE SPEAKS AT FIRST METHODIST SUN.

Dr. A. L. Moore, Ph. D. of El Paso, who preached at both the morning and evening hours last Sunday at the First Methodist Church, delivered two forceful sermons, using the text in the morning, "Righteousness Exaltheeth A Nation", and the subject, "The Unashamed Servant", at the evening hour.

Dr. Moore in the morning quoting from world leaders on present economic conditions, summed them up in words of Roger Babson, "Godlessness."

While we have the crime wave and hear much of present immorality, the sin that is gnawing at the vitals of America today is "Leaving God Out Of Human Life"—"Godlessness!"

He dealt at length on the universal sin of indifference—indifference to the church and its program, to God's laws, such as the law of the Sabbath observance, and then came to the remedy.

The present chaos has come about in a gradual manner in exact accord as we have left God out of our lives and we become indifferent to the moving of the life of the Church of God, and we must again take up where we left off, again going to the secret closet of prayer again to consecrate and dedicate ourselves upon the altar of sacrifice, and put Christ first in our lives, and this will always be manifested by an active life in the Church.

Dr. Moore had every official of the church present and he spoke of the great visible results this Conference year of their loyalty, and sacrifices.

Dr. Moore left on the early Monday morning train for El Paso.

Miss Miriam Carpenter, accompanied by her father, G. W. Carpenter, left Wednesday afternoon on a business trip to San Antonio.

Mrs. W. H. Cobb and daughter have returned to their home in Waco following a visit here with her parents, Mr. and Mrs. B. C. Farley.

California Cities to Get Cheap Water From Colorado River

Tremendous momentum has been given the project by the United States Supreme court action in dismissing Arizona's suit against Boulder dam, a structure of vital importance to the realization of the aqueduct plan. Already the government has obligated itself to the extent of \$49,000,000 on the giant structure. Already steam shovels and pneumatic drills and blasting operations are disturbing the primitive quiet of Boulder canyon, along the rushing Colorado. It has been estimated that it will cost the average taxpayer less than one cent a day to buy the world's largest aqueduct. It will be 266 miles long and will cost \$200,000,000. It will take six to eight years to build. The aqueduct will carry water from Parker's intake on the Colorado river some 266 miles across deserts and mountains to the

MAN's eternal conflict with the desert is soon to have another episode, one which will be enacted in Southern California by Los Angeles and 13 other cities which make up the metropolitan water district. These towns—Anaheim, Beverly Hills, Burbank, Colton, Fullerton, Glendale, Long Beach, Pasadena, San Bernardino, San Marino, Santa Ana, Santa Monica, Los Angeles and Torrance—have joined forces in the metropolitan water district of Southern California, a special governmental unit created by the state legislature for the purpose of solving the region's acute water problem by building a huge aqueduct from the Colorado river.

14 cities in the Southern California coastal plain. Our illustration shows an artist's conception of what the completed Boulder—or rather Hoover—dam will look like, the work of man being sketched to scale on a photograph of the thousand-foot canyon walls between which the Colorado river rushes. In the foreground and on the face of the cliff are hydro-electric plants which will generate millions of horse power. Behind the dam will be impounded 30,500,000 acre feet of water in a lake 110 miles long. A portion of this great inland sea will reach the 14 cities of Southern California through the metropolitan aqueduct.

Technical Boss of the 1932 Olympic Sports

Appointment of William M. Henry of Los Angeles as sports-technical director of the 1932 Olympic games, one of the most important posts in the managing personnel of the international games, is announced in Los Angeles by the Olympic organizing committee. This department, under Mr. Henry, will take care of all the precise technical preparations for the fifteen sports in the games in consonance with the international federations governing those sports. It will also have charge of stadiums, auditoriums, water courses and other places where the sports competitions will be held.

leaving it where everybody could see it. There wasn't one of those traps hidden so that he couldn't find it and pull it out without getting caught in it."

Buster chuckled. "Didn't I tell you that Glutton is smart?" said he. "I'd like to have seen that trapper when he came around the next time."

"I did," replied Honker.

Quick on the Trigger

Some writers of the old West state that James Butler Hickok, better known as Wild Bill Hickok, was the fastest gunman known. He held various offices and was at one time pony express rider with Buffalo Bill. He was also a scout and spy in the Union army. Hickok was shot and killed in a saloon in Deadwood, S. D., on August 2, 1876, by Jack McCall. He was only thirty-nine years of age at the time.

Amusement in the Air

In the early 1800's, a large captive balloon was one of the sights of Hantsburgh, England. From this aerostat was suspended a square platform, whereupon various entertainments, among which displays by noted boxers were not the least popular, were wont to take place.

"Women aren't satisfied with everything money can buy nowadays," says Knowing Nora. "They want everything credit can buy."

Machines That Are Almost Human

By E. C. TAYLOR

The Magic Mariner

FRIETHLOF's mythical ship, as described in an Icelandic saga, that sailed the seas without a human being aboard, may have been a vision of the future.

For scientists have reproduced the vessel that could sail from port to port at the will of man, and without a human being to steer it on its course, or take it past the rocky reef into safe harbor.

On September 20, 1927, the steamship Pulpit Point reached Auckland, New Zealand, after a run of 21 days from San Francisco, during which no human hand had touched the steering gear. There were cobwebs on the wheel when the vessel reached the harbor at Auckland.

There the robot that had held the ship true to her compass course across the Pacific ocean day and night for three weeks turned the helm over to an Auckland pilot.

The robot was "Metal Mike," the invention of the late Elmer Sperry, who also invented the gyroscope and the Lindbergh beacon now mounted 500 feet above downtown Chicago to direct flyers safely to their airport and that can be seen in Milwaukee, Wis., 90 miles away.

"Metal Mike" had a gyroscope for a heart and brain, and devices attached to it kept the Pulpit Point straight on an unseen path over thousands of miles of sea. The robot can steer a ship with greater precision than could be achieved by the most expert human pilot. It always knows the true north, and its hands never leave the wheel for an instant.

While the voyage of the Pulpit Point was awe-inspiring, it was only an indication of what the future holds in store. Scientists and engineers since that memorable trip here demonstrated that ships can be sailed without a single human being aboard, that trains can be run in the same way, and that fleets of airplanes could be sent to bomb cities in the wars of the future, all flown by robots and directed by radio.

Demonstrations with small working models have shown that ships or trains can be maneuvered entirely by robots. Recent stunts put on by scientists to prove the value of their brain children included the operation of ships and trains entirely by robots, that responded to instructions voiced over the radio.

The ship and train models were controlled absolutely by spoken commands. They stopped at the word "Stop." They backed up when told to "Back up." They started forward again when told to "Get along there." Vibrations of the human voice through a microphone were received aboard the ship and train models on radio receiving sets, and started machines that operated the models.

Robots will make travel at sea much safer for future generations, scientists are sure. After each great sea disaster of recent years, new devices for safety have been invented, and many of them are now in use.

The new submarines of the United States navy have devices that signal to the surface if anything goes wrong and the vessel is trapped under the waves. Other devices permit the submarine crew to rise safely to the surface, and still others aid in salvaging a sunken submarine.

One of the newest inventions being adopted by passenger-carrying ship lines is that of an automatic radio receiver that will pick up S O S calls without requiring a radio operator to be constantly on guard, and broadcast them throughout the ship.

A robot that will bring help to shipwrecked people in life boats is being added to the equipment of many ocean liners. This robot is a small radio transmitter with a hand-operated dynamo to supply the power. As the crank of the dynamo is turned, it automatically sends out a series of S O S calls to be picked up by any passing ship. It can be operated by anyone without radio experience, and will continue to call for help as long as the dynamo crank is turned.

Not Work of One Author

"The Arabian Nights' Entertainment" is merely a collection of ancient Oriental tales which were first collected in their present form about the middle of the Fifteenth century, probably in Cairo. The true origin and authorship of the various stories have been lost. Antoine Galland translated them into French between 1704 and 1708 and through his work the Arabian Nights were introduced to Europeans. Among Mohammedans the Arabian Nights are not regarded as belonging to polite literature and those who read them are open to the charge of having a depraved taste.—Pathfinder Magazine.

Wolverine's Fur Valuable

Wolverine is listed as the most durable of long-haired furs and it is fairly expensive. The under-wool is full and thick, with strong bright top hair. The color is a rich brown, the center being an oval dark saddle edged with a pale tone, becoming darker toward the flanks. The darkest and least coarse are the most valuable. This animal, known also as the caracajou or glutton, is found in the northern parts of this country and Canada, also in Russia, Siberia and Scandinavia. The description is taken from Gottlieb's "Fur Truths."

If Costive, TRY THIS

Men and women whose work keeps them indoors, without sufficient exercise, often find it difficult to keep the bowels regular. Theodor's Black Draught, (purely vegetable), taken at bedtime or a pinch after meals, has helped thousands. "I have found Theodor's Black Draught of great benefit to my health," writes Mr. D. H. Reed, of Princeton, W. Va. "For several years, my occupation has not given the exercise my body required. I have suffered consequently from constipation, headache and biliousness. I have found that Black Draught helps to keep my system well regulated. I have frequently recommended it because I feel the medicine has really done me good."

AUTO OWNERS!
Housekeepers! Keep all metal shining. A polishing cloth will do this, without soap, powder, etc. Makes no noise. Absolutely harmless to hands or metal. Write for yourself Sample 2c, 10c, 25c. The Polishing Cloth Co., 215 E. 12th St., Detroit, Michigan.

Worms expelled promptly from the human system with Dr. Peery's Vermifuge. "Dead Shot for WORMS" Vermifuge. All Druggists.

Birds Pay Tribute to Singer's Golden Voice

Ninon Vallin, the French operatic star, is a woman St. Francis, one of her most regular and devoted audiences consisting of hundreds of small birds which come flying to the window of her home in France as soon as she starts singing. They stay perched on the window-sills and even on the piano until she stops. "I have always adored birds," she explained, in very broken English, to a reporter. "When I was little I had a lot of them in cages, but my father hated to see them in captivity. So he let them out in the garden, but instead of flying away, they stayed and used to swarm round me whenever I started to sing." Asked how she first started her career, Madame Vallin replied smilingly, "In church. Some influential people had heard my voice in church, and insisted on my trying first in Lyons, then in Paris, with the result that after singing at a charity performance in La Cote heard me and immediately booked me for a huge tour in South America. Since then," she added laughing, "I have never stopped singing."

IVY POISONING

HANFORD'S Balsam of Myrrh. Thickly Settled Districts. Rhode Island leads in density of population with 666.4 persons to the square mile, Massachusetts is second. No state compares in density of population with the District of Columbia, with 7,292.9 persons to the square mile.

Graham Gems.

To one cupful of sifted graham flour add one cupful of sour milk, one beaten egg, half a teaspoonful of salt, one teaspoonful of soda, two tablespoonfuls of sugar and three tablespoonfuls of shortening. Bake in gem pans.

Coffee Cake.

Warm three-fourths of a cupful of shortening, beat three eggs, stir in half a cupful of sugar and a cupful of raisins, mix all with the shortening and add to five cupfuls of light bread sponge. Mix well, add flour and

BEDTIME STORY FOR CHILDREN

By THORNTON W. BURGESS

A Wolverine is very smart. A fact which no one can deny. A pity 'tis his nimble wits. In better ways he does not try.

WHAT GLUTTON DID

IT IS always a pity when nimble wits are used in wrong ways. But they often are. It is so with Glutton the Wolverine, and it is a lucky thing for the little people of the Green Meadows and the Green Forest that he lives only in the Great Woods of the Far North. Otherwise they would have far more troubles than they do

"A little while before I left my summer home in the Far North one of those trapper-men came to live on the shore of the lake where I lived and built a queer little house there. He made it out of logs and put a roof of bark on it. When he had finished that he took a lot of traps in his canoe all around the shore of that lake and back in the woods and along the brooks that flowed into the lake. He had ever and ever so many traps, and it took him days and days to set all of them. I could see him when he was at work close to the shore of the lake, but I never could find any of the traps after he had set them, though I went straight over to the places where he had been at work just as soon as he had left. Sometimes I found the food he had left there to tempt the little people for whom he had set the traps, but I never could see the traps themselves. He was very smart, was that trapper.

"Of course, I told everybody whom I met, but you see, I sleep at night, so I didn't see many. Every once in a while that trapper would go all around to look at his traps and kill the poor little people who were caught, if they were not already dead. Then he would set the traps again and put more food there. It was dreadful."

"Traps always are dreadful," growled Buster.

"One morning I happened to look over to the shore, and there was Glutton the Wolverine. I swam over to tell him about those traps, but he just laughed at me.

"You can't tell me anything about them," said he in that ugly way of his. "I know more about them than you'll ever learn." Guess he did, too, for what do you think he was doing?"

"What?" cried Peter Rabbit, who was listening with all his might.

"He was following that trapper all around, eating up the food at each trap and then, pulling up the trap.

now, and goodness knows they have enough as it is.

As Buster Bear said, Glutton is very smart, and Buster's eyes twinkled as he prepared to listen to what Honker the Goose had to tell him about Glutton. You know Honker had stopped just for the night in the Pond of Paddy Beaver, deep in the Green Forest, and was full of news from the Far North, from which he had just come.

"You know those trappers who are forever trying to catch you people who wear fur coats," began Honker.

"I should say I do!" growled Buster Bear in his deep grumbly-rumbly voice. "I never could understand why these men folks can't be content with their own coats instead of trying to steal ours."

Honker chuckled. "I've always said

"Trappers Are Forever Trying to Catch You Who Wear Fur Coats."

that a coat of feathers was better than a coat of fur. They never try to trap me."

"No, but they try to shoot you to eat, and that is just as bad," growled Buster.

Honker stopped chuckling. "That's true," he admitted. "I've been wondering if it is quite safe for me here."

"Perfectly safe, for tonight anyway," growled Buster. "Now what was it you saw Glutton do?"

"Well," began Honker once more

French Send Silver Plane to President

MADE entirely of silver, this model of the transatlantic plane "Question Mark" is offered to President Hoover by the French flyers, Dieudonne Coste and Maurice Bellonte, as a mark of their appreciation for the cordial reception given them on their tour of the United States. The model was brought to Washington from Paris by the American mayors who have just concluded a tour of France.

stir until as thick as the spoon will mix. Set into a pan to rise and when light spread in shallow pans. Cover with soft butter, sprinkle with sugar and cinnamon well mixed and set to rise. Bake when light.

Simple Dessert.

Place a layer of shredded pineapple or any good flavored fruit in a glass dish, cover with cake or cookie crumbs, add more fruit and finish to top with crumbs. Over all heap whipped cream sweetened and flavored. Serve cold.

Red and White Stripes

This new and attractive frock is of bright red chiffon with encrusted stripes of white chiffon. The jacket is of matching Lyons velvet lined throughout with white peau de sole to make it crisp.

News Review of Current Events the World Over

Hoover Moratorium Plan, With French Modifications, in Effect—Great Britain Calls Conference to Work Out Details.

By EDWARD W. PICKARD

Julius Curtius

MUTUAL concessions by the United States and France, obtained by clever negotiation, resulted in the acceptance of the Hoover moratorium plan in principle by the French government. All other important nations already had accepted, so President Hoover announced that the plan might be considered as in effect as of date of July 1.

Briefly summarized, the agreement provides that debtor governments shall be relieved of payments due between July 1, 1931, and July 1, 1932, aggregating approximately 800 millions of dollars. Germany will be relieved of reparations payments to the former allied and associated governments totaling nearly 400 millions of dollars.

Great Britain, France, Italy, Belgium, and other debtors will be relieved of war debt payments approximately 400 millions.

The greatest sacrifice will be made by the United States, which will forego war debt receipts totaling 200 millions.

Beginning July 1, 1933, the deferred reparations and war debt payments will be paid in installments during a ten-year period, in addition to the regular current payments.

Payment by Germany of conditional reparations totaling 243 millions will be unreservedly suspended. Germany will be required, however, to pay the unconditional reparations, amounting to \$130,000,000, with the understanding that this amount in full will be loaned back to Germany.

A loan of about 25 millions will be made to Central European countries if necessary by the federal reserve banks of the United States and European central banks.

The accord reached was entirely satisfactory to both the Americans and the French. President Hoover gained his chief point, the gist of the whole plan, for Germany does not have to pay any international debts for one year. The French statesmen congratulate themselves because the accord calls for the moral support of the signatories in getting a private loan for France's central European friends, and lays upon Germany moral responsibility for not using her moratorium saving for armaments.

Foreign Secretary Julius Curtius and Chancellor Brüning of Germany, of course, are pleased beyond expression, and the former paid warm tribute to the work accomplished in Paris by Secretary Mellon. The German press, however, professes to be disgusted with the compromise, several influential papers declaring that it wrecks the plan entirely.

In concluding his announcement of the agreement, President Hoover touched on the question of world disarmament, which he considers the second feature of his program for restoring economic prosperity.

HAVING ably seconded Mr. Hoover's effort to bring about the moratorium, the British government called a conference of the powers to work out the details of the plan. The premiers and foreign ministers are to meet in London, and it is expected Secretary Stimson will participate as an official observer when he reaches England.

This conference will meet from time to time for several months, it is understood, and may continue to function for several years. Before this body, toward the end of the one year Hoover moratorium, will come the question of the capacity of Germany to continue paying the Young plan reparations, the question of extending the Hoover debt holiday another year, and the question of revising reparations and war debts downward.

VICE PRESIDENT

Curtis came out in the open in earnest opposition to the policies of the federal farm board, and, in company with Senator Arthur Capper of Kansas, went before Chairman Stone and Carl Williams of the board to urge that it change its stand concerning its wheat holdings. The two Kansans argued for hours that this wheat should not be put on the market until the price reached 85 cents, but Mr. Stone refused to make any such pledge. He did state, however, that the board would not offer any of its wheat at the present low prices. But he made it plain that the board would abide by its policy enunciated July 1, which was that it would feel free to sell up to a cumulative maximum of five million bushels a month for the next year.

Mr. Curtis' activity in the contro-

versy over the board's wheat holdings has been interpreted as indicating a desire on his part to avoid nomination for the vice presidency and to run for the Kansas senatorship which he formerly held. When asked about his political plans, he replied "They'll not get anything out of me for at least three months."

Senator Watson of Indiana, Republican leader of the senate, also has been trying to influence the farm board, arguing for 92 cents, which is said to be the average price paid by the stabilization corporation for its wheat, as the figure below which the board should not sell. Senator William E. Borah, insurgent Republican of Idaho and chairman of the agricultural committee named at the "progressive conference" last March, has insisted that the board defer all sales until wheat goes to \$1.25.

SECRETARY OF STATE STIMSON is having a pleasanter time on his European vacation than has fallen to the lot of Secretary of the Treasury Mellon. Starting too late to get mixed up in the moratorium negotiations, Mr. Stimson arrived at Naples Tuesday on the steamship Conte Grande, accompanied by Mrs. Stimson. He was met by Ambassador Garrett, and, following a visit to Pompeii and Herculaneum, went to Rome by automobile. Thursday evening he called on Premier Mussolini at the Palazzo Venezia and later met him at a dinner given by the American embassy. In Mr. Stimson's honor the ruins of the ancient Roman Forum, just beyond the Capitoline hill, were brilliantly lighted up at night.

The secretary's European vacation will last two months and he will devote considerable time to an investigation of conditions on the continent.

Dr. J. I. France

DR. JOSEPH I. France, for a United States senator from Maryland, evidently is in doubly earnest when recently he announced that he was a candidate for the Republican nomination for the Presidency in 1932. Already he has started on his summer campaign, and his many friends are helping to the extent of their powers. The doings began with a public meeting at Mount Ararat farms, the doctor's country estate in Cecil county, Maryland. Very soon, it is expected, he will make a tour through the grain states of the West.

Assisting France in getting his campaign under way are Jonathan Bourne, former senator from Oregon and head of the Republican publicity bureau during the Wilson administration, and Lyle Rader, who is described as "a prominent New York chemist and Bible speaker."

Doctor France says that on his trip in the West he will give his reasons for seeking the Presidential nomination and will discuss "the grave world crisis and its remedy through the application of the principle of righteousness to economic, social and international problems."

BEFORE the convention of the Great Lakes-Hudson Waterways association in Albany, N. Y., Senator Copeland and Representative Hamilton Fish of the Empire state and various others attacked the proposed St. Lawrence ship canal and urged that congress begin as soon as possible the construction of all-American waterways, from the Great Lakes to the Atlantic seaboard by way of the Mohawk valley and the Hudson, as a means to relieve unemployment.

It was declared by the speakers that the St. Lawrence canal was considered only because the farmers of the Middle West wanted it for an outlet for their surplus grain, and Mr. Fish said the Russian wheat situation "now makes the building of a ship canal through Canada a fantastic myth."

THOUGH it is understood in Rome that Pope Pius and Premier Mussolini have both decided to avoid any precipitate action in their controversy, they continue to hammer at each other with encyclicals and newspaper articles. The pope steadily maintains that the church is suffering persecution at the hands of the Fascist rulers of Italy, but for the present at least he will not consider the withdrawal of the papal nuncio to Rome, Mgr. Borgoncini-Duca. The nuncio, for his part, has been doing all he could to bring about a peaceful settlement of the quarrel.

The pope's latest encyclical dealt severely with the Fascist position on the education of youth, and was

characterized by the Italian press as a return to the medieval conceptions about the respective authority of the church and state. Copies of the document were not only distributed in the churches of Rome, but also were sent out of the country by special couriers—which action drew Fascist ridicule.

MAYBE there will be another war in South America before long. Dispatches from Asuncion, Paraguay, said that Senor Guachalla, minister from Bolivia, sent a note to the foreign office declaring he had been ordered by his government to suspend diplomatic relations between the two nations. The Paraguayan government replied with the announcement that it had ordered its minister to Bolivia to return home. Don't ask what it's all about.

Peru has been having a little war of its own—government versus revolutionists. The other day the rebels were defeated at Huambatio and the city of Cuzco, their headquarters, was taken. The revolutionists fled to the jungle, and probably little more will be heard of them.

Bishop Valencia

MEXICO'S quarrel with the Church of Rome is now centered in the state of Vera Cruz and the prospects of a peaceful settlement are growing more and more remote. In protest against the recently enacted law of the state limiting the number of priests, Rt. Rev. Rafael Guizar Valencia, bishop of Vera Cruz, has instructed all Catholics of the state to abstain from attending dances, theaters and other festivities until the conflict between the church and government is ended. The bishop also has instructed his priests to keep their churches open, even if the state forbids services conducted by priests.

JOSEF STALIN has made public the new policy of Soviet Russia in dealing with the bourgeoisie and the kulaks of well-to-do farmers. These classes, hitherto suppressed, persecuted and exiled, are now to be conciliated to an extent if they will consent to co-operate with labor and the Soviet regime. The rulers of Russia have discovered that the brains and skill of the old order are needed to meet the growing demands of agricultural and industrial development.

As part of the new order of things Stalin also presented a program entailing radical changes in the government's policy toward labor and industry to insure the success of the five-year plan.

JOHN D. ROCKEFELLER celebrated his ninety-second birthday quietly at his home in Tarrytown, N. Y. The only event of the day was a family dinner attended by Mr. and Mrs. John D. Rockefeller, Jr., their married daughter, Abbie, and her husband, David Milton, together with four other Rockefeller children. To the press Mr. Rockefeller said: "These occasions offer me a very welcome opportunity: first, to express my gratitude to the many, many friends who not only at this time but throughout the year have shown their kindly regard for me; and second, to wish them and theirs and all the world a large measure of health and contentment, which are the basis of real happiness."

BILLY BURKE

Greenwich, Conn., professional golfer whose real name is Burkowski—he is a Pole—is the new open golf champion of the United States, wearing the crown which Bobby Jones laid aside. In the tournament on the Inverness course at Toledo, Burke and George von Elm of Detroit tied for first place with cards of 292. Next day they undertook to play off the tie at 36 holes, and again tied. So on Monday the second play-off was staged and Burke won by a margin of one stroke, finishing the longest tourney in golf history. Burke had a total of 580 strokes for the 144 holes played in the five days of their battle, and Von Elm had 590. This was slightly over an average of 4 for each hole.

THOUGH Max Schmeling of Germany won a clean-cut victory over Willie Stribling in their battle in Cleveland, defending his heavyweight title, he is still out of favor with the New York state boxing commission. Chairman J. A. Farley of that body is quoted as saying: "Schmeling will never meet another boxer in New York as long as he refuses to meet Jack Sharkey again." The New York commission gave Schmeling the title when Sharkey fouled him but, according to Farley, it does not consider him the champion.

NOTABLE among the deaths of the week was that of John Brisben Walker in Brooklyn. For many years he was often in the public eye as a soldier, business man, writer and editor and crusader for world peace. The duke of Aosta, cousin of the king of Italy, also passed away, to the great sorrow of the Italian people. He won considerable fame in the World war.

Mary's Bright Career Finally Ended

By RUBY GRUBER

(By McClure Newspaper Syndicate) (WNU Service.)

MARY HAYNES sat before the large mirror of her dressing table. Quickly, she dabbed the heavy cold cream over her pretty face. Her big blue eyes roamed from her reflected self to the little gold clock. Five minutes—she must hurry. Her fingers flew as she wiped away the greasy cream.

"Miss Haynes, five minutes—call for Miss Haynes," came a voice from the other side of the door.

She turned to the shining black face of Marie, her maid.

"Oh, Marie—I am so bothered! Why can't people leave me alone? I haven't a moment to myself—people—people—reporters, old fools with their flowers, and gifts, invitations to teas, parties, societies, and clubs. Oh, how I hate it all!"

"Poor Mr. Bob Howard has been waiting for an hour in the other room. He wants to see you." Marie rolled her eyes knowingly, a smile on her broad features.

"I will see him after the performance. I must listen to him! I shall be glad when he is in Europe." Mary Haynes put her hands up to her head.

"Will that baby ever stop crying? Show people with children should be barred from the stage, especially when they must bring the crying infants right under one's nose."

"Could I go in, and see what's ailing the child? The mother is just a kid herself, and probably don't know how to attend to it." The maid spoke.

"I don't care what you do, but don't bring it in here. If you must fool around with a crying baby, stay in your dressing room with it." Mary Haynes regally left the room.

Haughtily, she entered the stage, and sang the song which so pleased the audience. The myriad white faces before her were wreathed in smiles, hands were meeting in thunderous applause. With a gracious smile, she obligingly sang another favorite, and as she stretched her white arms forward, and lightly kissed her fingertips to her loyal audience, she really felt her heart go out to them.

At last the velvet curtains closed before her, and the orchestra struck up the opening number of the next act.

Slowly, she walked toward her dressing room. Bob Howard would be waiting. She was beginning to fear this persistent young man. Which would be the best way to handle the situation, she asked herself, as she neared the door. Haughty indifference? Or pal-to-pal talk, reasoning and trying to show him just what a career meant to her? Or just a cold "No" to all of his pleas? Undecided, she opened the door.

"Hello, Bob," she smiled, and, stroiling over to the mirror, wiped the heavy lipstick from her mouth.

"Mary, I am leaving the United States," Bob Howard put a hand gently on her slim shoulder.

"Now listen, Mary, I love you, have always loved you, and I guess I always will. You loved me, too, until you became famous! It has turned your head." He paused, then hung his head, abashed at his outburst.

"And suppose it has? I have a right to live the life I want—"

"You can't tell me you like all this yapping, and fuss they make over you," Bob Howard finished defiantly. "A woman's place is at home with her husband!" He realized he sounded old-fashioned the instant he had spoken, but with a small boy sullenness he faced her.

"Bob, you are positively Victorian, making a statement like that—I am surprised at you—that settles the question for all time—I could never marry anyone who had ideas like that—I believe I hate you, Bob Howard."

"Mary—I always say the wrong thing. I mean this—" Bob Howard tried to explain. "You are so small, so sweet, so—like you belonged in a home, instead of chasing around over the country, a day here, and a day there."

"We will let the matter drop, Bob. You run along to Europe. I will 'chase around' as you term it. You may find a girl in Europe who will be the kind of a wife you desire."

The door opened quickly. The maid dashed across the room. In her arms, lay the baby. It was not crying now, only lying motionless, with closed eyes.

"Miss Mary, take her, she's had a bad spell, sort of fainted away! Mr. Bob, will you run and get a doctor? I want to get some water heated, and hunt up some milk." The frightened maid tenderly laid the bundle of baby in the staring singer's arms. Bob was already out of the room. The maid dashed out in her search for milk.

Mary Haynes sat down in the low chair by the mirror. The baby stirred slightly, and seemed to snuggle her soft cheek closer against the bosom of Mary's gown. With a sigh of content the baby's hand crept under Mary's warm palm. Absently, she squeezed the tiny baby fist.

Bob Howard came back with a doctor, the maid came with milk, still Mary Haynes sat holding the child.

The theater manager came in, followed by the youthful mother.

Mary's eyes rested on the sleeping baby a full moment. Then, with a mischievous twinkle, her eyes shifted to Bob Howard.

"Bob . . . I will go to Europe with you," she said.

Alfalfa Favored as Superior Legume Hay

Contains Most Protein and Lime, Says Expert.

Good legume hays are excellent feeds, because they contain a high percentage of protein and lime, says E. P. Reed, extension specialist in soils and crops at the Ohio State university.

A ton of alfalfa, he points out, contains 212 pounds of crude digestible protein and 51 pounds of lime. A ton of red clover contains 152 pounds of digestible crude protein and 43.2 pounds of lime; a ton of sweet clover, 200 pounds of digestible crude protein and 51.2 pounds of lime, and a ton of timothy contains only 60 pounds of digestible crude protein and 4 pounds of lime.

The most practical method of making hay in Ohio, Reed believes, is found in the windrow method. After the hay is cut, it should be left in the swath until well wilted. It is then raked into small windrows with a side delivery rake. The small windrow permits uniform drying of both stems and leaves and there is a minimum loss of leaf.

To complete the curing process, the windrow should be turned at least once each day until dry enough for storage. As the top of the windrow dries, turn it over on dry ground so that the under surface is exposed. If the hay becomes wet from rain, the same process of curing and drying is recommended, except that the turning should be more frequent.

When the hay is sufficiently dry it is most efficiently taken up with a web hay loader rather than the push arm type which knocks off many of the leaves.

Lime and Sweet Clover Will Increase Yields

Is liming worthwhile? Frank Moore, Clay county, Illinois, contends the man who is farming sour soil will be doing something else ten years from now if he doesn't lime. He has been a lime and legume convert ever since he moved to that flat land farm in the central part of the state 13 years ago. At that time he harvested 10 to 20 bushels of corn to the acre. Now his yields are 45 bushels.

"Lime and sweet clover will make this prairie land produce better than the timber land of the same region," said Mr. Moore. "The only lime lime fails is on the place where the owner is always going to apply it. It won't do any good if it isn't spread on the land."

Mr. Moore contends that it is better to buy the fat, sour land at a low price than to pay the going price for highly productive land in other parts of the state at the figure it commands.

Raspberry Worm

This raspberry fruit worm is the larva of a beetle about one-seventh of an inch long. These beetles do some damage themselves in eating the flower buds and leaves, besides laying the eggs which hatch into these worms that live in the fruit. The best method of control is to spray before the flowers open with arsenate of lead, 7 1/2 pounds to 100 gallons of water. Cultivation of the ground under the plants will also help in destroying the pupal form of this insect which winters in the ground near the plant.

Soybeans Immune

Fortunately the soybean, together with all other legumes, is immune from chinch bug attacks. If land next to bug infested wheat is not planted it would be well to put in soybeans. The beans likely will be at least as profitable as corn.

While it is profitable and practical to construct a barrier to protect corn and sorghum crops from chinch bugs yet this barrier will require considerable time and some expense.

FARM FACTS

Shear sheep only when the wool is dry. Dump wool will spoil.

Sodium chloride applications for killing weeds have proven most effective in August.

Oats ground and sifted makes an excellent feed for young calves and pigs. Soaking is not advisable.

Summer fallow land will need just enough cultivation during the summer to keep down weed growth.

Once it required three hours of work to produce a bushel of wheat; now it takes only ten minutes.

Tomato growers should be on the lookout for leaf spot, especially if their plants were not grown from treated seed.

Asparagus thrives on sandy loam soils, but contrary to popular belief also does well on heavy soils if they are well fertilized.

Oats will not flow out through cracks and knotholes where wheat would trickle out and waste. Almost any sort of farm storage will do.

No grain crop is easier to store and keep than oats. Seldom does oats heat. It will even absorb considerable moisture from leaky roofs and still dry out without getting moldy.

Great Aviator Says He Has No "Speed Complex"

The world's greatest salesman of speed, Flyer Frank Hawkes, has taken a day off from flying to protest that he is "not a speed demon," that he does not want to be a demon, that he is never reckless, that he does not race, that he is not after records.

He is, he protests in the American Magazine, merely a "salesman of speed." Why does he seek to sell speed? Because he is convinced that the main advance made by present-day civilization lies in the acceleration with which things can be transferred from one place to another.

But the speed he sells—so he insists—is not freak speed, attained in freakish apparatus, under special conditions. It is honest speed, attainable by anyone. It is good, conservative, almost humdrum speed. In reaching it he is never after records, he is simply cruising, sort of, at a dog-trot, conserving his engine, conserving himself—so he says!

Good-Natured Man

Here is one who may be termed a good-natured man. He lives in a nearby town, and is the divorced husband of a red-headed woman by whom he had five children. Does the fact that she has married another make him sore? Not at all. And to rap the climax of good naturedness with dog-like devotion, this good natured man lives with his former wife and her new husband and supports the entire family, both his own children and the other fellow's children without a whimper and seems to like it. This has been going on for some years and the family seems to be a wholly friendly combination.—Brookton Enterprise.

TO KILL Screw Worms

Your money back if you don't like Cannon's Lintiment. It kills screw worms, heals the wound and keeps flies away. Ask your dealer. (Adv.)

New Helicopter Tested

Tests of a new form of helicopter invented by Oehmichen, the French engineer, are said to have been successful. The trials were made at Veitstigney, near Paris. In the first test Oehmichen made an absolutely vertical flight of 200 feet with perfect stabilization, which was followed by a perfect descent.

First murder on record was due to envy and not to love; so which is the primary emotion?

War on Insect Pests

"Monster" side pictures of insect pests are being sent out to farming districts, under the auspices of the United States Department of Agriculture, in order to aid the farmers in more easily identifying these public enemies.

The Discovery of Carbol

Has saved much suffering to the human race. Lancing or mosey politics no longer necessary. Carbol stops pain immediately. Heals worst boils often overnight. Sold throughout the United States for more than 25 years. Generous box 50c. Thousands of testimonials. Spurlock-Neel Co., Nashville, Tenn.

Improving the Crop

A machine has been invented in Germany that will lower grain deep-er into the soil when about six weeks old, this process in one experiment having increased the yield of rye 30 per cent.

BUILD UP HEALTH AND PAINS GO AWAY

WOMEN who find themselves in a painful condition due to a rundown state of health should give Cardui a fair trial, for a reasonable length of time, as did Mrs. E. G. Hodnett, 1161 Hazel St., Texarkana, Texas, who writes: "I was anxious to build myself up so I could enjoy and take interest in my home. I had suffered with soreness and a constant pain in my side. My mother told me she thought I should try Cardui. Soon after I began taking it I noticed an improvement, so I kept on until I had taken three bottles. By this time I was feeling so much better, the pain and soreness were gone."

AN APPRECIATION

Since the editor has returned to the job of publishing The Times many words of appreciation have been handed her, as well as many pleasing compliments have been given, for her efforts in attempting to publish a good, readable weekly. The editor certainly appreciates these kind words, and only hopes that she will be able to continue to get out a good paper in the future, one that will be a progressive credit to the town and community.

In order to do this work of publishing a worthwhile newspaper it is necessary to have the help of our business associates, our subscribers and citizens. The paper is published at great expense and in order to deliver a worthwhile paper, local business firms must "stay behind us" by giving us their job work, by placing their advertising in our paper, and our citizens must help by

subscribing and lending every support possible.

We are going to continue to publish a good paper and expect to make it one of the best to be found anywhere—one which will be the pride of our town and community—because a town of Sanderson's size, or for that matter, any other town, is worthless and might as well not be designated on our maps, without a newspaper.

Again, may we offer our thanks in response to the many appreciations received on our current issues and we only hope that the entire citizenry will respond to our efforts and show what is really meant, by lending their financial support and thereby become a BOOSTER for their home town paper.

THE HIGHWAY MEETING

The meeting of the U. S. Highway way No. 90 Association was held in Del Rio this past Saturday for the purpose of winding up the year's business, to elect officers for the ensuing year, and to map out plans for the new year.

Business men from almost every town along the route were in attendance and working for the Association and boosting their home towns.

As far as we could learn, Sanderson was not represented at this meeting. In the past our representatives have been men who are vitally interested in our community, but who would not derive one penny's worth of benefit from tourist trade.

We think it is high time that our business firms—those who will benefit by tourist trade—to get behind this Association, attend its meetings, and lend their support and co-operation in every manner and help boost our town. If we want this tourist trade we must get out and work for it and not expect the other towns to bring them here!

Seth Breeding, who has been in the East for several months, came in last Sunday for several weeks visit here with relatives and friends.

Messrs. Burch Carson, W. J. Dees, Carl Garner, W. E. Neill and J. F. Provine, all prominent business men of Van Horn, visited our city last Friday. They departed early Saturday morning for Del Rio where they went to attend the meeting of the U. S. No. 90 Highway Association, which convened in that city.

NOTICE

NOTICE IS HEREBY GIVEN, that the School Board of Common School District No. 1, of Terrell County, Texas, will receive Sealed Bids, up to 10 o'clock a.m., July 20, 1931, for the Transportation of all School Children from Dryden and vicinity and along Highway No. 3, to Sanders n, for the School Term of 1931-1932, all equipment to be furnished by Bidder.

Specification of Bus and Terms of Contract may be examined at the Office of the County Superintendent, in the Court House, in Sanderson, Texas.

All bids must be Sealed and Mailed to W. E. Stirman, President of the School Board, at Sanderson, Tex., in time to reach said President on or before said time and date, and must be marked on the outside of the envelope: "Bids for the transportation of School Children from Dryden to Sanderson."

The Board reserves the right to reject any and all Bids. -17-3tc. Also, Bids may be submitted on said date for the sale of an Automobile School Bus.

Capt. and Mrs. C. Lloyd Stafford are here visiting his sister, Mrs. A. P. Utterback and family. Capt. Stafford, who has been stationed at Fort Bliss is being transferred to Fort Riley, Kansas.

Mrs. E. W. Hardgraves and family are visiting relatives in Christoval.

Hon. Dillard Estes of Ft. Worth, an attorney for C. C. Julian, was a business visitor here this week, having come in to represent Mr. Julian in a civil suit in district court.

Mrs. Belle Sutherland of Del Rio, official court reporter, is in attendance at district court this week.

RATTLE OF THE RAIL

Fireman C. Lovett has returned to El Paso.

Engineer J. W. Daniel made a visit to Marfa Wednesday.

General Manager L. B. McDonald of Houston made a trip over the road the first of the week.

Engineer J. P. Potter has been assigned to the night yard engine here.

Engineer H. W. Sherrrod of Del Rio, now has a regular freight run out of here.

Fireman J. R. Winn who has been on the extra list here, has gone to Valentine for the yard engine.

District Attorney Julian LaCrosse of Del Rio is here this week looking after his duties in district court.

Dick Arnold of Marathon was a business visitor in the city last Saturday.

Mr. and Mrs. Joe Kerr and family left Thursday for Llano where they will visit relatives.

Bridge Parties

WEDNESDAY CLUB

The Wednesday Bridge Club was entertained this week with Mrs. Clyde Griffith as hostess at her home.

There were 4 tables of players that enjoyed the afternoon games. Mrs. J. W. McKee was awarded the high score prize and to Mrs. James Kerr went the second prize.

The following members and guests were present: Mesdames F. B. Carter, Max Bogusch, H. R. Laurence, J. C. Green, L. H. Lemons, C. V. McKnight, D. A. Pollard, B. F. Pyle, T. M. Pyle, Tol Murrah, W. H. Savage, J. W. McKee, Jim Kerr, C. M. Breeding, Fred Montgomery, F. L. Burnside and Doc Turk.

Iced watermelon was served to the members.

TUESDAY CLUB

Mrs. Nell Davis was hostess to the Tuesday Bridge Club and a few additional guests at the home of Mrs. P. E. Dishman Tuesday afternoon. Baskets of dahlias and zinnias were used in decorating. After the usual games of bridge, high score prize was awarded Mrs. Lee McCue; Mrs. P. J. Holman won second, and Mrs. Mary Lou Kellar won low prize. Delightful refreshments consisting of lemon sherbet and angel food cake were served to Mesdames J. W. Happle, Herbert Buchanan, W. C. Barksdale, Lee McCue, Joe Kilburn, Tropha James, Jerry Bell, D. A. Pollard, Mary Lou Kellar, F. L. Burnside, R. E. Stirmann, P. E. Dishman, C. M. Breeding, P. J. Holman, Kurt H. de Cousse of Lansing, Mich., and Miss Gertrude Dreifuss of Chicago, Ill.

CACTUS CLUB

Mrs. Wallace Henshaw was hostess to the Cactus Bridge Club on Thursday afternoon at her home. High score prizes were awarded to Miss Louise White and Mrs. Jack Hunter.

Those present were: Mesdames Frank James, Horace Fletcher, Carlton White, S. C. Bodkin, Clyde Harrell, W. C. Hunter, Herbert Buchanan, Frank Robertson, Jack Freshour, and Misses Louise White, Willie Mae Green, and Myrtle Harrell.

NIGHT CLUB

Mrs. L. H. Lemons was hostess to the members of the Night Bridge Club at her home last Saturday evening.

Mrs. C. M. Breeding made the high score for the ladies, and was given a pair of silk hose as the prize. A pair of men's hose was the prize that went to Jim Nance as holder of the high score for men.

Iced watermelon was served to the following members and guests: Mr. and Mrs. Max Bogusch, Mr. and Mrs. S. S. Duggett, Mr. and Mrs. C. M. Breeding, Mr. and Mrs. Jim Nance, Mrs. W. H. Savage, and Messrs. A. E. Creigh, Jr., and Ray Caldwell.

W. M. S. MEET

The Woman's Missionary Society of the Methodist church met last Tuesday at the church with a good attendance. The 3rd chapter of John was studied.

Reports were given by Mrs. F. S. Garrison, the president, and plans were discussed for raising money with which to carry on the work for the on-going of the Kingdom of God and the Betterment of the Community.

The next meeting is to be a social one and will be held at the home of Mrs. R. N. Allen on Tuesday, July 28.

PRESBYTERIAN AUXILIARY

The Circle meeting of the Woman's Auxiliary was hospitably entertained in the home of Mrs. H. R. Laurence Monday afternoon. Mrs. Joe Nichols, chairman, presided and Mrs. Will Savage led the devotional with Mesdames Rufe Murrah, S. C. Bodkin, H. R. Laurence, and C. F. Haass assisting her.

The subject for the afternoon's program was on Korean Home Life. Mrs. J. W. McKee conducted the "Tour" through Korea, and she and Mrs. N. E. Charlton gave touching stories of what Christianity had done for Korea. Mrs. Jesse Lochausen dressed in Korean costume, impersonated "Kim Sogil," a product of the Presbyterian Mission, in a most realistic manner.

Mrs. John Nichols closed the program by having several letters of thanks from Koreans read by Mesdames Dave Pollard, S. C. Bodkin, Joe Nichols, and H. R. Laurence.

Mrs. John V. McCall gave a report of the recent Presbyterian district meeting held at Rocksprings.

Mrs. Laurence served iced watermelon to a good attendance of the membership.

* THIS AND THAT *

BY JIMMINY

Two people become engaged in an argument. When one fails to convince the other a third party is called, he failing to convince the two, calls in a fourth party, who in turns tries to find someone to substantiate his views. And so it goes.

Soon enough interest is aroused to cause no end of argument; people become excited, lose their heads momentarily and before anybody knows what it's all about they are running up and down the land, waving their arms and loudly proclaiming, "There oughta be a law!"

So Governor Sterling summoned the "heavy artillery" to assemble at the state house to proceed with plans which, it is hoped, will bring to an end for all time the increased flow of oil- or at least until such time as the price per barrel is high enough to buy a package of Texas-iced cigarettes.

In other words, the legislators are supposed to do with the laws of man what cannot be done- to the satisfaction of some- by the laws of nature. Nature has taken a hand, in some instances, in the East Texas oil fields, sending forth salt water instead of oil, but it hasn't done it the way some oil men think it should be done. Nature takes no account of whose well is being pruned; Standard Oil looks no bigger than Sam Jones of Willow Branch when nature is doing the pruning. And that's bad. "There oughta be a law!"

And whether we like it or not, there will be a law- maybe. It may not prove to be effective, but that remains to be seen. The fact is, that if oil is coming from the ground in greater quantities than can be used, legislative halls are poor places to turn for relief. Especially is this true when four out of five legislators don't have it—OIL.

The state finances are not as healthy as they could be, and Governor Sterling knows it. However he had to do something—it was ei-

ther a case of ruining the state financially or wrecking the oil industry permanently—and for the love of Mike, the Standard Oil Company, or somebody, let's save the oil industry. That is, if a law is all that is necessary to do it.

We saved a nation from ruin by enacting a prohibition law, didn't we—or did we? We might not be

SOCIAL SERVICE IN THE EARLY CHURCH

LESSON TEXT—Acts 4:32-35; 6:1-4; 24:27, 31 Cor. 9:1-7.
GOLDEN TEXT—I have showed you all things, how that so laboring ye ought to support the weak, and to remember the words of the Lord Jesus, how he said, It is more blessed to give than to receive.

PRIMARY TOPIC—Sharing With Friends.
JUNIOR TOPIC—Sharing With Friends.
INTERMEDIATE AND SENIOR TOPIC—Christians Sharing With Others.
YOUNG PEOPLE AND ADULT TOPIC—The Generosity of the Early Christians.

Social service as such was not a department of church activity. However, the early church was most ready to discharge its social obligations. Members of the body of Christ are sympathetically related.

1. Characteristics of the Early Church (Acts 4:31-35).

1. It was a praying church (v. 31). These early Christians for every need betook themselves to God in prayer.

2. It was a Spirit-filled church (v. 31). When they prayed, the place wherein they were gathered together was shaken and they were all filled with the Holy Spirit.

3. It was a church with a bold testimony (v. 31). The ministers of the early church did not offer any apology for the Bible, but expended their energy in fearlessly preaching it.

4. It was a united church (v. 32). They were all of one heart and soul.

5. It was a generous church (v. 32). They held nothing back from those who had need.

6. Its ministers had a powerful testimony (v. 33).

7. Its members had an unblemished character (v. 33).

II. Appointment of Deacons (Acts 6:1-4).

1. The occasion (v. 1). The church was threatened with disruption over suspected partiality in the distribution of alms. The Grecians felt discriminated against in that their widows were neglected in the "daily ministrations."

2. The issue met (v. 2-6). A congregational meeting was called, the case placed before the church, and the church instructed to select seven men of good report, filled with the Holy Spirit and wisdom to administer the temporalities of the church, leaving the apostles freedom for prayer and the ministry of God's Word.

3. The ministry of the deacons (v. 7). They looked after the poor, but while distributing alms, they were witnessing for Christ. Social service is a by-product of Christianity and not Christianity itself.

III. The Raising of Dorcas (Acts 9:36-42).

1. Her ministry (v. 36 Cf. v. 39). Her life was full of good works, such as making coats and garments for the poor. Her noble ministry has set in motion countless numbers of needles, and has given incentive to many noble women to follow her example. The good deeds were not merely those which she intended to do, but "which she did."

2. Her death (v. 37). In the midst of a life full of good works she was overtaken by death.

3. Peter sent for (v. 38). In their distress the disciples sent two men urgently to request Peter to come to them. Having heard of the healing of Aeneas at Lydda, which was near, they no doubt believed that he could restore Dorcas to life.

4. Dorcas raised (v. 39-41). In answer to Peter's prayer Dorcas was "presented alive to the saints and widows."

5. The effect (v. 42). So astounding was this miracle that "many believed in the Lord."

IV. Ministering to the Saints (II Cor. 9:1-7).

The saints in need were Christians at Jerusalem. Many were impoverished because of embracing Christianity. Sending money to the saints at Jerusalem was an expression of affection on the part of these Gentile Christians for the Jews. As an incentive to giving Paul shows:

1. That the volume of reaping is based upon the volume of sowing (v. 6).

2. There should be a heart purpose (v. 7). This calls for intelligence as to the object in giving.

3. Giving should not be of necessity (v. 7). No particular value accrues to the giver who only responds under pressure.

4. God loves a cheerful giver (v. 7). Right understanding of responsibility toward God with reference to temporal possessions will make giving a glorious privilege.

All Who Come
Christ saveth unto the uttermost all who come unto God by him; and it is best to leave Christ to determine where the uttermost lies. What is impossible with men is easy to omnipotent grace.—W. L. Watkinson.

As the Angels Give
If instead of a gem or even a flower, we could cast the gift of a lovely thought in the heart of a friend, that would be giving as the angels give.—George MacDonald.

Tale of the Wild and Woolly West

By LEETE STONE

THERE is still a bit of it left, here and there in Nevada and other sparsely populated states—the old "Wild and Woolly West." And that is why Jed Agard cast a mild brand of defiance in the direction of an irate and wealthy father, left Yale in his second year, and took up the long, long trail that leads to the tallman of adventure.

It was a take-back to pioneering ancestry, probably. Jed got sick of the softness of modern existence. He wrote his father quite an interesting letter just before he jumped ship. Agard Senior did not answer it, pretended to be in high dudgeon, and promptly stopped Jed's \$250-a-month allowance.

The odd thing was, however, that Agard Senior had to take his handkerchief and wipe away a certain suspicious mist from his eyes as he read the letter. And in the privacy of their bedroom that night, he said to the statuesque, white-haired mother of Jed:

"Well, mother, it's just as well to let the boy think I'm sore. But I'm not! I'm sorta proud. What's college? I never had any. Let Jed learn to handle himself in a man's country for awhile. Let him fling about a little. Then I'll take him into the business—eh, mother?"

"William, he got's all his romantic notions from you. You two are as like as two peas." That was Mrs. William Hamilton Agard's response.

So Jed Agard, unaware of this conciliatory attitude on the part of his parents, wound up after months of knocking about in the tiny tank town of Nevada known as Blue Cactus.

The town was really only a post office ministering to the needs of the great Montevideo horse ranch—what is generally known as a "dude ranch," where some of the prettiest pieces of horseflesh are bred every year.

Jed walked in to see the big boss one day, opened the window at the side of the boss' desk, and said:

"Excuse me! Can you see that two-inch square of paper stuck on that bush—right over there?" he pointed with a lean, agile finger. "It's about a hundred feet from here. Just watch it!"

Quite undramatically Jed drew a beautiful six-gun of the latest model from under his armpit, aimed the fraction of a second, fired—and the bit of paper was nonexistent on the bush.

"Not bad!" The boss stuck out a big paw. "I need a man who can shoot like that. You're hired. We'll call you the Montevideo deputy sheriff, if you like. There's been some horses stolen lately. I want you to get the guys that are doing it. Get me?"

"I'm your man," Jed quietly drawled. "I sure need the money. Haven't eaten for a day and a half. Show me some oats."

Jed was a mighty busy man for a few months after that. He made good in a manner that would have pleased his dad. Single-handed he brought to camp the two rustlers who had been preying on the ranch. A much more difficult achievement and one which pleased his boss even more; he taught that same boss' daughter, home from New York, to ride an English saddle. The girl was a good Western rider; but knew nothing of the delicate balance and technique of the English hunting saddle. Jed had been brought up on one. He knew. He could teach. Fortunately, or unfortunately, he fell in love with this beautiful girl in the process of teaching her to ride an English saddle.

"Listen, six-gun sheriff! I'm taking the limited tomorrow back to New York city. I hate to leave . . . my English saddle."

"Ah, no! Gwen! You don't mean that. Can't let you go! Don't you know? . . . ah, Gwen!"

"It's true, big boy. And I hate it. On account of you. I like you, too. . . . Will you take me to the train?"

"Oh, d—n, yes!" Depth of sadness in his tone.

The next afternoon as Jed was ushering Gwen to her drawing-room apartment on No. 9 Limited for New York, his hands laden with bags, she grasped his elbow and whispered:

"Send word to dad, Jed, that you're staying on this train to protect the passengers. That sleek man up front is Cairo Jim. His specialty is holding up trains. He was pointed out to me awhile ago. He's here for a purpose, Jed. Believe me, won't you?"

"Always believe you, sweetheart. Watch little Jed."

So it happened that at about 10:30 that night when all the pullman curtains were hung and the passengers peacefully sleeping, Cairo Jim went to work gathering up the watches and purses that reposed under pillows. Cairo was a quiet worker. It was not until he had successfully looted three cars and was just about to slip off the train at a flag stop that he encountered Jed Agard, deputy sheriff extraordinary, and faced the famous armpit six-gun that had shattered a slip of paper at one hundred feet.

All of which explains why Jed had to take a prisoner to police headquarters in New York before he dragged a protesting young woman up to his father's office, where he said to Agard, Senior, quite belligerently:

"This is the girl I'm goin' to marry. Get me! And I want you to give me a job and start that allowance again."

Smartly Frocked in Pretty Prints

WHEN in doubt, wear your prettiest print frock and you will always be well dressed. In the mind of many women this season, the term "prettiest print" means a fine-grained, pure-dye aura crepe in mandarin yellow with little figures in black, white and gray sprinkled all over it. The frock in the picture (two views of which are given) is fashioned of a crepe which answers this description to a nicety.

In this instance an exceedingly pretty print is made prettier with tiny frills of white organdie on the sleeves and at the front waistline also about the soft collar of self-organdie which buttons at the back. The rather wide black velvet belt is also a style item of note.

At the most fashionable Paris restaurant gatherings the endorsement of prints is most noticeable. Small discreet patterns are given special emphasis such as handsome black crepe printed alternately in green and white

notched dots. Coin-spot crepes, by the way, of every coloring are ever so chic. These are often used in reverse such as pink dots on black in combination with black dots on pink. White motifs scattered on blue, black, brown or green grounds are also highlighted in the printed silk mode.

The above applies for the most part to tailored crepes, for when it comes to evening and garden-party types the fluttery flower chiffons still hold sway, the most noticeable feature about the frocks made of them being that their skirts nearly reach the ankle which together with semitight princess bodices, which are belted at the waistline, and intricacy of floating draperies and graceful caplets about the shoulders form the basis of design for the majority of these enchanting styles.

Most every printed frock whether of formal or informal type is supposed to have its own jacket. Of even more importance is the two-jacket dress, which is to say that the dress has a jacket of its own self-same material as well as one of monotone crepe or taffeta, or that which is of infinite attractiveness—a jacket of transparent velvet in some one or other of this season's enchanting colors.

These cunning jackets are often styled very simply and quaintly. Then again, especially for ultra formal evening wear they glory in sophisticated details which involve elaborate shirring and tucking and various other complicated treatments.

CHERIE NICHOLAS.
(© 1931, Western Newspaper Union)

TREND TO LIGHT WOOLENS FOR FALL

Special interest is attached to the early fall fabrics because of their diversity in color and weave. Lightweight woollens of every type have succeeded the heavy stiff weaves of years ago, writes a Paris fashion correspondent in the New York Times. Three groups are shown for coats and suits. One includes an assortment of rough, pebbly woollens of featherweight that Schiaparelli, Regny and Bruyere present in their sports and topcoats for travel. These are woven in solid colors and mixtures, in dark tones of brown, green and wine. A new shade is blue fox, which is delightfully accented by trimming with fur of the same name.

A new phase in tweeds is a weave in "conservative" yarn-dyed effects in simple, small patterns combining dark colors with beige. They are also seen in the solid rich tones of greens, browns and reds.

More lightweight woollens than have been shown in some time will be used this season for dresses, ensembles and wraps. These in wool crepes, finely woven, are being used by the French couturiers in their advance collections.

Canton crepe-faille, a heavy silk of dull surface, will be very fashionable for both daytime and evening. The colors in which it will be seen are named in the order of their popularity—brown, olive green, yellowish in tone; copper-beech, red brown, sea-brown and bronze. The new silvery bronze is a heavenly shade in which Chanel is making some striking afternoon and evening gowns.

Corduroy Sports Skirts Are Easily Laundered

Designed to wear with the slip-on or like shirt the cardigan or chamouis jacket is a skirt of white corduroy, practical because it is washable. An attractive ensemble for such active sports as golf combines a dark flannel skirt with a pastel colored suede cardigan, a beret to match the skirt and a scarf of striped jersey in the two colors.

Late Paris Wrap Will Fit in Milady's Purse

A late fad in daytime wraps in Paris is a jacket small enough to put in milady's purse. The jackets are tiny affairs of soft crepe or wool, generally sleeveless and falling only a few inches lower than the shoulder blades. They generally match the gown in color and may be tucked into the purse when the wearer wishes to discard them.

Sheer Ninon Used for Milady's Summer Gown

Distinctly Empire in feeling is this afternoon gown of sheer ninon. It is worn over a taffeta slip which is gathered at the hem petticoat-wise and which is a few inches longer than the dress.

Printed Crepe, Chiffon or Georgette Favored

Solid colors and contrasts come and go, but the royal favorite for summer afternoons and evenings as seasons pass is the printed crepe, georgette or chiffon frock. And by reason of the shadowy colorings, designs for dressy frocks grow large and larger. Even cabbage roses look "swell" when soft tones are imposed on light backgrounds. Something new is a rose print on white in soft yellow with a hint of blush. It suggests a frock fitting a golden blond, or a very deep brunette. It might even be worn by a brown-haired lass.

Gravure prints are very alluring for the young and mature when in the chiffons and artificial silk voiles. Such patterns are equally as charming in silks like flat crepe, which incidentally is a popular fabric with textile designers for summer afternoon and evening dresses.

Sheet Erosion Is Great Destroyer

Vast Area Being Washed Thinner by Each Succeeding Rain.

Sheet erosion, the unending process which steals a part of the topsoil every time there is rain enough for water to run downhill, is a major cause of land depreciation. H. H. Bennett, soil scientist of the United States Department of Agriculture, said at the annual meeting of the American Forestry association at Asheville, N. C.

Sheet Erosion Widespread.

"Sheet erosion is much more widespread than gully washing, but it is more gradual and less noticeable," Mr. Bennett said. "Excessive washing has virtually destroyed more than 17,000,000 acres of formerly tilled land in this country, but there is a vastly larger area whose surface soil is slowly but constantly being washed thinner and thinner by every rain. The washing away of the topsoil is rapidly lessening the productivity of our land."

"Our country-wide yields are not increasing, even with all the benefits of research and extension services directed toward this end; indeed, crop yields are decreasing in many localities. The better soils are largely in use. In many parts of the country the area of these is being diminished through the evil of erosion; that is, more and more of these lands are being converted into inferior lands."

Land impoverished from over-cropping frequently can be made to produce profitable crops through the use of fertilizing and soil-improving crops, he said, but land worn out by erosion is essentially hopeless.

The topsoil contains the essential elements for plant growth and when this soil is eroded away, the subsoil in the majority of cases fails to produce as good crops as the original topsoil and often is worthless, the bureau of chemistry and soils has found.

Methods of Prevention. Mr. Bennett outlined some of the work being done by the Department of Agriculture in the study of erosion and methods of preventing it. He suggested better land utilization, better protection of cultivated slopes with terraces and other means, and the use of certain lands for forests as preventives of soil erosion. A far-reaching, practical, national program of soil protection and better adjustment in land usage is an immediate need, he said.

Thorough study of erosion problems is now being made by the department at eight regional experiment stations established during the last two years. These stations, which eventually may number 20, are established on farms where erosion is a serious regional problem, and are for studying methods of erosion control and of holding on the land more of the rain water. A number of the states are carrying on supplementary work on erosion.

Phosphorus Is Necessary for Bone Construction

Phosphorus is a material necessary in the construction of bone, but its greatest value seems to be in the production of seed and grain. The phosphorus the plant uses over and above that needed to form the leaf, stalk and root seems to be a measure of its ability to form the protoplasmic nucleus, around which the grain is formed, and without which no grain will be formed. Because of this association phosphorus has sometimes been called the life-giving element. When there is a good growth of leaf and stalk, grain is increased in proportion as the phosphorus is increased, other things being equal. Where grain is not produced in proper proportion to leaf surface, it is an indication of a deficiency of phosphorus. Usually the growth of stalk and leaf is an approximate measure of the available nitrogen, and the grain produced is a measure of the phosphorus secured, above what was used for growing stalk. Land that is rich in humus and available nitrogen will grow straw and stalks largely in excess of a proportionate amount of grain and unless more phosphorus is applied there is a great waste.

Getting Ride of Moles in Lawns and Gardens

The best way to get rid of moles in lawns and gardens is to trap them, says the biological survey of the United States Department of Agriculture. If there are only a few, however, and it does not seem desirable to resort to trapping, good results may be obtained by the use of moth balls. Open the runways at the edge of the lawn or garden with a trowel and drop in a moth ball or two, or a spoonful of naphthalene flakes, and replace the earth. Moles dislike the odor, and it may prove fairly effective in keeping them away from the garden.

Oats for Stock

Corn must be exceedingly cheap to be more economical than oats for almost any class of live stock. If oats sell for 20 cents a bushel, Oats makes an excellent feed for milk cows. Few experts in figuring rations for dairy cattle leave out oats. Among the most palatable feeds that can be given to milk cows are corn, oats, wheat bran, linseed oil meal and molasses. Oats is keeping pretty fast company when it is listed with such palatable feeds as corn and linseed meal, but it has been placed in such company by the best of authorities.

Does COFFEE Give You Sleepless Nights?

COFFEE (also other drinks and foods) often keep you awake. Frequently this is due to an acid condition they create. The next time you raid the ice box before retiring, eat two or three Tums (often only one Tum is enough) to relieve the Heartburn, Sour Stomach, Gas, Acid Indigestion, which cause many sleepless nights. Easy to prove—get a roll of Tums at any drug store and try them. Only 19c.

TUMS ARE ANTACID—Not a Laxative. For a laxative, use the safe, dependable Vegetable Laxative (Dietary's Specialty). Only 25c.

Anti-Typhoid Serum

Ferdinand Widal, a native of Algeria and professor in the Paris faculty, collaborated with Chautemesse in his early work on preventive vaccinations against typhoid fever, and made his mark by his discovery of bacterial agglutination in 1895, and its application in the diagnosis of typhoid. Sir Almroth Edward Wright, professor of pathology, made typhoid vaccination practicable in 1908 and 1907, inoculating over 2,000 soldiers in India in 1908.

Not Quite

"Does your wife still pick your clothes?"

"No, just the change pocket."

When sugar-coated pills came into use, it was only a matter of time until there was a blizzard of opinion against any pills at all.

Inwardness, mildness and self-renewment do make for a man's happiness.—Arnold.

Put off until tomorrow all the work that belongs to tomorrow—unless you are going fishing.

One of the blessings of love is that people can talk silly without feeling ridiculous.

Getting along with a fussy man can make you as tired as a hard day's work.

Miss Gladine Bowers of Alpine was a week-end visitor with Mrs. H. R. Laurence.

WITH THE CHURCHES*

CATHOLIC CHURCH
Mass every morning at 7:30. 1st Mass on Sundays at 7:30; 2nd Mass at 9 o'clock.
—Rev. John M. Bertrant, Rector.

CHURCH OF CHRIST
Ladies' Bible class on Tuesday afternoon at 5 o'clock.
Mid-Week Bible study on Wednesday evening at 8:30 o'clock.
Sunday Bible classes begin at 10 o'clock.
Preaching and Communion each Sunday beginning at 11 a.m. and 8:30 p.m.
Young People's Bible Class on Sunday evening at 7:45 o'clock.
A cordial invitation is extended to all.

—R. E. GRIFFITH, Minister.

BAPTIST
Sunday school at 10 a.m. and the BYPU's at 7:30 p.m. There will not be any preaching at either service as the pastor will be away in a revival meeting at Rodeo, N. M. This will give our people an opportunity to go worship elsewhere.

At our prayer meeting last Wednesday evening we were delighted to have Bro. McCall to speak to our people. We welcome this good man and his wife to our town.

—IRA HARRISON, Pastor.

PRESBYTERIAN
The pastor will preach at both the morning and evening services next Sunday. All services will be brought to you within one hour.

We will welcome our superintendent, R. S. Wilkinson, back from a two weeks' vacation. Mrs. J. W. McKee has been taking his place in his absence.

The Catechism Class is growing in numbers and interest. The hour is 4 p.m. each Wednesday.

Mrs. John V. McCall is entertaining her class of young people on Friday (tonight) at 8:30 p.m. The Lookout Committee will invite all prospective members.

Dr. John V. McCall, Pastor.

FIRST METHODIST

Services for Sunday, July 19
10 a.m. — Sunday School—"A Class for every age, and trained teacher for every Class." A whole family Sunday School.
11 a.m.—Divine worship service—Sermon by the pastor. Subject, "Christain Compensation." Text: Matt. 19:27—"Then answered Peter and said unto him, 'Behold, we have forsaken all and followed thee: what shall we have therefore?'"

Special vocal, and instrumental music by the music committee of the church. Responsive reading, to be led by Dr. A. P. Utterback. Matt. 5: 1, 12.

7:15 p.m.—Junior Epworth League in the parsonage parlor.

7:15 p.m.—Senior and Hi Epworth Leagues meet in the church auditorium.

8:15 p.m.—Preaching by the pastor. Sermon subject: "The Way, Truth, and Life." Text—St. John: 14:16.

Special vocal and instrumental numbers furnished by the music committee of the church. We earnestly solicit all who do not regularly worship, and work elsewhere to come and work with us.

—B. M. Stradley, Pastor.

BEAUTIFUL NEW FORD

De Luxe Bodies

TOWN SEDAN DE LUXE SEDAN
CONVERTIBLE SEDAN
DE LUXE TUDOR VICTORIA
CABRIOLET

The most striking fine car types ever offered at such low prices are now being presented by Ford dealers. These are the six newest de luxe creations of the Ford Motor Company. They are designed and built to meet every need of the automobile buyer whose desire for motoring luxury and outstanding performance is tempered with sound economy.

Get the facts about these fine cars. Compare their lithic, clean-cut style with any you have ever created in your own imagination. Learn about the de luxe materials with which each car is trimmed and upholstered, and how carefully these are tailored. Sit and ride in the wide, restful seats and you will realize that just as no restrictions have been put on mechanical performance, so no limits have been placed on comfort and beauty.

There is much to interest the careful buyer—a choice of sparkling colors, a variety of rich upholstery materials, Rustless Steel, safety glass, Houdaille double-acting shock absorbers, one-piece welded steel wheels, slanting windshields, and many other features which make the Ford a happy investment.
