

PLAYER DRAWING is shown in progress at the Monday night baseball meeting. American Legion Post Commander J. P. Simms, center, did the drawing. Left to right, others around the table are Troy Young, O. J. Beene, Sam Williams and Vernon Scott.

City Projects Complete

City Facilities Set For More Growth

Two new improvements to the city's water and sewer facilities were put into use this week. A sewage treatment plant east of town and a 500,000 gallon water surface storage tank were put into operation and will await the city engineer's approval. Combined cost of the two improvements was \$101,434, with the sewer plant taking \$51,784 and the storage tank \$49,650.

The sewer plant is located on 20.49 acres purchased by the city from Santa Fe Railroad near the railroad right of way. The plant covers about nine acres. Over 8,000 cubic yards of earth were moved in constructing the sprawling oxidation ponds. The 10 additional acres not in use will be available for further expansion of the plant, which can be increased to take care of a town with around 10,000 population.

The plant now can care for a population of 5,000. The old sewer plant became inadequate long ago, since it was originally designed for a population of 1,400.

City Manager Albert Field said the city has no immediate plans for the old sewer plant, located nearer the city on the east side.

The sewer project received a federal grant of \$17,000 from Public Health Service division of the Department of Health Education and Welfare.

The water storage tank is of concrete and steel construction. It is one-third underground and two-thirds above surface.

"The tank will almost double our water capacity," Field said. "It will also help us maintain better pressure."

In the summer, when water usage is at its peak, Field says about one million gallons of water will be needed daily. Without the tank in this period, there would be no reserve kept to fight fires and the water system would be unable to supply this much water consistently.

A 150,000 gallon overhead storage tank was all the storage capacity the city had prior to construction of the new tank. Future plans call for another overhead storage tank, according to Field.

Population Explosion

A few more litters by the ewe shown here, and a surplus of mutton and wool would be alarming. All four of the lambs pictured belong to the ewe, being held by Charles Ray, owner Cleatus Rhodes, left, and Larry Potts corral the family. Such multiple births in sheep are considered very rare according to the FFA advisors. Twins are not uncommon, triplets are rare, but quadruplets are practically unheard of according to J. C. Lane and David McVey, the vocational agriculture instructors. The lambs were born last weekend and all four are in good condition.

SECTION 1

Mothers Give Half Funds For Pony League Park

SPEAKS FOR MOTHERS--June Rhodes, second from left, served as spokesmen for the mothers at the Monday night meeting. The ladies retired to a separate room before reaching their decision to contribute one-half of their funds to the Pony League project. Others shown are Mrs. Wes Long, Sam Williams, and J. P. Simms.

Drawing Held For Player

Mothers of last year's intermediate age baseball players, who cleared over \$1,000 from concessions at the ball park last season, voted Tuesday night to put half of their wealth into the fund for constructing a Pony League baseball park.

The ladies had raised the money with plans to erect restrooms at the park constructed last year for boys 12 and younger. They plan to have the restrooms built with the half of their funds remaining on a time payment plan.

Drawing names for Intermediate and Pee Wee teams was the main purpose for the meeting, but a wrangle over how the players would be distributed lasted for over an hour before the drawing was actually begun.

The discussion was between a group that wanted each team to keep last year's players and draw for new players, and opposing individuals who wanted to draw for all the players. The latter group won the discussion, and all the players names were drawn.

Sponsors for the intermediate age boys will be McCaslin, Star-Hurst, Associated Growers, Reeve Chevrolet, and Friona State Bank.

Pee Wee sponsors will be Friona Motors, Ethridge-Spring, Rockwell Brothers Lumber and Bengier Air Park.

John Renner who has been leading efforts to start work on the Pony League Park, reported that Lloyd Prewett of Prewett Grain at Black, donated light poles for the park.

Renner also estimated that about \$700 in cash is available for the project.

The park will be constructed north of town where the old park has been in the past. Lions Club will build dugouts, bleachers and screens. American Legion also has 25 light

(Continued on page 8.)

MAY 19-21--

Jaycee Rodeo Set

Friona Jaycees have announced plans for the first Annual Friona Junior Rodeo scheduled for May 19-21.

The rodeo will be conducted on the rodeo arena on Highway

60 west of town, now being constructed.

Events will include bare back bronc riding, bull riding, tie down roping, barrel racing, pole bending and ribbon roping.

The rodeo will follow interscholastic league rules strictly and the age limit will be 19.

Stock will be supplied by Ratjen Brothers of Happy. The event will be climaxed with a western dance Saturday night May 20 at 9 p.m.

Entries are being accepted by Walter Haws, route 3 box 113. Entry fee is \$12.50 for two rounds. Entries must be accompanied by cash or money order and minor's release.

Regional Meet Trips Frionans

Friona contestants in the Regional Interscholastic League Meets were eliminated last weekend in contests held at Lubbock.

Four trackmen who participated in the meet all made it to the finals, before they were eliminated.

Despite the fact that none of the athletes will advance to the state meet, coach Earl Smith had high praise for them since each turned in his best performance of the entire season.

Low hurdler Jobey Claborn was second in the qualifying round Friday. He had a lead in the finals when he clipped the sixth hurdle and dropped to fourth place.

The 440-yard relay team placed fifth although they posted

their best time of the season. High hurdler Tommy Barker was unable to make the trip.

Entries in the literary events were Mary Lemmond, senior girls' declamation; Karen Turner, typing, and Margaret Hudson, shorthand.

Tommy Lewellen was in the girls' singles tennis competition.

Enter Contest

Three Friona FFA judging teams will enter the Texas Tech Judging Contests in Lubbock this weekend.

Friona teams will enter dairy, livestock and land judging competition. The dairy judging team will be made up of Danny Carmichael, Larry Potts and Duane Thipud. Tommy Latham, Max Reeve and Craig Gaon will be the livestock judging team, and land judges will be Danny Smith, Floyd Reeve, and Bobby Daniel.

13 Complete Sales Course

Certificates were awarded by The University of Texas to 13 students in Friona on completion of the course "Dynamics of Selling."

This sales training course was presented by Distributive Education Department of the University of Texas.

Frances A. Flynn, training specialist, was the instructor. Receiving certificates were Bill Holcomb, Aubrey Rhodes, Bud Williams and John Frazier, all of Farmer County Implement Co.; Bill Nunn, Weldon Dickson, J. C. Blankenship, and Edwin Bridges, Carl McCaslin Lumber Co.; Gerald Wright, Mobil Oil Co.; Jim Cocannouer, Friona Battery and Electric, Dale Hart, Rubber Stamps, Sally Cocannouer and Lucy Jones.

Local Sponsors were Friona Chamber of Commerce and Retail Merchants Association.

O. C. CURTIS

Funeral Held For Father Of Frionan

Funeral services for S. B. Dean, 73 of Muleshoe were held Tuesday afternoon in First Methodist Church in Muleshoe with the Rev. Horace Brooks, pastor; the Rev. Jesse Young of the Methodist Church at Sundown, and the Rev. Don Murray, pastor of First Baptist Church of Muleshoe officiating.

Burial was in Bailey County Memorial Park Cemetery. Mr. Dean, a retired farmer, died Sunday in West Plains Hospital at Muleshoe.

He was born Feb. 21, 1888, in Yellville, Ark., and moved to Muleshoe six years ago from Sunday, where he had lived since 1928. Mr. Dean was a member of First Methodist Church of Muleshoe.

Survivors include the widow, five sons: Elmer of Rock Springs, Lester, of Friona, Clakle of Medford, Ore., Kenyon of Muleshoe and W. K. Dean of Sundown; one daughter, Mrs. W. S. Bates of Snyder, two sisters, Mrs. Helen Weaver of Lubbock and Mrs. Myrtle Nelton of Yellville, Ark., 11 grandchildren and 1 great grandchild.

First Baptist Slate Revival

Special emphasis is being placed on singing during the revival which begins at the First Baptist Church Sunday, April 30 and runs through May 7. Each evening service will begin with special music by members of the Crown Choir, which is made up of beginners, primaries and juniors.

Music will also be presented by the regular choir, which includes intermediates, young people and adults. Joe Trussell of Brownwood will direct singing.

Guest speaker will be O. C. Curtis of Amarillo, North Texas District missionary.

Sunday services will begin at 10 a.m. A prayer service beginning at 7:30 will be followed by evening services at 8.

Pre-School Visitation Will Be Tomorrow

Friday will be pre-school visitation day in Friona Elementary School for all boys and girls who will start school next September.

Purpose of the special day, when this year's first graders will stay home is to acquaint children with teachers and buildings. Children will report to an assigned room for the beginning of the day. They will be shifted from room to room throughout the day and at the day's end will have visited each room.

Letters have been sent to all parents of beginning students

who were counted on the school census this year, but Elementary Principal J. T. Gee said parents of those children who were not on the census count will not receive a letter but asked that these parents be sure to bring their child Friday. Parents are asked not to send supplies, toys, purses or food with their child. The children will be in the school-like conditions from 8:45 a.m. to 2 p.m.

This unique orientation procedure has been used in the past with good results according to Superintendent Alton Farr.

Treble Teens ALL ENDS WELL--

Top Contest

The Treble Teens, a Friona musical group, won the District Talent Contest at the District FFA Meeting hosted by the Friona Chapter Monday afternoon.

Members of the group are Bobby Daniel, Reggie Hays, Earl Crow, and Donald Busby.

Jerry Felder, of the Hart Chapter, was nominee for Area President. The public speaking contest was won by Shelby Bozeman of Springlake and Marilyn Nix of Amherst won the district sweetheart contest.

Ed Hicks Joins Douglas Land Co.

Announcement was made early this week by Douglas Land Company of the association of Ed Hicks with the organization. Hicks, long-time resident of Muleshoe, has lived in Friona about one year and owns Friona Lanes.

In making the announcement Joe B. Douglas said, "The addition of a new member to our staff will enable us to give our customers better service."

Hicks said, "Working with

(Continued on page 8.)

Two Cars In Wreck

A two-car accident in Friona Monday afternoon damaged both vehicles but caused no injuries.

Drivers were Carolyn Sue Pipes and Melvin Sachs. According to deputy sheriff Bill Morgan, who investigated the mishap, the car driven by Mrs. Pipes was leaving a parking lot at Piggly Wiggly Supermarket and attempting to enter Main Street when the pickup truck driven by Sachs was proceeding south on Main.

The pickup struck the Pipes car on the right front section.

ONE VEHICLE involved in the two car accident Monday afternoon is shown above. It was driven by Carolyn Sue Pipes and the pickup truck was driven by Melvin Sachs. Police Chief Ilen Moorman is shown in the background.

FOR SECOND YEAR--

'Horns Secure Track Crown

The Lazhuddie Longhorns romped to the Regional Class B championship for the second time in a row last Saturday at Lubbock, picking up 82 points to 39 for runner-up Rule.

Both the mile and 440 relay teams posted new Class B records in the meet to lead the Longhorns in the run of records and first places.

Bill Hardage set a new record in the 440-yard dash with a 49.9 clocking.

Other Lazhuddie athletes who qualified for the state meet were Jimmie Dale Seaton, high hurdles, and Odis Bradshaw in the 220.

Other Longhorns who placed in the meet included Jerry Glover, fourth in low hurdles, Donnie Smith, third in high jump and pole vault, and Cooper Young, fifth in the 880.

Young and Michael Hean will make the trip to Austin as alternates for the mile and 440 relay teams respectively. Members of the winning relay teams were R. L. Porter, Fred-

die Savage, Odis Bradshaw and Billy Hardage.

Co-op Names Two Directors

Bruce Parr and Homer Lindeman were elected new directors of Friona Consumers at the annual stockholders meeting Saturday afternoon in the school cafeteria.

Dan Peoples, television weatherman from Amarillo, was guest speaker for the meeting. Distribution of over \$27,000 in dividend checks to the stockholders was a highlight of the meeting.

Mr. and Mrs. C.W. Dixon were winners in the door prize drawing. Dixon drew the first place prize, Mrs. M.H. Buchanan, second and Mrs. Dixon third. However, Mrs. Dixon gave her prize to Rita Green, the girl who did the name drawing.

Music for the meeting was furnished by George Green and the Sunnyside Quartet.

Black News

Mr. and Mrs. Jimmy Buckley and family were Sunday dinner guests in the home of Mr. and Mrs. Truett Johnson and family in Friona.

Mrs. Helen Fangman attended a Spanish dinner sponsored by the Altar Society of Bovina at the Hub Community Center Sunday.

Mrs. David Grimsley was in Springlake Monday.

Mr. and Mrs. Jimmy Buckley accompanied Mr. and Mrs. Jim Harmon of Tulsa to Fort Sumner one day last week. The two couples took Mrs. W.P. Coke of Kansas City to visit her father there.

Several families of the Black community honored Mr. and Mrs. Coy Patton of Friona with a housewarming in their new home Monday evening.

Punch and cookies were served to Mr. and Mrs. Joe Lewellen and family, Mr. and Mrs. Claude Edelman and family, Mr. and Mrs. Ellis Tatum and Mr. and Mrs. Joe B. Douglas.

Also Mr. and Mrs. Tom Lewellen and Tommy, Mr. and Mrs. John R. Hays, Mr. and Mrs. Jimmy Buckley, Mr. and Mrs. Delton Lewellen and daughters, Mrs. Helen Fangman and Charles, Mr. and Mrs. Claude Miller and Mr. and Mrs. C.W. Covington of Hereford.

Betty Barnett of Lubbock visited her parents, the Fern Barnetts, during the weekend. She brought Mr. and Mrs. R. E. Barnett home after they had spent several days visiting in the home of Mr. and Mrs. George Brock at Lubbock.

The next painting party is scheduled for Tuesday, April 15 at the Black Community House.

Visiting with Mr. and Mrs. Nelson Coon over the weekend was Pete Coon of Olney. The men are brothers.

Mr. and Mrs. Ralph Price attended the Loy Loafman's Housewarming Sunday night.

Sunday afternoon Linda Stone had a guest, Cathy Cook.

Mrs. Johnny Benger is in the hospital in Friona.

Mr. and Mrs. Gene Welch were in Clovis Saturday on business. On Saturday night they were the supper guests of Mr. and Mrs. Harlan Frye.

Carlene and Fose Ann Gresson stayed with their grandmother, Mrs. Merler

Jimmy Chesher Is In Western Pacific

Jimmy Chesher, airman apprentice, USN, son of Mr. and Mrs. Jesse O. Chesher, Friona, is serving aboard the anti-submarine warfare support aircraft carrier USS Kearsarge operating in the Western Pacific.

The Kearsarge, a unit of the Seventh Fleet, is the "hub" of Hunter-Killer Group Alfa, a trained Navy team of submarine killers, composed of carriers, destroyers, submarines, carrier-based planes and helicopters.

The carrier serves as a fast-moving airbase, command and communications center where track is kept of all units participating, and where positions and records of submarine contracts are plotted and maintained.

The ship is scheduled to visit Hong Kong, Japan, Okinawa and the Philippines.

Shirley, in Friona, while their parents were in Muleshoe during the weekend.

Mrs. Jim Bookout of Hereford spent the weekend with Mr. and Mrs. Clyde Hays. Mrs. Bookout is Clyde's sister.

Mr. and Mrs. Earl Harkins of Eastview visited Thursday night with the Gene Welch family.

Bruce Parr's sister, Mrs. Roy Griffin, from Denver visited in the Parr home recently. They had dinner in Hereford with Mrs. Florence Parr on Sunday.

The Bill Carthels attended an Angus bull sale in Lubbock on Monday.

Mr. and Mrs. Beryl Fish and boys had supper with the Travis Stone family Friday night.

Mrs. Ellis Tatum returned home Wednesday from ten days in San Antonio, where her little niece is very ill. The Tatum family visited in Dumas recently with their daughter Mary; their son Weldon, and Pammie, from Canyon spent the day Saturday with them.

Mr. and Mrs. Beryl Fish visited Sunday night with Mr. and Mrs. Bruce Coleman of Westway.

Mr. and Mrs. Pete Braxton and Mr. and Mrs. Loyd Prewett attended the Texas Feed and Grain Dealers' Convention in Dallas.

Mrs. Pete Braxton's parents, Mr. and Mrs. P. O. Southall and her brother, John Southall from Montgomery, Alabama, visited with the Braxtons recently.

W A C HYBRID SEEDS

The Newest Developments In HYBRIDS

SCOTT 500

Here is a short-stalked, red grain hybrid with great yield potential and wonderful stand ability. Stalk height is about 12 inches shorter than #5 610. Red Grain (darker than #5 610 grain) on very large medium-dry heads. About same maturity as TR 640 and outstanding in ability to stand and to yield. Adapted to dryland or irrigation. 110 days to mature.

SCOTT 450

An early grain hybrid of about the same maturity as #5 590. It is very similar to Scott 500 (above) but earliness makes this an outstanding hybrid for areas needing this factor. Red grain, large heads, high yield and shorter stalks make Scott 450 a highly desirable early grain hybrid. 95 days to mature (12 to 18 shorter than 610).

-- A GREAT PAIR OF TRUE COMBINE HEIGHT HYBRIDS.

THE FRIONA STAR

J. Vernon Stewart, Editor

Entered as second class mail matter July 31, 1925, at the post office in Friona, Texas, under the Act of March 31, 1897. Published each Thursday.

In Farmer County \$3 Per Year
Elsewhere \$4 Per Year

REV. AND MRS. EDWARD R. FAIRBANKS and Drexie-Assemblies of God Missionaries to Haiti.

the Arthur Drakes will have in the not too far distant future. Recently one sow gave birth to 18 pigs. Now, 18 pigs in one litter may not be a record, but it surely isn't an everyday occurrence.

The last report I heard was that 14 of the little porkers were still alive and some of them were being bottle fed.

In this business things never stay the same very long, so changes are rarely ever surprises. The Star office isn't going to seem the same without J. Vernon Stewart in it.

Knowing and working with him and his wife, Karen, has been a pleasure and all members of The Friona Star and Plains Publishers staffs wish them the best of everything in whatever they undertake.

Looks like the annual end of school race is one that we never miss. Dates on the school calendar are almost all filled for the next six or seven weeks.

Plans are being made for Little League play to get under way a little bit earlier this year. The extra weeks at the beginning of the season will leave time for late summer vacations before school begins.

Mrs. Miller has visited with Miss Swisher in the hospital and her doctors report that she cannot improve appreciably. At this time she is unconscious much of the time.

Any contribution you may wish to make will help make her last days more free from material cares. Make checks payable to San Jacinto Methodist Church, for Mattie Mae Swisher Emergency Fund. Mail to 505 Tennessee Street, Amarillo, Texas.

again. At least one Friona fan, Mrs. Rudolph Renner Sr., is getting anxious for the games to get started. Mrs. Renner said recently, "It just doesn't seem like summer until the kids get started playing ball so we can go watch them."

While the cost of living continues to edge up, it's nice to know that inflation has been halted.

Two transport drivers were taking a cargo into Canada for the first time. Late in the evening, they stopped at a large town, parked their truck and entered a diner. A cute waitress approached them. "What town is this?" asked one of the drivers. "Saskatoon, Saskatchewan," sang out the waitress. The driver turned to his companion and exclaimed: "Now we're in a real mess. They don't even speak English here!"

Letters to the Editor

Dear Sir: I would like to take issue with Mr. Euler's letter concerning the charges of the Cinema Education Guild against Chet Huntley of NBC-TV. Mr. Euler brought forth the question of Huntley's reluctance to sue the CEC. He also mentioned evidence that shed further light on Myron Fagan (the head of the CEC) as well as Huntley.

Since I do not have access to this evidence, I will rely on the accounts supplied in the Star. According to the Cinema Education Guild, which is our authenticated (and infallible) source, Huntley was denounced (Proven guilty) before a joint session of the California Legislature. On another occasion Huntley was said to have proposed that the U. N. flag be flown above the American flag. Fagan countered with the charge that this was a "degradation of the US flag in favor of the UN rag." He further charged that this was a treasonous suggestion. I leave it up to the reader to decide which one in this case is guilty of treason.

Let us first examine Huntley's failure to sue Myron Fagan. Mr. Euler asserts that this very silence on the part of Huntley testifies to his guilt. In explanation of this point, Huntley answers why he took time to sue another yet did not act in regard to Fagan. In his own words he says, "But not all are as materially careful as Fagan." This point is brought out when we consider Fagan's conduct. As long as a person keeps his bank account, his home, his car and all of his personal effects under another name, he can cause a tremendous expense to the plaintiff even if he loses. Fagan can settle the cost with outside donations collected from his audience and suffer little personal loss. Thus, he remains free to go on taking 'pot shots' at public figures as long as he

keeps his sympathizers behind him. A man like this is in the unique position of being able to withstand law suit after law suit and loss after loss with the matter of losing of small consequence.

Mr. Euler argues that to a man in Huntley's position the matter of honor should be of greater concern than the question of whether he can or cannot collect damages (allowing that there is a possibility of trouble here). It is doubtful that a man would bring a suit against a person such as Fagan if he knew that once his name was cleared more slander would come and it would have to begin all over again. It is my impression that it is not the matter of financial justification that is so important in this kind of a case as it is that of putting the person in question into a position where he cannot do it again. The instance where Huntley did sue and win a \$10,000 damage suit against one of Fagan's supporters serves to illustrate this point. The woman suffered a serious enough financial loss to make further libel against Huntley impossible. The money that Huntley won was left in the hands of that court in case she does try again to defame him. One might question here whether this Fagan supporter's defeat in court should not alone cause us to question the entire organization. Ordinarily we would think that when a man is proven innocent in court he will not be tried again for the same crime. But a libel suit forces the injured party into the endless pursuit of fighting to remain blameless over and over again.

None of us is free from such an organization as the Cinema Education Guild. They are not content that we have an FBI and a House Un-American Activities Committee. They take this work upon themselves; operating by rumor, hearsay, intimidation, and documented evidence from their own files. Americans must wake up to these "punch and run" tactics. This is more than a legal problem, it is a moral one. If a man's silence condemns him then there is no doubt that

somewhere there is a tract lurking with the question, Why doesn't Eisenhower sue Welch? Every man's integrity becomes a thing in question as long as such an organization exists. All that is needed is a small hint of suspicion to condemn a man under these kind of methods. Using the same kind of argument, Why doesn't Fagan sue Huntley for the things he is alleged to have said? Why did he not bring charges against the Columbia Broadcasting System, when in 1949, he was exposed over that same network?

Sincerely,
Hudson B. Phillips Jr.

Social security benefits may now be paid to survivors of workers who died between March 31, 1938, and January 1, 1940, if the worker had at least a year and a half of social security work before he died, says Hal Geldon, Manager of the Amarillo Social Security Administration District Office.

Before the Social Security Amendments of 1960, no monthly benefits were payable to the survivors of a worker who died before 1940.

Under the new law, if such worker had worked under social security for at least a year and a half, benefits are payable to his widow and dependent mother at age 62, to his dependent father at age 65, and to his disabled children who were disabled before they became age 18. This is true even if the family had collected the "lump sum" at the time he died.

For more information regarding this new provision, write your social security office, 1006 Adams Street in Amarillo.

Overheard in supermarket: "What an intellectual snob! She writes her shopping list in Latin."

Yale, aghast at the ascendancy of Harvard men in Washington, is planning a government in exile.

in and around FRIONA WITH JUNE

Mrs. Billy Bell went home from town Friday evening with four yards of material which she did not purchase. She's guessing the owner drives a '61 Ford and parked it in front of White's Super Market or Foster's late Friday.

Someone inadvertently placed the material in her car and she's anxious to return it. Since she lives on the Bridge exchange, she's asking the owner to call her mother, Mrs. L. B. Blake at Farmer 3134.

If Frionans don't watch their calendars carefully the first few weeks in June, they're likely to attend the wrong wedding at First Baptist Church. Just in case you've got the dates mixed up, this might help straighten them out.

On June 3 Sally Osborn will become the bride of Doug Whitley of Groom. Tommy Lewellen and Gary Goetz will exchange wedding vows June 10.

There may be other weddings slated at the same church during those weeks, but I've not heard of them yet.

The generosity of Frionans never ceases to amaze me. During all the years the Floyds have lived here, there has never been a worthy cause to which residents of this area have not responded in a wonderful way.

Early this week I received a letter from Mrs. J. M. Bradley telling me about the illness of one of the Golden Spread's most loved and best known music teachers, Miss Mattie Mae Swisher.

Mrs. Bradley enclosed a letter that had been sent to her daughter-in-law, Mrs. Dallas Earl Coldiron of Amarillo. Content of the letter indicated that

SPRING USED CAR CLEARANCE!

SO MUCH VARIETY! SO MANY VALUES! COME FIND THE ONE FOR YOU!

MANY MAKES, MODELS AND COLORS! PRICED LOW AND READY TO ROLL!

Thanks to public preference, Chevrolet dealers broke all sales records in '60, and they're setting the pace in new car sales again this year. This means that Chevy dealers have lots of fine used cars and trucks—many of these trade-ins on new Chevrolets and Corvairs—for sale right now at real bargain prices. Find the smooth-running used car that's just right for you—one with lots of unused miles left in it for your driving pleasure! Find it under the familiar OK sign!

What should A FARMER EXPECT FROM HIS BANK?

He should expect to feel comfortable and at home the moment he walks through the doorway. He should expect to find complete banking services without having to go elsewhere for one or two. He should expect to receive safety for his deposits . . . earnings on his savings . . . protection for his valuables . . . credit when he needs it for a worthwhile purpose. In short, he should expect to receive the kind of service that we strive to give those who bank with us.

Black News

BY MRS. BURL FISH
G. D. Coker, son of Mr. and Mrs. J. R. Coker, underwent surgery Tuesday morning in Hereford.
The Pete Braxtons and the Charles Myers spent the weekend at Lake Conchas fishing. The Black Community extends sympathy to Lester Dean and family at the death of his father in Muleshoe Sunday night.
Mr. and Mrs. K. E. Deaton had a big weekend with fifteen guests.
Mrs. Les Deaton continues to improve in the hospital at Hereford.
Mr. and Mrs. Loyd Prewett were in Lubbock over the weekend to visit her sister Mrs.

R. L. Bray, Mrs. Prewett's sister from Arab, Alabama, Mrs. W. A. Montgomery, is visiting with the Prewetts.
Mr. and Mrs. Ralph Price attended the Panhandle Assembly Association of the Rebekahs and Oddfellows in Perryton.
Mrs. Fern Barnett, Mrs. Ellis Tatum, and Mrs. Clyde Hays attended the Farmer County Home Demonstration Council Meeting Monday.
Mr. and Mrs. Alton Carpenter and family from Baileyboro spent the day Sunday with the Travis Stones.
Mrs. Gene Welch, Mrs. Ellis Tatum, Mrs. Johnny Mars, and Mrs. Helen Fangman attended the sewing workshop at Hub on Wednesday morning, April 19.
Mr. and Mrs. Fern Barnett spent the weekend in Lubbock visiting their children.
Verna Brown and Houston Frye were Sunday dinner guests of Mr. and Mrs. George Frye. Also visiting with them Sunday afternoon were Mr. and Mrs. Edgar Dennis.
Mr. and Mrs. Clyde Hays visited in Amarillo Sunday afternoon with Mr. and Mrs. H. A. Burnett. Mr. Burnett is Mrs. Hays' brother.
Mrs. Bill Carthel attended a Music Club tea at Happy on Friday.
Mr. and Mrs. Gene Welch visited in Amarillo Sunday with his parents, Mr. and Mrs. W. H. Welch, and his brother and sister-in-law, Mr. and Mrs. Wayne Welch. Gene also visited his uncle, who is ill in the Veterans Hospital.

FIRE IN THE HOLE—One fireman, lower left, is in the hole, or ensilage pit, beginning the battle against a stubborn blaze on the Brooks Dairy Farm east of Friona. The fire was Monday afternoon, and the firemen won.

Firemen Fight Ensilage Fire

A blazing ensilage pit that threatened nearby farm machinery was extinguished on the Alvin Brooks dairy farm east of Friona Monday afternoon by members of Friona Volunteer Fire Department.
According to Brooks, the blaze was apparently started by his pipe ashes that were carried into the stored livestock feed by a strong west wind. The pit was open on the southwest side, enabling the gusty wind to whip the flames.
"Do you file your fingerprints?"
"No, I just throw them away after I've cut them off."

SEED
WE HAVE ALL THE TEXAS HYBRIDS
W. H. Johnson - Grower
W A C HYBRID SEEDS
The Newest Developments in HYBRIDS
SCOTT 500
Here is a short-stalked, red grain hybrid with great yield potential and wonderful stand ability. Stalk height is about 12 inches shorter than RS 610. Red Grain (darker than RS 610 grain) on very large medium dry heads. About same maturity as TX 660 and outstanding in ability to stand and to yield. Adapted to dryland or irrigation. 110 days to mature.
SCOTT 450
An early grain hybrid of about the same maturity as RS 590. It is very similar to Scott 500 (above) but earliness makes this an outstanding hybrid for areas needing this factor. Red grain, large heads, high yield and shorter stalks make Scott 450 a highly desirable early grain hybrid. 95 days to mature (12 to 18 shorter than 610).
-- A GREAT PAIR OF TRUE COMBINE HEIGHT HYBRIDS.
CONTINENTAL GRAIN COMPANY
G. "Preach" Cranfill Ph. 2051

Heavy rains raised the river to flood stage, so a farmer sent his only child, a ten-year-old boy, to a distant uncle. A few days later, the father received a telegram:
"Take back your son and send the flood."
A Texan touring Italy was shown architectural and artistic masterpieces, but he always countered that the courthouse in Eastland or the murals in the Lubbock postoffice or some other marvel back home was superior.
The guide had saved his greatest spectacle for the last. As they stood on the brink of Vesuvius, the Italian pointed down into the vast cauldron of molten, smoking lava and asked triumphantly, "Have you anything in Texas that will beat that?"
The Texan hesitated only a moment.
"Well, I'm not sure. But we have a fire department in Houston that could put the darned thing out in ten minutes."
The cavalry recruit was instructed to bridle and saddle a horse. Ten minutes later the sergeant major came along for his mount and found the recruit holding the bit close to the horse's head.
"What are you waiting for?" he roared.
"Until he yawns," answered the recruit.

SPORTS AFIELD
By Ted Kesting

There are certain species of fish that are almost unknown to most anglers, although they are widely distributed; almost anybody may chance to catch one of them, and some are sought a good deal within limited areas. None are classed as game, for they rarely take artificial baits and practically never leap while being played.
Nevertheless, some offer good sport where game species are rare or absent, and most of them are edible; on the table, they rank from fair to just fine. Jason Lucas, Angling Editor of Sports Afield Magazine, puts the eel, burbot and suckers in this category of offbeat fish.
It might be well to mention that although an eel looks almost exactly like a snake except for that continuous fin along his rear part, both top and bottom, and though he travels, on land or water, like a snake, he is in no way whatever related to the snakes—he is purely a fish.
You might fish a lifetime where there are many eels and not know that they're present, unless you happen to fish on the bottom at night with animal bait, of some sort—and usually with about the size bait and hook you'd use for bullheads.
Although eels aren't game fish, and they give practically no fight, some fishermen become as addicted to catching them as many of us are to catching bass or trout.
On the table, the eel is well ahead of any bass or hatchery-reared trout, and at least right up with the best wild trout from a cold Rocky Mountain stream.
Few anglers fish purposely for burbot, but great numbers are often caught in larger lakes when fishing through the ice for other species. Almost invariably, they are thrown away as useless by white men, chiefly because a burbot could about be guaranteed to come in last in a beauty contest for fishes—but Indians know better.
In reality the burbot is nothing but a fresh-water codfish, and just as good eating as his relatives from the sea. So it's foolish not to take one home, skin and eat him.
Suckers of one sort or another are widely distributed and are very common in many places. Some are so prolific and hardy that catching even great numbers of them seems to make little difference in how many will be found. The different species vary widely in edibility, ranging from quite poor to delicious.

Grandpa Hedges says every body kin git old if they live long enough.
When it comes to findin' a jokin' place, we usually never git to first base.

Planning a vacation?

Go Santa Fe
...all the way

Go now—pay later. Terms, if you wish, that are as comfortable to take as the trip itself.

Family Fare Plan. Traveling with your family on a Santa Fe streamliner is fun—and it's economical too, with this money-saving plan.

Free travel information. See your Santa Fe agent for free information, vacation literature, and help with your travel plans.

SECOND PLACE WINNERS—sponsored by Piggly Wiggly, are Christine Ivy, Nona Pavalus, Sondra Nichols, Geneva Riethmayer and Gwyn Buckley.

FIRST PLACE WINNERS—shown with their sponsors, Mr. and Mrs. Carl Maurer. Others pictured from left to right are Betty Renner, Thelma Coffey, Reba Buske, Layvon Hughes and Phyllis Anderson.

We visited a Cooperative and observed that there was an enormous stock of salt; table salt, stock salt, rock salt; salt on the shelves, in the corners, everywhere. We remarked to the Man-ager: "you must sell a lot of salt." -- "No," he replied, "we don't sell much salt but 'boy' the man that sells us salt sells a lot of it."

SPECIAL AWARD WINNERS—Left to right—Joan King, most improved; Gertrude Renner, gutter ball; Betty Renner, high average; Betty Rector, high series; Mildred Agee, most improved; Ullie Vaughn, high game and Gwyn Buckley, most improved.

WINNERS FOR THIRD PLACE—are Cherry Mings, Gertrude Renner, Sue Proctor, Mildred Agee, Betty Lewellen and Bobbie Wilson. This team is sponsored by Rockwell Bros.

SPIB 77

What Does SPIB Mean?

These are the initials of the Southern Pine Inspection Bureau. When they appear on lumber, it means that lumber has been skillfully manufactured, properly seasoned, expertly graded and inspected . . . to give long, satisfactory economical service.

In your home improvement plans - - be sure you get the BEST lumber for future satisfaction and peace of mind. Since lumber in construction ordinarily represents less than 10% of the total cost - - yet the entire structure depends on it - - it certainly doesn't pay to skimp on quality. Let us provide you with plans, financing, and all your building materials, including KILN DRIED, inspected, and graded Southern Yellow Pine lumber from one of the world's leading quality producers.

4H Club

By KATIE BLACKBURN - Linda Gleason called the meeting to order. Mike Hinkson led the 4-H pledge and motto. Miss Musil talked about the functions of the 4-H council on the County, District, State and National level.

Pat Chitwood called the roll and read the minutes. Danny Miller gave a report in the awards program which was held at the Oklahoma Lane Center February 11. Katie Blackburn gave a report on the subscriptions which the Lazbuddie Sr. 4-H girls have been selling. They have been selling subscriptions for the Friona Star, State Line Tribune and Bovina Blade. Pat Chitwood gave a report on the activities of the Jr. Leadership Club during National 4-H Club week.

Katie Blackstone from the Lazbuddie Sr. Girls 4-H Club and Janis Billingsley from Farwell Jr. 4-H Club gave reports on what their clubs did during National 4-H Club Week. Judy reported on the "March of Dimes" drive which the 4-H club had. Katie gave a report on the County Demonstration Contest which was held April 8. Richard Chitwood reported on the Farmer County Livestock Show and also on the county crop awards.

The Council discussed setting up a standard for the Awards program. Judy, Richard and Cooper Young are to make up the committee to standardize the 4-H Awards program.

Next Council meeting is to be July 15.

Premium Hybrids

THREE DIFFERENT MODELS TO FILL

EVERY CULTIVATING NEED

THE HI-TRACK FLAME CULTIVATOR: After the crops are too tall for the standard tractor equipment, the Hi-Trac Flame Cultivator is used. This unit may be converted from a High Clearance Cultivator to a High Clearance Sprayer by installing the Gotcher Spraying Attachment.

THE TRACTOR MOUNTED unit is attached directly to the rear axle of the tractor that does not have either a 2 or 3 point hitch.

THE REAR TOOL BAR model is of special interest to those who desire to cultivate the middles in the same operation as the flaming. With this model wheel tracks are eliminated.

For more information about the Flame Cultivator

Fun And Fancy
Club Hold
Special Meet

A special meeting was called for the Fun and Fancy Club Monday morning, April 24, in the home of Mrs. Mary Bandy. Members discussed the distribution of funds received from the House Tour made Saturday. They decided to make a donation to the Girl Scout house and Pony League Park. The club would like to express their thanks to the owners of the homes and to all who made the tour. Bacon thins and coffee were served by the hostess to Mesdames Lillie Baxter, Cherry Mingus, Betty Renner, Luann Hough, Mary Joyce Barnett, Gertrude Renner, Betty Louise Rector, June Collier and guest, Clara Renner.

Tammy Kaye
New Daughter
Of Fairchilds

Mr. and Mrs. Larry Fairchild became the parents of a baby girl Thursday, April 20, at 5:12 a.m. in the Hereford Hospital. Her name is Tammy Kaye. She was 21 inches long and weighed 9 lbs.

Grandparents are Mr. and Mrs. E. L. Fairchild and Mr. and Mrs. Otis Neel of Friona. Great grandparents are Mrs. T. A. O'Brian, Friona; H. P. Teston, Riverside, Calif. and Mrs. Thida Neel, Petersburg, Tex.

Mrs. Fallwell Hosts
Hub HD Club

The Community Center was the scene of the regular meeting of the Hub Home Demonstration Club Thursday, April 20, with Mrs. Buck Fallwell as hostess. Miss Ettie Musil presented a demonstration on the preparation and storing of frozen foods. Mrs. Fallwell served cake, nuts, mints and coffee to Mesdames T. I. Burleson, Aubrey Cannon, Albert Cannon, Jack Tomlin, W. E. Stringer, John Hand, Rene Sneed, Jack Shirley, Talmage Hukill and Miss Ettie Musil.

Mr. and Mrs. Homer Knowlton from Snyder, Okla., were weekend guests in the home of Mr. and Mrs. Newman Jarrell Sr.

Fairbanks Speakers At Special Rally

Rev. and Mrs. Edward R. Fairbanks, missionaries to Haiti, will be the featured speakers at a special missionary rally to be held on Sunday, April 30, at the Assembly of God Church, the Rev. M. Alvin Askins pastor, announced today. Rev. and Mrs. Fairbanks have been approved for missionary service by the Foreign Missions Department of the Assemblies of God with International Headquarters in

Local Group
Attends IOOF
Association

Several from Friona attended the Panhandle Association of Rebekahs and Oddfellows at Perryton Saturday and Sunday. Making the trip were Mr. and Mrs. Joe Moyer, Mr. and Mrs. Sam Williams, Mr. and Mrs. Bud Reed, Mrs. Fern White, Mrs. Pat Fallwell, Mrs. Lauretta Brookfield, Mrs. Nola Adams, Mrs. Inez Shirley, Mr. and Mrs. Ralph Price and J. B. Williams.

Springfield, Missouri. After serving four years in the Navy as a diesel engineer, Mr. Fairbanks enrolled at Southwestern Junior College, Waxahachie, Tex. The Fairbanks have one son, Drexel Ray, aged four. Rev. and Mrs. Fairbanks are now traveling, presenting the work of the Assemblies of God in Haiti. Colored slides will be shown of the work in Haiti. After only three years of endeavor by the Assemblies of God missionaries, there are eight churches and fifteen outstations. A center for the training of national workers was opened this year. Rev. Askins extends a cordial invitation to the public to attend this special missionary rally. The service begins at 11 a.m.

A clerk kept a small safe in his home. One day the combination got out of order, so he heaved the safe on to his shoulder and set off for a locksmith's. On the way, he nearly knocked down a businessman. "For goodness sake," snapped the man, "why can't you keep your money in a wallet like everybody else?"

Three Federated Clubs In Friona
Meet For Joint Program And Tea

Friona Woman's Club, Modern Study Club, Progressive Study Club members and their guests met Tuesday evening, April 25, at the Methodist Church for a joint program and book review. Following the program a tea was held in the Fellowship Hall.

Mrs. Flake Barber, general program chairman, gave the welcome address to guests and members. Opening prayer was by Mrs. Charles Allen.

Musical selections were furnished by a trio, composed of

Neida Douglas, Suzanne Taylor and Donna Blackburn, singing "The House I Live In"; also the Trebelaires, directed by Mrs. Roy Miller, sang "Together" and "You Taught Me How To Pray." They were accompanied by Donna Blackburn at the piano.

Mrs. Lowell Bynum gave a review of the Federation Constitution. She stated that there are 11 million members of Federated Clubs in the United States and 60 other countries.

Mrs. Roy Slagle, president of the Friona Woman's Club, introduced the guest speaker, Mrs. L. E. Dudley of Abilene. Mrs. Dudley presented a very

colorful review of "Nubbin Ridge," the last book written by the late Lewis Nurdyke of Amarillo, Texas. It is the story of Nurdyke's boyhood on a 247 acre farm near Baird.

Mrs. Dudley, a past president of the Texas Federation of Women's Clubs, is now serving as General Federation chairman of the Education Department. She is active in American Cancer Society as a member of the national board and vice-president of the Texas Cancer Society.

Hostesses were the program committees of the three clubs. The serving table was laid with a white cloth centered with an arrangement of spring flowers in a silver bowl. Silver service and crystal appointments completed the setting. Assorted cookies, mints, tea and coffee

were served to 125. Piano selections were given by Marcella Lynn Massie and Lois Moyer. Ten guests were present from Muleshoe, eight from Bovina and 47 local guests.

Brownie Troop
93 Has Cook Out

Brownie Troop 93 met Saturday, April 22, at their secret meeting place for a cook out from 9 a.m. to 1:20 p.m.

Eighteen girls were present accompanied by Mrs. Alice Whaley, Mrs. Maedell Taylor and Mrs. Genevra Riethmayer.

The troop made and followed trails, sang songs and learned how to use pocket knives. For lunch each girl made hamburger.

Thomas Masons
Have Baby Girl

A baby girl was born to Mr. and Mrs. Thomas Mason at 2:23 p.m. Tuesday, April 18, in the Dimmitt Hospital.

She was named Janice Kay. Her weight was 6lbs. and 14 1/2 ozs. and she was 18 inches long.

The baby's grandparents are Mr. and Mrs. Tom O'Brian of the Hub Community and Mr. and Mrs. T. B. Mason Tahoka, Tex.

Mrs. T. A. O'Brian, Friona and Mr. and Mrs. R. L. Mason of Post are great grandparents.

Full Membership
Granted To LCC

Full membership in the Texas Association of colleges was granted to Lubbock Christian College this month in a meeting of the association held in Fort Worth. Since the college has been approved by the highest accrediting body in the state, LCC's credits are now accepted anywhere.

The college was granted affiliate membership (the first step in accreditation) in the spring of 1960. Normal procedure would have called for the second step-associate membership this year. But the board of examiners, after studying the report submitted by President Maddox, granted the college full membership.

Now in its fourth year of academic operation, Lubbock Christian College this year will offer for the first time a full summer school program June 9 through August 11.

Daughter Born To
The Urschel Perkins

Mr. and Mrs. Urschel Perkins of Hereford, are the parents of a new daughter, Teresa Gail, born Monday, April 10, at 11:30 p.m. in the Deaf Smith County Hospital, weighing 7 pounds and 4 1/2 ounces.

Her grandparents are Mr. and Mrs. Alvin Brooks, Hereford, and Mr. and Mrs. A. W. Perkins, Troupsdale, Okla. Great grandparents are Mr. and Mrs. W. E. Brooks, Liberal, Kansas and Mrs. Helen Williams, Friona.

Little Robbi, daughter of Mr. and Mrs. Bob Blume of Oklahoma City, is visiting in the home of her grandparents, Mr. and Mrs. Paul Smith for several days. Mrs. Blume is the daughter of the Smiths.

fixtures left over from the park built last year.
The wrangle over selection of players led to appointing committees from American Legion, Lions Club, Jaycees, and Chamber of Commerce to meet and study and revise the rules that have governed the baseball program in the past.

Mick Mingus, Ralph Taylor and O. J. Beene, from American Legion; Wes Long, George Jones and Danny Mac Balnum from the Lions Club, and Jack Burnet from Jaycees were scheduled to meet Wednesday night to discuss the possible rule changes.

Gordon Baldwin of Great Bar Electric Co. of Amarillo told the group assembled for the meeting that wire and light fixtures for the proposed Pony League Park would cost in the neighborhood of \$3,000.

Firemen--

They don't know who turned in the alarm, or exactly where the fire was, or exactly who

brought it under control. Nevertheless, a poll of the firemen who were riding the trucks would probably show that this was the kind they like.

News From RHEA

MRS. FRANKLIN BAUER

Pink And Blue Shower Honors Mrs. D. Ridley

Mrs. Dwayne Ridley was honored with a pink and blue shower at the Parish Hall April 20, 1961. She was presented with a corsage made of pink and blue anklets by the hostesses.

The guests were registered by Mrs. Herman Schueler at a table decorated with an arrangement of tulips and jonquils.

Several games were played and then the gifts were opened.

The serving table was laid with a blue linen tablecloth centered with a stork. Mrs. Walter Schueler and Mrs. Herbert Schueler served cupcakes decorated with pink and blue booties, assorted nuts and mints and punch.

H.D. CLUB HELD AT SMITH HOME

Mrs. Shirley Smith was hostess for the H.D. club meeting which met in her home Tuesday April 18th.

Mrs. Cordie Potts, president presided at the business session.

Miss Ettie Mussil, County Agent, gave a demonstration on "Freezing Vegetables and Freezer Meals."

Refreshments were served by the hostess to Miss Ettie Mussil and to members, Mesdames Ray Martensen, Herbert Schueler, Carl Schlenker, Florian Jarecki, Cordie Potts, Floyd Schueler, Norman Taylor, Jack Patterson, Herman Schueler, Leland Gustin, Franklin Bauer, Roy Huddleston, Elmo Dean, Walter Schueler, Norman Taylor, Jack Patterson, Herman Schueler and one visitor, Mrs. Dwayne Ridley.

The May 2nd meeting will be cancelled due to the Oklahoma Lane meeting. The club will next meet on May 16th

at the home of Mrs. Carl Schlenker.

LADIES AID MEETS

The Ladies Aid recently met high ranking second graders.

At the business session it was decided to sew pajamas and aprons for the Bethlehem Lutheran Welfare Home in Louisiana, and for Mill Neck School for Deaf in New York.

Mrs. Chris Goetz, Mrs. Walter Schueler and Mrs. Franklin Bauer were placed on the visiting committee for the next three months.

Following the business session, Mrs. Ray Martensen gave a report on the spring workshop she and Mrs. Melvin Sachs attended.

Refreshments were served to the group by Mrs. Herman Schueler.

Steve Houston, Kirk Commins and Jodean Harrelson spent the night with Dwayne Bauer on his birthday April 18th.

Celebrating his birthday the following Sunday with a party in his home were; Danny Schlenker, Roger Martensen, Wayne Allen Schueler, Floyd and Jim Schlenker and Dale Schueler.

Mrs. Melvin Sachs had surgery at Parmer County Community Hospital the past week. Also on the sick list is Leslie Jarecki. Leslie will be in bed for some time with rheumatic fever.

Our congratulations to Dale Schueler for being one of the ranking second graders.

Billy Sifford drove his parents to Hammond, Oklahoma the past week to visit his grandfather who has been ill.

Pastor Stroebel has returned from his vacation. The usual church schedule will be resumed.

Wife--Since God created woman after man, it must follow that we females are an improvement over the original model.

Husband--Oh, come now. My theory is that God had a very good reason for making woman after he made man--He didn't want any advice.

Cotton Is King In Parmer County When You Use . . .

HUMI-CITE

WHAT IS HUMI - CITE?

HUMI-CITE is a natural liquid soil conditioner which creates humus and helps break down and balance the natural minerals in soil to produce healthy plants. Healthy plants are far less susceptible to insects and diseases.

Most of us know about plant chemistry--we have in years past tried many formulas, some with great success, and some with little results. We are putting our money on HUMI-CITE and believe we have the answer to our plant food needs. We firmly believe the addition of HUMI-CITE

to your plants including COTTON will give the greatest results in lowering damage from diseases and insects. Plant chemistry is just common sense -- the same common sense every mother uses to try to give her family balanced meals to produce good healthy bodies. HUMI-CITE is a balancer -- a Soil Conditioner which contracts alkali and salts to per-

mit good germination of seeds planted in our land in Parmer County.

DIRECTIONS FOR USE: HUMI-CITE should be applied to all crops in irrigation water at the rate of 10 gallons per acre. Homeowners will be happy to know it brings marvelous results to flowers, shrubs, fruit trees and lawns. Available in small amounts for home use . . . We also have mineral water for cattle -- easily applied in regular drinking water to give cattle all the minerals needed for healthy growth.

It's A Girl For The Spiveys

Mr. and Mrs. Dale Spivey of Brownfield have a baby daughter born Friday, April 14, at 11:10 a.m. in the Farmer County Community Hospital. They have named her Regina Gay. She weighed 6 lbs. and 11 ozs. and was 18 inches long. Regina Gay's grandparents are Mr. and Mrs. Bud Elmore, Friona, and Mr. and Mrs. G.W. Spivey, Comanche. Great grandparents are Mr. and Mrs. H.H. Elmore and Mrs. Helen Williams, Friona, and Mrs. Bessie George, Comanche.

PROGRESSIVE STUDY CLUB OFFICERS are left to right, Mrs. M. C. Osborn, vice-president; Mrs. Marion Fite, president; Mrs. M. L. Martinez, treasurer.

OFFICERS OF MODERN STUDY CLUB - left to right, Mrs. Paul Hall, vice-president; Mrs. Mack Hatnum, president, and Mrs. S. H. Osborn, secretary.

Double Shower Honors Mesdames Rose-Mingus

Mrs. Leon Rose and Mrs. Ernest Mingus were honored with a pink and blue shower Thursday, April 20, at 8 p.m. in the Auxiliary room at the United Pentecostal Church.

The Pentecostal Ladies Auxiliary was hostess for the occasion. Corsages of roses made from baby anklets were presented to each honoree.

Following the opening and displaying of gifts, frosted punch and cookies were served from the decorated table. Plate favors were triangle napkins filled with mints and nuts.

Attending were Mesdames Wilburt Varner, G.L. Mingus, Maynard Agee and daughter, Jimmie Chesser and daughter, J.L. Stowers, Jim Griffith, P. W. Hughes, Joe Johnson, Don Brown, Taylor Green, Jess Chesser, Howard Lowe, E.T. Dement, Frank Barber and Barbara, J.B. Buske, Frank Griffith and Cleo Harrison and Lucy Harrison of Texico.

Sending gifts were Mesdames Henry White, E. E. Deaton, Lloyd Mingus, Glen Mingus, James Jones, Florence Buske and Bill Turner.

FATHER DIES

Judd Schott, father of Mrs. Newman Jarrell Sr. and Mrs. Hardy May died Monday in Rush Springs, Oklahoma.

Huff-Maynard Host Class Party

The home of Mr. and Mrs. Jim Maynard was the scene of a party for the Gleaners Sunday School Class of the First Baptist Church Monday evening. Assisting Mrs. Maynard with hostess duties was Mrs. W. K. Huff.

Attending were Mr. and Mrs. John Ray, Mr. and Mrs. Clyde Hays, Mr. and Mrs. Earl Chester, Mr. and Mrs. T. E. Lovett, Marie Roberson, Mrs. Lucy Jones and H. K. Huff.

A buffet supper was served, followed by a session of games of 42. Special guests were husbands of the members.

Student Program Set

Grades 3C and 3D of Friona Elementary School will present an Operetta entitled "Cinderella" next Tuesday at 2 p.m. Everyone is invited, especially the parents of third grade children and the children who will start to school next year.

Something To Think About

16th. Street Church of Christ
Box 515 -- Friona, Texas

Dear Friend, Christ came into the world to save the lost sinner. He gave his life upon Calvary's cross. His blood was shed for the redemption of mankind. God's wrath and offended dignity was appeased, and the road to heaven that had been

barricaded for generations by sin, was thrown open. The church was established on that memorable day of Pentecost, the gospel was preached for the first time, inquiring penitents were told to "Repent and be baptized for the remission of sins," and man's name was begun to be enrolled in the book of life. The Son of God had opened the way to heaven.

Now man could approach with boldness the throne of God. Now men for the first time could have their sins forgiven. Man is now called upon to obey the gospel, but as many rejected Christ then, many reject him now. Man, lost in sin, if offered pardon, but the pardon is rejected. Can you imagine a man under the sentence of death refusing that which will save him from that death? That is exactly what multitudes of us are doing today. Standing in the shadow of the gallows of eternal death, having been told that if he will obey the gospel he may live forever, yet refusing that pardon for his sin-burdened soul. We cannot believe that man prefers death, but it is obvious that many of us are too indifferent to accept life. Don't let this happen to you.

come to church sunday

"And I say also unto thee, that thou art Peter, and upon this rock I will build my church; and the gates of hell shall not prevail against it." (Matt. 16:18).

The Church is a Divine institution having a Divine Architect, Jesus Christ. Some think it strange to talk of the church as being a Divine institution when it is made up of mankind. However, the idea of the church did not originate in the mind of man, but in the heart of God. Jesus said, "Upon this rock I will build my church," hence the building and maker is Christ. Concerning the first church in Jerusalem it was said: "And the Lord added to them day by day such as should be saved" (Acts 2:47). The Lord chooses and shapes the material that goes into the construction of his church. Paul speaks of "the church of God, which he hath purchased with his own blood" (Acts 20:28). The church belongs to God because he purchased it at a great price. Thus, the church is a divine institution.

Christ declared he was building his Church upon "this rock," Peter's confession of faith that Jesus was the Messiah, revealed to him by God. Peter had just voiced his great confession of Jesus as divine Savior, "Thou art the Christ, the Son of the living God."

The church has a divine mission to "Gone therefore, and make disciples of all nations, baptizing them into the name of the Father, and of the Son, and of the Holy Ghost; teaching them to observe all things whatsoever I have commanded you" (Matt. 28:19-20). The church is the one institution the Lord has set in the earth through which to carry out his program.

Therefore, it is our privilege as churches in this city to serve and worship our Lord and introduce you to our Savior, Jesus Christ. You are invited to attend the following churches this Sunday.

SOIL CONSERVATION DISTRICT NEWS

OUR SOIL ★ OUR STRENGTH

Plants have a definite means of telling you their hunger signs. All crops require 10 or more different plant food elements and when the availability of any one of these becomes exhausted growth is seriously hindered.

At times it is very difficult to correctly interpret the symptoms of plant food deficiencies because of the different factors that might affect the plants. Prolonged periods of adverse weather, insects and disease may cause symptoms very similar to plant food deficiencies. When there is a question concerning the deficiency, chemical tissue that can be made for nitrogen or phosphate, which are most likely to be deficient in this area.

When young sorghum plants are nitrogen starved, they are stunted and spindly in appearance. The leaves become greenish-yellow to orange-yellow in color, the tip ends gradually dying.

When nitrogen deficiency occurs later in the growth of sorghum, yellowing of the tissues occurs first in the older leaves and follows the midrib from the tip. Later, the tip begins to dry and the whole leaf may become involved, which is frequently referred to as "firing."

Most people think "firing" is due directly to dry weather, but this is not true. Many times sorghum plants will "fire" to the heads without ever wilting. When sorghum plants are suffering seriously for moisture, there will be wilting from the top to the bottom and not just "firing" on the lower leaves.

When nitrogen plants show no nitrogen deficiency but have a retarded rate of growth and slow maturity, the trouble is usually phosphorus deficiency. The plants are spindly and dark green in color. The leaves and stems may become purplish in color.

Nitrogen deficiency symptoms in cotton are characterized by relatively little growth and yellowish-green color of the foliage. The older leaves are the most severely affected. Then dry up and are shed prematurely.

The most outstanding deficiency symptoms for phosphorus in cotton is a dark green color of the foliage and a generally dwarfed type of plant.

Have you checked your rose bushes lately? Not just to see how they are becoming bushy with dense foliage, but checking closer than the over-all appearance. If you haven't you may have trouble. Yes, the rose bushes are forming buds that would like to bloom out within a few weeks.

Now check the rose buds and the tender new leaves. I checked the rose bushes of Mrs. C. C. Christian of Farwell and found that her roses were heavily infested with aphids. This tiny green insect sucks the tender leaves and buds of the rose and other plants. If you have aphids or thrips on your rose bush you will need to spray or dust the whole bush if you want it to live and bloom.

Use a spray of 2 T. of 4% malathion or lindane to each gallon of water. Spray early in the day so the foliage has time to dry before night. Wet leaves at night attract the rose black spot that is a very common disease of the rose.

Have you been bothered with flies around the arborvitae shrub? Many people think this is common or characteristic of the arborvitae. Flies are attracted to this shrub because they wish to feed on the honeydew or sticky deposit left by the aphid insect. To get rid of the flies spray the shrub with the same malathion or lindane spray that I mentioned above.

Aphids do vary in colors so don't look for a green insect only. They may be yellow, bluish green reddish brown and even black. Thrips have very small slender bodies and have fringed wings. They vary from yellow to dark brown or nearly black. Thrips cause tops of leaves to wither, curl up and die. Buds of most flowers will not open normally if they have been damaged by thrips.

Hope you check your roses and other plants in time before too much damage is done. If you need more help to control other insects, do let us know

HD Agent's Notes

BY MISS ETTIE MUSIL

and we shall be happy to send you a leaflet "Controlling Insects on Ornamental Plants."

April 29-May 6 is National Home Demonstration Club Week. "Today's Home Builders Tomorrow's World" is the theme used by the 36,000 Texas homemakers and more than eight and a half million homemakers throughout the nation. We would like to salute the 130 members of the eight home demonstration clubs in Farmer County.

I understand all of the clubs have planned a special day Tuesday, May 2 in observance of the National celebration. "Homemaker's Talent in Revue" will be held in the Oklahoma Lane Community Center at 2:30. Exhibits of shoes, hats, quilts, pillows, dresses, and special projects will be on display earlier while refreshments are served.

At 2:30 a style show will be the highlight of the afternoon. Many club members will model dresses, shoes, or hats they have made. Several children will model garments made by their mothers, grandmothers, or friends who are club members. Wouldn't you like to see this Homemaker's Talent in Revue? Come on out.

Another event of which we are proud of is the District 4-H Method Demonstration Contest to be held Saturday April 29 in Canyon on the West Texas State College campus. Our winning teams of the county Contest held April 5 will compete in the district level. We'll have results of the District Contest next week. General assembly will begin the contest at 9:30 A. M. in the Auditorium of the Administrative Building. We hope to see other Farmer County 4-H boys and girls there to learn while watching the many demonstrations.

Miss Musil Gives Training Course

"How can one-dish meals help you in your meal planning?" This was a question asked by Etie Musil, county home demonstration agent, in a leader training course conducted Friday afternoon, April 21, in the Friona State Bank community room.

"One-dish meals are ideal to serve on busy days. Not only will one-dish meals or casseroles save you time and energy in preparing them, but they are ideal to use left-overs as planned-overs," said Miss Musil who added "Let's don't forget that they require few cooking utensils, serving dishes and last minute preparations."

A deviled tuna casserole was prepared in the training and served to the demonstration club leaders of each of the eight clubs. The leaders will present the demonstration to their respective clubs during regular club-meetings in May.

Short courses will be presented in soil and water conservation, wildlife, entomology, and safety. Each year the Texas Home Demonstration Association helps to finance this leadership camp with a gift of \$100. This year the Federal Cattle Cooperation will donate \$300 to the 4-H conservation camp.

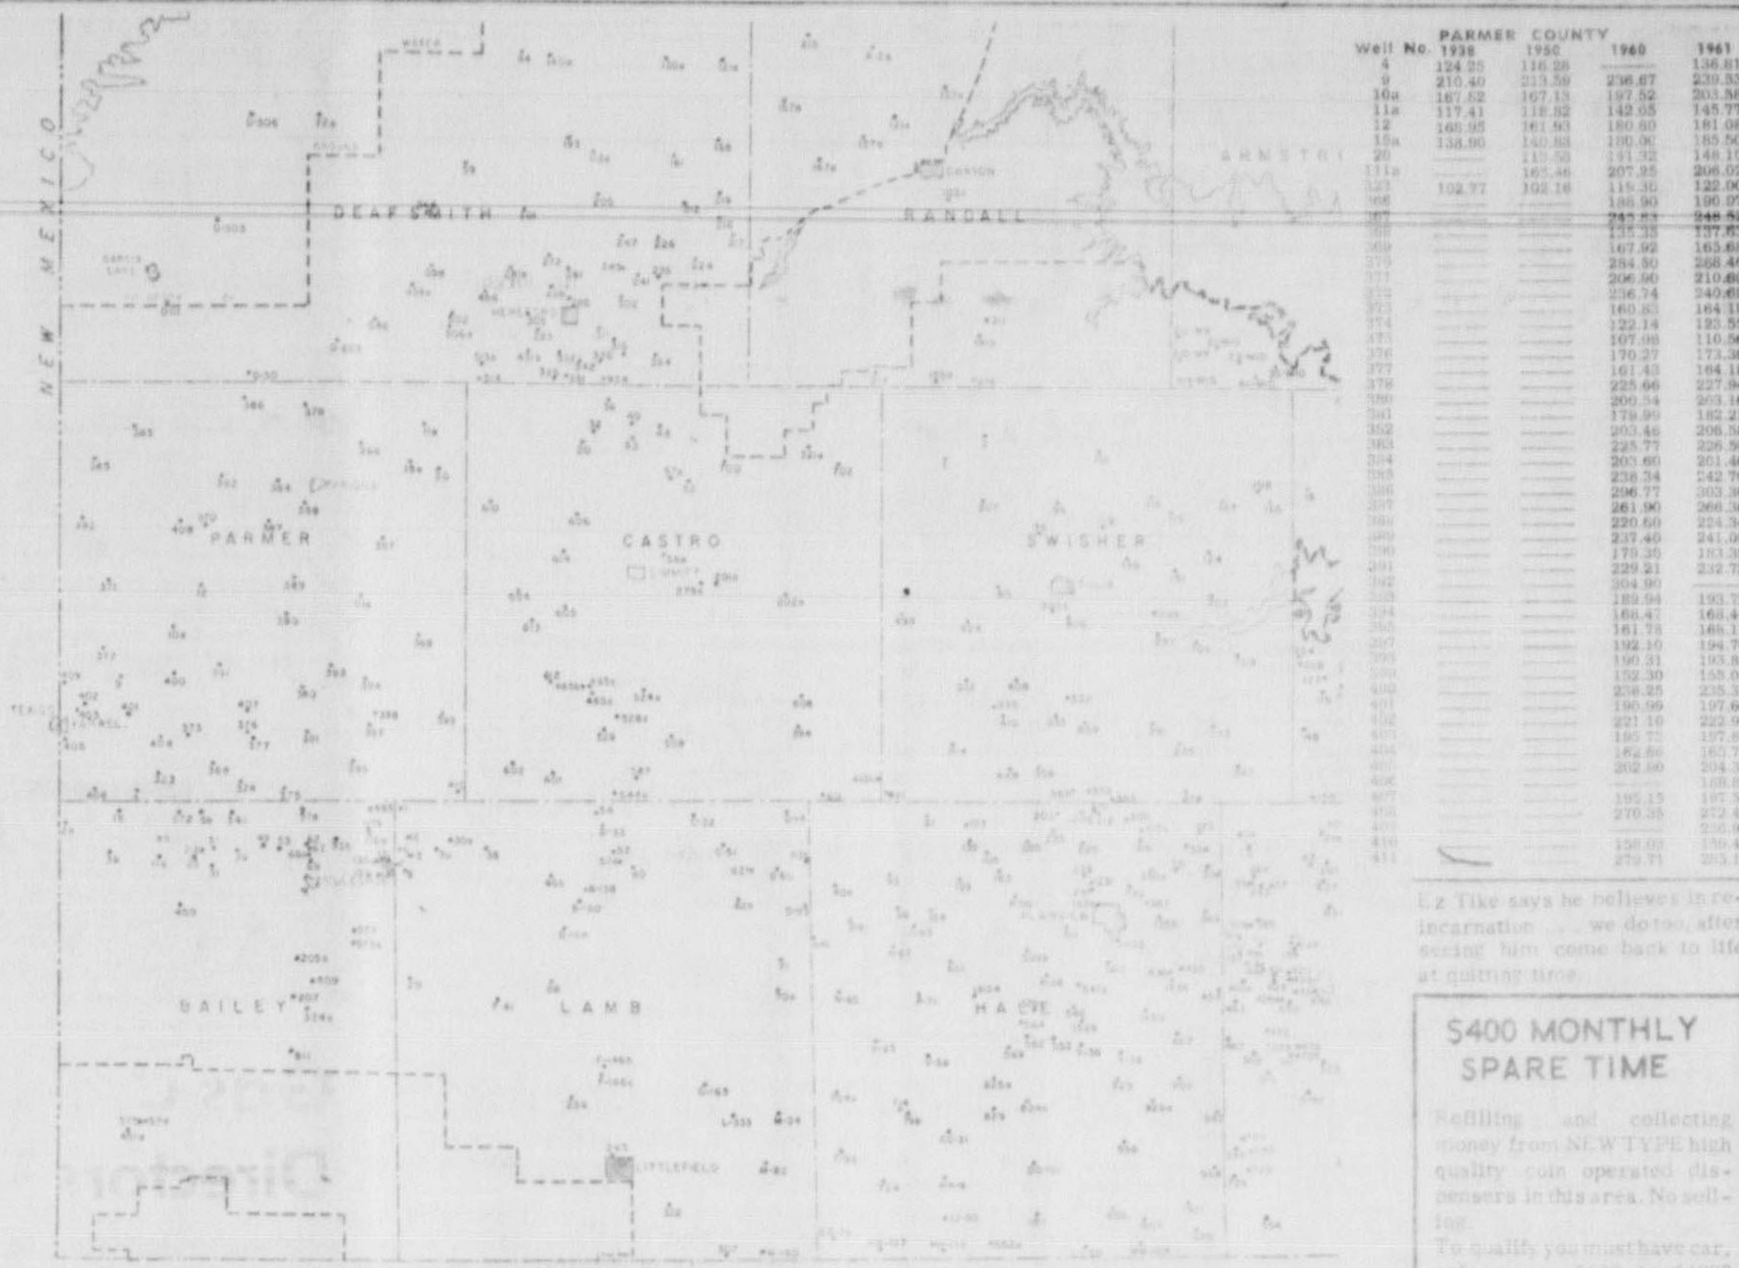

Each county in District 1 will be allowed three boys and three girls who are thirteen years of age or older. Two adult leaders and county extension agents will fulfill the county quota. A registration fee of \$7.50 will pay for six meals and two night's lodging for each participant.

County 4-H members and adult leaders who will attend will be announced later.

Elz says that when his son begins to sow his wild oats, it's time to start the thrashing machine.

Water Level Declines 2.32 Feet

Official water-level measurements, taken from observation wells throughout the county, reveal that the supply of underground water under Farmer County declined about 2.32 feet during the past year.

The drop was only about half of what it was during the previous year, when the statistics released by the High Plains Underground Water Conservation District showed a decline of 4.69 feet in 1959.

These measurements were made in January, during a time when most of the wells were idle, by the State Board of Water Engineers, in cooperation with the U. S. Geological Survey and the water conservation district.

The average decline of the water level in Farmer County was figured by comparing the average depth (from the surface of the ground) of 49 well measurements in the county with the average depth of the same wells a year ago.

According to the figures released by the water conservation district, the average depth to water last year was 197.76 feet as compared to 200.08 feet this year.

There is a slight discrepancy in these figures as compared to the ones released last year at the time the measuring was taking place in Farmer County. At that time, the 46 wells used to establish the average depth revealed was 194.91 feet instead of 197.76.

The reason for this variation would probably be that the difference in the average of the 49 wells, which were released this year as having been measured both years, would differ slightly from the 46 that were used when the average was first figured last year.

It would depend on whether or not those extra three wells were extremely shallow or deep.

At any rate, it is a fairly well established fact that the average decline in the water level has been from two to five feet each year since measurements have been taken on a large scale.

In 1956, the average distance to water in Farmer County was 181 feet. Comparing this with the 200 foot level now, the average drop for each year would be a little over three feet.

According to experts in the know on this business of measuring water, it appears as though this three feet figure is now pretty well established and the drop each year, on the average, won't vary too much.

Farmer County is now just about fully developed as far as irrigation wells are concerned, and the depletion each year of the water-bearing sands won't be increased too much from what it is now.

One reason for the lower decline in the water level over last year could probably be the increased rainfall this year, or the combined total over a two-year period, which didn't show up last year but did affect the picture considerably this year.

Illustrating further how the omission of only a few wells in the annual measurements could make the overall picture vary would be comparing statistics released on wells this year.

In all, there were 52 wells measured in the county, three

of those being wells that weren't measured last year. The average depth of the 52 wells was 199.35 feet as compared to the 200.08 feet of the 49 wells that were measured both years.

To arrive at an average decline, however, only the 49 wells were used.

One oddity in the measuring of the wells is that a few of them showed sharp drops while on the other hand some wells had an even lower depth this year than a year ago.

One well, No. 20 in the northeast part of the county, dropped more than six feet, from 141.32 to 148.10. On the other hand, another well, No. 111A in the east central part of the county, showed a gain from 207.25 feet last year to 206.02 feet this year.

(So that interested persons may study the overall report, High Plains Farm and Home this week is reproducing in part the water conservation district map which pin-points the various wells in the county and

the depth of the wells both last year and this year.)

County 4-H'ers To Camp Planning Meet

Judy Billingsley and Richard Chitwood represented the Farmer County 4-H clubs at a district 4-H leadership camp planning meeting held Saturday, April 22 in Canyon.

During the meeting eight district council delegates, five county extension agents, and Miss Edith Wilson and W. W. Grisham, District Agents, made plans for the annual camp to be conducted at Camp Don Harrington, May 29, 30 and 31. Counties represented in the planning were Oldham, Donley, Armstrong, Randall, Deaf Smith and Parmer.

Short courses will be presented in soil and water conservation, wildlife, entomology, and safety. Each year the Texas Home Demonstration Association helps to finance this leadership camp with a gift of \$100. This year the Federal Cattle Cooperation will donate \$300 to the 4-H conservation camp.

Each county in District 1 will be allowed three boys and three girls who are thirteen years of age or older. Two adult leaders and county extension agents will fulfill the county quota. A registration fee of \$7.50 will pay for six meals and two night's lodging for each participant.

County 4-H members and adult leaders who will attend will be announced later.

LOOK HOW CLEAN MODERN ELECTRIC HOME HEATING IS!

EVEN A SNOW WHITE HANDKERCHIEF STAYS CLEAN WITH ELECTRIC HEAT

From home after home where electric home heating has been installed, you hear comments like these:

"Dusting is practically unnecessary."

"Drops just never seem to get dirty."

"We haven't had to redecorate in years."

And, then, electric heat homeowners volunteer information like:

"There just aren't any cold drafts or hot blasts."

"We've never felt so completely comfortable."

"It's amazing, there's just no maintenance to pay for in worry about."

Clean and comfortable -- that's electric heat. And more economical than you believe possible. Ask your Public Service manager about electric heat -- including a special heating rate.

THE HIGH PLAINS FARM AND HOME

Questions And Answers On New Feed Grains Bill

Following are some questions and answers on the emergency feed grains bill. The questions were prepared and released by Prentice Mills of the Farmer County ASC office:

Q: Is a producer of Barley, Oats or Rye under the Feed Grain Program eligible for price support?

A: If he produces corn or sorghum on the farm in 1961 he must be in compliance to be eligible for price support on barley, oats or rye.

Q: If a man has two farms, corn or grain sorghum on one and none on the other but has oats and barley on the second farm, and does not participate with the Feed Grain Program, is he eligible for price support on the second farm?

A: Yes, provided he does not exceed the feed grain base on any other farm in which he has an interest in the corn or grain sorghum crop.

Q: What happens if one owner in a multiple ownership farm refuses to sign the application?

A: This will not result in the others not receiving their share, as long as they are not taking his interest.

Q: How do we check the designated conserving acreage of each farmer?

A: We are going to designate the acreage at the time he signs up for the program. He will have to identify and qualify the designated acreage at performance time.

Q: If the farm is sold, who is responsible?

A: The man to whom the advance is made promised to refund the payment if the farm is not in compliance with the provisions of the program.

Q: What is the classification of grain sorghum used for silage?

A: The same as if the grain sorghum was used for grain.

Q: If a tenant operates two separate tracts owned by "A" and "B," landlord "A" makes the 20% diversion, on landlord "B's" tract the full 20% diversion is not made, what effect does this have on the eligibility of the tenant?

A: Assuming that "A's" and "B's" tracts are combined as ONE farm, the whole farm is ineligible.

Q: Could these tracts be separated into two farms?

A: No, the farm constitution stands.

Q: To what extent will corrections be permitted on data after farmer has turned in his 532?

A: If upon appeal, the committee determines that the original data are in error, it

may be corrected.

Q: Can new planted orchards be considered a conservation use on diverted acreage?

A: Yes, if land is devoted to approved cover acceptable to the county committee.

Q: Will assignments of payments be permitted?

A: No. Q: Will crop liens be recognized before making payments?

A: No.

Q: Should certificates be mailed to operators?

A: They may be; it is preferable to deliver in person if this is practicable.

Q: Will the individual farm yields be determined and will farmers be notified of yields before sign-up?

A: The yield will not be included on the official notice. The procedure does provide that the yield will be made available when the application is signed.

Q: What acreages will be checked for performance?

A: The corn and grain sorghum acreages and the diversion acreage will be measured.

Q: Will there be different productivity indexes on a farm where part of the farm is irrigated and part not irrigated?

A: Yes, the procedure so provide.

Q: How long must the land have been under the control of the applicant to qualify?

A: No limitation except that he have control of it in 1961.

Q: To what extent will multiple compliance be required?

A: To qualify for a payment or price support on one farm a producer must certify that the acreage of corn and grain sorghum on any other farm in which he has an interest in the production of corn and grain sorghum is not in excess of the respective base acreage.

Q: Must a producer who has no corn and grain sorghum base and grows only rye, oats or barley in 1961 make an adjustment to get price support?

A: No. Q: How do you handle the payment problem whose landlord does not qualify because of non-compliance on other farms in which he has an interest?

A: The payment which would have gone to the landlord will be withheld, but the tenant may receive his payment and be eligible for price support on his share of the crop.

Q: If a producer elects to divert more than the minimum of 20% must the extra cut be a full

20%.

A: No. Q: What is the farm quantity limitation on the corn and grain sorghum support under this program?

A: The quantity limitation for the complying farm will be determined by multiplying the 1961 performance acreage for corn or grain sorghum by the normal yield established for the farms.

Q: Will 1961 planting be taken into consideration in setting bases under future programs?

A: The Department will strongly recommend that non-cooperators will not benefit from staying out of the 1961 program.

Q: Will a producer be permitted to destroy excess acres of corn or grain sorghum?

A: Yes, but he must do so within the time permitted and pay for the second performance check.

Q: If a producer is in compliance on his diversion from corn and grain sorghum but is short on his soil conserving total because of overplanting of crops other than corn and sorghum may he adjust to meet the conserving acreage requirements?

A: Yes, but he must be able to meet the conserving acreage requirements in his county and pay for a second performance check.

Q: What if a producer wants to cut more than 40% of his base?

A: Payment is possible for the diversion of an acreage in excess of 40% only on a farm with a base of less than 100 acres.

Q: If a producer has 5,000 bushels in his storage structure but is eligible for support only on 4,000 bushels, will he be allowed a partial release so that he may feed the excess above 4,000 bushels?

A: Yes - as under existing procedures.

Q: Will there be a sign-up deadline?

A: Yes, as established by the State Committee, May 31.

Q: What is the maximum acreage that may be diverted from a base of less than 100 acres?

A: If base is 25 acres or less he may divert all of it. If the base is between 25 and 100 he may divert 20 acres plus 20% of base.

Q: Does popcorn qualify for inclusion in the corn-sorghum base?

A: No. Q: On farms with both corn and grain sorghum in the base, will farmer be permitted to make a choice between the two in adjusting his acreage?

A: Yes, all that is required is that he make the minimum reduction for his farm. Individual bases will be established for each crop for purposes of computing payments. Payment will be made on the crop actually diverted.

Q: May diverted acres be pastured this spring?

A: Pasturing is permitted on diverted acres until the application closing date set by State Committee, May 31, but condition of cover must meet program requirements thereafter.

Q: What are the compliance requirements to get supports on oilseed crops?

In Washington On Farm Bill

W. L. "Preach" Edelman of Friona represented Plains Cotton Growers at a meeting in Washington last week. The organization endorsed--along with the Grain Sorghum Producers Association--the Agricultural Act of 1961.

This bill was introduced this week by Sen. Allen Ellender and Rep. Harold Cooley. It is "the administration's" farm program legislation.

The essentials of the bill provide: Commodity-by-commodity approach to farm problems;

Direct farmer participation in program development; and A referendum choice by producers.

A: Compliance with feed grain program is not condition of eligibility for price support on soybeans or other oilseed crops. However, eligibility requirements have been established for price support on soybeans in 1961.

Q: How will the compliance requirements apply to the four crops of safflower, sunflower, castor beans and sesame?

A: May be planted on diverted acres but the producer foregoes diversion payment on the acreage so used.

Q: Can 1962 wheat be planted on the diverted acres in the fall of 1961?

A: Yes - if conservation use requirements are met.

Q: Must diverted acreage be devoted to a single approved conservation use throughout the entire 1961 cropping season?

A: More than one approved conservation use may be used on the same acreage. For example, a green manure crop may be turned under in the spring of 1961 and followed by another approved conservation use such as summer or fall seeded cover. Also, land on which it is impracticable to establish cover before the fall of 1961 may be protected by volunteer cover in the spring and summer of 1961.

Q: Will detailed specifications be prescribed for use in carrying out approved conservation uses?

A: No. Farmers will be encouraged (but will not be required) to apply approved conservation uses in accordance with accepted standards (such as ACP specifications for similar practices). The acceptability of the approved conservation use will be determined on the basis of the adequacy of the protection of the land.

Q: What use may be made of small grain crops which are to be considered as approved conservation uses in 1961?

A: Same as any other crop not included under this program.

Q: Does division of crop eligibility for price support have to be same as division of payment for diverted acres?

A: Generally, yes.

Q: How will small acreages of corn for roasting ears be treated?

A: Where a few rows of corn are grown in a home garden solely for home consumption, it will not be necessary to consider this corn planting in determining compliance with the farm feed grain permitted acreage. This is not true, however, in those instances where corn is grown on small acreages for marketing or feeding.

Q: Where a few rows of corn are grown in a home garden solely for home consumption, it will not be necessary to consider this corn planting in determining compliance with the farm feed grain permitted acreage. This is not true, however, in those instances where corn is grown on small acreages for marketing or feeding.

Q: May small grain fall-seeded on diverted acres for 1962 harvest be grazed in 1961?

A: Normal Conserving Acreage - Small grains seeded alone and harvested for grain, hay or silage will not qualify as normal conserving acreage. An acreage of small grain seeded as a nurse crop with a grass or legume and cut green for hay by a date established for the area by the state committee may be considered as normal conserving acreage.

Q: May small grain fall-seeded on diverted acres for 1962 harvest be grazed in 1961?

A: Normal Conserving Acreage - Small grains seeded alone and harvested for grain, hay or silage will not qualify as normal conserving acreage. An acreage of small grain seeded as a nurse crop with a grass or legume and cut green for hay by a date established for the area by the state committee may be considered as normal conserving acreage.

Q: May small grain fall-seeded on diverted acres for 1962 harvest be grazed in 1961?

A: Normal Conserving Acreage - Small grains seeded alone and harvested for grain, hay or silage will not qualify as normal conserving acreage. An acreage of small grain seeded as a nurse crop with a grass or legume and cut green for hay by a date established for the area by the state committee may be considered as normal conserving acreage.

M. T. "Mose" Glasscock is shown here planting cotton on his place just south of Farwell last Friday. He and several other area farmers were scheduled to start planting Thursday, but due to high winds postponed planting until the next day.

Gas Users Elect Directors May 5

The new Parmer County Irrigation Gas Users Association will elect a board of directors by mail, and ballots have been sent out over the county. Ballots must be returned by May 5 according to Bruce Parr, president of the group.

Nominees include: Precinct No. 1--Hap Fairchild and Ellis Tatum. Precinct No. 2--M. H. Carson and Jim Ware. Precinct No. 3--Leon

Grissom and Vernon Symcox. Precinct No. 4--Fred Burch and Artie Beavers. One man from each precinct will be elected to the board. Write-ins will be accepted. Only persons who pay association dues will be eligible to vote. Dues are set at \$2 per irrigation well per year. The purpose of the organization is "to obtain fuel for irrigation at the lowest possible price," says Parr.

Boys Sought For Baseball

"Any boy born after Sept. 1, 1945 and prior to Sept. 1, 1948 is eligible to play Babe Ruth League Baseball at Muleshoe this summer, regardless of race, creed or culture," according to Karl L. Lovelady, Muleshoe attorney and one of the organizers of Muleshoe's summer baseball program.

Boys interested in playing on one of the Muleshoe teams should contact Lovelady's office for application blanks.

Lovelady asks that boys who wish to play pick up the applications as soon as possible and have them signed and returned. The league will award trophies for most home runs, highest batting average, best pitching average and best all around sport.

Pat Boone Will Sing And Speak At LCC

Pat Boone, popular singer, film star, and author will speak and sing of America at a patriotic rally sponsored by Lubbock Christian College, Monday, May 1, at 8:00 p.m. in the Lubbock Municipal Coliseum. No admission charge will be made and no collections will be taken, according to Dr. F. W. Mattox, LCC President.

The program will begin with a concert by the LCC "Royal Blue" Band under the direction of E. Joe Lee. Boone will then appear with the LCC Cappella Chorus, directed by B. Wayne Hinds.

Pat Boone first achieved recognition through his records while a student at North Texas State College. Later, he appeared as a regular performer on the Arthur Godfrey show while completing his bachelor's degree at Columbia University, where he was graduated magna cum laude.

Boone, who had his own television show for a season, has been starred in five films: "Bernadine," "April Love," "Mardi Gras," "Journey to the Center of the Earth," and "All Hands on Deck."

The general public is invited to attend Pat Boone's Lubbock concert, said LCC President F. W. Mattox. "Young people of the area have a special invitation to attend this meeting designed to increase our appreciation for our country," he added.

MISS LINDA JOY LACKEY OF FOREST, MISSISSIPPI IS THE 1961 MAID OF COTTON.

Attend Funeral

Mr. and Mrs. Charles Balmum, of Friona; Mrs. Lela Balmum of Clovis, and M. A. Bartlett of Friona attended the funeral of Newt Bartlett in Gainesville Saturday.

The deceased was Mrs. Balmum's uncle and Bartlett's brother. After the funeral, the Balmums visited in Fort Worth with Mrs. Leo Cornelius. They returned home Sunday.

Farm Storage Loan Program Modified

Secretary of Agriculture Orville L. Freeman has taken action to modify down-payment provisions of the farm storage facility loan program, reports the USDA. Purpose of the measure, which the President called for in his message to Congress on farm program proposals, is to encourage storage of grain on farms and strengthen economic activity in farming areas.

Wilson Is Elected To Halfway Board

All officers and executive committees of the High Plains Research Foundation were re-elected at the meeting of the board of trustees in Plainview on March 15.

New members elected to the board were: Orville Nash, Guyton, Oklahoma; A. W. Lott, Lorenzo; Claude Fargason, Halfway; Lane Decker, Floyd; Jack Wicker, Littlefield; Robert Wilson, Dockett; and Alan Alexander, Homer Garrison, Harry Igo, and Joe Don Scott, all of Plainview.

Matters of business conducted by the board included the acceptance of the auditor's report for 1961, setting the annual field day for September 20, and budget adjustments.

able farmers to borrow up to 95 percent of the outlay for farm storage facilities which cost 40 cents per bushel or less to build. Previously, loans on these types of structures were limited to 80 percent of the cost.

For facilities costing more than 40 cents per bushel, farmers may borrow up to 40 cents per bushel or 80 percent of the cost whichever is greater, but not more than 50 cents per bushel of capacity.

These loans are made at 4 percent interest and run for five years from the time the loan is taken out. They may be repaid in four annual installments, with the

first anniversary of the loan. Since the program started in 1949, 135,991 loans totaling approximately \$149,196,000 have been made for storage facilities with a total capacity of about \$46,380,000 bushels. Loans outstanding at the end of January amounted to \$43,799,000, with \$105,399,000 loaned to farmers having been repaid.

According to the USDA, approximately \$40 million will be spent by farmers for storage facilities under the broadened program. This will give added stimulus to the general economy because of the increased demand for steel, wood and other building materials.

NEWS FROM THE FARM BUREAU

BY RAYMOND EULER

HB 59, exempting farm trailers and semi-trailers up to a gross weight of 12,000 pounds from registration and brake requirements when not used for hire, was passed in Austin as follows: House vote, 121 for and 16 against; Senate vote, 28 for and 1 against. The governor, however, vetoed the bill. We feel that you will want to write the governor, expressing disapproval of his veto of the bill. Also write your Senator Andy Rogers and Representative Jess Osborn, urging them to work for a trailer weight bill, or to vote to override the governor's veto if the need arises. Do it now.

Congressman Paul Findley made the following statement in the Congressional Record dated April 19, 1961: "The corn market for the past two weeks confirmed my fears that the bill would drive market prices down. The market is down about 15 cents a bushel, and with about 500 million bushels of 1960 still unmarketed, that means an income loss of about \$75,000,000." The statement was made with reference to the new feed grain program recently passed by Congress.

We need to revise a statement made in this column with reference to the Farm Bureau Crop Adjustment Program two weeks ago. We stated that Farm Bureau had been unsuccessful in getting the program passed although seven congressmen sponsored the bill. It is true that it was not passed in time to cover this year's feed grain operations.

However, the bill was just recently introduced to the House by eleven prominent members and is pending before the House Agricultural Committee. It is still possible that this program may become effective with the 1962 farming program.

It is designed to give more freedom of individual farm operation while reducing output of both feed grains and wheat and maintaining profitable income for farmers while doing so.

Farm Bureau Directors will hold their regular monthly meeting Monday night, May 1. As usual, you are welcome to sit in on these meetings.

Consider this: "Hear thou, my son, and be wise, and guide thine heart in the way. Be not among winebibbers, among riotous eaters of flesh; for the drunkard and the glutton shall come to poverty; and drowsiness shall clothe a man with rags." Proverbs 23:19-21.

with the cooperation of the county agent, Joe Jones in an effort to eradicate bindweed, which then was just beginning to show up as a threat to many acres of land in the area. Since then, each year the committee begins operations to continue the eradication program, and has enjoyed the cooperation of practically everyone in the program. The committee believes it had done, and is doing a good job in leading the bindweed eradication program.

J. T. Jones is chairman, Jack Patterson vice chairman and Calvin Meissner secretary. Members of the committee are, E. C. Schilling, Joe Jesko and J. B. Young. Associate members are the county agent, ASC mgr. all vocational agricultural instructors, SCS representatives and others.

When I say I'm not going to argue, what I really mean is that I won't listen any more after I've said what I'm going to.

New Castorbean Variety Released

A new improved castorbean adapted for production in irrigated areas such as the High Plains of Texas, Oklahoma, Kansas, and New Mexico has been released cooperatively by the U.S. Department of Agriculture and the Texas Agricultural Experiment Station.

The new variety is named Hale and is a dwarf-internode which yields well and has potential as a male parent in hybrid combinations because its hybrid offspring also yielded well. Hale is resistant to bacterial leaf spot and Alternaria leaf spot.

A limited amount of Hale seed is available to seed producers for planting this year but seed for farmers will not be available until 1962.

Hale has a better root system than many other castorbean varieties. However, if it is grown under conditions of too much nitrogen and excessive soil moisture, its stems tend to be weak. Weak stems, coupled with heavy fruit set and high winds before harvest, can cause lodging.

Hale matures about one week later than Baker-296, the leading commercial variety on the High Plains, and about one week earlier than Dawn, a 1957 release. Hale produced as much as 2,325 pounds of beans per acre in 1960 on the farm trials on the High Plains of Texas.

In experimental plots in the same area, Hale averaged 2,479 pounds per acre, compared with 2,057 pounds per acre for Baker-296 and 2,189 for Dawn.

Plants are well adapted to mechanical harvesting because the first fruiting spike is well above ground level and fruiting branches are erect. Seed capsules of Hale are non-shattering and are easily removed from the dry plants after frost by mechanical harvesters.

Seed weight, size, and quality

are acceptable for planting and for crushing. Seed hulling and cleaning are easy, and nearly all foreign material separates from the seed. Oil content averages 51 percent, one or two percent more than in available dwarf-internode varieties.

Hale has performed well in irrigation tests in the Southern Great Plains region of Texas, Oklahoma, Kansas, and New Mexico. It has shown drought tolerance but is not generally recommended for dryland planting because satisfactory yields cannot be obtained consistently. And because of possible mold damage to the seed capsules, it is not recommended for areas of high rainfall.

"Split" Fertilizer Test Good For Castorbeans

The castor bean fertilizer tests at the High Plains Research Foundation in 1960 disclosed that a split application of 150 pounds of nitrogen produced the most profitable yield.

The split application consisted of 100 pounds of nitrogen in a preplant application on May 19 and 50 pounds of nitrogen applied on July 27, just prior to the first irrigation. The yield from the split application was 2,080 pounds of seed per acre.

This was 537 pounds above the yield of the unfertilized plot. The net return from the split application method was \$17.09 above the unfertilized castor bean. The side-dressing of the 50 pounds of liquid fertilizer was made with the applicator chisels spaced 10 inches from the row and injected into the soil surface about 1 inch deep to avoid root damage.

This method of application, along with flame cultivation to

1960 Texas Cotton Crop Hit Hard By Diseases

Diseases took an estimated \$156 million bite out of the 1960 Texas cotton crop, according to reports from 15 cotton specialists located throughout the state.

An estimated 1,116,000 bales never got to market because of diseases, said Harlan Smith, extension plant pathologist, who compiled the report for the Cotton Disease Council.

In addition to the loss to producers, businesses related to the cotton industry also suffered. Diseases were also a major factor in grade reduction and lower yields, Smith said. In many instances, the weather, soil, planting seed or ginner got the blame for the low production and poor quality when the real culprit was plant diseases, explained Smith.

The major diseases and the estimated losses caused by each were bacterial blight, 5.64 percent; root rot, 5.22 percent; seedling disease, 2.68 percent; Pseudomonas wilt, 2.1 percent; root knot, 2.04 percent; Verticillium wilt, 2.03 percent and boll rots, 63 percent. Other diseases, listed by Smith, as causing losses were Fusarium wilt and Ascochyta blight. Texas ranked second among cotton producing states in percentage loss, over 21 percent, Smith said.

Average figures don't give the true picture, the pathologist said, because in the areas where diseases struck hardest losses ran into ruinous figures. Root rot, for example, caused an estimated 30 percent loss in the Central Blacklands and increased in many areas over the 1959 losses. Bacterial blight continues to be the most important disease though it does not kill plants, Smith said.

The pathologist advised cotton growers to carefully check their fields in 1961 for disease damage. He said it is necessary to know the diseases present in order to plan a preventive program for future years.

on July 29, August 26, and September 6. Only 0.35 inches of rain was received between July 29 and August 26 irrigations. The moisture stress in this period undoubtedly limited production on the entire test. Rain-fall from May 1 to November 1 amounted to 31.05 inches with 17.64 inches falling in June and July.

All tests were planted May 20 and harvested December 2, 1960, Mr. Langford reported.

Character is nurtured amid the tempests of the world.--Goethe

WITH THE COUNTY AGENT

JOE JONES

Soil temperatures are warming up just a little ahead of schedule this year. Planting temperatures have been reached all over the South Plains. The average date for the 10 day 50 degree average at Lubbock is May 3. Better keep those thermometers in the soil to an 5 inch depth and take the reading at 8:00 A. M. each morning and know when the 10 day 50 degrees average is reached on your soil.

Cold soils delay germination and result in weakened plants more susceptible to seedling diseases. Early cotton usually results in more bales of good grade cotton. With this in mind let the soil temperature and seed quality be your guide to planting and not the calendar. Keep in mind good vigorous seed is a must when planting under adverse conditions. Poor seed just will not have the push to get the job done. With this in mind you not only need to know the soil temperature, but you better know your seed quality.

Some of our seed may be weak enough we need 65 degree average soil instead of the 50 degree average.

You don't want bindweed on your farm do you? If you do you are an exception. Yet lack of interest in controlling this perennial noxious weed is contributing to its spread. Traveling through the south side of the county last week I saw a lot of infestations on land that should be controlled, but nothing is being done it seems. It is high time we all wake up to what this weed can do and get on some program to eradicate it from all lands in the county whether they be city, state, or privately owned land.

We have had good cooperation from the State Highway Dept., Railroads, Commissioners Court, A.S.C. Committee, and all the city commissioners who have been ask to cooperate.

It is high time we wake up to this need and all go to work at the job of eradication.

More interest is shown each year in narrow row seeding of grain sorghum. Some of you plan to seed two rows to the lister ridge while others are going to use 28 to 30 inch rows. Yields should be increased with either row spacing, but you must remember to keep the seeding rate at or near the same level used under one row. The better plant spacing is what gives this advantage and increased seeding rates tend to cut down on this potential advantage.

Weed Committee Plans Activities

The Farm Bureau Weed Committee met Monday night in the office in Friona. Plans were made for the 1961 bindweed control program involving public roads, individual farms and railroad right of ways.

It was reported that county commissioners will cooperate in the control of the weeds on county road right of ways as in the past. The highway department also will continue sterilization of as many plots of the weeds as it is possible for them to get to, as they have in years past.

The next meeting will be held Monday night, May 29, in the Friona State Bank Community Room. Invited and urged to attend this meeting will be all county commissioners, State Highway maintenance representatives, Santa Fe Railroad engineers, city commissioners and newspaper and radio representatives. It is hoped that a concentrated program can be gotten under way within the county so that plots of bindweed can be destroyed in their infancy.

The weed committee was organized by Farmer County Farm Bureau Directors in 1954

FOOTSAVING EDUCATION

By James E. Edwards

Do Tennis Shoes Cause Flat Feet?

No. Thinking of shoes of any kind causing flat feet is as backward as treating tuberculosis by shutting the patient up in a dark airless room. All feet are weak at first and whether they strengthen or not depends upon the exercise of good foot function.

Probably the world's worst record of foot health was compiled by selectees for military service in World War I. These young men had not worn tennis shoes because they were not popular yet and because their parents were so sure that children must wear stiff shoes to "strengthen their ankles."

When tennis shoes did become popular among the children they were blamed for causing flat feet. The feet were flat before but stiff shoes concealed the condition. Blaming tennis shoes for causing the trouble is as wrong as attributing baldness to the removal of a hat.

Faster, Cleaner Start for Your Crops with a WINPOWER ROTARY CULTIVATOR

Model NV-4 — 15' wide 4 flexible sections

CROSS-CUT ACTION KNOCKS OUT WEEDS

Better Cultivation Pays Off in Yields

The WINPOWER Rotary Cultivator is the best insurance toward a bigger, safer harvest. The flexible sections, with off-set, cross-cut action knocks out weeds, breaks up crust and clods, and saves the moisture for growing crops.

End sections fold up. Coupling is adjustable for close turns. Hitches can be reversed for transport and crush breaking only. Construction is rugged for years of trouble-free service.

Come in and see for yourself how this WINPOWER Rotary Cultivator will make money for you. It's the cultivating tool that gives your crops a faster, cleaner start to the biggest yields ever.

Farm Fish Ponds Need Sound Fertilizer Plan

Applying fertilizer to the farm fish pond not only increases the amount of food in the water but also is one of the best practices for controlling submerged mosses in the pond, advises Joe Jones, Farmer county agent.

The first application of fertilizer should be made early in spring, he says. Since the pond water is usually deficient in the same nutrients as the soil over which the water flows into the pond or tank, Jones suggests the use of the same commercial mixture as is used for crops on the farm. An initial application of 100 pounds for each surface acre of water is suggested. This amount should cause a change in the color of the water. This is due to the development of a great amount of plankton which is used for food by the fish and organisms upon which fish feed. Bloom is another term used to describe the water in a properly fertilized pond.

Jones advises periodic checks of the pond to determine when additional fertilizer applications are needed. He says to submerge the arm into the water to elbow depth and if the thumb can be plainly seen, more fertilizer should be applied. Only the amount required to get the desired bloom should be applied and this may be about half of the first application.

Pond fertilization should be stopped during the hot summer months. The fertilizer can cause a shortage of oxygen in the water, especially during the periods when the wind is not strong enough to cause wave action. Fish will die when their

oxygen supply is depleted. Finally, Jones emphasizes that all of the fertilizer to be used during the year should not be applied at one time. Start in spring and make enough applications to maintain the desired bloom. The fertilizer from the bloom will also control submerged mosses and make fishing and swimming in the pond a pleasure.
