

# County Pledges Share Of Watershed Plans

The Running Water Draw Watershed project was given a boost by Parmer County commissioners at their meeting Monday in Farwell, when they agreed to pledge the county's share for planning the project, which might speed the progress up by five to 10 years.

Watershed committee from Parmer County asked the commissioners to pledge the county's share in the planning, set by the steering committee at \$12,500, which would not have to be made available in a lump sum.

The commissioners voted unanimously to create a trust fund, and deposit \$4,500 in the fund immediately, with the stipulation that the rest be paid as needed or as requested.

Flood damage to roads and bridges in the county was credited with having a bearing on the commissioners' unanimous vote Monday. Two of the four commissioners reported

road and bridge damages that would cost in the neighborhood of \$10,000 each for repairs. Members of the Watershed committee of the Soil Conservation District explained that the trust fund was being established to entice one of the planning parties to take the job of engineering the five-county

project, and thus save waiting in line for what might prove to be years for the state-financed party.

"We believe the reservoirs will have other values than flood prevention, such as recharging underground water supplies," said A. L. Black, chairman of the Parmer County Soil Conservation District's board of directors.

Parmer County thus became the third county of the five affected to pledge its share of the planning costs. Hale County was the first, although Curry County, New Mexico is merely waiting for the "signal to be given," and its share will be made available, sources say.

Sloan Osborn and Mrs. V. J. Zeman. In back are Mrs. J. G. McFarland and Mrs. J. T. Gee.

## Carlton Ruled Not Guilty

Mr. and Mrs. A. L. Carlton Sr. recently received a wire from Captain M. T. Ebright, USN Commanding Officer, advising them that their son A. L. Carlton Jr., who had been charged with negligent homicide following the death of a fellow seaman early in April, had been tried and found not guilty.

A letter received by the Carltons from Philip Talliaferro, assistant legal officer, LTJG, U. S. Naval Reserve, gave the following account of the incident.

"Your son was involved in an accident on April 12th. The accident occurred at the Bamboo Grove Night Club in Olongapo. Your son and several of his friends were having a party. Strawberry lent his pen knife to a friend and later decided to go to the restroom.

Just as he was turning to go, his friend returned the knife in an opened position. As Strawberry completed his turn to the restroom, he was apparently pushed into Jim Gay. By pure accident, the blade of the small pen knife, went between the ribs and into the heart of Gay. The doctor tells me that a three year old child could have done the same with ease. Gay died a few minutes later."

Talliaferro accompanied Carlton to an airport to meet Rev. and Mrs. Bill Burton and Mr. and Mrs. Charles Allen on one of their stop overs in the Subic Bay area last month.

## VISIONS PERMANENT LIBRARY

### Study Club Initiates Summer Reading Club

The Modern Study Club is taking the lead to establish a public library in Friona. As an initial step, the club is sponsoring a "Vacation Reading Club," and will take registrations Saturday at the Friona Federated Clubhouse from nine until 11 a.m.

The program, co-sponsored by the Texas State Library, which has loaned the clubhouse of 150 books, which will be available for those who wish to check them out.

Mrs. J. G. McFarland, chair-

man of the club's Library Committee, states that a colorful certificate will be issued to all youngsters who read a minimum of 12 books on their reading level between June 15 and August 31.

Purpose of the club is to encourage and stimulate interest in reading among the younger age groups. Books which are available include "easy books," juvenile fiction, young adult fiction, juvenile non-fiction and young adult non-fiction.

The club will operate in the

Clubhouse each Saturday and Tuesday throughout the summer from 9-11 a.m. A story hour

(Continued on Page 2)

## SISTER WILL TEACH

### Weatherly Resigns From School Board

Clyde Weatherly submitted his resignation to the Friona School Board of Trustees Monday night following the regular meeting, and Ralph Shelton was appointed to fill out his term. Weatherly was obliged to resign so as not to violate state Nepotism laws.

A sister of Weatherly's, Mrs. Frances Hamilton, is to be employed as fourth grade teacher for the coming year, and under the state law, an elected public

official cannot serve with a near relative under his employ.

Weatherly told the board he had enjoyed serving, and believed that jobs on the school board should be "passed around" more.

Shelton will serve out the remaining year on Weatherly's term, which expires next April.

Mrs. Hamilton, who will teach fourth grade, has 15 years of teaching experience, and taught the last seven years at Caddo Mills.

AUSTIN BOUND . . . Melody Coffman, Farwell, and Joyce Rodgers, Friona, left this week for Austin and the Bluebonnet Girls State convention. The girls are sponsored by the Friona American Legion Auxiliary.

FIRST LOAD . . . Harold Taylor, employee at Friona Wheat Growers, tests first load of 1963 wheat, marketed by L. R. Hand Monday.

## Hand Delivers First City Wheat

L. R. Hand, who farms six miles southeast of Friona, brought the first load of 1963 wheat to Friona Monday, and was paid a \$25 premium by Friona Wheat Growers.

The first wheat was Early Triumph variety, irrigated, and was drilled early in September. Test weight was 59 pounds per bushel. Moisture content was 13.54. Expected yield is around 44 bushels per acre.

The county's first load of wheat was cut Thursday, June 6, by Henry Ivy, who farms three miles north and two east of Lazbuddie. Ivy delivered the grain to Sherley-Anderson elevator in Lazbuddie.

First wheat in the Black area was delivered to Black Grain Company Friday, June 7, by Ed

Schilling, who farms northeast of Black. His was dryland wheat.

Last year's first load of wheat in Friona was delivered on June 5, compared to June 10 this year, by John P. A. Drager. The first load in 1961 was harvested by John Renner on June 12, and N. A. Brown had the first load in 1960, on June 13.

The earliest date in Friona for a first load of wheat was June 1, by Spencer Hough, in 1959.

Arthur Drake, manager of Friona Wheat Growers, said a carload of wheat was delivered Tuesday, and shreveled grains were appearing in some of the wheat, usually blamed to hail, although one of the fields it appeared in was believed to have escaped the hail.

Superintendent Alton Farr reported that the school had received \$350.93 from the Texas Interscholastic League, as a result of the school's share from

Those teachers whose contracts were approved were Robert E. Owen, formerly at Stinet, who will be freshman coach; Mrs. Frances Hamilton, formerly of Caddo Mills, who will teach fourth grade; Mr. and Mrs. Thomas A. Bandy, Vernon, who will teach fourth and fifth grades; Sandra Meek, recent West Texas State graduate, who will teach homemaking; Jack Taylor, Gallup, N.M., junior high coach and Malcolm Manchee, Texas Tech graduate, high school history.

Eight teachers are still needed by the school system to complete its teaching roster for next year. Three are needed in high school (science, mathematics and English), three in junior high and two in grade school.

## Lazbuddie Area Has First Load

Parmer County's first load of 1963 wheat was delivered to Sherley-Anderson Lazbuddie Elevator last Thursday by Henry Ivy, who farms three miles north and two miles east of Lazbuddie.

Of Early Wichita variety, the new crop wheat tested 12.7 per cent moisture and had a 60 pound per bushel test weight. Joe Moore, elevator manager, reports.

Yield of the field from which the county's first load was cut was handicapped by hail, but was making an estimated yield of 30 bushels per acre, Moore says.

Ivy received a \$25 bonus from the elevator.

the girls basketball team playing at the state tournament in March.

Tax assessor-collector Dan Ethridge reported that a total

## Cloud Dumps More Rain, Hail On Area

A sudden rain and hailstorm last Saturday dumped additional un-needed moisture on the area, and certainly unwelcomed hail to an already-battered area.

The storm was of local nature. A total of .92 inches were measured in Friona, where several windows were broken by high winds.

South of town, three-quarters of an inch fell with light hail, and the same measurement was recorded immediately west of Friona, although the fall was gentle, with no hail.

Friona has received 7.70 inches of rain in the past month, compared to only .73 for the first four months of the year.

Last week's temperatures, recorded by the City of Friona, were as follows:

	Max.	Min.
June 6	86	61
June 7	88	62
June 8	90	61
June 9	85	53
June 10	86	53
June 11	87	58
June 12	89	59

## Duggins, Buckley Invited To All-Star Cage Game

Coach Baker Duggins and Janet Buckley were invited this week to participate in the annual North-South girls all-star basketball game in Plainview July 20.

Duggins was chosen as one of two coaches for the North squad, Miss Buckley was named to the 14-girl squad in the seventh annual game, held in conjunction with the Texas High School Girls Basketball Coaches Association meeting, which will be held in Plainview for the first time.

It will mark the second time for Duggins to coach the team. He will be the defensive coach, Don Durham of Slidell High School will coach the offense. The last time Duggins was chosen as a coach, the North won, 73-39.

Janet will be the fifth Friona High School Graduate to participate in the all-star game. Those who previously played in the game include Lawana Houlette (Moore); Jacqueline Magness (Hight), Charlotte Bock (Ratcliff), all 1960 graduates of FHA, and Gayle Dodson, 1961 graduate.

Miss Buckley, daughter of Mr. and Mrs. Jim Buckley, was an all-state selection on the Squaws' team, which finished third in the conference AA state tournament. She played in all 34 of the team's games, averaging 12.4 points per game.

While at Plainview, the all-star team will be guests of the Plainview Chamber of Commerce. Team members will also attend banquets, luncheons and other civic affairs con-

ducted by the Chamber of Commerce.

The coaching school will run July 18, 19 and 20. Basketball fans and players on the teams are invited to attend the lectures as well as the game. The North

holds a 5-1 advantage over the South in the six games played to date.

The all-stars will work out on Thursday, twice Friday and then Saturday afternoon before the game Saturday night.

FRIONA ALL-STARS . . . Coach Baker Duggins, left, and Janet Buckley were invited this week to participate in the annual North-South girls all-star game next month. Duggins will be a coach, and Janet will be a member of the "North" squad.

Friona, Texas

NEW BUSINESS, NEW SIGN . . . Pete Davies, manager of the Golden Spread Labor Association, admires new sign in front of the Friona Mexican National Labor headquarters.

### Golden Spread Assn. Open For Business

The Golden Spread Farm Labor Association has opened offices in Friona with Pete Davies as manager.

Mexican National farm hands are available where domestic labor is unavailable, by contract to move to the farm, or may be picked up on a day to day basis, Davies said.

Davies was manager of the Panhandle Growers Association of Bovina from 1958 until this year. He is a Parmer County native.

The company is head-

quartered in the old Deaton "66" station on North Main's intersection with U. S. Highway 60.

Mrs. Steve Hargus is office secretary for the company.

### Study Club --

(Continued from Page 1) will be presented for preschoolers and older children.

"It is a club project to work toward establishing a permanent library in Friona," Mrs. McFarland said. She said that the summer reading program would be a good start. Later, a community-wide meeting is to be scheduled, to make further plans toward establishing a library.

The group invites persons from throughout the area to take advantage of the free reading program.

Members of Modern Study Club's library committee besides Mrs. McFarland are Mrs. Sloan Osborn (club president), Mrs. V. J. Zeman, Mrs. Bill Stewart and Mrs. J. T. Gee.

### Four Arrested At Farwell

Four men were arrested by Parmer County Sheriff's officers Saturday night and received fines in justice of the peace or county court.

### New Teachers --

(Continued from Page 1) for the 1963-64 school funds. In connection with next year's school term, it was the preliminary feeling that a single week at Christmas, with New Year's Day off would be the schedule, so that students might get out of school on May 22 rather than May 29.

The continuing of the season football ticket sale was discussed. It was agreed to again sell season tickets, although the price for season tickets would equal the price if tickets were bought separately for the five games.

Reserved seat tickets will be \$1.25 as in the past, with season tickets going for \$6.25 rather than \$7.50 as it has been in the past.

Fined in Justice of the Peace Court were Les Alford, 48, Bovina, charged with gambling and assessed a \$25 fine. Allen Owens, 27, Bovina, was charged \$25.50 on a gambling charge, and \$27.75 in county court for assault. Walter Jones, Clovis, was fined \$25.50 on a drunk charge.

Willie Spencer, 31, of the Lazbuddie community, was charged with assaulting his wife, and was charged \$25 plus costs in county court by Judge Loyde Brewer.

FOR HOSPITAL DUTY

# Local Ministers Form Chaplain Organization

Plans for a "chaplain of the week" program at Parmer County Community Hospital were discussed in a dinner meeting sponsored by the Friona Ministerial Alliance at the hospital Tuesday night.

Rev. Audye Wiley, pastor of the Calvary Baptist Church, told the group of doctors and hospital board officials that it would be the organization's plans to have one minister in charge of checking admissions at the hospital each day.

The "chaplain of the week" would find our church membership of affiliation, and notify the local pastor. "This program will not be limited to the Ministerial Alliance, but will be open to all ministers," said Rev. Wiley.

Wayne Cook, hospital chaplain at Methodist Hospital in Lubbock for the past nine years, spoke to the group concerning ways hospital chaplains and regular hospital staff members can help each other.

Dr. Lee Cranfill told the ministers that it was noteworthy that no problems have ever arisen at Parmer County Community Hospital between the doctors and ministers.

Cook, in his brief remarks, said he was glad to hear of the excellent working arrangements between doctors and ministers in the community, and outlined a few rules which he said should help keep the "status quo".

In his preliminary remarks, Rev. Wiley expressed the ministers' desire for a room or central office from which to conduct their chaplain's activities, and also said that in connection with the hospital's expansion movement, a prayer room was desirable.

"In the case of a death, this would be very suitable. Many times there is no room available for counseling with the family, and the hallway is the only alternative," Wiley said.

## Band To Rehearse Tuesday

Band Director Lowell Bynum has announced that a rehearsal for Friona High School band will begin at 7:30 p.m. Tuesday in the band hall. This is the first of a series of rehearsals planned to make preparation for attending the State Fair at Dallas in October.

Annette Jennings and Janell Daniel were chosen in tryouts the last week of school to be drum majors during the coming school year. Twirlers will be Charlotte Nettles, head, Merylene Massie, Sheryl Long, Carol Struve, Linda Davis and Willie Grace Grubbs.

All band members, including those who will be freshmen this fall, are to attend the rehearsal, according to Bynum's announcement.

AT HOSPITAL MEETING . . . Among those at the dinner sponsored by the Ministerial Alliance Tuesday night were Rev. Russell McAnally of the Friona Methodist Church, Wayne

Cook, chaplain at Methodist Hospital, Lubbock, Pete Buske, chairman of the hospital board, and Dr. Paul Spring.

## ON TRUST FUND

# Draw Project Takes Two Strides Forward

The \$20,000 request to the city of Plainview to help defer expenses of a trust fund planning party for the Running Water Draw watershed project was approved Monday night by the Plainview Council.

F. F. Calhoun, Chairman of the Hale County Soil Conservation District presented the request to the Council.

In answer to a question by Mayor M. B. Hood as to when the trust fund money would be called for, Calhoun replied that funds probably would not be called for until needed for planning party expenses in this area and that he was of the opinion Plainview's expenditures could be prorated over a three year fiscal period.

Mayor Hood stated, "The main thing the Council is interested in is getting the project done as quickly as possible."

The Council approved the \$20,000 estimate of Plainview's share of the total cost of \$70,000, as set out by the State Soil Conservation Service, subject to legal requirements of the City of Plainview.

Another step forward was taken on the trust fund to share costs of the proposed planning party for the Running Water Draw Watershed Project Monday when Parmer County Commissioners voted their share of the cost of the amount of \$12,500.

County Judge Loyde Brewer stated that \$4,500 was set up

in a trust fund with the balance of \$8,000 to be paid as it is needed to finance the planning party, when it is secured.

Judge Brewer commented, "We just wish the dams had been completed before the recent rains, they might have been full now. We can see the need for the project in our county." The Farwell area has had 7 to 7 1/2 inches of rainfall in the past few weeks.

With the appropriation of the Parmer County funds only \$12,500 is lacking to complete the \$70,000 trust fund for payment of the planning of the Running Water Draw Watershed Project. Lamb and Castro Counties have taken no action to date on their share of costs.

It was indicated in a meeting held in Plainview that the State SC board would meet in June, but no definite date has been

set. According to F. F. "Flip" Calhoun, chairman of the Hale County Board of Supervisors, "we feel that with a trust fund available before the summer meeting we will likely have a planning party assigned to work on this project next year."

Funds allocated thus far by the counties affected by the Running Water Draw Watershed project included \$12,500 by Curry County, New Mexico; \$12,500 Hale County; \$12,500 Parmer County and \$20,000 by the City of Plainview.

## WITH TWO ADDITIONS Friona Coaching Staff Is Made Complete

The coaching staff for Friona schools was made complete for 1963-64 recently with the hiring of Robert E. Owen and Jack Taylor.

Owen, who has been assistant to new head coach Don Light at Stinnett, will be the freshman football coach, as well as assisting Light. He will also handle freshman basketball as well as assist with the varsity.

Taylor, a brother to Robert Taylor, presently on the junior high staff, joins his brother there.

Announced several weeks ago was the hiring of Light as head football coach to replace Kenneth Miller, and C. W. Dukes of Sundown as boys basketball coach, replacing Vernon Scott. The junior high staff will be made up of three men rather than four as it has been, but the same program will be offered, according to Tom Jarboe, principal. "This should enable our coaches to spend more time with their specialty—coaching," he said. The new junior high alignment will find Jarboe and Robert Taylor handling eighth grade

football and basketball, Jack Taylor, who comes to Friona from Gallup, N.M., will coach the seventh and eighth grade girls basketball teams, and assist Robert with the seventh grade football and basketball teams.

QUESTIONS  
1—Cincinnati has won its sixth straight Missouri Valley Conference cage crown. True or false?

2—Who is Johnny Romano?  
3—Who is Fred Glover?

HOOHEE? HE has the same name as a well-known government official. This former Cleveland Indian outfielder is now the manager of the Chicago Cubs this season.

ANSWERS  
1—True.  
2—Coach of the Cleveland Indians catcher (Hooper, Bob Kennedy).

# SPORTS

## Drilling Companies Are League Leaders

Team standings began to take shape this week in the Friona Little League program, which entered its second week.

In the Intermediate League, Friona Drilling and Brookfield Drilling are unbeaten after two games. Friona Drilling won games on Thursday and Monday. They downed Reeve Chevrolet, 18-5 on Monday, after beating Carl McCaslin Lumber, 9-6 last Thursday.

In the Friona Drilling-Reeve game, the winners scored eight runs in the top of the fifth inning, to give them enough runs for the 10-run rule to be evoked. Mitch Terry was the winning pitcher, and James Schlenker the loser. Against McCaslin, Danny Carthel was the winner, and Dale Neel took the loss.

Brookfield Drilling took its second win of the season on Monday, topping McCaslin Lumber, 5-1. Larry Graves pitched a six-hitter, and collected a three base hit and stole home to help his own cause. Dale Neel again was the losing pitcher. The largest score of the year was turned in by Friona State

Bank last Thursday, when it romped past Star-Hurst, 31-5. The game was called at the end of four innings by the 10-run rule. The winners were scoreless in the first inning, but erupted for 11 runs in the second, 13 in the third and seven in the fourth, which is when the 10-run rule takes effect.

The bank doled out 27 hits. Joe Bill Jones had four hits in five trips, getting a single, two doubles and a triple. Randall Schwab was the winning pitcher. Danny Kendrick was the loser.

## Return Baseballs, Director Requests

"We wish the foul ball retrievers would return the balls to the umpires," said Jerry Hinkle, summer baseball director for Friona.

Hinkle indicated that game baseballs were becoming more scarce, because youngsters getting the foul balls were keeping them.

## Herring Romps To 17-2 Pony Win

Herring Implement Company slammed Parmer County Implement Company, 17-2 for its first win in the Pony League Tuesday night.

Travis Graves went the distance for the win, and also hit a three-run homer to aid his own cause. Graves gave up just three hits in the contest.

Herring scored eight runs in the fifth inning to break the game open. Graves singled, and Danny Balize struck a home run. Jesse Shirley doubled, and a pair of balks, three bases on balls and one hit batsman scored the other six runs.

John Bill McFarland was the losing pitcher, relieved by Santos Esquivel.

The Pony League game between Parmer County Implement and Chester-Fleming Gin, which was postponed last Saturday due to wet grounds, will be played this Saturday at 8 p.m.

## SPONSOR CHANGED

Bainum Butane Company has taken over sponsorship of the Pee-Wee League team formerly sponsored by the Aztec Drive Inn, it was announced this week by Jerry Hinkle, summer baseball director.

## Ethridge-Spring, BJBs Post Pee-Wee Victories

Ethridge-Spring Agency and Parmer County Pump's B-J Bees started the season with wins in the Pee-Wee League.

The B-J Bees edged Friona Consumers, 4-3 in a game Friday, scoring three runs in the bottom of the fourth inning to take the win. Joe Garcia was the winning pitcher and Tom Long took the loss.

Ethridge-Spring trounced Bainum Butane, 13-1 on Friday. Leon Mendoza pitched a one-hitter. Juan Ramos singled to start the third for Bainum, and scored their only run. Bill Bailey was the losing pitcher.

Bainum Butane replaced the Aztec Drive Inn as sponsor of the Pee-Wee League team.

In a Tuesday game, Bainum scored a win to even its season record at 1-1, edging the Co-op, 13-11. Robert Saiz was the winner and Tommy Long the loser.

Friday Parmer County Pump

plays Ethridge-Spring. On Tuesday, Bainum Butane squares off against the B-J Bees.

IT'S THE LAW—Fifth son is born to Mr. and Mrs. Vernon Law and the Pirates' pitcher, and his wife VaNita (right) show off the youngster in Pittsburgh with the help of a nurse. The boy will be named either Varland or Viridon, in keeping with the family's "V" names for their children.

# WELCOME TO FRIONA

Mr. and Mrs. Gerald Shavor are among Friona's newcomers. Gerald is employed by General Telephone. He has been with the company six and one-half years. Mrs. Shavor works at the Ethridge-Spring Insurance Agency. The children are Sherrie, two, and Teena, seven months. The Shavors came to Friona from Perryton. He is a native of Paducah, and she hails from Haskell, Texas.

ASK ME ABOUT  
MY BUSINESS

Writing on the subject of fiscal reform in the Oregon Voter, Ralph T. Moore says that it "... must come from the public itself. We, ourselves, will have to stand firmly behind every effort toward economy in government, regardless of partisan flavor or political authorship. We shall have to pay attention to the statements of candidates as indicating their personal attitude in this matter so that we can weed out all of those fond of big spending for its own sake. We've been mighty sloppy about this selection responsibility in the past and it has cost us plenty. But the bottom of the barrel is now in sight and we can't afford more of such mistakes."

# Burton Tells Japan Trip Impressions

By Bill Burton  
As we boarded the Continental Airlines plane in Lubbock with the Charles Allens, we realized that a long journey and many wonderful experiences lay before us. Mrs. Burton and I enjoyed very much our first jet ride from El Paso to Los Angeles, California.

About a year ago we had taken our family by automobile to San Francisco and Los Angeles to the Southern Baptist Convention, and that took several days driving; but this trip just took a little over three hours.

We flew by Western Airlines jet to Seattle, Washington. This

was our first time in the state of Washington, and we were excited over the opportunity of seeing some of the World's Fair, and dining up in the Space Needle.

After the four hour lay over, we had finished all the details of Passports, health certificates, etc. and boarded a Northwest Airlines 708 jet for Anchorage, Alaska. We saw many snow capped mountains going north until darkness set in.

Then to our amazement, it was no longer entirely dark, for we were now in sight of the Aurora Borealis . . . or Northern Lights. This was quite

a phenomenon to behold. We landed in Anchorage about 1 a.m. and found snow everywhere.

We had about forty minutes to refuel, then began our longest sustained time on a flight . . . seven hours and 10 minutes over the Pacific. When we landed in Tokyo we found it to be raining, and discovered we had to march through the gate marked for 'foreigners.'

We were met by a delegation of Baptists at 1 a.m. and they presented Mrs. Allen and Mrs. Burton with flowers. We were most impressed by the hospitality of Japan, and by the masses of humanity on such a small area.

We lost Tuesday, and woke up Wednesday morning, having checked into the Okura Hotel . . . one of Tokyo's finest western style hotels. Three days of carefully planned orientation helped us to know many of the things we had been asking ourselves.

Saturday morning we boarded a Japan Air Lines plane, and flew to Osaka . . . second only to Tokyo in size . . . and then on to Fukuoka.

Fukuoka is on the southernmost island called Kyushu, and is 600 miles South of Tokyo. A group from the Koga Baptist Church met us there, and we will never forget the warm and enthusiastic welcome we received. The Pastor, Kenji Tsunumi, stood there waving his arms around and around his head when he sighted us. We had been in correspondence, and had exchanged pictures of ourselves and our congregations. We were taken by taxi to Koga, which is about 10 miles from Fukuoka.

We went to the Hikati So, or our home for eight days, a Japanese Inn. Here we were to learn the Japanese way of sleeping on the floor, sitting on the floor to eat, removing our shoes, and several other customs quite different from those we have been used to.

Our first meeting with the church was quite thrilling. Dr. John Shepard, a professor in the University in Fukuoka, and the Baptist Seminary, was our interpreter for the week. We found the people eager to hear the story of Christ.

We were impressed by the young people and their enthusiasm to learn. We visited the hospitals, some industrial concerns, the local Lions Club, the Bank, and even marched in a parade.

The largest meeting place was above the Credit Association building, and here we had two services with 300 to 400 attending. They had a band to play each night, and choirs, and other preliminaries and the entire services took in excess of 2 hours. 135 persons came confessing their faith in Christ, others registered that they would like to become seekers. Nearly every person present the last Sunday was weeping as were we. We heard they would rather shed their blood than their tears. They didn't want us to leave. It was difficult to leave.

We had only two services in Hong Kong in revival, plus that final Sunday morning service. We had 15 conversions there. Again we were amazed by the

mass of people in 387 square miles of area. We looked over into Red China, and we experienced water ration of three hours per day. The water situation there is critical. The day following our departure it was to be limited to three hours every other day, and word comes that now it is three hours every fourth day.

We were taken aboard the U.S.S. Ranger Aircraft Carrier anchored in the bay at Hong Kong. This was a real thrill to be on U. S. 'soil' and to see our flag. We were privileged to see Mrs. Chang, Mother of the two girls who attended Friona High School.

We flew by Cathey Pacific Airlines to Manila, Philippines. We were here two days and enjoyed it very much. We flew by Pan American Airlines to Guam to refuel, then to Honolulu.

We left on Tuesday, and awoke on Tuesday having passed back over the date-line. We were most impressed by Hawaii and its beauty. Here we went through U. S. Customs and showed our passports for the last time. Here we were no longer 'foreigners'.

We toured Mt. Tantalus, Pearl Harbor, all around the island of Oahu, and enjoyed our four days in Honolulu. We flew

Pan American to Los Angeles, Calif. and then T. W. A. to Los Vegas, Nev. and then Albuquerque, N.M. and Amarillo.

We were delighted to see about 50 members from our church at the airport with a huge sign, "Welcome Home . . . Bill and Mildred, Charles and Melba." This (and of course our children) was the best thing we had seen on the entire trip. Again we say thank you to everyone who made this experience possible for us. We are happy to be home, and will be glad to share our experiences with those who care to hear.

These pictures show the wreckage of the Santa Fe freight train two miles east of Summerfield last Friday morning. Thirty-five cars were derailed, and the wreckage was stacked up for several hundred yards. A brakeman from Amarillo was injured slightly, although thousands of dollars worth of damage was done. The freight was carrying zinc ore from Mexico to Dumas.

Jane Weis Chosen "Girl Of The Month"

Jane Weis, daughter of Mr. and Mrs. John Weis of Carlsbad and granddaughter of Mrs. H. H. Weis and her late husband of Friona, was named American Association of University Women's "Girl of the Month" for February.

JANE WEIS

Miss Weis, eighth in rank in the graduating class of 1963 of Carlsbad High School is a member of the National Honor Society, and Junior Classical League. She is also vice-president of Future Teachers of America, and a Bible class teacher at Fox and Lake Church of Christ.

She belongs to Future Business Leaders of America, the Latin Club, Lakeview Christian Home Kidgettes and Christian Youth of Carlsbad High School. She is local president of Epsilon chapter of New Mexico Phi Mu and vice president of Future Teachers of America.

Awards she has received include the 1962 United Nations Pilgrimage for Youth award, local Elks Youth Leadership award and proficiency awards in Latin I, Latin II, geometry and general business.

Miss Weis plans to attend Abilene Christian College.

David W. Whatley Born In Austin

Mr. and Mrs. Douglas Whatley of Austin became parents of a baby boy at St. David's Hospital May 27. He was named David Walter and weighed 10 lbs. 3 1/2 ozs.

Grandparents are Mr. and Mrs. Sloan H. Osborn, Friona, and Mr. and Mrs. W. C. Whatley, Groom. Mrs. J. B. McFarland, Friona, is a great-grandmother.

Mrs. Whatley and David are at their home at 5016 Avenue F in Austin.

Of Interest To THE WOMEN

Marca Massie Installed Rainbow Worthy Advisor

In a formal installation ceremony at Masonic Hall Saturday afternoon Marca Lynn Massie was installed worthy advisor of Friona Assembly No. 275 Order of Rainbow for Girls. She chose "Service" as her theme. "Help Somebody Today" is the chapter song, the flower is a white rose, colors are green and white and the motto is "Happiness through service to others."

The scripture reading was taken from Mark 10:45 and reads "For even the son of man himself has not come to be served but to serve." The emblem is the cross and for a charity project Miss Massie has chosen collection of old hose and plastic bags.

Mrs. Lillian McLellan was installed mother advisor. Other officers installed were Merylene Massie, worthy associate advisor; Rita Collier, charity; Mary Ann Roberts, hope; Sheryl Long, faith; Becky Coffey, drill leader and Lydia Chandler, love.

Also Karen Osborn, religion; Sandra Beene, chaplain; Sharon Awtry, musician; Rhonda Fallwell, confidential observer; Kay Coffey, treasurer; Kay Johnson, recorder and Kara Beth Sides and Karen Maynard, choir.

The following had charge of the ceremony: Jimette McLean, installing officer, Sharon Reeve, installing marshal; Pam Roden, installing chaplain; LaVoyce Burrow, installing recorder and Gail O'Brian, installing musician.

Members of the advisory board are Eaul Akens, chair-

MARCA LYNN MASSIE

man, Marie McKee, secretary, Olive Massie; Meryle Massie, Nettie Collier, Bill Flippin, Tommy Mercer, Gladys McVey and Betty Louise Rector. The chapter meets at 7 p.m. each first and third Monday at Masonic Hall.

Walther League Group Has Evening Outing

The Walther League, youth group of Redeemer Lutheran Church of Friona, recently went to Clovis for an evening outing. After a picnic lunch in the park, they attended a movie. Later in the evening they returned to the park for a cookout and devotional.

Those present included Bill and Bonnie Brandt, youth counselors, Aaron and Elizabeth Drager, Connie and James Schlenker, Debbie and Tommy Jarecki, Edith Schumann and Steve Wagner.

Guests were Betty and Earl Drager of Hereford. Next meeting of the group will be held June 23rd with Aaron Drager directing the devotion and topic study.

Three Attend Training Camp

Mr. and Mrs. Bill Spencer accompanied Marca Lynn Massie, Merylene Massie and Janet Rushing to Ceta Canyon early this week. These three are attending the Youth Officer's Training Camp directed by Rev. Kenneth Argenbright from Amarillo this week.

Spencer is youth counselor for the Friona Methodist Church. He and his wife returned Monday and the others will come home later this week.

Welch Family Returns Home

Louis Welch of Houston arrived in Friona Saturday from his home in Houston to visit his mother, Mrs. Nora Welch, who has recently been dismissed from Deaf Smith County Hospital at Hereford.

His wife, and daughter, Teena, who had been here several days returned home with him Monday evening. Mrs. Guy Welch accompanied them to Muleshoe and they completed their trip to Houston by train.

Judy Smith Receives Teaching Fellowship

Announcement has been made of the awarding of a teaching fellowship in English at North Texas State University at Denton to Judy Smith.

Miss Smith, a 1960 graduate of Friona High School received her bachelor of arts degree in English from North Texas this

spring. She is a member of Kappa Delta Sorority.

Her assignment will be teaching freshman English at the University. She will also be working toward her master of arts degree. She is spending the summer with her parents, Mr. and Mrs. Ralph Smith, in Friona.

JUDY SMITH

Luncheon Concludes Woman's Club Year

Final meeting of Friona Woman's Club for this year began with a one o'clock luncheon at Federated Club House Wednesday. Mrs. Wesley Hardesty led the invocation. Music was directed by Mrs. Ed White.

She introduced Mrs. Rita Beene, who sang "My Coloring Book," "Bill" and "My

Friend." She was accompanied by Mrs. Eva Miller at the piano.

During the brief business session roll call was answered and officers and committees presented reports. Sixteen members were present. "Never part without loving words to think of during your absence," -- Richter, was the parting quotation.

Rebekah State President To Make Official Visit

Plans have been completed for the official visit of the president of Rebekah Assembly I, O. O. F. of Texas, Sister Ellen Kretzmeier of Pampa, on June 17 at Oddfellows Hall in Friona.

Other lodges represented in this district are Hereford 228 and Dimmitt 54. Members of these lodges will attend the meeting. The New Mexico State president has been invited and is expected to be present.

Friona Rebekahs will be hostesses at a salad supper which will begin at 7:30 p.m.

At the Monday evening meeting of the organization at Oddfellows Hall 17 members were present. Sixteen sick visits were reported and eight cards had been sent since the previous meeting.

Hosts were Mr. and Mrs. Sam Williams. Refreshments of ice cream, cookies and cold drinks were served.

Mrs. Floyd Brookfield, noble grand, urges all members of the Friona chapter to attend this meeting.

Bridal Shower Fetes Mrs. Don Stubbs

Mrs. Don Stubbs, the former Pat Baxter, was guest of honor at a bridal shower in the home of Mrs. L. D. Pope from 2:30 to 5 p.m. Wednesday, May 29. Hostesses were Mesdames Pope, E. M. Jack, Alta Wyly, Harrison Evans, James Pope, Leo Balls and Bob Wyly.

Refreshments of angel food cake, nuts, mints and punch were served from a table covered with a white cloth and centered with a blue floral arrangement.

Those attending and sending gifts were Mesdames Bert Hadley, J. F. Messer, R. Munisen, Steven Stubbs, J. C. McLean, Boyd Pipes, Lester Dean, Dick Habbings, Clarence Martin, Calvin Martin, Eugene Nidey, Larry Martin, J. W. Baxter, Oscar Baxter, Grace Hart, Elton Wyly and J. W. McMahan.

Also Mesdames Richard Perkins, A. T. Stowers, Louis Baxter, Nacoma Merrill, Max Self, Ross Miller, Newman Jarrell Sr., Hardy May, Vernon Roberts, Sterling Graham, Troy Young, Sam Rule, Jerry Rankin, Ronnie Castleberry, Howard, Donn Tims, Compton, Henry Marshall, Carl Dorman, Walter Ogletree, Margie Albin, Carlene Treat, Watson Whaley, E. J. Graham, Chestre Dewbre, Jim Baxter and the hostesses.

Also Gay Wyly, Helen Stowers, Jimette McLean, Barbara Bracken, Karyl Williams, Willeta Wyly, Wilene Baxter, Coleen Harper, Elizabeth Baxter, Sue Shirley and James Perkins.

and rapid promotion; a man who can find things to be done without the help of a manager and three assistants.

A man who gets to work on time in the morning and does not imperil the lives of others in an attempt to be first out of the office at night.

A man who listens carefully when he is spoken to and asks only enough questions to insure the accurate carrying out of instructions.

A man who moves quickly and makes as little noise as possible about it.

A man who looks you straight in the eye and tells the truth

ity to do so. Until plans are a little more definite, persons interested in assisting with the project may call the Star office for information. Our phone number is 2291.

A pretty tan sweater with a leaf pin and matching glamour bonnet has found its way into the Star's lost and found department. If the owner will come by, we will be happy for her to pick it up.

With temperatures like they are at noon Wednesday, it doesn't seem likely that anyone will be looking for a sweater for the next few days, but when fall arrives someone will probably be wondering, "Where is my tan sweater?"

The following was lifted from a trade magazine. Hope the readers enjoy it.

Diana Taylor Earns Excellent Rating

Diana Taylor, who participated in the state solo contest at Austin Monday earned a Division II rating with a clarinet solo. She was accompanied to the capital city by J. B. Taylor, her father, Mrs. Eva Miller and Lowell Bynum.

She qualified for the state contest by making a Division I rating in Class I at regional contests in Canyon earlier this year. She will be a senior in Friona High School this fall. "A Division II rating means excellent," said Mr. Bynum. The group returned to Friona late Tuesday.

Advertisement for Pioneer Natural Gas Company. Text: BUILDERS KNOW... ONLY GAS COOLS SO MUCH BETTER FOR SO MUCH LESS! that homes are more saleable (and have a greater resale value) with GAS year 'round air conditioning. Only GAS has such a low operating cost for both cooling and heating, and practically no maintenance cost. For sales, service or information, call PIONEER NATURAL GAS COMPANY

Advertisement for SNO-MAN. Text: SNO-MAN WHO AM I? I'm a Poly-Vinyl plastic roof coating. I'm a Texan, I'm 9 years old and may look short to you, but Man! I'm long on service and protection. I'm made - sold - applied by Texans. I'm FHA approved in the Dallas - Ft. Worth area and will be approved here soon. Also approved by the public housing administration for a five state area. I've been tested and recommended by the Southwestern Laboratories in Ft. Worth from 5 degrees to 140 degrees. I came to Amarillo last August and cover over 100 Amarillo roofs - ask the man who has me. MY DUTIES - I lock on gravel - I seal roofs against leaks - I reflect 80% of the sun's rays, reduce attic temperatures 20%, lower cooling cost 30%. I am white or pastel colors, I have asbestos fibers and am fire retardant. No need to tear off your old roof or add a new roof - Just spray with Sno Man at a cost of much less than new roofs. I can be applied over and over if hail damage occurs without much added weight on your roof. In fact, only 18 pounds per square 100 ft. I can be applied to any roof or wall surface, tar, asphalt, masonry, shingles, wood, metal, tile, gravel, asbestos shingles, concrete block, brick or stucco. I am guaranteed to your satisfaction. My applicator is bonded and insured. I'm made by C. H. Drager Co., Dallas, Texas. I'll be happy to give free estimates. I'm sold by the Sno-Man Co., 3319 West 6th, DR 4-8089, Amarillo, Texas. I'm applied by C. G. Cheadle, DR 4-8089, 3513 West 8th, Amarillo, Texas. Bye, SNO-MAN

According to the American Medical Association News, more than 93 per cent of the 17.5 million Americans over 65 live in states which are using some portion of the Kerr-Mills law, which provides federal aid to the states, with administrative control primarily placed at the local level. Forty-four states with combined over-65 population estimated at 16,388,688 have made use of either the medical assistance to the aged facet of the law, or of its provisions for state Old Age Assistance programs.

**SHERIFF'S SALE**

THE STATE OF TEXAS )  
County of PARMER )  
NOTICE IS HEREBY GIVEN That by virtue of a certain Order of Sale issued out of the Honorable District Court of Parmer County, on the 22 day of April, 1963, by Dorothy Quickel, Clerk of said Court for the sum of Two Hundred Seventy and 78/100 (\$270.78) -- Dollars and costs of suit, under a judgment, in favor of the Plaintiff in a certain cause in said Court, No. 2323 and styled Frank E. Hodges Construction Company vs. Roy Hollis, placed in my hands for service, I, Charles Lovelace, as Sheriff of Parmer County, Texas, did, on the 16th day of May, 1963, levy on certain Real Estate, situated in Parmer County, Texas, described as follows, to-wit:

Lot Thirteen (13), Block Sixty-one (61) Original Townsite, an addition in the City of Friona, Parmer County, Texas, being less than one (1) acre, and levied upon as the property of Roy Hollis and that on the first Tuesday in July, 1963, the same being the 2nd day of said month, at the Court House door of Parmer County, in the City of Farwell, Texas, between the hours of 10 a.m. and 4 p.m., by virtue of said levy and said Order of Sale and judgment, I will sell said above described Real Estate at public vendue, for cash, to the highest bidder, as the property of said Roy Hollis.

And in compliance with law, I give this notice by publication, in the English language, once a week for three consecutive weeks immediately preceding said day of sale, in the Friona Star, a newspaper published in Parmer County.

Witness my hand, this 16th day of May 1963.  
Charles Lovelace  
Sheriff, Parmer County, Texas.  
Published in The Friona Star June 13, 20 and 27, 1963.

**In And Around--**

(Continued from page 2)

every time.

A man who does not pity himself for having to work.

A man who is neat in appearance.

A man who does not sulk for an hour's overtime in emergency.

A man who is cheerful, courteous to everyone, and determined to make good.

This man is wanted everywhere. Age or lack of experience does not count. There isn't any limit, except his own ambition, to the number or size of the jobs he can get. He is wanted in every business.

--Industrial Management Bulletin

Science is resourceful. It couldn't open the windows of a day coach . . . so it air conditioned the train.

Gulnn, Mrs. Frank Reed, Mrs. Porter McGee, Mrs. Buddy Stowers, Vivian Hise, Fran Dodd, Mrs. Dorothy Mann, Suanne Henry.

**HYDES RETURN**

Mr. and Mrs. H. A. Hyde returned home recently after spending several days visiting friends and relatives and sight-seeing in Colorado. At Loveland they were guests in the home of Mrs. Lee Harper. Homes in which the couple visited in Pueblo were those of Mr. and Mrs. M. B. Hadley and Mrs. Leola Greer.

**FACT AND OPINION**

From National Review: "If the House approves the multi-billion-dollar Mass Transit Bill, the Federal Government will move even deeper into the transportation business. At present, Washington throttles railroads through the ICC, hobbles airlines with the CAB, subsidizes and controls shipping through two maritime agencies, cements control over a vast highway network through the Bureau of Public Roads, and generally stuffs sand from the Potomac into the nation's gear boxes. In the interests of efficiency. Senator Case (R., N.M.) wants to consolidate all the transportation agencies under one cabinet-level department. Question: how will the bureaucrats who oppose private mergers for efficiency react to the proposed combination of trade restrainers?"

**DRIVE-IN WINDOW?** . . . H. L. Outland, manager of Southwestern Public Service, had what might have been construed as a drive-in window early this week after winds Saturday blew out the front plate glass window of the building.

## Highlights and Sidelights From Your State Capital

**AUSTIN** -- Texas Research League, a nonprofit government study organization that does many administration studies at the request of the state, has issued a report on its year-long probe of the Railroad Commission. Many of its recommendations on agency management and oil and gas conservation already are being programmed. One scheduled change involves the staffing and management of Railroad Commission district offices. Commission now has 12 such offices. Responsibilities with respect to wells and staff members are so varied that the League believes the system unfairly imbalanced. District 8 in Midland, for example, has approximately four times as many wells as District 4 in Corpus Christi, but each (Continued on page 4)

## Something To Think About

Street Church of Christ  
515 -- Friona, Texas

**SO YOU ARE SATISFIED!**

And what does that prove? The rich man was satisfied, but God called him a fool and required his soul that same night (LK 12:16,21). His being satisfied did not make his life right before God. The church in Laodicea was satisfied to the point of saying, "I am rich, and increased with goods and have need of nothing;" the Lord regarded them as "wretched, and miserable, and poor and blind, and naked." (Rev. 5: 17, 18). That shows how wrong a satisfied person or church can be. The Pharisee that went into the temple to pray was satisfied and glad that he was not like the publican. The publican was so dissatisfied with himself that he cried, "God, be merciful to me a sinner." Jesus said the humble publican went down to his house justified, but the self-righteous Pharisee found no such justification. Our being satisfied with ourselves is no evidence that God is pleased with us.

**GRATITUDE**

Once there were ten lepers who came to the Lord and were healed. The Bible relates that they went away clean, and only one returned to express appreciation. The Lord said, "where are the other nine?" We are a people who live in an enlightened land and are labeled by other countries as a Christian nation. It takes only a sojourn abroad to make one realize how truly God has blessed America. We have seen crowded multitudes on limited land areas, we have seen beggars and privation. We have experienced one week of living with water for our use but three hours a day every other day, and word comes that now it has lessened to three hours every fourth day. We are a people who can turn on the radio on Sunday morning, and many other times during the week, and hear gospel singing and preaching. We have seen people who are literally hungering for the gospel. We are a people who think nothing about having two cars, and we were among a people who ride bicycles and not a one owned an automobile. We are a people who have marvelous opportunities for free education, yet our leaders are lamenting that so many are dropping out. The people over there are being given an opportunity to learn, and they are grasping for it. Let us give thanks for this land, for our Christian heritage, for our material and spiritual blessings . . . let us say thank-you, Lord, for the rains and the marvelous moisture . . . let us no longer be of the other nine.

The local weatherman was so often wrong in his predictions that he became the laughing-stock of the community. He therefore applied for a transfer to another station. "Why do you wish to be transferred?" came the question from headquarters. "Because," the forecaster replied, "the climate doesn't agree with me."

BIBLE CLASS . . . Shown is the junior class at the Rhea Lutheran Bible School last week.

\*Dr. Anson Jones, last President of the Republic of Texas, was also a physician and author.

## Rhea Lutheran Church Closes Bible School

Immanuel Lutheran Vacation Bible School at Rhea began May 27th and continued through June 7, with a closing program on the evening of the last day. The Junior High Class was made up of the following: Curtis Drager, Shirley Schueler, Bernhard Binger, Wayne Schueler, Danny Schueler and Shirley Smith. Rev. E. A. Binger was the teacher. The art project of this class was the construction of a model church and missionary's home as they are built in the New Guinea mission field.

The Junior class consisted of Sherry Woodruff, Debbie Mears, Larry Sanders, Vickie Schueler, Kathy Schueler, Bobby Darty, Deanne Schueler, DeWayne Bauer, Dale Schueler, Rhonda Bauer and Darrell Schueler. Mrs. Walter Schueler was the teacher.

The Primary class included: Gale Parkey, Chris Sanders, Doris Schueler, Danny Parsons, Gary Woodruff, and Johnnie Hernandez. Mrs. Chris Drager was their teacher.

Members of the Kindergarten class were: Danny Allen, Carla Bauer, Donnie Gustin, Terry Parkey, Carolyn Parsons, Darlene Schueler, Eugene Schueler, Kenny Sifford, Spencer Turner, Dianne Woodruff, Leonard Woodruff, Doris Woodruff, Butch Graham and Karlis Graham. Their two teachers were Mrs. Franklin Bauer and Mrs. Raymond Schueler.

The Nursery class was the smallest, including: Denise Schueler, Melodie Dixon, and Stephen Bauer. Their teachers were: Mrs. Gilbert Schueler and Mrs. Roy Zieschang. "In spite of storm, flood and mud, the attendance was very good," said Rev. Binger.

## Osborn Receives Degree From Dentistry School

Charles Osborn, son of Mr. and Mrs. Sloan H. Osborn, was a member of the spring graduating class at the University of Texas School of Dentistry at Houston. He received his doctor's degree in dental science.

Dr. Osborn and his wife, Jane, and their four children, Burt, Bill, Shelly and Barton are moving from Houston to Fort Worth.

Dr. Osborn is a graduate of Friona High School and Texas A & M University at College Station and a former student of West Texas State University at Canyon.

He has accepted a three year preceptorship with Dr. Wells Stephens, a Fort Worth orthodontist. Dr. Stephens has been awarded an honorary degree

## Two Pastors Are Leaving Friona

Three Friona churches are experiencing pastoral changes in the immediate future.

Rev. Hudson B. Phillips, Jr., pastor of the Union Congregational Church since August of 1959, left this week to assume duties with St. Mark's United Church of Christ in Gretna, Louisiana. He has been active

in the Ministerial Alliance, Boy Scouts and Junior Chamber of Commerce.

Paul Smith, minister of the Sixth Street Church of Christ, will leave that church following services on Sunday, June 23. Smith has been in Friona the past two years. He is moving to Salida, Colo.

Rev. Fred Beversdorf of Hereford is assuming duties as pastor of Friona's Redeemer Lutheran Church.

Also, the First Baptist Church is without a music and educational director, since the resignation of Hubert Reeves recently.

Rev. Russell McAnally, pastor of the Friona Methodist Church, was returned to the local church by the conference.

Smith. In the front are County Agent Deryl Coker, John Littlefield, John Gammon, Jack McCracken, Andy Hurst and A. L. Black. Commissioner Guy Cox of precinct 3 is shown in the right foreground.

**Highlights--**

(Continued from page 2)

office is staffed with only four engineers. Wichita Falls has more than twice as many wells as Houston, but two less field men.

Four field men watch over 62,148 operating wells in the Midland district, yet 21 men oversee 26,036 wells in the Kilgore area.

League's answer to the problem is to redistrict and cut the districts from 12 to 10.

The huge Midland district would be divided into three areas with new offices at Lubbock and Fort Stockton.

San Angelo, Refugio, Mount Pleasant and Palestine offices would be absorbed by other districts under the new operation plan.

**PADRE ISLAND PARK PLANS UNDERWAY** — If and when Congress approves a \$1,500,000 appropriation to meet the land-buying needs of Padre Island National Seashore Park, newly-named park superintendent William L. Bowen will begin to acquire land for the proposed 80.5-mile coastal playground.

U. S. Secretary of the Interior Stewart Udall said Bowen will open an office in Corpus Christi some time after July 1 with a small staff. Bowen, Kansas-born veteran of the national park service, took part in preliminary studies leading to the establishment of the new national seashore area on Padre Island.

**COMMITTEE OF 25 AT WORK** — Gov. John B. Connally entertained his "Committee of 25" with a coffee, then set them to work. Committee has the year-long task of studying education beyond the high school.

Connally told them Texas needs a "total policy to guide all institutions, all segments of our higher education enterprise." He said this included state, church and private schools, junior and senior colleges and academic and technical institutions.

Committee met and decided to send their chairman, H. B. Zachry of San Antonio, suggestions on how to approach the challenge. They meet again in August.

**SPECIAL SESSION TALK DWINDLES** — Rumors of a special session to get an appropriations bill more to Governor Connally's liking still are going around. But now predictions are being made about a January session, rather than one in the summer or fall.

Connally said he didn't like the one passed by the Legislature in the regular session because it "short-changed" higher education.

**HOME-BUILDING ABUSES** — Reported abuses of home building practices and loans were the subject of a recent conversation between Governor Connally and Lubbock District Attorney Alton Griffin, president of the state district and county attorneys association.

Connally said, "It may be that additional legislation will be necessary to get at the heart of the matter."

One reported abuse that concerns them is the alleged practice of "double contracting" wherein 100 per cent home financing is achieved by cushioning appraisals and other real estate sales documents.

**APPOINTMENTS** — Connally appointed three new members to the State Finance Commission, including S. R. Jones Jr., president of the First Pasadena State Bank in Pasadena, and Rex Baker Jr., president of Southwestern Savings Association of Houston. He also reappointed Taylor attorney Roman J. Bartosh.

Bert Fields, Dallas oil operator, was reappointed and named chairman of the Texas Turnpike Authority, on which he has served since 1953. A new appointee is J. M. Haggar Jr. of Dallas, vice-president of the company that manufactures Haggar slacks for men.

Haggar replaced Armistead Rust of San Angelo.

**CARR'S CHOICES LIGHTENED** — After August 23, the governor will have to make 15 more state board appointments. These 15 citizens named will take the place of just one man — Attorney General Waggoner Carr.

Switch was made possible by a bill, supported by the attorney general, which passed during the recent legislative session. End result will be to peel down the pile of "ex officio" jobs, which have bur-

**Calls To Have Night Rate**

Telephone users in Texas will get their second reduction in station-to-station late night (after 9 p.m.) long distance rates effective June 15, according to a General Telephone Company spokesman.

The new rates will apply to calls within Texas (intrastate calls).

Earlier this year long distance rates on station-to-station calls made to other states (interstate calls) after 9 p.m. were reduced, with some exceptions, to a maximum of \$1.

When the newest after 9 p.m. rates become effective June 15 the maximum charge for a station-to-station call to any point in Texas will be 80¢; however, generally speaking, the calls will cost less than the maximum. The new after 9 p.m. intrastate rates will not apply to collect calls or calls charged to a third number.

The company spokesman emphasized that night rates will continue to be in effect between 6 p.m. and 9 p.m. and that the additional reductions will apply to station-to-station calls made to other points in Texas between 9 p.m. and 4:30 a.m.

The actual savings to customers range from 5 to 50¢, depending on the distance of the call.

dened attorneys general in the past, and give Carr more time for his main job as the state's head lawyer.

**POST MORTEM** — About 300 state labor leaders came to Austin to reflect on the accomplishments — or lack of accomplishments — of the 58th Legislature.

Speakers at the seminar included Rep. Dick Cherry, Waco Democrat, and Rep. Ike Harris, Dallas Republican, and Sen. A. R. (Babe) Schwartz of Galveston.

"The 58th could turn out better than the 59th," Cherry said. "Next time, you'll have the problems of a big tax session and a second-term speaker (Speaker Byron Tunnell, supposedly) running for Attorney General."

As session achievements, Cherry listed the Padre Island bill, Municipal Annexation bill, Tourist Development program, Water Storage expansion and provisions for teacher retirement.

Measures for rural department, which did not pass, were among what he considered failures of the Legislature.

**GOOD NEWS** — Although state and federal animal health officials reported that 72 Texas counties are now tagged "screwworm infested" the report was good news, said Dr. R. G. Garrett, executive director of the Texas Animal Health Commission.

Garrett said that 333 samples confirmed as screwworms in the March 31-April 27 period represented a decrease of 95 to 98 per cent in the number of cases in years before the screwworm eradication project went into effect.

"We're real happy with the success of the program," Dr. Garrett said. "We hope to be completely successful in wiping out the screwworm by the end of the three-year program." He said livestock producers were responsible for the stamping out of the costly pest in at least two ways: Through their \$3,000,000 contributions and through "excellent" cooperation in reporting cases and sending samples.

"It's strictly a producers' program . . . initiated by livestock producers and wholeheartedly supported by producers."

The three-year, \$12,000,000 producer-federal-state program almost has reached the mid-way point in its progress.

**BUS DRIVER OF THE YEAR** — Records of more than 8,000 school bus drivers were screened before Elmer J. Ashby of the Carlisle Independent School District, Rusk County, was selected "Texas Public School Bus Driver of the Year" by the Texas Education Agency.

In 25 years of service, Ashby transported school children 300,000 accident-free miles, without missing a day for personal or superficial reasons.

**'STATES' RIGHTS' BILLS IN AIR** — The 58th Legislature passed two proposed "states' rights" amendments to the U.S. Constitution. But both are a long way from changing the law of the land.

# County Verified Top Grain Producer In Nation For '62

Parmer County was verified as the top grain sorghum producer in the nation in 1962, according to figures released this week.

The county produced 14,885,000 bushels of maize, to lead the state and nation, and replace Hale County at the top of the list. Hale County's 1962 total of 13,593,000 bushels was about

1,300,000 behind Parmer's total.

The grain sorghum base in Parmer County for 1962 was 189,000 acres, which averaged 78.7 bushels per acre, or 4,407 pounds per acre.

In 1961, Hale County was the leader with a total production of 14,924,000 bushels, to Parmer's 14,610,000. The two counties annually wage a head-on battle for the top honors in the state and nation.

Third-place county in the state, trailing Parmer County by more than 3.6 million bushels, was Castro County, which produced 11,273,000 bushels of grain sorghum in 1962. Swisher County was fourth with 10,952,000 bushels, and Deaf Smith was next with 8,731,000. Actually, Parmer County's production per acre was down from the 1961 figure, when it produced 82.5 bushels per acre.

The county ranks sixth in the state as to total off-farm storage capacity for grain, with space for 35 million bushels of grain. Leading county in the state for storage space is Hale, which recently replaced Tarrant County, with space for 90 million bushels. Lubbock County is third, followed by Swisher, Harris and Parmer.

More than half of the state's total grain storage capacity is located in 31 South Plains-Panhandle counties, which can accommodate in excess of 482 million bushels.

The 1962 grain crop in a 28-county area surrounding Lubbock produced 59.2 per cent of all grain sorghum grown in Texas, and 23.3 per cent of the entire U. S. production. This area had all 10 of the top grain sorghum counties in the state.

Nationally, grain sorghum ranks fifth among the 10 major crops. In the Lubbock area, grain sorghum is second only to cotton for economic importance. Both crops are produced in more abundance here than any comparable area in the world.

Grain sorghum is the top money-maker in Parmer County, contributing some \$13 million to the county's \$46-million agriculture industry last year. Cotton was second last year, contributing some \$12

million, despite having a record year in the county.

Following are the top 25 grain producing counties in the state.

County	Harvest Acres	Yield Per A.	Prod.
Parmer	189,200	78.7	14,885,000
Hale	186,200	73	13,593,000
Castro	156,300	75	11,273,000

## Higher Moisture Content Grain Okayed For Loan

Grain Sorghum with 14 per cent moisture content, instead of the previous 13 per cent level, will be eligible for price support loan on 1963 grain sorghum as result of recent change in Commodity Credit Corporation policy. This could mean as much as three to four cents per hundred to grain sorghum producers since moisture discount of normally two per cent per point will now begin at 14 per cent instead of 13 per cent, according to Bill Nelson, Executive Vice-President of the Grain Sorghum Producers Association.

Nelson said that the association spearheaded a move for the change and was joined in their efforts by Producers Grain Corporation and the Texas Grain and Feed Association. Membership of both the elevator groups adopted supporting

resolutions requesting the change.

Commodity Credit Corporation will accept grain higher than 14 per cent provided the receiving warehousemen will attach an agreement to deliver 14 per cent moisture grain. All previous rules regulating 13 per cent to 15 per cent receipts and 15 per cent and over have been voided, Nelson said that the new regulations more nearly reflect actual trade practices and move closer toward the official grain sorghum standards used in free market trading.

Nelson said farmers in Texas, New Mexico and Oklahoma support Association work in their interest, such as the moisture change, by a two pound per thousand deduction from their deliveries of grain sorghum at local elevators.

## Most Cotton Eligible For Micronaire Test

Most of the cotton produced in this area will be eligible for the new U. S. Department of Agriculture "mike" test offered for the first time to farmers throughout the country.

This was pointed out today by W. K. Palmer, Officer-in-Charge of the Agricultural Marketing Service Cotton Classing Office in Lubbock.

"The 'mike' test is made only on cotton which is classed for grade and staple," Mr. Palmer explained, "Last year,

we classed 2,270,000 bales for farmers served by this office -- 100 per cent of the cotton in this territory."

The term, "mike" comes from the micronaire airflow instrument which is now widely used to determine the spinning utility of cotton. The "mike" reading indicates the fineness and maturity of cotton, which is related closely to manufacturing waste, yarn appearance, fabric finishing and processing efficiency in the manufacture of cotton goods.

"Farmers who have their cotton 'miked' should be in a better position to market it on the basis of its quality," he said.

All farmers in Smith-Doxey improvement groups are eligible for the "mike" service, which costs 8 cents per sample. Cotton is classed without charge for Smith-Doxey farmers.

Ginners are filing the applications for the micronaire testing service. They are urged to apply early, July 1 is the deadline for applying.

Two shipwrecked sailors marooned on a desert island were in despair after several months, but one day they became hysterical with joy. A bottle with a note in it came floating in on the tide. With trembling hands one of them opened it, only to groan. "It's from us," he gasped.

# THE HIGH PLAINS FARM AND HOME

MIDLAND BERMUDAGRASS, such as this pasture southeast of Friona belonging to A. L. Black, does very well in the Parmer County area. It produces good forage yields under irrigation, and proves very profitable.

## Midland Bermuda Produces Good Forage Yields Here

Midland Bermudagrass is a cold tolerant hybrid that is producing high yields of forage under irrigation on the High Plains.

The new grass developed at the Georgia Coastal Experiment Station is a cross between Coastal Bermudagrass and the cold-hardy Indiana Common Bermuda, explains a new publication of the Texas Agricultural Extension Service.

"Midland Bermudagrass," L-591, says that the hybrid is taller and has fewer rhizomes than Common Bermuda. It is

darker green, has stiffer leaves, produces more seedheads and begins growth earlier in the spring than Coastal Bermuda.

Midland may be grown on most soil types where adequate fertility and moisture is available, according to the leaflet. The grass has a high requirement for moisture and should be irrigated in areas of less than 25 inches annual rainfall, it continues.

Springing is used to establish Midland and it can be planted about April 15 in the

Lubbock area and about April 25 around Amarillo. Usually four to 12 months are required for Midland to form a complete cover depending on the time of planting, moisture, fertility and weed competition.

Fertilization is necessary in almost all cases for high yields of good quality Midland forage. Though all the nutrient elements are important in grass production, nitrogen is the key mineral and three or four applications should be made on Midland during the growing season.

Management of grazing will determine if Midland is profitable or not. A systematic grazing plan is necessary for optimum utilization of forage, to prevent excessive losses from

trampling and to allow irrigation and fertilization scheduling. A rotation grazing system best meets these needs, the bulletin explains.

For details on Midland Bermudagrass, contact your local county agricultural agent or write the Agricultural Information Office, College Station, and ask for L-591.

## ASCS Measurements Set To Begin In The County

Employees of the Agricultural Stabilization and Conservation Service (ASCS) are to begin measuring cotton, feed grain and diverted acreage in Parmer County this week, according to Prentice Mills, county ASCS office manager.

Mills said he would recommend that farmers go with the "reporters" when he measures his farm.

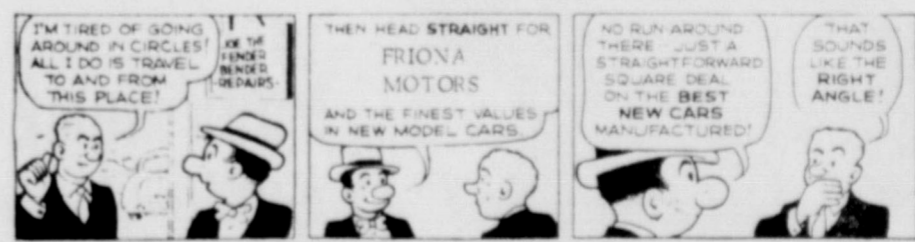

"It is the farmer's land we are measuring, and his money we are counting; therefore, it is to his advantage to be thoroughly satisfied that each field is properly measured," Mills said.

The ASCS office manager added that original measurements are done at the expense of ASCS. Farmers will be required to deposit the cost of remeasurements to de-

termine acreages of excess crops destroyed, or acreages which the farmer believes to be in error.

Excess crops must be destroyed, and a deposit made to cover cost of remeasuring within 15 days of the date of the original notice of acreage. If a deposit is not made, or an extension of time requested and approved by then, the acreage as originally determined will be considered final.

## CCC Wheat Premiums Differ From Last Year's Program

Wheat placed under government loan through the Commodity Credit Corporation will have a different type of premium offered this year, according to Prentice Mills, officer manager of the Farmer County ASCS. Last season for the first time, premiums were paid for wheat high in sedimentation content. Premiums were paid up to 25 cents per bushel for wheat testing above 65 in sedimentation rating.

premiums have been cut in half, and protein premiums have been added. Also, it is possible to take discounts on both sedimentation and protein contents, if the wheat tests low enough. "According to the way our wheat tested last year, farmers might experience a drop of about 10 cents per bushel under the new program," Mills said. He indicated that most of Farmer County's wheat fell in the upper bracket as far as sedimentation was concerned, but would be from low to middle on the protein chart. "High sedimentation ratings are a lot more prevalent than high protein ratings," Mills added.

It was pointed out that farmers wishing to hold wheat on their farms may have the wheat tested at the Farwell Grain Exchange, so they will know the sedimentation and protein ratings. Following is a chart showing both discounts and premiums available through the CCC:

Protein Premium	Cents per bushel

NEWS FROM THE  
**FARM BUREAU**  
BY RAYMOND EULER

The Farm Bureau Bindweed Eradication program is going along well in just about every area. Franklin Bauer is going to take the 4-H boys of the Rhea community on a tour of bindweed plots in that area and see that they are treated, Herman Gerles, chairman of the committee, expresses himself as well pleased with the cooperation that is being received in this eradication project.

Here are some of the main points, briefly, of the Farm Bureau recommendations for a farm bill. This bill is being sponsored by bi-partisan leadership in the U. S. Senate:

1. Repeal of authority for the certificate plan on wheat, and repealing the Feed Grain Act of 1963.
2. Set support price for wheat at the higher of average world price of wheat of preceding three years or 50 per cent of parity. Set feed grain support prices at the higher of 90 per cent of average price received by farmers during preceding three years or 50 per cent of parity.
3. Terminate all acreage allotments and marketing quotas for wheat and feed grains.
4. Provide for a cropland retirement program under contracts not to exceed three years on a bid basis that prohibits grazing or other use of the land other than conservation.
5. Prohibit release of these commodities from CCC stocks for domestic use at less than 115 per cent of the price support, plus carrying charges.

If you favor something of this nature, you are urged to write your congressman, telling him so.

Farm Bureau, in carrying out membership policy, is urging defeat of the Cooley Cotton Bill of compensatory payments. In its place would be supported a return to a program very similar to the intent of the program in operation until 1961, when USDA changes began another increase in surplus accumulations and decreases in domestic and foreign consumption of cotton. Support price for 1964 would be 30 cents for middling-1-inch. Support would decrease to 29 cents for 1965 if 1964 offtake does not equal production. Minimum acreage would be 17,500,000 for each of the two years. Write your congressman if this sounds good to you.

# SHAMROCK

## NITROMITE

82.2% NITROGEN

### SIDE-DRESS

WITH THE FULL MIGHT OF NITROGEN

It's now or never for this year's cotton and grain crops. The nitrogen needed for an abundant, high quality harvest should be applied before the 12th week of growth or before the plant begins to boot or bloom. Anhydrous ammonia supplies this nitrogen in the largest quantity by volume and in the most usable form. We recommend and sell Shamrock Nitromite because we know it to be a fine brand of anhydrous ammonia, 82.2% nitrogen.

## High Plains Station Steps Up Castor Bean Research

Sixty per cent of the castor beans harvested in the United States are raised on the High Plains of Texas. About 85 percent of the castor beans consumed in this country are imported. Around five hundred acres of the first dwarf variety were raised in the High Plains in 1956. The castor bean planting for 1963 is estimated to be 40,000 acres. Many farmers are planting castor beans on their diverted acres.

Twenty strains and varieties of castor beans are being tested at the High Plains Research Foundation in 1963. This is the sixth year research on this crop has been conducted at the Foundation's farm at Halfway. Barry Love, Assistant Agronomist, and Paul Belcher, Laboratory Assistant, are conducting the variety tests.

The seven released U.S.D.A. regional varieties being tested are the Hale, Hale Hybrid, Lynn, Dawn, Baker 247, Baker 296, and OK 8-192-B. All of these varieties are resistant to the Alternaria Leaf spot except the Baker 296.

There are six top-crossed experimental strains of the Hale variety furnished by the Baker Castor Oil Co. and seven experimental strains supplied by the Texas Agricultural Experiment Station No. 8. All are being tested for yield and adaptability.

The new varieties are of more uniform yield the last two years than early varieties tested at Halfway. Top yielding varieties are: Dawn, Hale, Hale Hybrid, Baker 148, Baker 196, and Lynn.

The fertilizer testing of the beans are being conducted by Delbert Langford, Associate Agronomist and Billy Gene Warren, Laboratory Assistant at the Foundation. For several years, the most profitable fertilizer application has been 100 pounds of nitrogen preplant and 50 pounds side-dressed in the Foundation's fertilizer testing.

Flame Cultivation for weed control on castor beans include six different treatments compared with the non-flamed beans. Hale inbred variety is being used in 1963 in the Flame Cultivation test. The tests are being conducted by Jack Parks, Assistant Agricultural Engineer, and Dale Reeves, Laboratory Assistant.

Early experiments in the use of flame resulted in decreased infestation of the leaf spot disease because the feeder roots were not severed and thus not allowing the entry of the leaf spot spores into the broken roots.

Castor beans are being produced in Hale, Swisher, Castro, Farmer, Lamb, Lubbock, and Hockley counties in the High and

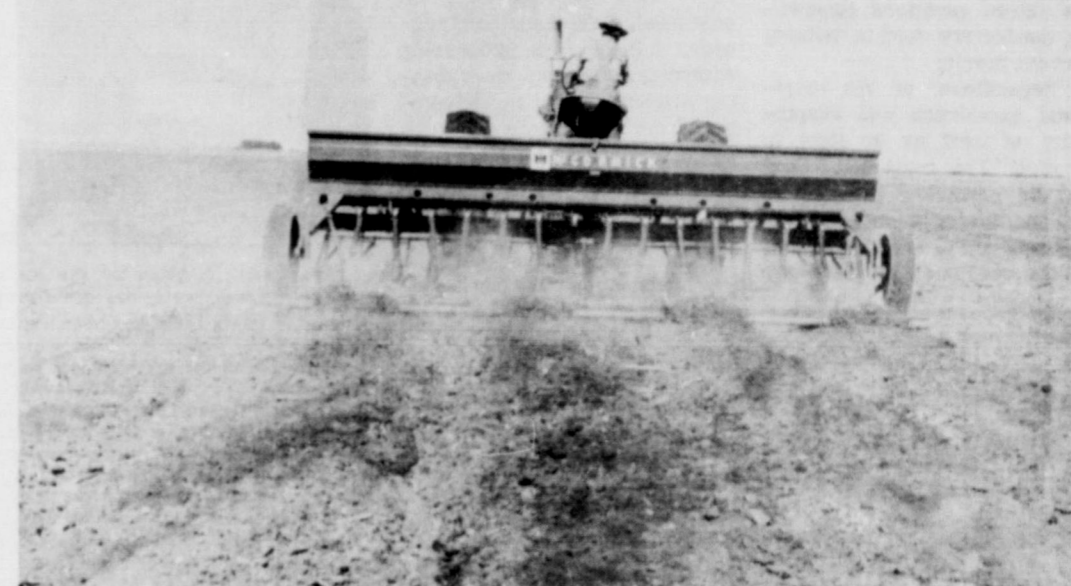

## Proposed Wheat-Feed Bill Would Scrap Grain Law

Area farmers which have been plagued by rain, hail, no cotton legislation, and potential loss of income from wheat were alerted today of another danger facing them. The 1964-65 Feed Grain Law passed by Congress only last month will be wiped out if Wheat-Feed Grain bills now being advocated by some farm and business groups should pass, according to Elbert Harp, president of the Grain Sorghum Producers Association. Harp said that all current new bills calling for wheat-feed grain legislation provide for abolishing the feed grain program and lowering the price of grain sorghum. He pointed out that no further legislative action is required to assure continuation of the current level of farm income from grain sorghum through the Feed Grain Act of 1963.

The act, supported by the association after county and area policy meetings earlier this year, will continue a program of price support loan, direct payment, and pay for di-

verted acres. The years used to determine the base acreage remain 1959-60, however, the normal production for price support payments and land diversion payments for the 1964 crop are based on the 1959-62 average yield, and the 1965 crop on the 1959-63 average yield. These last points were pushed in order to spread the number of years adverse weather, such as hail, would have on the level of the payment according to the association leader.

Harp urged that all grain sorghum farmers actually read any new farm bill which might be advocated to them, as designed to solve some other commodity problem, as it might abolish their own program and lower area income to farmers and rural communities. Copies of proposed wheat-feed grain bills can be had from your congressman or from the Grain Sorghum Producers Association, 322 Petroleum Building, Amarillo.

FARMERS THROUGHOUT Farmer County are busy these days trying to get crops re-planted, or get crops which are planted to come up. Here, a worker on the Tom Pruett farm west of Friona is drilling grain sorghum.

## Methods Listed For Having A Neat, Well-Kept Lawn

A beautiful, well-kept lawn adds to the material value of a home and is a basic requirement of an attractive yard. The beauty of a lawn depends largely on the care it receives during

the growing season, points out A. C. Novosad, extension pasture specialist.

He lists fertilization, watering, mowing and weed control as important considerations in a good lawn care program. Fertilization, he says, is one of the most neglected. The best indicator for fertilizer use is a soil test. However, if soil test information is not available and the lawn has not already received a spring application of plant food, Novosad recommends an immediate treatment with a complete fertilizer, a 1-1-1 or 2-1-1 ratio. Enough should be applied to supply two pounds of nitrogen per each 1,000 square feet of lawn area. In addition, nitrogen should

be applied every 30 to 40 days during the summer at a rate of one pound of nitrogen per 1,000 square feet of lawn. Such applications will keep the lawn grasses green and vigorous during the growing season. In the fall, 30 days before the first expected killing frost, the lawn should get an application of a complete fertilizer such as was applied in the spring.

The lawn should be watered only when the grass needs it. A slight wilting is an indication the grass needs water. Frequent light waterings are not recommended. Wet the soil to a depth of six inches or deeper. This will encourage deep root systems and enables the plants to utilize the plant food applied.

It is best to water in the mornings.

Proper mowing gives a healthier and thicker turf. Mow regularly and don't clip more than one inch at a time. Keep the mower sharp and in proper adjustment and mow Bermuda grass at a height of one to one and a half inches; St. Augustine and bluegrass at one and a half to two inches for an attractive lawn, says the specialist.

A thick, vigorous turf is the best defense against weeds but if they are a problem chemicals can be used for control. Ask the local county agent for details.

A child born today can expect to live ten years longer than one born 20 years ago.

## Egg Quality Best When First Laid

Eggs have their highest quality when first laid and from this point on, explains F. Z. Beanblossom, extension poultry marketing specialist, every quality factor begins to decline.

How fast or slow egg quality declines depends to a large extent on handling and storage practices, says the specialist. The most important is to provide a holding temperature of not more than 55 degrees with a relative humidity of about 80 per cent.

If such conditions are maintained, they will materially aid in keeping the original egg quality high for two to two and a half weeks, points out Beanblossom.

Egg quality can be easily and accurately checked by breaking out a sample, one or two percent from each group, and measuring their Haugh Unit score. This, explains the specialist, is the ratio of the albumen height and the egg weight. A score of 72 or better equals

The earliest written records of surgery date back to Egypt in 1600 B.C.

grade AA, 55 to 72 is grade A and 31 to 55 is grade B.

Several firms in Texas are now breaking out eggs on a routine basis for quality determinations as a part of their grading programs. Beanblossom says that he will be glad to supply information on the break-out programs now in operation. Requests should be addressed to F. Z. Beanblossom, poultry marketing specialist,

# Tech Professor Reports To Canadian Convention

A Texas Tech associate professor of animal husbandry, Dale W. Zinn, has presented a paper at the national convention of Performance Registry International, meeting in Toronto, Ontario, Can.

Zinn reported to the group last Thursday on "Recent Advances In Meat Research As They Effect the Beef Cattle Producer."

Describing the changes that have come in steer judging, Zinn said that emphasis was formerly placed on dressing per cent and carcass grade, but then, as now, attention is given to the kind of carcass one might expect when the steer was slaughtered.

"Generally, those factors which influence beef carcass merit as we define it today can be categorized under two main headings, quality factors and quantity factors," Zinn said.

Zinn pointed out that research in meat in recent years has changed many ideas concerning desirable carcass attributes and, in many cases, has raised questions concerning the factors used in defining carcass merit.

"Regardless of the nutritional excellence and adaptability of beef as an item in the diet," Zinn continued, "beef will be consumed in adequate and increasing quantities only if it appeals to and is accepted by the consumer on the basis

of leanness and tenderness." Zinn also described and explained various research that has been conducted at Tech, as well as recent studies at other universities, regarding carcass composition, feeding periods, "heritability" and growth and development.

"In my opinion, the most important thing you can do is to find out what kind of a carcass your cattle are producing," Zinn stated.

"Even though the thicker beef carcass has 'eye appeal,' the fact remains that the edible portion is not as great as one which is angular and has more length," he added.

Questioning the validity of the assumption that a majority of cattle today are of the "meat-type," Zinn said, "I seriously doubt that 10 per cent of our total feedlot market steers today could qualify under the P.R.I. Standards."

Zinn told his audience, "In my opinion you are in the best position of any cattle breeder in the world to make a lasting improvement in beef cattle."

"You have at your disposal the necessary machinery to make this improvement," he continued. "You have herd records, I.B.M. data processing equipment, bull and steer testing station, research and support from agriculture research centers, capable officers, directors and fieldmen, and most of all, you have the desire and drive to accomplish the job."

Zinn concluded, "You are the leaders for beef cattle im-

provement. I hope you will keep this trust."

Following the conclusion of the Canadian convention Zinn goes to Stillwater, Okla., to present another paper, before returning to Tech June 16.

# Stockmen Warned To Use Caution In Screwworm Care

A word of warning on the screwworm control program has been issued by Texas and U. S. Department of Agriculture officials:

"Don't rely entirely on the sterile male fly program to eradicate the screwworm."

The release of sterile male flies has been remarkably ef-

fective in Texas and the Southwest, Agriculture Commissioner John C. White noted. However, officials are concerned about reports that some livestock producers are not examining livestock regularly or treating animal wounds.

Already this season, screwworms have been found in northern Texas and close to Louisiana and Arkansas borders. It is imperative that stockmen use proven measures for preventing and treating screwworm infestations in livestock instead of relying completely on the sterile fly program, White said.

Eradication measures and cold temperatures have dras-

tically lowered the pest numbers. A few winter infestations occurred in the extreme southern tip of Texas. Most recently, isolated infestations have occurred as far north as Andrews and Fisher counties and as far east as Shelby County.

"Some producers apparently believe we are so close to eradication of the insect that they can relax their vigilance", one official stated. "This is a mistaken notion that could extend the time necessary to get rid of the pest."

"Sterile flies will take care of screwworm cases that occur in animals that are inaccessible, such as wildlife.

Miss Grain Sorghum of the Nation, Sandra Sue Stargel from Memphis, Texas, welcomes grain sorghum seed from Argentina.

In past years seed has been exported by the U. S. for planting in Argentina. During the 1963 season, the active demand for certain varieties prompted the shipment of top quality Argentine produced seed to the U. S. This seed was recently harvested and quickly sent to Lubbock, Texas. After grading, treating and re-bagging it has been moved into the distribution channels. Although the seed is grown in Argentina it is genetically the same as that produced in the United States. Look for the tag "Grown in Argentina," in your shipment this year. It is an example of greater agricultural cooperation between American countries.

Miss Stargel is a Freshman at Texas Tech in Lubbock, Texas.

# Chemicals Used To Control Irrigation Border Weeds

The control of weeds on irrigation borders has made level benches and similar conservation practices difficult to use by farmers. Therefore, the discovery of an efficient, inexpensive, chemical weed control system which is not hazardous to cotton is needed, explains Progress Report 2268, of the Texas Agricultural Experiment Station.

It reports an acceptable method for controlling annual weeds less than three inches tall. The method is post-emergence foliar sprays of Karmex DL with a surfactant. Two summer applications have provided complete control of weeds on the High Plains.

The toxicity of Karmex DL was greatly increased by the

use of one or more pounds of surfactant mixture added to one pound of diuron, the base of the spray. Using this system, weeds were killed and residual action lasted for about eight weeks. The treatment was found to be safe for use in or near cotton or sorghum fields when reasonable precautions were used to prevent excessive drift during the spray applications.

Application of the spray was with a tractor-mounted sprayer, operating at 30 pounds of pressure, and 25 gallons of spray material per acre were used. The borders were treated on May 1 and observed 10 days later to determine the per cent of weed kill, explains the publication.

The report says that Karmex DW did not give satisfactory re-

U. S. SENATORS RALPH W. YARBOROUGH of Texas, left, and Clinton B. Anderson of New Mexico, co-authors of a bill passed by the Senate to help establish water research centers at state universities and land-grant colleges, study a chart on Texas' future water needs. The chart shows Texas population of 10 million will go up to 22 million by the year 2010; available jobs will rise from 3.5 to 8.5 million, and personal annual gross income from \$14.5 to \$64 billion. "While Texas needed only 2 million acre feet of water in 1958 for city and industrial use," Senator Yarborough said, "by the year 2010 more than 12 million acre feet will be required. Research can help provide more water at less cost. A total of \$563 million is to be spent on Texas for 30 major new reservoirs by 1975. We need to do more research and develop experts in Texas on Texas water needs."
