

Vern's views

The following article appeared recently in the Claude News in Cecil Waggoner's column.

"A newspaperman is paradoxical. He is an idealist crusading for poetic perfection and realist enough to know he will never achieve it here or now. He strives constantly for that one perfect edition of his paper, but knows it will never be achieved this side of the grave. He constantly works for the betterment of his fellow man and knows they constantly hold him in suspicion. He knows when he is right there will be plenty who will prove him wrong. And as he constantly strives to reveal truth he knows many of them are so relative that even the absolutes are held in doubt by many of his readers.

"Only a vegetable is happy and he can't be certain about that, so he strives for the possible but is far short of his ideal. His noble thoughts are but chaff in the minds of some, his painful research but stiffness to others and his revelation of evil but holy nonsense to kindred hearts.

"His only happiness is derived from those few who understand what he writes but this happiness is quickly smothered by the many who do not, or can not. So he tries again.

"But the newspaper man has one serious blindspot. He has not yet learned that evil is like Medusa. Every time you slay one, seven spring up in its place. But since he was the first to bring us historical accounts of the Bible he keeps hoping for a repeat performance."

-jvs-

Most people in the newspaper trade cannot find the time to set their self-evaluation down in understandable words. This writer couldn't even find time to decide whether he considers this a good summation of the newsmen.

Nevertheless, it is one man's opinion, well-expressed.

Recently while listening to one of those radio stations that plays the "top forty" over and over again all day long, I came up with a partial explanation of the drift modern music has taken.

While listening to a "tune" that was particularly pointless, I suddenly found my mind drifting back to boyhood days to some of the sounds I heard that certainly couldn't be called beautiful or pleasing to the ears, but seemed to hold a certain captive power over me.

I was remembering the cow bell hanging in a tree not far from the house. In never rang with the same sound two nights in a row. On still nights, an occasional tinkle was the only sound to be heard, and it sounded differently each time the velocity of the wind was altered however minutely.

And I have heard people rave about how they loved to hear a dove, or bull frog, or red bird etc. The sounds made by these organisms probably could not be classified as beautiful, but they are different. That's why folks like to listen to them, and that's why folks like to listen to today's music.

There's not a living thing that can mimick exactly the sounds that used to come from the old cow bell hanging in that tree behind my house. I don't believe there is any living or un-animated thing that can mimick the sounds some modern music-makers can make

Banquet Honors Top Citizens

MAN OF THE YEAR--Andy Hurst clutches the plaque awarded him at the banquet after he was named "Man of the Year For 1960."

WOMAN OF YEAR Mrs. Ralph Wilson and last years honoree Mrs. Claude Osborn are shown shortly after Mrs. Osborn presented the plaque to Mrs. Wilson.

Hurst, Wilson, Williams Praised By Chamber

Andy Hurst, Mrs. Ralph Wilson and Jane Williams were recognized as this community's outstanding citizens of 1960 at the Chamber of Commerce and Agriculture Banquet Tuesday night.

Hurst, a department store operator, was named "Man of the Year." Mrs. Wilson, a housewife was honored as "Woman of the Year," and Mrs. Williams took the award for "Most Courteous Employee in Friona."

Mrs. Williams is a veteran employee of Friona State Bank. Mrs. Wilson is the daughter of a pioneer Farmer County family. Her maiden name was Schlenker.

Mrs. Wilson has been unusually active in community civic affairs, including wartime work as chairman of the local Red Cross Unit.

Hurst is past president of Friona Lions Club, a Mason, member of American Legion, and helped start the United Fund Drive in Friona. He is currently active in efforts being made by this area to secure sugar beet acreage, a director for Lions, and president of the newly organized Friona Country Club.

Martell LeVeque was named president of the Chamber to serve in that capacity for the next two years. Frank Spring is the new secretary, and Wesley Foster was installed as vice president. Other directors who took office were J. G. McFarland and Paul Fortenberry.

"Spanking at the right time can do youngsters good," guest speaker Jerry Kolander told the audience of over 200 persons.

Kolander, a former judge in the court of domestic relations in Amarillo, spoke on juvenile delinquency and measures to prevent its occurrence.

The young former judge heard over 9,000 cases during the four years he was on the bench.

"I don't think kids are worse than they were when we were growing up," Kolander said.

He gave these four steps as methods parents can employ to keep their children from becoming delinquents:

1. Teach child to make correct choices;
2. Help the child form purposeful convictions;
3. Guide the child to develop wholesome habits;
4. Teach child to appraise relative values.

A. L. Black, "Man of the Year" for 1959 made the award to Hurst, Mrs. Claude Osborn, last year's honoree, presented the "Woman of the Year" award to Mrs. Wilson.

Retiring president Newman Jarrell Jr. was master of ceremonies.

A musical variety program was presented. Frank Claborn performed two comedy acts, then a quartet composed of Claborn, Herbert Day, Arlin Smith and Forrest Osborn sang

TO APRIL 16--

Hospital Moves Opening

Open House for the new addition to Parmer County Community Hospital has been postponed until April 16.

The celebration was originally planned for this weekend but plans had to be changed because opening the 18-room addition had to be postponed.

Ladies of the Hospital Auxiliary are making arrangements for the open house. The addition will be open from 3 to 5 p.m. and refreshments will be served.

Minor Wreck Mars Holiday

One minor traffic accident was the only blot on the holiday traffic record in Friona last weekend.

That mishap occurred at Highway 60 and Main Street Sunday afternoon.

Involved were two sedans driven by Gary Dean McLaughlin, of Friona and Boyd Jones of Route 1, Friona.

Police Chief Ben Moorman investigated the accident. Property damage was set at \$85 with no injuries.

MOST COURTEOUS EMPLOYEE--Jane Williams receives her award from Wesley Foster. "Our customers are so nice that it's easy to be courteous to them," she said after receiving the award.

Grain Meetings Set By GSPA

Grain Sorghum Producers Association will sponsor two meetings in Parmer County to give ASC officials an opportunity to explain the Feed Grains Law that was recently enacted.

First of the meetings will be Friday night in the Bovina high school auditorium at 8 o'clock. A second explanatory meeting will be held Monday night at 8 o'clock in the Hub Community Center.

Farmers are urged to attend these meetings, according to an official of the GSPA. Grain Sorghum Producers Association has endorsed the bill, which will

pay farmers to reduce their grain sorghum acreage by 20 per cent. Under the plan, farmers will also receive a support price of \$1.78 per hundredweight on the grain they produce up to the county average.

Parmer County's average has been established at 4,159 pounds per acre according to a GSPA member. All grain produced above this average will either be sold on the open market or put into storage.

Child Burned In Mishap Near Here

Susan Lynn Martin, suffered burns Friday afternoon in an accident at her home.

Susan, the six-year-old daughter of Mr. and Mrs. Larry Martin who live three miles west of Friona, pulled a deep fry cooking apparatus off a shelf spilling hot grease on the lower half of her body.

She was reported in good condition at Parmer County Community Hospital.

PVT. LUTHER J. METCALF L. Metcalf Ends Course

Marine Pvt. Luther J. Metcalf, son of Mr. and Mrs. L. P. Metcalf of Route 2, Friona, completed a four week individual combat training course, March 31, with the Second Infantry Training Regiment, Marine Corps Base, Camp Pendleton, Calif.

Every new marine receives combat training upon completion of recruit training. The course includes instruction in the latest infantry tactics, scouting and patrolling, first-aid, military explosives and defensive positions.

Metcalf, a 1960 graduate of Friona High School, is home on leave.

Dogs Will Be Shot Thursday

City Manager Albert Field announced this week that dog vaccinations will be conducted here Thursday from 1 p.m. until the job is finished.

The vaccinations were originally scheduled for March 30 but were postponed due to rainy weather. Veterinarian will be Doctor Cope from Hereford.

Lions Earn \$1,100 From Broom Sale

Friona Lions reported a net profit of over \$1,100 from their annual broom sale conducted Tuesday.

This is a drop from last year's receipts, but Lions officers nevertheless expressed satisfaction since many of last year's best buyers still had some of last year's merchandise in good condition.

Lions salesmen were dispatched from City Park beginning at 7:30 Tuesday morning, and covered the city pretty thoroughly and went to outlying communities.

Mr. and Mrs. Ray Dean Fleming were in Lockney Saturday and Sunday visiting in the home of her parents, Mr. and Mrs. Lloyd Widener.

Mr. and Mrs. Don Reeve were in Friona last weekend visiting in the homes of their parents, Mayor and Mrs. R.L. Fleming and Mr. and Mrs. Glenn Reeve.

Mrs. Joe Landrum is the new secretary at the First Baptist Church.

SECTION I

TOWER ENDORSED--

Men On Ballot Win City Council Places

WHAT A JOB election clerk Mrs. Ray Landrum seems to be saying as she looks over the huge ballot used for the senate election.

Friona voters threw their support behind John Tower in the special senate election and put the three announced candidates into city aldermen positions in the elections held here Tuesday.

An apparent spur-of-the-moment write in campaign fell short, but two men who had not filed for a place on the ballot polled over 100 votes each as voters turned out for the two elections in near-record numbers.

A total of 353 votes were cast in the city election, while 467 from the precinct voted for senator.

Friona FFA Takes Fifth

Friona Livestock Judging Team placed fifth at last week's Plainview Fat Stock Show in Plainview.

Kress won the contest followed by Olton, Hart and Kress's No. 2 team.

Tulia topped the steer judging event with 407 points. Olton, and Littlefield followed with Friona in fourth place with 395 points. Tommy Tatum of Friona was high individual in this division with 150 points to his credit.

Kress was first in lamb judging with 421 points, Olton and Friona followed in that order with the latter scoring 364 points.

Total team points for the top five teams were Kress No. 1, 1,146; Olton No. 2, 1,126; Kress No. 2, 1,069; Hart No. 2, 1,064, and Friona, 1,049.

Winning places on the city commission were Bill Nichols, incumbent with 230 votes; Kenneth Williams, 226 votes and Wright Williams with the highest vote total--297.

O. J. Beene was written in on 124 ballots and Bill Wooley received 104 write-in votes. Neither man had announced for the office and no organized effort to have them elected was apparent until early on election day.

The Friona precinct went Republican with Tower, the only GOP candidate in the race, polling 155 votes. Will Wilson, the only candidate that had an organized campaign force working locally, polled 109 votes for second high. Jim Wright polled 74, Maurey Maverick, 6 and Henry Gonzales 6.

Four minor candidates picked up one vote each, and Art Glover, Amarillo Independent, polled 18 votes.

On a county-wide basis, Tower received 417 votes to Wilson's 314. Vote totals of the other major candidates were

(Continued on page 8.)

Funeral Held Here For Mrs. Chapin

Funeral services for Mrs. L. C. Chapin of Bloomfield, N. Mex. were conducted at the

Sixth Street Church of Christ at 3 p.m. Friday. Officiating ministers were Paul Smith of Friona and Jack Mackey of Amarillo.

Mrs. Chapin, a former resident of the Black Community, died Wednesday morning in an Amarillo hospital from injuries received in an automobile accident 12 miles west of Hereford.

Chapin, a Church of Christ minister, moved his family to Parmer County from Adams, Okla. in 1934 and preached in this area several years.

Survivors besides the husband include two sons, T. C. Chapin of Grand Junction, Colo. and Doyle Chapin of Sudan; two daughters, Mrs. Jean Ooley of Liberal, Kansas and Mrs. June Jones of Amarillo.

Also five brothers, George Hinds of Albuquerque, Roy Hinds of Davenport, Neb., J. H. Hinds of Hereford, A. B. Hinds of Amarillo and Otey Hinds of Friona; 14 grandchildren and three great-grandchildren.

Burial was in the Friona cemetery.

Aldermen Again Table Annexation Proposition

After a lengthy discussion on ways to "square up" the city's north boundary, city commissioners voted to table action on an annexation question Monday night.

Fred Carson, who owns a large area of residential property in the north part of town has requested that his property be annexed into the city limits.

Payments for municipal improvements Carson has made to his property will have to be made by the city, and establishing this figure will have to be accomplished before any annexation steps can be

taken. Commissioners are also eyeing the annexation request as a chance to eliminate the jagged city boundary on the north side of town. Efforts will be made to persuade other property owners in the Carson neighborhood to come into the city limits.

The busy session marked an end to the terms of councilmen Danny Mac Bainum and Deon Awtry. A third councilman, Bill Nichols won reelection in Tuesday's balloting.

The councilmen voted to reinvest \$50,000 that evolved from

excess funds approved in a bond issue.

Police Chief Ben Moorman gave the first of his monthly reports to the council. He explained that the police department will begin keeping daily records of the activities of the officer on duty, and these records will be compiled into a monthly report which the police chief will present at the regular monthly council meeting.

Moorman's report showed: Theft from automobiles... 2 Burglaries... 2 Moving accidents... 5

Moving violations... 8 Drunkenness... 1

The councilmen authorized City Manager Albert Field to select lots for the city to buy for a warehouse location and place to park machinery. The old city warehouse will be torn down or moved, from its present location in the east part of town.

Aldermen authorized purchase of miscellaneous cast iron pipe for water line extensions, but decided not to buy a siren for the fire department and city's emergency warning system until more cost details are secured.

Now you can use your regular lister bottom (lister point and wings) on the Cline "W" planter instead of the point and modified wing as has been used in the past.

Cline Industries have developed a new shoe attachment for the Cline "W" Planter so it is possible for you to use your regular lister bottom on the planter now.

These SHOE ATTACHMENTS will enable you to plant uniform straight rows and eliminate trash trouble.

These attachments can be bought from your Cline "W" planter dealer for a nominal cost and can be put on Cline "W" planters you have bought in the past.

The advantages of planting with a Cline "W" Planter are:

1. Provides water furrows to keep standing water and crusting soil away from seed row.
2. Firms moist soil close around seeds.
3. Has center ridge to protect seedlings from wind and wind blown soil.
4. Warms up faster than bottom of furrow planting. (This enables earlier planting and earlier maturing cotton.)
5. Presents no difficulty for early cultivation.
6. Will not dry out any more or as much as bottom of lister furrow planting with conventional planters.
7. It gives more uniform stands for satisfactory mechanical harvesting.

All-Steel Construction . . . Bearings never require lubrication . . . New deep-pan weight boxes.

● The MM Rotary Hoe is a quality machine of all-steel construction. It is so designed and so built that each 42-inch section is a unit in itself. Each section consists of two gangs of steel digger wheels, and each gang has seven steel digger wheels 18 inches in diameter mounted dependently on the gang axle.

● These digger wheels are designed to do an excellent job even under difficult conditions. One of many features on the MM Rotary Hoe is that the 10 steel fingers on each digger wheel are replaceable, should any be damaged or broken.

● Another special MM feature is the type of gang bearings used—the kind that do not require further lubrication. The bearings are made of choice maple blocks impregnated with a long-lasting lubricant. In operation a sufficient amount of oil is released by the maple bearing to keep the gang bearings lubricated constantly.

THE FRIONA STAR **Hartwell Attacker Gets Seven Years**

J. Vernon Stewart, Editor

Entered as second class mail matter July 31, 1925, at the post office in Friona, Texas, under the Act of March 31, 1897. Published each Thursday.

In Parmer County \$3 Per Year
Elsewhere \$4 Per Year

A lengthy Parmer County criminal court trial came to an end last Thursday night when a jury of 12 men returned a verdict of guilty and sentenced Bert Christesson to seven years in the penitentiary for intent to murder.

It took the jury an hour and 25 minutes to reach the verdict following what was the longest criminal court case Parmer County has had in many years. During the four-day trial, more than 20 witnesses paraded to the stand to testify.

Testimony was completed soon after lunch Thursday, and following the final arguments of both the prosecution and the defense, the case went to the jury about 5:30 p.m.

The jury returned the verdict shortly before 7 p.m., convicting the defendant of beating John Hartwell, Bovina implement dealer, with intent to murder and malice aforethought. The beating occurred on the

night of September 10, 1960. Key witnesses for the prosecution were three teenage youths who were present at the Watts No. 1 Station on the Amartillo highway where the beating took place.

The state's counsel, District Attorney Jack Young and Hurschel Harding, in their final arguments, relied heavily on the testimony of the three youths and a double-strand of heavy-coated electrical wiring which the defendant used to beat Hartwell.

The double strand of wiring, which inflicted bruises and cuts to Hartwell's face, was used as state's evidence, and it was argued that only a witness inclined to "gangsterism" would carry such a weapon in his car. Counsel for the defendant, Billy Hall of Littlefield, and David Norvell of Clovis, argued that Hartwell had given Christesson just cause to attack him.

They made reference to the Cotton Club in Texico, where the trouble between the two men started, and recalled testimony charging Hartwell with improper conduct toward Christesson's ex-wife.

Also, in their final arguments to the jury, they referred to testimony where Hartwell had allegedly called Christesson profane names in the presence of the defendant's mother and ex-wife.

As borne out in the testimony, the first trouble between the two men started at the Clover Club, and the attack for which Christesson was convicted, first occurred at a roadside park east of Farwell. Christesson and several companions had forced the car which Hartwell was driving off the road at the roadside park.

Hartwell managed to escape from his attacker at that location and turned his vehicle around and headed back toward Farwell.

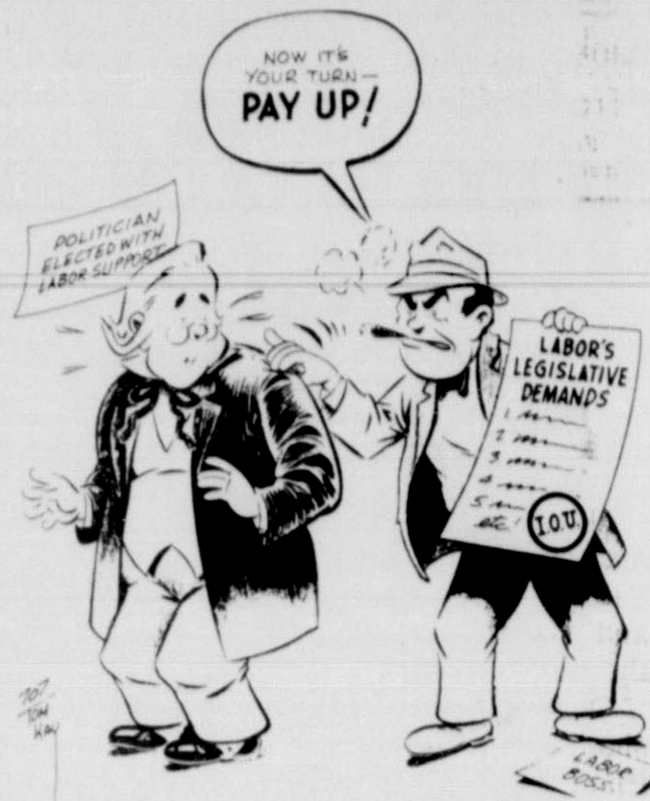

Christesson continued the assault in his car, ramming into the back of Hartwell's vehicle several times before it pulled into the driveway of the station.

It was here, according to the testimony, that Christesson continued his attack and inflicted most of the bodily harm to Hartwell, leaving him unconscious and bleeding in an

alley near the station. Presiding over the four-day trial was District Judge E. A. Bills.

Members of the jury were Don McDonald, G. P. Meissner, T. I. Burleson, Clyde B. Monk, E. L. Fairchild, Gilbert Kaltwasser, Mitz Walling, L. T. Utzman, James H. Jennings, James Enzor, Roy Dantel and G. W. Mimms.

Financial Columnist Sylvia Porter writes: "...our economy has entered the toughest, roughest, phase of competition in modern times--and in this era the businessman who doesn't recognize what he is facing or know how to fight competition successfully is going under. He can't bail himself out by price hikes as he could in the first postwar years and through most of the '50's. He can't get by with shoddy merchandise, shabby service, sloppy salesmanship. We are into a real buyer's market--and the seller who can't sell simply won't survive."

Inevitable Day of Reckoning!

Lazbuddie Hosts League Contests

Lazbuddie will be host school for the District 3-B University Interscholastic League Contest. Literary Events will be Thursday, April 6th, beginning at 9:00 A.M. Track Events will be Saturday, April 8th, beginning at 9:00 A.M.

Members of the District 3-B Conference are Bovina, Happy, Hart, Nazareth, Lazbuddie, and Walcott.

Letters to the Editor

Dear Editor: I think Mr. John W. Renner's letter was tops. I am new in this part of the country and have not had the privilege to meet Mr. Renner.

You say you was born in 1939 so you don't have any idea of what the early 1930's were. Do you have any idea of what is meant by gathering up

cow chips so we can stay warm tomorrow. Any farmer who went through the early 1930's knows and probably has done just that.

Your,
L. H. Schilling

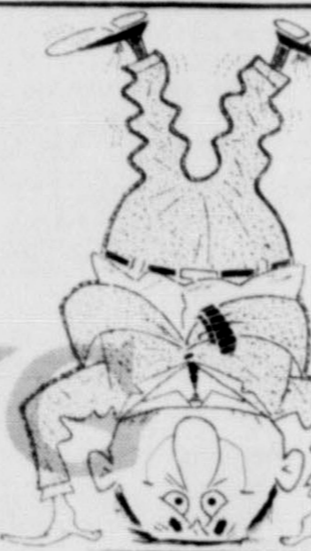

Russian scientists, experimenting with seeds to create plants that are more resistant to cold, have succeeded in getting 30-50 per cent crop increases with cabbages and onions--they say.

Only three per cent of the land surface of the earth is useful for food production.

Rebekahs Hosts
Oddfellows
Thursday

Oddfellows and families of the Rebekahs were their guests Thursday evening in the American Legion Hall for a covered dish dinner. A beautifully decorated cake was presented to Mrs. Bud Reed honoring her birthday. The evening was spent playing games of 42 and bingo. Forty one attended the "Family Night" occasion.

Mr. and Mrs. Gerald Wright spent Sunday visiting in the home of Mrs. Wright's parents, Mr. and Mrs. M. M. Cooper of Portales.

in and around
FRIONA

WITH JUNE

Tuesday's sunshine and absence of wind seemed to be an inspiration to a lot of people to begin spring clean-up operations. It was difficult for anyone to stay inside and air conditioners were turned on all over town.

A major clean up operation is about finished across the alley back of Johnson's Corner Grocery. An old building has been torn down and soon all the debris will be moved. Think this lot is being cleared for an all weather parking area for Johnson's grocery customers.

This alley really should have been Friona's first mall. A

lot of coffee customers of Ralph Roden's use the back door of the drug store more than they use the front door. Then, too, a lot of bank customers use the drive-in facilities.

Another improvement in this alley is repair on the huge trash box that several business establishments use. No longer will it be possible for dogs to get in the box and scatter trash all over the place.

If all of us would begin right now to eliminate all trash collecting objects on our premises, we would have less trouble later in the summer.

Farmers in the area are really busy watering, fertilizing and getting ready for spring planting. In the very near future some anxious farmer will plant some cotton. It seems to me that the "cotton planting fever" is more contagious than it.

Some Lubbock County farmers have already planted cotton and Parmer County isn't too far from Lubbock County nor is there to much difference in climatic conditions, so as soon as word gets around that some 1961 cotton has been planted, some will be planted in this area.

Clyde Goodwine has a very pretty bed of tulips that are blooming profusely and you can see a lot of color up and down any residential street.

Friona students had a long Easter holiday and many residents of the town took advantage of a long weekend to go sight seeing or visit relatives and friends.

During every age since the beginning of time man has been hampered by his lack of vision and faith in himself. Too many people put in too much time concentrating on "what I could do if..." And, the "if" has as many different endings as there are people.

If each of us could be made to realize that the things we could do "if" are of no importance in comparison to the things we do "in spite of" any number of obstacles we may have to surmount, much more would be accomplished.

Don't know when the following article was written, but it isn't original nor is it new. It was probably written hundreds of years ago, but is just as applicable now as it was then.

THE CHALLENGE

Let us be challenged by the heights to which men like ourselves can rise, says Paul Spelcher as a reminder to those whose spirits are downcast by the trend of world affairs. Let us be proud, he admonished, of the fact that we are human beings, and that we contain within ourselves resources of strength and power great enough to enable us to climb far and high.

I know that there is much disillusionment, much discouragement, much temptation to take the easy way, the short cut, to do the expedient rather than the right. But we are men--because we are men, we

can--and because we are men, we can rise above the dull level of yielding.

It is not what destiny does with us, but what we do with destiny that determines what we shall become. When a man is determined, what can stop him?

Cripple him, and you have a Sir Walter Scott; Put him in a prison cell, and you have a John Bunyan; Bury him in the snows of Valley Forge, and you have a George Washington; Have him born in abject poverty, and you have a Lincoln; Load him with bitter racial prejudice, and you have a Disraeli; Stab him with rheumatic pains until for years he cannot sleep with an opiate, and you have a Steinmetz;

Put him in the grease pit of a locomotive roundhouse, and you have a Walter P. Chrysler; Make him second fiddler in an obscure South American orchestra, and you have a Toscanini.

Let life challenge you, and be confident in your reply. For you are a man, and the hardships of life are sent you not by an unkind destiny to crush you, but to challenge you. Our humanity is not our weakness, but our strength.

In spite of being rather insignificant, the following item is thought provoking.

I Won't is a tramp.
I Can't is a quitter.
I Don't Know is lazy.
I Wish I Could is a wisher.
I Might be waking up.
I Will Try is on his feet.
I Can is on his way.
I Will is at work.
I Did is now the boss.

Frankie Allens Have Dinner Guests

Dinner guests in the home of Mr. and Mrs. Frankie Allen and Eddie Easter Sunday were Mr. and Mrs. W. W. Glasscock, Jeannie and Janelle of Al-

buquerque; Mr. and Mrs. W. J. Coffman and family of Amarillo; Mr. and Mrs. Orey Hinds, Mr. and Mrs. Dean Blackburn and Hal; Mr. and Mrs. Cliff Coffman and Jeff, and Mrs. Arma Coffman all of Friona.

E.H. Cummings

Return From Trip

Mr. and Mrs. E.H. Cummings returned recently from a trip to parts of southern Texas.

They were guests in the home of Cummings's sister, Mr. and Mrs. Joe Hale of Midland, and visited with relatives, Mr. and Mrs. Lewis Chisum, at McAllen.

The couple also attended the rodeo and stock show at Mercedes.

Mrs. Fay Reeve and family visited relatives in Merkel during the Easter holidays.

Mrs. Eldon Wetzel from ENMU at Portales was a guest in the home of her mother, Mrs. Reeta Agee last weekend. She is the former Betty Joyce Agee.

Mrs. Milton Evans and children, Patty, Jimmy and Susie from New Home visited in the home of her sister, Mr. and Mrs. Leonard Nettles and family the past weekend.

Club Membership Stands At 96

Membership in Friona's newly-organized country club has reached 96, and four other persons have agreed to join, boosting the total to 100, reports Andy Hurst, president of the board of directors.

With the signing of the 100 members, the initial membership goal of the club organizers has been reached and the club is now ready to push further its plans for completing construction of a nine-hole golf course and a country club building.

The board of directors are scheduled to meet Friday night for the purpose of accepting bids on asbestos pipe and discussing plans for the club house.

The directors have asked for bids on the cost of the pipe only. We plan to install the pipe, which will be used for watering the greens, themselves and with other volunteer labor.

Base work on each of the nine greens has been completed, and grass will be planted as soon as the irrigation pipes are installed.

It is not known just when the course will be completed, but members are hopeful that it will be ready for use in July.

Three of the nine holes will be located east of Highway 60 and the remaining six will be west of the highway.

As for the club building, only temporary plans have been

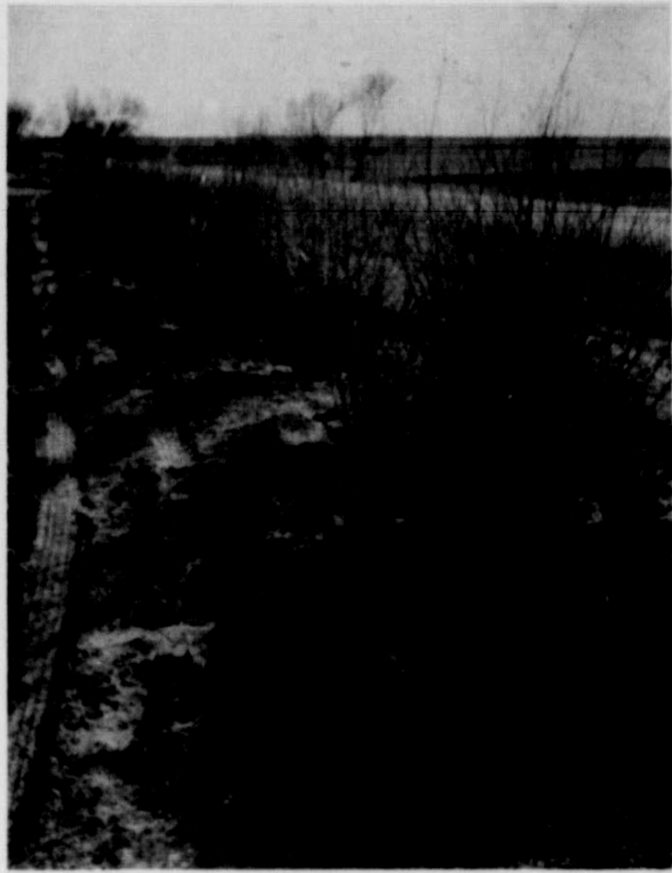

drawn and they will probably be changed before construction begins, Hurst says.

No date has been set for the start of construction of the building. The directors feel that there is no hurry on the building and that steps should be taken to get the best building at the lowest possible cost.

When the drive for organiz-

ing a country club was first started, plans called for acquiring 100 members at \$500 each before starting construction of the club and the golf course.

The \$50,000 is the minimum required for completion of the course and the directors hope that membership will be increased to 110 before the project is completed.

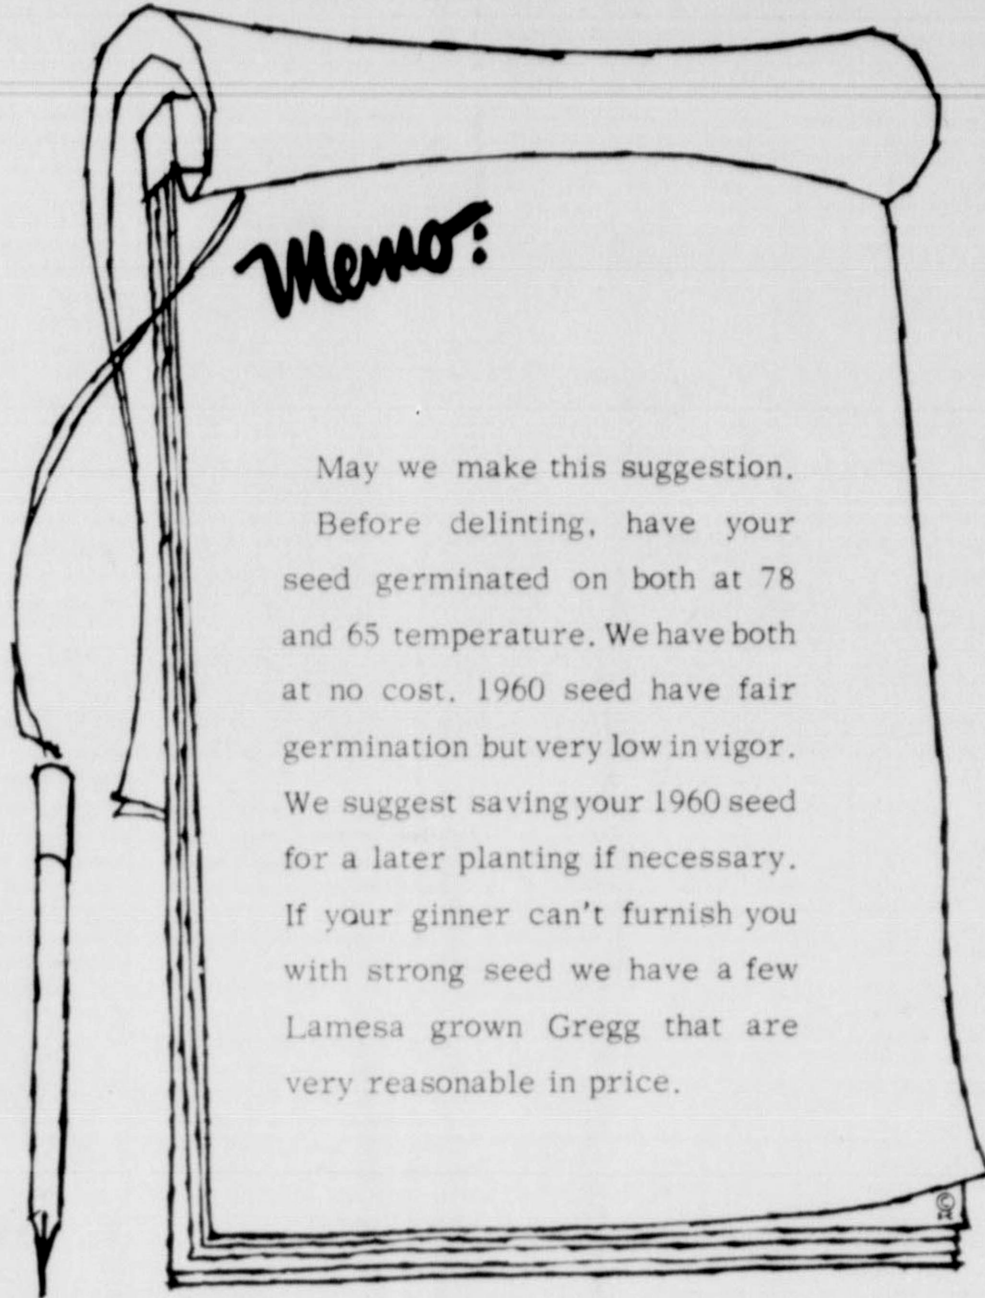

A ROW OF SHRUBS lines the edge of the new Friona Country Club golf course near Highway 60 west of town. Planting of the shrubs and trees on the course were some of the first steps taken by the club members who are building the course. The shrubs and trees will help to beautify the course and will also serve as a windbreak.

"What is a Girl?" According to the verse editors she "is innocence playing in the mud, beauty standing on its head, and motherhood dragging a doll by the foot."

And her little boy friend, portrayed on another card, "is truth with dirt on his face, beauty with a cut on his finger, wisdom with bubble gum in his hair, and the hope of the future with a frog in his pocket."

Louisburg, N. C. Times: "Information which does not compromise the national security is public information, which the public is entitled to. Newspapers have traditionally rooted out scandal and mischief by demanding all legitimate information about the government, is a precious one and must be maintained."

Mr. Cotton Farmer...

May we make this suggestion.

Before delinting, have your seed germinated on both at 78 and 65 temperature. We have both at no cost. 1960 seed have fair germination but very low in vigor. We suggest saving your 1960 seed for a later planting if necessary. If your ginner can't furnish you with strong seed we have a few Lamesa grown Gregg that are very reasonable in price.

Cotton Is King In Parmer County When You Use . . .

HUMI-CITE

WHAT IS HUMI-CITE?

HUMI-CITE is a natural liquid soil conditioner which creates humus and helps break down and balance the natural minerals in soil to produce healthy plants. Healthy plants are far less susceptible to insects and diseases.

Most of us know about plant chemistry—we have in years past tried many formulas, some with great success, and some with little results. We are putting our money on HUMI-CITE and believe we have the answer to our plant food needs. We firmly believe the addition of HUMI-CITE

to your plants including COTTON will give the greatest results in lowering damage from diseases and insects. Plant chemistry is just common sense — the same common sense every mother uses to try to give her family balanced meals to produce good healthy bodies. HUMI-CITE is a balancer — a Soil Conditioner which counteracts alkali and salts to per-

mit good germination of seeds planted in our land in Parmer County.

DIRECTIONS FOR USE: HUMI-CITE should be applied to all crops in irrigation water at the rate of 10 gallons per acre. Homeowners will be happy to know it brings marvelous results to flowers, shrubs, fruit trees and lawns. Available in small amounts for home use . . . We also have mineral water for cattle — easily applied in regular drinking water to give cattle all the minerals needed for healthy growth.

Jerry Marsens
"John's absolutely fearless—he turned his headlights right back on high beam when the other driver wouldn't dim his."

Something To Think About
6th. Street Church of Christ
Box 515 -- Friona, Texas

New Testament Christianity is based upon the conviction that the Bible is the complete and perfect will of God and that it is a revelation which contains principles necessary for an acceptable practice of Christianity today. This record shows that the early Christians were completely dedicated to Christ, their faith in His law was unwavering, and this dedicated faith led to a complete obedience.

There was no principle in the practicing of Christianity in the first century that is not possible for us to practice today. Therefore, since it was practiced during the early days of the New Testament church, the same should be practiced today because His law was revealed "once and for all" (Jude 3)

New Testament Christianity, as it was practiced by the early Christians who had the apostles as their guide, is not only possible today, it is a logical necessity if we are to live lives acceptable unto God.

Upon these conclusions we base our plea. On the day of Pentecost men heard the gospel, they believe what they heard, they repented of their sins, confessed Christ, and were immersed for the remission of those sins, and the Lord added them to the church. (Acts 2:27) This is the Lord's way. Dare you be content with anything less?

come to church sunday

Has any man ever kept God's whole law? Sometime ago a newspaper item appeared in the Philadelphia "Public Ledger" which read in part "The perfect man has been found." He finally admitted he was as nearly perfect as a man can be. Doubtless there are others who actually believe they have kept the law of God. Of course, when this man admitted that he was only as nearly perfect as a man can be, he admitted that he was a lost soul. For not near perfection but absolute perfection is the only standard that can satisfy the righteous requirements of a righteous and holy God. God tells us that "all have sinned, and come short of the glory of God." However there was One who never broke the law of God and bore the lawbreaking sins of us all, offering His own perfect righteousness if we will take this in Himself as a gift. That one we speak of is Christ who was born in a stable, crucified on the rugged cross of Calvary, and resurrected the first day of the week. "For God so loved the world He gave His only Begotten Son, that whosoever believeth on Him should not perish but have everlasting life." (John 3:16).

Of Interest To THE WOMEN

MRS. NATHAN BOYD PIPES

Baxter-Pipes Vows Read In Home Ceremony

Double ring wedding vows were exchanged by Miss Carolyn Sue Baxter, daughter of Mr. and Mrs. Oscar Baxter, and Nathan Boyd Pipes, son of Mr. and Mrs. W.W. Pipes, Bagata, Texas, in the home of the bride's parents Sunday, April 2, at 2:30 p.m.

S.M. Pope, minister of the Borger Church of Christ, read the ceremony.

A basket of white gladioli and greenery completed the flower arrangement.

"Whither Thou Goest" was the musical selection sung by Nelda Douglas, Donna Blackburn and SuZanne Taylor.

Miss Willene Baxter was her sister's maid of honor. She wore a pink dress of dacron with white accessories. Her corsage was white carnations.

R.L. Duke Jr. served as best man.

The bride wore a ballerina

length dress of white and blue lace over blue taffeta and a small hat of blue and white flowers. She carried a white Bible topped with a bouquet of white carnations and white streamers.

A reception followed the ceremony. The bride's table was laid with a pink cloth under white lace, and centered with the pink and white three tiered wedding cake. Presiding at the serving table were Mrs. S.M. Pope, Mary Hadley and Patricia Baxter. Mrs. Troy Young, sister of the bride, registered the guests. Out of town guests were Mr. and Mrs. W.W. Pipes and daughter, Brenda, and Mr. and Mrs. S.M. Pope of Borger.

Mr. and Mrs. Pipes are at home in Friona. She is a senior in Friona High School, and he graduated from Estelline High School in 1959 and is employed at Friona Motors.

Mr. and Mrs. George Treider are announcing the engagement of their daughter, Phyllis, to Rex Ronald Wagoner, son of Mr. and Mrs. Rex C. Wagoner of Gainesville. The couple plan to be married on April 23 at St. Serphim's Eastern Orthodox Church in Dallas.

Sally Osborn Is Bridal Shower Honoree

Miss Sally Osborn was honored with a bridal shower Friday afternoon, March 31, in the home of Mrs. Charles Allen. Miss Osborn, who is the daughter of Mr. and Mrs. S.H. Osborn, will exchange wedding vows with Douglas Whatley of Groom June 3.

The houseparty for the shower included Mesdames Roy Clements, Claude Osborn and George Taylor of Friona, Mrs. Roy Lee Jones of Lovington, N. Mex. and Miss Lora Mae McFarland, Clovis, aunts of the honoree, and her cousins, Mesdames Lee Cranfill, H.H. Horton, Wesley Barnett, M.C. Osborn and Miss SuZanne Taylor.

Hostesses assisting Mrs. Allen were Mesdames Henry Lewis, W.A. Foster, Frank A. Spring, Dan Ethridge, J.T. Gee, W.M. Stewart, Hardy May, Paul Spring and H.K. Kendrick.

The refreshment table carried out the bride's chosen colors of beige and white in the

cutwork linen cloth and floral centerpiece. A sunburst arrangement of white stock, candy tuft, and slender white tapers in a footed silver bowl centered the serving table. Silver appointments completed the setting.

Spring bouquets of jonquils and tulips were used throughout the entertaining rooms.

In the receiving line were Mrs. Osborn, mother of the bride elect; Miss Osborn; Mrs. W.C. Whatley, mother of the groom elect, and Mrs. J. B. McFarland, Miss Osborn's maternal grandmother.

Out of town guests included Mesdames R. H. McFarland, Tucumcari, N. Mex.; Lonnie Baxter, Charlie Baxter, J. R. Roden and Miss Minnie Atchley of Clovis; Mesdames John Aldridge and W.H. Graham, Farwell; Mrs. Glenn of Arizona and Mrs. Gill of Amarillo, aunts of Mr. Whatley, and Miss Josephine Restivo Gussetina, Milano, Italy.

Mr. and Mrs. Joe S. Brummett of Clovis announce the engagement and approaching marriage of their daughter, Linda Karen, to Robert M. Winzler, son of Mr. and Mrs. E. M. Winzler of New York City. The couple plan a home wedding, June 2.

Buske Home Scene Of Easter Dinner

Mr. and Mrs. Pete Buske were hosts to an Easter dinner in their home Sunday.

Guests present were Mr. and Mrs. L. M. Crow, Friona; Mr. and Mrs. Dudley Robason, Siloam Springs, Ark.; Mr. and Mrs. Calvin Talley, Rex and Pattison, Friona; Mr. and Mrs. Easton Wall, Capite and Gail, Plainview; Mr. and Mrs. Hershel Jones, Jim Lee, Roger and Rhonda, Spearman.

Also Mr. and Mrs. Shorty Jones and Charles, Friona; Mr. and Mrs. W. L. Cleveland, Dale and Cindy, Amarillo; Mr. and Mrs. Jerry London and M'Lynda, Friona; Mr. and Mrs. W. S. Crow and Earl, Friona; Mr. and Mrs. Jim Carlson and Kevin, Amarillo and Mr. and Mrs. Clifford Crow, Linda and

Larry, Friona.

Also Mr. and Mrs. Jimmy Norwood and Doug, Friona; Mr. and Mrs. Gerald Barnett and Vicki, Lubbock; Mr. and Mrs. Gary Crow and Diana, Lubbock; Mr. and Mrs. Roy Johnson, Beth and Bill, Odessa; Mr. and Mrs. Jack Johnson and Diana, Midland and Mrs. W. C. Williams, Roxi and Sandra, Odessa.

Also Mr. and Mrs. Aubrey Carlton, Aubrey Lee, Jerry Don, Margie, Walter, Milton, David, Debbie and Donette, Friona; Mr. and Mrs. Tolbert Painter, Dodson, Texas; Miss Judy Kerns, Seattle, Washington; Mr. and Mrs. Richard Styles and Mike, Lubbock, Mr. and Mrs. Phillip Weatherly and Park, Friona and Miss Lila Gay Buske, Lubbock.

Local Clubs Represented At District Convention

Members of the Friona Woman's Club, Modern Study Club and Progressive Study Club attended the first annual convention of the Caprock District of Texas Federation of Women's Club at Lamesa March 27, 28 and 29.

Representatives from the Friona Woman's Club were Mrs. C. W. Dixon, member of board of directors and club report judge; Mrs. Wesley Hardesty, delegate, and Mrs. Edgar Carney.

Modern Study Club representatives were Mrs. J. G. McFarland, Mrs. Mack Bainum; Mrs. George Taylor, model for

Vogue pattern contest; Mrs. Dan Ethridge, district chairman of program planning and Mrs. Wesley Foster.

Mrs. Marion Fite, Mrs. Homer Lindeman and Mrs. Bob Riethmayer attended from the Progressive Study Club.

At the closing session, Plainview was designated as the location for the 1962 convention. The invitation was extended by Mrs. Frank, Gaston, Woman's Club president, on behalf of the 14 federated clubs of that city.

A total of 341 board members, delegates and visitors registered for the three day convention.

THE YOUTH CHOIR of the Calvary Baptist Church presented two special numbers Sunday evening. The choir was recently organized and is directed by Mrs. Jerry Maynard accompanied by Mrs. John Thomas. The choir will present a special number Friday at the revival services of the church at 8

p. m. Pictured are, left to right, front row, Mrs. John Thomas, Marcus Connelly, Howard Rhodes, Karen Bails, Helen Stowers, Shirley Hutson, Elaine Parson and Mrs. Jerry Maynard. Second row, Ellis Parson, Fred Ferguson, Billy Don Thomas, Walter Carlton, Jackie Stowers, Earl Crow and Jerry Stephens.

College Students Return To Friona For Holidays

College students from many areas were in Friona for the Easter holidays visiting friends and relatives.

Some of the Tech students from Lubbock were Patsy Anthony, Donald Loanman, Graham Prewett, Lila Gay Buske, Ronnie Castleberry, Sue Baxter, Levada Hand, Wesley and Doris Barnett, Judy Barnett.

West Texas State students at home were Connie Ray, Judy Smith, Robbie Osborn, Larry Milligan, Linda and Owen Houston and Gary Dean McLaughlin.

Other students visiting here and the colleges they attended

are: Sally Osborn and Clyde L. Hayes, University of Texas; Phillip Bates and Robbie Bogness, ACC; Bill Loanman and Geneva Floyd, LCC; Margaret Mabry, Harding College, Searcy, Ark., and Adelle Smith, North Texas State, Denton.

Also Pat Foster, Texas Women's University, Denton; Kim Caffey, Texas Western, El Paso; Helen Hamilton and Betty Joyce Wetzel, ENMU, Portales; Mary Tom Spring, Cottey College, Nevada, Mo.; John Hamilton, A&M; Jacquelyn and Jackie Hight, Panhandle A&M, Goodwell, Okla.; and Betty Barnett, Beauty School, Lubbock.

THE HIGH PLAINS FARM AND HOME

Meeting Thursday Night

Objectives Of New Feed Grain Program Outlined

First Meeting On Feed Grain Bill Friday At Bovina

The first of two meetings to explain to Farmer County farmers the new feed grain bill is scheduled for Friday night at 8 o'clock in the Bovina School Auditorium.

Prentice Mills, Farmer County ASC office manager, and the three county ASC committee members, Archie Tarter, Tom Beecham and Lewis Welch, are to be in Lubbock Friday attending a Department of Agriculture briefing on the bill.

At the Lubbock meeting, the county ASC representatives will be given final instructions on the program, and it is expected that the average county yield will be announced.

It is from this established county average that area community ASC representatives will arrive at the index average for each individual farmer who signs up for the new program.

Mills will explain to the county farmers at the Bovina meeting just how the program will work and when they can start signing up.

A second meeting for the same purpose is slated for Monday night at 8 p.m. in the Hub Community Center, and Mills says that he will try to hold meetings elsewhere if farmers desire them.

Under the new feed grain bill, recently passed by Congress and signed into law two weeks ago by the president, farmers will be eligible for price supports on corn and grain sorghum if they lay out at least 20 percent of their established acreage of 1959 and 1960.

The average national price support on grain sorghum has been set at \$1.93 per hundred weight, and it is estimated that the county average will be \$1.88. The exact county price support will be announced later.

On the 20 percent lay-out land, farmers must apply certain designated soil conservation practices. Just what these practices will have to be will be announced following the meeting Friday.

By complying with the program, farmers will be eligible for cash payment or payment-in-kind equal to 50 percent of the price they would receive on a normal yield under the new price support.

If they choose to lay out an additional 20 percent of their grain sorghum or corn land, they will be eligible for 60 percent payment on this extra lay-out.

Also, they will be given the alternative of planting the laid-out acreage into one of four crops--castor beans, sesame, safflower and sunflowers--and still be eligible for the price support.

The key to the program and how much it will affect area farmers will be the average county yield, which will be established by the Agricultural Marketing Service.

After the average yield is announced, farmers will be better able to determine their course of action and whether or not they will lay out the acreage for payment or plant part of it into one of the four designated crops.

Agricultural leaders are estimating that the county average will be set somewhere in the neighborhood of 4100 pounds.

NEWS FROM THE FARM BUREAU

BY RAYMOND EULER

Let us urge you farmers to write Governor Daniel right now, urging him to sign HB 59, which would exempt farm trailers and semi-trailers up to a gross weight of 12,000 pounds from registration and brake requirements and exempting fertilizer trailers up to a gross weight of 10,000 pounds.

Many legislators, both senators and representatives, called at the Austin legislative office of Texas Farm Bureau inquiring about rumors that Farm Bureau had compromised on the farm to market road monies question.

Farm Bureau members are urged to notify their legislators that Farm Bureau has not compromised on this issue. Each senator and representative received a telegram from Texas Farm Bureau as follows:

"Do not be misled. Texas Farm Bureau has not agreed to any change in farm-to-market road program." Farm Bureau hopes to see HCR 64 passed, signed and sent to Washington, urging the Texas Congressional delegation to oppose bills that would provide federal aid to education.

HB 129, by Cory, simplifying procedures for claiming refunds of taxes on nonhighway used gasoline by: (1) extending time for claiming refunds to one year, (2) removing notary requirement and (3) simplifying form was amended by subcommittee and then reported out favorably by full revenue and taxation committee.

This bill carries out Farm Bureau policy, and it is hoped it will pass, thus eliminating the loss of much refund tax money caused by the present complicated method for filing.

There are still some who have neglected to file for tax refund on gas, and Nell Davis, office secretary, urges you to come in and file if you are one of the negligent ones.

Consider this: "There is a generation. O how lofty are their eyes and their eyelids ar lifted up." Proverbs 30:13

Parmer County Farmers Union will sponsor an informative meeting for farmers Thursday at 8 p.m. in Hub Community Building.

Highlighting the meeting will be talks by Prentice Mills, county ASC manager, on new feed grain law and Dr. A. E. Langford of Halfway Experiment Station on flame cultivation.

Mills will explain the feed grain law so that it will be better understood by area farmers. T. O. Lesley, Farmer Union president in the county, says.

Also on the program will be a report on Washington bus trip recently made by several Farmers Union members. Films made during the trip will be shown.

Dr. Langford will have a film to be shown with his explanation on flame cultivation which has been experimented with at the research station.

Coffee and donuts will be served, Lesley says, and farmers from throughout the county are invited to attend and bring their families.

The feed grain legislation, signed into law on March 22 by President Kennedy, has four purposes.

They are to increase farm income; prevent further build-up of the feed grain surplus and reduce it if possible; help assure the consumer of fair and stable prices for meat, poultry and dairy products and reduce the ultimate feed grain program costs to taxpayers.

According to C. H. Bates, farm management specialist for the Texas Agricultural Extension Service, the program is voluntary and applies only to 1961. All field corn and grain sorghum whether for grain, fodder or silage are covered and cooperators are being asked to reduce their 1961 plantings of these crops by at least 20 percent below the 1959-60 average acreage.

Voluntary reductions up to 40 percent are encouraged for growers with bases of 100 acres or more. Growers with bases of 25 acres or less may retire the total under the program.

Cooperating farmers will be eligible for support prices--

\$1.93 cwt. on grain sorghums, \$1.20 per bushel on corn, 92¢ per bushel on barley, 62¢ for oats and \$1.02 per bushel for rye.

The non-cooperator will not be eligible for price support on any of these crops, Bates said. His production would have to move at market prices. He cannot depend upon the government price support nor his neighbor's production adjustment to hold up the market price.

Cooperators, if they choose, may receive payments in the form of negotiable certificates which represent grain from CCC stocks. The Secretary of Agriculture will determine the flow of this grain into market channels.

A cooperator, Bates said, agrees to reduce by at least 20 percent his grain sorghum or corn acreage for 1961 below his 1959-60 average. The diverted acreage must be put to some conservation use. It cannot be harvested or pastured. Weeds, insects and rodents must be controlled on the diverted acreage.

In turn he will receive, in addition to his eligibility for price supports on his grain crops, a payment for each acre diverted to conservation use. The rate of payment for the first 20 percent diverted will be 50 percent of the normal production of the acreage diverted times the county support price. (This price will be announced shortly by county ASC officials.)

As an additional incentive, a grower may divert an additional 20 percent and receive a payment rate of 60 percent times the county price per acre diverted.

A grower becomes eligible for advance payment--50 percent of the total--when he signifies his intention of cooperating. This advance payment, Bates said, will help the producer meet his production expenses and is expected to be an important incentive for cooperation.

The specialist added that the program is effective protection in case of crop failure. The payment on diverted acres will be made regardless of weather and is a measure of income insurance as are the higher price supports.

The non-cooperator, Bates advised, will not be eligible

for price support on any grain crop and cannot expect to build up his acreage base for future programs. It has been emphasized that the U.S. Department of Agriculture will strongly recommend to Congress that any legislation involving establishment of base acreages for production adjustment give no advantage to producers who fail to cooperate in the 1961 feed grain program.

While many details remain to be worked out, Bates said, county ASC officials have the basic information on the program and are in a position to answer most questions. Local county agents are also receiving information on the program and may be contacted for details. Bates added that educational meetings will be held in all grain producing counties to acquaint growers with the program just as soon as base figures for counties and farms are available and local personnel can be trained.

Members will discuss and probably vote on bi-laws which have been drawn. The group is pushing a county-wide membership drive. There are now 193 irrigation wells linked with PCIGUA membership.

The meeting is to begin at 8 o'clock, according to Carl Schlenker, vice-president.

Gas Users Meet Thursday Night

The Parmer County Irrigation Gas Users Association membership will get together Thursday evening, April 6, at the Bovina School cafeteria.

John D. Aiken of Hereford, who is attorney for the Plains Gas Users Association (parent organization of the Parmer County group), will address the meeting.

Members will discuss and probably vote on bi-laws which have been drawn. The group is pushing a county-wide membership drive. There are now 193 irrigation wells linked with PCIGUA membership.

The meeting is to begin at 8 o'clock, according to Carl Schlenker, vice-president.

Grant To Speak On Farm Labor

A meeting of interest to all farmers, and vegetable and cotton farmers in particular, will be held Friday night, April 7, in the Plainview High School auditorium at 8 p.m.

Herbert Gerles, Parmer County Farm Bureau president, announced the meeting in cooperation with District II Farm Bureau.

Speaker at the program will be Allan Grant, first vice president of California State Farm Bureau. Grant, who lives in Visalia, California, is a cotton farmer in the San Joaquin Valley, and has had first-hand experience with the recent farm

labor strife, and will discuss the future of domestic and bracero farm labor.

Gerles said that there has been information that indicates there may be such labor problems confronting West Texas farmers this coming season, and that the information gained at the Plainview meeting may be invaluable to farmers of this area if this situation does develop.

All farmers, businessmen and others interested in the farmer and his future are invited and urged to attend the meeting, Gerles says.

4-H Demonstration Contests Saturday

Final plans have been made for the Parmer County 4-H Method Demonstration Contest to be held Saturday, April 8 beginning at 8:30 a.m. in the Courthouse in Farwell. All 4-H club members and parents are invited to observe the contestants.

Contests that will be judged in the morning and farm and home safety, soil and water conservation, farm management, vegetable production, swine, and beef cattle. Contestants in the junior and senior division will be judged at the same time but will be scored separately.

All remainder of the contests for both junior and senior division will be held Saturday afternoon, at 1:00 p.m. of the same day.

Subject matter groupings and titles will be announced next week following the contests. First place winners of these contests in the junior and senior divisions will be eligible to compete in the District 4-H Method Demonstration. This contest will be held April 29 in Canyon at the West Texas State College.

Demonstrations will be scored for interest of subject to the audience, voice that can be heard, original subject, neatness, time limit of more than 15 minutes, purpose of introduction clearly outlined, neatness, time limit of more than 15 minutes, purpose of introduction clearly outlined, neatness of team or individual, and supplies well arranged. Other judging will include work and speech coordinated, ability to

work more than four times as great as increases in all farm-family consumption expenses. Medical costs rose 178 percent, but all consumption costs rose 41 percent.

These are among findings in the nationwide survey, reported and analyzed in "The Older Farm Family and Medical Costs," Agriculture Information Bulletin No. 235, issued by USDA. The report was prepared for use in conjunction with the White House Conference on Aging to be held in January, and is based on recent nationwide information available on the medical expenditures of farm families.

Mrs. Osborne Dies Monday

Mrs. Lee Osborne, 70, of Bovina, died at 4:30 p.m. Monday in the Parmer County Hospital.

Mrs. Osborne was born Sept. 10, 1890, in Anton, Tex. She had been a resident of Bovina since 1925.

Survivors include three daughters, Mrs. Frank Pesch of Bovina, Mrs. Bill Moss of Farwell, and Mrs. Cecil Williamson of Dallas; two sisters, Mrs. May Cole of Mahank, Tex., Mrs. G. C. Whitlock of Mansfield, La. and a half-brother, Elery Sands of Mahank; six grandchildren and one great-grandchild.

Black News

Betty Lewellen and Aundrea Frye

Mrs. Helen Fangman and sons, Arnold and Charles, and Mr. and Mrs. Teddy Fangman were Easter Sunday guests in the home of Mr. and Mrs. James Fangman and family of Vega.

Mr. and Mrs. Coy Patton and Virginia moved from this community to Friona recently. Mr. and Mrs. Teddy Fangman moved into the house vacated by the Patton family.

Mrs. Jimmy Buckley and Mrs. Glenn Stevick and daughter, Sally, of Friona, were in Amarillo Monday.

Mr. and Mrs. David Grimsley and sons, Jim and Jason, visited points of interest at Carlshad, White Sands and El Paso during the weekend.

Mr. and Mrs. Tom Lewellen; Mr. and Mrs. Delton Lewellen and daughters and Mr. and Mrs. Joe Lewellen and children attended a silver wedding anniversary observation of Mr. and Mrs. Herbert Walker at the Halfway Baptist Church near Plainview Sunday.

Miss Tommie Lou Lewellen accompanied Mr. and Mrs. Chris Goetz and son, Gary, to Austin and other Central Texas points during the weekend.

F. W. and Wesley Barnett went to Stamford Lake fishing. Mrs. Wesley Barnett and son, Chris, and Judy and Betty Barnett of Lubbock visited Mrs. F. W. Barnett.

Mr. and Mrs. J. R. Braxton and sons; Mr. and Mrs. Charles Myers Jr. and family and Mr. and Mrs. Bill Garthel and boys spent the weekend fishing and boating near Springfield, Mo. They attended "The Red Foley Show" at Springfield.

Mr. and Mrs. Harland Frye and Houston and Verna Brown were Sunday evening dinner guests of Mr. and Mrs. George Frye and Kim.

The Barnett family went to Amarillo to visit Mr. and Mrs. Jim Barnett and sons Sunday.

Mr. and Mrs. Travis Stone and family visited many points of interest in the vicinity of San Antonio during the Easter holidays.

Mr. and Mrs. Beryl Fish visited in the home of his parents, Mr. and Mrs. J. H.

Fish at Hereford Sunday.

Mrs. Edgar Turner Jr. honored her husband and his mother Mrs. Edgar Turner Sr. with a birthday dinner in the family home Sunday. Mr. and Mrs. Edgar Turner Sr. returned to their home at Poteau, Oklahoma Monday.

College students home for Easter vacation were Mr. and Mrs. Wesley Barnett, Graham Prewett, Judy Barnett and Ira Bruce Parr, students at Texas Tech; Clyde L. Hays, who attends the University of Texas; and Betty Barnett, who is enrolled at Jessie Lee's School of Hair Design at Lubbock.

Mr. and Mrs. George Frye and Kim were in Dimmitt Sunday. After attending church with Mrs. Frye's parents, Mr. and Mrs. Truett Boothe, they were dinner guests in the home of Mr. and Mrs. C. W. Boothe.

Mr. and Mrs. Dick Rocky went to Mesa to spend the Easter holidays. They were met by their son, H. V., who teaches at Albuquerque.

Mr. and Mrs. Gene Welch and family visited her parents, Mr. and Mrs. F. B. Harkins at Plainview and Mr. and Mrs. Glenn Welch and son, Randy Glenn, at Lockney.

Mr. and Mrs. Bill Schwab and boys spent the Easter holidays visiting Mrs. Schwab's father, A. A. Kraft of Shattuck, Okla. They also visited with relatives at Higgins, Texas. The Schwabs returned to Friona Tuesday.

Mike Styles of Lubbock stayed last week with his grandparents, Mr. and Mrs. Pete Buske. Mike's parents, Mr. and Mrs. Richard Styles, came for him and spent the weekend.

Mrs. George Treider spent the Easter holidays in the Dallas vicinity visiting with her husband and in Dallas with her daughters, Phyllis and Karen.

Mrs. H. E. Barnett and her mother accompanied Mrs. Treider as far as Denton where they visited relatives.

Mr. and Mrs. Porter Roberts and Mr. and Mrs. Ralph Robinson were in Levelland last weekend visiting Mr. and Mrs. O. D. Roberts and Mr. and Mrs. Claude Tugwell, parents of the Roberts, and the Robinsons were guests in the home of her mother, Mrs. John Minor.

Miss Helen Hamilton from ENMU, Portales and John Hamilton from A&M visited in the home of their parents, Mr. and Mrs. Harry Hamilton during the Easter holidays.

Does Cold Weather Reduce Cotton Stands?

In many instances, cold, wet weather gets the blame for loss of young cotton stands when seedling disease is the real cause.

The value of seed treatment to prevent seed rot has been known for many years. However, seed treatment does not prevent all seedling disease. This disease, more commonly known as "soreshin" or "damping-off" each year takes its toll of cotton seedlings and thus reduces stands and yields later in the year.

It is caused by fungi which live in the soil and attack young seedlings from the time of germination until plants are several weeks old. Nub-root and lack of normal taproot development, result of seedling disease, may damage cotton throughout the growing season. In 1953 research was started by the Texas Agricultural Experiment Station on the use of fungicides in the furrow and covering soil at planting time. From this work, a method of control for seedling disease was developed.

The method helps reduce risks and helps take guesswork out of cotton farming. Cotton growers treated 66,000 acres in 1960 compared to 19,000 acres in 1959. They found the practice permitted earlier planting and this, in turn, enabled more cotton to make before root rot and other diseases occurred. The purpose of using in-the-

furrow fungicides at planting time is to provide disease protection for the young sprout before and after it comes through the soil. A combined of captan, zineb and PCNB wettable powder is suggested for general use in all areas. This combination can be applied as a spray or dust. Liquid naham is applied as a spray and can be used where soils have a pH of

7.3 or below.

Here are other practices which are also helpful in reducing seedling disease. Plant high quality seed which has been properly treated; plant in a good seedbed at proper depth and rate for the area; use recommended fertilizer placement and plant when soil temperature and moisture are favorable.

1960 Cotton Variety Test

Nineteen varieties of cotton were evaluated in irrigated plots at the High Plains Research Foundation during 1960. Lint yields varied from 861.43 to 1272.41 pounds per acre. The average yield for all varieties in the experiment was 1086.69 pounds of lint per acre.

METHODS AND PROCEDURE

The nineteen varieties were planted in four-row plots 100 feet long on April 25. Each variety was planted at the rate of 32 pounds of seed per acre. There was a spacing of 40 inches between rows. The experimental design consisted of a randomized block with four repli-

cations. A preplant irrigation of approximately four inches was applied to all plots on March 31. During the growing season, all plots received three additional irrigations of approximately 3 1/2 inches each on August 1, August 10, and August 17. Rainfall received from April 1 to October 1 amounted to 22.95 inches. Of this amount, 12.46 inches were received during July.

All plots were fertilized at planting time with 200 pounds of 13-39-0 per acre. The fertilizer was applied as a side-dressing about four inches to the side and four inches below the seed. The experimental area was planted to cotton in 1959.

An insect control program was followed throughout the growing season. All plots were sprayed three times with a mixture of Endrin and Chlordane. The experimental area was cultivated twice with a shovel cultivator and also flame cultivated two times.

Agronomic data on plant characteristics and performance were taken for all plots during the growing season. Stand, plant height, and boll counts were taken during the period September 27 through October 6. Three random samples, each 10 feet long, were taken within the two center rows of each four-row plot. The number of plants, plant height, total number of bolls, and number of open bolls were determined from these sampled areas.

The two center rows of each plot were hand-pulled three times for yield. The harvested area for each plot consisted of two rows 100 feet long. Harvesting dates were as follows: October 7 through October 8; November 4 through November 7; and November 25 through November 26.

All plots were weighed immediately after harvest and a 1,000 gram sample was retained from each plot for ginning and fiber tests. A ginning and fiber test sample was taken for each plot at each of the three harvests. The 1,000 gram samples were ginned in the laboratories of Paymaster Farm at Aiken, Texas. A ginning percent was determined for each plot at each of the three harvests. Lint yields were calculated for each variety, and the data were subjected to a statistical analysis.

Samples of lint cotton were graded at the U.S. Department of Agriculture's Classing Laboratory, Lubbock, Texas. Fiber measurements were made by the Plains Cotton Growers in the Textile Research Laboratories at Texas Technological College, Lubbock, Texas.

EXPERIMENTAL RESULTS

As shown in Table I, there was considerable variation among varieties with regard to yield of lint. Austin produced the top yield of 1272.41 pounds of lint per acre; however, it was not significantly higher in yield than the other top four varieties.

In this regard, there must be a difference of at least 153.31 pounds of lint (L. S. D.) between the yield of any two varieties before one would be considered superior to the other. Any yield difference of less than 153.31 pounds of lint per acre could have been due to chance variation as a result of soil differences and other environmental conditions, and not necessarily due to a true difference in yielding ability.

The unusually low coefficient of variation indicates that this test provided a valid measurement of the true yielding ability of the cotton varieties.

It will be noted that varieties differed a great deal with respect to early vigor, plant height, number of bolls per plant, and earliness of maturity as determined by the percentage of open bolls during the period September 27 to October 6.

Early seedling vigor was particularly important under the soil and climatic conditions that prevailed during early spring. Some varieties were affected by the seedling disease complex as evidenced by the vigor ratings, while others were noticeably more vigorous under the adverse conditions.

The building committee of the church was discussing plans for the new addition to the present edifice when the matter of an appropriate cornerstone came under discussion. One member thought the minister's dedicatory sermon should be placed in the cavity of the stone. To this all agreed, the minister adding it would be necessary to enclose a certain chemical to keep it dry. Whereupon one of the older members, with a straight face, added, "I don't think the chemical is necessary."

FOOTSAVING EDUCATION

By James E. Edwards

Does Sleeping Posture

Affect Walking Habits?

I have heard only one lecture that touched upon the subject. It was the opinion of this authority that there has been an increase of cases of pigeon toes and splay-foot (like a duck) since it has become popular to train babies to sleep on their stomachs. The speaker pointed out that only animals that are anatomically similar to humans sleep on their sides.

My experience in the shoe store has been that almost all pigeoned toed children sleep on their stomachs with their toes turned in. Three mothers who retrained their children to sleep on their sides have commented on improvement in walking.

It is interesting to note that the left foot of a right handed child is more likely to toe-in than the right foot is.

HD Agent's Gossip

BY MISS ETTIE MUSIL

It's that time of the year to store your winter woollens for next fall and winter. Hand wash sweaters made of orlon, wool, or nylon in lukewarm or cold water. Have you ever tried using the many wool sweater detergents made especially for washing sweaters and baby sweaters and blankets? There are several woolen detergents available in variety, hardware, grocery and drug stores. Do follow laundry instructions to the letter. Do not rub or stretch the garment. Squeezing suds into the sweater with the fingers is recommended.

Of course, you can have all the woollens dry cleaned and sealed in plastic or storage bags. Dry cleaners have special treatments for moth proofing woollens for summer storage. If you hand wash sweaters at home fold the thoroughly dried sweaters into plastic bags, and add a few moth crystals that will not harm the fabric and seal for seasonal storage.

Winter cottons should be laundered, but not starched or ironed. Starching attracts silverfish and crickets. Ironing winter cottons only requires extra work you will need to do

next season before wearing. Save yourself this extra work. Fold the garments into large boxes and label contents of each box.

Winter shoes should be cleaned with saddle soap and polished for leather shoes, and brushed for suedes. Toes of shoes may be stuffed lightly with tissue paper to keep the shape. Winter hats should be brushed and cleaned before stuffing lightly with tissue paper for storage. Hats may be stored in large plastic polyethylene bags or placed in boxes to keep them free from dust during the spring and summer months.

Don't forget to label the hat boxes as "Mother's blue feather hat," "Daddy's black hat," or "Mary Ann's brown velvet clip hat." Next season it will be easier to find the hat by reading the label instead of looking through all boxes for your blue feather hat.

If you are cleaning slip covers for storage or as part of your spring cleaning they can be washed in the automatic washing machine. Vat-dyed, pre-shrunk slip covers can be run safely through one cycle of the

Cummings Instigates Self-Feeder Program

A new "self-feeder" cattle feeding program for this area, designed to make cattle feeding more profitable, has been started by Cummings Farm Store of Friona.

Through use of a self-feeder, constructed with only a seven-eighths inch opening under the feeder plate, farmers can save both time and money in cattle feeding operations, says Doyle Cummings of the farm store.

The narrow opening on the feeder makes it necessary for the cattle to work the roughage and supplement out of the feeder, and subsequently there is less waste and the cattle are always being fed a properly-mixed ration.

Also, through use of the specially-designed feeder, daily feeding chores of the farmer are lessened.

Other areas have been using this type feeder for some time, Cummings says, but this is the first time that it has been used in this area.

The new feeding program was started last October with a demonstration at the Pete Buske pens near Friona. When the program was completed, 82,748 pounds of milo had been sold through the cattle, with the net profit on milo being \$2.67 per hundred pounds.

Utilization of locally-grown milo, which gives a farmer a higher price for his milo, is one of the important aspects of the new feeding program, Cummings says.

"In this changing era of agriculture, it is apparent that if the cattleman or grain farmer is to remain in competition

washing machine. If they are ready-made slip covers follow the laundry instructions on the label.

Slip covers may be tumbled dry or hung in the shade until they are only slightly damp. Press the flounce, and slip the covers on the chair to finish drying. They can then be shaped to fit as well as when new. You'll save lots of ironing time, too.

Don't forget a healthy skin requires a healthy diet. Teenagers with weight or complexion problems should take special note of the foods required for healthy bodies. This applies for adults, too.

Needed foods include fruit juices, raw fruits and vegetables. These bulky foods curb off hunger. Fatty and greasy foods such as chocolate, rich cakes, pastry are definitely taboo if you have skin problems or are watching calories. Tuna fish, potato chips, nuts, carbonated beverages, and even mayonnaise are off the list of teenagers with skin problems.

In a recent study of teenage diets it was found that six out of ten teenage girls had poor diets and four out of ten boys had poor eating habits. Last month during the Parmer County 4-H club meetings of the girls, I learned that vegetables and milk were rare in the meals eaten the day before club meeting. This is sad for healthy skin, and growing bones and tissues. Milk, lean meats, eggs, green vegetables, and fruits are needed daily for healthy skin, bones, and tissues.

FEED FOR THE DEMONSTRATION was mixed at Cummings Farm Store and hauled to the feed lot in this truck. Purpose of this type of feeding program is to save time and money and to keep the roughage, supplement and grain ratio balanced for maximum gain and feed utilization.

and receive a fair return on his investment, he must sell locally produced grain through livestock," Cummings says.

This will still be true in spite of any increased revenue the farmer may receive from the new feed grain bill, the Friona-feed man says. He points to the \$2.67 net profit that was realized on the recent self-feeder demonstration as being proof of this contention.

With the trend being toward more cattle feeding operations and the construction of new packing plants in this area, Cummings foresees an increase in the new self-feeder program.

Here is the way the recent experiment was conducted:

Fifty head of heifer calves were moved in from near Lubbock. They were placed in the Buske pens on October 28 and were started out on a feed ration with 40 per cent roughage.

The ration was changed every three or four days with roughage being lowered and grain raised until they were on full feed of grain. There were periods when the cattle were on only 10 per cent roughage.

The feed was mixed at the Cummings plant in Friona and the feed was delivered to the self-feeder by truck.

The total starting weight of the cattle on October 28 was 23,685 pounds and the combined finish weight of the 50 head of cattle on February 27, four months later, was 36,552 pounds, thus making the gain 12,867 pounds.

Average gain per head of cattle during the 122 days was 257.34 pounds, the average daily gain being 2.11 pounds.

Feed consumed during the operation was 82,748 pounds of rolled milo, 12,741 pounds of Purina Steer Fatena, 15,887 pounds of cotton seed hulls and 4,609 pounds of molasses, and 250 pounds of livestock mineral.

With the mixing costs of \$167.06, the total feed cost was \$2,518.83. Medication and sanitation costs were \$104.25 and yardage, at 5 cents a head per day, was \$305. This made the total operating costs \$2,928.08.

Total weight of feed per pound gained was 9.04 pounds and the feed cost per pound gained was 19.51 cents. Yardage and medication costs combined were \$3.18 per pound gained, making the total costs per pound gained 22.69 cents.

The cattle were then sold at 25 cents for \$9,138.50, the difference in selling and buying cost being \$3,609.95. After subtracting the total costs, the net profit was \$762.87.

Subtracting all costs but rolled milo made the 82,748 pounds of milo sold through the cattle total \$2,210.83, or \$2.67 per hundred pounds.

The return on the investment (for 122 days) was 9.1 per cent, or based on a 365 day return, it was 27 per cent.

All in all, Cummings says, the program proved to have the following eight advantages:

1. Little labor required.
2. No specified feeding time.
3. Uniform feed consumption.
4. Keeps roughage, supplement and grain ratio balanced for maximum gain and feed utilization.
5. Low capital investment for feed lot facilities and feed processing equipment.
6. Exact feed records easily obtained.
7. Lower cost gains.
8. Takes the guess work out of cattle feeding.

The cattle feeding demon-

SIMILAR FEEDING OPERATION to the one recently conducted by Cummings Farm Store, is now under way at the A.W. Anthony farm north of Friona. Anthony is feeding 50 head of cattle in this lot. In the background is the specially-designed feeder, built with only a 7/8-inch opening. The feeder cuts down waste and makes for better feed utilization.

stration was sponsored jointly by Cummings Farm Store and Ralston Purina Company.

Serving on the weight and records committee for the demonstration were Bill Nichols, Friona State Bank, and Martel Leveque, Production Credit As-

sociation. Helping to weigh the cattle were Nelson Welch, A.W. Anthony Jr., Lawrence Martin, Max Wells, Clarence Martin, W.L. Edleman, Ernest Anthony and Joe Wilson. Cummings points out that the

SOIL CONSERVATION DISTRICT NEWS

Tuesday, April 11, the four high schools in Parmer County will participate in the land judging contest sponsored by the Parmer County Soil Conservation District. Each of the four high schools will be represented by a four member team.

These teams will judge four different sites at different locations in the county. There will be banners for the first, second and third place teams. There will also be plaques for the four individuals with the highest scores.

The contest is to start at 2 p. m. at the Hub Community Center. Anyone who is interested is urged to attend.

Now is the time of year to start planning your farmstead windbreaks. The purpose of a windbreak is to protect soil resources, control snow deposition, prevent wind damage to farm buildings, cut down intensity of blowing sand and last, but certainly not least, to add beauty to the farm and countryside.

Windbreaks should give protection from north, west and southwest directions. Multiple windbreaks are the most satisfactory. They should consist of one row of deciduous trees, one row of evergreens and one row of low growing shrubs.

The rows should be spaced from 12 to 30 feet apart. Spacing between plants in the rows should be 1 1/4 to 4 feet for low growing shrubs; 8 to 10 feet for deciduous trees and 8 to 10 feet apart for evergreens. These windbreaks also supply very good food and cover for wildlife.

cattle were held in Lubbock for four days before being shipped to Friona. They had just been weaned a few days prior to shipment and were rather fleshy. Since they had not been eating feed, it seemed to take 20 to 30 days to get them to eating. And, considering the severe winter, with several snows during the feeding period, we feel that all in all the heifers have done a good job and made a good return on the investment, Cummings says.

THRIFTIEST COOK IN TOWN!

That's you — when Reddy's your helper. The real cooking economies come from an electric range. Because electric roasting needs no air, it doesn't draw the moisture from your oven when you're roasting. Result? Less meat shrinkage — more for your meat dollar. Again — because electric heat is accurately measured — you use less water when cooking vegetables. Result? More minerals and vitamins stay in the food — less heat is used to bring the smaller amount of water needed to a boil. Savings for you once more. And finally — the big economy from the cleanliness of electric cooking. You won't have to wash your walls and curtains as often — and you'll stretch out the time between painting and decorating expense. Thrifty cooking? Of course, it's electric.

NOW — 5000 GUNN BROS. OR FRONTIER STAMPS WHEN YOU PURCHASE A NEW ELECTRIC RANGE. ASK YOUR REDDY KILOWATT DEALER.
