## LOOKING AHEAD

By GEORGE S. BENSON  
President, Harding College  
Searcy, Arkansas

Years before I ever saw an Oriental picture of Oriental faces and people interested me. I distinctly remember one decorative drawing of a Chinese boy wearing wooden shoes and a broad-brimmed hat. His queue seemed to wave sportily behind him as he walked with a wooden tray on his shoulders. The yoke helped him carry two buckets and hung by cords, one from each end of the yoke.

Later I saw such men in real life. Many of them. I was old enough then to wonder what they were doing with the buckets and why they had to lug them. The "common carrier" I recognized had kerosene in his buckets, five gallon at each end of the yoke. His daily job was to walk ten miles and carry ten gallons for which labor the oil dealer paid him ten cents a day.

Sharp Contrast  
Consumers had to pay 1c a gallon for ten miles of over-land transportation, which is exorbitant. The dealer had to construct himself with a speed of one mile per hour in transit, which was ridiculous. The poor Coolidge had ten hours a day for a day an hour, \$3 a month, which is preposterous. Such is the Orient when I was there it hadn't changed much in a hundred years.

America, where there are roads and the economy of some applies in transportation well as in other things, one pays for moving a gallon of gasoline over-land 100 miles, ten. Speeds in transit are only below 200 miles a day. Men who do the work get \$3 a month, not \$3. The difference is that railroad investment exceeds \$20,000 per mile.

Everybody's Asset  
Total railway investment in the United States exceeds 265 billion dollars. In a recent address in Florida, Thurman W. Ald of the U. S. Court of Appeals charged the railroads with throttling competition to their investments safe. I don't know the specific accusation, but I know two things: Real competition can't be throttled and (2) investments should be protected.

Whose investment is it? Railroads don't belong to the officers of the company. They belong to their mere millions of stock and bond holders who are dozens of millions of people who own insurance policies and have bank accounts. They are the real investors in the roads. A government with interest of its citizens in the roads would help protect their investment labor, their investments.

Why Are American Railroads more than any one made America what it is. They are partially responsible for the differences between the United States and America is superior because its interior is developed. Roads penetrated the wilderness and brought its wealth to the interior. Then venturesome pioneers hurried inland from both sides to seek personal gain in the interior developed by the law.

Roads like other industries sending young men to war. Roads have their manpower shortage and it's acute. But less equipment than they had in World War I, railroads are above 50 per cent more work than they did under federal bungling. Our route to still higher American efficiency after the war is through protecting and encouraging liberal investment of private capital in the tools of production.

Carlton White returned Sanderson last week-end from San Antonio where she underwent a major operation.

## CAPTAIN JACK L. BOGUSCH REPORTED KILLED IN ACTION OVER GERMANY

### WAS PREVIOUSLY REPORTED MISSING IN ACTION

Word was received here this week by Mrs. Dorothy Bogusch that her husband, Capt. Jack L. Bogusch, formerly reported as missing, was killed in action over Germany on March 6. The latter part of March word had been received that Capt. Bogusch, pilot of a flying fortress, had gone down over Germany while returning to his base after a bombing mission. Mrs. Bogusch, who has been here for the past several weeks visiting with Mr. and Mrs. Max Bogusch, parents of Capt. Bogusch, will return soon to her home in Jersey City, New York.

CAPT. JACK L. BOGUSCH

The telegram received by Mrs. Bogusch, which contained the information that the word had come through the International Red Cross, read as follows: "Mrs. Jack L. Bogusch Sanderson, Texas. Reports received from the German Government through

## BEAUFORD JESTER EXPRESSES THANKS TO VOTERS

Although Beauford H. Jester has no opponent in his race for re-election as railroad commissioner, he has issued a vote of thanks to Texas voters for their cooperation and support. In the same announcement Mr. Jester pledges a continuance of his best efforts and service to the people of Texas and the war demands upon the Railroad Commission.

Mr. and Mrs. Herbert Smith of San Antonio left Sunday for their home after spending a week here on their ranch.

Mrs. C. M. Cade left Saturday last week for San Angelo where she is with her mother, Mrs. E. Miller who recently underwent a major operation.

Mr. and Mrs. W. W. Sudduth and daughter, Barbara Ann, arrived from Fort Stockton Sunday where they had been visiting the past week with her parents, Mr. and Mrs. E. L. Brown. Mr. Sudduth is recuperating from an appendectomy and pneumonia suffered in a San Angelo hospital recently.

Mr. and Mrs. John Deaton visited in Eldorado Saturday and Sunday. They were accompanied home by their granddaughter, Sybil Deaton, who will visit here with them for a time.

(Photo by William Sturm, Chicago Sun)

## WATER USERS ARE ASKED TO PLEASE CONSERVE SUPPLY

James Caroline, local manager for the Community Public Service Co., has issued a plea to water users to be conservative in their use of water, and to refrain from watering yards for a few days.

Hot weather, intensified by the drought, has caused consumption of water to jump considerable, and at present the water level in the storage tank is so low that there is no faucet service in some parts of town. Mr. Caroline stated that they were doing everything possible to alleviate the situation and they asked that consumers please help them with the situation by using as little water as possible for a few days.

## PRIMARY VOTING TO BE SATURDAY

Voters are reminded that the Democratic primary will be held Saturday with voting in precinct one taking place at the courthouse. In precinct two voters will go to the Dryden school house to cast their ballots; in precinct three balloting will be done at the Arvin Ranch Headquarters and in precinct four at the Independence school. Polls will open Saturday morning at 7:00 o'clock and will remain open until 7:00 p. m.

## YANKS CHANGING THE AUSTRALIAN EATING HABITS

When American servicemen in Australia began demanding sweet corn and eating it with obvious relish, Australians themselves began trying it and found they like it, the Australian News and Information Bureau reports.

The presence "down under" of thousands of American servicemen and a food crisis resulting in severe rationing are bringing about a change in the Australians' eating habits that they might carry through into the post-war period, the bureau says.

Poultry, a pre-war luxury is becoming a staple article of diet in thousands of homes. Rabbits, once referred to as "underground mutton," are now in great demand. Spaghetti, a number of processed cheeses, new ice cream recipes, various types of breakfast foods and more attractive light salads are among the dishes now becoming popular with native Australians. In tens of thousands of homes, imaginative Australian housewives are turning out typically American dishes, many of which are prepared with unrationed foods, such as chicken and rabbits.

"Before the war, most Australian tables groaned, though not with what most Americans would regard as good things," the Australian Information Bureau explains. The pre-war diet consisted of heavy meat roasts (mutton taking first place), starch vegetables out of the frying pan, the baking dish or saucepan; baked or boiled potatoes; and too many heavy puddings.

Good fruits although in abundance and inexpensive were not eaten enough. Today Australia's fine fruits of all kinds are suddenly being appreciated since the Yanks introduced fruits and fruit juices for breakfast. It has taken the present war to convince Australians that salads and lighter meats so popular with Americans are better suited to Australia's mild climate than the foods to which they have been addicted. Most Australians live in weather like that of California or the American southern states.

Mrs. Leo Tucker of Farmington, N. M., is here this week for a visit with her sister-in-law, Mrs. R. W. Tucker.

## Infantile Paralysis More Prevalent in Warm Weather

### Parents Urged to Watch for Symptoms Indicating Illness

"Infantile paralysis can be expected to occur during the next three months," declared Dr. Geo. W. Cox, State Health Officer. "This disease is always more frequent during the hot months." "The germ responsible for infantile paralysis is so small that it escapes detection even with the most powerful microscopes. The first symptoms are usually vomiting, headache, fever, stiffness of the neck, pain in the legs, irritability and drowsiness. Complete recovery may follow such an illness; but in more severe cases, the germ penetrates the nervous system, resulting in paralysis of nerves controlling one or more groups of muscles. Some remarkable recoveries have been noted.

"Flies, or other insects, while under suspicion, have not been demonstrated to play part in the spread of this disease. Infection spreads from person to person with the droplets attending coughing and sneezing. Children and grown people that are healthy may be carriers of the germ. When present in epidemic form, about one child in each hundred is apt to suffer an attack.

Early recognition and diagnosis are essential. The use of immune serum may be a factor in preventing paralysis. A period of complete rest is essential for muscles that are affected. If parents note any symptoms of illness in their children, the family doctor should be consulted at once.

## DISCOVERY OF NEW VITAMINS IS ANNOUNCED

A University of Texas professor has discovered two important new vitamins, school officials announce.

Dr. Esmond E. Snell of the University's Biochemical Institute laboratories made the discoveries, now named "pyridoxamine" and "pyridoxal" because of their close relationship to previously known vitamin, pyridoxine.

Pyridoxine is used to help control anemia, aid nervous disorders, and help correct human acne. Dr. Snell explained, and the new vitamins are believed to possess similar properties.

Dr. Snell is already well known in the field of science for previous contributions, helping to develop quantitative microbiological tests for riboflavin, nicotinic acid, pantothenic acid, biotin, and folic acids, and other vitamins of the B group.

## ALLOCATION IS MADE FOR THE BIG BEND PARK

### APPROPRIATION OF \$17,170 FOR YEARS CUSTODIAL USES

An allocation of \$17,170 has been made for the protection of the Big Bend National park in southern Brewster county for the fiscal year, it was announced last week-end in Santa Fe by the southwestern regional headquarters of the National Park Service.

Funds for the parks, monuments and areas are sufficient only to keep the area on a custodial basis during the war, it was explained. No major development is planned for the park until after the war.

Superintendent Arrives  
Dr. Ross Maxwell, park superintendent arrived the first of last week and has established headquarters at the CCC camp in the Chisos mountains. He was accompanied by Harry Linder, who will be the chief clerk, Lloyd Wade, long-time resident of the park area, is to be general foreman and O. P. Senter, formerly stationed at Hot Springs National park, will be chief ranger.

No recent announcement has been made regarding accommodations in the park area—Alpine Avalanche.

## STUDY OF EFFECTS OF SULFA DRUG ON PERITONITIS MADE

Technicians at the University of Texas Medical School here are carrying on the nation's principle scientific research on the effects of sulfa drugs for patients to prevent post-operative peritonitis. Dr. Edgar J. Poth, professor of surgery reports.

Since 1940, Dr. Poth, who has compounded scores of new sulfa derivatives has been testing the effectiveness of these drugs. One of his drugs—succinylsulfathiazole—is in extensive use in the armed forces for treatment of battle wounds and dysentery.

He pioneered, too, in using sulfa drugs administered orally to rid systems of patients of harmful bacteria, a practice now adopted by surgeons through the country.

Greene Cooke and daughter, Betty, returned home Saturday from Dallas where they went to have Betty placed in a cast as the result of a dislocated hip sustained several weeks ago.

The Rev. and Mrs. John Klans visited in Balmorhea Wednesday where they attended the dedication of a new church in that city. They were also present for a call meeting by Bishop W. Angie Smith.

## FROM TEXAS TO TOKIO

TEXAS TO TOKIO  
Word comes to us that Aviation Cadet Walter G. Downie, who is stationed at the San Antonio Aviation Cadet Center, has asked for training as a navigator and is putting in a lot of time studying.

Word has been received here from Wallace Henshaw, Jr., who writes that he thinks he is about to settle down now after a lot of moving. Wallace, gunners mate first class, U. S. Navy, is stationed somewhere in the South Pacific and says that he is in the same Battalion with Tom Breeding. He writes, "I'm now in the same battalion with Tom Breeding. I sure was glad to see him and we've had quite a time talking over things."

Mrs. Roger Bassett arrived here Saturday from Fort Dix, New Jersey, where she was residing with her husband, Lt. Bassett, until recently when he was assigned to foreign duty. She has word that he now has reached his destination safely. Mrs. Bassett will make her home here with her parents, Mr. and Mrs. J. L. Osgood, for the duration.

Mrs. Carl Lambert is in Gulf Port, Miss., where she is visiting with her husband, Fireman Lambert, second class, U. S. Navy. He is attending a mechanics school there.

Prince Dishman, pharmacist first class, U. S. Navy, arrived Wednesday night for a visit with his parents, Mr. and Mrs. P. E. Dishman. He is stationed at Shoemaker, Calif.

Mrs. Johnnie Whistler and Mrs. Ferd Monroe are in San Diego, Calif., where they are visiting with their husbands, both of whom are in the U. S. Navy and are stationed there for the present.

From a U. S. Naval Air Station at Jacksonville, Florida, comes the following information:

Wings of gold and silver, the insignia of a Marine Aircrewman, were presented Corporal Ernest E. Harkins, Jr., formerly Sanderson, Texas, now of Buda, Texas, when he completed the final phase of his training as a member of an air-combat team at this Operational Training station.

Aircrewman Harkins enlisted in the Marine Corps, on June 24, 1943 and completed recruit training at San Diego, Calif., Marine Training Station. He was selected to attend aviation ordnance school at Norman, Okla., as a result of his showing in mechanical aptitude examinations at "boot" camp, and graduated with the rating of Private first class on January 8, 1944.

The 20 year-old corporal then elected to train as a Marine aircrewman and was sent to Purcell, Okla., Naval Air Gunners School, where he graduated March 29, at the head of his class, for which he was awarded a second promotion to his present rating.

When presenting "wings" upon graduation this week, Harkins' squadron commanding officer congratulated the aerial gunners for their effort and fine record throughout the training period ending June 29, when the course was completed.

Son of Mr. and Mrs. E. E. Harkins, of Buda, Texas, the young marine, who lived in Sanderson when he enlisted, will now be assigned to a Marineair detachment and see action at one of the battle fronts. As a result of his training, which for the most part was in one type of plane, he will probably see action with a force of PBV-Catalina patrol planes.

Ernest arrived here Friday of last week for a visit with his

## Red Cross Movies In Service Hospitals

When the American Red Cross worker unlimbers the old movie outfit, wounded and convalescent men at the Camp Young, Calif., station hospital crowd about, eager to assist. Here the ward nurse, Lieut. Blanche Hawkins, Hendersonville, N. C. (left center), with Red Cross Asst. Field Director Dorothy Ewing, Berkeley, Calif., gets the 16 millimeter film ready for Pfc. William F. Henry, Houston, Texas, to run through the projector. Movies are also provided by the Red Cross for ward patients.

MAKE WORK AT ANY PRICE

As the government goes forward with plans to increase draft of fathers and as American battle casualties in every part of the world mount into the hundreds of thousands, a late issue of the 'Oregon Voter' tells of some of the make-work rules still being enforced by the unions in the country's largest shipyards: "If a plank has to be laid across a couple of saw-horses, for a crew of pipe-fitters to make an adjustment high up on a partition, a crew of shipwrights has to be routed to the place, as work with wood is shipwright work. The management has to plan this routine in order to avoid too much delay. When the time comes for the plank to be lifted off the pair of saw-horses, to be moved a few feet to put in another length of pipe, the crew of shipwrights has to be routed to the spot again to move the wood. Any delay in this routine means a suspension of work by the crew of pipe fitters while they wait for the shipwrights."

"If a gadget one man can carry is needed from the warehouses, the pipe fitter, or machinist, or shipwright, must not go for it, the teamsters union must fetch it."

And labor leaders wonder why public wrath is rising against union management.

It Happened In Sanderson TEN YEARS AGO This Week - Remember

JULY 20, 1934

Ben Estes, employee of the Texas Louisiana Power Company in this city, suffered a broken left arm at the wrist Thursday morning while on duty at the local plant.

Miss Mary Ellen Bohman, who had been attending Sul Ross college at Alpine, came in the first of the week and will spend the remainder of the summer with her mother, Mrs. W. F. Bohman.

Mrs. C. P. Peavy and daughters are visiting her parents, Mr. and Mrs. Ben Pruett, Sr., in Marfa this week.

Miss Gerry Monroe of Sheffield is visiting her cousin, Miss Ferd Corder at the ranch.

Mrs. A. C. Clatfelter and daughter, Miss Maxine, left Sunday night for El Paso and Ruidoso, N. M. where they will visit relatives and friends.

Mrs. M. J. Shurley and daughter, Miss Clara, have returned from a month's visit in El Paso.

"Padded expense accounts are bad enough, Murgatroyd, but this one's overstuffed!"

While away Mrs. Shurley visited points of interest in Old Mexico.

Mr. and Mrs. Ira Deaton were Del Rio visitors the first of the week.

WITH OUR NEIGHBORS

Uvalde Leader-News—Eighty-one crippled children from eight counties in this area were given hope of being restored to health so that they may lead an active, normal life when the annual crippled children's clinic was held in the basement of the First Baptist church here last Thursday.

That number of children of the almost 100 examined were examined by the specialists and recommended for treatment.

Alpine Avalanche—Rains and showers have fallen daily in the various parts of the Highland country the past week, it was reported here. The immediate Alpine area had a good rain late last Friday measuring 40 inches by the Sul Ross college gauge. The rain covered considerable country, extending from Paisano on the west to Altuda on the east and several miles south. It did not reach much farther north than the Alpine city limits.

Big Bend Sentinel, Marfa—Any skeptical individual who doubts the growing importance of this section of the southwest as a wool producing area would "change his tune" after a few minutes spent in the Rawlings Wool and Mohair Co. warehouse where approximately 350,000

pounds of wool, belonging to forty-six growers, is stored.

A new business enterprise, established only a few months ago the firm's building, especially built for wool and mohair handling, has bags, containing about 180 pounds each, stacked 14-high and 15-high.

Ozona Stockman—What may be the first step toward revival of Ozona's annual rodeo and stock show, which became one of the most popular summer entertainment features in West Texas until its abandonment a few years ago, is the plan of the reorganized Crockett County Fair Association for a two-day rodeo in August.

Tentative dates of August 12 and 13 have been adopted by association officials, whose plans have so far advanced that the necessary number of calves and steers have been purchased and are on tap for the roping events.

Hudspeth County News—Nine small bombs were dropped on Sierra Blanca from an airplane at 1:00 A. M. Thursday. No one was injured and there was little damage to property. Only three made direct hits and that was on railroad tracks. Slight damage to the tracks resulted. Some ties were broken and a rail bent.

According to all information that could be secured the bombs were of the practice type and are not very destructive. One fell on the concrete drive of the Texaco station, just across the street from the Owl Cafe, which was lit up, being an all night cafe. It made a hole three feet deep.

Wink Bulletin — County Co-chairmen Lee Johnson and S. M. Halley, released official figures on progress of the Fifth War Loan Drive this week, which show this county tripled its overall quota.

Fort Stockton Pioneer—Camp Comanche, annual religious education and recreation encampment for young people of the El Paso Presbytery will close its 10th session in Rooney Park Saturday morning after breakfast. Registrations began Monday evening and numbered 119 delegates and 15 adult leaders.

Fort Stockton Pioneer—Pecos County demonstrated its high patriotic spirit by exceeding in liberal amount the quotas for both E bonds and all other bonds in the Fifth War Loan drive which closed last Saturday.

Without a selling organization, public bond rallies or other con-

Beware Coughs from common colds That Hang On

Chronic bronchitis may develop if your cough, chest cold, or acute bronchitis is not treated and you cannot afford to take a chance with any medicine less potent than Creomulsion which goes right to the seat of the trouble to help loosen and expel germ laden phlegm and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Creomulsion blends beechwood creosote by special process with other time tested medicines for coughs. It contains no narcotics. No matter how many medicines you have tried, tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough, permitting rest and sleep, or you are to have your money back. (Adv.)

certed and directed efforts, a total of \$100,000 over the county's quota of \$285,000 in all types of bonds were sold. The E Bond quota, usually a bug-a-bear for most counties, was surpassed by about \$22,000, with a total of \$142,000.

AT THE PRINCESS—SOUTH SEA ISLE IS LOCALE FOR FILM

Mythical South Seas paradise provides an exotic background for "Cobra Woman," latest Technicolor production to star the popular trio, Maria Montez, Jon Hall and Sabu. The exciting new screen adventure comes Sunday and Monday to the Princess Theatre. Featured in a distinguished supporting cast are Edgar Barrier, Lois Collier and Mary Nash. Moroni Olsen, Samuel S. Hinds and Lon Chaney have leading roles.

Action of the picturesque drama centers around the romantic affairs of a glamorous princess and her twin sister, Miss Montez is seen in both portrayals. The actress, who scored outstanding successes in "Arabian Nights" and "White Savage," is said to be even more colorfully attractive in "Cobra Woman." Sequences in which her dancing highlights primitive rituals, are described as vividly spectacular.

Hall is seen as a valorous islander who helps to stage a rebellion against a cruel monarch and her unscrupulous Minister of Affairs. Lurid sacrificial rites and intrigue among the court followers are dramatic preludes to the conspiracy in which the twin sister of the princess is restored to the throne.

Lavish settings and the brilliant costumes of the multitudes of dancing girls and atmosphere players, are claimed to enhance the effectiveness of the picture.

"WHISTLER," THRILLING RADIO SHOW, FILMED

For over a year and a half from the Hollywood radio have come the strange, mysterious and suspenseful tales of "The

Whistler." Geared to contain all the elements of successful radio adventure, mystery, drama, suspense and tight story, it found a ready audience which enjoyed the unraveling of a superior mystery and the psychological inferences behind crimes which were not too fantastic or gruesome and were committed by believable persons.

It was inevitable that such a set-up be transferred to the screen. It comes to the Princess Theatre on Tuesday under its original title "The Whistler" with Richard Dix as its star and J. Carrol Naish, Gloria Stuart, Joan Woodbury and Alan Dinehart as its featured players.

"The Whistler" in its translation from the airways to the silver screen has lost none of its punch and suspense at the

hands of its original author Donald Wilson (not to be confused with Don Wilson the announcer), and screen writer, Eric Taylor, of course. The story was written expressly for the screen, but we are inclined to think that it has all the elements which have made the program so successful.

Richard Dix is cast at the time who made a terrifying death. Naish is in the role of the killer who tries to kill a woman who has made the program so successful.

Advertisement for electric refrigerators featuring an illustration of a woman cleaning a refrigerator and a vertical condenser. Text: "Your electric refrigerator will last longer and cost less to run if you... Keep the Condenser Clean"

The condenser of your electric refrigerator looks something like the radiator on your car and serves a similarly important purpose.

The condenser's job is to cool the refrigerant and dissipate the heat it absorbs from the food compartment. On some models, it is vertical and fan cooled; on others, it is horizontal and cooled by convection. Usually it has fins attached to the coils to increase the cooling area.

Dirt and dust deposited on the condenser interfere with its cooling efficiency

and increase the running time of the motor, resulting in higher operating costs.

To prevent this, clean the condenser periodically. A bottle brush or the suction hose of a vacuum cleaner are ideal tools for the job. Keep the entire machine compartment clean... a clean piece of mechanism fails much less frequently than a dirty one.

CAUTION: Be sure refrigerator is disconnected at wall outlet before you start to clean machine compartment. Otherwise, refrigerator may start up and injure you.

It tells you ten simple things you can do to keep your refrigerator operating smoothly and economically for the duration. Ask for your copy at our office today. You'll find information in it of value regardless of what make refrigerator you own.

COMMUNITY PUBLIC SERVICE COMPANY

FRIDAY, JULY 21, 1944

# of U. S. Army Now Overseas; Numbers 3,657,000

### HAS 1,566,000 ON FOREIGN DUTY

Approximately half of the United States army is now stationed overseas and about the same proportion of the naval fleet is now afloat or on shore installations, the navy departments announced.

On June 1, the army had 1,566,000 men and 1,566,000 men in the navy, mostly on ships, covering the 56,000 miles of supply lines.

At the end of 1944, the number of troops overseas will be increased to more than 5,000,000, approximately two-thirds of the army's total strength.

More Infantry to Go  
As the period of decisive action approached, the flow of ground personnel increased.

In arriving at the overall size of the army, the joint chiefs of staff determined that initial shipments of men and material overseas would be committed, of necessity, to "plugging the line," to prevent further expansion of gains already made by the Axis.

During the first two phases, the army was engaged in establishing bases for future operations. Large combat forces of the ground army, comparatively speaking, were not engaged. It was essential that bases for operations be established; that supply lines be secured.

As the period of decisive action approached, the flow of ground personnel increased. The flow of AGF troops overseas, consequently, is on the increase today while the flow of ASF and AAF personnel has already reached its peak.

Today, the United States army air forces, with slightly less than one-half of its total 2,357,000 already overseas, has a total of more than 75,000 airplanes of all types, of which approximately 34,000 are combat aircraft. More than one-half of the AAF's combat plane strength is overseas, making the aerial striking force in point of size

## "TROUBLED SLEEP"

and fire power.

The AAF has approximately 925 bases outside the continental United States, excluding bases on U. S. territories. Of the 925 foreign bases, 750 are airfields. The others include radio and weather stations, hospitals, depots and storage bases.

Combat aircraft, crew personnel, equipment and supplies, now are reaching the planned level of effectiveness for the air war against Germany. Four of the AAF's ten combat air forces are striking at Germany from the United Kingdom and from Italy.

Biggest Supply Job  
With slightly less than one-half of its personnel overseas, excluding service-type units of ground forces and air forces, the army service forces today is executing the greatest logistics job in the history of the world.

It usually is considered that each man overseas requires six measurement tons of initial equipment, as against one measurement ton per month of maintenance supplies.

Mere tonnage however, fails to reveal the complexity of the job being performed by the army service supplies, of necessity, must vary widely, depending on the area of the world to which they are being sent.

It has had to build ports through which men and supplies must move. It has had to build roads where no such facilities formerly existed, and pipelines to supply our air forces. It has had to establish and stock depots to handle the enormous amounts of supplies incident to modern warfare.

In addition to these tasks ASF must provide medical service records of personnel, mail service and countless other services. For instance, in April, ASF handled 63,638,405 pieces of in-

coming and outgoing V-Mail letters, another new high.

More than one-half of all army ground forces personnel are deployed for action overseas. It is upon the shoulders of these men, and their comrades in the United States who are scheduled for overseas deployment that the fate of the final phase of overall strategy—the period of decisive action—depends.

In line with the overall strategy for our conduct of the war, shipping is available today to transport AGF divisions overseas for the period of decisive action.

## AT THE PRINCESS—

(Continued from page two)

his secretary who is willing to give her life to save the man she loved.

Thrown into an unusual and dramatic situation by author, Wilson, these players together with Joan Woodbury build the plot into a surprise climax which has had preview audiences sitting on the edge of their chairs with excitement.

## ANDY HARDY NOW GOES SCHOLASTIC IN LATEST OF FAMILY FUN FILMS

If you're a Hardy Family fan, and who isn't? you'll enjoy the new film at the Princess Theatre, Wednesday and Thursday. It's "Andy Hardy's Blonde Trouble" and the whole Hardy Family is up to it's usual fun-making. In addition to the perennial favorites are Herbert Marshall, Bonita Granville, Keye Luke, Jean Porter and the Wilde Twins, all new to the popular series.

Mickey Rooney, as the irrepressible Andy, sets off to follow his father's footsteps at Wainwright College and learns to his delight that it is now co-ed. His troubles begin on the train where he meets Bonita Granville bound for Wainwright. Herbert Marshall, dean of the college, and the pretty Wilde Twins only since the twins, in order not to be separated, are pretending to be one person, and keep Andy in a perpetual state of confusion.

Andy is attracted to Bonita immediately, but it is soon obvious that although Bonita likes Andy she is much more interested in Herbert Marshall. When they arrive at school Andy tries to help the twins out of their predicament and only succeeds in getting himself into trouble. His affairs with Bonita aren't going well either. He is so miserable that he decides to leave college rather than risk blemishing his father's good name. But before he can go the Judge arrives and sets everything to rights and Andy then decides

## THE STATE OF TEXAS TO THE SHERIFF OR ANY CONSTABLE OF TERRELL COUNTY, GREETING:

Mrs. Hortencia Z. Arrendondo Administratrix of the Estate of Clemencia A. Zamora, deceased having filed in our County Court her Final Account of the condition of said Estate of said Clemencia A. Zamora, deceased, you are hereby commanded, that by publication of this Writ once in a newspaper regularly published in the County of Terrell and said publication shall be not less than ten days before the return day hereof, you give due notice to all persons interested in the account for final settlement of said estate, to file their objections thereto, if any they have, in said Court on or before Monday the 7th, day of August A. D. 1944 when said Account will be considered by said Court.

Witness M. H. Goode, Jr., Clerk of the County Court of Terrell County.

## HOUSEHOLD HINTS

Fruit stains are in season again and if they are removed from table linen before laundering they cause very little trouble. It's much easier to remove a fresh stain than one that has become fixed in the fabric, so as soon as a stain appears on a serviette or a tablecloth take care of it at the first opportunity.

The old boiling-water treatment is the best way to remove fruit stains. Stretch the stained fabric over a bowl and pour boiling water from a height of three feet through the spot. The stain usually will respond at once. If stubborn, repeat the process and let stand in boiling water for a few minutes. Of course, this treatment applies

to washable, color-fast materials.  
Rust spots are another stain most prevalent in summer. To remove these, dampen the spot with lemon juice, sprinkle with common table salt and put in the sun. Rinse thoroughly before.

If you have ironed with too hot an iron and slightly scorched an article try putting it in the direct rays of the sun for an hour or two before washing it over. A faint yellow tinge will disappear like magic. A more serious discoloration will have to be relaundered and may require a bleach to remove it.

Don't try to keep up with your neighbors; let them keep up with you.

Somebody wants to know why they need so many bureaus at Washington. That's easy. They have to have some place in which to keep the red tape.

### MAKE WORK AT ANY PRICE

As the government goes forward with plans to increase draft of fathers and as American battle casualties in every part of the world mount into the hundreds of thousands, a late issue of the "Oregon Voter" tells of some of the make-work rules still being enforced by the unions in the country's largest shipyards: "If a plank has to be laid across a couple of saw-horses, for a crew of pipe-fitters to make an adjustment high up on a partition, a crew of shipwrights has to be routed to the place, as work with wood is shipwright work. The management has to plan this routine in order to avoid too much delay. When the time comes for the plank to be lifted off the pair of saw-horses, to be moved a few feet to put in another length of pipe, the crew of shipwrights has to be routed to the spot again to move the wood. Any delay in this routine means a suspension of work by the crew of pipe fitters while they wait for the shipwrights.

If a gadget one man can carry is needed from the warehouses, the pipe fitter, or machinist, or shipwright, must not go for it, the teamsters union must fetch it."

And labor leaders wonder why public wrath is rising against union management.

### It Happened In Sanderson TEN YEARS AGO This Week - Remember

JULY 20, 1943

Ben Estes, employee of the Texas Louisiana Power Company in this city, suffered a broken left arm at the wrist Thursday morning while on duty at the local plant.

Miss Mary Ellen Bohlman, who had been attending Sul Ross college at Alpine, came in the first of the week and will spend the remainder of the summer with her mother, Mrs. W. F. Bohlman.

Mrs. C. P. Peavy and daughters are visiting her parents, Mr. and Mrs. Ben Pruett, Sr., in Marfa this week.

Miss Gerry Monroe of Sheffield is visiting her cousin, Miss Ferd Corder at the ranch.

Mrs. A. C. Clatfelter and daughter, Miss Maxine, left Sunday night for El Paso and Ruidoso, N. M. where they will visit relatives and friends.

Mrs. M. J. Shurley and daughter, Miss Clara, have returned from a month's visit in El Paso.

# U. S. Army Now Overseas; Numbers 3,657,000

AS 1,566,000 ON FOREIGN DUTY

Approximately half of the United States army is now stationed overseas and about the same proportion of the naval force is now afloat or on shore installations, the navy departments announced.

On June 1, the army had 1,566,000 men overseas, or 48.5 per cent of its forces, or 1,566,000 soldiers deployed outside the continental United States. The navy had 1,566,000 men overseas, mostly on ships, covering the 56,000 miles of supply lines.

At the end of 1944, the number of troops overseas will be increased to more than 5,000,000, approximately two-thirds of the army's total strength.

Today, the United States overseas exceeds by 100,000 men the peak overseas strength of the army in World War I, and is only 400,000 men short of equalling the entire strength of the army at the end of that war. One year ago, 1,000,000 troops were overseas, representing 21 per cent of the army's strength at that time.

The United States army air force and army service forces almost completely overseas the movement of army forces troops abroad is nearing peak.

**Plan Followed**

The development of this vast overseas force has followed a clearly defined pattern set by the United States Joint Chiefs of Staff, meeting in a stone building on Constitution Avenue in Washington, D. C. It was in this building that the overall size of the United States army today was determined, where the number of troops needed to do specific jobs and the opportune moments to victory as speedily as possible were carefully detailed. It was here that available manpower was weighed against es-

## "TROUBLED SLEEP"

timated availability of shipping for their transport.

In arriving at the overall size of the army, the joint chiefs of staff determined that initial shipments of men and material overseas would be committed, of necessity, to "plugging the line," to prevent further expansion of gains already made by the Axis. Having passed this phase, the next step was to ship men and materials overseas to eliminate the enemy's outer defenses. This phase was designed to prepare the way for the final phase—the period of decisive action.

During the first two phases, the army was engaged in establishing bases for future operations. Large combat forces of the ground army, comparatively speaking, were not engaged. It was essential that bases for operations be established; that supply lines be secured. Consequently, the flow of army personnel overseas now is on the decline after reaching its peak during the first two phases. Shipping was employed largely to get the AAF into action and to build up the tremendous installations required all over the world both to maintain the combat forces already moved into the various theaters and to provide for the larger forces to come.

**More Infantry to Go**

As the period of decisive action approached, the flow of ground personnel increased. The flow of AGF troops overseas, consequently, is on the increase today while the flow of ASF and AAF personnel has already reached its peak.

Today, the United States army air forces, with slightly less than one-half of its total 2,357,000 already overseas, has a total of more than 75,000 airplanes of all types, of which approximately 34,000 are combat aircraft. More than one-half of the AAF's combat plane strength is overseas, making the aerial striking force in point of size

and fire power.

The AAF has approximately 925 bases outside the continental United States, excluding bases on U. S. territories. Of the 925 foreign bases, 750 are airfields. The others include radio and weather stations, hospitals, depots and storage bases. Many of the bases are employed by the air transport command in its network of air routes which stretches some 110,000 miles.

Combat aircraft, crew personnel, equipment and supplies, now are reaching the planned level of effectiveness for the air war against Germany. Four of the AAF's ten combat air forces are striking at Germany from the United Kingdom and from Italy. The remaining six AAF combat air forces are striking at Japan from the Aleutians, the Central Pacific, and from China, Burma and India.

**Biggest Supply Job**

With slightly less than one-half of its personnel overseas, excluding service-type units of ground forces and air forces, the army service forces today is executing the greatest logistics job in the history of the world. In May, ASF moved a record of tons of army cargo overseas, almost twice the tonnage moved overseas in May, 1943. The peak tonnage moved overseas in the World War was in November, 1918, when 829,000 measurement tons were transported.

It usually is considered that each man overseas requires six measurement tons of initial equipment, as against one measurement ton per month of maintenance supplies.

More tonnage however, fails to reveal the complexity of the job being performed by the army service supplies, of necessity, must vary widely, depending on the area of the world to which they are being sent. Not only has the ASF supplied troops in primitive areas, where a minimum of facilities exists, it has had its problem complicated by vast water distances.

It has had to build ports through which men and supplies must move. It has had to build roads where no such facilities formerly existed, and pipelines to supply our air forces. It has had to establish and stock depots to handle the enormous amounts of supplies incident to modern warfare, unloading ships and running harbor boats all over the world. All of these tasks were essential before the full weight of ground and air action could be brought to bear against the enemy.

In addition to these tasks ASF must provide medical service, records of personnel, mail service and countless other services. For instance, in April, ASF handled 63,638,405 pieces of in-

coming and outgoing V-Mail letters, another new high.

More than one-half of all army ground forces personnel are deployed for action overseas. It is upon the shoulders of these men, and their comrades in the United States who are scheduled for overseas deployment that the fate of the final phase of overall strategy—the period of decisive action—depends.

In line with the overall strategy for our conduct of the war, shipping is available today to transport AGF divisions overseas for the period of decisive action.

**AT THE PRINCESS—**

his secretary who is willing to give her life to save the man she loved.

Thrown into an unusual and dramatic situation by author, Wilson, these players together with Joan Woodbury build the plot into a surprise climax which has had preview audiences sitting on the edge of their chairs with excitement.

**ANDY HARDY NOW GOES SCHOLASTIC IN LATEST OF FAMILY FUN FILMS**

If you're a Hardy Family fan, and who isn't? you'll enjoy the new film at the Princess Theatre, Wednesday and Thursday. It's "Andy Hardy's Blonde Trouble" and the whole Hardy Family is up to its usual fun-making. In addition to the perennial favorites are Herbert Marshall, Bonita Granville, Keye Luke, Jean Porter and the Wilde Twins, all new to the popular series.

Mickey Rooney, as the irrepressible Andy, sets off to follow his father's footsteps at Wainwright College and learns to his delight that it is now co-ed. His troubles begin on the train where he meets Bonita Granville bound for Wainwright, Herbert Marshall, dean of the college, and the pretty Wilde Twins only since the twins, in order not to be separated, are pretending to be one person, and keep Andy in a perpetual state of confusion.

Andy is attracted to Bonita immediately, but it is soon obvious that although Bonita likes Andy she is much more interested in Herbert Marshall. When they arrive at school Andy tries to help the twins out of their predicament and only succeeds in getting himself into trouble. His affairs with Bonita aren't going well either. He is so miserable that he decides to leave college rather than risk blemishing his father's good name. But before he can go the Judge arrives and sets everything to rights and Andy then decides

Whether the scar will show is entirely up to you, said the doctor to the sweet young thing.

The most trusting are the most trustworthy.

A fashion expert claims a girl can dress in 45 seconds, which should give married men a laugh.

to settle down to a happy scholastic career.

## THE STATE OF TEXAS TO THE SHERIFF OR ANY CONSTABLE OF TERRELL COUNTY, GREETING:

Mrs. Hortencia Z. Arrendondo Administratrix of the Estate of Clemencia A. Zamora, deceased having filed in our County Court her Final Account of the condition of said Estate of said Clemencia A. Zamora, deceased, you are hereby commanded, that by publication of this Writ once in a newspaper regularly published in the County of Terrell and said publication shall be not less than ten days before the return day hereof, you give due notice to all persons interested in the account for final settlement of said estate, to file their objections thereto, if any they have, in said Court on or before Monday the 7th, day of August A. D. 1944 when said Account will be considered by said Court.

Witness M. H. Goode, Jr., Clerk of the County Court of Terrell County.

Given under my hand and seal of said Court at my office in the City of Sanderson, Texas this 18th day of JULY A. D. 1944.

M. H. GOODE, JR.  
Clerk County Court  
Terrell County, Texas.  
By ZENA EDWARDS

J. S. NANCE,  
Sheriff.

to washable, color-fast materials.

Rust spots are another stain most prevalent in summer. To remove these, dampen the spot with lemon juice, sprinkle with common table salt and put in the sun. Rinse thoroughly before.

If you have ironed with too hot an iron and slightly scorched an article try putting it in the direct rays of the sun for an hour or two before washing it over. A faint yellow tinge will disappear like magic. A more serious discoloration will have to be laundered and may require a bleach to remove it.

Don't try to keep up with your neighbors; let them keep up with you.

Somebody wants to know why they need so many bureaus at Washington. That's easy. They have to have some place in which to keep the red tape.

The Texan's share in this war is truly a big one. Of every 18 men in the army, Navy and Marine corps, one is a native of the Lone Star State. Recent reports show approximately 650,000 Texans in the services.

Every dispatch from the fighting fronts reminds us that the descendants of the heroes of the Alamo are first-string scrappers. The recruiting officer who told the boys up north that they should "join the army and help Texas win the war" was not too far from the truth!

Here's the latest on some of the Texas fighting men:

Capt. John A. Paul of Kerrville is wearing a bronze star won in the hard fighting at Bougainville. . . Lt. Bill Hogan of Clarksville, now recovering from wounds, has been awarded the Distinguished Service Cross for heroism in wiping out an anti-tank gun crew. . . and the same medal has gone to Lt. Delbert C. Gates of Joinerville, with a citation which attests his "extraordinary heroism" in fighting off a Jap attack while armed only with an automatic rifle.

Lewis Schatz of Dobbin, who is back home for hospitalization after being twice wounded in Italy, met his brother, Pfc. August Schatz, at Salerno. August is still in Italy chasing the retreating Nazis.

"Lucky boots" have carried Lt. E. W. Bridwell of Winters through 23 bombing missions over Europe. The high-heeled Texas footgear, first worn by Capt. L. A. Brumley of Del Rio, were passed on to Lt. Bridwell. When he completes his flying stint, they will go to Lt. Bob Deveney of Waco, who thinks they will bring him luck too.

"Commando" Kelly, the Yankee Irishman who became a Texan and won the Congressional Medal of Honor by fighting heroically with Texas' 36th division stopped off in Austin recently to thank the "home folks" for their contributions to the war effort.

"We know Texans are behind us," he told Wayland D. Towner, manager of the United War Chest of Texas, "because we got National War Fund services even up close to the front lines. USO camp shows, War Prisoners Aid

### What You Buy With WAR BONDS

V Mail

When a soldier or a sailor is low in spirits there is nothing that will cheer him up as much as a letter from home, so the War and Navy Departments have devised a method for getting "the word" to its fighting men with the greatest dispatch. This is the microfilm method of transmitting letters, known to all of us as V-mail.

Any news from home is bound to please our soldiers and our sailors but the news they want to have most is the news from our production front and news that we are winning our fight against inflation by our savings and investment in War Bonds. U. S. Treasury Department

## ★ TERRELL COUNTY HEROES ★ ☆☆ IN SERVICE ☆☆

LOUIS GARZA

Lost his life in the invasion of Italy. He had seen service in North Africa and was with the Medical Department when he was killed in action January 29, 1944, after entering Italy. Garza was inducted into the army March 26, 1941, and received his initial training at Fort Bliss where he was given the rank of first class private before being transferred. He was stationed at Camp Edwards, Mass., when he with his company was ordered to foreign duty, and went overseas in March 1943. Garza was born in Del Rio and moved to Sanderson with his family when he was fifteen years of age.

— THE LIFE OF A TERRELL COUNTY HERO BROUGHT EACH WEEK BY —  
**THE KERR MERCANTILE COMPANY**

and other agencies are doing a great job, thanks to the \$5,000,000 given by Texas last year. Keep up the good work, and we'll keep hitting the enemy hard!"

The Nazis in Normandy made a mistake when they made a Texan mad one day last week. When a German bazooka knocked out his tank, Lt. Dick Martin of Fort Worth got sore, jumped on top of the stranded machine, cut loose with a sub-machine gun, and personally killed 35 Nazis.

Lt. Dan Gilmore, whose home is Luling, has made six bombing runs over Berlin, and still is in there pitching. Now he holds the DFC for heroism and the Air Medal with three Oak Leaf Clusters.

Lt. Neilan Bemis of Denison is towing more glider troops to France, after winning the DFC with cluster. . . Lt. Winfred Alfred of Commerce is back home after 28 missions over Europe as a Flying Fortress pilot. . . Sgt. Julian Barkman, whose home is near Texarkana, has been taken prisoner by the Germans. But his lot will be made easier by War Prisoners Aid, National War Fund agency which provides sports-equipment and other supplies for our men behind enemy barbed wire.

One of the youngest generals in the Army is C. D. "Casey" Vincent, veteran fighter pilot. He's only 29, but strictly a Texas fighting man. His home is Gale

### AT THE PRINCESS—

"HI' YA SAILOR," LAUGH-FILM IS ALL-OUT ENTERTAINMENT

Rated one of the year's breeziest comedy-musicals, "Hi' Ya Sailor," comes Friday and Saturday, July 28 and 29, to the Princess Theatre. Featured in the new tunefilm are Donald Woods and Elyse Knox, Eddie Quillan and Jerome Cowan. Other favorites among the supporting players are Frank Jenks and Phyllis Brooks.

Added singing and dancing features in the picture are presented by the famous Hacker Duo, the Nilsson Sisters, Wingy Manone and his orchestra and Mayris Chaney and her dance trio.

"Hi' Ya Sailor," dealing with the affairs of three Merchant Marines who are swindled in a crooked song-publishing racket, was suggested by a story by Fanya Lawrence. Stanley Roberts wrote the clever screen play. A lavish night-club and a servicemen's canteen are back-grounds for many of the picture's exciting and comical situations. How a beautiful feminine taxi driver, portrayed by Miss Knox, aids the frantic marines in their plight, is a gay highlight of the film's surprising climax.

Fifteen popular tunes are featured in "Hi' Ya Sailor's" musical score.

### RATIONING

Meats, Fats—Red stamps A8 through Z8, good indefinitely.
