FIFTY FIRST YEAR NUMBER 15

SUDAN, LAMB COUNTY, TEXAS

THURSDAY, MAY 29, 1975

10 CENTS PER COPY

MONDAY is another one of those traditional holidays all fussed up for improved, depending upon one's point of view by Congress and the Monday holiday bill. The traditional May 30 Memorial Day has been changed to the nearest Monday, so this year most folks will observe Memorial Day on May 28.

It's supposed to be a day for paying tribute to those who have died in service of our country, and many will do just that. But we expect most people in the nation will have little or no thought about the ones who died fighting for the nation, but will instead just welcome the time off from their jobs.

The same is true of the Fourth of July. Just about everybody takes off on the Fourth and enjoys some kind of holiday, but most pay little attention to the real idea behind the celebration. But everyone agrees it's nice to get off for an extra day.

Incidentally, Monday isn't always the best day to be off for everyone. At this newspaper, we're going to work next Monday and take off Friday, the real Memorial Day. For us, with the heaviest load of work to be done in the early part of the week, this makes more sense.

WE REALLY don't know if Ben Franklin ever wrote such as the following, but it is attributed to him:

Luke, on his dying Bed, embraced his Wife, And beg'd one Favour: Swear, my dearest Life,

Swear, if you love me, never more to wed, Nor take a second Husband to your Bed.

Anne dropt a Tear. You know, my dear, says she,

Your least Desires have still been Laws to me;

But from this Oath, I beg you'd me excuse; For I'm already promised to John Hughes.

AGRICULTURE CENSUS FORMS RETURNED

Sixty-two percent of the report forms mailed to Texas residents in the 1975 Census of Agriculture have been returned so far, the Bureau of the Census says. Bureau officials, trying to complete the gathering of census data, are mailing follow-up appeal to persons who received the forms but have not returned them. In January, 323,706 forms were sent to persons in Texas associated with farming.

Some forms may have been mailed to persons who no longer are farming or who are not actively farming such as landlords and others. These people are urged along with farmers to return the forms so that the Census Bureau can correct its mailing list. The addressee can indicate on the form that he does not have any agricultural production operations.

John W. Scott, Master of the National Grange, has this to say about the census: "The National Grange is concerned about the needs of our rural people. The

1974 Census of Agriculture is designed to provide much of the information we need. And we are impressed and pleased with the steps taken in the Census Bureau to insure complete confidentiality for each respondent's report. It is reassuring to know that the individual operator's report will, by law, be used only to provide totals for each county and State."

Carl T. Curtis, Ranking Minority Member of the Senate Committee on Agriculture, says: "When our committee works on legislation, we look to the agriculture census for basic truths. It is vitally important for every farmer to report so the census figures can show the correct picture of American agriculture."

And Kenneth D. Naden, President of the National Council of Farmer Cooperatives, states: "Farmer cooperatives have a major stake in the census of agriculture. Each of the Nations nearly 7,800 farmer-owned and farmer-controlled cooperatives is a user of data collected through census channels. From planning for farm supply inputs to evaluating county and State cropping trends, cooperatives depend on the 5-year censuses of agriculture."

Parents today are asking about nutritional labeling of prepared baby foods.

I am pleased to tell you Gerber has adopted the nutritional labeling program developed by the Food and Drug Administration for most of its food products.

Listed first are the size of each serving plus the total number of baby-size servings in each jar. This is followed by the number of calories, along with the weight in grams of protein, carbohydrate and fat per serving.

The nutritive value of a product is expressed as a percent of the U.S. Recommended Daily Allowance (U.S. RDA). Add the percentages for each nutrient your baby eats in a day. If the daily total approaches 100%, then you are assured that your child is getting an ample supply of that nutrient.

CANCER Answerline
American Cancer Society

A reader explains: "In 1969 I was treated for cancer and I've been fine since. Why don't people realize that cancer has a hopeful side?"

ANSWERline: Congratulations for being one of the 1.5 million Americans alive today who are cured of cancer. Often fears and ignorance are behind the gloomy reaction you mention. The truth of the matter is that many cancers are curable if treated early. This year 222,000 people in this country will be saved from cancer death, but 111,000 more might be saved by earlier and better treatment.

doesn't it matter at her age?"

ANSWERline: Cancer of the breast is rare among young women although it does occur. It is important for your daughter to make regular breast self-examination a habit while she is young so that she will do it automatically in the years ahead when her risk of breast cancer will increase. Your local American Cancer Society office has a leaflet of instructions and you could be wise to see that she reads it. And it's important for you to examine your own breasts as well and set a good example.

A busy mother writes: "I seem to have difficulty in swallowing and I'm hoarse all the time, even though I don't have a cold. It's probably just my cigarettes. Should I be concerned?"

ANSWERline: The symptoms you mention could point to more than just cigarettes and you should definitely see your physician right away. He will check your throat and might want to do further tests. Let him make a diagnosis soon. Your smoking might have serious consequences but if something is the matter you will have been lucky to catch it early.

A woman writes: "I must be awfully thinking but does cancer ever just disappear?"

ANSWERline: Medical records occasionally include a case where cancer disappeared. But this is extremely rare and remains unexplained. Cancer must be diagnosed and properly treated if as quickly as possible. Don't ever wait for a "wonderful thinking" could lead to a disaster.

A reader writes: "Should my daughter, a teenager, learn breast self-examination or at the same period of time?"

ANSWERline: Avoid over-exposure to the sun. The ACS estimates that 95% of skin cancer could be cured if seen when it does not heal. Are promptly reported to a physician.

HOW'S The Electric Company DOING?

Let's ask Bert Ballengee — Reddy's financial man.

"It takes money to build for the future so that you'll have a dependable supply of electric power. We'll need \$345 million over the next five years. Of this amount, we'll have to borrow \$200 million. And, at today's interest rates, it's easy to see why electricity may cost more. But, it's all part of creating the good electric service you've come to expect from The Electric Company."

Bert regularly visits the financial centers of the nation keeping in touch with the financial market and arranging for the millions of dollars it takes to assure your electric future.

The Bible Says

By Art Lynch

A miracle is a miracle! We have been discussing the characteristics and purpose of miracles. (See Sudan Beacon News for April 29, May 6 and 13) Miracles were to **CONFIRM** the revelation of God, Hebrews 2:3-4; to **CONFIRM** the Messianic of Jesus, John 20:31; and to **CONFIRM** the preaching of the apostles, Mark 16:19-20. The faith was confirmed and delivered "once for all" we learn in Jude 3. Any change in the once delivered word is to be cursed, Galatians 1:6-8. In 2 Timothy 3:16-17, we read that, "Every scripture inspired of God is also profitable for TEACHING, for REPROOF, for CORRECTION, for INSTRUCTION which is in righteousness; that the man of God may be COMPLETE, furnished completely unto every good work." The WORD OF GOD is sufficient for all things to men. Many say today, "I don't care what the Bible says, I just know what I believe." This, of course, undermines everything Jesus did at Calvary. If what we believe does not agree with what the "once for all" delivered and confirmed by signs and wonders WORD OF GOD says, it is not God's will, but our own. Jesus said, THE WORD OF GOD is truth, John 17:17. Jesus said the WORD OF GOD will judge us. In 2 Thessalonians 2:10-11 we read, "...because they received not the love of the truth, that they might be saved. And for this cause, GOD SENDETH THEM a working of error, that they should BELIEVE A LIE..." We need to check everything we have come to believe down through the years by God's divine word. The characteristics of miracles have not changed, according to the WORD OF GOD. Let's say for example that I could

BASIC CAMP EXCEEDS GOAL

FT. MONROE, Va.—Brigadier General Wilfrid K. G. Smith, Deputy Chief of Staff for ROTC, announced today "that because of the overwhelming response to the Army ROTC two-year program on college campuses across the country, the goal of 2,500 applicants has already been surpassed."

More than 2,600 college students will attend one of three sessions of Army ROTC Basic Camp at Fort Knox, Ky., this summer. The first group will begin training on 30 May, the second on 20 June and the last contingent will begin on 18 July.

The two-year program is basically designed for junior, community and four-year college sophomores who did not or were unable to take Army ROTC during their first two years of college. Successful completion of the six-week Basic Camp qualifies a student for entry into the Advanced Course taken during the last two years of college.

General Smith said, "The maximum capacity for bil-

leting is the controlling factor for this year's camp." Facilities are planned to accommodate 2,400 men and 200 women.

This heartening response to Army ROTC by college students, General Smith said "was due to the efforts of the Professors of Military Science and community leaders, and a better understanding of the role of the military by today's college students."

After graduation from college, the cadets receive commissions as Second Lieutenants in the Army, Army Reserve or National Guard. Approximately 75 per cent of the Army's new Second Lieutenants come from ROTC.

Army ROTC is offered at 823 colleges and universities of which 291 are host institutions. The remaining 532 colleges and universities have cross-enrollment agreements whereby their students may take ROTC training at an adjacent university hosting an ROTC unit.

The Land of the Free didn't come cheap.

Even before we had a formal constitution, investors were asked to buy over \$27,000,000 in securities to provide the arms we needed. And to provide the money to rebuild. That was just the beginning. Through war and peace, the good years and the bad, Americans have always given freely. Millions invested their money. Many invested their lives. We've never stopped fighting for freedom. For the American way of life. Today, over 9 1/2 million Americans buy U.S. Savings Bonds through the Payroll Savings Plan. Maybe you should consider your interest and take stock in America. It isn't cheap, but there's never been a better deal.

SOUD SERVICE
The Available Help
"Most victims of impaired hearing — one of the widespread handicapping afflictions — are needlessly going through life without obtaining the available help that could alleviate their problems," according to officials of the Bellcore Council for Hearing Conservation.
The crusade, sponsored by Chicago-based Bellcore Electronics Corporation, would center in hearing aids and electronic hearing test instruments, is designed to build public awareness of hearing loss and what can be done to alleviate the problem.
"Today, most hearing loss victims could find help through surgery, medical treatment or the use of a properly fitted hearing aid. Yet, because of a reluctance to admit they have impaired hearing — or because hearing losses often go unrecognized until they have become acute — most hard-of-hearing persons have not obtained help," the crusade officials stress.
