## LISTEN TO LUKE

By Albert:---  
Sometimes we get nothing but good news, and sometimes it's not quite that way!

We got a letter Monday from the Permian Basin Regional Planning Commission with lots of enclosed data about projected population figures.

In part the letter says: "I believe you will agree that the figures are inaccurate and that we should do everything possible to see that the figures are corrected. These projections are most important in that they are used by all State and Federal agencies in determining program needs for each region in Texas. The Research Center (who prepared the figures) has asked that we review these figures and relate them our opinions and comments."

And a later paragraph in the letter states: "I urge you to study the projections and prepare documented evidence that will be acceptable to the University of Texas Research Center and to attend the meeting to help prepare our case."

The information sheet shows the projected population for 17 counties, 9 of which show proposed decreases. The population projection for Terrell County goes to 629 in 2000, and 255 in 2020.

What all the above is about, for the purpose of writing this, if you have available documented evidence that will be acceptable to the University of Texas Research Center and can produce this, it would be appreciated.

How the UTRC is able to project these figures is unknown, but they state that it takes documented evidence to refute it.

Seems like that's one-sided! At least that's the way we look at it!

And another thing that happened that was not good news, was what we heard on the tube about some people not being able to handle the truth, and what we see and hear from some closer parts of life. The idea is conveyed very realistically that most people are too immature or too ignorant to be able to hear the truth about something!

We just wonder about the intelligence and maturity of the person who would say that!

It seems to us to be more of a curtain behind which a person may hide while he does something that he is not quite proud of in the first place!

The origin (most recent) was the secrecy about the bombing in Cambodia.

And there are closer-to-home decisions, policies, and rulings that some feel are acceptable because they are not generally known.

We do not feel that this is a logical response to logical activity. If the people cannot handle a ruling or decision as acceptable, we would rather feel that it was the ruling or decision that was at fault rather than the emotional or educational potential of people.

After all, wasn't it people who made the decision or ruling?

The girls who will be leading the cheering section for the athletic endeavors of the Sanderson High School this year are shown in the picture above. From left to right on the front are Sandra Villarreal, Lali Luevano, Elaine Brown; standing are Janet Harrell and Peggy Louwien, who is the head cheer leader, and they are holding Yolanda Rodriguez.

## Ruling Expected In Man's Death

A ruling is expected within the week on the death of Roy Starwood, 45, of Los Angeles, Calif., who was found in a wrecked station wagon east of Dryden August 20.

Texas Highway Patrolman Tommy Lowrance stated Monday of this week that it had been learned that the man was charged with a felony in Los Angeles and was to have been in court the day he was found.

Starwood had a severe head wound when he was found, according to Lowrance, and in an effort to determine what he had hit his head on, the pistol with a spent cartridge under the hammer was found. In a Fort Stockton hospital, doctors determined that the head wound was caused by a bullet which entered on the right side of the head above the ear and exited below the left ear, according to Lowrance.

The wrecked station wagon was found about 8:00 a.m. on Monday, August 20, four miles east of Dryden in the pasture off US 90. The vehicle was going west on US 90 and left the road at a high rate of speed, going through the fence and skidding 370 feet into the pasture before turning over.

Starwood was taken from Fort Stockton to Odessa and died on Monday afternoon in the hospital there as a result of the bullet wound, according to reports.

## Post Office Plans Food Stamp Issue

The first Post Office issuance of Food Stamps under the new state-wide Food Stamp Program will take place at 10:00 a.m. September 4, in the Sanderson Post Office, according to Postmaster J.R. Hodgkins, and Carrol D. Crum, regional administrator of the Texas Department of Public Welfare.

Terrell County currently has a Food Stamp Program, but it will be replaced with the new state-wide plan which has installed this new issuance system. Certified households will be able to go to the Post Office at their convenience and buy their allotment of Food Stamps. They can buy their stamps between the hours of 10:00 a.m. and 3:00 p.m., on Monday through Friday, except on Federal holidays.

Pilot projects in three Texas counties have shown that Post Office issuance is a faster and better way for certified households to get their Food Stamps.

Eligibility is determined by size of household, total net income, resources, and other considerations. Persons who are unemployed, work part-time, or receive small pension checks should contact the

Food Stamp Office at 1303 Dickenson Blvd., P.O. Box 550, Fort Stockton, Tx. 79735. People who are not employed must register for and accept work.

Food Stamps increase the food purchasing power of low-income households and make it possible for them to eat more and better foods.

The new state-wide Food Stamp Program is administered by the Texas Department of Public Welfare and is financed by the State of Texas. The Food Stamps are provided by the United States Department of Agriculture.

**Thoughts**  
From The Living Bible

Seven weeks had gone by since Jesus' death and resurrection, and the Day of Pentecost had now arrived. As the believers met together that day, suddenly there was a sound like the roaring of a mighty wind storm in the skies above them and it filled the house where they were meeting. Then, what looked like flames or tongues of fire appeared and settled on their heads. And everyone present began speaking in languages they didn't know, for the Holy Spirit gave them this ability.

## Accomplishments Of Ranchmen Noted by SCS

By Jerry Wenmohs

Ranchmen in the Rio Grande-Pecos River Soil and Water Conservation District deferred from grazing over 16,736 acres and properly grazed more than 101,054 acres of native grassland during the year ending June 30, 1973.

What does this mean to the residents of the district? This means that we have protected the land from wind and water erosion, bound the soil with fibrous roots, stabilized water yields from watersheds and converted water to economic plant growth, provided forage to feed our livestock, game animals as well as ourselves, beautified our homesteads, parks, recreation areas, and the countryside; and finally, contributed immeasurably to our enjoyment and existence.

In addition to deferred grazing and proper grazing use, cooperators in the district also constructed 11,135 feet of fences, 13,361 feet of livestock water pipelines, and aerial sprayed over 3,000 acres of mesquite to assist in better management of rangeland and allow fast recovery of native grasses.

Systematic grazing systems are being carried out on over 70,000 acres while 75,407 acres of wildlife habitat management was applied during the past year.

In all, 155 contacts were made involving soil and water conservation work in the district during the 1973 fiscal year. During the coming year emphasis will be placed on obtaining proper grazing use, deferred grazing, and developing planned grazing systems in order to improve our environment and provide a better place to live.
