## LISTEN TO LUKE

By Albert:  
For about 11 days now 18-year-olds have been officially and legally adults. And frankly, we don't think there is much difference in the individual activities of the young adults here. Probably those in that age group looked forward eagerly to some of the advantages (?) of adulthood, but probably very few of them looked forward to all the responsibilities of being "grown". There was a time when young people that age had some kind of a cushion for some things because they were not adults, but no longer.

This "maturity" that was granted by law, if there are distinct advantages, carries with them the obligations that are also the responsibilities of all other mature persons, and they, too, will soon learn, if they haven't already, that there is no privilege that does not have obligations. And what person that has been "grown" for several years would not attest to the fact that "coming of age" is not some kind of Utopian existence.

The Texas Constitutional Revision Commission is making some important decisions - some we would agree with, and some we would not! But this is only normal.

There are those whose opinions we respect and who are in a position to know more about it than we do, who say that the Constitutional needs revising, so we will go along with that.

What we think is ridiculous, is that the planners have voted to spend \$33,938.00 on new chairs and desks to place in the House of Representatives during the convention. Chairs, costing \$165.00 A PIECE, will be replicas of those used by the delegates to the 1876 constitutional convention. The desks, considerably more economical, will be made by state prison system inmates at a cost of \$22.50 each, which is not part of the gripe, unless there is some kind of servitude involved!

And there will be 181 legislators who will be delegates to the convention and sit in the \$165.00 chairs.

This is another of their possible efforts to save the state money - besides the possible asking for an increase to something near \$15,000.00 per year salary.

Isn't this quite expensive traditional fol-der-ol? Or are we the only ones who look at it that way?

---  
Somewhere down the line there is going to have to be someone who takes the bull by the horns and does something to the tax rolls, if what we continue to hear from time to time is true.

What we hear is that there are some ranch land sales from time to time at a price-per-acre figure that is a much larger figure than what we have heard is the valuation on the tax rolls. And we have also heard from some people who are close to the valuations,

Mrs. W.W. Sudduth is pictured above with a German cantaloupe which she raised. Several of the melons weighed in the 8-pound range, as did the one pictured which she presented to The Times. She stated that the melon seed were given to her by a nephew and they were two years old before she planted them -- and that this was not part of the plan, nor did it account for the size of the melons. The melons are a little more firm than conventional cantaloupe and do not have as strong a taste, but are very sweet and delicious.

## Youth Held on Burglary Charge

Terrell County Sheriff Dalton Hogg told The Times on Tuesday that a 17-year-old youth is being held in the jail in lieu of \$2,500.00 bond. He was arrested recently and charged with burglary of the residence of Bob Siemer during the time that Siemer was on vacation.

The youth, according to Sheriff Hogg, is the same one who was caught taking ladies' lingerie and who was suspected of other similar incidents when no one was caught.

Sheriff Hogg also stated that a young adult male was apprehended Saturday near Dryden following the taking of money from Henry Thompson, who operates a small cafe there. The suspect had hidden out in a pasture near Dryden and was apprehended about two hours after the incident was reported, Hogg stated. He added that the youth was also wanted for violation of his parole.

## Gulf Oil Co. Reports Producer

Gulf Oil Corp. reported a dual potential from the detrital for its No. 1 Annie Garner, scheduled 5/8 mile northwest outpost to the Allison (detrital gas) field of Terrell County, six miles south of Sheffield.

It was finaled from the upper detrital for a calculated, absolute open flow of 2 million cubic feet of gas per day through perforations at 8,759-776 feet, which had been acidized with 2,000 gallons.

It was finaled from the lower detrital for a calculated, absolute open flow of 4.4 million cubic feet of gas per day through perforations at 8,855-878 feet, which had been acidized with 3,000 gallons.

It was drilled to 9,822 feet on a rescheduled 11,500-foot contract, with 7-inch casing set at that depth, and plugged back to 9,775 feet.

Location is 660 feet from the south and 2,110 feet from the west lines of 16-B21CCSD&RG-NG.

The discovery, Seco Production Co., Midland, No. 1 Allison, was finaled April 25 for a calculated, absolute open flow of 14 million cubic feet of gas per day, with gas-liquid ratio of 24,507-1, through perforations at 9,172-206 feet. The firm reported dual potential as an upper Pennsylvania gas strike of 1.34 million cubic feet of gas daily through perforations at 9,054-060 feet; however, it was never officially filed with the Railroad Commission.

## MRS. HIGGINS' SISTER DIES

Mrs. Clyde Higgins received word Friday morning of the death of her sister, Mrs. W.W. Philly, who was making her home with a daughter in Fort Worth. She would have been 90 years old next week. Mrs. L.G. Hinkle took her mother, Mrs. Higgins, to Fort Worth for the graveside service Monday afternoon and then to Bowie where Mrs. Philly was interred beside her late husband.

## Eagles Will Play Imperial There In Opener Friday

The Sanderson Eagles were in Alpine Thursday afternoon of last week for a scrimmage with the Alpine junior varsity, and under game-type conditions the Eagles came out on top, winning by two scores to one, according to Coach Willie Myers. He stated that the Eagles showed marked improvement over the previous week's scrimmage in Fort Stockton against Van Horn and that he was well pleased with the performance of the team as individuals and as a team.

The Eagles will open their season's play Friday night in Imperial. Coach Myers stated that the Longhorns were about the same size as the Eagles; they had lost most of their linemen last year and retained their backfield, and he stated that the Eagles had a new backfield, but had many returning linemen. He predicted a good game for the fans.

Game time is at 8:00 p.m. Friday in Imperial.

## Good Rains Fall Over County Friday

About one and a half inches of rainfall was the general report from most parts of the county last Saturday after some precipitation fell Friday and more during the night. The rainfall was the most general that has been received since early spring, according to the reports of many.

In some parts of the county there was no rainfall late Friday, but there were still reports of good rain during the night to bring their total up to near the inch-and-a-half mark.

Lightest rains were reported in the Dryden area, where under half-inch of moisture was reported.

There was very little run-off locally and the canyon did not run.

## Ruling Given In Shooting Death

Terrell County Sheriff Dalton Hogg reported last week that he had received a ruling of death from self-inflicted gunshot wound from authorities in Odessa, where Roy St. Wood died August 20.

The man was taken there after he was found in a wrecked station wagon and later discovered to have a bullet wound in the head.

Brad Harrison has returned to Texas A&M University for his junior year. He is a member of the Aggie band and left early to begin practice.

The date of the picture below would be after 1932, and we would guess about 1938, with the caption in the lower left telling part of the story. The first building at the left is the Princess Theatre, then Haley Drug Store, Blackwelder's Shoe Repair, Sanderson Mercantile. Across the street west: Kerr Mercantile, Ferguson Motor Co., etc. Notice the gasoline pump on the corner. Mrs. E.F. Pierson loaned us the picture. Incidentally, the postcard was mailed from Sanderson August 27, 1942, and there was a 1¢ stamp on the back side.

that some of the figures that we have heard that the land sold for was "give-away" prices. In other words, it sold too cheaply - even at the reported price!

Now, immediately, we are in the area of opinions! There are those who professionally claim to be experts in these fields, and there is disagreement even among the "professional experts". So your opinion, like mine, depends on how you look at it, and that is the same basis that is used by the experts!

There are many items on the tax rolls of the county that have a valuation that matches or comes close to the actual market value of the property, and this fact causes one to wonder if it would not be right to have some of the many thousands of acres of ranch land that have sold recently on the tax rolls at a figure that compares with the fair market value of other property. While you and I might disagree on what the "fair market value" of certain things is, there are at least two people who agreed on the "fair market value" of the ranch land that was purchased -- and that was the buyer and the seller. And it would seem rather odd to us that the buyer would try to contradict "the fair market value" figure if it were the same figure that was the purchase price, whatever that figure was!

But this, too, depends on how you look at it, I guess!

Provide your youngsters with well lighted study areas. Their progress in school and their attitude toward study depend on it. You can help prevent eyestrain and encourage learning by following these simple rules. Have a table lamp that is tall enough and equipped with a shade wide enough to spread light evenly over the entire work area. The lamp should have a 150 watt bulb and a diffusing bowl to soften the light and prevent glare. Have additional lighting in the room to prevent eye-tiring contrasts of brightness and shadows.
