

Annual Junior Rodeo Kicks Off Friday

DON LIGHT

Stinnett Coach To Come Here

Newspaper people are, after all, just people, and people make mistakes. Last week we got some pages transposed in the Star. So what?

Last Friday and Saturday the annual Panhandle Press Association convention was held in Amarillo. In Saturday's issue of the Amarillo Daily News appeared a summary of Friday's activities. A story about newspaper people. You'd expect it to be correct to the letter, but it wasn't.

The writer went by the printed program rather than what actually was presented, and consequently had person on the program who didn't even attend the convention. Also, a typographical error (we hope) had the featured speaker giving plaudits to daily newspapers, rather than weekly papers, as he actually did.

We all make mistakes -- big or little, and sometimes they come in embarrassing situations. But in the newspaper business, above all others, it always soothes you to see the other fellow make a mistake.

One of the items discussed at the convention was the practice by some elected bodies (such as school boards and city councils) of going into "executive sessions" to exclude the press from their meetings.

It was unanimously agreed that this was a definite breach of freedom of the press, although the newspaper's method of recourse drew some varying opinions.

Last Thursday we drove around part of Parmer County with representatives of the High Plains Underground Water Conservation District, and were impressed by the work being done by both the men and county farmers as well.

The district has quite a program going in Parmer County. The project in the Hub area is a new venture of its kind. Water district officials have been "headquartered" in Parmer County so much lately that they rent a Friona motel room by the month -- they find it cheaper that way.

Those farmers who don't already will someday appreciate the work being done by the water district, which is attempting to assure them of a longer future in irrigated agriculture.

The water district was also instrumental in sponsoring the Shurbet water depletion case in a Federal District Court recently. This case may eventually allow farmers to deduct irrigation expenses, or a part thereof, since it is contended that irrigation water is being "mined" and cannot be replaced.

And to think that some hard-nosed counties in the area refuse to belong to the water district, going their merry way pumping irrigation water down the barrow ditches as if it would never run out.

Many people are attracted to Lubbock's "Prairie Dog Town" in Mackenzie State Park. Being in an area where we still have a little pastureland left, naturally we have some Prairie Dogs in their natural habitat in Parmer County.

(When they get into cultivated land or places otherwise unwanted, however, they can become as much of a pest as they are a drawing attraction to Mackenzie Park.)

But I wonder how many county residents have noticed the good-sized "town" located immediately south of the Parmer County Gin on state highway 214? This dog village, located six and one-half miles south of Hub or three and a half miles north of Clay's Corner, has a much larger area, and bigger population, we'd say, than the Mackenzie "town."

With a sign or two to advertise it, and some provision for cars to pull off the highway, seems to us tourists travelling Highway 214 would have something worth stopping to see.

Rodeo season will be kicked off in Friona this weekend with the annual junior rodeo sponsored by the Friona Junior Chamber of Commerce.

Those who enjoy the sport of the Old West should enjoy seeing youngsters (19 and under) competing Friday and Saturday nights and Sunday afternoon.

Superintendent of Schools Alton Farr this week announced the hiring of Don Light, head football coach and athletic director at Stinnett the past five years, as head coach for Friona High School for 1963-64.

In his five years as head coach of the Rattlers, Light's teams won two district championships, twice advancing as far as the state quarter-final playoffs, and once bowing in the semi-finals.

Stinnett has had a 38-16-3 record under Light the past five years. An interesting sidelight is that exactly half of the losses, eight, came last season. Stinnett's first in AA classification.

Light's best record was in 1960, when Stinnett posted a 13-1 mark, losing to Albany, 9-6, in the semi-finals. Albany went on to win the state class A championship. His 1959

team had an 11-2 record. They lost to Sundown in the quarter-finals, Sundown was state runner-up to Katy.

In 1961, Stinnett had an 8-2 record, finishing second in district to Gruver, who lost out in the regional playoff game.

DON LIGHT

Light's 1958 team had a 5-3-2 record. That team tied White Deer, eventual state champions, in a non-conference game. As mentioned, last year's 1-8-1 record was Light's worst as a head coach, coming at a rebuilding stage and a jump in classification.

"It's hard to break a school's habits, whether they are winning habits or losing habits, but we're coming to Friona with the intentions of winning," Light told the Star this week.

Before becoming head coach, Light was assistant at Stinnett for two years. He served as assistant at Ralls for two years previously.

A graduate of West Texas State in 1954, the 30-year old coach is married, and has two daughters, ages five and three. The Lights are members of the Methodist church. He has been given a one-year contract.

P-TA Action Set On Legislation

Friona Parent-Teachers Association will vote at its meeting tonight on the controversial national legislative program.

A panel, which will include Alton Farr, Superintendent of Schools, and Raymond Cook, high school principal, will discuss the program, which is in the form of a ballot.

The meeting will be at 7:30 p.m. at the School Cafeteria. Other items to be considered will be the future structure of P-TA in Friona.

The national legislation program is not adopted until at least 31 states have approved it. The state of Texas decided to take the ballot method of finding out how the state feels about the program.

"This is a completely democratic process, for I know of no other organization which has taken such a step," said Florence Danforth, president of the Texas Congress of Parents and Teachers.

This is the first time the national legislation program has been presented in this manner to local units. Most organizations present such matters at state or national conventions.

Among the questions on the ballot are views on further federal aid to education, child welfare, and whether the United Nations and its specialized agencies should receive further cooperation from the National Congress of P-TA.

All members of the organization are urged to attend this meeting, which is of the utmost importance due to the business to be settled.

AT DIMMITT

Locals Attend Meet On Draw Progress

Several Parmer County residents attended a meeting of the Steering Committee of the Running Water Draw Watershed project in Dimmitt Tuesday night.

The committee was making final plans for its priority hearing with the State Soil Conservation Board next Wednesday. The hearing will determine how far "up the ladder" the five-county, two-state project will be placed.

There are many such projects which have made application through the State Soil Conservation Service, but the local project is the largest in land area, it was pointed out Tuesday.

A priority hearing is necessary to see if the planning and engineering can be begun earlier than if the project merely "waited in line." The planning of the multi-million dollar project is expected to cost in the neighborhood of \$70,000.

Officials want to present the state board with evidences of interest locally in the project, as well as evidences of flood

damage and losses in the history of the draw. Officials are gratified with (Continued on Page 2)

Work Day Set By Sophomores

The Friona sophomore class will sponsor a work day Saturday for the purpose of raising money for the "Bernie Deaton Fund."

Anyone needing work of any kind done is requested to call 4701, 4872 or 2771 in Friona. Class members will accept contributions rather than set a price for their work. All proceeds will go to the Deaton fund. Deaton, 16-year-old son of Mr. and Mrs. Everett Deaton of Friona, was critically injured February 27 when a .22 caliber rifle discharged and the bullet struck him in the face, lodging near the brain.

The youth was hospitalized in Amarillo for a time, but is currently at the Parmer County Community Hospital.

SOME CITIZENS OPPOSED

Association Wants To Locate Here

The Friona Planning and Zoning Commission postponed action Tuesday on a proposed headquarters for a new labor association which wants to be located in Friona.

A meeting was rescheduled for next Monday at 1:30 p.m. Nineteen citizens were present at the Tuesday meeting, objecting to the location of the labor association headquarters in their part of the city.

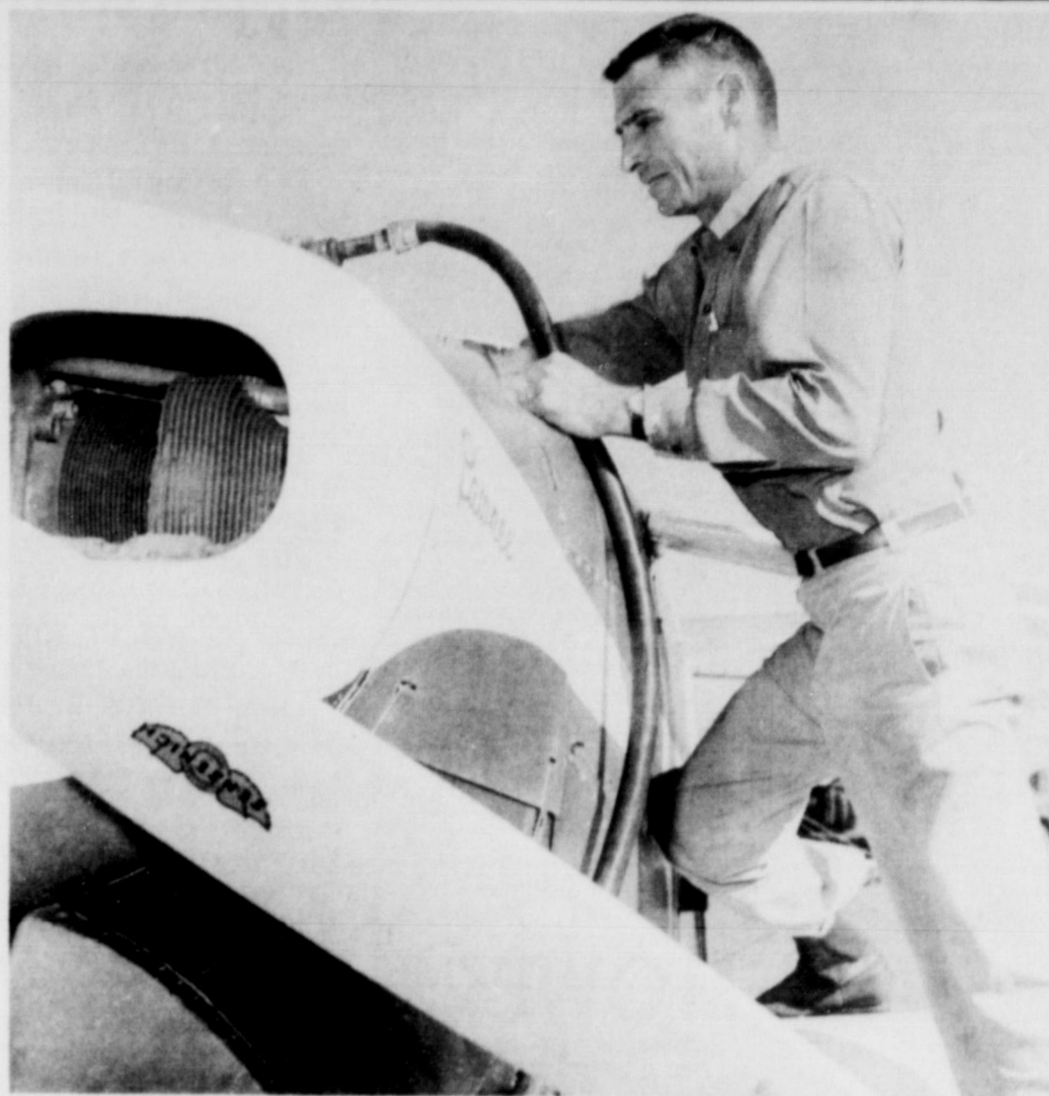

The association has made preliminary plans to purchase a site to the northeast of the present labor camp in the southeast section of town, directly across the road from a feedlot operated by Pete Buske.

The citizens at the meeting were all from the southeastern portion of Friona, objecting to having the association locate in that neighborhood, although the zone has been classified under the "multiple-dwelling" heading since the city was zoned in 1955.

"The only reason I can see for objecting to the location of our headquarters in Friona would be for the people to object to the Braceros coming to town to spend their money," said Bruce Parr, who represented the association, known as the Farmers and Ranchers Labor Association.

"This will be a Bracero placement association -- not a transient labor camp," Parr pointed out. He said that while the association will have facilities for 100 men, they will be sent out to farmers and businesses as they are needed, and the "camp" should never be filled at any one time.

Parr said that with the location of the sugar refinery at Hereford, there will be a large

MOSQUITO MISSION . . . Fueling up for a flight Wednesday morning was Loyd Messenger of Benger Air Park. Messenger gave the lakes and areas around the city of Friona mosquito dustings. In an effort to cut down on this summer's mosquito population.

JCs Set For Three Big Days

The third annual Friona Junior Rodeo will be held Friday through Sunday at the Jaycee arena. The rodeo is sponsored by Friona Jaycees.

The rodeo is limited to persons 19 of age and under. Entries must be accompanied by an entry fee of \$10 in cash or money order, which includes two go-rounds.

Also accompanying the entry must be a "minor's release," signed by the parents or guardians of the entrant.

Events will include bare back bronc riding, bull riding, tie down roping, barrel racing, pole bending, and ribbon roping.

Stock is being produced by Melvin McGarrough of Perryton. Because of limited stock, there will be a limit on the number of contestants to about 10 per event, with the exceptions of the girls' events, rodeo officials said.

Glenn Reeve, Jr. is the rodeo chairman.

Times for performances Friday and Saturday are 8 p.m. each night. Sunday's performance will be at 2:30 p.m.

HDA Convention Drew 300 For Meet Here

Around 300 women attended the annual spring meeting of District 1 of the Texas Home Demonstration Association here Thursday.

"This is the most responsible moment in our history. We as homemakers must make our voices heard over the clamor of the world," challenged Mrs. L. M. Parker, THDA state secretary from Liberty Hill. Mrs. Parker was one of two

state THDA executives present for the meeting. Also on hand was Mrs. Gladys Kolander, College Station, the state home demonstration agent.

"The only people who are free and can remain free are those who are worthy of it," said Bob Wear, Church of Christ minister from Canyon who was the main speaker for the convention.

"We must not be remembered

as the generation who lost our most cherished heritage -- our freedom. Our real strengths and riches are going to have to be found in the moral and spiritual values of our people." Wear told the group of ladies.

Raymond Fleming, mayor of Friona, presented greetings to the group. Judge Loyde Brewer gave the welcome, and inter-

(Continued on Page 2)

Pickup Taken From Company

A 1951 GMC pickup-truck was stolen from the Friona Motors lot last Thursday. A salesman for the company, Darrell Read, reportedly met the vehicle while enroute from Bovina to Friona, where he intended to get the pickup for a customer.

Read spotted the vehicle about 9 a.m. Thursday, and thinking some one else had already sold the pickup, didn't think too much about it. It wasn't until about noon Thursday that company officials realized the vehicle had been stolen.

GOOD ATTENDANCE . . . Practically every chair was filled at the City Hall meeting room Tuesday for the meeting of the planning and zoning commission. Most of the citizens were in

opposition to a proposed Bracero Labor Association locating in Friona--at least in their part of town.

Editorial Comment : Can Friona Continue To Bypass Opportunities For Growth?

The Friona Planning and Zoning Commission has a mild dilemma. The Farmers and Ranchers Labor Association wants to open a Friona headquarters.

The association investigated sites and started proceedings to buy property. But citizens of the southeastern part of town do not want the association to locate near them. They say it will deflate the value of their property.

So they came en masse to the commission meeting Tuesday to protest. Same old story. Zoning requirements entirely in order, but citizens want to change it.

The association has to have water, sewer and power connections to meet Department of Labor specifications, so it must be in or near the city limits.

The Braceros wouldn't stay at the headquarters always. It would merely act as a central clearing house for farmers, gins, potato sheds or whoever needs laborers. These places usually have their own facilities for keeping them.

Also, dollars are often spent when farmers go into a town to pick up some laborers. They need an implement, or some other item, so they buy it while they're in town.

Bracero laborers aren't as bad as many people might think. Only the best men are allowed to come in the first place. Those who have worked them swear by them -- trouble is an unknown commodity. They have to tow the line, or else they are sent back home.

Hereford would like to have the association headquarters. With the coming of the sugar mill, there will be more labor needs. Association officials saw a chance to bring some dollars into Friona.

We heard something at the commission meeting we wish we hadn't heard. Some of the citizens said "Let Hereford have it if they want it."

Officials say the payroll could amount to \$500,000 in a Bracero labor association. Much of that money would be spent here, and farmers who come after laborers spend money here.

Surely a solution can be worked out so that the association can have its headquarters here. Muleshoe and Littlefield have similar successful operations. It's worth a try.

Anything you go into has certain drawbacks. We understand that a sugar refinery doesn't always smell too sweet. But that didn't keep the people at Hereford from working for the \$20 million industry. Certain sacrifices have to be made for any kind of advancement.

Most of the people who said "Let Hereford have the Association" were elderly people. You have to admit that it is an unprogressive attitude. We favor a young, strong, vigorous Friona which will fight for an addition, rather than willingly hand it over to someone else.

HDA Convention--

(Continued from Page 1)
jected some points on the history of Parmer County. Several counties volunteered to host the 1964 convention, although the site was not definitely agreed upon. Ladies registered from Armstrong, Carson, Castro, Collingsworth, Dallam, Deaf Smith, Gray, Hansford, Hartley, Hutchinson, Lipscomb, Moore, Ochiltree, Oldham, Potter, Randall, Sherman and Wheeler counties, as well as the host county.

Council Awards Paving Contract

The Friona City Council, in a special meeting April 12, awarded a \$6,125 contract for sealcoating 20 blocks in Friona to Pioneer Pavers, Inc., of Lubbock.

The Council also voted to install a four-inch main to be installed in the 1200 block of Elm avenue to give residents of the block an adequate supply of water. A petition was presented by Troy Ray and Claude Miller, expressing their desire to install sprinkler systems on their lawn if they could be assured of adequate pressure.

Councilmen also voted to present partial payment to Chicago Bridge and Iron Company on the construction of the water tower, in the amount of \$23,172.42. On recommendation by the consulting engineer, the additional \$23.35 was paid to W. B. Abbott, who constructed the tower's foundation.

Draw Progress--

(Continued from Page 1)
the progress the Running Water Draw project has made in recent months. Counties included are Parmer, Castro, Lamb and Hale in Texas and Curry County, New Mexico. Those attending Tuesday's meeting from Friona included Jimmy Smith, A. L. Black, Bruce Parr, Loyde Brewer, Tom Lewellen and Bill Ellis.

Mona Epley Plans June Wedding

Mr. and Mrs. J. S. Epley of Stanton, announced the engagement and approaching marriage of their daughter, Mona, to Bill Lane of Lamesa, son of Mr. and Mrs. E. E. Terry, Tulla, at a coffee in their home from 9:30 to 11:30 a.m. Friday.

Mrs. Gomer Alsop, Midland, aunt of the prospective bridegroom poured coffee and Mrs. Bob Cox, cousin of the bride-elect, served punch. The serving table was centered with a yellow and white arrangement of roses in a silver container, flanked by yellow candles, carrying out the honoree's chosen colors.

Those in the receiving line were the bride-elect, her mother, Mrs. E. E. Terry and Mrs. H. R. Brumfield, Ralls, grandmother of the prospective bridegroom.

Miss Epley is a graduate of Stanton High School and former student of Howard County Junior College and Southwest Texas State College. She is a member of Kappa Lambda Kappa.

Lane is a graduate of Ralls High School and former resident of Friona. At the present time he is an assistant manager of Modern Implement Company in Lamesa.

Jaycee Wives Elect Officers

At a recent meeting of Jaycee Wives in the community room of Friona State Bank the following officers were elected: Juanita Reeve, president; Melba

Smiley, vice-president; Ann Nazworth, secretary-treasurer; and Carol Zetsche, reporter. Plans were made for vests

to be worn at the rodeo and for improvements on the concession stand at the arena.

Ann Nazworth, Melba Smiley and Joyce Veazey were hostesses at an Easter party for Mrs. Beene's first grade class Friday of last week.

In a called session Friday evening gowns were made for graduation exercises for Spanish speaking first graders.

Members of this organization, which is open for membership to any woman whose husband is a Jaycee, are Juanita Reeve, Melba Smiley, Joyce Veazey, Linda Williams, Kay Renner, Carol Zetsche, Ruth Carson and Johnnie Walters.

Also Peggy Banks, Carol Houston, Ann Nazworth, and Florence Stifford.

Mrs. Reeve invites everyone who attends the rodeo this weekend to visit the concession stand.

Mrs. Bobby Fulks Honored Recently

A kitchen shower in the home of Mrs. Dale Williams recently honored Mrs. Bobby Fulks, who was Marilyn Brandon, before her recent marriage.

Guests were greeted by the honoree, her mother, Mrs. C. R. Brandon, and mother-in-law, Mrs. Neal Fulks. Those in the receiving line were presented corsages by the hostesses.

Guests were registered by Donna Fulks. Refreshments of nut bread and spiced punch were served. An arrangement of pink

grapes, pink roses and greenery was used for the centerpiece on the serving table, which was covered with a white lace cloth over pink.

Hostesses were Mesdames Leonard Coffey, Walter Cunningham, Weldon Dickson, Joe Johnson, Cayson Jones, Sam Jones, Jim McLean, O. C. Rhodes, Dale Williams and Glen Williams.

Friona Woman's Club Has Easter Program

Theme of the Wednesday afternoon meeting of Friona Woman's Club at Federated Club House was "Easter-The Birth of Hope. Scripture around which the program was built was "Let us rejoice that Christ our Lord has risen.

Roll call was answered with a verse of scripture. Mrs. Edgar Carney presented the meditation. Her topic was "He's Alive." Mrs. Lillian McLellan presented "The Voice of the Cross."

Mrs. Sue White, a guest, sang "When Jesus Came" by Hoffmeister. Jan Styka's "The Story of the Crucifixion" was reviewed by Luella Maurer.

Refreshments of pineapple salad, wafers, nuts and mints were served by the hostesses, Mrs. Malinda Schlenker and Mrs. Fred White, to the sixteen members present and one guest.

(Births recorded by Justice of the Peace Walter Loveless)
March 24 -- Edie Marie Owen, five pound, 12 ounce daughter of Mr. and Mrs. Charles Randolph Owen, Bovins.

March 30 -- Jana Renee Brown, six pound, 11 ounce daughter of Mr. and Mrs. Jerry Brown.

April 8 -- Deborah Ann Banks, eight pound, four ounce daughter of Mr. and Mrs. John C. Banks.

April 9 -- David Paul Vaughn, six pound, four ounce son of Mr. and Mrs. Odell Windell Vaughn.

April 10 -- Rhonda Lynn Johnson, six pound, one ounce daughter of Mr. and Mrs. Jerry Dean Johnson.

Son Born To Odell Vaughns

Mr. and Mrs. Odell Vaughn became parents of a baby boy at Farmer County Community Hospital at 6:56 a.m. Tuesday, April 9. He weighed 7 lbs. 4 ozs. and was named David Paul.

Grandparents are Mr. and Mrs. Elwood Vaughn and Mr. and Mrs. William H. Myers, Casper, Wyoming. Mrs. Vaughn and David have been dismissed from the hospital.

Son Born To Lester Deans

Mr. and Mrs. Lester B. Dean became parents of a baby boy at 5 p.m. Monday, April 15, at Farmer County Community Hospital. He was named Marty Ryn and weighed 8 lbs. 4 ozs.

Mrs. S. B. Dean, Muleshoe, is the paternal grandmother.

Altar Society Meets In Regular Session

The regular monthly meeting of the St. Teresa of Jesus Altar Society met Thursday evening with Mrs. Lynn Chitwood, president, in charge.

Plans were discussed for making new altar linens. Mrs. Erma Schilling was appointed secretary. Those present were Mesdames Mary Ann Camp, Stella Shirley, Martha Koelzer, Lynn Chitwood, Erma Schilling and special guests, Mrs. Alex Jesko and Mrs. Anna Schmitz, Canyon.

Father Claver Giblin, S.A., served as moderator.

Local Couple Marks Golden Anniversary

Mr. and Mrs. J. M. Watson, 1006 Maple, observed their Golden Wedding Anniversary Friday. Friends of the couple were invited to join children and grandchildren for a surprise informal visit from 7:00 to 9:30 p.m. by their daughters.

Silver and crystal appointments were used on the serving table, which was centered with a yellow and gold floral arrangement topped with the numbers "50". Cake, coffee

and punch were served. Host couples were Mr. and Mrs. R. L. Bates, Mr. and Mrs. Nelson Welch, Mr. and Mrs. Eugene Bogges and Mr. and Mrs. Harold Lillard, all of Friona; Mr. and Mrs. Dalton Teague, Amarillo and Mr. and Mrs. Don Hunt, Groom, daughters and sons-in-law of the Watsons.

About 80 persons called.

Easter Guests In Drake Home

Mrs. A. O. Drake was hostess at a family dinner in her home Sunday. Out-of-town guests were Mrs. Treva Reece, Canyon; Mrs. Frances Howard, Abernathy; Mr. and Mrs. Bailey Lee Reece, Janet, Kay and Rick, Tulla.

Frionans present were Mr. and Mrs. Arthur Drake, Betty and Peggy; Mr. and Mrs. Earl Drake, Owen, Larry and Bobby; and Mr. and Mrs. Jerry Brown and Jana.

Weekend guests in the home of Mr. and Mrs. Karl Bender were Mr. and Mrs. Visalo Weis and family and Mr. and Mrs. Alex Stevens and family all of Amarillo and Mr. and Mrs. Vidian Weis and family of Perryton.

Ladies Host Area Artists

There will be a "painting party" conducted by Mr. and Mrs. Louis Jurack of Plainview at the Black Community House Tuesday, April 23, from 9:30 a.m. to 5 p.m.

The Plainview artists specialize in Dresden painting--figurines, lamps and so forth. Anyone interested in painting is invited to attend the session.

Mrs. Dick Rockey and Helen Fangman are serving as hostesses for the meeting. Ladies are requested to bring their lunch and spend the day.

It's A Girl For Johnsons

Rhonda Lynn is the name Mr. and Mrs. Jerry Johnson chose for the baby girl born to them at 5:59 p.m. Wednesday April 10 at Farmer County Community Hospital.

Older children of the couple are Lee Ann, 6, and Jerry Wayne, 5.

Grandparents are Mr. and Mrs. Louie Johnson, Weatherford, Okla. and Mr. and Mrs. Raymond Hughes, Friona.

Mrs. Burton Tells Of Future Teachers Present Skit Reports From Japan

By Mrs. Bill Burton
(Editor's Note: The following is the third in a series of articles by Friona's representatives to the Japan New Life Movement, who leave Monday)

Since others have told of plans and preparations for the Japan New Life Movement, I would like to tell of some of the results already seen. We receive a news letter each week keeping us informed of the many happenings of the Crusade.

First there was an area-wide meeting in Tokyo in which 3,000 decisions for Christ were made. At Kokura the first two nights of an area meeting almost 400 decisions were made. A Missionary, viewing a crowd of 2,800 who had come on a rainy, cold night to the gym of a steel company, said, "I am surprised anyone came."

At Nagoya with cold rainy weather they too drew several thousand for three nights and almost 500 decisions--one pastor was reported as "beside himself" at the sight of his church of 26 members drawing a crowd of 250 in a blinding snow storm. "This is the most thrilling thing I've seen in Ja-

pan," remarked Southern Baptist Missionary Corky Ferris, Sunday morning the pastor of Oimachi Church broke down and wept . . . It took several minutes for him to regain composure. The reason was a tremendous revival which had swept his church with decisions of 60 and 80 seen on successive nights. Another missionary took a look at the Crusade and described it as "equivalent to 50 years of missionary work."

Two teams, C and D, are yet to go and will work in other cities. Their results are yet to be reported and Team D will conclude the New Life Movement in Japan. There will be additional meetings in other areas such as Hong Kong and Taiwan. We will be in team D and will be in a revival in Hong Kong following the Japan meeting. We are hoping and praying that this movement will not end when all of us have returned home, but will continue under the leadership of local pastors and missionaries. May I express my deep appreciation and thanks to each of you who have had a part in my getting to have a part in the movement.

Several members of Friona's Ethel Benger chapter of Future Teachers of America, sponsored by Mrs. Ernest Osborn and directed by Mrs. John Benger, participated in a skit which was part of the program at the Saturday evening meeting of the Delta Ix Chapter of Delta Kappa Gamma meeting in Hart.

Miss Heather Gordon, exchange student from Hereford and a native of Johannesburg, South Africa, was the special speaker.

Pioneer teachers of the area were special guests. FTA members attending the meeting included Sharon Reeve, Gayle White, Clare Savage, Martha Knight, Mary Knight, Brenda Deaton and Kay Neel.

Other Frionans attending were Mrs. L. B. McClean, Mrs. Ernest Osborn and Mr. and Mrs. John Benger.

Next meeting of the organization will be a coffee in the homemaker's cottage of Farwell High School May 4.

Dixons Host Aggie Muster

Former students of Texas A&M College who live in Parmer County will meet at the Jim Dixon home, which is located six miles north and twelve miles west of Friona or twelve miles north, two miles west and one north of Bovina, at 8 p.m. Sunday, April 21. In attending this muster, the Aggies will be carrying on a tradition that is 60 years old.

The Parmer County Muster will be one of more than 500 similar ceremonies held all over the world where Texas A&M College former students pay homage to their fellow classmates who have passed on, and humble tribute to the Texans who won the freedom of the state at the Battle of San Jacinto near Houston some 127 years ago.

Jim Dixon, chairman of the muster, urges all A&M men to attend the program. Others to appear are Andy Hurst, M. C. Osborn and Bill Bailey.

Business Centers Discussed At Meet

"Planning Home Business Centers" was the title of Mrs. Bill Brandt's program at the Monday meeting of the Rhea Home Demonstration Club in the home of Mrs. Joe Allen.

During the business session, which was presided over by Mrs. Jack Patterson, Mrs. Franklin Bauer gave a report on the THDA convention to be held in Friona.

Mrs. Jack Patterson and Mrs. Leland Gustin will be pages at the convention and Mrs. Charles Sanders and Mrs. Bill Brandt are to sell luncheon tickets. Mrs. Dwayne Ridley opened the meeting with a hat game. Those present were Mesdames Joe Allen, Franklin Bauer, Bill Brandt, Leland Gustin, Jack Patterson, Cordie Potts, Dwayne Ridley, Charles Sanders, Walter Schueler, Shirley Smith, Norman Taylor and Clyde Tims.

The next meeting will be in the home of Mrs. Shirley Smith at 8 p.m. April 22. A program on artificial respiration will be presented by Mrs. Franklin Bauer.

"Conscience is the still small voice that makes us feel still smaller."

It is our greatest desire to conduct ourselves in a Christian way and to represent our church, our town, our state and our nation as our people would have us to.

We feel that we are fortunate to be on the last team to go to Japan. The results, we hear, are far beyond expectations and we shall have the joy of seeing those results as well as the pleasure of participating in the final weeks of the Crusade.

We have been surprised to learn of so many people in and near Friona who have been in the Orient and have appreciated all of the advice and pointers we have received. Charles often comes in from work with a new sheet of Japanese phrases to learn before we have mastered the last one. The Jake Outlands have been most helpful with those.

There has been much sacrifice for the New Life Movement all over the state of Texas and beyond. Several churches in our vicinity have sent their pastors--First Church at Hereford sent Rev. Bill Davis and his wife. They are on the field now. Those that weren't asked to send a pastor have contributed financially for the radio and television and the many other expenses that are in an Evangelistic Crusade of such great magnitude. Many pastors preached revivals and gave their love offering. Our own Pastor preached a revival in Amarillo and contributed his love offering.

We are proud of our own church for sending the Burtons to work and for their willingness to carry on at home with an interim pastor in his absence. Of course the sacrifice goes both ways--The Burtons will be away, not only from their church family but from their own three children.

When I think of going to the Orient I like to think of this quote from Charles Kingsley-- "It is not darkness you are going to, for God is light. It is not lonely, for Christ is with you. It is not an unknown country, for Christ is there." And it is our hope and our prayer that many, many of the people there will surely know our Christ at the close of the New Life Movement.

Oh, Here's ole' icy fingers. We have the "touch" for dependable service. We're friendly folks who want to keep our goodwill and do everything we can to make it possible.

Friona

Apparently the most exciting event in Friona this weekend will be the third annual Jaycee junior rodeo. There will be a lot of visitors in town and each of us should cooperate in every way possible with the Jaycees and their wives to make our visitors feel welcome.

Improvements and repairs are being made on rodeo facilities and everything is in readiness for a tip top show. Wives of the Jaycees have done a lot of work on their concession stand and have planned to take care of refreshment needs of all visitors.

Our neighbors, the Albert Rolens, have just returned from a fishing trip and visit with relatives and friends in North Central Texas. I'm not right sure what happened when Albert and Dennis Robards of Sherman, a former Frionan, went fishing at Lake Texhoma.

A report in the Denison Herald indicated that Robards caught an unusually large fish. He and the fish were pictured on the sports page and anyone who doubts the ability of this transplanted West Texan to catch the big ones would enjoy seeing the picture.

Feel sure that Albert didn't go along just for the ride, but his catch must have been smaller or the photographers would have caught him, too.

Several changes have been made in local beauty shops recently. Eva Lou Weaver is back in her former place at Dorothy's Beauty Shop on Main Street, Letha Turner is filling in at Patti's for Shara Lookingbill, who is home taking care of

her new baby. Mildred Rule and Lillie Taylor are in the process of moving their Vogue Beauty Shop from south Main Street to a newly constructed shop at the Rule home in the extreme southeast part of town.

Members of the sophomore class are to be commended for the project they have planned for Saturday of this week. Each member of the class plans to do any kind of work available and pay for the labor will go into a fund for Bernie Deaton.

Deaton, who was a member of this class at the time of his accident several weeks ago, is a patient in the local hospital and his condition is critical.

In order for their project to be a success it will be necessary for townspeople to cooperate by calling on them for any jobs which need to be done.

Think some ducks and geese in this area must have their sense of timing out of gear. There are still a number of them on a lake just north of our house and apparently they have no intention of leaving. Maybe they have lost their instinct for migrating and will spend the summer with us.

If they become permanent residents, we will enjoy watching the ducklings and goslings this summer. Several pheasants, who make their home in the pasture, have become gentle enough to venture out so we can see them.

This would be a fine world if all men showed as much patience all the time as they do when they're waiting for a fish to bite.

Melba Allen Gives Japan Impressions

Several months ago when the Burtons, Charles and I started talking of the coming trip to the Orient to take a part in the New Life Movement, it was so far in the future that I had trouble believing that we would really go. Now that the time is practically here, we are getting so excited that I wonder if that by Monday next we may not just rise and fly without the aid of a plane.

The regular news bulletins and letters of advice that we have received periodically have

added to our interest in the crusade in Japan and to our anticipation. Now that our Pastor has accepted the invitation to preach a second revival in Hong Kong we are looking forward to a week there also.

Personally, I have not had too many duties of getting ready to go. I have left all of the chores of securing passports, visas, and arranging for passage to Charles. He didn't, however, take my shots for me. Happily that is all behind us and the task of packing is uppermost in our minds.

The news bulletins say that it has been snowing, raining and blowing in Japan last week, so we must go prepared for winter there and summer weather in Hong Kong--and with only forty-four pounds of luggage for each one of us. But we didn't have to make all of the decisions of what to take by ourselves. The Baptist General Convention Committee on preparations advises us to dress in dark, conservative clothing. And of course we want to do all things to help along the cause for which we are going. We were told that the first thing to pack is a cloak of humility and a gracious manner. That we shall try to do--

Mrs. Crump's Services Held

Funeral services for Mrs. Mary Crump, who died at Parmer County Community Hospital at 11:10 p.m. April 3, were conducted at First Baptist Church at Cone. Burial was in Cone cemetery.

Mrs. Crump, who was the mother of Mrs. Doc Savage and grandmother of Mrs. J. R. Bartlett, both of Friona, was born at Bonham, Feb. 12, 1875.

Other survivors include three sons, V. C. Crump, Levelland, L. C. Crump, Texico and T. B. Crump, Bethel Island, Calif., eleven grandchildren and 20 great-grandchildren.

HDA SPEAKER . . . Bob Wear of Canyon is shown as he addressed the district Home Demonstration Association convention here last week.

Hat contest winners in the four third grade rooms Friday are pictured above. They are Jan Peters, who was first place winner in the section taught by Miss Jo Phillips; Denise Frazier, who represents Mrs. Wana Brewer's room; Kathy Horton, from the section taught by Mrs. June Rhodes; and Sheila Struve from Mrs. Gladys McVey's room.

Carlton Held Church Opens In Stabbing New Addition

Aubrey Carlton, Jr., of Friona is being held in the Philippines where he is stationed with the Navy following a stabbing death in Manila last Friday night.

Carlton, 19, and a friend, James Gay of Fish Haven, Idaho, were "playing around" in a club just outside the Subic Bay Naval Base, according to reports, and Carlton didn't realize the blade to his knife was open.

Witnesses confirmed the fact that the two had not been quarreling. They reportedly walked out of the club together, when Gay clutched his chest and collapsed.

Carlton is the son of Mr. and Mrs. Aubrey Carlton of Friona.

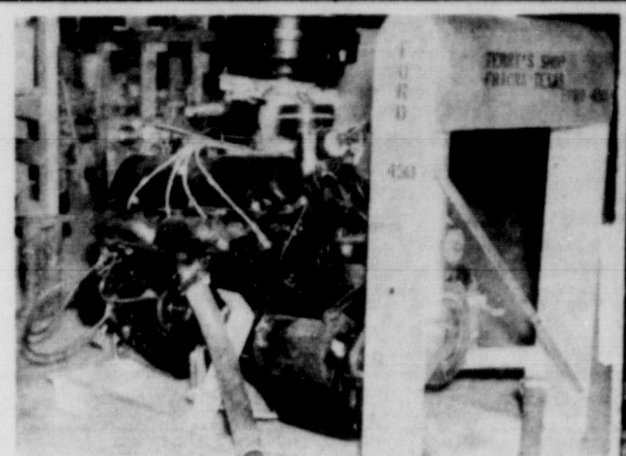

The Methodist church will move into its new educational unit Sunday. A goal of 400 for Sunday School has been established, according to Rev. Russell McAnally, pastor.

An open house will be held later, date to be announced.

Tommy rushed in from playing with the boy next door. He looked worried, and said, "I'm sure I'll catch it, an' be awful sick!"

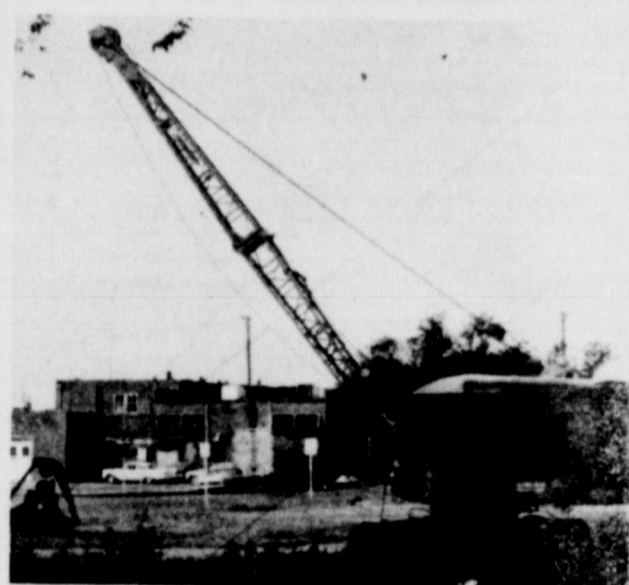

"Catch what?" asked his mother.

"I just heard Jimmy's mother tell his daddy that Jimmy had a crony, I'm sure I haven't been vaccinated for that, have I, Mother?"

Gene Welch Elected Community President

In a meeting of the Black Community Club at the Community House at 8 p.m. Thursday Gene Welch was elected to head the community organization for the coming year. Other officers elected to serve with him were Johnny Mars, vice-president; Mrs. Travis Stone, secretary-treasurer; and Mrs. John Bengler, reporter.

The meeting began with a covered dish supper. Hosts were Mr. and Mrs. Johnny Mars, Mr. and Mrs. Bill Carthel and Mrs. Helen Fangman. Arrangements were made by the hosts, who also prepared and served

coffee, punch and bread. During the business session a committee was appointed by Burl Fish, outgoing president, to investigate and report on the water supply and condition of pipes in the building. Travis Stone, Les Gibson and Ellis Tatum were on the committee.

The next community meeting will be Thursday, May 9. President Welch urges all residents of the community to mark this date on their calendars and then attend the meeting. "We have an interesting program planned and some important matters to attend to," says Welch.

FRIONA ENTRIES . . . These are the entries in a recent county-wide contest from Friona to select a county drawing to be reproduced in stone at Palo Duro State Park. The contest was sponsored by the Panhandle Heritage Foundation.

Farwell Youth To Be Honored In Sunday Fete

Brad Billingsley, son of Mr. and Mrs. Cal Scott Billingsley. Farwell, will be honored at 4 p.m. Sunday, April 21, during dedication ceremonies for the first section of the Southwest's first Symphonic Drama Theatre in historic Palo Duro State Park.

He drew the winning Farmer County historical sketch which is to be duplicated in stone and placed at the theatre entrance.

County officials and others who have worked on the theatre project are expected to attend and will be recognized.

Clint Formby of Hereford will serve as master of ceremonies.

The program will include remarks by Maurice Turner of Parks Board; Mrs. Ples Harper, of Canyon, president of the Texas Panhandle Heritage Foundation; Lee Bivins, chair-

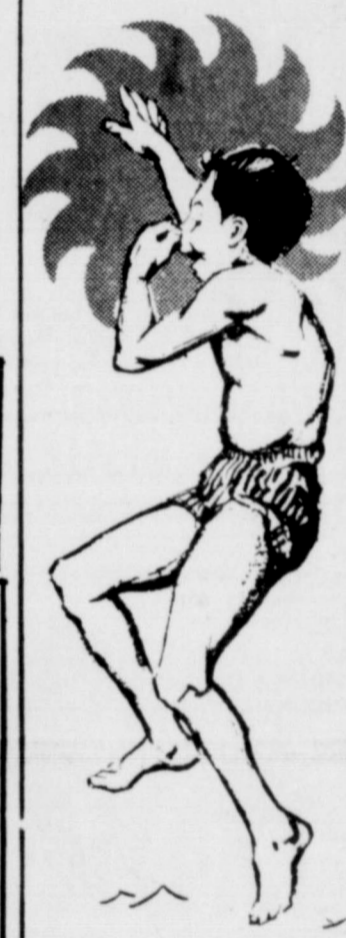

See Dallas Coldiron for Plymouths and Vallants Georgia at 27th Amarillo, Texas 28-4tc

man of the Fine Arts Council of the Amarillo Chamber of Commerce; and representatives of the Top of Texas and Caprock districts of the Texas Federation of Women's Clubs.

Principal speaker will be R. B. Johnston, an Amarillo educator and noted Panhandle historian.

Each student winner from 40 counties will receive an Award of Honor, and his original sketch which is to be placed on display in the school he attends.

All sketches will be on display at the theatre prior to the ceremonies.

Troop 56 Has Monthly Meet

Cut Scout Troop 56 had its regular monthly pack meeting at the school cafeteria Monday evening of last week.

Mrs. C. L. Lillard's Den 8 opened the meeting with den members holding posters spelling out A-M-E-R-I-C-A. The audience then joined the boys in singing "America."

Den 3, of which Mrs. Doris Sides is the den mother, presented a number of songs and

a skit. After each boy participating in the skit introduced himself, the group shouted "April Fool" in unison.

Weldon Dickson, Cub Master then presented awards earned by the boys. They were as follows:

Leon Mendoza, bear badge, 1 silver arrow point, 1 gold arrow point.

Gilbert Teal, wolf badge, 1 gold arrow point.

Something To Think About
6th. Street Church of Christ
Box 515 -- Friona, Texas

tells them to do because they cannot understand or see why that thing should be done or how it will work. When we walk by faith and see that Christ asks us to do a thing we do that thing whether or not we can see why He has spoken as He has and how it will work out. The fact that he says for us to do a thing is "reason enough" for true faith to obey. Faith says, "Speak Lord, for Thy servant heareth, and he heareth to obey." Those who walk by sight say: "Yes, the Lord said it, but I am not sure yet whether it is the thing to do. Speak Lord, and thy servant will obey IF he can figure out why you commanded the thing and how it will work in all situations." The person who does that is not walking by faith. He is obeying Christ only in those things that his own reason commends to him, and when his will and reason does not agree with the will of God, he does not walk according to that particular commandment. That man is walking according to sight and not by faith; and that is not the way that the Christian is commanded to walk. When conflict exists between human reason and a command of Christ, there is only one thing to do, obey Christ.

Sports Weekend Set At Tech

Visitors to Texas Tech for the Region One Interscholastic League Meet will have free entertainment in the form of a baseball doubleheader and an intra-squad football game here Saturday.

Berl Huffman's Red Raider baseballers met Eastern New Mexico at 1 p.m. Saturday and J. T. King's gridders split up for a game at 7:30 p.m.

The Regional Meet, in tennis, golf, and track, starts Friday and includes winners from Districts 1-8AA, 1-8A, and 1-12B.

Another spring football game is scheduled for 4 p.m. April 27. A charge of \$1 for adults, 50 cents for all others will be made for the second game.

Meanwhile, the Texas Tech track team, returned from Mexico City, will travel in the opposite direction, to Lawrence, Kansas, for the Kansas Relays Friday and Saturday.

And the tennis team will also be away, playing Southern Methodist in Dallas Friday and Texas Christian in Fort Worth Saturday in Southwest Conference matches.

In conjunction with the final spring game, April 27, there will be a football coaching clinic beginning the afternoon of April 26. The Red Raider Relays, open to state meet qualifiers, will be held 1-4 p.m. April 27.

Mr. and Mrs. Kirby Williams and daughter, Kell Jon, of Lubbock spent the Easter holidays visiting in the home of Mr. and Mrs. Johnny W. Hand and Wessie. Mrs. Williams is the former Jonnie Hand.

FOOTSAVING EDUCATION

by James E. Edwards

GIRLS' FEET VS. BOYS'

The sad plight of AMERICAN FOOT-HEALTH came to light in the selective service examinations for World War I.

There were no Wacs, Waves, or Women Marines in that war so there are no statistics to compare.

In World War II the examining doctors WERE NOT VERY EXACTING ABOUT FOOT DEFECTS among the men so, again, the statistics would not be reliable.

It is a safe bet that if the same tests were applied there would be FAR FEWER FOOT DEFECTS AMONG WOMEN than among men. The reason? It is fun to take little girls shopping AND THEY LEARN TO BUY INTELLIGENTLY. It is easier to leave little boys at home and to bring them a pair. The boys don't care, either, AND THE BUNIONS WON'T HURT until they are grown men.

FOR WATER CONSERVATION

Hub Area To Be "Showplace Of The Plains"

By BILL ELLIS
Editor, Friona Star

THE HIGH PLAINS FARM AND HOME

A 36-section area in Farmer County is being made a "test area" by the High Plains Underground Water Conservation District. Because of this, the section, and eventually perhaps the entire county, may be able to extend its productive life by a number of years through better management of its underground water.

The Farmer County area was picked for the project for a couple of reasons. First, it was an area where waste needed to be curbed. Also, Farmer County still has a large percentage of its underground water, so that if good practices are adopted, farmers can extend the life of their water before it becomes critical.

The test area extends three miles every direction from Hub, including all farms in the resulting square of this area.

The water district authorities pointed out that Farmer County has used approximately 15 per cent of its available water supply, based on measurements in observation wells by the district since 1946.

This figure compares with percentages which are higher in many counties in the southern portion of the district. Farms in some sections are already feeling the pangs of a limited supply of water, spawning from

mis-use, and many years of irrigating with the idea that their supply was unlimited. Farmer County began to develop its irrigation fully in the early 1950s, and just in the last 10 years has it reached its full potential.

The Farmer County project is the only one of its kind in the entire water district. If it proves profitable, similar ones may be established in other counties.

Statistics prove that something must be done. According to water table measurements by the High Plains Underground Water District, the Farmer-Castro-Deaf Smith area experienced the largest water decline in the entire district during the past year.

Water levels fell from as little as one foot in some wells to 12 and 14 feet in others. A crew from the HPUWD has been working in Farmer County since spring watering started.

They have installed several "weirs" in barrow ditches, which measure the amount of tailwater which is being lost.

Purpose of the weirs is mostly for educational reasons. Wayne Wyatt, water district field representative, who has been working in the Farmer County area the last year and a half, puts it this way:

"The farmer doesn't know for sure, and we don't know exactly how much tailwater he is losing. By using the weir we get a good picture of the amount."

Wyatt explains that many times a farmer doesn't think he is wasting enough tailwater to merit installing some form of tailwater re-circulating system. The weir usually proves otherwise.

Then, too, the presence of the weirs along with the water district personnel often makes farmers more waste-conscious, and they are a little stricter.

The 36-section project is designed to be a "showplace of the entire district." "We are going to show farmers throughout the High Plains what can be done through re-circulating systems," Wyatt says. "We're extremely pleased with our progress so far," he continued.

Wyatt and the other water district officials are impressed by the improvement in the amount of wasted tailwater in the county this year as opposed to last year, saying it was almost 100 per cent better.

Tom McFarland, district manager, says Farmer County farmers have been particularly cooperative with district officials.

"There are very few cases of farmers being resentful toward our operations. They are saying 'Show us what to do and we will try to do it,'" McFarland said.

He pointed out that the officials realized the county's problem with its "tight soil," something farmers farther south do not have to contend with.

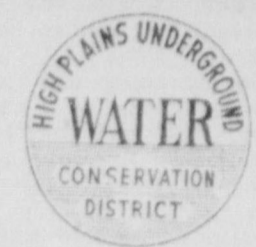

"Keeping water out of the roads eventually benefits all residents of the county," one of the officials said. "It saves the county money in maintenance of its roads," he said.

Also, tailwater often carries Johnson grass seed and weed seed down barrow ditches, where it grows and blows onto adjoining land the following year.

Wyatt is keeping a chart on every farm in the 36-section area. He has gauges in every lake and pit, to show the amount of water which comes in, and is pumped out. He hopes to correlate figures for each irrigation well to determine the amount of water used on each farm, and how much it cost, with particular emphasis on how much money a tailwater

WATER MANAGEMENT STUDIES

WAYNE WYATT, field representative with the High Plains Underground Water Conservation District, indicates one of the signs in Farmer County which proclaims the district's water management studies.

GEHL CHOP - ALL HARVESTERS

Chop-All 1 Row
You spell "Capacity" with a capital C when you put this big 2-row Chop-All through its paces on your farm. Six husky gathering chains go to work to help satisfy its huge capacity . . . cut your field time in half . . . finely chop over 50 tons per hour. Here's a chopper that untangles the tall, pulls even and sure for continuous in-the-field operation.

GEHL 2-Row
"Keeping water out of the roads eventually benefits all residents of the county," one of the officials said. "It saves the county money in maintenance of its roads," he said.

SELF-PROPELLED Built Like Your Tractor

... Picture Yourself on This One!
Whether it's your own hay or low-moisture grass silage that you're putting in or if it's custom work, this is a real money-making combination. It covers acre after acre without jamming or breakdowns. You can depend on the Gehl Self-Propelled to keep rolling when hay quality is at its peak. If you're working by the acre, here's the machine that sets new records on chopping speed. It pays for itself in extra acres chopped with this high capacity hay pick-up head.

Screwworm Case Alerts Cattlemen

A screwworm infestation discovered in Liberty county in late March served as a sharp reminder that it is not too early in the season for livestock producers throughout all of Texas to be alert for evidence of the pest.

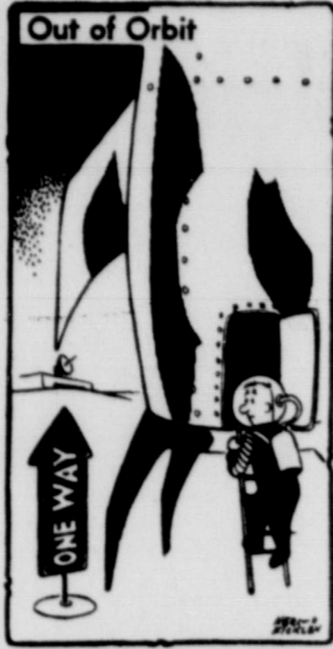

In most years, livestock producers in Liberty county do not experience screwworm infestations until late spring; however, the March discovery points up that stockmen already need to be watching for screwworms, eradication officials stated.

Authorities noted that because the infestation near Liberty was detected during the early stages of the maggots' development and was reported promptly to eradication headquarters at Mission, it was possible to quickly implement emergency measures to prevent the spread of screwworms to other areas. Sexually sterile screwworm flies were being dispersed on and near the infested premises within 48 hours after the case was discovered in the wound of a goat.

Liberty High School vocational agriculture students were lauded for their fast action in collecting a sample from the animal and reporting the case to Mission by telephone. Officials stated the action by the students and their teacher may have prevented spread of screwworms into East Texas and Louisiana. The Liberty class is

one of many vocational agriculture departments throughout the state cooperating with the Southwest Screwworm Eradication Program by contacting producers and reporting all screwworm infestations found.

Eradication authorities said that similar screwworm outside of the overwintering area can be expected in the months ahead, but they are confident they can be controlled if livestock producers will keep their animals under close surveillance, treat wounds with approved insecticides and report infestations promptly.

WITH THE COUNTY AGENT

DERYL COKER

Greenbugs develop to large numbers under certain conditions and may cause serious losses. These plant lice suck sap from plants of all small grains. Infested fields may have small "deadened" areas during the winter. Later, greenbugs in these spots may continue to increase and soon migrate throughout the field. In some cases, entire fields of grain are killed. Greenbugs cause more damage when wheat or small grains are suffering from deficient moisture in mild win-

ters and cool springs. The greenbug reproduces rapidly at temperatures between 55 and 75 degrees F. Its natural enemies, however, reproduce very slowly when the temperatures are below 65 degrees F. Thus, in cool weather the greenbug may increase to enormous numbers while the numbers of its natural enemies increase slowly.

Make a minimum of five counts, each consisting of 1 linear foot of row, at random while walking diagonally across the field. More counts may be necessary where large acreages are involved. Greenbugs should be shaken from the plants onto a piece of paper or cloth and counted. If greenbugs are numerous, estimate the number present.

The necessity for applying insecticides for greenbug control depends on such factors as the number of greenbugs present, size and vigor of plants, variety, temperature, time of year, moisture conditions, state of growth and presence or absence of parasites and predators. As might be expected irrigated wheat can withstand larger populations of greenbugs without marked loss in yields.

Results of experimental tests during the past 5 years indicate the most benefits from applications on insecticides on wheat resulted when they were applied in March and April. It is impossible to outline specifically the condition under which insecticides should be applied for greenbug control. However, the information presented in the following table may serve as a guide for determining the need for treatment.

Time of Year	No. of Greenbugs Per Linear Foot	Plant Height Per Linear Foot
February	3"-6"	100-300
March	4"-8"	200-400
April	6"-16"	300-800

The appearance of small deadened areas caused by greenbug feeding is also a good indication that insecticides should be applied. Occasionally populations of 25 to 50 greenbugs per foot in very young or spring planted small grain may warrant treatment. This is especially true where oats and barley are involved. Both oats and barley are considerably more susceptible to greenbugs than wheat.

Willy was sobbing bitterly. Between sobs he told the teacher: "I don't like school, and I have to stay here until I am 16."
"Don't let that worry you," consoled the teacher. "I have to stay here until I am 65."

The HAPPY HOMEMAKER

BY JUNE FLOYD

Several requests have been received for a Milky Way cake. The only one I have seen that was baked locally was bought at a bake sale and I didn't learn the maker's name, so this isn't a Farmer County recipe.

I copied it from Petticoat Patter in the Canadian Record and it was printed thusly:
Mrs. Bud Hoobler's Milky Way Cake

Melt in top of double boiler:
8 bars Milky Way
1 stick oleo
Cream together:
2 cups sugar
1/2 cup butter flavor
Add:
4 eggs
Cream mixture well after adding each egg. Then add:
1 cup buttermilk
2 1/2 cups flour
1/4 teaspoon salt
1/4 teaspoon soda
1 cup chopped nuts
Add Milky Way mixture last. Bake in greased and floured tube pan at 275 degrees 1 1/2 to 2 hours. Cake will pull away from side of pan.

Graduation time is almost here again and this year it seems most difficult to select gifts that will be used and appreciated by the recipients.

If the graduate for which you plan to buy a gift is a girl, your problem is somewhat simplified, but even then it is difficult to select a gift which seems exactly right.

You can purchase material by the yard which is specially treated to prevent silverware from tarnishing. From this material you can fashion holders for knives, forks, pitchers, platters or other pieces.

These holders will make attractive gifts that are sure to be appreciated by any girl who is collecting items for her future home.

If you are counting calories, you will want to try the following recipes. The basic recipe is for Wonder Marshmallows and there are two variations.

Wonder Marshmallows
1 envelope Knox unflavored gelatine
1/2 cup sugar
1/3 cup water
2/3 cup light corn syrup
1 teaspoon vanilla
4 cups corn flakes
Mix gelatine and sugar thoroughly in a small saucepan.

Add water. Place over low heat and stir until gelatine is dissolved.

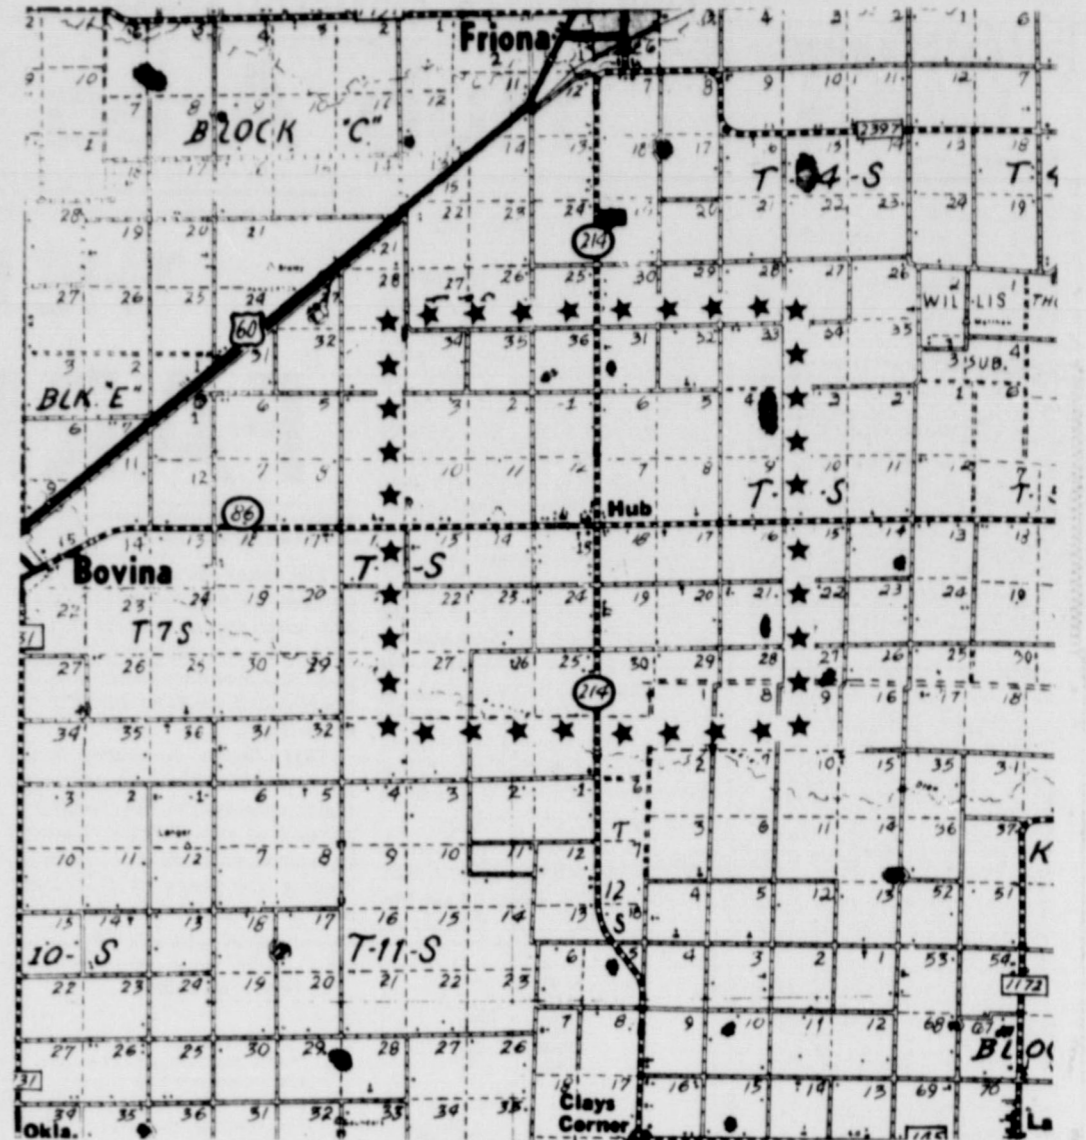

Pour corn syrup into large bowl of electric mixer; add gelatine mixture and vanilla. Beat on high speed until mixture becomes a thick and of a soft marshmallow consistency, about 15 minutes.

Grease well a pan 7 x 10 x 1 1/2.
Crush corn flakes with a rolling pin, using part to line sides and bottom of pan.

Pour in marshmallow, smoothing off top with spoon or knife, and sprinkle top with part of remaining corn flake crumbs. Let stand in cool place, (not refrigerator) until well set, about 1 hour.

To remove from pan, loosen around edges with knife and invert on cookie sheet or board. Cut into squares with a sharp knife moistened with cold water.

Roll in remaining corn flake crumbs to coat sides of marshmallows.
Variations:
For Coconut Marshmallows: Roll in 3 cups toasted flaked coconut. Proceed as for marshmallows rolled in corn flakes.
For Ginger or Chocolate Marshmallows: Roll in 18 crushed gingersnaps or crisp chocolate cookies. Proceed as for marshmallows rolled in corn flakes.

THE AREA ENCLOSED in stars is the 36-section test area which the High Plains Underground Water Conservation District proposes to make a "showplace" of water conservation for the entire district 1. Records are to be kept on each individual farm, showing the effect of the conservation efforts.

A couple of city salesmen stopped in a farm yard. While looking around for the farmer, they noticed a small calf that somehow had got its tail caught in a knothole in the barn door. Peering around a corner the farmer heard this bit of conversation.
"I can't figure how that calf ever got through that little hole," said one salesman.
"Well, here's what puzzles me," said the other, "if he could get that far, why can't he get the rest of the way through?"

A Dutchman was explaining the red, white and blue Netherlands flag to an American.
"Our flag has a connection with our taxes," he said.
"We get red when we talk about them, white when we get our tax bills, and we pay them till we're blue in the face."
"That's just how it is in the U.S.A.," said the American, "only we see stars, too."

new PIONEER brand Grain Sorghums

At every stage in the crop season, new Pioneer brand grain sorghums offer you real advantages. Vigorous, high germinating seed gets your crop off to a fast, sure start. Uniform head height, good exertion, and strong standability—a result of advanced breeding and careful seed production—make harvesting run smoothly, helps you cover more acres per day.

Add to these advantages the high yields of Pioneer brand sorghums . . . and you have a crop that spells both profit and satisfaction.

Choose from three new Pioneer brand sorghums: 848, 846, and 820. They cover a maturity range from RS 610 to full-season numbers. Bred by one of America's leading hybrid seed producers, Pioneer brand sorghums can put you—and your sorghum crop—on "safe ground" this year.

REPORT of Mabel Reynolds County Treasurer of Parmer County, Texas, of Receipts and Expenditures from January 1 to March 31 1962, inclusive:

JURY FUND, 1st Class	
Balance last Report, Filed Dec. 31, 1962	\$ 6,407.67
To Amount received since last Report	503.12
By amount paid out since last Report, Ex. "A."	188.00
BALANCE	\$ 6,722.79
ROAD AND BRIDGE FUND, 2d Class	
Balance last Report, Filed Dec. 31, 1962	1,728.40
To Amount received since last Report	499.12
By amount paid out since last Report, Ex. "B."	100.00
BALANCE	\$ 2,127.52
GENERAL COUNTY FUND, 3d Class	
Balance last Report, Filed Dec. 31, 1962	\$ 44,304.22
To Amount received since last Report	49,880.12
By amount paid out since last Report, Ex. "C."	30,876.15
By amount transferred to other Funds, since last Report	4,000.00
BALANCE	\$ 59,308.19
PERMANENT IMPROVEMENT FUND 4th Class	
Balance last Report, Filed Dec. 31, 1962	19,934.18
To Amount received since last Report	499.12
By Amount paid out since last Report, Ex.	22.50
BALANCE	\$ 20,410.80
RIGHT OF WAY FUND 5th Class	
Balance last Report, Filed Dec. 31, 1962	20,909.92
To Amount received since last Report	15,399.61
BALANCE	\$ 36,309.53
LATERAL FUND 6th Class	
Balance last Report, Filed Dec. 31, 1962	25,827.92
By Amount paid out since last Report, Ex.	4,782.57
BALANCE	\$ 21,045.35
SOCIAL SECURITY FUND 7th Class	
Balance last Report, Filed Dec. 31, 1962	2,566.34
To Amount received since last Report	1,052.98
To Amount transferred from other Funds, since last Report	8,000.00
By Amount paid out since last Report, Ex.	2,095.23
BALANCE	\$ 9,524.09
FARM TO MARKET R.&B. FUND 8th Class	
Balance last Report, Filed Dec. 31, 1962	73,797.54
To Amount received since last Report	69,602.94
By Amount paid out since last Report, Ex.	30,403.57

Farmers Give Opposite Views On Wheat Election

(Editor's note: The following letters were submitted to High Plains Farm and Home, dealing with the 1964 wheat program. Each takes a different viewpoint in the election. Frank Hinkson was for a time candidate for U. S. representative

for the 19th district. Smith is president of Farmer County Farmers Union.)

The issue in the May 21 wheat referendum is not \$2-per bushel wheat versus \$1-per bushel wheat. The issue is whether the American farmer or the Federal Government will manage the farms of America.

From a dollars and "sense" standpoint I can see where a "no" vote in the referendum will be to my advantage. Let us start in from the dollars standpoint. If the referendum carries there will be a loan. National Average, of \$1.30 per

bushel on all wheat produced on allotted acres. The penalty for over-planting would be so severe I am assuming everyone will plant only allotted acres. There would be a certificate worth 70¢ per bushel on 80% of each farm's normal yield as set up by committees. My normal yield is 33 bushels per acre. Yet in the Lazbuddie community of Farmer County, where I farm, 50 bushels per acre and more are common yields. So I would get a certificate worth 70¢ per bushel on 80% of 33 or 26.4 bushels per acre of allotted wheat. The only way possible I could get a \$2-per bushel loan would be to raise only 80% or less of my normal yield. If I raised 50 bushels per acre and adding \$19.80 per acre of diverted acres the total value of my wheat would be \$1.68 per bushel on 90% of my wheat base. If I received \$1.51 per bushel on 100% of my wheat base I would have just as much money. At harvest time, on the open market, I sold wheat in 1959 at \$1.73 per bushel, 1960 at \$1.71, 1961 at \$1.75 and 1962 at \$2.05. So I would rather take my chances on the open market, it looks like more dollars in my pocket to me. I urge each wheat farmer to use his pencil to his allotted and diverted acres and his assigned normal yield. I now predict that the powers that be will try to sell the wheat program to Farmer County farmers by raising Farmer County's normal yield.

In case the referendum is defeated there would be a loan of about \$1.25 per bushel, on all wheat grown on allotted acres. Right now wheat will bring about \$2.10 per bushel in Farmer County, and if you subtract the export subsidy of 59 or 60¢ per bushel, the world market will support the price of wheat at Lazbuddie at \$1.50 per bushel.

The less than 15 acre farmers will have allotments in 1964 if the referendum carries. Most of these allotments will come from we farmers who now have allotments, so we had just as well prepare for a greater than 10% reduction in allotted acres.

Now let us consider the wheat referendum from the standpoint of "sense", just plain old-fashioned common sense. We, as United States Citizens, should consider three basic principles. First, no matter what anyone says or does, the only way to have more things for more people is to produce more things. It can't be done by producing less.

Second, the United States became a World Power by competing on the markets of the world and making a profit, because our free enterprise system gave each individual the opportunity and the incentive to produce. We will remain the No. 1 World Power only if we compete, at a profit, in the markets of the world in the majority of the industrial and agricultural goods we produce.

Third, thirty years of a philosophy of government that has encouraged people to work less, that has substituted government handouts, controls and burdensome taxes for individual initiative and responsibility has created a serious unemployment problem that no end of government make-work jobs has solved. The unemployment problem will be solved by complete socialism and planned poverty, or by removing the handcuffs from our free enterprise system under which 6% of the world's population is now producing 44% of the world's goods. A NO vote in the wheat referendum will be a step in the right direction.

Farmer County produces more milo than any county in the United States, yet by A.S.C. estimates, only 9% of the dollar value of the crop sold in the open market in 1962. Wheat is Farmer County's second largest crop and in 1962 nearly all of it went into government loan. Not one bushel of wheat or milo has been redeemed from the loan, so that makes the Commodity Credit Corporation the only first hand merchandiser of wheat and milo now in Farmer County. To me, a government monopoly is no better than any other monopoly.

If the certificate plan goes into effect, I would expect many Billie Sol Estes scandals, because when \$1.30 and \$2.00 per bushel wheat comes to the elevator in the same truck, things are going to get complicated, to say the least. The manufacturer of food products containing wheat must use a conversion ratio in the manufacturing process. It will take an army of men to administer this sort of program and I would like to know of what productive value

they can possibly be. We wheat farmers will be paying the bill one way or another so why not use the same money to compete in the market place? A Yes vote in the wheat referendum will continue the same policy that has just about ruined our cotton market and increased stocks of cotton.

I urge each farmer to get a copy of the Food and Agricultural Act of 1962, H.R. 12391, and study it. Under the Secretary of Agriculture has broad regulatory powers that actually become law. So now we have an agent of the Federal Government who is not elected by the people, who has legislative, executive and judicial power. This is government by man and not by law. Have we, the American people, so little faith in freedom and individual initiative that we think government by man is better in 1963 than it was in 1776?

Now, this Administration condemns the Poll Tax as an unjust eligibility requirement to vote, but how about this? Before being eligible to vote, a small wheat farmer (15 acres or less) must go to the A.S.C. Office and sign the following statement and I quote: "I elect to be subject to the farm wheat acreage allotment indicated on the reverse side of this notice."

There are twice as many fifteen-acre or less farmers than there are larger wheat farmers. Right now, many A.S.C. offices are actively trying to sell the wheat program to the farmers. One I noticed recently did not mention what the price per bushel would figure at a high yield per acre, but it did stress how much a farmer could be sure of whether he raised any wheat or not. So since, by his regulatory powers, the Secretary of Agriculture chose to permit the fifteen-acre or less farmers to become eligible to vote for the first time in a wheat referendum (these 2/3 of the nation's wheat farmers produce 20% of the wheat) I now predict that about two weeks before the election (May 21) a mighty effort will be made to sell the program to the small farmer and the appeal will probably be along the line of how many dollars they can be assured of even if they do not plant their allotment. I am never worried about the outcome of an honest election if the people understand the issues involved. I hope each wheat farmer informs himself of all issues involved in the coming wheat referendum and votes his convictions.

Frank Hinkson
R3, Muleshoe

tion of his income from farming feels that his profession is one which is vital to this nation's stability. If you will notice, I said "One!" Profession — There are many of course. So what is the point I am trying to make? The point is this — why is there one farm organization which insist on lowering the hourly wage earnings of the wheat farmers of America? Who do these people think are to be against progress in the agriculture field, and stable markets for our farm products? Is this organization interested in helping the farmers or destroying them? These simple questions can be answered with one statement. The only reason why anyone would want to lower the wage earnings of the farmers is that by lowering the farmers' income, they eventually line their own pockets and promote monopolistic take-over of the family farm.

Was I wrong in saying that this farm organization is determined to lower the earnings of the wheat farmer? I don't think so and I'll show you why. Very soon, as you've no doubt heard, the wheat farmers of the nation will vote on whether or not to accept the new wheat program passed on recently. The results of this vote will be most important to not only the wheat farmer, but all the farmers throughout the country. The House Committee on Agriculture, along with many others, have worked for years to come up with a program which will enable the wheat farmers to receive a reasonable return on his investment and at the same time cut down on the billion bushel surplus now on hand. Yet this farm organization is telling the people that should the program be voted down, Congress will drop everything and go right to work on drafting a new wheat program to keep the price of wheat up. Right here they, too, admit that the bottom will drop out from under the wheat farmer if this program fails to pass.

What's more ridiculous is that after years of working and finally passing on a program for wheat, the congressmen are not about to drop what they're doing just to save the wheat farmers and gain a few votes. Does it seem likely to you that they will pass up many other more serious problems to turn back and start all over on new wheat legislation. Something else to con-

sider is that there are only 131 seats in the House occupied by representatives who are from farming districts. This leaves 304 members who represent the non-farm majority and it seems highly unlikely that they will go along with starting all over just for a new uninformed farmers. It sounds straggledoes it not that a farm organization will advocate such irresponsible, unsound advice and claim it to be the truth.

One last remark — if you want the true facts, and I'm sure that you do, check with your county agent or the county ASC Committeemen. Find out for yourself what the results will be dollar wise if the wheat referendum fails. Do this instead of letting a certain farm organization manage the news that is sent to you.
Leon Smith Jr.,
Farmer Co. F. U.
President

Cotton Growers Announce Addition To HQ Staff

Plains Cotton Growers, Inc., has announced the recent addition of Oscar "Cotton" Fanning to its headquarters staff at Lubbock. Fanning will be charged with the preparation of PCG publications, news releases, advertising, and other duties connected with the research and promotional efforts of the 25,000-member cotton producer organization.

Most recently associated with Texas Farm Labor Agency, of Lubbock, Fanning is a 1949 Journalism graduate of Texas Technological College, and was manager of Basin Growers Association, of Stanton, from 1954 to 1962. He has been working with PCG on contract basis since March 1, but was only recently made a member of the regular staff.

In addition to his experience with farmer organizations, Fanning has been employed by the U. S. Departments of Labor

and Agriculture in the Republic of Mexico, and did part time work for the Lubbock Avalanche Journal and Radio Station KSEL while in college.

As manager of the Stanton farmers association, he was a director and one of the organizers of the West Texas Agricultural Employers Group, and was an active worker in that group's legislative efforts pertaining to farm labor.

PCG Executive Assistant, Donald A. Johnson said that this addition to the staff would allow the organization to handle its increased service activities more completely and more effectively, and would especially aid in the dissemination of information concerning research and other developments in the cotton industry.

A nail driven into a tree trunk would be at the same height from the ground five years later.

Curbing Vegetable Diseases Is Topic Of New Leaflet

Vegetable diseases can seldom be cured but they can be controlled by carrying out a planned disease control program, say the authors of a new publication, L-583, "Guide for Reducing Vegetable Disease Losses" recently released by the Texas Agricultural Extension Service.

The authors, Harlan Smith, former extension plant pathologist, and Robert Lambe, area extension pathologist, point out that most fungicides and nematocides are poisonous and should be used in accordance with the manufacturer's recommendations. They should be stored out of reach of children, irresponsible persons, livestock and pets and empty containers should be either burned or buried. Use all chemicals with caution, they advise.

The authors suggest several measures for cutting down plant disease losses and they include the rotation of the vegetable

crop each year; not planting susceptible varieties on soil infested with Southern blight, wilts, nematodes and root rots; growing disease resistant and adapted varieties; fertilizing according to a soil test; using transplants or seed produced under disease-free conditions and by keeping a close inspection of fields so that control measures can be used successfully when needed.

Charts showing the most common and troublesome diseases along with control recommendations are included in the leaflet.

Copies of the publication are available from the offices of county agents or from the Agricultural Information Office, College Station, Texas. Ask for L-583.

TEXAS COTTON GROWERS REPORT:

Entire Season Control of Thrips, Aphids and Mites...

Untreated plant

Di-Syston treated

Di-Syston Treated Plants Are Stronger, Straighter... Produce More Squares Earlier

West Texas and New Mexico cotton growers now have a new way to control thrip damage and early-season stunting... with Di-Syston granular insecticide. Di-Syston is placed in the soil with the seed or side dressed after planting. The chemical is then absorbed by the growing roots and carried to all parts of the plant through the sap stream—as soon as the plant emerges. No part of the plant is unprotected—even tender new growth as it is formed.

The result? With Di-Syston, your early cotton grows faster, has stronger, straighter stems, more vigorous foliage. Squares form earlier and the plant produces more of them. Many growers in the Lubbock area have reported full season control of thrip with just the one application. You get higher yields because of the good Di-Syston start. This year, get your crop off to a good start with Di-Syston. Complete instructions for use are printed on the label on every package. Use Di-Syston.

CHEMAGRO CORPORATION
KANSAS CITY 20 • MISSOURI

TOTAL PERFORMANCE:

FORD GALAXIE 500/XL SPORTS HARDTOP

YOU'LL KNOW WHY SHE DOESN'T FEEL THE BUMPS...WHEN YOU TEST-DRIVE FORD'S NEW \$10,000,000 RIDE

The 1963 Ford gives you a ride every bit as smooth as cars costing hundreds more, and for two reasons: a revolutionary new suspension system... and added road-hugging weight.

It took ten million dollars to develop the new Ford ride. We designed a revolutionary new suspension system for the '63 Ford. Where ordinary suspensions move only up and down to absorb road shock, the Ford suspension moves backward as well. In this double-action suspension system, coil springs up front and leaf springs in the rear combine to give you firmness in cornering and a special smoothness over the road.

We added weight, strength and stability. The new Ford is now actually hundreds of pounds more car than any other car in its class. This remarkable weight advantage is in the suspension, frame, and body. And, as you know, this added weight means a more stable ride.

But a solid, road-smoothing ride is only part of Ford's total performance story for 1963. Look how Ford swept the field this

year in the grueling Daytona, Riverside and Atlanta 500's and in the demanding Pure Oil Performance Trials. Only a car with total performance—the best combination of strength, balance, precision control, braking power and road-clinging suspension—could roll up so many wins.

Before you buy any new car, test-drive a Super Torque Ford. If you haven't driven one lately, you can't really know what a new Ford is like. Make this important discovery—if it's built by Ford, it's built for performance... total performance.

Hereford Meeting Centers On The Wheat Referendum

A panel of specialists from Texas A&M College will present all aspects of the May 21 wheat referendum in a public meeting at Hereford next Thursday, April 25. All wheat farmers and other interested persons are invited to attend. The meeting will be held at the Bull Barn beginning at 10 a.m. District Agent Bill Grisham of Amarillo will preside at the meetings. Those to appear on the program include Thomas D. Aaron, grain marketing specialist; Ben Spears, agronomist; and Cliff H. Bates, farm management specialist.

The meeting is one of a series of meetings in the state and area. In case someone in the immediate area cannot attend the Hereford meeting, similar programs are to be presented at Amarillo Monday at 10 a.m. in the Commercial Exhibit Building on the Tri-State Fair Grounds; Tuesday in Pampa at the Coronada Inn at 10 a.m., Wednesday at Dumas in the Community Center

at 10 a.m. and Friday at Perryton in the High School Auditorium.

A program was to be presented Thursday, April 18 in Plainview at the High School Auditorium at 10 a.m.

John E. Hutchison, Director of the Texas Agricultural Extension Service, said that Ex-

tension personnel would present factual and objective information with no attempt to tell wheat growers how they should vote.

County Agent Deryl Coker said he hoped at least 100 persons from Parker County would attend the Hereford meeting.

NEWS FROM THE FARM BUREAU

BY RAYMOND EULER

It is expected that the Farm Bureau sponsored High School Student's Citizenship Seminar will be held at Sam Houston State Teachers College, Huntsville, August 20-23 of this year.

Parker County Farm Bureau is sponsoring Miss Linda Rector, first place winner of the speech contest held before a panel of judges in the regular meeting of directors in February. Miss Jane Bradshaw, a Farwell student, will also be eligible to attend under the monetary sponsorship of Worley Grain Co. of Farwell. Both of these young ladies were selected from the student body by school administrators of Farwell and Friona schools.

Purpose of the seminar is to convey to the sponsored students a better understanding of the American system and way of life, and that they, in turn will pass it along to others upon their return.

Frank Hinkson and his workers continue to bring in new Farm Bureau members. The goal of five hundred fifty has been exceeded, but we do not

know exactly what the number is at this time. This means that over five hundred fifty have paid \$10 for membership within the last year. In order to maintain this membership number on October 31, more than two hundred new and renewal checks will be needed. Last year, more than three hundred such checks were received in that period of time.

Hinkson is also chairman of the Farm Bureau Wheat Referendum Committee, and is making arrangements for a meeting on this subject in the near future. Watch for an announcement of this meeting. In the meantime, if you are interested in knowing the policies of Texas and American Farm Bureau as formulated by the membership, we have booklets that explain these policies in detail.

Some people seem surprised to learn that Farm Bureau is interested in farmers earning always been Farm Bureau policy, but some misinformation continues to be available to distort this fact. Freedom and opportunity for the present and future generations occupy first place in all Farm Bureau literature. Some information being circulated indicates that Americans have the choice of less freedom or less money. Farm Bureau people believe that either of these begets the other in the American Economic System.

CONSIDER THIS: The fear of the Lord is the instruction of wisdom; and before honor is humility. Proverbs 15:33.

MAKING A READING from a "flow meter" attached to a tailwater pump on the J. B. Taylor farm south of Friona is Wayne Wyatt of the High Plains Water District. At the time the reading was made, the pump was putting out 800 gallons per minute or 48,000 gallons per hour. Some pumps in the area are logging up to 72,000 gallons per hour, at a nominal fuel cost.

HE Exes To Meet At Texas Tech

The annual spring luncheon of the Texas Tech Home Economics Ex-Students will be held in the New Ballroom of the Student Union Building on Saturday, April 27, at 12:30 o'clock.

The program will be a fashion show presented by Mary L. Behrens, Home Economist with the Maytag Company, using models from the Home Economics Division at Texas Tech. The recipient of the Margaret W. Weeks Scholarship Award, Marcia Rose Campbell, a home economics education and home and family life major from Borger, will be presented. Officers for the coming year will be elected.

All former students and current faculty members of Texas Tech are eligible to attend the

luncheon. Graduating seniors of the School of Home Economics are invited. Price of the meal and dues will be \$2.25, payable at the door. Reservations may be made by contacting one of the following ex-students by April 24th: Mrs. Wayne Timmons, telephone SW 9-8296, Mrs. J. W. Smith, telephone SW 9-5152 or Mrs. A. L. Hawkins Jr., telephone SW 9-8711.

Officers serving this year are: Miss Joy Pannell, president; Mrs. Timmons, vice-president; Mrs. Smith, secretary-treasurer; and Mrs. Hawkins, reporter.

The older a man gets the further he had to walk to school as a boy.

NOTICE TO BIDDERS

Notice is hereby given that Parker County will accept bids at the office of the County Judge in Farwell until 10 a.m. April 22, 1963 for the purchase of the following new equipment:

One one-half ton six-cylinder pickup, with long wheel base and four-speed transmission, heater, spare tire and wheel mounted on side, trailer hitch, four-ply tires and side-view mirror.

Successful bidder will be required to accept as trade-in a 1951 Chevrolet pickup, which may be inspected at the County Warehouse in Bovina.

Too High for US So India Buys It

Senator J. Glenn Beall (R-Md.) reports that last Fall the United States gave up the idea of buying a Geneva, Switzerland chalet for the embassy there because it was too expensive.

Recently, the Senator said, India, which has received more than \$4.6 billion in U. S. foreign aid, purchased the building.

Wheat Notices To Be Mailed To County Farmers Friday

(Editor's note: This is the third in a series of articles prepared by the Farmer County ASCS office concerning the upcoming wheat referendum.)

Notice of wheat acreage allotments and normal yields will be mailed to wheat farmers in the county Friday April 19. The normal yield established for each farm in the county is based on the county average for the years 1958, 59, 60, 61 and 62 as reported by the Agricultural Marketing Service and the Bureau of Census. The normal yield for Farmer County during that period was 34.3 bushels according to these agencies. Yields on individual farms are established on each farm on the basis of the farm's potential productivity as compared to the average farm in the county. For example: A farm that is one hundred per cent of average for the county (in the judgement of the committee) would have a normal yield of 34.3 bushels per acre es-

tablished for 1964 program purposes. A farm that is considered 105 per cent of average would have a normal yield established at 36.0 bushels and etc.

The normal yield established for each farm will be used to compute the diversion payment rate for the farm and to determine the number of bushels of certificate wheat for the farm.

MAY APPEAL

A farmer may appeal the yield established on his farm by submitting proof of production for the five year base period.

If when a farmer receives his notice of yield, he is not satisfied and wishes to file an appeal for a higher yield, he may have his yield established at the actual average five year production for the farm by submitting proof of the actual yield on the farm to the ASC County Committee (ASCS Office) within fifteen days after the mailing of the notice for the farm. Proof of the actual production of wheat on the farm for each of the five years (58 through 62) is required before the appeal will be considered.

Farmers who desire to file such an appeal, should keep in mind (as mentioned above) that they have only 15 days in which to do so.

Farmers are being notified of their acreage allotment and

normal yield in the notices to be mailed on April 19. These notices will not tell them just what their diversion payment is, nor will it tell them what their minimum and maximum diversion payment on the farm is; however, they can compute their payments (within a few pennies) as follows:

To arrive at the minimum diversion rate per acre - multiply the normal yield per acre by 60 cents and this would be the minimum diversion rate. For example: Farm has normal yield of 35 bushels per acre 35 x 60¢ equals \$21.00 per acre. This \$21.00 would be the payment to be earned on the minimum acres to be diverted which is approximately 10 per cent of the 1963 allotment.

The program (as most people now know) provides for an additional diversion (if the farmer so desires) of 20 per cent of the 1964 allotment. The payment on these diverted acres may be computed by multiplying the normal yield by \$1. In this example the rate for each additional diverted acre would be at \$35 per acre.

In this example there would be 28 bushels of certificate (\$2) wheat per each planted acre on the farm up to the allotment. (Average farm producing normal yield)

HELPING INSTALL a tailwater pump system on the James Mabry farm at Hub are these representatives of the High Plains Water district. This pump is to be a special test case in that it is designed to filter out weed seeds and other material which sometimes causes problems in tailwater pump operations.

TIPS for OUTDOORSMEN

by Vern Sanford

To Steady Your Aim

Here is an odd solution to a serious problem. But it works — and works well. A jerky trigger finger plays the devil with your aim. Place a coin on the front sight of an empty gun, aim and squeeze the trigger.

Practice this until you can squeeze off a shot without disturbing the coin and you are cured.

Hammer Guard

Rifles, especially carbines, have projecting hammers that are apt to wear holes in gun cases.

Such holes are unsightly, expensive and unnecessary.

A one-inch piece of small rubber tubing makes an excellent hammer guard. It can be removed instantly by a flip of the thumb, should an emergency arise.

Consider Your Dog

Remember that dogs suffer more than you realize in hot weather.

Yours will be a happier and healthier dog if you'll make sure he has access to shade, plenty of fresh water, and freedom from fleas and ticks.

Exercise him in the cool of the evening and underfeed him a bit until hunting begins.

Tree Hunter's Aid

Deer hunting from a tree produces good results but it's often dangerous.

An accident easily can occur if a hunter tries to turn

around on the limb where he is standing. Unfortunately he turns instinctively when he hears a sound behind him that might be an approaching buck.

A small mirror angled just right to cover the immediate terrain, to the rear of the hunter, will eliminate the necessity for movement.
