Rotarians Hear W. R. Marrs Talk On Opportunities

At the regular weekly luncheon of the Sanderson Rotary Club Wednesday, Dr. W. R. Marrs of the University of Texas Education Extension Service, outlined some of the possibilities for the merchants and business men of Sanderson in building up the tourist trade for this area. Dr. Marrs stressed the fact that more tourists could be attracted here if the facilities were made available for their comfort and convenience. Not only do they need rooms but there are numerous services that would build up good will and tend to bring them back. One of the projects named by Marrs was the erection of a big billboard located at a convenient place for all information desired to assist the tourist. Attention to the fact that the service would be available here would be attracted by signs further down the road and by having cards to be distributed at various tourist courts and hotels in other cities.

No action was taken by the local club at the Wednesday meeting. Plans will be outlined in the near future for the proposed project, according to J. T. Sudduth, president of the local club.

D. L. Cross, Jr., secretary of the Alpine Chamber of Commerce, was a guest at the luncheon. Mr. Cross showed a splendid spirit in coming to the meeting and assuring the members present that his office stood ready to cooperate with Sanderson and invited the club here to call upon the Alpine group for any assistance they might be able to render. "The combined efforts of towns along Highway 90 can make the necessary improvements in furnishing literature and publicity to inform tourists of the service we want to render," he said.

GOD'S REVELATION TO MAN

One of the most outstanding needs of the world today is a greater faith in the Bible as the word of God. The reason some people are weak in faith is not a lack of evidence, but because men are ignorant of the evidence. I want us to study just a few reasons why the Bible is a divine Book.

1. There Is But One Bible. This fact is significant. If the Bible is a human book, why have not more books of a similar nature been produced? More Bibles are sold each year than any other book. It is printed in more languages than any other book. Why?

2. The Bible Has Withstood Tremendous Opposition. A statistician of Bible things compiled a list of more than one thousand books that have been written in opposition to the Bible, yet it stands. Could any other book survive so much destructive criticism? Men are still writing books against the Bible, but they will go the way of others. Why does the Bible remain?

3. The Bible Is Out of Harmony With Human Nature. This is a very strong argument for believing the Bible to be a divine book. We do not see the burning desert sands producing green crops. Why? It is just not the nature of such soil or climate to grow crops. But it is as reasonable to expect this as to think the Bible had its origin in the mind of men. The Bible is diametrically opposed to many things men naturally want to do. It teaches him to return good for evil. Man does not by nature want to do this. It teaches him that giving is more blessed than receiving, and other things contrary to man's thoughts. Now this question: Would men write a book condemning the things they want to do, and requiring them to do things they do not want to do? Certainly not. It is apparent from these few reasons that the Bible did not originate with man, but is God's revelation.

GOD'S REVELATION TO MAN

One of the most outstanding needs of the world today is a greater faith in the Bible as the word of God. The reason some people are weak in faith is not a lack of evidence, but because men are ignorant of the evidence. I want us to study just a few reasons why the Bible is a divine book.

1. There is But One Bible. This fact is significant. If the Bible is a human book, why have not more books of a similar nature been produced? More Bibles are sold each year than any other book. It is printed in more languages than any other book. Why?

2. The Bible Has Withstood Tremendous Opposition. A statistician of Bible things compiled a list of more than one thousand books that have been written in opposition to the Bible, yet it stands. Could any other book survive so much destructive criticism? Men are still writing books against the Bible, but they will go the way of others. Why does the Bible remain?

3. The Bible is Out of Harmony with Human Nature. This is a very strong argument for believing the Bible to be a divine book. We do not see the burning desert sands producing green crops. Why? It is just not the nature of such soil or climate to grow crops. But it is as reasonable to expect this as to think the Bible had its origin in the mind of men. The Bible is diametrically opposed to many things men naturally want to do. It teaches him to return good for evil. Man does not by nature want to do this. It teaches him that giving is more blessed than receiving, and other things contrary to man's thoughts. Now this question: Would men write a book condemning the things they want to do, and requiring them to do things they do not want to do? Certainly not. It is apparent from these few reasons that the Bible did not originate with man, but is God's revelation.

HELP YOUR REFRIGERATOR SERVE YOU BETTER

DEFROST whenever frost reaches thickness of one-quarter inch

Thick frost retards coldmaking, makes your refrigerator run longer, increases operating cost. It should be removed whenever it becomes one-quarter of an inch thick. It is necessary to defrost more often in summer than in winter because of more moisture in the air and greater use of your refrigerator.

A Quick Method of Defrosting

Empty defrosting tray and turn control to "off." Remove ice trays and frozen foods from freezer. (If latter are wrapped in several thicknesses of paper and placed on refrigerator shelf, they won't thaw out in short time it takes to defrost.) Fill proper-sized pans with very hot water and place on shelves of freezer. Use fresh hot water as needed.

When frost has melted wash freezer with weak solution of baking soda and lukewarm water. Clean food compartment, wash thoroughly with baking soda solution and wipe dry. Empty drip pan, replace ice trays and frozen foods and start freezing. The entire operation should take only 20 to 30 minutes.

The Best Time of Day to Defrost

During the hot summer months it's best to defrost in the late evening just before bedtime, when the refrigerator has less work to do. If you defrost during the middle of the day, the refrigerator may run excessively when started up, because of the heat, frequent door openings and warm foods being placed in food compartment.

Wherever you go, they're talking **DYNAFLOW**

From Atlantic to Pacific, it's simply terrific.

Not in a generation - maybe not in two - has any single improvement in automobiles caused the talk or met the instant approval that has greeted this new drive.

You see the reason in your first five minutes behind a Dynaflow® wheel.

You sense that this is not merely an improvement on old ways, but a whole new system of transferring power from your engine to the rear wheels.

For the first time, oil does every-

thing - replaces the friction clutch, eliminates the usual forward gears, even actuates the mechanism by which you change from Driving range to emergency Low and Reverse.

You feel the result in new smoothness that's like riding a mighty tide of flowing oil.

You move from standstill to road speed in one smooth unbroken sweep of power, quick and effortless in getaway and instantly responsive at speed.

You stop by pressing the foot-brake - go again by feeding gas. Once you've set the selector

lever, you need not touch it again in normal driving until you're ready to park or back up.

Outside engineers look at Dynaflow and say, "Now you've got something!"

You'll say so too - once you handle a Buick ROADMASTER with this new driving magic.

Try it, first chance you get - and we think you'll want to see your Buick dealer at once to get an order in - with or without a car to trade.

**Dynaflow Drive is available at extra cost on Buick Roadmaster models only.*
