Frio Draw Floods Area

Over 12 Inches Falls At Rhea

Near-record rains last week succeeded in flooding a goodly portion of the north section of Parmer county this past weekend as waters from the swollen Frio Draw came out of the banks and spread across croplands from the Rhea Community across Parmer county into Castro county.

Rains totalling from 9 inches to over 13 inches fell last week and with a cloudburst Friday night near Parmerton hill the Frio Draw moved out of its banks and sent livestock and farmers running.

Local residents joined their neighbors Saturday morning, and late into the night at the levee in downtown Friona to watch the floodwaters roll by.

Despite fears of some residents, dams across the draw at the G. W. Jones farm, eight miles west of town, held and diverted floodwaters into a large lake on his land until Friday night when the cloudbursts at Parmerton hill and the surrounding sent the water rolling toward the draw.

Old-timers are divided upon their opinions of this flood. Most agree that the draw didn't get as large as it did in 1941 when the depot and all the low-land businesses were covered with water.

However, a lot of them agree that some of the lakes in the area are larger than they have ever seen them.

Some of this may be caused by the tillage practices in this day and time as compared with ones 20 years ago, plus the fact that there are more borrow ditches now to divide up the water.

But--it is a fact that for three days and nights if you wanted to go to Rhea and that direction out the paved road west of town you'd best have pontoons.

From the Martin place west to Ralph Wilson's hill the road was covered with water, then on the other side of the hill to a point about one and a half miles west of 10-mile corner the road was covered again.

Saturday night the draw was back in its banks along town and by Sunday things began to pop out of the water in the country. (For complete details on the rainfall over the county see this week's Farm & Home Section.)

In Friona the official rain gauge at Friona Consumers totalled 7.61 inches of moisture with the heaviest recording made July 7 with 2.43 inches.

The complete breakdown for the week is as follows:

FRIO DRAW CUTS UP SATURDAY -- The Frio Draw belched out of its banks Saturday morning about 4 a. m. and cut off the Kendrick Fertilizer Co., Chester & Fleming Gin, Crow's Plant and other business across the levee from Friona. The draw was held back from the lowlands south of town by the levee constructed after the 1941 floods, but did go over the bridge and down the road to flood areas between the dikes.

FRIONA, TEXAS THURSDAY, JULY 14, 1960 TEN CENTS

THE FRIONA STAR

16 PAGES VOLUME 37, NUMBER 41 SECTION 1

By the time this appears in print, our readers will more than likely know how the Democratic Party voted on a candidate for the President of the United States.

But--as we sit here and stew over the goings-on out in California right now--well to put it bluntly--we are &- pretty well fed up with a bunch of damnyankees.

And, what is even more of a travesty, Honest Jack Kennedy has had the guts in past years to "investigate" Jimmy Hoffa.

More than likely, it should be the other way "round the way things are going right now. Talk about payola, Hal!

Kennedy and his pals ought to know how to recognize payola, it seems they are past masters at the art.

But--IF Kennedy gets the nomination as the Democratic Party's candidate, you watch what will happen in November... our nation will be "blessed" with another Republican for President.

We just hope that Landslide Lyndon can use some of the art that got him elected to the Senate back after the war and slip by Kennedy somehow, for he is the only hope that we can see to keep little Richard out of the White House.

If LBJ doesn't make it, we are in favor of pulling out the Rebel flags and running Johnson for President of Texas and seceding from the Union!

This has been another tragic weekend--Sunday afternoon members of the Friona Volunteer Fire Department were called upon to answer the call for help to drag a lake for an unfortunate swimmer.

True--the boy couldn't swim--and many have said that he had no place in the water if he couldn't swim, but the fact remains he was in the water, and lost his inner tube, and his life Sunday.

If some of those opposing the construction of a swimming pool in Friona could be around to help pull the limp body of some unlucky kiddoes out of the water, just once, we think they would quickly voice their opinion in another manner.

Friona Girls Ready For All-Star Game

Three Friona high school basketballers will leave next week for Huntsville for the annual Texas High School Girls Basketball Coaches Clinic where they will compete in the All-Star game Saturday July 23.

The girls, Jacquelyn Magness, Lawanna Houlette and Charlotte Bock were members of the Friona High School's Class AA State runner-up champions.

Coach Baker Duggins of FHS, will coach the North All-Stars and will be assisted by Coach F. G. Crawford of Claude.

School Tax Rate Same As 1959-60

There will be no changes in the tax rates for the Friona Independent School District members of the board of trustees of the Fisd decided at their regular meeting Monday night.

The tax rate for 1960-61 school year will remain at \$1.75 per \$100 valuation same as last year.

This was voted upon following discussion of the school's financial condition with Superintendent Alton Farr and the Tax Assessor and Collector Dan Ethridge Monday.

Farr told the group that the rate increase of last year "pretty well took care of our deficit" during the past year and "it looks as if we are going to come out all right this year."

Ethridge pointed out that the new estimated evaluation of the school district increases about \$5,000 tax-wise each year.

This year school officials were told the state aid will decrease by about \$12,000 because the economic index of the county keeps going up each year.

This "economic index" is a figure arrived at each year by the state and is based on the ability of the county to support itself without state aid.

Expenses for the school district for last year ran \$395,832.25 as compared with estimated expenses for the coming year to be \$399,883.75. The

Six Vacancies Remain

Six teacher vacancies remain on the faculty for the Friona Independent School District announced Superintendent Alton Farr at a meeting of the board of trustees Monday night.

Two new teachers for the coming year have been hired by Farr. They are Mr. and Mrs. Guy Lemmond who will move here from Avery in East Texas.

Mr. Lemmond will teach high school math and will replace Luther Hayes. Mrs. Lemmond will teach in the 5th grade, replacing the vacancy of Mrs. Marguerite Bruce.

Mrs. Troy Ray has been assigned to the second grade position vacated by Mrs. Hayes.

Mrs. Ray formerly taught public school music in the Friona schools grade four through eight.

Other vacancies remaining to be filled include a sixth grade teacher, vacated by S. W. Walker; seventh grade teacher, vacated by Mrs. Joanne Hairgrove and an eighth grade teacher, which is a new teaching post in the school system.

Two high school positions remain open, a science post, vacated by Miss Jo Eddy Scott and a commercial teaching post, vacated by Roy Simmons.

The other teaching post is the public school music post vacated by Mrs. Ray.

Parmer County Gets A District Clerk

In the democratic primary and general election of 1962, Parmer County voters will elect for the first time a district clerk separate from the county clerk.

Separation of the two offices, which have in the past been held by one man, will take effect due to the county's population exceeding 8,000 in the 1960 census. The county population in 1950 was 5,787 and this year's census showed a populace of 9,492.

Building Permits

Building permits were issued to the following at the City Hall during the week ending July 12:

William Beene--permit for the construction of a home and office at an estimated cost of \$18,500.

J. G. McFarland--permit for the construction of an addition to a business building at an estimated cost of \$10,000.

Golden Anniversary Observation Slated

Immanuel Lutheran Church at Rhea will observe its golden anniversary Sunday, July 24.

Guest speaker will be Rev. A. M. Lohmann of Perryville, Mo., who was first pastor of the church. Services will be at 10 a. m. and 3 p. m.

Lunch will be served in Parish Hall at noon and a social hour will follow the afternoon service.

Members of the anniversary committee arranging the celebration are Melvin Sachs, Chris Drager and Robert Schaefer. Their wives are members of the Ladies' Aid anniversary committee.

15 Year Old Boy--

Friona Firemen Assist In Drowning Search

Members of the Friona Volunteer Fire Department traveled to the scene of a drowning accident Sunday afternoon where they assisted in the recovery of the body of Jimmy Conyers, 15 year old son of Mr. and Mrs. John Conyers of Hereford.

The accident occurred when young Conyers and a friend, Glenn Williamson, were swimming in a flood-formed lake about 14 miles northwest of Hereford.

Williamson, who was a swimmer, told authorities that he and Conyers were in the water, Conyers was on a truck tire inner tube and he was swimming along in front.

He told that he looked around but before he could do anything the youth went under.

Williamson, who lives about a half mile west of the lake ran for help.

The body was recovered by those in the boat of Danny Mac Bainum of Friona, Bainum and J. C. Blankenship also of Friona along with members of a disaster unit from Amarillo found the boy's body about 100 yards from the spot he went down.

The body was recovered about 5:15 p. m.

Ray, Wood To Attend FFA Conclave

Connie Ray and Ronnie Wood will be the Friona chapter of the Future Farmers of America official delegates at the State FFA Convention to be held Wednesday, Thursday and Friday at Houston.

The boys will join over 2,000 delegates from over the state in the Houston Coliseum to choose their state officers and policies for the state organization during the next year.

J. C. Lane and David McVey, vocational agriculture instructors in the Friona schools will accompany the boys on the trip.

They will return to Friona this weekend.

CITY COUNCIL POSTPONES MEETING

A regular meeting of the city council of the city of Friona has been postponed until Albert Field, city manager, returns next week from vacation, announced Mayor R. L. Fleming.

The regular meeting will be held Monday night at 7:30 p. m. in the city hall.

Maurer Attends Church Meeting

Carl C. Maurer was Union Congregational Church's delegate to a national meeting of lay men and women and clergy at which the constitution of the United Church was formulated. Meeting began July 6 in Cleveland, Ohio.

THE RAINS CAME-- One Night's Action

Associated Growers and Star-Hurst were the victors in the only two games played this past week at the Friona Junior League Park.

Due to the rains of last week the other scheduled tilts have been postponed and will be rescheduled as quickly as possible.

Associated Growers downed Brookfield in the first game Monday night by a score of five to three.

Ray Braxton was the winning pitcher and gave up six hits, eight walks and struck out 12 batters while hitting four men to salt the game.

Travis Graves was the losing pitcher and gave up six hits, walked two and had nine strikeouts.

Brookfield's Drillers left the bases loaded--three times during the game and left a total of 13 men on bases.

In the second game of the night Star-Hurst squeaked by McCaslin five to four.

Scott Cummings was the winning pitcher while Santos Esquivel was charged with the loss.

Cummings allowed three hits, six walks and 14 strikeouts while Esquivel allowed five hits, five walks and got 12 strikeouts in the game.

Weather permitting Friona State Bank will play Brookfield and Benger Air Park will play Coop Saturday night in a makeup game.

100F INSTALLS OFFICERS--Mote Gibson, center, Deputy Noble Grand of Muleshoe, was the installing officer at the ceremonies held by the Friona 100F Lodge Tuesday night. Bill McGlothlin, left, is the Vice Grand and Bud Reed, right, is the Noble Grand of the Friona Lodge and both were installed Tuesday.

Of Interest To THE WOMEN

Prayer Program Topic

Prayer was program topic Tuesday morning when Mekka Circle of WSCS of Friona Methodist Church met in the home of Mrs. Fay Reeve.

Sharon Reeve gave the invocation and Mrs. Guy Latta gave a prayer by Alfred Lord Tennyson. Discussion topics were Growth in Prayer presented by Mrs. Reeve and The Endless Adventure of Prayer presented by Mrs. Howard Ford.

Closing was the Lord's Prayer sung by Linda Johnson.

Members present were those mentioned above and Mesdames Mack Balnum, Bill Baxter, Arthur Drake, R. N. Gore, Dorothy Hough, Billy Sides, Ed White, and Wes Long.

Daughter Born To Vern Nazworths

Debra Gayle is the name given to the daughter born to Mr. and Mrs. Vern Nazworth of Amarillo. She weighed 6 pounds and 2 ounces.

Grandparents are Mr. and Mrs. W. J. Nazworth and Mr. and Mrs. Tom Gibson, all of Friona.

Older children in the family are Charlotte and Curtis.

Local

The Eric Rushing family returned Saturday night from a vacation trip through several western states. They toured points of interest in Colorado, Utah, Nevada, Arizona and New Mexico.

Mrs. A. W. Lavender is a guest in the home of Mr. and Mrs. Herbert Garth. Mrs. Lavender, who lives in Longview, is Mrs. Garth's mother and returned with local family who spent last week in Longview.

The Tom Wellens and their children and grandchildren returned Tuesday from a brief vacation in Colorado. Making the trip were Mr. and Mrs. T. A. Kelley and children of Plainview, Mr. and Mrs. Joe Wellens and children, Mr. and Mrs. Delton Wellens and girls, Tommy Wellens and Gary Goetz. They spent the weekend at South Fork, Colo.

Mr. and Mrs. Elmo Collins of Lubbock visited Mrs. Fay Reeve Sunday. Mrs. Collins and Mrs. Reeve are sisters. David Reeve, who had been visiting his uncle and aunt, returned home.

Spending the weekend in Red River were the Guy Lattas and Ralph Sheltons.

Recent visitors in the Jake Lamb home were their son and family, Mr. and Mrs. John Lamb and SuZan of Waco. They were enroute to Estes Park, Colo.

Guests of Mr. and Mrs. Dave McReynolds last Wednesday and Thursday were Mr. and Mrs. Bud Fichte of Fort Worth.

Mrs. W. D. Cooper, Mrs. J. R. Nazworth and Billy Ray Nazworth went to McKinney early last week. Mrs. Lizzie Cooper returned with them for an extended visit with the W. D. Coopers.

Weekend guests of the Alvin Gaines family were Mr. and Mrs. Horace Payne and Paula of Dallas and Mrs. Clara McAlpine of Baton Rouge, La. Payne and Mrs. Gaines are cousins and Mrs. McAlpine is a friend of the family.

Recent visitors in the John

Young People Present Mekka Circle Program

"Send Ye Forth with Joy" was the topic of a program presented by three MYF members to Maggie Hamlin Circle of Friona Methodist Church WSCS Tuesday morning.

Members present were Mesdames Estis Bass, Kenyth Cass, H. R. Cocanougher, Jake Lamb, Meryle Massie, Will Osborn, Ralph Shelton and E. H. Bradshaw. Mrs. H. C. Biggers of Alexandria, La., was a guest.

Holcomb Honoree At Shower

Shower gifts were displayed under an umbrella topped with a blue garter at a pre-nuptial courtesy for Miss Elaine Holcomb Saturday afternoon in the home of Mrs. David Carson.

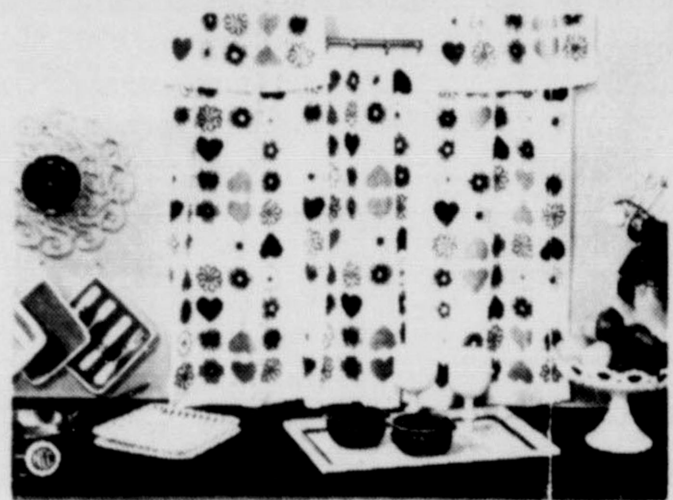

Miss Holcomb is bride-elect of Jerry White of Midland.

Red and white, chosen colors of the honoree, were used on the refreshment table and the hostesses served white cake with red punch. Miss Holcomb and her mother, Mrs. F. W. Holcomb, were presented red corsages.

Hostesses were Mrs. Carson, Mrs. J. V. Houser, Miss Geneva Floyd and Miss Janet Sneed.

Guests included Miss Peggy Holcomb, Kay Struve, Winette Beaton and Carolyn Carson.

ENGAGEMENT ANNOUNCED -- Mr. and Mrs. Russel O'Brian are announcing the engagement and approaching marriage of their daughter, Linda, to Loyd Chesher. He is the son of Mr. and Mrs. J. O. Chesher. No invitations are being mailed locally and friends of the couple are invited to attend the August 20 ceremony in Friona Methodist Church at 7:30 p. m. with Rev. Wallace Kirby officiating. A reception will be in fellowship hall of the church.

KITCHEN BRIGHTENERS—Cotton terry cloth towels designed for use in the kitchen do a wonderful job of drying dishes, but their brightly printed patterns also make them ideal for kitchen curtains, table mats, and chair cushions. Cafe curtains above were made by attaching brass clips to one end of colorful kitchen.

Wright home were Mrs. Willie D. Nichols of San Jose, Calif., and Mr. and Mrs. Gene Gruell of Lubbock. The women are sisters of Mr. Wright.

Former residents Mr. and Mrs. Bill Alexander and Kim, Kay and Jan visited friends in Friona over the weekend.

Mr. and Mrs. Floyd Kizzia of Delight, Ark., were weekend guests in the homes of Mr. and Mrs. Claude Osborn and Mr. and Mrs. Sloan Osborn. Mrs. Kizzia is a sister of the two men.

FAMILY PUTS 2,000 MILES A MONTH ON CORVAIR THINKS IT'S MARVELOUS GAS MILEAGE "OUT OF THIS WORLD"

Mr. and Mrs. Richard Kahelin of Plant City, Florida, couldn't be happier with the way their new Corvair has worked out as a combination family and business car. On their newspaper distribution route alone they travel more than 400 miles a week over all kinds of roads. Little wonder they're so pleased with the gas mileage they've been getting -- "at least twenty-three miles to the gallon with an automatic transmission . . . and we've had no trouble with our Corvair." The Kahelins have equally good things to say about Corvair's easy-going comfort and unique convenience features. They especially like the way the fold-down seat doubles as a built-in baby sitter.

DRIVE A CHEVY CORVAIR

FOR ECONOMICAL TRANSPORTATION

If you haven't driven it yet, you don't know what a delight driving can be. Its steering, response, traction and roadability are unique because it's a unique car -- the only U.S. car with an air-cooled airplane-type rear engine, transaxle and independent suspension at all four wheels. Be in on the know. Find out what delightful differences this advanced design makes.

SPORTS AFIELD

By **Ted Kesting**

Outboard cruisers have improved so much the last ten years that they just don't look like the same type of boat. Virtually all new cruisers are well capable of a comfortable two-week, or longer, cruise. With this long-range potential, many boaters are setting their sights for their first long cruise. Careful planning can pay off, says Willard Crandall, Boating Editor of Sports Afield Magazine. Make a check-list as you would for a pack trip. Houseclean the boat before starting, and remove anything unusable. This may sound radical, but look at it this way. Your first cruise will be, almost certainly, in civilized waters. That means you can buy what you need as you go along. Good docking facilities are much more numerous now.

In The Courts

The following cases were tried before Justice of Peace Thelma Jones during the week ending July 12:
 Trull Johnson--no MVI sticker.
 Othel Wayne Rhodes--failure to heed stop sign or signal.
 Charles Lee Love--failure to pass left safely.
 CORPORATION COURT
 The following cases were tried before Judge Thelma Jones in Corporation Court in Friona during the week ending July 12:
 Boyd Jones--contest of speed.
 Valderima Tjerimina--no driver's license; resisting arrest.
 Billy B Baker--speeding 55 mph in 40 mph zone.
 Inasencia Maviscaal--no driver's license.

MR. AND MRS. DAN McEVoy--

Texas Hospitality Impresses Visitors From Old England

"Texas hospitality is just indescribable," feel Mr. and Mrs. Dan McEvoy of Winchester, England.

Visiting Mrs. McEvoy's brother-in-law and sister, Mr. and Mrs. Walter Loveless, the couple feels that coming to Friona is just like coming home. On two previous visits they have made many friends with whom they have kept in touch.

REMINISCING AND PLANNING--Remembering past good times and planning future visits are occupying the time of a Friona couple and their guests. Mr. and Mrs. Dan McEvoy, right and second from left, of Winchester, England, are in Friona for a visit with her brother-in-law and sister, Mr. and Mrs. Walter Loveless. This is the third time the McEvoy's have been here and the Loveless plans to visit them in Winchester in a year or two.

Another homelike touch they noticed soon after their arrival July 5 was the rain. However, Texas rain is more torrential than that in England, observed Mrs. McEvoy. Mr. McEvoy has a nine-month leave of absence from his job and the couple plans to divide the time between Friona and Albuquerque where their daughter, Mrs. R. K. Williams, lives.

A trip to East Texas and the Gulf Coast is on their agenda when the weather is cooler, and they hope to obtain an extension of their visitors permit so they can spend Christmas in the States.

The visitors commented on Friona's growth. On their first trip here in 1949 they watched elevator construction and saw the first load of wheat go in.

"Space" is the biggest contrast with life in England, say the McEvoy's. Houses in Winchester are built with no room between them and front and back yards are tiny. Mr. McEvoy was thoroughly enjoying helping Mr. Loveless mow their large yard when a Star reporter called early this week.

An old cathedral city, Winchester is 12 miles from Southampton, the gateway to the world, and some 68 miles from London. It is also a university city and the pace is leisurely and quiet in comparison with the hustle and bustle in the States. "In fact, its almost dull" smiles Mrs. McEvoy but one has the feeling that dull moments would be few and far between in her company.

When asked if there was a possibility they might move to the States, Mrs. McEvoy shook her head. "We considered it, but I can't leave the grandchildren." In addition to Mrs. Williams, the couple has four other children.

Conversation with the visitors got around to television and the Americans were aghast to learn that licenses are required for both television sets and "wirelesses" in England. But when the visitors pointed out that British Broadcasting Company was supported by license fees and no commercials interrupted the programs, they agreed that it would be worth \$11 a year. Britain's Independent TV network, on the other hand, does have "adverts" and the viewers find them just as annoying as do we Americans.

Afternoon tea is a custom Mrs. Loveless brought with her from England and it is doubly pleasant with the McEvoy's here. Asked if visiting with her sister made her homesick, she replied, "Oh, my, no! But after Libby leaves it will take me six months to get through missing her." Mrs. Loveless plans a trip home soon to visit Mr. and Mrs. McEvoy and their other sisters.

LOOKING ACROSS THE FRIO DRAW SATURDAY--Saturday morning the Frio Draw as it crossed Highway 60 in Friona was out of its banks and liked only a few feet of reaching the bridge. The draw came out of its banks and flooded the lowland areas about 4 a. m. Saturday and ran all day long over the lowlands. The crest passed and the water began receding about 8 a. m.

When You Really Need a Friend

It hurts now, but a fall is just a part of her day's adventures. Grown-up falls are often more serious. If someone slips on your front steps and is permanently disabled, you may be liable for thousands of dollars in damages.

As independent insurance agents, we will help you get the protection you need against such a possibility. We cut through red tape . . . have all the details looked after until the claim against you is settled . . .

give you the peace of mind that comes from knowing your interests are safeguarded by a professional insurance specialist who understands your needs.

Take this sensible precaution: Discuss your home and car insurance with us . . .

Look for this Big "I" Seal when you buy insurance. To display it, we have had to meet professional standards designed to protect you.

Read Romans 8:9-15

If ye then be risen with Christ, seek those things which are above. (Colossians 3:1)
On the slope of a high peak in the Swiss Alps is a lonely grave. A wooden cross stands above the snow, but the name of the mountaineer is not there. One reads there only a simple stirring inscription:

"He died climbing"

He died climbing! What a wonderful spirit in which to live life--climbing, living honorably and usefully, to the very end! That man was not content to be half way up--he wanted to be at the top! Then only could he be satisfied. What a wonderful testimony of spirit!

I believe it is significant that Jesus was crucified on a hill. His final journey on earth was an uphill one. He bore His cross. He climbed. He struggled. He reached the top. He triumphed.

Our burdens can never be so heavy as the one He carried. The hill can never be so steep as the one He climbed. So let us climb, cheerfully, trustingly, onward and upward.

Fire Ignites Auto Sunday Afternoon

While most of the members Hereford assisting in rescue operations, an automobile fire was reported at the Farmer County Implement Company about 4 p. m.

Three members of the department, Charley Bainum, Fred White and Dave McReynolds, along with Bill Morgan and Roy Wilson extinguished the blaze.

Apparently the auto ignited from a fire in a trash barrel. No estimate of damage to the car was learned Sunday.

Successful individuals and couples usually run a gauntlet of envy, especially if they maintain any individuality.

Those who can't control their tongues operate at a disadvantage in society; they can't compete with the quiet schemers.

The weakness of a nation can be measured by the number of families in it who think it is smart to evade military service.

 Phone 4721 Friona

Water-Water Everywhere!

EIGHT MILES WEST of Friona on the G. W. Jones farm two dams held firm and diverted first floodwaters into a huge lake, and as they ran into this new channel they cut out this new bed. The waterfall in the picture (1) is about 10 feet high and the channel large enough to place a building in. (2) Sloan Osborn's homeplace six miles west was entirely surrounded by water for four days as rains poured water onto soaked fields. (3) This view is looking southeast about one mile west, the road in foreground runs in front of the

Rushing farm and the Highway 60 bridge can be seen in middle of picture. (4) This quarter section belonging to Paul A. Hall won't need prewatering as it was covered completely with from one to three feet of water. (5) This lake pump has its work cut out for it as it sits in the middle of the Draw on the old Seamonds ranch about one and a half miles east of town. (6) This is what most farmers had to travel through last week. This pickup looks amphibious as it travels toward Friona from the Rhea Community.

THE FRIONA  STAR
SECTION II JULY 14, 1960

in and around

FRIONA

WITH JUNE

The item that has been most plentiful in our neck of the woods during the past week has been WATER. At the Floyd home six miles west of town conditions were kind like the line of the poem that says, "water, water everywhere and not a drop to drink."

Although we had water all over the place and running water going by the house several days in a row, we didn't have drinking water except when we hauled it. Our domestic water supply was out of order, so we hauled drinking water and caught rain water for all other uses.

The biggest problem this arrangement created was "how to get rid of the surplus suds." Rain water is so much softer than Panhandle water that everyone invariably got too much soap in the dishwasher, bath water, etc.

Think the problem has been solved and we have an idea of how pioneers felt when they knew for sure water was available on their claims. For the next few weeks just having water that will run from a faucet will seem like a luxury.

As of the moment, the problem of "too much water" has also been taken care of. Several days it was necessary for us to drive through about 3 miles of water up to the running board of a pickup in order to get home.

Of course, all the water was beneficial to growing crops and West Texas farmers are generally satisfied to receive moisture that they don't have to pump out of the ground.

A few patches of wheat had not been harvested when the rain began, so haven't been harvested yet. Vegetable farmers were also slowed down by the rainfall.

If any of John Bengers' friends have been wondering why "Mr.

John" has been wearing such an unusually wide smile, they will probably be interested in knowing that he has a new grandson. Perhaps having a new grandson isn't such an unusual occurrence, but this one was certainly a special event in Mr. Bengers' life.

The new arrival belongs to Mr. and Mrs. Noel Bengers of San Jose, California and is the very first Bengers grandson in the John Bengers family. When the new father called to report the birth of the baby he was too excited to reveal the name or the grandfather was too excited to remember it.

Of no little importance to an aunt of the baby, Mrs. Guy Latta, is the fact that the two share the same birthday. Probably the Star will carry a complete story of this event next week.

If anyone hears the Bengers planning a flying trip to the West Coast, we'd like to know about it.

Another couple in the Black community also has a first grandson. The Calvin Ivies of Fort Worth have a new boy. He was born Wednesday of last week and the Rosco Ivies used the excuse of "it's too wet to plow" for making a quick trip to Cowtown.

They really should have stayed longer as it rained another four inches while they were away.

After spending one entire week out of town the writer of this column has kind of lost touch with what is going on up and down the street. One thing that just about anyone can observe is the July clearance sales in our department stores.

Those of us who haven't gotten around to buying summer clothes yet should certainly take advantage of the bargains that are being offered.

So much is being said and written about the dangers of socialized medicine in the United States that each of us should take time to give the problem some serious study. In this matter, as in all others where people expect to receive something from the government, it would be well to keep the American Indians in mind. What happened to them when they turned all their affairs over to the government of the United States?

Births

The following birth was recorded by the Parmer County Community Hospital with Justice of Peace Thelma Jones during week ending July 12: Boy--born to Mr. and Mrs. Jack London of Friona June 28 at 6:12 a. m. weighing 8 lb 7 oz.

A Tribute To Our 4-H Boys & Girls

What a comfort it is to know that on farms surrounding our city there are industrious boys and girls exemplifying the fine 4-H Club spirit. Head, Heart, Hand, Health--what a program of intelligence for any of us. Prize-winning cattle, Arts and Crafts, Prize-winning clothes, lovely enough for any woman anywhere. These are but a few of the 4-H Club Boy's & Girl's achievements. And no wonder this town is so proud of them. We salute these outstanding young men and women of the farm--and wish them all life's happiness now and tomorrow.

We Salute Friona

The Bible Teaches ...

"that the heavens shall pass away with a great noise, and the elements shall be dissolved with fervent heat, and the earth and the works that are therein shall be burned up." (II Peter 3:10) Seeing that these things are sure to occur, even as God has said they will, we are wise to seek for eternal security in that which will outlast the heavens and the earth.

Jesus said, Heaven and earth shall pass away, but my word shall not pass away." (Matthew 24:35) In his eternal word he teaches us how to live beyond destruction. He shows us the way into heavenly mansions where God dwells. Learn his way and walk therein while on time's side of eternity.

Heavy Rains Were Generally Beneficial

Cotton In Poor Shape

Heavy rains which brought from 7 to 15 inches of moisture to the High Plains last week were for the most part beneficial to area farms.

That was the consensus of opinion among farmers in spite of the fact that prospects aren't too bright for this year's cotton crop. Except for isolated areas near Texico-Farwell where there was some hail damage, the weather did not severely affect the cotton crop.

Neither did the large amounts of moisture help this basic High Plains crop which got off to a slow start this year due to a cold spring and insect infestations. The week-long, unseasonal rains came at a time when the sun was needed to bring out the blooms and point the crop toward maturity.

"Right now the cotton crop doesn't look very good," points out Joe Jones, Farmer County agent. "It wasn't in very good shape before the rain and naturally this moisture hasn't helped."

Jones was out over the county on Monday of this week checking some of the cotton and he reported much of it in poor shape. Some of the cotton is suffering from Ascochyta and Bacterial blight, fungus diseases which affect the leaves.

Due to the cold, wet spring, which contributed to widespread disease in the plants, some cotton had already been plowed under and sown into maize before the rain. There are still more fields which are suffering.

However, with the proper weather conditions from here on out, there is a possibility for what Jones termed a "fair" cotton crop. By proper weather conditions he was referring to plenty of sunshine for the next

several weeks and a late frost. Jones says that cotton is several weeks behind schedule. "In past years we have had blooms on the cotton by July 4, but this year it looks like it will be early August before there will be many blooms," he says.

What the cotton needs along with the sunshine is good cultivation, Jones says.

Aside from this year's cotton crop, the rains were generally a boon to agricultural prospects in the area. Grain sorghums and other feed crops will benefit the most from the moisture. Water is what was needed for and these crops and the rain couldn't have come at a more opportune time for the feed.

Also, the moisture on the wheat stubble will aid in getting this ground prepared for the next crop. It will now be much easier to plow under and the rain will help to provide a good moisture base for the next

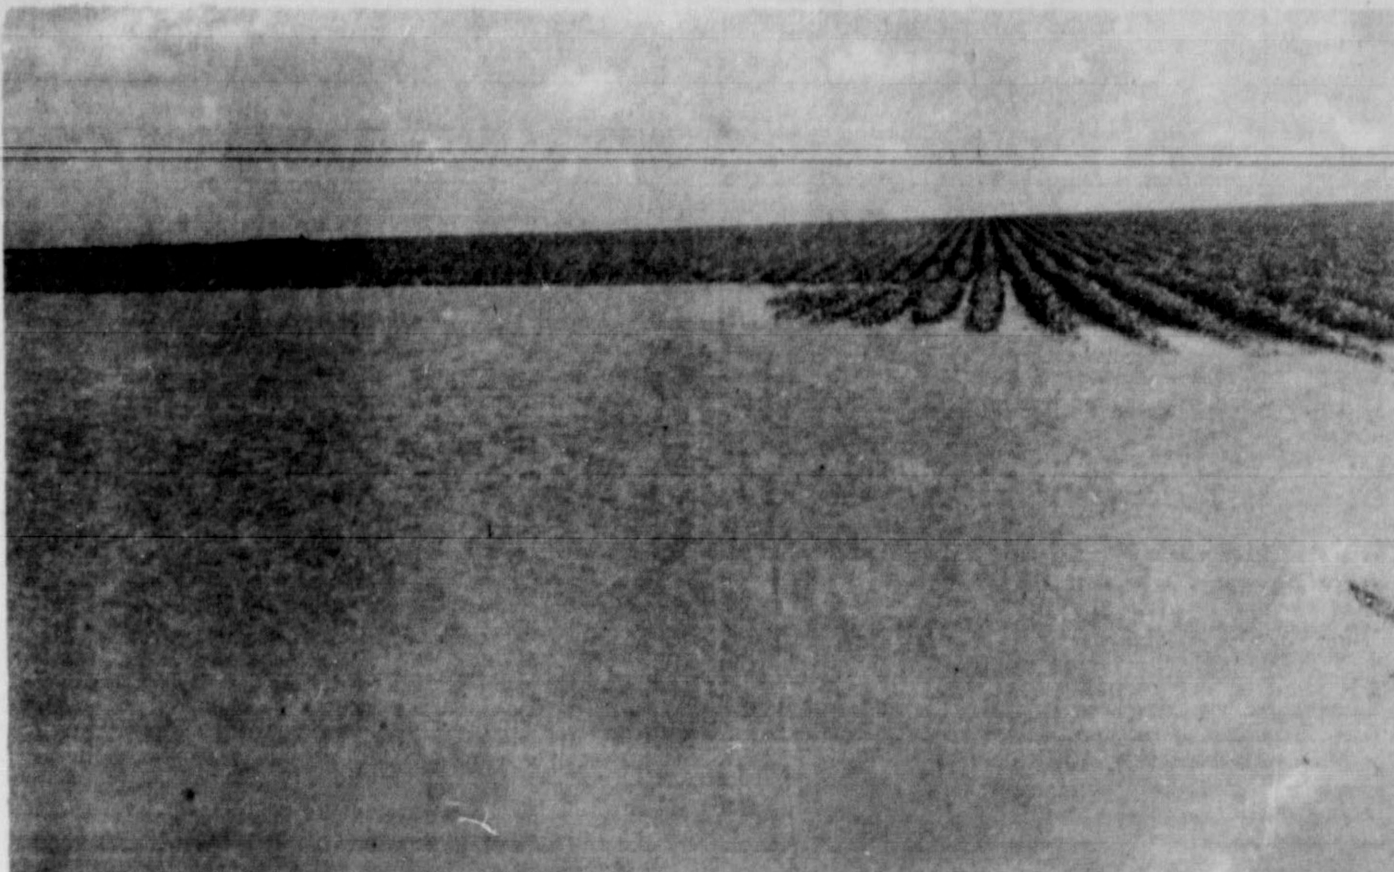

seed bed.

Weeds will naturally be a problem in all the fields now and will be hard to control. The rains will make them shoot up rapidly.

Because the moisture totals are already the highest on record for July, it would appear that additional water is something the crops can do without for a while. This is true to a certain extent, but it won't be long until the irrigation wells are running again, providing it doesn't rain some more.

"It won't take long for the cotton and feed to sap out the moisture from the top soil," Jones says. "And, the farmers will be turning on irrigation wells before the ground really needs it. That's so all of the fields will be covered by the time the crops are in need of added moisture."

(Check the rain map on next page for rain totals throughout the county.)

SCENES LIKE THIS WERE common sights throughout the county early this week following the week-long rains which brought as much as 15 inches to some areas. This picture was taken on a farm northwest of Bovina.

THE HIGH PLAINS FARM AND HOME

Farmers Union Asks President For Sugar Quota

A letter congratulating President Eisenhower for having cut the Cuban sugar quota and asking him for sugar beet acreage for Texas farmers was sent to the President last week by Alex Dickie, Jr., president of Texas Farmers Union.

In the letter Dickie said, "Congratulations on having cut the Cuban sugar quota. I think the vast majority of the citizens of this country feel this was long past due and you and the Congress have acted wisely. I would respectfully like to urge you to immediately take steps to have the Department of Agriculture distribute sugar beet acreage to our many thousands of adaptable sugar beet acres in Texas and

surrounding states. Our farmers are in desperate need of this money crop.

"I strongly feel that the United States consumer would prefer sugar grown on American farms to that of any other country in the world. We in Farmers Union stand ready to help in promotion of the sugar beet acreage in the adaptable areas in any way that we can."

Dickie stated that he would like to urge all interested farmers and sympathetic citizens to write to their congressmen and senators to release sugar beet acreage to adaptable farm areas throughout Texas.

"We should all work through our organizations, both farm and civic, to get this story of

the domestic production of sugar across not only to our elected officials, but to the citizens of the United States," Dickie said.

NEWS FROM THE FARM BUREAU

BY RAYMOND EULER

We hope all of you will remember to file for the Federal Road use tax refund on your farm fuels. You can do it now. Your dealer will give you the amount of gas you bought prior to, and after, October 1, 1959. The refund is 3¢ per gallon on that prior to that date and 4¢ after that date. We will be glad to help you with it if you wish.

Some of you still have invoices that can be sent in for refund of the 5¢ state tax, too.

If you are one of those, be sure to come in soon, before more of them expire.

Did you know that only five and six tenths per cent of the wheat farmers in the United States voted in favor of quotas last year? This is about four times as many as voted against them, but it still is not a very representative vote, is it? Why don't you vote this year?

Because of various things, Rhea Community did not hold a Fourth of July celebration this year. That's the first time in many years. Wheat harvest, other farm activities and work being done on the Parish Hall, where such meetings are usually headquartered were the reasons.

Farm Bureau Directors will meet Monday night. They skipped meeting the Fourth, too. You are welcome to attend. They'd be glad to see you, says Herman Gerles, and his directors and other officers join him.

July 24-30 is National Farm Safety Week. We suggest that, in preparation for that week's observance, you practice safety beginning now. Think about this subject, and you will no doubt make some changes in some of your procedures on the farm for the sake of safety.

We've always wanted to see that new volcano in Mexico (it appeared in 1942) and if we were in a position financially and had time, we'd go on the Texas Farm Bureau Goodwill tour July 14-24. Maybe you can go.

CONSIDER THIS: He that justifieth the wicked, and he that condemneth the just, even they both are abomination to the Lord. Prov. 17:15

Magnesium In Cotton Production Studied

Magnesium is one of the essential nutrient elements required by higher plants for normal growth and reproduction. Until recently, very little work had been done in relation to the magnesium requirements of cotton.

The Texas Agricultural Experiment Station has completed a series of studies in an attempt to learn these requirements. The studies were made under controlled conditions, and should be very useful as a guide for future field experiments. American Upland (Stoneville Z-106) and Egyptian (Pima S-1) cottons, grown in a nutrient solution under greenhouse conditions, were used in the tests.

The characteristic foliage symptoms of magnesium deficiency appeared first in the lower leaves of Pima S-1 plants which were more sensitive to magnesium deficiency

than the Stoneville Z-106 plants. Magnesium content of the plants reflected a positive correlation with the magnesium supply on which they were grown.

Substrate magnesium had a marked influence on plant growth and development as measured by height, weight, flowering, boll set, relative chloroplast pigment content and chemical composition. Differences in the response of the two species to various levels of substrate magnesium were also pronounced.

Complete results of these tests have been published by the Texas Agricultural Experiment Station. This publication may be obtained by writing the Agricultural Information Office, Texas A & M College, College Station, Texas. Ask for MP-411.

New Cotton Defoliation Guide Released

Effective March 5, 1960, defoliants and desiccants came under the regulations of Public Law 518. The basis for the control program on farm chemicals is to prevent undue risk from residues of the chemicals in the raw agricultural product.

Certain of these chemicals, however, have been granted an extension by the Food and Drug Administration, explains Fred Elliott, extension cotton work specialist. This extension is good until March 5, 1961, he says.

Any defoliant or desiccant used will eventually have tolerances or an exemption from tolerances designated for its safe use or will be registered on a nonresidue basis. Until official Federal regulations are issued governing the use of a specific defoliant or desiccant, it should not be used, Elliott warns.

In a recently published Texas Agricultural Extension Service leaflet, Elliott lists the chemicals that have been granted this extension, and gives a guide for their use. This leaflet may be obtained from the local county agent or from the Agricultural Information Office, College Station, Texas. Ask for L-145.

Accounting for almost one out of every nine automobiles in the United States, California tops all other states in gasoline consumption.

FLOOD WATERS WASHED OUT this road north of the Pleasant Hill community near Frio Draw. The washed-out area was about 15 feet in depth and 30 feet across. This area received nearly 10 inches of rain in one 24-hour period.

Buske Named To FHA Committee

W. D. Buske, who farms near Friona, has been named to serve on the Farmers Home Administration county committee, announces Billy R. Boling, the agency's county supervisor in Farmer County.

Buske succeeds Richard V. Rocky of Black, who has served on the committee for the past three years. Buske, also selected for a three-year term, will serve with Earl D. Stevenson, Bovina and M. T. Glasscock, Farwell.

and cotton and also run some cattle. "With his knowledge of the county and farming conditions here, Buske will be a valuable addition to the committee," Boling says.

The county committee determines the eligibility of individual applicants for all types of FHA loans. The committee also reviews borrowers progress and aids the county supervisor in adapting the agency's loan policies to conditions faced by farmers in this area.

Members are selected and appointed so that, as far as possible, different areas or neighborhoods are represented, Boling says.

Get your weed killer Wonder Bar soon. Also insecticides and fly bait. From us. We have them.

We are ready to double treat and clean your seed wheat and barley.

Also we are buying seed wheat and winter barley each week. See us.

Some farmers are now booking their requirements for winter barley and seed wheats. We have these.

Atlas Sargo, African Millet and Red Top will make a lot of ensilage or bundles if planted now. Might make grain, frost is late.

Texas No. 590 and Genetic Giant No. 99 might make grain. They are fast.

We will buy your wheat and barley. Got any oats?

MOISTURE MAP

(From Last Sunday Through Monday)

Wheat Allotment Virtually Same

Notices of the 1961 wheat allotment have been mailed to Farmer County farmers, and there is virtually no change in acreage as compared with the present year. Farmer County's allotment is 106,354--down only four acres from the 1960 total.

The national acreage allotment remains at the minimum 55 million acres which has been in effect for the past six years. That is the main reason for the local allotment stability.

Individual allotments are based primarily on past wheat production history.

"All growers who will produce more than 15 acres of wheat in 1961 will be eligible to cast ballots in the July 21 referendum, on marketing quotas for the 1961 crop," points out Prentice Mills, ASC office manager.

"Growers who have smaller acreages and those who are taking part in the feed wheat pro-

gram are not eligible to vote, since the wheat from such farms would not be subject to marketing quota penalties."

Mills says the referendum will decide important questions for wheat producers. If at least two thirds of the growers approve quotas, then they will be in effect for the 1961 crop, marketing penalties will apply to the "excess" wheat of growers who do not comply with their farm allotments, and price support will be available at not less than 75 per cent of parity. The exact support price level is soon to be announced.

If more than one third of the voters approve the quotas, there will be no quotas or penalties for the 1961 crop, and price support will be at 50 per cent of parity. Allotments will remain in effect as a condition of price support eligibility only.

Flocculent May Prove Successful For Removing Playa Lake Sediments

Tests conducted recently on the High Plains indicate that a commercial flocculent, Separan AP-30, may prove successful for removing sediments from playa lake water used for groundwater recharge. Application of the flocculent reduced the amount of silt plus clay entering a recharge well in a 24-hour period by 49 per cent.

During the test, which consisted of a 24-hour recharge period, the flocculent was added at a constant rate of 0.7 ppm to the water at the inlet pipe in the lake. The irrigation pump was operated for one hour at the end of the recharge period. Samples were taken of the unflocculated water at the pipeline intake and of the flocculated water at the well inlet. All samples were mixed for a minimum of 3 minutes, and no dispersant was added. The sediments in the flocculated samples were determined in only two categories: sand and silt plus clay.

There was an increase in sediments in the untreated water about 4 hours after the test was started. This sediment increase was caused by an increase in wind velocity. A correspondingly smaller increase in sediments occurred in the treated water. The smaller increase in the sediments in

treated water indicates that the flocculent may be more efficient when used in water containing higher amounts of sediments. The total silt plus clay flocculated from the water that entered the well, using Separan AP-30, was 1,576 pounds, or 49 per cent of the total sediments in the water.

Results from this test indicate that, under more favorable conditions, Separan AP-30 may prove to be a successful flocculent for removing sediments from playa lake water used for groundwater recharge. More tests are planned for the future in which conditions will be varied to determine if more efficient results can be obtained.

These studies were conducted cooperatively by the Texas Agricultural Experiment Station and the Soil and Water Conservation Research Division of the USDA.

FARM & RANCH LOANS
Long Term -- Low Interest
Ethridge-Spring Agency, Friona
Phone 8811

WITH THE COUNTY AGENT

JOE JONES

Those of you who plan to sidedress grain sorghum should remember that for best results the sidedressing should be done about 35 to 42 days following planting. This will insure you that the plant food is there for head formation.

Applications should be made in or near the middle of the row to prevent root injury. Sidedress with nitrogen only. Phosphate should be put down prior to planting or at planting time.

Tascosa wheat looked good this year. It is just a little shorter, has a strong straw, the kernels are held tightly by the glumes. It is just a little harder to thresh in most instances which could also be an advantage in case of light hail or hard winds. No one has reported any difficulty with combining Tascosa even though it is held a little tighter by the glumes.

Two-hundred-ninety-six pairs of Bobwhite Quail were delivered to 29 co-operators last week. J. L. Ivy of Lazbuddie did not receive his, but they are ordered and will soon be here making 30 co-operators receiving quail.

If you want fish for your lakes you had better hurry and order. I have been informed that deliveries will be made to Farmer County in late July or early August. I have order blanks in my office. A. L. Kirby, Bovina; W. L. Edelman, Friona; and Bill Nichols, Friona, also have blanks.

This year's wheat crop will soon be history except for the residue left around. What is done with this residue within the next 30 days will greatly influence the 1961 wheat crop and future crops.

It takes moisture, temperature and nitrogen for the bacteria to feed on to decompose organic matter. If you want to get your land in the best possible condition for a 1961 wheat crop, you had better consider addition of a nitrogen fertilizer before turning the straw under. Try to get the breaking job done in July if possible while there is plenty of moisture and warm weather left to rot the straw.

Wheat straw rolled into a lister-ridge does not make a good seed bed. In most instances such preparation of land results in lower yields, which in turn means you have paid for

nitrogen and tillage practices necessary to decay the straw and just a little extra. A lot of the wheat produced in 1961 will be produced within the next 30 days.

Every form of fertilizer has its place and you may find it advantageous to use a dry form of fertilizer such as ammonium sulfate or ammonium nitrate, urea, or urea which is a liquid form of urea.

The rains have come and us just as wet as we can possibly be, but our early grain sorghum will need water sooner than you may think, so be ready and don't get caught.

H. D. AGENT'S CORNER

Jimmie Lou Wainscott

MAKE THE MOST OF MID-SUMMER CLOTHING SALES...

There's something about a sale that seems to arouse a sense of adventure in women--an expectant sort of feeling that has to do with "getting a really good buy."

Right now, many stores are having sales--featuring fabrics, summer dresses, and other items. Extension clothing specialists of Texas A & M College point out that as a careful shopper, you can make the most of these special prices to fill gaps in wardrobe, or add some needed pieces.

Here are some tips offered by specialists for analyzing the situation before you buy a certain fabric or clothing item on sale or otherwise:

- Keep your total wardrobe plan in mind. Buy only those items that fit in with your budget, color plan, accessories and activities.
- Consider lines, color and texture of the garment.
- Are they really suited to your type? Are they extreme or high fashion - likely to look wrong next season?
- Look at the label carefully... Get as much information as possible on care and cleaning.

Other suggestions for stretching clothing dollars are given in the extension bulletin,

"Wardrobe Dollars and Sense"

Principles given in the publication apply to all family members.

Ask for a copy of the bulletin from your county home demonstration agent's office.

KEEP VEGETABLES FRESH --STORE THEM PROPERLY...
Store those fresh vegetables properly, when you bring them from the store or garden. Otherwise, they will lose flavor, food value and appeal quickly, says Frances Reasonover, extension foods and nutrition specialist of the Texas A & M College System.

Refrigerate all vegetables except potatoes and dried onions, as soon as possible after purchasing or harvesting. Exposure to air and light causes wilting and a great loss of essential nutrients.

Wash and clean vegetables carefully. Dirt may hasten spoilage. Drain off excess water, but store while moist for better crispness. Trim away bruised or spoiled areas to prevent rapid spoilage.

All leafy vegetables and broccoli, cauliflower, peas, beans, carrots, celery, green onions, radishes and cucumbers, should have moist cold. Store them in the crisper pan of the refrigerator in moisture-vapor-proof wrapping, such as aluminum foil, cellophane or plastic.

Never pare or cut vegetables before storing. Peas or fresh lima beans retain more vitamins if stored in the pod. If they must be shelled in advance, store in tightly covered jar or plastic bag in the refrigerator.

For more information on vegetables, get a copy of "VEGETABLES--SELECTION, CARE, COOKING" from your county home demonstration agent.

County FHA Loans Total \$552,955

Loans totaling \$552,955 were made by the Farmers Home Administration to farm families in Farmer County during the fiscal year ending June 30, reports Billy R. Boling, FHA's county supervisor.

Borrowers repaid \$722,543 during the year on loans of all types, Boling says. These payments were on loans made in past years and they came mainly from the sale of wheat, grain

sorghum and cotton. The bulk of the loans made this past year were for operating purposes, such as the purchase of feed, seed, fertilizer, pesticides, livestock, machinery and equipment, and the making of recommended adjustments in farming systems. Loans made to meet this type of need totaled \$545,005.

Farm real estate loans during the year totaled \$7,950.

Farmers used these loans to improve or purchase farms or farm land, to build or repair farm dwellings, to install and repair irrigation systems, and to finance other essential farm construction.

Throughout the county are many farm families who have borrowed from FHA in former years and are still making scheduled repayments, Boling says. Many other families in

"From 3 to 13 My Dishes Get Clean.. Automatically.."

says Mrs. Don Winter, 1401 W. Beaver, Guymon, Okla.

Here's an enthusiastic homemaker who fully utilizes her electric dishwasher, whether it's just the family three for breakfast or a friendly dinner group of thirteen. In either situation, Mrs. Winter merely "pushes the button" for sanitary, clean dishes. Incidentally, all the dishes used by the thirteen people in the actual dinner party pictured easily went into Mrs. Winter's electric dishwasher with plenty of room for proper washing.

"OUR ELECTRIC BILL IS THE BIGGEST BARGAIN WE HAVE"

It's the man of the house who usually pays the bills and Mr. Winter is no exception. Despite unlimited use of electric service in the Winter home, Mr. Winter is happy with the low cost of his electric service. No wonder he says, "Our electric bill is the biggest bargain we have."

"Tascosa wheat has a shorter straw and therefore easier to work back into the ground, not as susceptible to rust, and is ready to harvest earlier", says Edelmon.

Walking across the stubble ground on his place where the test plots were planted he pointed out the variation in stubble length and picked up a few heads of wheat on the

ground. "We got 16 per cent hail on our wheat this year and several of the varieties really got hurt," he says.

"I feel that the Tascosa will still produce more after such treatment than most of the wheat we had planted," he says.

"Tascosa wheat will be the most popular planting wheat on the Plains when they get enough seed to go around," predicted W. L. "Preach" Edelmon, a Farmer county farmer who runs his own experiment station on his land in the Black Community.

Edelmon based this prediction on his own experience with the new wheat variety after cutting the 12 varieties of wheat he had sown on his land this year.

Despite the fact that Concho wheat out produced his Tascosa variety Edelmon stuck with his opinion and based it on three facts--

Edelmon planted 12 varieties of wheat in a .25-acre plot and treated all the varieties alike.

All were watered four times, once in December then two times in April and the last time May 10.

The land was fertilized with 100 pounds of anhydrous ammonia and the wheat was sown on summertilled land.

All 12 varieties were planted October 15, 1959 and all were harvested on the same date, June 22, with the exception of Cheyenne which was too wet to cut and was harvested one week later.

Edelmon got seed for three of his plots from the Bushland Experiment Station near Amarillo. These were Tascosa, Westar and Aztec.

Community Grain contributed the Knox seed and John Mars the Kiowa seed.

"Wheat stubble is one of the hardest things we have to work back in our soil, and a shorter stemmed wheat, plus one that will yield well is what we need, or what I think I would rather have on my farm," he says.

All the wheat was harvested with the exception of the Cheyenne on the same day regardless of moisture content. The yields were then converted to 14 per cent moisture on straight percentage basis in order to find some common rating for all varieties.

A complete graph with all the information Edelmon recorded concerning this experiment accompanies this story.

New Wheat Variety Released For '61

Seed from Tascosa, a new hard red winter wheat variety which produces excellent yields of outstanding quality, will be

available from producers of certified seed after the 1960 harvest.

Tascosa was developed by the Small Grains Section of the Texas Agricultural Experiment Station in cooperation with the USDA. It was named for Tascosa, the early Panhandle settlement west of Amarillo.

Tests on the Rolling Plains show Tascosa ranking first in yield. In regional trials in 61 station-year tests, Tascosa averaged 33.7 bushels per acre over a 4-year period compared with 33.3 for Concho and 31.4 for Comanche. The new variety has not yielded as well as Crockett in North Central or Central Texas tests, and because of this and its susceptibility to certain diseases, it is not recommended for these areas.

Tascosa differs considerably from the present commercial varieties grown in Texas. The plants are shorter in stature and the straw is strong, which aid in resisting lodging. The variety resists shattering and may require special setting of the concaves for threshing because the kernels are held tightly by the glumes.

Further information about Tascosa can be obtained by writing the Agricultural Information Office, College Station, Texas, and asking for Leaflet 483.

Be sure to select him yourself as taste differ. Do not go the market for him as the best ones are always brought to the door. It is far better to have none unless you will patiently learn how to cook him. A preserving kettle of finest porcelain is best, but if you have nothing better than an earthenware pipkin, it will do with care.

See that the linen in which you wrap him is nicely washed and mended and has the required number of buttons and strings neatly sewed on. Tie him into the kettle by a strong silken cord called comfort, as the one called duty is likely to be weak. They sometimes fly out of the kettle and so become burned and crusty on the edges, since, like crabs and lobsters, you have to cook them alive.

Make a clear steady fire out of love, neatness and cheerfulness. Set him as near this as seems to agree with him. If he sputters, do not become anxious. Some husbands do this until they are quite done. Add a little sugar in the form on what confectioners call kisses, but no vinegar or pepper on any account. A little spice improves them, but it must be used with great judgment.

Do not stick any sharp instruments into him to see if he is becoming tender. Stir him gently, lest he lie too flat and close to the kettle and so become useless. You cannot fail to know when he is done. If thus treated you will find him very digestible, agreeing perfectly with you and he will keep as long as you want, unless you become careless and set him in too cold a place.

Wheat Harvest Above Average

For all practical purposes, this year's wheat harvest, considered above average by most elevator men, has drawn to a close.

Last week's soaking rains came before all of the wheat was out of the fields, but only a few acres remained to be cut. "It's at least 95 per cent over," was a statement heard from most elevator men in the county early this week.

If it doesn't rain any more, combines should start getting back into the field this week and by the early part of next week the harvest should all be over with. As far as the wheat crop as a whole was concerned, the rains couldn't have come at a better time.

This large amount of moisture will make the wheat stubble much easier to handle and it will also help the moisture base of the next seed bed.

Average yields on irrigated wheat this year were from 40 to 50 bushels per acre and some yields were 70 bushels and above. Quality of the wheat was

considered above last year, weighing in the neighborhood of 60 pounds.

There was considerably more hail damage in the county last year than this year, thus the reason for this crop being considered a little better. There was some hail this year but it was spotted and not nearly as widespread as last year's.

The HAPPY HOMEMAKER

BY JUNE FLOYD

Some of the most interesting articles in print today are anonymous. Someone jokingly remarked on day "That Mr. Anonymous must have been a very intelligent person. He wrote so many interesting things."

Our first recipe this week was probably written by "Mrs. Anonymous."

How To Cook A Husband
A good many husbands are utterly spoiled by mismanagement in cooking, and are not tender and good. Some women go about it as if their husbands were bladders and blow them up -- others keep them constantly in hot water--and others let them freeze by their carelessness and indifference. Some keep them in a stew by irritating ways and words--others waste them. Then some keep

them in a pickle all their lives. It cannot be supposed that any husband will be tender and good if managed in this way, but they are extremely delicious when properly managed.

In selecting your husband you should not be guided by the silvery appearance as in buying mackerel, or by the golden tint as if you wanted salmon.

PART OF PAVED STATE LINE ROAD north of Pleasant Hill was washed away during the downpour. Further down the road (just off the pavement) is where the complete road was washed away. Beyond the next hill is Frio Draw.

LOTS OF WATER was running under this bridge on Running Water Draw between Bovina and Farwell. This is the fastest the water has been sweeping down the draw in many years.

Market Development Program Expanded

The entire feed grain industry including corn producers, the grain seed industry, export firms and cooperative and independent grain dealer, it was announced this week, are mustering forces behind the foreign market development program which the Grain Sorghum Producers Association of Amarillo initiated and has been administering the past two years.

It is expected that this new and broader interest in financing and directing the export promotion program will increase activities in this connection as much as five times over the present program.

The announcement relative to the expanded program was made after an area directors' meeting of the Grain Sorghum Producers Association in Tullia last Wednesday. The Board acted on the recommendation of R. G. Peeler, Director, of Hereford, and Bill Nelson, Amarillo, the Association's Executive Officer, who have been negotiating with the other grain interests in the past several months. Organizations joining with the

Grain Sorghum Producers Association are the Hybrid Corn and Hybrid Sorghum Divisions of the American Seed Trade Association, Chicago, Illinois; the National Corn Growers Association, Boone, Iowa; The North American Export Association, New York City; Farmers Grain Dealers Association of Des Moines, Iowa; Continental Grain Company, New York City and Cargill Grain Corporation, Minneapolis, Minnesota.

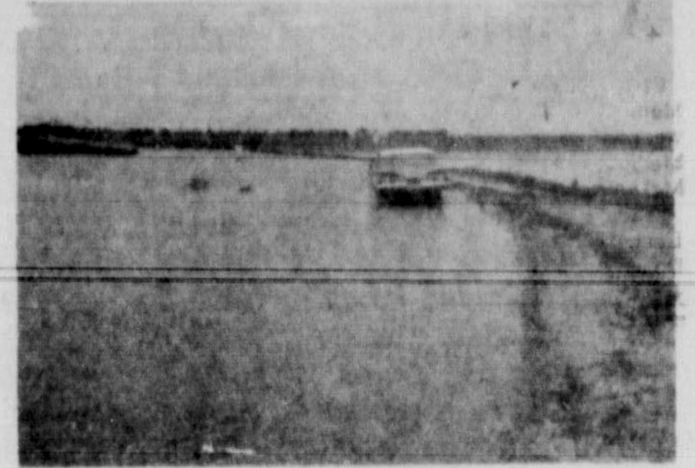

All of these grain industry groups are combining forces for this effort through a newly formed organization which is to be known as the U. S. Feed Grains Council. The expanded Council program is to remain under the administrative direction of Bill Nelson who is to serve as the executive director.

It is expected that this council approach will provide for an increase in the exchange of county agents and other agricultural leaders in potential U. S. grain market areas, as well as allow for the bringing of an increased number of

foreign feed grain users and processors to the area to study grain sorghum and other feed grains, and provide greater understanding of our grades, standards and trading practices.

Other business at the Grain Sorghum Producers Association meeting in Tullia included a report from Charles C. Gidney, Jr., from Rome, Italy who is administering the European feed grain market development projects. He is encouraged at the potential for expanding grain sorghum and other U. S. feed grain exports to the European area if continued efforts are made toward removing or lessening trade barriers, import duties and licensing restrictions.

There are indications, says A. M. Meekma, extension dairy husbandman, that the number of dairy animals may increase during the next year or two. A strong factor is the increased number of replacement animals now on hand.

FARM-TO-MARKET ROAD west of Bovina was flooded and closed to traffic following a three-inch rain Friday night which brought to a close the week's rainfall. This car started to go through the flooded area but decided against it when the water reached a depth of two feet.

Asgrow Seed To Sponsor Tour

Asgrow Seed Co. of San Antonio is sponsoring a tour of its production fields and seed processing plant next week for its area seed dealers and several newsmen in the area.

A group of about 40 area men will leave by bus Wednesday, July 20 for Uvalde where they will spend the night. Thursday they will tour Asgrow's production fields near Crystal City and later in the day tour

the company's seed processing plant in San Antonio. They will return Friday.

Ants can be controlled in and around the home with insecticides. Entomologists of the Texas Agricultural Extension Service say that chlordane or dieldrin, sold in many stores as roach and ant sprays, are very effective. They suggest that a copy of L-311, "Texas Guide for Controlling Household Insects," be obtained from the local county extension office for detailed information on control measure not only for ants but other insects which attack fabrics, foods, structures and humans.

Methodist Youth Attend Assembly

Five young people from Friona Methodist Church returned this weekend from Northwest Texas Methodist Youth Assembly on McMurry College campus.

They were Jimette McLean, Larry Anthony, Floyd Reeve, Donna Fields, and Adabeth

News From RHEA

MRS. FRANKLIN BAUER

Total amount of rain reported in Rhea community the past week was from 12 to 14 inches. The amount varying slightly in various sections of the community. Some farms had heavy hail damage from the rains on July 3. Several farmers still have wheat in the fields to be harvested.

The Cordie Potts family and Jack Patterson family went boating and water skiing on "Old Bony" lake. The lake is located on Mrs. Charles Schlenker's land just northeast of the Potts farm.

Recent visitors in the Chris Drager home were Mr. and Mrs. E. Teinert and girls of Pasadena, Tex., Mr. and Mrs. William Drager and Joe of Austin, and Mr. and Mrs. James Salzone and family of Carlsbad, N. M. Mr. and Mrs. William Schlenker of Lomita, Calif., recently visited in the Cordie Potts home.

Mr. and Mrs. Carl Schlenker and children visited in Portales Sunday.

Visitors in the Jack Patterson home the past week were Mr. and Mrs. Theodore Patterson and sons, Ricky and David, and Calvin Dunn of Dalton, Ga. Theodore is Jack's brother and Calvin a cousin of the Pattersons.

Mr. and Mrs. Herman Schueler and Lillian spent Sunday evening visiting with Mr. and Mrs. Louis Hoffman of Hereford.

The Walter Schueler family visited in Lariat Sunday with Mr. and Mrs. Gilbert Kaltwasser and children.

Mr. and Mrs. Herbert Schueler and Louis visited with the L. H. Hoffman family of Hereford the past week.

Mr. and Mrs. Franklin Bauer and children ate an outdoor supper with the Glen Harrelson family of Friona Wednesday evening.

Dwayne Bauer had the cast removed from his arm Thursday. Dwayne broke his arm while playing on the slide at school.

The voters of the Rhea

Akens. Mrs. U. S. Akens took the group to Abilene.

Featured speaker for the five-day assembly was Rev. Glen Mingleford of Smyrna, Tenn. Recognized as one of the outstanding youth workers in Methodism, Rev. Mingleford was with the church's Youth Department in Nashville before he became pastor at Smyrna. Director of the assembly was Rev. Charles Lutrick of Lubbock, executive secretary of the board of education of Northwest Texas Conference.

Other featured speakers and teachers included Allene Ford of New York City, secretary of youth work for the Women's Division of Christian Service and former director of Christian education at Bethany Methodist Church, Houston.

The week's activities provided training for 414 high schoolers in Bible, worship, singing, recreation and program planning.

SMART — Here's what the smart college girl will wear for dormitory lounging this fall. The slim, neatly tailored pants feature drum and eagle appliques stolen from the colorful shirt print. The outfit is styled in washable cotton.

Lutheran Church met Wednesday afternoon for their regular quarterly business meeting.

The redecorating of the Parish Hall has been completed. Ladies of the congregation are sewing drapes for the windows.

Jess Weavil and friend of Lubbock Air Base visited with Malinda Schlenker over the July 4th holidays. Mr. and Mrs. Willard Schlenker of Lomita, California were also visitors in her home.

Mr. and Mrs. Billy Sifford attended the Range Riders Rodeo in Amarillo. They also visited with Mr. and Mrs. Lee Sifford there.

Miss Linda Dean returned home July 4 from Weatherford, Okla., where she had been visiting with Mr. and Mrs. Donny Spring.

There are a lot of religions and religious beliefs, and it is somewhat presumptuous for anyone to think he alone, or his faith alone, has all the answers.

Movie producers continue to make big money in spite of the fact that theatre owners in many cities are taking it on the chin, and in spite of the movies they often make.
