**ELECTIONS**  
pay any attention to newspaper reports of trouble in the smaller nations concerning elections? The former of Nazi Germany, and present satellites of Soviet are finding the ideal of nations incompatible with the political doctrines that have been foisted upon them. The masses go to the polls in secret and vote, and the result is reserved for the democracies.

The classless and enlightenized under benevolent governments (that's the picture drawn up for the people still ruled by the few) do not value the power of the few. They do not know what a factor of democracy is. Not having permitted the will of the people to be expressed through free speech, a press, and free elections, the rulers of the few remain.

**Britain**  
Britain can have free elections at the same time it artificially disciplines its labor and fosters government management of industry. Events in Britain give us this statement. It was to me while in England that the nation was in trouble. Absenteeism of workers in cold mines had risen to 25 per cent, and this had reduced to 18 per cent only when the coal family was already a reality. Property remained inexplicable.

Because there was a lack of discipline common in the industrial workers, the Parliament was afraid to discipline the miners to get the next election. This is why the labor government watched the coal develop, step by step, fully that it was coming.

**Class**  
Country can promote government management of industry. England is trying to do, maintain discipline of labor with free elections. Starting the first two, in good, but he is not troubled by the result. Free elections present conditions in which would have little meaning. A risk that the ruling class could never

in America have found the best type of discipline from incentives found in the ambition to get ahead. Man knows he can bet on it and is not afraid of the best kind of self-discipline. The lowest that can become a great one. An assembly line can plan to own the factory and do it honestly. Like these have happened to go unnoticed.

**Electing**  
Must have discipline in economic life, but when a man finds it necessary to discipline its labor force, it begins to curtail its free elections. Like government management industry hinders adequate rural discipline of labor in a free market and the freedoms of assembly, and press, we have little fear of dictatorial. Free elections would

## Budget Set For Conservation Work In Terrell County

Miss Edith Cameron, secretary in the local Triple A office, reported that the budget for the conservation work to be carried on in Terrell County for 1947 has been set at \$72,600.00. Of this amount the sum of \$44,037.56 has been issued to date on prior approvals. Work that has been completed to date amounts to \$9,154.70, leaving a balance of the budget to be allocated as \$31,613.74. This covers 20 ranches in Terrell County.

Of the above amount issued for approvals, \$24,726.60 has been issued to contractors which will be paid as soon as the work is finished rather than at the end of the year.

Miss Cameron gave the following resume of the 1946 work program in this county. Applications for payment on 27 ranches have been submitted to the General Accounting Office in College Station, Texas. The amount of payment to be returned to the County on these 27 applications will be approximately \$33,000.00. On nine other ranches, payments were made direct to contractors over the year in the amount of \$22,219.15. There has been a total of fifty-one applications signed with respect to payment under the 1946 program.

If this is not done by March 31, 1947, then both rancher and contractor will lose their money as it will be cancelled.

## Veterans' News

Q—Does my converted National Service Life Insurance have a cash surrender value?

A—Yes. All converted policies have cash surrender values, paid-up insurance and automatic extended term insurance values, together with policy loan provisions, effective after the policy has been in force one full year.

Q—Is it true that National Service Life Insurance pays the insured veterans \$5 per month for each \$1,000 of insurance in force while he is totally disabled?

A—If the veteran pays the necessary extra premium, he will be paid \$5 per month for each \$1,000 of insurance in force after he has been totally disabled for 6 consecutive months. Application for the total disability income provision may be made at the time application is made for NSLI or at any time thereafter while the insurance is in force under premium paying conditions.

Q—Is there a time for filing for a waiver of premiums on NSLI by the insured, and how far back may a waiver be granted?

A—Application for waiver of premium should be made by the insured immediately after he has been totally disabled for six months. Ordinarily, his waiver will not be made effective for more than one year prior to date of his application. However, the Administrator of Veterans Affairs may make the waiver effective in excess of one year where he determines that the insured's failure to make timely application was due to circumstances beyond his control.

Q—Can I borrow on my converted National Service Life Insurance?

A—Yes. Any converted policy, in force by payment of premiums one year or longer, affords the insured the right to borrow up to 94 percent of the cash value by submitting a proper loan agreement to the Veterans Administration prior to the expiration of the grace period.

## HEALTH NOTES—

AUSTIN, Texas, March 27.—A good old fashioned spring house cleaning in every city and community in Texas would do a great deal toward furthering good health in this state according to Dr. Geo. W. Cox, State Health Officer, who said in Austin today, "From a practical standpoint the old adage that 'Cleanliness is next to Godliness' is still well worth emphasizing."

A general clean-up program of state-wide proportions with the objective of bettering health conditions for our citizenship should include surface cleaning, drainage, the graveling of streets and alleys, the cleaning of all parks and playgrounds and the clearing of weeds and rubbish off of vacant lots.

The destruction of mosquito breeding places and rat harborage, the proper disposal of garbage and trash and the general cleaning up of all premises," said Dr. Cox, "will be of inestimable value in helping to keep down summer health hazards such as dysentery, typhoid and poliomyelitis. Good community housekeeping and ordinary sanitary measures require the prompt removal of all waste matter in and around yards and homes in order to abate the danger of such diseases, and insure good health protection throughout the State."

Dr. Cox stressed the fact that in many dangerous diseases are filth-borne, and the only possible way to control them is to eliminate the insanitary conditions responsible for their spread.

In driving away from the curb the driver of the motorcycle evidently did not see a car that was backing away from the curb at the same time, and the two machines collided.

Young Sheppard, who was riding back of the driver of the motorcycle, was thrown off of the machine to the ground. His right leg was badly crushed and the bone broken.

After being given first aid treatment by Dr. J. W. Pate, he was rushed to the M. & S. Hospital in Del Rio in the Sudduth Ambulance. Reports are that he is doing fairly well.

It was not learned by the Times who was the driver of the car or of the motorcycle that was involved in the collision.

The boy's father, Loyd Sheppard is employed by J. M. Bassett in Dryden.

Mr. and Mrs. Roger Bassett and young sons who have been here for the past several months with Mrs. Bassett's mother, Mrs. J. L. Osgood, returned Monday to their home in Dryden.

## Veterans' News

Q—Does my converted National Service Life Insurance have a cash surrender value?

A—Yes. All converted policies have cash surrender values, paid-up insurance and automatic extended term insurance values, together with policy loan provisions, effective after the policy has been in force one full year.

Q—Is it true that National Service Life Insurance pays the insured veterans \$5 per month for each \$1,000 of insurance in force while he is totally disabled?

A—If in veterans pays the necessary extra premium, he will be paid \$5 per month for each \$1,000 of insurance in force after he has been totally disabled for 6 consecutive months. Application for the total disability income provision may be made at the time application is made for NSLI or at any time thereafter while the insurance is in force under premium paying conditions.

Q—Is there a time for filing for a waiver of premiums on NSLI by the insured, and how far back may a waiver be granted?

A—Application for waiver of premium should be made by the insured immediately after he has been totally disabled for six months. Ordinarily, his waiver will not be made effective for more than one year prior to date of his application. However, the Administrator of Veterans Affairs may make the waiver effective in excess of one year where he determines that the insured's failure to make timely application was due to circumstances beyond his control.

Q—Can I borrow on my converted National Service Life Insurance?

A—Yes. Any converted policy, in force by payment of premiums one year or longer, affords the insured the right to borrow up to 94 percent of the cash value by submitting a proper loan agreement to the Veterans Administration prior to the expiration of the grace period.

## HEALTH NOTES

AUSTIN, Texas, March 27.—A good old fashioned spring house cleaning in every city and community in Texas would do a great deal toward furthering good health in this state according to Dr. Geo. W. Cox, State Health Officer, who said in Austin today. "From a practical standpoint the old adage that 'Cleanliness is next to Godliness' is still well worth emphasizing."

A general clean-up program of state-wide proportions with the objective of bettering health conditions for our citizenship should include surface cleaning, drainage, the graveling of streets and alleys, the cleaning of all parks and playgrounds and the clearing of weeds and rubbish off of vacant lots.

"The destruction of mosquito breeding places and rat harborage, the proper disposal of garbage and trash and the general cleaning up of all premises," said Dr. Cox, "will be of inestimable value in helping to keep down summer health hazards such as dysentery, typhoid and poliomyelitis. Good community housekeeping and ordinary sanitary measures require the prompt removal of all waste matter in and around yards and homes in order to abate the danger of such diseases, and insure good health protection throughout the State."

Dr. Cox stressed the fact that many dangerous diseases are filth-borne, and the only possible way to control them is to eliminate the insanitary conditions responsible for their spread.

**Apple Tree Versus Wheat Field**

If you ever visit Jeb Crowell's farm, he'll take you right out on that back porch of his and show you his apple tree.

"There," says Jeb, "is nature's noblest creation—fifty years, and bearin' still the finest cider apples in the county!"

But last fall, when a group of us was there, Lud Denny points across the river to his grain fields and says: "There's an even finer sight! Acres and acres of golden grain you can make dozens of appetizing things with—including wholesome, sparkling beer."

Both of them got so eloquent on the subject, that the rest of us worked up quite a thirst; so Jeb goes to the icebox for beer and cider. And when the refreshments come, Lud chooses cider, and Jeb takes the beer!

From where I sit, that's the answer to most disputes. You can talk all you want, but when it comes to tastes and preferences, there's just no argument.

**REMEMBER—when you could buy a pound of sliced bacon for \*25¢?**

**AT** the start of World War II, you could buy a pound of first quality sliced bacon at almost any butcher shop for a quarter. Today a pound of sliced bacon of the same quality costs you up to three times as much. And what is true of bacon prices is true of many other things you buy. Almost everything you buy has gone up—almost everything *except* electricity.

As a result of greatly increased use coupled with sound business management, the cost of electricity has stayed down while other prices have been going up. It is one of few things you buy that still sells for pre-war prices or less. Although your monthly bill may not be lower, due to the fact that you're using more electricity, the cost per unit of electric service was never cheaper than it is today!
