LISTEN TO LUKE

Albert:---

We are often asked to run an article and "be sure and put it on the front page". We honor this request when we can and with our license to continue to have the option of editing and placing according to space, all stories given to us. There are several reasons for this. One is that the front page is just so big and can contain only so much news. Then, too, all news must be fitted into a place where it will go. And, in our opinion, there is no page more important than the others. The front page never carries any advertising, but this is not unusual. There are few newspapers any more that do, and if any do, that doesn't mean that this one has to.

And to back up our contention of the lack of importance of one page over the other one, we are using our "old picture" this week on a page other than the front page. And, on top of all that, it is one of the most important pictures that we have used in a long time in that it is one of the oldest that we have had the privilege of using. The picture was taken prior to the construction of the first Methodist Church here which was in 1905 and prior to the existence of Sanderson Canyon riverbed as we know it now. We had the picture blown up larger than we normally would have done so that anyone may look for some of the old landmark buildings that existed at that time and still do.

To refresh the memory of some "newcomers", Sanderson's main street was the one parallel to the railroad and the business section was from the old Kerr Mercantile Co. building, which was originally Hancock's store and south of the present building, to about where the postoffice now is and all of the businesses were on the north side of the street.

We thought the picture very interesting and hope our readers will enjoy it. Mrs. C. C. Truesdale of Sun City, Calif., sent the picture to us.

We were reminded this week at the West Texas Boys' Ranch was still accepting stock donations from ranchmen and with the fall lamb shipments beginning there may be some who would have some contributions to make to the ranch. Contact Charles Steball if you do.

Another old memory was recalled to us during the past week concerning the use of choice words and phrases describing the potential or outcome of a football game. Words like "blast", "smother", "wallop", etc., come easy to the grid scribe in the writing, but some of these words get real big when they have to be eaten. The case in point was many years ago when certain choice words were used by a writer for our friends at The Fort Stockton Pioneer. The authors were a Class AA and choice team for the victory

A view of the addition to the seats and the new announcer's booth and photography platform is shown in the picture above. There were five tiers added to the seats on the north side of the football field with the booth on top. The top of the booth has a railing around it and will serve photographers at a vantage point for their work of filming the games.

SP Proposes Tri-Weekly Passenger Sleeper-Diner Train Instead of Daily

The Southern Pacific proposed last week to replace the current daily schedule of the Los Angeles-New Orleans Sunset passenger train with a tri-weekly schedule that would restore sleeping and dining car service.

Sleeping and dining cars were removed some years ago because of lack of sufficient daily patronage to sustain them.

The railroad said public officials along the route have been notified that the Interstate Commerce Commission has been asked to approve the change.

Southern Pacific officials expressed hope the tri-weekly schedule with the added services can save the Sunset which is currently losing about \$3-million a year.

The 2,030-mile Sunset Line is Southern Pacific's oldest interstate train.

Eagles Beat Menard in Scrimmage; Barbecue and Bucks Slated Friday

The Sanderson Eagles went to Ozona Friday of last week and met Menard for a scrimmage. The Eagle varsity scored three times to one for Menard but were short on first downs, making nine to 10 for the opponents.

Each team ran 40 plays, according to Athletic Director Willie Myers.

The B-team scored one time and blanked the opponents on defense while running only 15 plays.

Coach Myers stated that the team lacked pursuit on the defense yet, and their offense was lacking in some spark, both of which would be worked on by him and his coaching staff, Assistants Tommy Hall and "Bo" Nicholson, this week.

Friday afternoon the Eagles will meet a team from Alpine for a scrimmage on the home field. The varsity Buck team has scheduled a scrimmage in Pecos, but there will be a team here to give the Eagles a workout, according to Coach Myers.

The scrimmage will begin at 5:30, Myers stated.

The location is next to the fire house.

Linda Babb of Dallas visited friends here last week. She is a former resident.

A free barbecue will be served fans who attend the scrimmage Friday afternoon at Eagle Field. Donations will be received to help defray the cost of the film used during the season to film games for the benefit of the coaches and players.

Serving will begin at 6:30 and everyone is invited to be there and see the scrimmage and enjoy the barbecued goat, salad, beans, cake, and tea.

Ike Billings, president of the Eagle Booster Club, stated that they would accept any monetary donation offered to help pay for the film and welcomed the presence of all grid fans.

Dr. Clanton is urging parents of children and especially young girls to give their names so that the vaccine may be ordered and if there is a sufficient number the Department of Health will be contacted so that there can be an immunization clinic planned for the near future.

Robert Lee Terrell shows his 50-pound "birth certificate"—his mother's tombstone—to Eugene F. Cornelius, social security district manager at Macon, Georgia.

Man Proves His Age, 62, With 50-Pound Tombstone

One of the most important pieces of evidence you need when you apply for social security retirement benefits is proof of your age.

But would you believe a 50-pound tombstone? That's what Robert Lee Terrell, of Macon, Georgia, used to prove his age.

Mr. Terrell didn't have a birth certificate or any of the other usual records accepted as evidence of age. So when he was told he would need some proof of his age, he brought his mother's tombstone to the social security office.

The tombstone showed the year of his mother's death, proving that Mr. Terrell must have been at least 62 when he filed his claim.

When the people in the social security office asked Mr. Terrell why he didn't just bring a photograph of the tombstone, he replied: "I was going to get a picture, but the person who was going to take it was out of

town, so I just dug up the tombstone itself and brought it in."

Of course, most people who apply for retirement benefits or Medicare coverage don't have to resort to tombstones to prove their age.

The best proof is a birth certificate or baptismal record established before your 5th birthday, and this is what the social security office will ask you for first.

But if this type of evidence isn't available, social security can accept other records, such as school records, census records, family Bible records, insurance policies, marriage certificates, and voting records.

Don't delay filing your claim, though, because you don't have evidence of your age. The people in the social security office will be glad to help you obtain this proof when you come into the office to apply.

North Zone Dove Season Opens Sept. 1, Lasts Until Oct. 31

The Texas Parks and Wildlife Department is distributing the 1970 dove maps to help prospective hunters prepare for the season on white-winged and mourning doves starting in September.

The maps will be available the week from license deputies, department regional and field offices, or from de-

partment headquarters in Austin.

For regulatory purposes, the state again has been divided into a North Zone and a South Zone. The North Zone mourning dove season is Sept. 1 to Oct. 30. The South Zone mourning dove season is Sept. 26 to Nov. 24, except in those counties having a whitewing

season where it will be Sept. 5 and 6, Sept. 12 and 13, and Sept. 26 to Nov. 20.

Shooting hours in all counties will be from 12 noon to sunset.

The Department map clearly indicates by shading the South Texas counties which have a whitewing season this year, and it also shows the protected "buffer zone" for whitewings along the Rio Grande in Starr County and a portion of Hidalgo County.

Whitewings may be hunted in 21 counties only on Sept. 5-6 and 12-13.

Daily bag limit for both species is 10 birds, with a possession limit of 20. Bag limits of both white-winged and mourning doves may be taken in the counties having a whitewing season Sept. 5-6 and 12-13.

The map also reminds

sportsmen that no hunting is permitted in game refuges, state and federal parks, game reserves, within corporate city limits or from public roads or road rights of way.

The retention of one fully-feathered wing on dressed doves is required in those counties having a whitewing season when both mourning and white-winged doves may be taken. This requirement also applies when doves are imported from Mexico or any foreign country.

Shotguns must be plugged permanently to three-shell capacity and may not be larger than 10 gauge. Rifles are prohibited.

The closed area is south and west of a line extending along U.S. Highway 83 from the Starr-Zapata County line to Mission, and from Mission to the north city limits of Hidalgo via FM 1016 and FM 1926 during the concurrent white-winged and mourning dove season.

by MARY LEE

Most Americans agree that pollution is one of our most critical problems today. But few people seem to think there is anything they can do about it.

Actually we are all polluters. Every time we drive a car, flush wastes down a drain, or dispose of garbage and refuse, we are polluting the country.

Athelstan Spilhaus, dean of the Institute of Technology at the University of Minnesota, says, "Pollutants are the residues of the things we make use of and throw away... As the earth becomes more crowded, there is no away—one person's trash basket is another person's living space."

When we acknowledge that the struggle for a better environment takes place in the home as well as the lab, and in the marketplace as well as legislative chambers, we are on our way to helping solve the problem.

It may not seem so glamorous nor even so important to start in our own backyards, but one neat yard leads to yards of neatness. Efficient disposal of litter, trash and garbage has long-range implications.

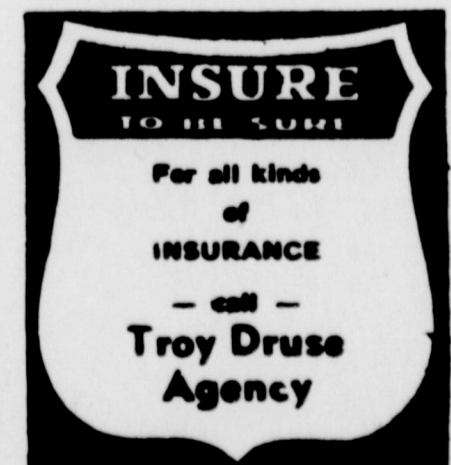

Once a group starts to clean up their own neighborhood, they invariably march on to bigger community problems. They demand better sanitation departments, urge ordinances to control air pollution, join watershed associations that span out across the county to work for better water and the prevention of soil erosion.

Anyone wanting to know more about the water shed associations can write for a free booklet to the National Association of Manufacturers, 277 Park Ave., N.Y., N.Y. 10017. Ask for "Our Native Land." The NAM also has a complete kit of material on "Save The Good Earth" for clubs that want to stage a program on the subject.

You shall love your neighbor as yourself.—(Matt. 22:39).

When we count our blessings, we find that we are better off than we thought we were. There is always someone we can help to a happier life, even though all we may give is a friendly smile, a cheerful greeting, or a kind act. Any good we give to others comes back to us, but it is up to us to start the ball rolling with our love and kindness.

CORRECTION
Last week we erroneously reported that Mrs. J. W. Happle's youngest sister had died. It should have been the husband of her youngest sister, Rudy Grossenbacher, of Waco. We are glad to make the correction.

when they came to Sanderson, according to the writer. The trouble was, he didn't know the Sanderson Eagles didn't know that and wound up humiliating the Panthers, the coaches, the scribe - who was also president of their "booster" club, and their boosters. The Panthers did not meet their other opponents the rest of the season, but they were not supposed to.
And wasn't "Life" magazine blamed for one of the few downfalls of the Texas Longhorns?
Football, being elliptical, might bounce in any direction.

A very special picture of Sanderson is printed this week and is a gift from Mrs. Carl C. Truesdale, whose family formerly lived here. The picture was made prior to 1904, the time of the building of the Methodist Church, just south of the white 2-story house at the right, where the J. M. Jones family now lives. The Terrell Hotel is pictured just left of center with three businesses to the west. Downie St. ends in the white-post enclosure in the center. The house just to the right of center and facing east, is about where Kerr's store now is, and just to the north the little white house is where the McClymont Building is, west of which is the Jim Kerr home. Another interesting fact of the picture is that Sanderson Canyon, in the immediate foreground left, was not a gravel-filled streambed.

Jack D. Shely, son of Mr. and Mrs. Jack Shely, is home on leave after completing his basic training at Fort Polk, La., and will return to that station for advanced training in mechanics.

Sul Ross Opens 10-Game Grid Schedule Sept. 19

ALPINE - The Sul Ross State University Lobos will open a 10-game football schedule September 19 against Eastern New Mexico University at 7:30 p.m. MDT in Portales, N.M.

According to Athletic Director and Head Football Coach Richard Harvey, this will be the Lobos only non-conference game this season.

The 1970 season will mark the first year that the Lone Star Conference will have all 10 teams competing for the conference crown. Tarleton State College of Stephenville and Angelo State University of San Angelo will be making their first run at the conference football title this year.

The Lobos home schedule opens September 26 against Tarleton. Other home games include Howard Payne, October 10; McMurry College, October 24; the homecoming game against East Texas State, November 7; and Southwest Texas State, November 14.

All home games, with the exception of the East Texas game, will begin at 7:30 p.m. The homecoming encounter is slated for a 2 p.m. start time.

In addition to the five home games, the Lobos will meet four conference foes on the road. They include Sam Houston State in Huntsville, October 3; Texas A&I at Kings-

ville, October 10; Stephen F. Austin in Nacogdoches, October 31; and the Lobos will close the season November 21 against Angelo State in San Angelo.

The 1970 season will also mark the first season for the Lobos with the new lighting facilities at the team's home stadium, Jackson Field.

The new lighting system is expected to offer about three times as much lighting as the old standards. University President Dr. Norman L. McNeil said the candle foot power under the old system measured 15 while the new lights were tested and showed a reading of 50.

Mr. and Mrs. J.L. Schwalbe and Mr. and Mrs. Leonard Barksdale of Del Rio were here Monday getting the Schwalbe's mobile home ready to move to Del Rio. Their small trailer was overturned on their butane tank at Del Rio during the high winds from Hurricane Celia and the trailer and most of its contents considered a total loss. Mrs. Schwalbe was in the trailer and received a burn on her arm and numerous bruises but crawled out a window to the safety of her car parked nearby.

SEVEN-FOOT FOOLER-Andy Marquez holds seven feet of king snake and 10 pounds of catfish which he bagged Saturday from the Rio Grande. Marquez, fishing with Salamon Riojas and Sergeants Brown and Bossie of Laughlin AFB spotted the snake slithering through the weeds and killed it thinking it was a rattler. The reptile turned out to be one of the numerous brightly marked colubrid snakes (genus Lampropeltis) of the southern and central U.S., that eat rodents, quail eggs, etc., and generally scare the hide off most people who visualize them as rattlesnakes. AN OPEN LETTER TO SANDERSON

It has been our pleasure during the past two weeks to meet and become better acquainted with many of you. And we wish to express our thanks for the friendliness you have shown us, and the welcome and the hospitality you have given Mr. and Mrs. Bryan O'Bannion who have moved to Sanderson to manage the drug store for us.

It is our aim and desire to give you the best prescription service possible under the present circumstances. To accomplish this one of us will be in Sanderson each afternoon except Wednesday from 3:00 until the drug store closes.

In order to cut down your waiting time for having your prescriptions filled or refilled we would appreciate you bringing them in or picking them up in the afternoon while we are there. If this is not convenient, please call your prescription number in a day or so before you run out of your medication and then pick them up at your convenience.

To insure prescription prices that are comparable to those in Fort Stockton and the surrounding area towns, becoming effective immediately, will be the same prescription pricing system our store uses in Fort Stockton. This is called the Fee System, meaning that your total prescription price is determined by adding the wholesale cost of your medication and a professional fee for filling your prescription. Prescription price = cost + professional fee.

We will be happy to discuss this system with you and explain it further if you desire.

Becoming effective Sept. 7, the drug store will have new hours - from 8:30 a. m. to 6:30 p. m. Monday through Saturday. The drug store will be closed Sunday.

Friday and Saturday there will be a table of 1/2-priced merchandise.

We invite you to come in and visit with us and become better acquainted.
