WOODWORK LOCAL BOY

RECEIVES AWARD

BY DALTON

HAVE YOU visited your local major mechanic lately? Chances are that you have, or that someone in your family has been to the dentist, because all of us have to make that unpleasant journey sooner or later. Now before I get jumped on by dentists or their friends, I hasten to say that dentists nowadays use modern techniques, perform a very vital and necessary service, and forestall many painful and embarrassing problems related to our big mouths. I have several good friends who are dentists. They are nice fellows. They do their job as well as one could expect. But it still hurts, like the dickens.

The Texas State Dept. of Health released this week a list of questions about teeth designed to show the average person that he doesn't know much about the subject. Well, most of us would admit that freely. All we know about teeth is that they ought to use dental floss regularly.

Dental floss is a kind of super-thread that slips between your teeth (even when they look like do) and gets that awful stuff that causes them to rot out. Dental floss is very sharp, and if you aren't careful, you'll saw a hole in your gums.

Among things that are bad for your teeth are eating candy, chewing gum and making smart-alecky remarks.

UP AT Texas Tech, there's a nose group called the Institute for Mass Communications Research which operates sort of like a West Texas version of the Gallup Poll, coming up with some rather interesting opinions from people of this particular area.

(For some reason I'm reminded of an old Fred MacMurray movie in which he said he represented "the Trotter Poll—like the Gallup Poll, only we're not in such a hurry...")

Recent surveys conducted by the Tech group indicates that folks around these parts don't like taxes and don't trust newspapers. Nobody wants more taxes, so that result was hardly surprising. But to find that more people consider newspaper coverage of local events more biased than the same coverage from radio and television is a mighty blow to our ego.

"Local electronic media is trusted more often than the networks," said the report, noting that those interviewed don't believe everything they hear and see, but given a choice, they are most likely to put their faith in what they hear the hometown television newscasters say. "They have only slightly less respect for the local radio newsmen, and they are wary of the print media."

Local television news was rated by 57.4 per cent as fair as opposed to network television news, rated fair by 44.8 per cent. Radio scored 56.8 and 53.6 for network news.

Local newspaper coverage was

Junior ROTC Cadets Aid Community

STORY TIME: Leavenworth, Kans. high school Junior Army ROTC Cadet Captain Michael Junk reads to children at Neighborhood House--a recreational center.

LEAVENWORTH, Kans.—The 400 cadets of the high school Army Junior ROTC unit here are taught good citizenship—and their record shows they learn their lessons well.

The youngsters spend much of their free time on a volunteer basis, to improve the quality of life in their hometown. Most weekends find them at work on one of a variety of projects designed to better Leavenworth's appearance or to assist some of its less fortunate citizens.

They become involved in cleanups—removing litter from the shoulders of city highways and thoroughfares and carting it to the local dump. They pick up trash at Neighborhood House buildings—recreational centers for low-income residents. They apply coats of paint to interiors and exteriors of non-profit institutions.

And they spend time with the less fortunate in the community. They read to disadvantaged pre-schoolers to prepare them for the time their education begins. They visit the lonely elderly confined to the Convalescent Infirmary, boosting morale with a game of checkers, a jigsaw puzzle or some friendly conversation. On Sundays, they assist veterans confined to wheelchairs to chapel services at the VA Center.

Last year, they spent more than 6,000 volunteer hours on such projects. And it appears they'll top that mark this year. It's the kind of work that's satisfying—to the givers as well as the receivers.
