LISTEN TO LUKE

By Albert:---
It didn't take long for the phone to start ringing last Thursday after the paper came out to let us know that we had been wrong about the location of the Boozier house shown in the old picture on the front page of The Times.

The house was on the corner where The Kerr Mercantile Co. now is and there was nothing on the corner east at that time. We had misread an old picture of the town that we had referred to for the location of things. The street in the 1911 picture was not too distinct.

This information would also put the horse pens between the old and new Kerr buildings.

We are happy to get the Boozers back where they belong and are glad for the reader interest in our old pictures.

By the way, do you have any old ones?

We offer our congratulations to the Eagle Band for their success in a Division I rating at the band meet last Saturday.

The students and director spent a lot of time and effort in this endeavor and it shows what can be done when a group is inspired to such goals.

Our Thanksgiving message is on page three of The Times this week.

Mapping of Area Begun by U.S.G.S.

The Topographic division of the United States Geological Survey has opened a temporary field office in the Ferguson Building.

Survey parties working out of this office will do the field work necessary to compile topographic maps of approximately 1,024 square miles.

These topographic maps will be compiled from aerial photographs, using the latest scientific equipment.

Part of the field work will consist of establishing the elevation of certain features that can be identified on each photograph. The latitude and longitude of certain points must also be determined to accurately match the current mapping to mapping done in the past and also to that which will be done in the future. It is also necessary that all parts of the projects be visited to classify the roads or trails as to surface material, condition, etc. Other information that must be obtained in the field to supplement the aerial photographs is stream classification; names of prominent features; and classification of buildings.

The area to be mapped is a square of approximately 33 miles, the east line being about five miles west of Sanderson, the west line at about Lemons Gap. The south line is about eight miles south of US 90 on the east line and the north line about 25 miles north of US 90.

The mapping in this area is under the direction of William V. Kennedy, District Engineer, and is being supervised by Kend. Cox, Project Supervisor. The electronic distance measurements are under Coyle Horton. Other permanent personnel of the Geological Survey employed on these projects are Leslie S. Porter, Thomas Stovall, William Rennels.

Topographic maps of the Geological Survey are published on sheets called quadrangles. Each quadrangle covers 7 1/2 minutes in latitude and 7 1/2 minutes in longitude or approximately 64 square miles in this area. The maps accurately show all roads and trails and their classification; all buildings and their use, such as barn, house, church or school. Streams are shown as being either intermittent or perennial. Also if available the names of all prominent features are given. This is in addition to the contour lines and elevations which portray the configuration of the land.

These maps have many uses. Some of these are planning industrial expansion; ground and water studies; location of new roads, pipe lines, powerlines; and irrigation and drainage ditches. They are used by military people; engineers; the census bureau; and the weather department. In some areas they are invaluable to hunters and fishermen.

The cooperation of local land owners and the general public will be appreciated by those who are working on the project.

Sanderson High School Band Earns Division I Rating at Odessa UIL Meet

A large crowd of parents and friends of the Sanderson High School Band were downtown Saturday night to greet the buses on their return from the University Interscholastic League contests in Odessa in

marching and twirling. The band had won a division I rating, the highest available, in a unanimous decision by the judges.

Other Class A schools to get a Division I rating were Roscoe and Seagraves.

Ratings of other Class A school bands were as follows: Iraan, Wink, Plains, Merkel, all were Division II; Van Horn, Rotan, Tahoka, Rankin were in Division III; and two North Texas schools each had a Division IV and V.

There were 73 members marching with the band conducted by Kirke McKenzie.

Banners had been strung across Oak Street welcoming the band, and banners and signs posted on the band hall hailing the success of the organization. After the arrival home of the band, they gave an impromptu concert for the pleasure of the local residents.

This is the first Division I rating in the history of the school, so far as is known. The Eagle Band has earned Division II rating several times in the past, but under the leadership of Mr. McKenzie, they have climbed from a Division III in three years, one step at a time, to the top-rated status. The band members have worked long and arduous hours in practicing for the contest this year and their efforts and their aspirations paid off with the top honors.

Concentration now is centered on the concert, solo, and ensemble contest which will be held after the first of the year. The band is hoping for a "sweepstakes" win with a Division I rating then also.

but one thing has stayed down - the cost per unit of electric service

You may find it hard to believe that anything is less expensive now than it used to be. But it's a fact that the average price per kilowatt-hour of residential electric service is lower today than ever before.

That's not to say that your monthly electric bills are smaller now. But if you're paying more per month for electricity, it's because you're using more of it to enjoy more electric comforts and conveniences.

Electric service is still the biggest value in your household budget.

THANKSGIVING

As we Americans sit down to our traditional turkey on this Thanksgiving Day in homes across the nation we have much for which to be thankful. True, there are many disquieting factors giving cause for grave concern, both on the domestic and international scenes, but if we look deep enough, we shall find unmistakable reasons for thanksgiving.

Consider the many liberties we enjoy in this nation and be thankful for their existence. Be thankful for our freedom to achieve, work and advance; for our freedom to worship; for our right to free speech and free elections.

While we are grateful for a special day when we can join with others all over the country in counting our blessings and thanking God for them, we are still challenged to make every day a Thanksgiving Day as we recall the blessings that ever surround us.

Truly there is much for which we can be thankful. And this overflowing of good should daily remind us to pray for peace throughout the world so that all mankind may live in harmony and enjoy the fruits of a better life.

America On Its Knees

We pray that You save us from ourselves.

The world that You have made for us to live in peace, we have made into an armed camp. We live in fear of war to come.

We are afraid of "terror that flies by night, and the arrow that flies by day, the pestilence that walks in darkness and the destruction that wastes at noon-day."

We have turned from You to go our selfish way. We have broken Your commandments and denied Your truth. We have left Your altars to serve the false gods of money and pleasure and power.

Forgive us and help us.

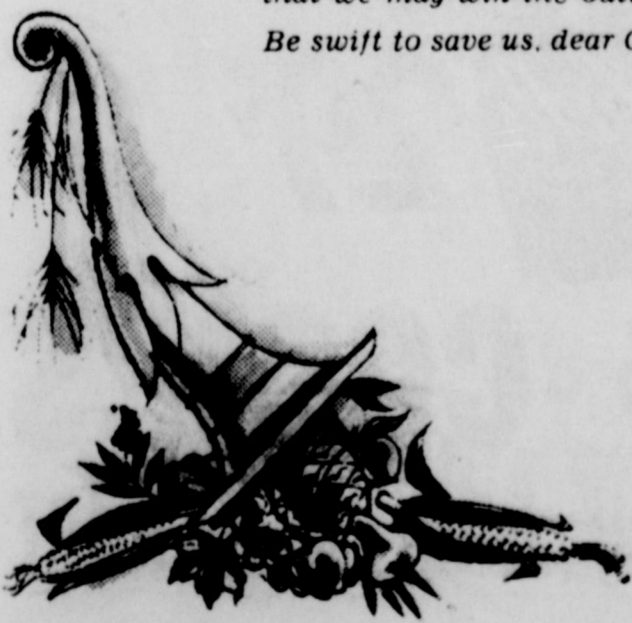

Now, darkness gathers around us and we are confused in all our counsels. Losing faith in You, we lose faith in ourselves.

Inspire us with wisdom, all of us, every color race and creed, to use our wealth, our strength, to help our brother, instead of destroying him.

Help us to do Your will as it is done in heaven and to be worthy of Your promise of peace on earth.

Fill us with new faith, new strength, and new courage, that we may win the battle for peace.

Be swift to save us, dear God, before the darkness falls.
