MEDICATED POLITICAL CANDY

Along with numerous other measures which fall into the sweeping classification of social progress legislation, is the Wagner-Murray Senate Bill 1161. The fact that it makes provision for free general medical, special medical, laboratory and hospitalization benefits for 110,000,000 people in the United States, makes it popular political candy.

The measure is just another step in the totalitarian government theory of cradle-to-the-grave domination of the individual. It would give the Surgeon General of the Public Health Service the power to hire doctors and establish rates of pay; to establish fee schedules for services; to establish qualifications for specialists; to determine the number of individuals for whom any physician may provide service; and to determine arbitrarily what hospitals or clinics may provide service for patients.

The bill provides that employers pay tax on wages paid to individuals up to \$3,000 per year, 6 per cent; that employees pay a tax deducted from wages on earned income up to \$3,000 a year, of 6 per cent (total of 12 per cent on payrolls); that self-employed individuals pay a tax on value of services up to \$3,000 a year, of 7 per cent; that Federal, state and municipal em-

ployees under certain conditions, pay 3 1/2 per cent.

The Surgeon General of the Public Health Service would have the expenditure of some \$3,000,000,000 annually, which sum would, in reality, be nothing more nor less than \$3,000,000,000 of new taxes for a system of socialized medicine to display the present American medical system which has developed the most effective and most widely distributed medical care ever provided for any comparable number of people anywhere at any time.

State medicine for the masses will mean medical care by physicians who are politically amenable, rather than by those of superior abilities—for the doctor it will mean catering toward committeemen, rather than the needs of human beings who are his patients.

That will be the effect of an overdose of medicated political candy. And the people will pay a stiff price for it in the form of new taxes on wages, even though they think they are going to get something for nothing.

AT THE PRINCESS—

"BOMBARDIER" STORY OF SECRET BOMB SIGHT

Pat O'Brien and Randolph Scott are the official stars of "Bombardier," RKO Radio's thrill-packed saga of the Air Force which opens Wednesday and Thursday at the Princess Theatre. But in simple justice it must be recorded that there are a couple of other stars in their way as important as the human one—the famous Norden bomb sight, and the Flying Fortresses.

How that closely-guarded instrument which, in Bombardier's language, "drops 'em in a barrel from 20,000 feet," was developed, and now this country came to have the priceless weapon, and men trained to use it, when war flared across Pearl Harbor, is here told for the first time. And it is told in a brilliant and authentic fashion which makes the picture deftly entertaining as well as revealing.

The big Fortresses, too, have a vital role in the film, which is said to be a nod to the professional career of Colonel "Paddy" Ryan, whose foresight and persistence brought about adoption of the Norden device, and who created the schools where Bombardier cadets are taught the secrets of its intricate mechanism.

O'Brien and Randolph Scott play officers and friendly rivals. Opening in Washington and closing with a dramatic big-scale raid on Tokyo, the picture has most of its scenes laid at a training school where the determined O'Brien and the reckless Scott work together to teach practical bombardiering.

Absorbingly interesting details of the training and the rigorous routine the cadets go through are woven into the plot to lend realism. A romance, with pretty Anne Shirley as the heroine, is also a feature of the production, and Eddie Albert, Walter Reed, Barton MacLane, Robert Ryan and Russell Wade are

apartments of the type recently completed here.

"Sure was, Judge... stopped over here for ten minutes and what a swell bunch of fellows they were."
"That's true all over, Sam. Our present Army is the best trained, best disciplined, best behaved in American history. That's why I get my hair up when I hear of some people trying to dry up the areas around Army camps. Why, in a recent report made by the government, it said the Army usually prefers its camps to be located in wet instead of dry communities. And there's a sound reason. In a wet community the Army can control drinking. In dry communities where bootleggers run wild it's almost impossible. We know that from our nearly 14 years of experience with national prohibition."

WARTIME SAVINGS SUGGESTIONS for Electric Appliance Users

Nine Ways to Operate Your Refrigerator More Economically and Efficiently

- Defrost whenever frost reaches thickness of 1/4-inch. Frost acts as an insulator—makes the motor run longer.
- Do not open door oftener than necessary—and close it quickly.
- Do not maintain colder temperature than necessary—40 to 42 degrees is safe.
- Do not overcrowd shelves. Circulation is needed for efficient refrigeration.
- Cover all liquids. Moisture drawn to freezer speeds formation of frost.
- Avoid quick freezing as much as possible.
- Keep condenser coils free of dirt and dust.
- Do not store hot foods—let them cool first.
- Oil open unit models periodically according to manufacturer's directions.

Waste of anything in wartime is a crime. Don't waste electricity just because it isn't rationed. Wasting electricity involves a waste of fuel, transportation facilities, manpower and critical materials needed elsewhere in the war effort. Use all the electricity you need—but need what you use.

NEWS FROM THE COMMERCIAL DEPARTMENT

The girls in the bookkeeping class are showing great interest in "budget planning" which might cause one to think they are looking into the future. The boys were terribly bent over their workbooks last week figuring "profits and losses" which might indicate future expectations too. You should come in, though, and see the class display their "mental alertness" on Rapid Calculation.

BOOK WEEK

Since the theme of Book Week this year is "Build the Future with Books," let's strive to build our future with good books. With our future as unpredictable as it is, we need to read more and more books of all types. Not only should we read for enjoyment, but we should read with open minds books which will keep us informed. We as American citizens have the privilege of reading what we want. We should take advantage of that privilege every chance we get.

The SanderSON High School Library is open to the public five days out of the week. You can find some of the most popular fiction and non fiction books in the library.

DEAR PAL: Don't You Think?

That Doris Lee and Hazel were cute dressed alike.

That the boys could be nicer to the girls.

That Connie is one swell dancer.

That Harvey means it when he says that he is off girls for the duration.

That Frank made a quick change after the coronation.

That the coronation was a "swelligant" affair.

That the idea of a "hen party" while the boys are away is a good idea.

That the gay plaid shirts add color to drab winter clothes.

That the study halls are better places to study lately.

That the "Scholastic" magazines are fun to read.

That the program Saturday night revealed a great deal of talent among the students.

That Miss Brieger is swell to work on every program that is given.

That we ought to observe "Sadie Hawkins Day."

That I ought to shut up?????

Week of Prayer Observed By Presbyterians

From November 1 to 7 was set aside as week of prayer and self-denial for the Woman's Auxiliary of the Presbyterian Church.

During that week prayer meetings were held on Nov. 3rd and 4th at 10 A. M. in the home of Mrs. John Byrd with Mrs. R. S. Wilkinson in charge.

On Friday Nov. 5th an all day meeting was held in the home of Mrs. R. S. Wilkinson with each member bringing a covered dish for lunch. A prayer meeting was held at 10 A. M. for thirty minutes after which the home missions book "Strangers No Longer" was reviewed. Since each chapter in this book was a complete story several members told the different stories. The meeting was greatly enjoyed by all.

WATCH ROOM TEMPERATURE FOR GOOD HEALTH

With the approach of cold weather, Dr. Geo. W. Cox, State Health Officer, has issued some timely advice concerning room temperature and its relation to health.

"It is very important that inside temperature be maintained at around 68 to 70 degrees," Dr. Cox said. "Thousands of homes are continually overheated in the winter, and a degree of heat is often demanded that would not be tolerated in the summer-time."

In a room that is overheated, the body pores are open, and the moment that the outside temperature is encountered, much harm may result. Colds, influenza, bronchial troubles and even pneumonia may take advantage of this bodily abuse, and take a serious toll in sickness and even death.

"An inside temperature of from 68 to 70 degrees is not only more healthful, but actually more comfortable," Dr. Cox said. "When, added to these factors the resulting economy is considered, it might be well to check up and see what your thermometer reads. A thermometer kept within the range suggested, plus the careful maintenance of proper humidity, will help to prevent needless sickness and protect the good health of your family."

Of the approximately 20 hundred million people in the world, some seven hundred million are hundred million Russians; four hundred million Indian; two hundred million African negroes, and five hundred million Mongolian. About one hundred million of the Mongolian race are Japanese.

Mr. and Mrs. Ed Cade of Ozona spent Thursday here visiting his brother, C. M. Cade and family.

Mrs. L. H. Lemons left Tuesday for Del Rio where she joined Mr. Lemons who is employed at Laughlin Field.

TREATMENT OFTEN TOO LATE FOR CURE OF TUBERCULOSIS

prerastination not only is the thief of time, but frequently the thief of health and life," Dr. Geo. W. Cox, State Health Officer, said today. "Indeed, medical records in doctors' offices and hospitals prove that many persons die not because they are victims of disease, but because they do not receive early diagnosis and prompt treatment for their condition. An outstanding example of this fact is the great number of deaths from tuberculosis that could have been prevented.

"Tuberculosis is a powerful enemy, no matter what its stage, but the fact remains that early discovery and adequate treatment offer the best opportunity for cure. If the patient upon being told that he has tuberculosis cooperates fully with the strict regimen and discipline outlined for him, the disease can usually be overcome."

Dr. Cox said that in line with some of the other major killers, tuberculosis is inside in its approach. Acute pain and discomfort are absent usually, and the symptoms are so comparatively mild that the patient is thrown off guard and considers them of little importance. Herein lies the real slaying ability of tuberculosis.

"The symptoms which, singly or in combination, demand an immediate checkup by the doctor are easy tiring, a persistent cough, and continued loss of weight.

"While it is true that any of these symptoms can be present without the patient having tuberculosis, this is no reason to imagine that such is the case. Therefore, if one is suffering from any of these manifestations, the only sensible and safe thing to do is seek the advice of the family physician at once." Dr. Cox warned. "If such a course is pursued, and the condition turns out to be not serious, nothing has been lost. On the other hand, if tuberculosis is discovered, the patient by doing the wisest possible thing has probably saved his life."

Mr. and Mrs. Ernest Wesner and Mrs. C. M. Cade and daughter, Wayne, spent from Friday until Tuesday visiting in San Angelo.
