Edgar B. Davis Pictures To Be On Display At Chicago

The Texas exhibit in the Chicago World's Fair will be opened July 25, Porter Whaley, Secretary of the Texas World's Fair Commission said Tuesday.

\$6,500 Disbursed For Relief Work In This County

The Committee of the R. F. C. for the administration of relief work in Terrell County began its work for the relief of unemployed and destitute families of the community, as well as stranded transients persons, on the 20th day of January. The work was originally begun under the direction of the West Texas Chamber of Commerce, but was later transferred to the Texas Rehabilitation and Relief Commission set up by Governor Miriam Ferguson, under the direction of Mr. Lawrence Westbrook at the Capitol as its director. For this particular relief work the Federal government advanced to the Terrell County Committee a total amount to July first of \$6,500.00. There has been paid out for direct and work relief a total of \$5,934.52, with an administrative expense for the whole period of less than 3 per cent. 288 families and non-family persons have been given direct and work relief, and we are sure that the citizens of the County will agree that inestimable good has been done by the work relief afforded to so many families of our County.

The projects upon which the R. F. C. Committee has worked crews have been the cleaning up of the towns of Sanderson and Dryden, the removal from these towns of hundreds of loads of cans, iron and unburnable trash; likewise unsanitary conditions have been corrected, fire hazards removed and our public school grounds curbed and graded. In addition to this, the street crossings and culverts over the town of Sanderson have all been widened and repaired; as well as some concrete structure work on culverts. The Committee has furnished crews in cooperation with the Commissioner's Court of the County, and more than 175 miles of County roads have been worked and are now in good condition. The towns of Sanderson and Dryden are in more presentable condition than they have been for many years, and we trust that the citizenship will assist in keeping the town clean. We particularly appeal to our citizenry to cooperate with the Committee in its future work, and we will be glad to have any unsanitary or unsightly condition brought to the attention of the Committee.

BESSIE SHARP TRIAL TO BE AT FORT STOCKTON

Poison Murder Case is Set For Trial Next Week At Fort Stockton

Bessie Sharp, charged with poisoning her husband, W. Telefus Sharp on a ranch near here two years ago, will be tried for the poison murder next week at Fort Stockton at the current term of district court which will be presided over by Judge Joe Montague.

Originally set for trial at the May term of court, the case was postponed until this term on account of the unavoidable absence of Coke Stevenson, one of the defense attorneys.

Many witnesses from this locality are summoned to testify in the case which has attracted widespread interest over this section of the State.

George Middleton Dies

George Middleton, widely known in this section as a livestock commission man and at one time an oil lease broker, died at Mineral Wells Sunday night. He succumbed to pneumonia which developed from a heavy cold. Mr. Middleton had gone to the resort for treatment for rheumatism.

The body, accompanied by the widow, arrived here last night and is in charge of the Robert Masse Company. Funeral arrangements had not been completed last night pending word from relatives in Kansas, but the rites will not be held Tuesday, it was said.

Mr. Middleton had been associated with the sheep business in a big way for many years. For many seasons he was connected with Swift and Company as buyer on the yards in Kansas City, Denver and other parts and had bought thousands of sheep in the northwest. Later he went with Frank Synder, now of El Paso and his brother, who for several years were the biggest sheep buyers in America. They came to this section and bought the ranch that Con Cunningham now owns near Girvin.

Mr. Middleton bought sheep on orders for firms in the corn belt and in Colorado and was one of the biggest lamb traders the country had. He was an excellent judge of sheep and his forecast of the market on feeder lambs and yearling ewes was regarded as authoritative by residents of this section. He was born in St. Joseph, Mo., February 1, 1878, attended Brothers College there and married Estelle Williams in this city in 1925. There was one child, a son, G. A. Jr. Mr. Middleton's hobby was horses and he was regarded as one of the most skilled traders in the state.

He had been in ill health for several years and in recent years often was forced to go to a hotel and rest while making trips in the sheep country. In recent weeks he had appeared thinner than usual but to inquiries as to his health he always replied that he was feeling fine.

The above clipping was taken from the Tuesday July 11th issue of the San Angelo Standard and will be of interest to the many friends in this city of Mr. Middleton's.

Mr. Middleton was well known here, especially among the ranchers and for many years has been coming into Sanderson buying sheep. His many friends in this section of the State will regret to learn of his untimely death.

REGULAR TERM OF DISTRICT COURT HELD

The first two days of court were devoted to the hearing of divorce petitions there being six on the docket. As there were no cases to be tried before a jury the petit jury which was called for July 13 was requested in the interest of economy not to report until Monday, July 17.

Cases disposed of Tuesday were as follows: W. F. Lindsay vs Kenneth Wooley et al, dismissed at request of plaintiff; Luella Kemper vs E. P. Peoples, continued by agreement; Lucille Harrell Mason vs James S. Mason, divorce granted to plaintiff and custody of child; Mutual Building & Loan Association vs P. F. Lewis Lemons was appointed to collect notes and revenues. In this case the plaintiff attacked the constitutionality of the recent act of the Legislature authorizing a District Judge to grant continuances for 180 days known as the Moratorium Law. Judge Montague held the law constitutional and granted the continuance asked by the defendant.

WHAT'S WRONG?

Shall Sanderson stand alone and remain unknown to the outside world and even other parts of Texas...

Last week we had an appeal in our paper that Sanderson raise its quota of about \$20 to help place an exhibit at the Century of Progress Exposition at Chicago.

This week we have a chance to have direct representation at the Century of Progress Exposition by means of literature, a miniature exhibit, and our name on a large relief map of West Texas...

Citizens let's take advantage of this opportunity, and put our city on the map. We have many things mohair, wool, native shrubbery that could be sent in as an exhibit...

The Thrill of Creative Effort

In our pursuit of material gain or of fleeting pleasures, we sometimes forget this bit of truth, tucked away in the middle of Roosevelt's inaugural speech:

"Happiness lies not in the mere possession of money; it lies in the joy of achievement, in the thrill of creative effort. The joy and moral stimulation of work no longer must be forgotten in the mad chase of evanescent profits."

It would be a good thing for all of us to clip this paragraph from the president's talk and read it over every once in awhile.

The thrill of creative effort—that's it!—Harvard (Ill.) Herald.

President Roosevelt's conduct in breaking the domination of France and other foreign nations at the present London Economic Conference marks him as the first president we have had since 1914 who realizes that his first duty is to do something for the United States of America...

"No one ever would have crossed the ocean if he could have gotten off the ship in the storm."—Charles F. Kettering.

The tactful Mexican artist who painted Lenin on the Rockefeller building would probably paint Luther on the walls of the Vatican.

Many people admit that honesty is the best policy but the sad commentary is that it often takes an inquiry to make them realize it.

Most people are very pleasant as long as you don't try to collect.

ECONOMIC HIGHLIGHTS

Happenings That Affect the Dinner Pails, Dividend Checks and Tax Bills of Every Individual...

Here's one for the taxpayer: The total of all appropriations made by the recent special session of Congress, including those which are classified as "capital expenditures", is in excess of \$4,500,000,000.

One encouraging sign is that the extraordinary measures, while they appropriate definite amounts, do not specify that they be entirely spent.

The old practice of politicians spending everything they can get hold of may not apply here as administration of this and other bills is supposed to be in the hands of persons who have few or no political obligations.

Also encouraging is the outlook for tax revenues. For the first time since depression began the Governments internal revenue collections are exceeding those for the same period a year before.

Curiously enough, both the "common man" and the financier favor repeal of the capital gains and losses provision of the income tax-law but for definitely different reasons.

The World Economic Conference hasn't collapsed, but it's looking pretty tottery. It is, basically, an attempt to revive internationalism in a world which is now predominantly nationalistic.

Menus and recipes uS yky r yyy

DENTON, July 13.—July is almost mid-summer, the very hottest part of the summer.

The average housewife is racking her brain for interesting menus and recipes to tempt jaded appetites of her family. Each member of the family still has his or her energy requirement to meet, but with hot uninteresting dishes being served, very little food is eaten.

Lunch: Salmon loaf, sauce, shoestring potatoes, tomatoes, (sliced) brown bread, butter, lettuce salad, sliced watermelon, iced tea.

Dinner: Watermelon cocktail, swiss steak, buttered potatoes, peas

The possibility of political repercussions at home from the Conference is eminent. Secretary Hull is apparently not receiving the Presidential support anticipated, his assistant, Raymond Moley, has been stealing his thunder.

During May, industrial production achieved the largest recorded by the Federal Reserve Board's index in 14 years. Reports in early June show continuance of the advance.

Of importance to all businesses is National Industry Recovery Administrator Johnson's warning against efforts to increase prices without justification. There will be no price "wild-cating".

HIGHER PRICES FOR TEXAS PRODUCTS ARE BIG HELP TO STATE

That economic conditions were never so bad in Texas and the Southwest as they were in most parts of the United States is the belief of many nationally-minded observers. Not a few of these same persons now believe that recovery will be earlier in Texas and the Southwest than in the other sections, the reason for that belief being the sharp increase in the prices of those commodities which Texas produces so generously.

A writer in the Dallas News digs into the records to compare prices

of a few months ago and now to show how Texas has benefited: Cotton—June, 1932, 4.5c, now 9c. Corn—January, 1933, 23c, now 50c. Wheat—January, 1933, 26c, now 63c.

Oats—July, 1932, 10c, now 35c. Tomatoes—June, 1932, 1c now 3@5c. Wool—June, 1932, 8c, now 25@28. Hogs—June, 1932, 2.6c, now 4.50c. Sheep—December, 1932, 1.8c, now 5c. Cattle—February, 1932, 2.75c, now 5c. Butterfat—June, 1932, 16c, now 17c.

And while the price of oil is no prices are being stabilized in this prices are being stabilized in this great industry which Texas completely dominates.

Seventh Annual Experiment Station Round-up August 8

SONORA, July 13.—Announcement was made this week by W. H. Dameron, superintendent of the Ranch Experiment Station, a sub-station of the Texas Agricultural Experiment Station at College Station, that the seventh Ranchmen's Round-up would be held at the Station, 25 miles south of Sonora, August 8th.

The Round-up, introduced to acquaint ranchmen of the region with the Station and its work, has achieved much since the first get-together in 1925. Only twice in that time has the annual event been omitted, one of the years being 1932.

It combines instruction and discussion of ranching problems with a real entertainment. The Texas Sheep and Goat Raisers' Association will co-operate again this year in planning the entertainment and assisting with the show.

Crowds in the past have averaged about 3,000 and the Station men hope to have an equal number there again this year. An assisting committee has been appointed to represent the stock association and the citizens of West Texas in general.

FURTHER WOOL GAIN FORECAST BY NAT'L CORP.

Statistical Outlay Stronger Than It Has Been For Years

BOSTON, July 10. (AP)—The statistical position of wool, the National Wool Marketing Corporation said today, was stronger than it has been for years and there was nothing in the immediate future to indicate anything but higher prices.

Considering the present high rate of consumption, it was believed manufacturers in general had small stock on hand, and that now that a half-year inventories have been made, large volume buying would be experienced in the future.

Prices on domestic wools have made additional five per cent increase owing to an exceptionally strong advance at the London wool sale where Merinos similar to domestic wools advanced approximately 20 per cent.

In addition to the actual sharp advance in London, the continuous fall in the American dollar continued to lift the important parity.

The national corporation also said it has sold very little 1933 wool and was in excellent position, as also were the wool merchants, to obtain more money for wool growers on the future rise in prices.

20 Minutes versus ---Three Hours

Have your neighbors ever dropped into your home to borrow the weekly collection of circular letters, hand bills, etc., that the users think are as good as advertising in your favorite country newspaper?—Menomonee (Wis.) Falls News

Few people realize the actual coverage of even the most modest country newspaper. Not so long ago an advertising expert was quoted as saying that careful research had ascertained that a certain well known metropolitan paper is read, on an average, for the space of 20 minutes, while the average country newspaper has a "reading life" of 3 hours to its credit! It is kept 'round the house for a week and everyone in the family takes his turn in going through its pages.

That is something for both subscriber and advertiser to think about.
