

"Anyone who thinks for one minute that he can understand the ways of a woman has it timed just about right."

... Unknown
Looks as if there is a drive underway to turn Friona into a Tulip paradise.

One of the little items left in the office this week began with the question, "Have you ever noticed the array of color that the first spring flowers bring?"

Sure, I have noticed the flowers and admire them, but I haven't seen too many tulips. The next question was, "Would you like to help make Friona 'Tulip Town'?" Immediately, the question of why tulips leaped into my mind. I found the answer in the next line. The Modern Study Club is undertaking a project to beautify the town and is selling tulip bulbs in the process.

The item stated that the bulbs were being shipped from Holland and were guaranteed to bloom. The order is supposed to be in by June 29 so anyone wanting the bulbs should contact Mrs. Guy Latta or Mrs. Ralph Wilson.

It was reported that the club plans to conduct a flower show and tour of the city when the plants are in full bloom. The Chamber of Commerce is also supposed to be cooperating and helping with the project.

Who knows, it might be something to see—a town full of Tulips.

-TH-

I thought I would be able to enjoy a quiet evening at home Tuesday but I was mistaken. At approximately 9 p. m., the quiet of the evening was shattered by the screeching of tires and tinkling of broken glass.

At first, I thought someone had had the misfortune of smashing their auto at the intersection a few blocks from the house, but on investigation, I found that a car and truck had collided about seven blocks from home. The sound sure traveled. It sounded like it was just around the corner.

The story and pictures of wreck will be in this issue (I think). The car knocked the rear wheels from under the truck and spilled the wheat across the yard at the corner of the intersection.

Looks like it would have taken quite a blow to take the wheels from under the truck.

-TH-

I have it from reliable sources that Merchants Motor Freight has purchased the Hub Motor Freight lines.

For the past few months, Friona has been without any dependable freight service, although Lang and Hub have been franchised for the area. Neither of the companies have seen fit to operate a local station where businessmen might be able to check on the schedule or whereabouts of freight without making a long distance phone call.

We have been without local pickup and delivery service. I hope that Merchants, a state wide firm with headquarters in Abilene will see fit to remedy the situation.

After all, a growing community needs transportation facilities to stimulate the growth. At present, most of the freight is coming by bus, but if local freight service were offered, a good portion of the merchandise would arrive via this method.

Along the same line, the Amarillo Globe News is asking for a common carrier franchise for this area so that they can send out their papers in the morning and carry freight back to Amarillo. It might even work both ways if it were approved.

I believe that the establishment of a local pickup and delivery freight service and office would be advantageous to both the city and the freight company.

Leeway (succeeded by Hub) Lang and Hub have all had local terminals in the past but all abandoned them for some reason. I hope that the change in ownership of the Hub line will mean that we again have this service.

Car-Truck Collision Leaves One Hospitalized

Court Sets Tax Rate For County

The Parmer County Commissioners' Court, sitting as a board of equalization in their meeting Monday set the tax rate for the county at \$1.25 per \$100 valuation. The tax table below explains individual assessments.

The commissioners accepted a bid from West Texas Equipment Company for a new Number 14 Motor Grader, in the amount of \$23,995, F.O.B., Parmer County. The grader is to be paid for out of Precinct 2 funds.

A bid from Bovina Implement Company was accepted for the purchase of an M-50 tractor, in the amount of \$2,589. The clerk was authorized to issue a warrant for the amount out of the Farm to Market Road and Bridge Fund for Precinct 2.

Minutes of the last meeting were read and approved, and all bills and warrants were approved for payment.

The tax table follows:

LAND
Class 1 -- \$10 per acre
Class 2 -- \$9 per acre
Class 3 -- \$8 per acre
Class 4 -- \$7 per acre

Class 5 -- \$6 per acre
Class 6 -- \$5 per acre
Class 7 -- \$4 per acre

COTTON GINS
No. 1 -- \$17,500
No. 2 -- \$14,000
No. 3 -- \$10,000

FARM IMPROVEMENTS

No. 1 -- \$25,000-\$30,000
No. 2 -- \$20,000-\$25,000
No. 3 -- \$15,000-\$20,000
No. 4 -- \$10,000-\$15,000
No. 5 -- \$5,000-\$10,000
No. 6 -- \$2,500-\$5,000
No. 7 -- \$2,500 and less.

Pool Tables \$100, each
Cattle -- \$30, per head
Horses -- \$20, per head
Hogs -- \$15, per head
Sheep -- \$5.00 per head

Autos, pickups, tractors and combines:

1962 model--\$450,
1961 model--\$450,
1960 model--\$400,
1959 model--\$350,
1958 model--\$300,
1957 model--\$250,
1956 model--\$200,
1955 model--\$180,
1954 model--\$160,
1953 model--\$140,
1952 model--\$120,
1951 model--\$100.

HARVEST THREAT. . .Wheat farmers in the area are keeping an anxious eye skyward recent days and nights, as storm clouds threaten to cheat them out of the harvest of their crops, with harvest time now here. Weather has been a

hindrance to getting the grain cut in many instances, leaving it too wet. Farmers don't mind the delay -- if the hail stays away.

Only Two Unbeaten In Friona Baseball

The list of unbeaten teams in Friona's summer baseball program was shaved to just two last week, according to Vernon Scott, program director.

Friona State Bank, which had been undefeated in the Intermediate League, dropped a 14-12 game to Reeve Chevrolet, but still held on to its league

lead. Ed Wood was the winning pitcher for Reeve.

Other Intermediate League results found Reeve Chevrolet continue to make it rough on the leaders, edging McCaslin Lumber behind Jay Potts, 6-5, and keeping the Lumbermen from tying for the lead. Reeve had been winless going into last week.

Larry Graves pitched Brookfield Drilling to a 13-4 win over Star-Hurst, and the latter team suffered its fourth loss when Friona Drilling and Pump scored a 6-3 win behind Dan Carthel.

Parmer County Implement continued to lead the Pony League with a 3-0 record, as runnerup Hub Grain split a pair of games. Chester-Fleming edged Hub Grain, 14-12 behind Jackie Stowers, but the latter team scored a 9-5 win over Herring Implement, as Eugene Weatherly got the win.

(Continued on page 3)

Lion Meeting Features Film

W. T. Aaron of Southwestern Public Service Company in Amarillo will be the featured speaker for the Friona Lions Club Thursday night at 8 o'clock.

Aaron will show a film entitled "Twelve Steps to the Federalization of the Electric Industry."

Board Appoints Equalization Group

The Friona School Board named three men to a board of equalization at its regular monthly meeting Monday night. The board re-elected Clyde Goodwine, Wright Williams and James P. Fortenberry to the board. The same trio composed the board of equalization last year.

The group tentatively set Saturday, July 28 as the day it will meet to hear questions or complaints from school taxpayers. Dan Ethridge, school tax collector, reported that a total of \$755.89 in delinquent taxes was collected during the month of May. Delinquent taxes remaining as of June 1 stood at \$5,205, Ethridge reported.

In other business, the board approved the hiring of Mrs. Lois Miller of Dawn as a fourth-grade teacher. Notification was given that Bob Coleman, former high school teacher, has re-

signed to take a position at Muleshoe High School as freshman coach.

Superintendent of Schools Alton Farr gave a progress report on the new athletic field house. About all that remains to be done is painting and the installation of toilet fixtures, Farr told the group.

The board passed a resolution agreeing to assist teachers in the purchase of optional non-taxable annuities, under the "Sheltered Annuity Plan."

The group was advised of a possible termite problem developing in the junior high building, although nothing ser-

ious has developed as yet. Superintendent Farr said that he would continue to check into the matter.

Otherwise, the board heard Farr's reports on the Cafeteria Fund, Activity Fund, Transportation Fund and the School Budget. Regular monthly bills were approved and paid.

Present for the meeting in addition to Farr and Ethridge were board members D. C. Herring, Cordie Potts, Clyde Weatherley, W. M. Massie, Ellis Tatum, and Glynn D. Hughes.

Signup Monday

Enrollment will be Monday from 8 a. m. to noon for swimming lessons for beginners and advanced beginners at Dineen Swimming Pool. The fee will be \$9.50 for three weeks. Private lessons will also be offered for pre-school children. Instructor is Janice Miller.

Scout "Race"

A Cub Scout pack meeting will be held Saturday at 6:30 p. m. at the club house. A covered dish supper will be served.

Mrs. Doyle Cummings, den mother, urges all scouts to be on time, as the Pine Wood Derby race will begin at 7 p. m.

Salk Begins Campaign

A campaign to help finance the \$15 million Salk Institute Building at San Diego, Calif., is beginning this week in Parmer County, announces Joe W. Jones, county chairman of the National Foundation.

County campaign director Hugh Moseley says that the drive for funds to help in construction of the building will be done by mail. Each family in the county will receive a letter telling about the institute and its purposes. Persons are asked to return whatever amount they wish to donate to Moseley. He says that the mailers will be sent sometime next week.

The city of San Diego has donated the land for the institute which will provide facilities in which many of the world's most eminent scientists will study the elemental processes of life.

Dr. Jonas Salk, who has worked many years toward the elimination of polio, will be director of the institute which is scheduled to open in 1963.

The county chairman stresses the fact that this project is separate and apart from the March of Dimes and that the scientists who will work at the institute will be trying to make fundamental discoveries that will provide the keys to many unsolved disease problems.

The local campaign will end June 30, says Moseley.

Bernie Deaton, 15-year-old son of Mr. and Mrs. Everett Deaton, 503 Ashland, was in fair condition today at Parmer County Community Hospital, following a car-truck collision in which he was involved Tuesday night.

Deaton's 1957 model Chevrolet collided with a truck loaded with wheat, driven by Mrs. H. G. Houston, who resides three and one-half miles southeast of Friona. The impact was such that the rear wheels of the truck were knocked completely out from under it, and much of the grain it carried was spilled on the street corner.

The accident occurred about 9 p. m. Tuesday at the intersection of Sixth Street and Woodland Avenue.

The Chevrolet driven by Deaton was practically a total loss, the front end being blunted by the impact.

Deaton sustained no broken bones, according to Dr. Lee Spring at Parmer County Community Hospital, although he had a chest injury and a cut over one eye.

Mrs. Houston, and her five-year-old daughter, Debra Kay, who was with her in the truck, were unharmed. They were examined at the hospital Tuesday night, and released.

The truck was loaded with approximately 10,000 pounds of wheat. Mrs. Houston had driven the loaded truck to Friona from 16 miles north of town, where her father, J. L. Stowers, was harvesting wheat. The truck belonged to Stowers.

She was travelling south on Woodland, and stated that she had stopped at the "yield" sign and thought it was safe to cross Sixth.

Deaton was returning home for supper after getting off work at Carson's "66" Service Station. He was driving west on Sixth Street when the accident happened.

There was a good deal of concern over Deaton's condition due to the extent of the damage to his car, but it appeared Wednesday that he came out of the accident better than it was first thought he might.

"He was able to sit up and talk to us this morning, but he's still pretty sore from the impact," said Deaton's father Wednesday.

The crash was heard by a good many city residents, some several blocks from the scene. Ralph Smith, who lives just a block north of where the accident happened, said "It sounded like a couple of box cars jamming together."

Farwell Has A Friona Telephone

Did you know that there is a Friona telephone in Farwell?

Well, there is, and it belongs to Aldridge and Aldridge Insurance, placed there for the benefit of their customers.

"The service saves the client more than it does us, but that was the whole point in installing it," says Mary Lee Crume, secretary at the company.

The special line enables the Aldridge company to call anyone in Friona, or in Hub or Parmer exchanges, just as if they were in Friona. And, conversely, anyone in Friona or on the two exchanges may call the Farwell office, without charge, toll or otherwise.

"We installed the line more or less on a trial basis, and have had it for over a year and a half, so it looks like it's here to stay," says Mrs. Crume.

WRECK SCENE. . .Force of impact in the car-truck accident Tuesday night is seen in fact that the back wheels of the truck driven by Mrs. H. G. Houston were knocked out

from under the bed. The drive shaft of the truck can be seen in the front foreground. The 1957 Chevrolet driven by Bernie Deaton was demolished, as can be seen.

Co-op Gin Elects Slate Of Permanent Directors

A total of 34 persons were present for a meeting of the Farmers' Co-op Gin stockholders last Thursday at the Friona High School Cafeteria, at which a permanent board of directors was elected.

The men who had served on the temporary or "organizing" board were elected as permanent board members. They include A. W. Anthony, Jr., Keith Brock, Ellis Tatum, D. L. Carmichael, Charles Howell, R. J. Renner, Jr. and Raymond Schueler.

Each of the 34 men present purchased one share of common stock, becoming charter stockholders.

By-laws were read and approved. Tatum, who presided at the meeting, announced the financing of the gin with Continental Gin Co.

Plans call for Continental Gin to deliver a "turn-key" job, including three high-capacity gin stands, capable of handling up to 12 bales per hour. Continental will furnish the gin building, office building, bale scales and truck scales.

The next order of business for the gin is the hiring of a manager and gin superintendent. Several have applied, and others interested are urged to contact any member of the board.

The manager is expected to be picked soon, so he can supervise construction on the gin, expected to start July 1, and be completed by September 15, in plenty of time for next fall's cotton crop.

The gin is to be located two and one-half miles south of the city on the east side of state

highway 214. It will cover a 40-acre tract, with 660 feet of frontage on the highway.

Stock in the gin is available, and the fund-raising teams lack just about \$10,000 having raised their minimum goal of \$70,000, but plans are progressing according to schedule.

First preferred stock is being sold at \$100 per share, at eight per cent accumulative interest.

Board members met Tuesday morning with Continental representatives at the gin site, and began laying groundwork for the location of buildings.

Members of the board have worked since January on the project, visiting a half-dozen gin companies and 10 potential sites, as well as checking thoroughly into the matter from all angles.

Editorial:

ONWARD AND UPWARD

Now, at last, we know where that New Frontier is! For a time, we thought it might be connected with "the battle for men's minds." Then, it seemed as if it must be in outer space. But now we know, it's a New Frontier of Economics. Treasury Secretary Dillon, who should know more about economics than practically anybody, tipped us off in his recent speech to the Financial Writers Association in New York in promising "a top to bottom reduction in the rates of income tax." That this event would be triggered by a tax overhaul bill to be sent to Congress next January was confirmed by the President at his subsequent press conference. Washington insiders have revealed in their oblique way that Mr. Dillon had been reluctant to make this revelation, but had it scared out of him by the stock market plunge (which the President explained was a reaction to the end of inflation). By itself, a tax "readjustment" might not be too significant. But, with the announcement coming on the heels of Mr. Dillon's plea for a still higher ceiling for the national debt, the picture of the New Frontier of Plenty-without-Perspiration begins to come into focus. To make it possible for the Government to cut tax rates on shrinking incomes and continue spending more and more, all that is required is to raise the debt ceiling as needed. At \$308 billion, it is already too high for most of us to comprehend. And if you dig that, try to conceive of a trillion dollars, which former US Budget Director Maurice H. Stans estimates is what we really owe. This sum, \$1,000,000,000,000, is arrived at by adding to our formal National Debt the \$700 billion of future obligations for past services - items such as veterans' pensions, retirement pensions, payment for completion of public works projects, authorized military supplies and meeting Federal subsidy commitments. Such a figure being far beyond our mental capacity, who can worry about piling more billions on top of it? With tax reductions, there will be dancing in the streets. What else have we been waiting for? But why stop here? There have been tax reductions before - if you can remember that far back. The New Frontier must do better than that, and surely it will. Since all of us complain about having to work, the Government needs only to pay all of us for not working - instead of just some of us. That will be IT!

Macy's bargain basement is no match for Udall's, even on below-cost day. Udall's store, the Department of the Interior, is a little overstocked on electric power up in the Pacific Northwest's Bonneville Power Administration. In spite of his anxiety to get rid of the surplus inventory, the last thing Secretary Udall wants to do is to raise prices on his subsidized merchandise to a paying level. So he wants to spend a few hundred million dollars to build a big transmission line to sell the little bundle of surplus kilowatts in his Bonneville warehouse. A hand-picked task force looked over the area and declared the project feasible. If it is feasible (and that's a lot to swallow), it means that all the "preference customers" - non-profit municipal systems, public utility districts and electric co-ops - within reach of the proposed line will be entitled to get some of Bonneville's bargain power. And not just wholesale, either, it's below cost and mighty alluring to those preference types below and east of the Oregon border. This worried the present Bonneville customers in the Northwest. If they needed more power in the future, they feared, they might not be able to get it. If the new, outlying customers had equal claim on the cheap stuff, they'd hang onto it for dear life. So the Northwesterners put the whammy on Udall. To soothe his regular customers, the Interior Secretary quick rigged up some "protective legislation" which appears to say that no outside preference customers can have preference over existing Bonneville preference customers. (If anybody looked carefully they'd find some non-preference, profit-making private industries and utilities feeding at the Bonneville trough, too.) The "area preference" bill would make even those rascals more preferred than true-blue preference customers elsewhere. The bill is before the Interior Committees of both the House and Senate. The preference claimants of California, and the preference claimants of five states East of Washington and Oregon all want first crack at the cheap power. There'll be jostling, hair-pulling and umbrella jabs galore. Nope, Macy's never had it so good!

FLAME-CUTTING of metal parts has received a boost with a new automatic control system that guides multiple-torch machines electronically. The National Cylinder Gas system, called the X-Y coordinate drive, can translate a simple pencil drawing into as many finished parts as desired. The drawing can be used repeatedly since it is touched only by a beam of light from the control's photoelectric scanning system. Flame cutting is used when the metal plate is too heavy to be stamped or the number of parts to be made is too few to justify the expense of making a die.

A MOON LANDING by the U.S. might be possible as early as 1966, says Dr. John C. Houbold of the National Aeronautics and Space Administration (NASA). Dr. Houbold suggests a plan which he says will be easier to accomplish than the usual concept of shooting a spacecraft from the earth directly to the moon: A space vehicle would be placed in orbit around the moon and a small manned "lunar lander" would separate and descend to the moon's surface. Mission accomplished, the "lander" would rendezvous with the orbiting craft which would then return to earth. Some American experts feel this is the course being pursued by Russia.

GOODYEAR TIRE STORE

PLAY HERE TONIGHT

Work Sarts On Another New Business For City

Construction began this week on another new business for Friona. Ted Panciera of Hereford is to build a tire and supply house on Highway 60, just west of the Aztec Drive Inn. Panciera said that with the beginning of the dirt-moving process this week, the concrete crew was due to begin work the last of the week. "The establishment should be completed in five weeks. We hope to be in operation by August 1," said Panciera, who has been in the tire business 18 years. The name of the company is to be Panciera Tire and Supply Company of Friona. It will carry Goodyear tires, tubes, and batteries, and will feature a complete repair shop, including tire repairing. "We plan to give the best

on-the-farm tire service in the entire Plains area," said Panciera. The company will feature all new facilities as a further benefit to the public. Dave Allen is to be the local manager and co-owner. Employed by the Goodyear Tire and Rubber Company for six years, he has three years experience as a store manager. Allen is 30 years of age, married, and is a graduate of Oklahoma State University. Panciera, who was a Goodyear store manager for 10 years, plans to divide his time between his Hereford store and Friona.

Friona's Irrigation Belt League baseball team came up with one of its most impressive games last Sunday, downing Plainview, 11-3, behind the six-hit pitching of Darrell Read. Read, who struck out 17 Plainview batters, also led the team's hitting parade, with a home run, double and a single in four times at bat. Friona jumped off to a 1-0 lead in the first inning, when John Renner singled home a run. Read struck his homer with no one on in the second

frame. The home club wrapped the game up in the fourth with eight big runs. Read provided the big stick with a bases-loaded double that cleared the sacks. The ex-Bovina High School star had little trouble, setting the visitors down in order most of the way. The win brought Friona's season record to 5-6. The team dropped a 9-5 game at Tulsa last Wednesday night, as the winners scored four runs in the sixth and two in the eighth. Jimmy Collier was the loser, although he helped his cause by knocking a home run. Friona hosts Springlake Thursday (June 14) at 8 p.m. at Reeve Field. Following is the Friona box score for the Plainview game:

AB R H RB

Friona Scores Impressive Win Over Plainview Club

Doc Says Hypnotism Useful—With Caution

By JOHN BARNETT

United Press International
SAN FRANCISCO (UPI) — In the yellow pages of the telephone directory, you are likely to find an advertisement like this: "Hypnosis. All personal problems and undesirable habits. Weight control. Marital problems." Carefully, the practitioners

who place such ads avoid specific claims that their hypnotic ministrations can cure anything. But the intimation is there and it draws untold thousands into their "clinics," "foundations," "schools" and "centers." The results may well be beneficial. But, according to the California Medical Association, (CMA), they also may be disastrous.

Hypnosis has tremendous appeal. It seems almost magical in its effect on all sorts of problems from nail-biting to sexual maladjustment. Indeed, hypnosis has been popular for centuries as a sort of magic performed by entertainers who put subjects to sleep, make them stiff as boards or induce them to crow like roosters or bark like dogs.

Recognizing this appeal, the California medical association is campaigning to educate the public about what hypnosis can and cannot do. It wants laws to back up the known facts about hypnosis. These, the CMA says, amount to this: Hypnosis is an apparently useful tool, but one that should be handled with extreme care. It can be emotional dynamite.

Let's Go Fishin'
BY BOB BREWSTER
Outdoor Editor, Mercury Outboards

Farm Facts

According to the U. S. Department of Agriculture, an hour of farm labor produces four times as much food and fiber as it did 40 years ago. Productivity of farm workers increased by 61% a year during the 1950's—about three times the increased output in non-agricultural industry, which went up 2% per year. The average productivity per farm worker has more than doubled in the last 20 years. In fact, it has gone up more in the last two decades than in all recorded time prior to 1940. Crop production is 65% greater per acre than it was 40 years ago, and output per breeding animal is 88% higher. In 1910, it took a farmer 135 hours to produce 100 bushels of corn, 106 hours for 100 bushels of wheat, and 276 hours for a bale of cotton. In 1960, it took about 15 man-hours to produce 100 bushels of corn, 13 for 100 bushels of wheat, and 57 for a bale of cotton. "The reason more people are killed in auto accidents than in train wrecks is because the engineer never tries to hug the fireman."—Fred W. Grown, Edgewater (N.J.) Bergen Citizen.

NEW BUSINESS... Construction began this week on the Panciera Tire and Supply Company in Friona, across the street west of the new Aztec Drive Inn. The Goodyear tire and repair house is expected to be in operation by August 1.

Unbeaten--

Only one game was reported in the Pee Wee League. Ethridge-Spring Agency topped Friona Motors, 14-10, to move into second place. David Williams was the winning pitcher. Following are the standings, including games of Tuesday, June 12:

PEE WEE LEAGUE		
	W	L
Aztec Drive Inn	1	0
Ethridge-Spring Agency	2	1
Friona Motors	2	2
Farmer Co. Pump	1	1

PONY LEAGUE		
	W	L
Farmer Co. Imple.	3	0
Hub Grain Company	2	2
Chester-Fleming	1	2
Herring Implement	1	3

The time of the vernal equinox is past. Days are now longer than nights, and warmer, much warmer. It is the time when contractors start thinking of building, housewives start thinking of house cleaning, and fishermen start thinking of fishing. And, oddly enough, some of us concentrate on a fish that has spent the winter in waters in which other fish cannot live. Not only can he live in stagnant waters, polluted waters, and shallow muddy waters, but he tops this bit of legerdemain by being able to survive for several hours completely out of water, with no ill effects. I am speaking of the bullhead. This bosom pal of most fishermen, when in the bare feet and bent pin stage of their angling development, tends to be largely forgotten as they eventually pursue more "gamey" fish.

REWARDING
Which is a crying shame. Because a successful session of bullheading can be as rewarding an experience as there is in this phantasmagoria of fishing we call recreation. Not only is it fun to catch the big-headed little scrappers, but also they provide tip-top table fare when dipped in beaten eggs, or rolled in crushed cracker crumbs and fried in melted butter. Of course a block of soft pine would probably taste good when prepared like this!

Don't bother with small hooks and light lines when angling for bullheads. They don't care one way or another, and it's an odds-on bet more than one hook will be swallowed during an afternoon of fishing. Use large, strong hooks, cut the line when

one is swallowed, and remove the hook later when dressing out the fish. It's much simpler, and more humane. Don't be ashamed to use a boat when bullheading. I like to hook a lightweight trolling motor, such as a Merc 110, on the transom of my fishing craft, to push me out to the deep holes where bullheads congregate.

BIG BAIT
Then I knot on a leader of about 10-pound test, tie a medium-sized hook on to that and attach a one-ounce weight a foot or two above the hook. For bait I like to use night crawlers, draped loosely over and around the hook, or a thumbnail-size hunk of raw beef. Most successful bullhead fishermen strike when the fish is tugging at the bait, not waiting for him to swallow it. It'll pay off in more bullheads, and more fun. You miss more strikes, but you catch more fish when using this method. Which is why a person goes bullheading in the first place—to catch a lot of fish for a lot of good eating.

Miss Hefley Weds Donnie Renner

Joseph Hill Chapel in Canyon was the scene of the wedding of Miss Betty Louise Hefley of Artesia N. Mex. and Donnie Renner of Friona June 3 at 2:30 p.m.

Mr. and Mrs. J. C. Hefley of Artesia are parents of the bride and Mr. and Mrs. John G. Renner of Canyon are the bridegroom's parents.

Brother Don L. Gaston read the wedding vows for the double ring ceremony, before an altar flanked by bouquets of white and pink carnations.

Miss Darla Sue Newberry was maid-of-honor and Clyde Renner, brother of the bridegroom, served as best man. Fabian Renner and Darrell Schwab were ushers.

Traditional wedding selections were presented on the organ, including "The Lord's Prayer," "Whither Thou Goest" and "The Wedding March."

The bride wore a white eyelet street length sheath dress with matching accessories. She carried a 1941 penny for something old, a blue garter, her handkerchief was new and for something borrowed, a Bible. The white Bible was topped with a bouquet of white and pink orchids accented with ribbons and love knots.

The attendant's dress was a pale pink sheath and her accessories were white. She carried a pink carnation corsage.

Mrs. Renner is a 1959 graduate of Artesia High School and attended ENMU at Portales, N. Mex. and West Texas State at Canyon. Mr. Renner attended the Friona Schools.

After returning from a wedding trip to Altus, Okla., Mr. and Mrs. Renner are at home at 907 Virginia St. in Friona. Mr. Renner is engaged in farming.

MRS DONNIE RENNER

Girls Auxiliary Has Coronation Ceremony

Girls Auxiliary of the First Baptist Church met June 10 for a coronation ceremony, using the theme "For God So Loved The World."

A prayer was said by Mrs. Ed Hicks and Mrs. Noyle Wood GA director gave the welcome and introduction. Special music was presented by Lois Moyer, Mary Wilson, Kay Coffey, Carolyn Herring and Myrna Bennett.

Miss Janell Daniel, queen of

the coronation, was crowned by Mrs. Wood. She wore a formal pale green gown. Her flower girl was Diane Bennett, crown bearer, Jimmy Murphree and trumpeter was Danny Murphree.

Others participating in the coronation were Maidens: Connie Stone, Barbara Latham, Vernetta McNealey, Sharon Walker, Tressa Taylor, Sherry Cole, Laura Gaskins, Mary Ellen Scales, Patricia Roberts, Hazel Fallwell and Susan Mills. Ladies-in-waiting: Linda Stone and Glenda Latham and Princesses were Shirley White, Karen Maynard and Judy England.

The attendants were dressed in white and carried white candles with streamers representing the GA colors. Their emblems were presented by Mrs. Johnny Mars, WMU president, and were pinned on each girl by Mrs. Jim Maynard and Mrs. Travis Stone.

Mrs. Roy V. Miller played music for the recessional. A reception in the church parlor sponsored by members of the WMU honored the Girls Auxiliary following the program.

Dinner Honors Miss Douglas

Miss Nelda Douglas, bride-elect of Mike Ellis, was honored with a pre-bridal dinner given by Mrs. Jim Maynard in her home Friday evening. Theme for the occasion was "Showers of best wishes." Blue and white, the bride-elect's chosen colors were carried out in decorations. A white linen cloth covered the table and the centerpiece consisted of a blue wishing well with love birds atop. Blue candles encircled with white roses flanked each side of the well. Place cards and favors were blue miniature umbrellas and imitation wedding rings.

Miss Suzanne Taylor presented a scripture reading and Mrs. Maynard offered a prayer. Each guest drew a wish from the well and read it to Nelda, followed by the prophecy of the future married life of Nelda and Mike given by Donna Blackburn.

Dinner was served by Karen Maynard, Shirley White, and La Joyce Burrow to the honoree, Donna Blackburn, Gayle Knight, Suzanne Taylor, Mrs. Jerry Loflin, Mrs. Gene Ellis, Mrs. Joe Douglas and the hostess, Mrs. Maynard.

Joe Wilsons Note 60th Anniversary

A reception honoring Mr. and Mrs. Joe Wilson of Floydada will be June 24 in the First Baptist Church of that city.

The couple will be observing their 60th wedding anniversary and friends are invited to call from 2:30 to 5 p. m. A special feature of the program will be "This Is Your Life" with Mr. and Mrs. Wilson as participants at 3 p. m.

Brother Wilson was pastor of the First Baptist Church in Friona from 1937 to 1941.

Showers Honor Nelda Douglas

A recent lingerie shower in the J. E. Knight home was a courtesy to Miss Nelda Douglas bride-elect of Mike Ellis. Misses Gayle Knight and Donna Blackburn and Mrs. Jerry Loflin were hostesses.

Attending and sending gifts were Suzanne Taylor, Kitty Black, Judy Taylor, Mrs. Gary Goetz, Mrs. Jim Roy Clements, Cynthia Caffey, Mrs. Valton Howard, Billie Rae McKee, Janet Smith, Mrs. Joe Douglas, Mary and Martha Knight.

Another courtesy accorded Miss Douglas was a kitchen shower in the George C. Taylor home Saturday afternoon. Hostesses were Mrs. Taylor and her daughter, Suzanne.

Orange blossom float and cookies were served from a table covered with a white cutwork cloth and centered with an arrangement of roses. Hostess gift was a rolling pin, which had

been autographed by guests. Favors were miniature rolling pins.

Present besides the honoree and hostesses were Mrs. Eugene Ellis, Mrs. Joe B. Douglas, Mrs. Jerry Loflin, Mrs. Robert Ivy, Kitty Black, Donna Blackburn, Cynthia Caffey, Gayle Knight and Judy Taylor.

Club Committee Meets Monday

Members of the Federated Woman's Clubhouse committee met Monday and announce the following changes: Mrs. Bill Nichols is to be contacted for all club house rentals; Mrs. Bill Stewart was elected treasurer for the committee and Mrs. Paul Spring, general chairman.

Attending were Mrs. Bill Baxter, Mrs. C. W. Dixon and Mrs. L. R. Dilger of Friona Woman's Club; Mrs. George Anderson and Mrs. Bill Nichols from the Progressive Study Club and Mrs. Bill Stewart, Mrs. O. J. Beene, and Mrs. Paul Spring from Modern Study Club.

Local

Visiting several days in the home of Mr. and Mrs. Bill Schwab and family recently was the sister of Bill, Esther Schwab, from L. Mesa, Calif. She also spent several days visiting relatives at Higgins, Tex. and Shattuck, Okla.

Mrs. I. V. Day attended a dance recital in Lubbock recently featuring her granddaughter, Terry Lynn Hester.

Recent guests in the home of Mrs. I. V. Day were Mrs. Paul Cantrell, Whitedeer; Mrs. Helen Deshaun; Mrs. Pauline Brown and boys, Dewaine and Wayne; Mrs. Viola Bandy and daughter and three grandchildren all from Amarillo.

Mr. and Mrs. John McElroy and family from Akron, Ohio are guests this week of Mr. and Mrs. Glen Stevick. McElroy is a brother of Mrs. Stevick.

Mrs. Frances Howard of Abernathy has been a guest in the home of Mrs. A. O. Drake and other relatives.

Mrs. Jerry Brown will be in Friona for two weeks while Jerry is training at a Military Camp in Louisiana. Mrs. Brown is the former Erma Lou Drake.

Mr. and Mrs. J. B. Williams and Karyl attended the wedding of Wanetta Barrow and D. C. Gibson in Amarillo recently.

Mrs. Kent Shower Honoree

Mrs. Bill Kent, nee Jane Fulgham, was guest of honor at a miscellaneous shower Saturday from 3 to 5 p. m. at the Calvary Baptist Church.

Corsages were presented to the honoree, her mother, Mrs. W. B. Fulgham, and her mother-in-law, Mrs. Dud Kent of Sudan.

A pastel color scheme was used in table decorations including a centerpiece of pink roses and pearlized fern. Crystals and silver appointments completed the setting. Mrs. Jack Nelson and Mrs. James Cunningham served pink punch and individual cakes decorated with blue hearts.

Hostesses were Mesdames Valton Howard, J. L. Taylor, Earl Chester, J. W. McMahan, Gerald Wright, Jimmy Castleberry, James Cunningham, J. E. Knight, Claude Edelman, Tommy Parker, Carolyn Carlisle, Tom B. Mason Jr., Tom

O'Brian and Lola Nelson and Misses Lola Goodwine and Billie McKee.

Showers Honor Peggy Holcomb

Miss Peggy Holcomb, bride-elect of Harold Balls, was honored with a lingerie shower in the home of Mrs. Bill Baxter Saturday afternoon. Hostesses were Ann Baxter and Linda Castleberry.

Favors and napkins accented

the refreshment plates that were served from a table decorated with a miniature lingerie tree.

Attending were La Joyce Burrow, Adabeth Akens, Betty Drake, Brenda Collier, Debbie Hawkins, Janet Snead, Karen

O'Brian, Mikie Welch, Carol Coffey, Pam Roderf, Janet Buckley, Janet Smith, Mrs. Ella Faye Holcomb and Mrs. Bill Baxter.

Sending gifts were Jimette McLean, Donna Fields and Suzanne Harper.

Of Interest To THE WOMEN

Double Bridal Shower Fetes Misses Hamilton And Bagwell

Miss Juanett Bagwell, bride-elect of John R. Hamilton, and Miss Helen Hamilton, bride-elect of Truett Bagwell, were guests of honor at a double bridal shower, June 6, in the parlor of the First Baptist Church.

Hostesses were Mesdames John Burrows, John Wright, Jim Maynard, T. E. Lovett, L. A. Haws, John L. Ray, J. T. Carroll, Ross Terry, Clyde Hays, G. H. Goggans, Lucy Jones, C. W. Dixon, Johnnie Mars, Lloyd Prewett, Vernon Roberts, A. G. Rolen, Roy Miller, S. C. Hough and Miss Fay Southward.

Piano selections appropriate for the occasion were rendered by Miss Lois Moyer and Mrs. Miller as guests called from 2 to 5 p.m.

Miss Bagwell's chosen colors, pink and white, and orchid and white, colors chosen by Miss Hamilton, were used in room and table decorations. The refreshment table was laid with a white damask cloth and centered with an arrangement of orchid and white sweet peas flanked by white candles entwined with orchid sweet peas. Cakes, pink lemonade and mints were served.

Attending and sending gifts were Mesdames Tommy Jones, Eva Roberson, Calvin Talley, L. R. Dilger, Monroe White, Truett Pool, Wesley Hardesty, Claude Osborn, Guy Latta, Sloan Osborn, J. H. Boyle, L. B. McClain, Floyd Rector, O. C. Jones, A. L. Black, Tommie Mercer, Doyce Barnett, Lloyd Mingus, Lee Renner, O. B. Moyer, Bill Cogdill and Pat Busby.

Also Mesdames L. W. Loafman, G. B. Buske, Philip Weath-

erly, T. E. Wood, D. G. Hand, Earl Chester, Bill Sheehan, Paul Daniel, Raymond Jones, W. E. Stringer, Lucy Mae Stokes, Joe Talley, D. H. Nelson, Pat Fallwell, E. S. White, George Trieder and Phyllis Wagoner.

Also Mesdames L. R. White, E. R. Day, Sam Williams, Glen Williams, N. E. Wood, Bea Westbrook, Ernest England, Bill Stephens, J. T. Gee, A. W. Anthony Sr., Reeta Agee, J. W. Beatty, Joe Collier, A. W. Anthony Jr., Glen Mingus, Folsom Rector, Billy Dean Baxter, Earl Drake, Stanley Bengue, Joe Douglas, Ralph Smith, Elroy Wilson, Tom Mason, Charles

Scales and Clyde Bagwell. Also Mesdames C. A. Turner, James McLean, Bert Chitwood, E. P. Gilmore, Roy Clements, J. G. McFarland, George Taylor, Dan Ethridge, Charles Allen, Donnie Waller, Raymond Euler, Dick Roberson, C. W. Tannahill, Harry Hamilton, Lloyd Bagwell, W. F. Buske, Raymond Cook, Ralph Lloyd, Obsa Roberson and Darrell Newton.

Also Misses Leesa Mercer, Suzanne Taylor, Marie Roberson, Kitty Black, Lois Moyer, Lila Gay Buske, Luellen McLean.

Engagement Announced

Mr. and Mrs. C. F. Martin of Denver City have announced the engagement and approaching marriage of their daughter Wanda Jean to Harris B. Dunn, son of Mr. and Mrs. Harris B. Dunn of Friona.

Wedding vows for the couple will be read at Calvary Baptist Church at Lubbock by Rev. W. E. Thorn, Friday, June 22 at 5:30 p.m.

Miss Martin is a 1960 graduate of Denver City High School and of Draughan's Business College. Dunn, a 1954 graduate of Friona High School, attended Texas A & M.

Mrs. Schueler Hosts Rhea Club Members

The home of Mrs. Walter Schueler was the scene of the recent meeting for members of the Rhea Home Demonstration Club.

Mrs. Herbert Schueler gave a reading "Ever Have Club Day Fever?" written by a homemaker from Nebraska. During the business session, conducted by Mrs. Jack Patterson, Mrs. Elmo Dean was elected club nominee for THDA state meeting. Also yearbook ideas for 1963 were given.

"Accessorizing the Home" was the theme of the program presented by Mrs. Leland Gustin and Mrs. Cordie Potts.

yellow mums and greenery. Gold punch and small assorted cookies were served with yellow rosebud and bell mints. Ninety guests registered in the bride's book and about 110 sent gifts that were unable to attend.

Bridal Shower Courtesy To Miss Lila Gay Buske

A pre-bridal shower was a courtesy to Lila Gay Buske, bride-elect of Don Max Vars, June 12 in the home of Mrs. Mae Magness.

Assisting Mrs. Magness with hostess duties were Mesdames Sloan Osborn, John Burrow, A. L. Black, Clyde Weatherly, Charles Allen, Noyle Wood, Wright Williams, Henry Lewis, Wallace Rogers, Paul Fortenberry and Clarence Dixon.

Guests calling from three to six were introduced to the honoree, her mother, Mrs. G. B. Buske, mother of the bridegroom to be, Mrs. Stanley Vars of Tulsa and Mrs. Florence Buske, grandmother of the bride-elect.

The refreshment table was laid with a white net cloth with floor length double ruffles and decorated with a centerpiece of

HOMESITE RETAINED

Tradition To Continue With Potts' New Home

When you've lived in the same house all your life and it's time to rebuild, what do you do? Why, build your new house on the old homesite, of course.

At least, that is the case with Mrs. Cordie (Helen Schlenker) Potts, whose parents were Parmer County pioneers in the Rhea community.

Mr. and Mrs. Potts are building their new home on the site occupied for almost 50 years by the house originally put there by her father, Charles Schlenker, which has been Mrs. Potts' home practically all her life. She was born there on the farm, in the Schlenker's first house. Helen was four months old when the family moved into their new home.

Mr. Schlenker died in 1939, a year after Helen married Cordie Potts. Soon after her father's death, they purchased the place from Mrs. Schlenker, and have continued to live there.

"Most people go into town these days when they build a new house, but we decided just to stay on the farm. The boys like it here, and it's a good place for them to finish growing up," says Mrs. Potts.

"The boys" are Larry, 17, who will be a senior at Friona High School next fall, and Jay, 12, who will be in the seventh grade. A daughter, Mrs. Dwayne Ridley, lives near them on the farm.

The Schlenkers came to Parmer County in 1906, from Des Moines, Iowa. In 1912, Mr. Schlenker purchased the house from another Iowan, Horace Ballard, who decided to move back to Iowa.

The house had to be moved some nine miles to the present homesite, which is about 18 miles west of Friona. That was no small chore for that day and time, since there was no such thing as today's giant house-moving equipment.

Schlenker devised some large wooden wheels, and secured the help of a steam engine from Bovina to push the house along. The moving process was finally completed in October of 1912.

The price that Schlenker paid for the house is quite startling when compared to today's prices. He bought the house from Ballard, lock, stock and barrel for \$300.

The house was three or four years old when it was purchased by Schlenker, which makes it around 54 years old. But the

AS IT WAS. . . The Charles Schlenker home, which had been a landmark in the Rhea community for 50 years, is giving way to the new home of Mr. and Mrs. Cordie Potts. Mrs. Potts, the former Helen Schlenker, has called the place "home" for most of her life, both unmarried and married.

material in it is still good, points out Mrs. Potts, who says they may find a way to use some of it, perhaps for a barn. The lumber was transported here from Indiana when the house was built.

There were 11 children in the Schlenker family, six girls and five boys. Mrs. Potts is the youngest child, Mrs. Schlenker, now 96 years of age, lives in Friona with another daughter, Mrs. Maybelle Hartwell.

Several additions have been added to the Schlenker house. Porches were built in front and back. Three rooms were added to the back of the original house,

Jim Dixons Have Son

Mr. and Mrs. Jim Dixon became parents of a baby boy at Parmer County Community Hospital May 30. He weighed 6 lbs, 14 ozs. and was named Milton James.

Milton has an older sister, Melodi, 3. His grandparents are Mr. and Mrs. C. W. Dixon of Friona and Mr. and Mrs. Vernon Collier of Canyon.

The Dixons are residents of the Rhea community.

and two upstairs rooms were built.

The Schlenker residence used to be a stopping place for homesteaders on their way to New Mexico, Mrs. Potts said. An ironic twist to the Schlenker place is that it is only two and one-half miles from the New Mexico state line.

Schlenker could have acquired land in New Mexico by the home-

stead rule, but, as Mrs. Potts puts it "a land agent got to him first."

"I've always been glad that we live on the Texas side, though, even if Dad had to pay for the land here," she says.

Mr. Schlenker would be pleased if he could see his "spread" today, with the coming of irrigation to the area. "Dad

Tin Can May Become Sturdy Pop Bottle Foe

NEW YORK—The pop bottle is facing stern competition from the tin can as a major dispenser of carbonated beverages. Eager consumer demand for the canned dispenser has made it probably the hottest item in the soft drink packaging market within just the past few years. Steelways, official publication of the American Iron and Steel Institute, said that sales of soft drinks in cans have climbed 172 percent since 1956. If the can makers realize their 1962 sales goals, they will have 5 percent of the carbonated beverage market—a market that sells some 35.5 billion units annually.

The publication said the 1961 share for the tin can makers was 1.2 billion units. The 1962 estimate is 1.8 billion units. If the latter figure is achieved,

it would call for 160,000 tons of tin plate and result in about \$66 million in added revenue to the can makers in this single new market.

While the industry estimates that within the next three to four years the tin can will have 10 percent of the carbonated beverage market, longer range potentials are even greater. Confidence in the current rates of growth of this new market are based on solid performance. The bright future outlook is in part based on the phenomenal growth that the industry experienced in packaging beer.

Starting from scratch, the tin can now controls a 37 percent slice of the beer container market. The magazine said that should the tin can ever enjoy a similar share of the soft drink packaging market, it is estimated the can makers' share of the total soft drink packaging market would then approximate 11 billion units a year. Steelways said the advantages of the tin can over the bottle are it is easier to store, easier to carry, quicker cooling and no disposal problem.

didn't live to see irrigation. It would've meant a lot to him," says Mrs. Potts.

"Some people think it would be lonesome living out here," Helen says. "But distance doesn't mean much anymore. With the coming of the pavement, it's just a nice 20-minute drive into town."

"Now, back when the folks first settled here, it was different," she continued. "The closest neighbor was six miles away, and there wasn't even a fence post in between."

When the Schlenkers first came here, they went by rail as far as Bovina, Friona at that time was just a budding town.

Mrs. Potts went to school at Rhea, which at that time had a school through the tenth grade. To finish school, she had to come to Friona, where she boarded until she earned her degree.

Helen has been an active Girl Scout worker, and is a member of the Rhea Home Demonstration Club. The family attended church at the Rosedale Baptist Church for several years, but now are members of the First Baptist in Friona.

The original house has been moved several feet away from its foundation, and the new house will be located in the exact spot, to take advantage of the trees, basement and so forth.

What is her feeling about moving from a house that has been "home" to her all her life? "It's a strange feeling, but a vision of something better, sort of softens the blow."

SITE UNCHANGED. . . Mrs. Cordie Potts examines the site where her former home stood, and where the Potts family is building their new home. The family decided against moving to town in favor of staying on the farm.

Phone 2442 Friona

Friona's housing shortage should be somewhat alleviated by the recent move in of two duplex apartments in the north part of town. These two family dwellings are owned by Mr. and Mrs. Roy Beardain and will provide housing facilities for four families.

The Beardains moved into Friona from a farm northwest of Friona about a year ago and have done a fine job beautifying their home, which is on Washington Street.

Since Sunday will be Father's Day, I'd like to share a few paragraphs I clipped from "Cheer" with you.

"When is Father just 'Dad'?" H. C. Chatfield answers this question this way: If he's wealthy and prominent, and you stand in awe of him, call him "Father". If he sits in his shirt-sleeves and sunders at ball games and picnics, call him "Pop". If he tills the land or labors in overalls, call him "Pa". If he wheels the baby carriage and carries bundles meekly, call him "Papa," with the accent on the first syllable. If he belongs to a literary circle and writes cultured papers, call him "Papa," with the accent on the last syllable.

If, however, he makes a pal of you when you're good, and is too wise to let you pull the wool over his loving eyes when you're not; if, moreover, you're sure no one else you know has quite so fine a father, you may call him "Dad."

The Star had several out of town visitors this week. Mrs. G. L. Livings of Los Angeles and Mrs. H. W. Wright of Barnard, Kansas, houseguests in the home of Mrs. A. O. Drake, visited briefly with us. It had not been our pleasure to meet these two ladies before, but hope they come our way again.

Then J. F. Solomon, our faithful Wheeler County subscriber, came in. Visiting with this fine gentleman is always a pleasure. He reported his home town of Shamrock had received above normal amounts of rain since the first of the year.

Have you ever met two badgers walking down Seventh Street in Friona? I have and it was quite a surprise. One morning recently, after watching a small puppy on a leash at the back of the post office, I approached the front door from the east.

There I met two well behaved badgers as they were being directed down the street with collars and leashes. Apparently they were not fully grown, but seemed to be well trained to the art of leading.

Although Mr. and Mrs. Emmett Sherman are not really new to Friona, they are newcomers in one sense of the word. This week the Shermans moved into the Elbert Thomas residence on Prospect Street.

Hub Motor Line Carlsbad Caverns Provide Sale Announced Awesome Geological Freak

Hub Motor Lines, one of two motor lines serving Friona, has been purchased by Merchants Fast Motor Freight, effective June 1.

Merchants Motor purchased Hub's intra-state rights, and all of their equipment.

The other motor line serving Friona is Lang Transit Company.

They recently purchased the Golden Spread and will soon begin operation of it.

A few years ago this couple owned and operated this same cafe and it is nice to see them back in their familiar places. They moved here from Hereford, maybe their return proves the saying "Once you've worn out a pair of shoes here, you never really feel at home anywhere else."

Think it was the Friendly Philosopher who said, "If you are dog tired at the end of the day, check up on yourself and see whether it could be caused from growling all day long."

Beneath the desert plant-studded foothills of the Guadalupe Mountains of southeastern New Mexico lie the Carlsbad Caverns, a vast subterranean wonderland, into which the first organized tour party was taken 40 years ago.

No cave in all the world can compare with Carlsbad Caverns National Park in sheer beauty of formations, size, or geological history.

Ornate formations -- fragile chandeliers, pillars, folds of translucent draperies, fantastic domes and fanciful figures -- decorate the network of huge chambers and corridors.

New Mexico cowboy Jim White was the first man to explore the deep recesses of the cave. This was in 1901 and he immediately recognized it was one of the wonders of the world. Yet when he tried to convince others he was considered "loco" or a "champion cowpunching liar."

It was not until 1922 that

White was able to entice enough people, including a photographer, to make up an organized tour. Recognition came swiftly after pictures of the King's Palace and the 14 acre Big Room were published. The following year, Carlsbad Caverns was made a National Monument and by 1930, it had become a National Park.

Since White lowered the first tour party into the cavern in an iron bucket, millions of dollars have been spent to bring elevator service, smooth hard surfaced trails, concealed lighting, an underground cafeteria, and other modern facilities to make the cavern easily accessible and convenient to visitors. The marvel is that all of this has been accomplished without a jarring note to the natural beauty.

Guided tours are conducted every day of the year at Carlsbad Caverns National Park. In addition, there is a daily tour for photographers since time and flash exposures are not permitted on the regular tours.

Friona Youths Chosen For Week of Camping

Three Friona youths will attend a full week of camping activities at The Salvation Army's Camp Hoblitzelle near Dallas June 17-24, announces Ben Moorman, camp chairman for Friona.

The boys are Byron Grant, Delbert Davis and Ricky Davis. Moorman will drive the boys to and from the camp.

More than 2,200 youths, including 650 boys from 239 Salvation Army Service units operating in Texas cities, towns and rural communities, will enjoy the week's outing.

Thirteen camps will be conducted this summer, with each camp lasting one week and accommodating about 175 campers.

Camp Hoblitzelle, located on a beautiful wooded tract of 340 acres, is seven miles south of Midlothian, eight miles west of Waxahachie and within an hour's drive of Dallas. The camp has well equipped playgrounds and recreation areas for all boys' sports including a swimming pool and lake for fishing and boating. Organized sports are conducted under the supervision of experienced coaches and counselors.

Campers will be housed in the camp's modern, attractive red-wood and brick cabins. Expert cooks and kitchen personnel will prepare balanced, nutritious meals, designed for the needs of growing youngsters, which will be served in the camp's own dining room.

Camp Hoblitzelle has been made possible through the generous gifts of more than 100 men and women of Texas. Their gifts provided money for the purchase of the land, buildings and improvements on the property. The Salvation Army operates the camp for the benefit of youth who, without their help, would not have the opportunity to enjoy camp life.

The Salvation Army is a member of the United Fund in Friona.

"The reason adult westerners on TV seem so unrealistic is the cowpokes smoke kings and filter tips instead of rolling their own out of Bull Durham with one hand." - Louis Nelson Bowman, King City (Mo.) Tri-County News.

Something To Think About

6th. Street Church of Christ
Box 515 -- Friona, Texas

Ask yourself this question: "Do I want to be popular, or right?" Most of us would like to be both even though we know that our chances of success are almost impossible. This being true, we have to decide which we want to most, to be popular or to be right. The temptation to "follow the crowd" and be popular is very great. Unfortunately it is seldom right. In fact, the Word of God tells us, "Thou shalt not follow the multitude to do evil." Those who are more concerned about being right than popular must remember that God's people have never been conformist. This is not the popular view, but it is the right view. God was directing the apostle Paul when he wrote, "And be not conformed to this world; but be ye transformed by the renewing of your mind, that ye may prove what is that good, and acceptable, and perfect, will of God." (Romans 12:2) A conformist is one who follows the masses. He is more concerned about popularity than he is about being right. On the other hand, the "transformed" constitute the minority and are seldom popular, but they are right because they are on the side of God. Every person who is truly concerned about the salvation of his soul should keep this great truth in mind, the popularity of a doctrine does not determine its scripturalness! As you consider this problem, just remember this bit of admonition: "Prove all things; hold fast to that which is good." (1 Thess. 5:21)

Father's Day

It's Father's Day, and nearly all the menfolk today are receiving a bit of the special attention they deserve but don't often get; or, if they have no families, they are probably singing the praises of their own Dads. And it's not a bad idea. It doesn't hurt any good father to get a little show of appreciation and affection once in a while. After all, the family depends on Dad for a lot more than just his name. They never should "take him for granted."

A good father has a deep concern for his children. He watches out for their welfare, is patient with them, takes delight in their company, sets the right example before them, weeps over their mistakes and takes pride in their successes. We may never attain our ideal of the perfect father, but we can rest assured that our Heavenly Father will provide the strength we need for any circumstance. Be sure to attend church this Lord's Day, the day when all churches honor fathers young and old.

Old Timers Roden Is Cited For Scholarship Reunited

The home of Mrs. A. O. Drake, one of Friona's oldest residents, has been the scene of an old timers reunion this week. Honored guests were Mrs. G. L. Livings of Los Angeles and Mrs. H.W. Wright of Barnard, Kansas.

These three moved to Friona in the early 1900s and were neighbors when the area was very thinly populated. The Livings family moved from Indiana to the farm now occupied by Mrs. Fay Reeve and children. After Mrs. Livings moved to California in 1934 and Mrs. Barnard moved to Kansas, the three pioneer women kept in contact with one another by correspondence and ten years ago had a reunion in the Drake home.

Steve and Loyd Messenger are grandsons of Mrs. Livings. A family reunion will be held in the Steve Messenger home Sunday.

Oil companies generally are intensifying their efforts to stimulate demand for petroleum products, and especially gasoline. It is reported that the use of one additional tankful of gasoline by each automobile owner during the year would more than wipe out the excessive gasoline inventories overhanging the market.

Roden Is Cited For Scholarship

Jon Mack Roden, son of Mr. and Mrs. Ralph T. Roden, Friona, has been cited for outstanding scholarship for the spring semester that ended at Southwestern (Oklahoma) State College May 25. This honor goes to students who are enrolled in 12 or more semester hours on the campus and who earn 3.0 (B) or better grades in all courses.

Roden, a 1959 graduate of Friona High School, is a pharmacy major at the Weatherford college.

NUCLEAR SUB HAS SUNLESS GARDEN
LETTUCE AND RADISHES are growing hundreds of feet beneath the surface of the ocean. The undersea "garden" is a tank aboard the USS Robert E. Lee, a Polaris-firing submarine. It supplies one helping of lettuce and a few radishes each week for the 100-man crew to pep up their diet when the sub's tour of duty calls for it to remain submerged for two months at a time. The tank is filled with a chemical solution containing all nutrients necessary for plant growth. Roots are anchored in synthetic sand which is lighter than soil. Fluorescent lamps replace the sun. Carrots were tried, the Navy reports, but proved unseaworthy.

Girl Scout Camp Report

Written by Mrs. Louisa Wilson and Mrs. June Rhodes
The high light of the year for Friona's Girl Scouts and their leaders was a three day Troop Camp at Camp Rio Blanco, six miles east of Crosbyton. Camp Rio Blanco is the Girl Scout camp for the Coronado area and was given to the scouts by Mrs. Bridwell, a pioneer rancher of that area. The 119 acres are located on the White River and are beautiful with their cotton wood trees, wild plums, wild grapes and many wild flowers.

Troop Camp is planned to give every Girl Scout an opportunity to live for a few days in the great outdoors. Sleeping in a tent at night and eating around a camp fire. Eight cars loaded with girls and a truck and two pickups carrying bed rolls and groceries left Friona at 7 a.m. Monday and arrived at camp at 10:30. Each troop had planned their menus, bought groceries and made Kaper charts so that every girl would share equally in the fun and work.

The 4th and 5th grade girls assisted by their leaders, Mrs. Alice Whaley and Mrs. Mary Bandy, made every effort court toward some badge in the outdoors field. They even rolled out of bed at 5 a.m. to go on a bird watch with camp director, Skeet Anderson. Thirty-seven varieties of birds have been seen on this camp site, including wild turkey.

The 6th and 7th grade girls, led by Mrs. Olive Masie and Mrs. Genevieve Riethmayer, were on a "Scout Holiday". After the meals were cooked and camp was tidy they went on long nature hikes, wading in the creek, sun bathed or just loafed around in their covered wagon homes. It was hard to tell who was having the most fun... the scouts or the leaders and the mothers who went along.

The flag was lowered at sundown with an impressive ceremony performed by a different troop each night. During the day each troop and the leaders carried on their own activities, but at night everyone was invited to the main lodge for an evening of fun. The camp directors planned games, songs and refreshments and one night each troop was responsible for a stunt or skit.

If you have never seen Old Glory raised at sunrise by a group of patriotic girls or smelled the aroma of bacon and eggs cooked on an open fire, or awakened to the song of a hundred birds or joined hands with a circle of girls as they sing taps, then you have missed the joy of being a Girl Scout leader.

Other adults making the trip were Mrs. Waneen Ragsdale, Mrs. Gladys Day, Mrs. Louisa Wilson, Mrs. Howard Ford, Mrs. Judy Cummings, Mrs. Lorretta Brookfield, Mrs. Lillie Mae Baxter, Mrs. Elizabeth Ferguson, Anni Jensen and Carolyn Guinn.

Watson Whaley was very helpful, too, as he drove the truck loaded with supplies to the camp site and returned on Wednesday to drive it home.

Troop Camp is quite an experience for many girls who haven't been able to go to an established camp, since it is free. This was the first time for many of the Friona Girls and they had many new experiences.

Mrs. Rhodes, who went along to help when she could, had this to say, "I've never seen children learn to accept responsibility, do the work that was expected of them and get along with each other as nicely as these girls did. The camp facilities were excellent and the staff most efficient."

ALMOST FINISHED... The new field house for Friona High School athletic teams is nearing completion, and will be put into use for the first time this fall. About all that remains to be done on the building is some painting and the installation of toilet fixtures.

The Gotcher FLAME Cultivator

Advantages of FLAME CULTIVATION

When used as recommended, Flame Cultivation provides the cotton, corn, and soybean farmer with the most economical and effective weed control known today.

Insects are controlled to the extent that all on the ground are destroyed when flame hits them, cutting down on the use of insecticides.

Most weed seeds that will germinate are within about 3/4" of the top of the ground; and unless something disturbs the ground (such as hand hoeing), new seed will not be turned up out of the ground. Your "Gotcher" Flame Cultivator gives you a definite advantage here, as it not only leaves the ground undisturbed, but burns up weed seeds that land on the ground from other sources.

Flame Cultivation may be used as often as desired to control weeds without harming the crop.

Your "Gotcher" Flame Cultivator consumes residue weeds and ground leaves. This will help when harvest times. Cotton pickers and harvesting machines will not be clogged and thrown out of adjustment by this common trash cause.

IT HAS BEEN PROVEN BY YEARS OF TESTING IN THE FIELD THAT FLAME CULTIVATION PRODUCES CROPS AT LOWER COSTS PER ACRE WHILE GIVING MAXIMUM YIELD, AND PROPERLY USED WILL NOT HARM THE CROP IN ANY WAY.

Costly Accidents

NEW YORK (UPI) — The nation spent a total of \$6.7 billion on highway construction during 1961, but the cost of traffic accidents was even higher.

The economic loss from motor vehicle accidents amounted to \$6.8 billion, according to a survey by C.I.T. Corp., a major industrial and highway financing firm. The survey defined accident costs as loss of wages for those killed and injured, reduced earning power because of disabilities, medical and hospital expenses, property damage and insurance.

Duggins Attends Counseling Course

Thirty public school counselors from the Southwest will try to determine what keeps the able student from achieving his potential as they attend Texas Tech's institute in counseling and guidance training June 18 - July 27.

Among the counselors who will participate in the institute is B. E. Duggins of Friona. The advanced institute is sponsored by Tech's departments of education and psychology in collaboration with the United States Department of Health, Education and Welfare under the 1958 National Defense Education Act.

The institute participants--15 men and 15 women--were selected from a field of 400 applicants from over the Southwest. Those chosen represent all parts of Texas and the states of Oklahoma, New Mexico, Illinois and Arkansas.

"With counseling experts staffing the institute, we will focus our attention on the greatest area of human waste--those students who are able to achieve, but are not developing their potential," Dr. Beatrix Cobb, institute director, said.

She cited cases from the Lubbock public schools where a student with an IQ of 130 had made 7 C's and 5 D's this past year and a girl with an IQ of 134 had made some F's and C's.

Thirty "able under-achievers" from Lubbock's junior and senior high schools will be given group and individual counseling by the participants, Dr. Cobb said.

Visiting members of the staff include Dr. Fred Proff of the University of Illinois, who is director of the NDEA counseling and guidance institutes; Dr. John Shlien, director of the University of Chicago counseling center; and Dr. Alan Krasnoff, research director at the Veteran's Hospital, St. Louis, Mo.

Dr. Mary Bubliss, a Plainview child psychiatrist, will also be

a visiting expert on the institute's staff.

Tech psychology members on the staff include Mrs. Betty Sturm, instructor; Dr. Murray

Kovnar, professor, and Dr. Cobb, acting psychology department head and director of Tech's Rehabilitation Counselor Training Program.

Tech has sponsored the NDEA counseling and guidance institute every year but one since the national act was passed in 1958, providing for the institutes.

Highlights and Sidelights From Your State Capital

AUSTIN, Tex.--For the first time since 1872, Texas Republicans are presenting a strong threat to capture statewide and legislative offices from the Democrats.

Following his nomination for the Governorship on the Democratic ticket, John Connally took immediate steps to meet the challenge with a united front.

Connally invited all Democratic nominees for state and legislative office to a barbecue to be held on June 16 at his family ranch near Floresville. Purpose: to make some campaign medicine.

Saturday's outing will launch the campaign for the November 6 general election.

Jack Cox of Breckenridge, the Republican nominee for governor, is backed by a slate of 20 nominees for the 23 seats in Congress; 15 candidates for the 31 state senate seats, and 86 candidates for the 150 house seats.

Also there are candidates for county and precinct offices in many counties.

Lined up with Connally will be Waggoner Carr of Lubbock for attorney general, opposed by T. Everton Kennerly of Houston; Preston Smith of Lubbock for lieutenant governor, opposed by O. W. (Bill) Hayes of Temple; Jerry Sadler of Palestine for land commissioner, opposed by Albert Fay of Houston; John C. White of Wichita Falls for agriculture commissioner, opposed by

Harry Hubbard of Marfa; Ben Ramsey of San Augustine for railroad commissioner, opposed by Bernold M. Hanson of Midland; Jesse James of Austin for state treasurer, opposed by Allen Lacy of Abilene; and Robert S. Calvert of Sweetwater for comptroller, opposed by Mrs. Hargrove Smith of Houston. Republicans are not contesting judicial seats.

The Constitution Party also has fielded a slate of candidates for state office, all but one of them from Houston.

SPEAKERSHIP--One of the more important offices in state government is the speakership of the house. Unlike the Senate, however, the people have no voice in the selection.

The speaker is elected by the 150 members of the house. Rep. Byron Tunnell of Tyler laid out the names of 95 Democratic nominees who have pledged to support him, and called on his opponents for the speakership to withdraw.

Rep. C. W. Pearcy Jr. of Temple did. Another opponent, Rep. Ben Glusing of Kingsville, was defeated in the runoff primary, so he no longer is eligible. Rep. Alonzo Jamison of Denton remained in the race. He had claimed 61 pledges.

FACULTY FIRING--Dr. Rupert C. Koeninger's firing as professor of sociology at Sam Houston State College may cause Texas to be "blacklisted" by the American Association of University Professors.

No reasons were given when the board of regents for state teachers colleges fired Dr. Koeninger. Also no criticism of his teaching ability was brought out at the hearing.

The college professors association does not employ a strike or a picket line when it feels a professor has been done wrong. It merely "blacklists" the school by giving notice to other college teachers that it is not the best place to accept employment. Gradually, over the years, faculty members who feel Koeninger was done wrong will accept jobs at other schools which are not on the "black-

list."

IN THE RED AGAIN--Heavy payments of state aid to the schools in May pulled the state's main checking account -- the general revenue fund -- into the red again.

When May started, the deficit was \$73,934,636. But heavy collections of corporation and insurance taxes wiped out the deficit, which has been present for nearly four years. This put the fund into the black by the middle of the month.

But when the school payments came due, it pulled the fund \$9,391,468 into the red at the end of May. Early June expenditures made the deficit \$28,015,980. It will go back into the black when sales tax payments reach the treasury in July.

CROOKED HOLES--State investigators from the Railroad Commission report that of the first eight oil wells in the East Texas Field tested, seven were "deviated" beyond the three percent allowed by commission rules.

The work is slow, so it may be months, or even years, before the extent of the crooked-hole drilling program in that giant field is known.

Atty. Gen. Will Wilson has filed one civil lawsuit, contending that a group of operators drilled four wells on a slant so the bottoms of the holes were on someone else's property, and that they plugged two more wells with cement before they could be tested.

Civil suits are being filed by oil companies against owners of nearby leases, contending that crooked holes have drained away oil which belonged to them. So far, eight such suits have been filed.

If court-type evidence is found by the commission's engineers and Texas Rangers, evidence will be turned over to U. S. Dist Atty. Wayne Justice for possible prosecutions under the federal law -- usually called the Connally hot pilot act -- which makes it a federal offense to move oil in interstate commerce after it has been produced in violation of state laws

UP AND AWAY. . . Fifteen-year-old Bernie Deaton is about to be placed in a Claborn ambulance by Mrs. Jay Claborn, left and Charlie Bainum. Deaton was rushed to Parmer County

Community Hospital following the spectacular car-truck accident Tuesday, and miraculously came out with no broken bones, it was revealed by X-rays.

or regulations of the Railroad Commission.

LAWYERS ELECT--Buster Cole of Bonham was chosen as president-elect of the State Bar of Texas. This means he will take over as head of the group in July, 1963.

Lawyers elect a year ahead of time. This July, when the State Bar meets in Mexico City, Leon Jaworski of Houston will succeed William L. Kerr of Midland as bar president.

UNIVERSITY OF HOUSTON DEGREE PROGRAM--A curriculum and degree program for the University of Houston, which becomes a state-supported school next year, was approved by the Texas Commission on Higher Education.

It calls for doctor of philosophy degrees in psychology, business and industrial psychology, chemistry, physics and chemical engineering.

Dr. Philip Hoffman, University of Houston president, appeared pleased. He said the Commission's adoption of a large portion of a "role and scope" plan was a "satisfactory recognition of the needs of Houston and the State."

Commission also agreed to consider at its July merger of the law and pharmacy schools at Texas Southern University with similar schools at the University of Houston. A Commission member said he didn't think

the state could afford two schools of law and pharmacy so close together.

GOVERNOR'S APPOINTMENTS--Gov. Price Daniel announced these appointments:

Sol Parks and Mrs. Sally G. Pettus of Goliad as members of the Fannin State Park Commission. Parks succeeds Mrs. Louise Donaghue of Goliad for a term expiring September 5, 1967. Mrs. Pettus succeeds Walter Bluntzer of Goliad, resigned, for a term expiring September 5, 1963.

Jack Hightower of Vernon, O. L. Bell of Quanah, Ralph O. Harvey Jr. of Wichita Falls, Tom Craddock of Seymour and Dr. E. N. Jones of Dallas as members of the Board of Regents of Midwestern Uni-

versity, for six-year terms; Hightower and Bell are new appointees, Harvey was reappointed, Craddock and Jones are filling vacancies. Jones, secretary of the Christian Education Commission of the Baptist General Convention of Texas, is a former president of Texas Tech College.

Russell D. Austin of Andrews as judge of the 109th Judicial District, which includes Winkler, Crane and Andrews counties. He succeeds the late G. C. Olsen. A graduate of the University of Texas Law School and former county attorney of Andrews County, Austin won the district judgeship on June 2.

Rev. Edward H. (Whitey) Campbell of Denton as a mem-

ber of the Governor's Committee on Children and Youth. Rev. Campbell is rector of St. David's Episcopal Church in Denton. He also has served Houston, Rockdale and El Paso churches.

Mrs. J. F. Miller has been visiting the past three weeks in the home of Mr. and Mrs. J.A. Lockhart of New Market, Tenn. She plans to visit the Harvey Whales and other relatives in Baltimore, Md. several weeks before returning home.

"I want to visit some foreign land. Are there any countries left that aren't mad at us--because we've given them money or wheat or something?"

BLACK NEWS

BY BRENDA DEATON

Our community has really been bustling with activity the

past two weeks. Due to the change of reporters the Black news wasn't completed last week so I found it rather difficult to compile the news, I hope everyone will enjoy reading this column this summer, and I'll do my best to report it correctly. We would like to take this

opportunity to welcome Todd O'neil Greeson to our community. Todd, the infant son of Mr. and Mrs. O'neil Greeson arrived Friday, May 25 at 2:10. The little seven pounder was honored with a shower Monday, June 4 at his home. Those attending or sending gifts were Mr. and Mrs. Lester Dean,

Maynard Greeson, Sharon and Paula Dean, Rose Ann and Carlene Greeson, Mrs. S. J. Greeson, Mrs. Ethel Bush, Mrs. Travis Stone, Mrs. Fern Barnett, Mrs. W. W. Whitaker, Mrs. T. J. Presley, Myrtle and Harmon Lindley, Mrs. John Benger, Mrs. Taylor Green, Rita Green, Mrs. Ray Landrum, and Mrs. Helen Fangman. The hostesses -- Carrie Tatum, Anna Mae Hays, Louise Robertson, Florence Benger, and Laura May Deaton served cookies and punch to the group. Recent vacationers in our community are the Bruce Parrs and Mrs. Harry Lookingbill. Mr. and Mrs. Bruce Parr, Iva Ben, Donna, and Kim attended the World's Fair in Seattle, Washington during the week of May 18 through May 27. They toured the fair and surrounding country side of Seattle.

Mrs. Harry Lookingbill visited in California recently along with Mr. and Mrs. Granvel Wade and Shirley of Corpus Christi, Texas. The Wades visited in the Lookingbill home Wednesday and Thursday and Mrs. Lookingbill accompanied them on their remaining trip to California Friday. They visited relatives in Long Beach and San Diego and saw such sights as the Grand Canyon, Painted Desert, and the Petrified Forest during the trip. Mrs. Lookingbill flew home Tuesday of this week.

Rex Braxton is attending the Sho-Me Baseball Camp in Branson, Missouri. Ray's parents, Mr. and Mrs. J. R. Braxton took Ray to the camp May 28 and spent a week in Missouri. Mr. and Mrs. George Frye and Mr. and Mrs. Bill Carthel and boys spent the week end in Red River. All report they had a good time.

Recent guests in the Lloyd Prewett home were Mrs. W. A. Montgomery and her daughter Mrs. Chester Reason with her children from Arab, Alabama. Mrs. Montgomery is Mrs. Prewett's sister. Mr. and Mrs. R. L. Bray and family of Lubbock, Texas also visited in the Prewett home.

Miss Aline King of Dallas, Texas is visiting with the L. L. Deatons this week. Miss King is Mrs. Deaton's niece. Aline and the Deatons visited in Dumas with the E. Y. Crow family Sunday.

Mr. and Mrs. Bill Nazworth, Danny, Mark and Mr. and Mrs. W. J. Nazworth of Friona were recent guests in the J. R. Nazworth home.

Miss Debbie Houlette is visiting with her grandparents Mr. and Mrs. Ellis Tatum this week. The community will be glad to know that little Debbie's injured thumb is healing rapidly.

A reception was held in the Fern Barnett home recently following the marriage of their daughter, Judy to Mike Davis. Guests enjoyed punch and the traditional wedding cake.

Mr. and Mrs. W. A. Galloway of Elk City, Oklahoma visited with the T. J. Presleys Friday. Christine Braxton visited with her parents Mr. and Mrs. P. O. Southall Sunday.

Mrs. Bill Carthel was honored Friday morning with a surprise birthday coffee. Those attending were Mrs. Charles Myers Jr., Mrs. Travis Stone, Mrs. Gene Welch and Mrs. George Frye.

Mr. and Mrs. Gene Welch and children spent Saturday and Sunday visiting relatives in Plainview and Happy Union. They visited her parents, Mr.

Former Resident Buried Saturday

Funeral services were conducted at 2 p.m. Saturday in the Steed Chapel in Clovis for William A. Beasley, owner and operator of the Morgan Hotel.

Mr. Beasley, 78, moved to Clovis in 1930 from Friona. Dr. Herbert Bergstrom, pastor of the First Baptist Church, officiated and burial was in the Lawn Haven Memorial Park.

Survivors include the wife; three daughters, Mrs. Catharine Parr, Friona; Mrs. Irma Thompson, Clovis and Mrs. Francis Snyder of the home; two sons, John R. of the home and A. W. of Clovis; nine grandchildren and eleven great-grandchildren.

Guests in the Wesley Hardesty home Sunday were Mr. and Mrs. Charles Hough, Mr. and Mrs. James Smith and daughter, Anita, of Fluvanna, Tex.

and Mrs. F. B. Harkins and her grandmother, Mrs. W. E. Millwee from Carnegie, Oklahoma and her brother and family Mr. and Mrs. Leon Harkins.

George Frye was honored Friday night with a surprise birthday party. Cake and ice cream were served to Mr. and Mrs. Harland Frye, Mr. and Mrs. Charles Frye both of the Easter community, Mr. and Mrs. Gene Welch, Mr. and Mrs. Bill Carthel, and Mrs. George Frye and Kim.

The Black Home Demonstration Club met Thursday afternoon in the home of Mrs. T. J. Presley. Maxine Price presented the program by giving talks on 4-H Clubs and her recent trip to Mexico. Chicken salad, potato chips, crackers, lemon pie, punch and coffee were served to Mildred Barnett, Christine Braxton, Ann Carthel, Ruth Fish, Anna Mae Hays, Geneva Ivy, Carrie Tatum, Lois Whitaker and her guest and David Whitaker.

Clean Up Day at the Community House was Monday, June 11. There were only a dozen persons present at this monthly event. Let us remember that this is a community project and try to be present next month.

Ettie Musil will present a program on refinishing furniture Friday from two to five. Everyone is invited to attend.

SPILLED WHEAT . . . Much of the wheat in the truck spilled out onto the corner of Sixth Street and Woodland Avenue after the truck, driven by Maldean Houston was hit by Bernie Deaton in a 1957 Chevrolet. The impact knocked the truck's back wheels from their base.

Members Observe Club Activities

Kinsley Past Matron's Club members met Friday afternoon in the home of Mrs. J. T. Guinn, with Mrs. Charles Russell, vice-president, presiding. Mrs. Bert Chitwood led the opening prayer and read a devotional from the book of Matthew, Chapter 13 and verses 24 through 30. Mrs. Guinn installed officers that were present, followed by two Bible contests conducted by Mrs. Pearl Kinsley. The meeting was closed with a prayer given by Mrs. Guinn. July 6, will be the next meeting date and devotional will be presented by Mrs. Guinn. Mesdames Bert Chitwood, Pearl Kinsley and J. T. Guinn were guests at a luncheon in Hereford recently. Program for the meeting was presented by

these three members of the Kinsley Past Matron's Club of Friona.

Also an election of officers was held. They were Mrs. John Patton, president; Mrs. Juanita Hetshey vice-president; Mrs. Vivian Majors, secretary; Mrs. Belle Rhomas, treasurer and Mrs. Jay Sanders, reporter, all of Hereford.

Mr. and Mrs. George Trieder left Wednesday to visit their son, Mr. and Mrs. Dale Trieder and family in Albuquerque,

and they plan to accompany them to Las Vegas and Austin, Nevada. They will be guests of Mr. and Mrs. Gene Zinser in Austin. Mrs. Zinser is the daughter of the Trieders.

Wagner Among Graduates At Valparaiso U.

Charles Alvin Wagner, son of Mr. and Mrs. Melvin Sachs, Route 2, Friona, was among 425 seniors receiving degrees at Valparaiso (Ind.) University Commencement exercises Sunday, June 10.

W.D. Dikemeyer, nationally prominent Lutheran layman and president of Wayne Candies, Inc., Fort Wayne, gave the Commencement address, "A Vision And Its Fulfillment." Dikemeyer is a former head of the Valparaiso Board of Trustees.

Wagner, a mechanical engineering major, was awarded a Bachelor of Science in Mechanical Engineering from the College of Engineering.

Wheat Harvest Gains Momentum In County

HARVEST UNDERWAY... Eugene Boggess, who has a dryland wheat field just east of the Friona city limits, was one of the first to get the harvest machinery into the field last week. Boggess averaged about 15 bushels to the acre, with a moisture content of 11.80 and a test weight of 61 pounds per bushel.

County wheat farmers were trying to get the harvest into full swing this week, with interruptions almost nightly in the form of showers, leaving the grain too wet to harvest.

Observers expected the harvest to be well along by the latter part of the week, barring any further delays, with the beginning of the irrigated wheat harvest expected to break out in full force.

Although the small amount of dryland wheat which has been harvested hinders a close estimate on what the average yields will be, dryland was generally running from 10 to 15 bushels per acre.

With practically no irrigated wheat harvested, estimates on

the yields there are purely guesses so far, but it is thought by some that the yield per acre may not be as good as last year's crop.

The barley harvest likewise is slow, since that crop was also late.

Wheat farmers will have a shot at a 25 cent-per-bushel premium on their crop this year, depending on the sedimentation test.

The Farwell Grain Exchange has been approved to run the tests, and will probably get most of the county business in that respect.

Most elevators plan to run an average on the samples collected, and issue their receipts on the average test.

WITH THE COUNTY AGENT

DERYL COKER

As a whole we got our cotton crop off to a fairly early start this year, but cotton hasn't done as good as it should. The main reason for this has been the dry hot winds, which have sapped up the moisture, and also most cotton has had sand damage which makes it look bad.

I have been in several fields lately and in all instances I have found disease problems and thrip damage. This disease problem seems to get worse each year. Seedling diseases are caused by a number of seed-borne and soil inhabiting fungi and bacteria. As a general rule these diseases are worse during cool wet spring, but this year they have shown up, even though it has been hot and dry. Our nights have been fairly cool which could have aided these diseases. Terms such as damping-off, sore skin, and seedling blight are used as collective descriptions of the disease.

You can find this disease by digging up the plant and at ground level or just below ground level, you will find a brown ring around the tap root. Most of the plant cells in this ring are dead and thus it is hard for the root system to send the plant food to the leave which causes the plant to grow.

If possible you should check the fields for these diseases and if they are present make plans to move your cotton to another location next year. If a farmer could rotate from a fibrous root system to a taproot, it would be a big help.

There are fungicides that can be mixed with the covering soil which will help in con-

trolling seedling diseases. Thrip are also hurting cotton, and you should examine it for thrip damage. If you can't see the thrip look for a silvery color on the bottom side of the leaves. The leaves will also have a wrinkled blackened appearance. Thrip can delay plant maturity for a few days up to a few weeks. Thrips can damage cotton up until it starts squaring.

We have plenty of cotton insect guides available in the office, so come by and pick one up.

I was talking with C. L. Mahaney and he seems to think the cotton that had Di-Syston, the systemic insecticide applied at planting time, was doing considerably better than the cotton where no Di-Syston was applied. He said thrip were present in the cotton that had Di-Syston, but did not seem to be hurting it as bad.

A lot of people are watering grain sorghum and cotton to get it to growing. This is well and good if it needs it, but let's all study the water requirements of the plants we grow, and try to water them accordingly.

Accidents in the farm home kill more than 2,700 and injure nearly 400,000 farm residents each year.

THE HIGH PLAINS FARM AND HOME

Test Well Planned For Artificial Water Recharging Parmer's Rural Accidents Total 12 For Last Month

A new observation well for the artificial groundwater recharge program will soon be added at the High Plains Research Foundation. James Valliant, Associate Water Engineer, stated the new observation well was being added to better study the effect of recharge upon the underground formation. The well will be used to study ground water movement; the effect of suspended solids in recharge water upon the formation; and the effect of acids and detergents on these solids. The well will be cased with 6 5/8 x 0.188 inch casing down to the red beds with perforations beginning approximately 19 feet above the static water level. The observation well will be located 200 feet southeast of the recharge well. Casing for the new observation well was presented to the Foundation by four Lubbock pipe firms.

The Highway Patrol investigated 12 rural accidents in Parmer County during the month of May according to Sergeant W. E. Wells, Patrol Supervisor of this area. These wrecks accounted for one person killed, seven persons injured and an estimated property damage of \$10,820.00. The rural traffic accident summary of Parmer County from January through May of 1962 shows a total of 41 crashes. As a result of these crashes there were three persons killed and 21 persons injured. The estimated property damage amounted to \$25,940.00. Beginning with this month, the Texas Department of Public

Safety lends its support each year to the national "SLOW DOWN AND LIVE" summer-time Safety campaign which, as its name indicates, has as its objective the task of emphasizing the need for motorists to control their driving speed. Speed control is vital to Safety, because of the overcrowded condition of the highways caused by thousands of vacation travelers, most of whom are in a big hurry, since vacation time is usually all too short. The veteran patrol supervisor said, "the hurry attitude frequently steers them into a speeding violation or, worse than that, a serious accident, or even death itself."

HD Agent's Notes

BY MISS ETTIE MUSIL

Picnic time is here for everyone. Maybe wieners or hot dogs is a family favorite for this special time. Have you noticed the variation in prices of a pound of wieners or hot dogs? Here is some information for you picnic shoppers. This information was received from Mrs. Gwendolyn Clyatt, Extension Service food marketing specialist. She states that the list of ingredients on the label of wieners will tell you why some are higher priced than others. Ingredients on the label are listed in order and according to the amounts included. For example, ground beef, pork, cereal, dry non-fat milk and soy flour in the order of amounts.

There are some ingredients, other than the meats, that absorb and hold water, thereby increasing the weight. These wieners are lower priced than the all meat ones because they will have larger amounts of these ingredients in relation to the meat content.

The federal meat inspection mark is the shoppers' guarantee that the product is wholesome, suitable for human consumption, and is honestly labeled. The mark is a round purple stamp with the words "U.S. Inspected and Passed" printed within the circle. The stamp also has a code number that identifies the packing house that processed the product.

Compare the cost with the ingredients and the number of

wieners in each package. It's amazing how much the prices compare and vary from area or section of the state with the same brands. Compare wieners with other picnic meats costs and servings.

Last week we were so excited in getting ready to attend the Texas 4-H Roundup in College Station. This is always a special event for everyone who has worked so hard with their method demonstrations making them eligible to attend the state contest.

We left Tuesday morning at 4:00 to make the 532 mile trip to College Station. We arrived at 3:00 p.m. at which time we registered, found our dorm rooms, and unloaded our belongings for the full days. After district meetings at 5:00 we feasted on delicious barbecue paid for by the Texas 4-H Recognition Committee who are people who donate large sums of money for the 4-H program in the state.

After the general assembly and welcoming of the 2700 4-H members, leaders, parents, and friends of 4-H we attended special activities planned for the group. Everyone could select Share-the-Fun Acts, folk games, square dancing, or bowling. Lights were out at 11:00 p.m. for a tired group of boys, girls, and adults.

We were up at 5:00 to be dressed for breakfast at 6:00 a.m. Gary Foster had to meet at 7:00 for his Tractor Operators contest. Linda Lesly and Linda Gleason had to start at 8:00 in their Electric contest. After the contests we were still a little tense awaiting the results of the demonstrations. Lunch at noon helped us to wait a little longer until all contests were completed. Announcements were made at 3:00 p.m. at which time the three top teams or individuals were revealed.

ELECTRIC SERVICE Plenty of value all over the house

When you buy groceries or dry goods, you make sure you get full value for every dollar you spend. But have you ever stopped to realize the full value you get for every dollar you spend for electric service?

We bet you'll be surprised to realize that you put electricity to work

in so many ways. No doubt about it, electric service is your best value.

It's true — my wages to serve all of my customers' homes averaged just 26 cents a day in 1961.

4-H Conducts Foods Show In Hub Community Center

Parmer County 4-H Favorite Foods Show will be held June 19 at 3 p.m. in the Hub Community Center. This is the first show of this kind to be held in the county.

Fifty-three 4-H Club girls in the county are eligible to take part in the show. According to state rules a 4-H member must be enrolled during the current year in a 4-H foods and nutrition subject matter group taught by trained adult leaders.

Each one entering the show will prepare a serving dish containing all of the food made from the recipe used except two servings. One of these servings will be displayed in the "service for one" exhibit and the other will be served to the judges.

Each display may be set up on card tables or tables available in the Community Center. Appropriate table settings of dishes, silver, and linens should be used to exhibit the food. Table decorations of flowers, figurines or ivy should be used for attractive serving of the food.

A recipe for the favorite food should be typed or

Our contestants did not place in the top three, but they gave the others a hard try. Linda and Linda competed with 23 teams and Gary had almost as much competition. I heard several comments that the teams this year were better than ever before. This only means that the competition was extra hard for this year. You don't just get something for nothing.

We are all still proud of the three Parmer County contestants because they were tops to be eligible to attend the state contest. All first place winners were announced at the banquet at 6:00 Wednesday night.

Another special assembly was held for everyone when the officers and directors of the 4-H Recognition Committee were introduced. Then a comedy and musical show entertained the Roundup delegation as sponsored by the 4-H Recognition Committee.

Thursday morning we left College Station at 5:00 for home, arriving at Clay's Corner at 3:00. We were all happy to get back to cool Parmer County and tired. College Station was so hot and sultry during the three days. Mrs. Therman Gleason and Nelson Foster took their cars for the long drive.

printed on a three by five standing card and set up as part of the display. Another five by eight inch standing card should have a complete day's menu written that includes the food used.

In addition to the food display each girl will be asked questions about the food they prepared. Record books will count fifty percent of the total score. The display and questions will count the other fifty percent.

Foods will be entered in the four foods groups of milk, vegetables-fruit, meat, and bread-cereal. A high scoring member will be judged in each of the four foods groups whether junior or senior division.

The two highest scoring members in the senior division (14-20 years) in different foods groups will participate in the District 4-H Favorite Foods Show in Amarillo, June 26. High scoring members for the junior division (9-13 years) will be judged the same as for the senior division and will take part in the district show.

According to state rules all contestants will do their own preparation, exhibiting, and cleaning up. Any assistance from agents, leaders or others will disqualify the contestant for judging.

Other 4-H club boys and girls not participating in the Foods Show are invited to attend. Parents, adult leaders, and everyone are all welcome to attend.

NEWS FROM THE FARM BUREAU

BY RAYMOND EULER

We think you ought to appreciate your Farm Bureau President, H. P. Hamilton. He had a boy and a girl getting married Saturday evening, but he spent several hours on the phone and in his pickup Saturday morning for you.

He was urging and getting farmers and businessmen to write letters to their congressman in opposition to the administration farm bill, HP 11222. We are confident that if people actually knew the contents and intents of this bill, Parmer County Post Offices would have handled a record volume of mail in opposition. Since most people are not aware of the significance involved, only those who keep up with legislation, or who are informed briefly by those who do, write or wire.

Many farmers have been misled by the report that the bill that came from the Senate Agricultural Committee was "watered down" and made to appear much less harmful. This was a fact. However, when the Senate considered the bill, it was returned to its original form and intent by amendment, and then passed. It is now, (Tuesday) up for consideration and vote by the House of Representatives. This is the only place it can be killed.

Farm Bureau, State, National and County, is using every means possible to kill it. The permanent Farm Bureau Staff in Washington has worked constantly against it. But it is necessary that many letters from individuals be mailed in to give more strength to the opposition.

Professional political pressures will not sway the vote of a congressman armed with thousands of letters from his constituents at home.

The bill in question has many points more serious than these, but these two are easy to understand: if the bill passes, and

4-H Contestants Return From State

Parmer County 4-H Club contestants returned Thursday from Texas 4-H Roundup in College Station. A total of 2700 4-H members, adult leaders, extension agents, parents, and Friends of 4-H attended the annual state contest, June 5-7.

Representing the county were Linda Gleason and Linda Lesly competing with 23 teams in the Electric Awards program. Gary Foster competed in the Tractor Operators program. Earlier in the year they had won in the county and district Method Demonstration contests.

The 4-H Roundup is the highlight of a year's work for the 4-H members. State winners in 27 subject-matter contests were announced at the banquet Wednesday night. Many of these winners will attend 4-H Club Congress in Chicago in November as an all-expense paid trip.

This Roundup was dedicated to Calvin T. Johnson, longtime friend of 4-H and former director of public relations for Sears-Roebuck Foundation. One volume of a resume of his work and seven volumes of appreciation letters were presented to him at the banquet Wednesday night.

The theme of the 1962 Roundup was "Building Upon Our

farmers, in referendum, vote against the provisions, the Secretary of Agriculture will be authorized to dump 200 million bushels of wheat to depress the market you would expect to exist, and 19 million tons of feed grains for the same purpose. We believe you can understand why farmers would vote "yes" in a referendum under these circumstances. And the "yes" vote would give bureaucrats complete control of your farming operations.

If this bill is still under consideration, please express your opinion by telegram to your congressman, Walter Rogers, House Office Building, Washington, D. C. We are happy to announce that Gilbert Kaltwasser was elected to the Steering Committee of the Cotton Producers Institute. He was one of 110 members of the original founders committee.

CONSIDER THIS: Read a chapter in Proverbs in your Bible.

Heritage," commemorative of the Centennial Anniversary observance of the Land Grant College movement in the United States.

Attending from Parmer County were the three contestants and Richard Chitwood. They were accompanied by Mrs. T. L. Gleason, Nelson Foster and Miss Ettie Musil, County Home Demonstration Agent.

The CASE 1000 Combine Ready To Go To Work In Your Wheat Field Now!

In just three years the Case-1000 has taken its place as one of the most efficient, grain-saving, big-capacity combines ever built. Elevator men everywhere remark about the cleaner grain coming from Case combines. Here are a few of the important features that users have given their full stamp of approval!

- * **Exclusive** on-the-go control of both cylinder speed and concaves
- * Big 42-inch threshing and cleaning capacity all the way thru
- * Rigid torsion-tube suspension of header that keeps cutter bar aligned
- * Fast, 500-s-p-m sickle that cuts thru toughest, weediest or down crops
- * Powerful gas, LP-gas or diesel engine . . . extra-heavy channel frame

Two County Men Named To Cotton Producers Board

A 33-man Plains Wide Steering Committee for the Cotton Producers Institute met in Lubbock recently to make decisions and plans for moving the Institute forward during 1962.

The committee, consisting of County Chairmen and other leaders, was appointed by Roy Forkner at the request of the Producer Organizations which initiated the C.P.I. program in West Texas. W. L. Edelman of Friona and Gilbert Kaltwasser of Oklahoma Lane are to represent Farmer County on the Steering Committee.

Mr. Forkner announced that an excellent first year start was made in the western states that initiated the program last year. Well over the one million dollar minimum requirement has been deposited to the C.P.I. escrow account and there will be a program in operation before ginning starts on this crop.

"Total collection this year should reach about \$11/2 million," Mr. Forkner said. A substantial research and promotion program can be started with this volume of money and it's none too soon when we understand accelerated challenge cotton faces from its synthetic competitors. It was pointed out at the meeting that cotton suffered a direct competitive loss of 200,000 bales to rayon during the first three quarters of 1961.

Forkner said, "The Cotton Producers Institute is a must if we are to survive as a major industry in the face of these new competitive threats." The steering committee spent a great deal of time working out a method for the election of West Texas Trustees to the Institute. Based on the formula of one trustee for each \$150,-

000.00 raised, the Plains is allocated two trustees this year. The steering committee unanimously agreed to submit a mail ballot to all participating growers to let them select whom they want to represent them at these important posts. The 33 man steering committee nomi-

nated Roy Forkner of Lubbock County and Allen Webb of Castro County for Place 1 on the ballot, and Le Roy Durham of Floyd County and H. L. King of Terry County for Place 2. The participating grower has write in privileges but is asked to vote for one man at each place.

Tech's 11th Annual Swine Conference Featured July 5-6

The 11th annual Swine Conference will be held on the Texas Tech campus July 5-6. It will feature speakers from Oklahoma State University, Iowa State University and Texas A&M.

Prof. Stanley Anderson, associate professor of animal husbandry at Tech, said the conference will include reports on swine feeding tests run at Texas A&M, a report on research work conducted on atrophic rhinitis and virus pneumonia, and a session on different methods and equipment developed for

swine management programs. A carcass contest will be open to anyone wishing to bring a hog to the conference so it can be butchered and graded according to the per cent lean cuts it will produce.

Anderson said swine breeders or raisers who wish to enter their animals in the contest should have them at the Tech animal husbandry department during the early morning of July 5 so the animals can be slaughtered and processed for the contest.

SOIL CONSERVATION DISTRICT NEWS

Soil organic matter is a term that we hear quite often but a term that is not considered seriously enough. We know that is something that is in the soil and it is a good thing to have but do we know just what does for the soil.

There are many factors that enter into soil fertility and one of the most important is the organic content of the soil.

The organic matter in soils originates from plants, animals and soil micro-organisms. The crop residues, such as wheat stubble, is the main contributing source of organic matter in this part of the country.

The virgin soils of Farmer County contained approximately 3 to 5% of organic matter. Under cultivation this percentage is reduced. The average dryland farm has about 1 percent. The average content of the irrigated land is about 0.7 percent. These figures are considerably lower than the figures for the virgin pasture land.

There are several reasons why organic matter is very important to the soil.

Organic matter present in the soil directly affects the water-holding capacity of the soil. The small fragments of organic matter have the ability to hold up to ten times as much water as a soil particle the same size. Therefore any increase in the organic matter content will increase the amount of water a soil can store. This is extremely valuable to the dryland farmer who depends on water stored in the fall and winter to produce the next crop and to the irrigation farmer who pre-irrigates. Crop production depends on the water stored in the soil.

Organic matter increases the water intake rate of the soil. During the process of decomposition of the organic matter, there is a glue-like substance given off. This substance tends to stick the soil particles together in small clumps called aggregates. A soil that is well aggregated will take water more rapidly than will a soil in poor condition. This is especially true in tighter soils.

To increase the permeability of a soil is helpful in this area where many of the rains fall in a short period of time. A well aggregated soil tends to resist both wind and water erosion. This resistance is due to the fact that several of the smaller particles are stuck together creating a larger aggregate which is not easily moved.

Another important function of organic matter is the increase in bacterial activity. An abundant supply of microscopic bacteria is necessary for plants to be able to use the nitrogen plant food. The bacteria use decaying organic matter for food to supply the energy required to change the nitrogen to a form that plants can use.

Bacteria are also helpful in the plant utilization of phosphates by storing the phosphorus in their bodies to be released all during the growing season. The number of bacteria in the soil is amazing. One gram of soil contains from 100,000 to several billion. This means that there are approximately 5,000 pounds per acre on dryland and 20,000 pounds or more per acre on irrigated land.

Without these bacteria working for us our soils would be infertile. Anyway that we can increase the food supply of these bacteria will increase the fertility.

The most economical way

County ASC Moves Into New Office

Farmer County ASC moved into a new location this week in Farwell, at 114 9th St., a block south of the Sherley-Anderson-Pitman Elevator.

The official opening for the office will be Monday, June 18. "We invite the public to come see our new office, and have refreshments during the day" said Prentice Mills, office manager of the ASC.

Coffee and soft drinks will be served during office hours Monday, from 8 a.m. to 5 p.m.

The new office contains about twice the floor space as the old office had, Mills said. The ASC previously required two buildings in order to house its records.

"Our office is much better arranged now, and we have a better parking area," said Mills. "We hope to be able to give much better service to the farmer," he added.

Something which should be noted is the new telephone number of the county ASC office, which is 481-3311.

4-H Scholarships Available Through Extension Service

Six 4-H scholarships that have to do with conservation are being offered again this year by the Cooperative Extension Service through the National 4-H Service Committee of Chicago and the scholarship sponsors.

Four are for \$1,600 each and are the largest college scholarships offered in the national 4-H award programs. They will be provided for the sixth straight year by Homelite, a Division of Tectron Inc. of Fort Chester, N.Y.

Present or former 4-H Club members are eligible to apply if they are college freshmen planning to major or minor in forestry.

The other two scholarships for \$800 each, are identified as crop protection-crop production. They also will be given for the sixth year by California Chemical Company, Ortho Division, San Francisco.

To qualify, students must be juniors in a college of agriculture, majoring for two years in one or more of the following: agronomy, soils, entomology, plant pathology or horticulture

to supply this needed organic matter is by the efficient use of crop residues and green manure crops. The addition of organic matter increases the amount of plant food available to the plant by speeding the breakdown of the rocks and mineral of the soil. Acids are given off in the decomposition of organic matter. These acids help eat away these minerals leaving the plant food.

When crop residues are burned, not only do we eliminate the main supply source for organic matter but the heat from the fire directly destroys the working bacteria.

The organic matter content of a soil is related to the ease of tillage. Soils that are low in organic matter tend to pack and form clay pans or plow pans much more rapidly than soils high in organic matter. A packed soil reduces the infiltration of the rain and restricts the development of plant roots.

The addition of organic matter will not solve all of your fertility problems; however, it is a step in the right direction.

Premiums Offered By CCC For High Quality Wheat

In an effort to encourage farmers to grow a higher milling quality wheat, premiums are being offered by CCC for high quality wheat offered for loan starting in 1962. The quality of the 1962 crop of wheat is based on the sedimentation value of the wheat at the time it is placed under loan.

The sedimentation test is a simple and rapid way to estimate the strength and quantity of wheat protein. Generally speaking, wheat with a high protein content has a relatively high sedimentation value and vice versa.

Sedimentation values range from about three for very weak wheat, up to about 70 for the strongest wheat. Wheats with a sedimentation value of 40 or more are preferred for flour for use in commercial bread baking.

Wheat with sedimentation values of 60 and over usually contains a protein content above 14 per cent, is of superior gluten quality, has superior baking strength, and is suitable for mixing with weaker wheat for production of commercial bread flour.

Generally the range of values from 40 to 59 indicates a protein content of from about 12 to 14 per cent. The quality of the gluten is usually good. This wheat consists almost entirely of hard wheat (other than durum) and is of the type most widely used for production of bread flour. Hard wheat of recognized weak varieties falls into this range only when of very high protein content which would give it reasonably high bread-baking strength.

Premiums to producers for sedimentation values are as follows:

Sedimentation Value	Premium Cents per Bushel
40-41-42	3
43	4
44	5
45	6
46	7
47	8
48	9
49	10
50	11
51	12
52	13
53	14
54	15
55	16
56	17
57	18
58	19
59	20
60	21
61	22
62	23
63	24
64 and over	25

of their wheat prior to the time it is offered for loan. The producer may determine the sedimentation value of his wheat in one of two ways, depending upon the elevator's settlement procedure to which he delivers his wheat.

If a producer delivers his wheat to a warehouseman who has agreed to CCC to issue warehouse receipts on a sedimentation basis the sedimentation value placed on the wheat will be that agreed upon by the producer and the warehouseman. Generally this would be station average.

For example: If the average sedimentation value of wheat delivered to such a warehouse is 29 then all warehouse receipts would probably be issued to reflect this.

In the event a producer delivers his wheat to a warehouseman who has agreed to settle with CCC on a protein basis, he may request, before he unloads, that a sedimentation test be made on his wheat. In this case producer's warehouse receipt will show the actual sedimentation value of the wheat delivered by him. A sedimentation test will not be made by a "Protein House" unless the producer requests it. The cost of having this test made will be around \$3.00.

In the case of farm-stored wheat placed under CCC loan, a sedimentation test will be made in all cases.

Tests made to date indicate that at least a part of the wheat grown in Farmer county does have a sedimentation value high enough to warrant a premium if placed under CCC loan.

Out of 48 tests run to date in the county, the sedimentation values ranged from a low of 33 to a high of 67, the average being 46.

For further information on this subject, producers may contact the ASCS office or one of the following men, who are ASCS committeemen: Archie L. Tarter, Louis Welch, Tom Beauchamp, Darrell Norton.

The three soil testing laboratories operated in Texas by the Agricultural Extension Service, during March and April, handled 4,330 samples. They came from 173 Texas counties, from Mexico and Nicaragua and Colorado, New Mexico and Oklahoma, according to W. F. Benet, extension soil chemist.

"ENJOY IT WHILE YOU CAN, THERE IS NOT MUCH SOIL LEFT ON THIS FARM."

Cotton Marketing Problem Topic of Dallas Meeting

Major marketing problems of the U. S. cotton industry will be examined at a meeting in Dallas July 10-11, according to the National Cotton Council.

Attending the Cotton Marketing Conference at the Statler Hilton will be farmers, ginners, merchants, spinners, machinery and instrument manufacturers, research and education workers, and others associated with this phase of the industry.

Burris C. Jackson of Hillsboro, president of the Council, will open the conference with an address on the need for increased efficiency in producing and marketing cotton.

Program for the first day will include reports on the value of "area" programs in quality improvement, preservation and marketing; impact of modern mill processing on quality; potential influence of Common Market on U. S. exports; tolerances and fiber specifications in marketing; fineness and strength values in merchandising; length and other properties important to manufacturing; and data processing in merchandising and manufacturing.

The second day will feature discussions of the influence of ginning practices on market values; economics and effects of multiple lint cleaning; and new developments in instrumentation.

New Peace Corps Project In Brazil

The Peace Corps has accepted an invitation from the Government of Brazil to send 163 Volunteers to assist the San Francisco Valley Commission in the integrated development of the 2000 mile long river valley. This program will affect directly 5 1/2 million people who now live in the valley area.

Volunteers will be assigned to agricultural extension work, rural community development, rural electrification, irrigation, health education, sanitation and social work.

The project requires 89 agricultural specialists and workers with training and/or experience in various agricultural, forestry and home economics skills, 13 electrical engineers and/or electricians, 1 dentist, 6 nurses, 8 medical technicians, 10 health and social workers, 15 mechanics, 2 marine diesel repairmen, 4 radio technicians, 4 cottage industry instructors, 3 geologists, 3 well diggers, 2 fishing technicians, one carpenter, one cotton textile worker, and one audio-visual specialist.

Training of Volunteers selected for this project will begin

about July 30, 1962, and will include on-the-job skills, as well as language and culture of Brazil. Prior knowledge of Portuguese will be helpful, but it is not a requirement for selection.

Volunteers must be American citizens at least 18 years of age. There is no upper age limit. The basic educational requirement is a high school education. Greater formal training or experience is required for some positions. Married couples are eligible if both husband and wife qualify and they have no dependents under 18.

Volunteers receive a living allowance for food, clothing, housing, medical care, transportation and incidentals plus a termination payment of \$1800, based on \$75 for each month of service.

Peace Corps applications may be obtained from local post offices, county agents, Peace Corps Liaison officers at colleges and universities, or from the Peace Corps, Washington 25, D.C. They should be completed as soon as possible and returned to the Peace Corps, Washington 25, D.C.

The HAPPY HOMEMAKER

BY JUNE FLOYD

Many readers of this column probably receive The Workbasket. Anyone who doesn't will probably enjoy using this recipe for dried orange peel which I copied from it.

Do you like the taste of orange peel? If you do, try using some in cookies.

First wash and dry orange before peeling. Place peels in shallow pan and place in a very low oven and dry. It may be necessary to repeat this process several days in succession before all moisture is gone and peel is completely dry.

Then put between soft cloth and pound with small kitchen hammer. Be careful not to leave large lumps. Sometimes it will take several tries before powder stage is reached and cloth may have to be changed as it wears through.

When in powdered stage, put in small jars (such as sandwich spread or mayonnaise jars) using one large and several small ones.

Sometimes lids have printing on them. If this is the case they may be sprayed white or covered in foil.

You will find many uses for powdered orange peel. Not only is it tasty in cookies but try adding a spoonful to breads, puddings and cakes. These also make decorative little gifts when slipped in attractive boxes and tied with pretty ribbons.

Something new on the market which will be of interest to all homemakers who sew is a pattern case. This delightful piece of equipment comes with a washable leather-like plastic cover, has one dozen indexed dividers and holds up to 25 patterns.

Summertime is punch time. A tall glass of cold punch is a good "picker-upper" just about any time of day. If you haven't tried one of the new recipes developed with gelatin bases, try this one.

PARTY PUNCH
Empty into large bowl:

2 packages cherry or raspberry flavored gelatin
Pour over gelatin:
2 cups hot water
Stir until gelatin dissolves. Cool. Add 3/4 cup lemon juice, 1 cup pineapple juice, 3/4 cup orange juice and 3 cups ice water. Pour over ice cubes or cracked ice and float thin slices of orange and lemon rind in chilled punch.

Another cold drink recipe that you will want to try when preparing for a crowd of 30 to 40 is

FRUIT PUNCH
1 pint grated pineapple
2 pounds granulated sugar
4 cups boiling water
2 cups hot tea
2 cups loganberry juice
9 lemons, juiced and grated
6 oranges, juiced and grated
5 quarts ice water
2 quarts ginger ale
Cook sugar and boiling water 10 minutes. Add pineapple, cook five minutes more. Strain, cool, add fruit juices. At serving time add ice water. Place large block of ice in punch bowl. Add ginger ale just before serving.

Just about everyone has tried German Chocolate Cake, but have you ever tried German Chocolate Pound Cake? The following recipe is recommended by Mrs. Bill Phillips of Springlake.

GERMAN CHOCOLATE POUND CAKE
2 cups sugar
1 cup shortening
4 eggs
2 teaspoons vanilla
2 tablespoons butter flavor
1 cup buttermilk
3 cups flour
1/2 teaspoon soda
1 teaspoon salt
1 package German Sweet chocolate
Cream sugar and shortening; add eggs and flavoring. Add milk, melted chocolate and dry ingredients. Pour into greased and floured tube pan. Bake about 1 1/2 hours at 300 degrees. Cover tightly until cool.

Mr. Farmer:
Mr. Rancher:

Your Financial Problems are handled best by a lender who has experience and whose primary aim is to provide you with a loan suited to your needs—and at the lowest possible cost. We specialize in making such a loan—a Federal Land Bank loan. Annual or semi-annual payments with terms up to 35 years and you may pay in full at any time—without penalty. Call on us for a loan on your farm or ranch.
