## BIG BEND LAND IS ACCEPTED BY SECRETARY ICKES FOR NATIONAL PARK

### Additional Tracts of 15,236 Acres To Be Acquired By Board

Last of the legal obstacles having been cleared away, Big Bend National Park has been accepted from the State of Texas by Secretary of the Interior Ickes and set aside as a public park for the benefit and enjoyment of the people.

Advices to this effect were received Wednesday by Amon Carter, president of the Big Bend Park Association, and Frank D. Quinn of Austin, executive secretary of the Texas State Park Board.

Secretary Ickes' acceptance of the tract came but a few days after the eighth anniversary of the Congressional Act of June 20, 1935, authorizing establishment of Big Bend National Park.

The action designated 710,311 acres of land acquired by the State "as necessary for recreational purposes," with the understanding that the State Parks Board will acquire additional tracts totalling 15,236 acres as soon as possible.

The last mentioned acreage, included within the boundaries of the park as originally designated, was not acquired by the State because the \$1,500,000 appropriated by the Legislature in 1941 was exhausted.

J. V. Ash, chairman of the State Parks Board, Quinn and Carter each assured Secretary Ickes that this acreage, now privately owned, will be acquired and deeded to the Federal Government as soon as practicable, possibly after the end of the war.

With this assurance, Secretary Ickes was requested to accept the 710,311 acres now, so that the National Park Service could proceed with its plans for development of the Park. This course was recommended to the Secretary by Newton B. Drury, director of the National Park Service.

"It is realized," Drury stated in a letter to Ickes, "that these assurances can not obligate the State Legislature, and that they are therefore, mere statements of good intention. Nevertheless, in view of the State's outstanding achievement thus far, there appears to be merit in their request that the park be established without waiting for these remaining inholdings... and I so recommend."

Secretary Ickes accepted the recommendation and approved the procedure June 24, making Big Bend National Park a reality. —Fort Worth Star Telegram.

Things are fixed over here that would be thrown away in the States. As the saying goes, 'Necessity is the mother of invention.' At present I can go far as to say we are along the Mediterranean Sea, and that we can go for a swim most every day. It is the prettiest spot we have ever been in, with (censored) on one side. While the war was still on here, we were up well into Tunisia, where a bit of a fight took place, as you know from the news in the paper. When I was up there, I saw lots of German and Italian prisoners—part of the great 'Afrika Korps', but they are just prisoners now." —PRIVATE ENRIQUE RODRIGUEZ, 53rd Signal Battalion, U. S. ### TO DRILL 2,200 FEET FOR WATER FOR RAILROAD CO.

Russell & Beckham, drilling contractors, have the contract and are drilling the water well for the Southern Pacific lines just west of the oil pump house in the local yards.

The well is to be drilled to a depth of 2,200 feet unless sufficient water is encountered at a higher level. Thursday they were down to a little better than 800 feet and had encountered a stream of water at 250 feet. This supply was estimated to be sufficient for a seven-gallon well. It was also thought that additional water was struck just above that level when several feet of sand was encountered.

Living... of six foreign countries you can name, large or small, rich or poor. The national income of the United States is equal to the combined income of all the foreign six put together, no matter if you select the best half-dozen of the lot. The average American citizen earns far more than the average citizen of any foreign country, and accordingly...

Somebody asks: "How does it affect me?" Of course our country is rich but the big corporations have everything gobsmacking. National incomes and expenditures are only statistics, and they don't spend them. If I walk the street and meet the man who runs the plant where our average wealth is \$500,000 but I am a poor man. Sanderson citizens and in fact Terrell county spent a very safe and sane Fourth of July as there was no celebration held here nor at the city of Dryden.

Mrs. Carl Cochran and son, Bill left last Saturday for San Antonio where they are visiting Mr. and Mrs. W. A. Cochran.

S. S. Daggett reports having killed a rattle snake in his yard

Mr. and Mrs. W. H. Savage and son, Billy, Sims Wilkinson, Mr. and Mrs. J. W. McKee left the latter part of last week for a motor trip through points in the West. They visited the Carlsbad Caverns and at Cloudcroft returning home on Wednesday.

SIDESPLITTING PICTURE HAS CAST OF HEADLINERS

The nation's No. 1 box-office champions, Abbott and Costello, come Wednesday and Thursday to the screen of the Princess Theatre in Damon Runyon's "It Ain't Hay." The picture, heralded as the most comical in which the two comedians have starred has Grace McDonald, Cecil Kellaway, Eugene Pallette, Patsy O'Connor and Richard Lane in its cast. Extraordinary added feature is the appearance of Leighton Noble and his orchestra

which Bud and Lou become embroiled in a strange case of mistaken identity. Two horses, however, are the principals in the error, one a nag and the other a handicap favorite. When the comics are suspected of substituting one seed for the other, the action of the film is said to excite more laughter than any corresponding situation in their previous hits.

Romance and music are included in the speedy plot and are contributed by Miss McDonald and Noble. The talented pairing singing "Glory Be," composed by Harry Revel and Paul Francis Webster. Revel and Webster also wrote the picture's other three musical numbers, "Sunbeam Serenade," "Old Timer" and

# A MESSAGE TO EVERY AMERICAN FROM THE PRESIDENT

THE WHITE HOUSE  
WASHINGTON

June 24, 1943

My dear Mr. Secretary:

Through you, as Secretary of the Treasury, I want to congratulate the American people on the way in which they have supported the voluntary payroll savings plan.

I am proud of the fact that 27,000,000 patriotic Americans are regularly investing more than \$420,000,000 a month to help pay the cost of the war. And since all of this money comes from wages and salaries — nearly 90 percent from people earning less than \$5,000, and the bulk of it from those working in war plants — I do not hesitate to say that the payroll savings plan is the greatest single factor we now have in protecting ourselves against inflationary spending.

This is a great record, both from the standpoint of curbing inflation and from the standpoint of financing the war. However, I heartily endorse your present drive to improve that record, and I agree it must be improved if we are to keep pace with the increasing demands of the war.

I therefore join you in calling upon the American people -- and upon labor and management particularly -- to do still more. Additional people should be convinced of the necessity of participating. Everyone now on the payroll savings plan should materially increase the amount of bonds he is buying. We originally asked for 10 percent, but now we need considerably more.

I hope every American on a payroll will figure out for himself the extent to which he can curtail his spending, and will put every dollar of additional saving thus made into the payroll savings plan.

Sincerely yours,

The Honorable,  
The Secretary of the Treasury

Patriotic ranchmen of this section, whose names appear below, join in bringing to you a series of messages which have been prepared and mailed out by the War Savings Staff of the United States Treasury. These messages are brought in an effort to encourage the purchase of war bonds and other activities necessary for the winning of the war. The boys in the front lines are willing to GIVE their LIVES . . . are you willing to LEND your MONEY?
