Ralph has been assured a leader of the AFL-CIO that LL labor votes will go his way. oo bad the labor boss thinks as does, for there are many labvoters who have their own pinions on the political quesons and do not vote ac ording the bas's instructions. The erage member of the lacor unon has enough intelligence to ecide for himself on those maters. Surely, by now, the labor loc should be able to figre out that Mr. Yarbo ough as not done them any great faors in his political career. Local politics do not have so

nany intense problems, thank oodness. As the Democratic Primary nears there may be sevral candidates seeking various osts, but not with the big hatred and differences that exist in naional and state affairs.

With local politics, usually the opposition is because two or nore people want the job and not for any great scheme of hings.

This is as it should be.

We were appalled at the lack of interest expressed by voters of the district in the election of board members Tuesday.

No, there was no opposition. Yes, we are very satisfied with the way they have conducted the business of the district. - That is why we went out and gave them a vote of confidence.

Voting is a lot like a lot of other things we have in America -a privilege that all citizens desire and will fight and die for but they just want it around for their convenience and when they want to use it! The privilege of

voting is a lot like the church. The office holders of the county need the support of the citizens when everything is going along good. Take care of your right to vote by using the privilege you have

The best way to lose the privilege is to fail to vote.
