South Plains residents to transplanting and seeding, Mrs. Howard now has an abundance of bluebonnets in her back yard and some in her front yard. A number of persons have received both plants for transplanting and seeds from Mrs. Howard, but "only a few got any to live."

## Junior High Band Festival May 11-12

Thirty-two area bands are expected in Floydada May 11-12 for a junior high band festival. Floydada High School will be the site. The festival is to begin Friday, May 11, from 4 until 8 p.m. and will continue the next day from 8 a.m. until 5 p.m. A concession stand will be operated in the high school cafeteria.

## Monday Final Day

J.C. Wester will clean out his desk Monday! He is retiring April 30 as city judge.

## J. C. Wester Retiring From City Judge Post

The 83-year-old Wester has served as Floydada city judge since April 1969. The city council will name his successor. "I hope to do some fishing and visiting," Wester relates. An East Texas native, he would like to spend some time in that region, although he and Mrs. Wester will continue to make their home in Floydada.

# TCJS Head Approves Draft On Jail Change

Robert O. Viterna, acting executive director of the Texas Commission on Jail Standards, has approved "with a few minor changes" an alternate plan for remodeling the Floyd County Jail. County Judge Choise Smith and Marvin Stiles, a Lubbock architect who has been working with Floyd officials on the jail project, flew Wednesday to Austin to confer with Viterna. Judge Smith also visited with Bob Flowers, head of the Criminal Justice Department, and Ned Miller, who is in charge of the jail portion of the CJD. The Floyd County judge talked with the pair about grant possibilities.

## \$2,195.93 Sent To Tornado Victims

Floyd County residents collected a total of \$2,195.93 in cash for tornado victims in Vernon. Randy Hardin said the funds were forwarded Thursday morning to Vernon.

Stiles was asked to compile a rough draft of the alternate plan, estimated to cost approximately \$183,679 without architect fees. This draft was what Judge Smith and Stiles carried to Austin to show Viterna. The latest proposal calls for renovation of the present jail, with no addition being construction.

## Blood Drive Set Tuesday

Tuesday is the day! Be a blood donor. Caprock hospital used 155 pints of blood in 1978 and the demand increases each year. "Let's be prepared for any emergency which may arise in Floydada," sponsors of the project state.

## Monday Final Day

# J. C. Wester Retiring From City Judge Post

Wester served as superintendent of the Floydada school system. He operated the bakery for a number of years and later was in the grocery business. A son, Ed Wester, became a partner in the food store after being discharged from the Marine Corps. Ed Wester now is the Floydada postmaster. Two other sons are dentists: Dr. Bill G. Wester of Weatherford and Dr. James D. Wester of Garland. J.C. Wester's only daughter is Mrs. Watson (Jean) Jones of Floydada. "It's been very pleasant down here," he says referring to his duties at city hall. He notes that he has enjoyed the association with city personnel. He has seen a number of city employees come and go during his 10-year tenure as city judge. City Manager Bill Feuerbacher, City Secretary Jimmie Lou Stewart, and "some other department heads" were in their present positions when he became judge.

## RESIDENT SINCE 1919

Judge Wester came to Floydada in 1919 as high school principal and coach. For these and other services he received \$125 monthly. Wester Field, home of the Whirlwind footballers, is named after him. He was responsible for the local school system's mascot name, "Whirlwinds."

## NEVER TASTED COFFEE

Asked the obvious question as to what he attributes his longevity, the 97-year-old answered: "I never smoked cigarettes or cigars, I never chewed tobacco, and I never tasted coffee...I just don't know if that had anything to do with it."

## CHANGES IN FLOYDADA

Sitting in the house "I had built in 1918" at 308 West California, the alert Warnie Hilton discusses the changes he has seen in Floydada since coming here in January 1915. "This fellow had a little two-chair shop which had two lemon boxes with a boxing plank. Two borrowed looking glasses on the wall and a coal oil stove for heating water," Hilton says in describing the Floydada barber shop he purchased from Shorty Lauderdale and moved his family to this infant West

## Hand Made Boots

He says a friend in New Mexico, "an old bachelor," hand made his boots. "I guess that's why it never bothered me to stand on my feet (while working many hours)."

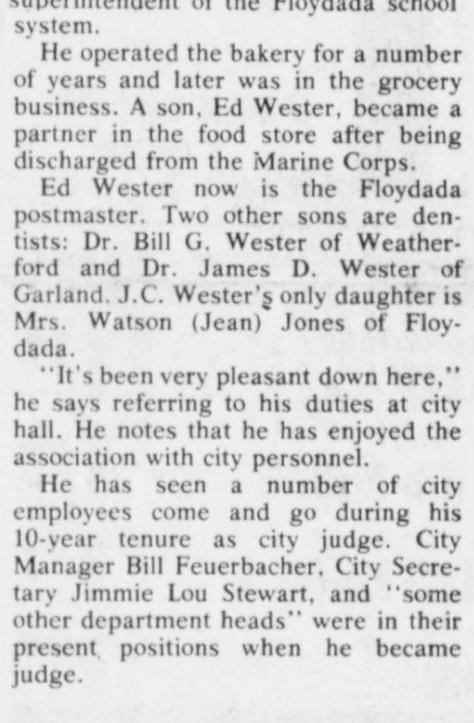

## HELPED WITH PROJECTS.

He was a part of these projects because of his love for his community. Hilton neither played baseball nor rodeoed. "There weren't any organizations in town I know of then," Hilton relates. "The town sure has changed," the small framed Hilton says in reminiscing. Have the changes been for the better or worse? "Oh, I think it's better...of course, everything's higher. Floydada is a good place to live."

## ONE OF THE MAJOR CHANGES

One of the major changes has been in the mode of farming. "Every farmer had his own cows, chickens and hogs." Gardens also prevailed. That also held true for city dwellers. "I always raised a garden and had

CITY JUDGE J. C. Wester . . . Monday final day

# Warnie Was Oldest Barber Around

Chances are good that anyone who grew up in Floydada received his first haircut from W.H. (Warnie) Hilton!

"Warnie," as he is known to most Floyd County residents, barbered 56 years in Floydada before retiring. To most, he was a friend as well as a barber.

Hilton can name many families that he rendered the initial haircut to two and three generations.

Despite his general good health, he decided to retire "early." He was only 91 at the time...probably the oldest barber in West Texas.

## NEVER TASTED COFFEE

Asked the obvious question as to what he attributes his longevity, the 97-year-old answered: "I never smoked cigarettes or cigars, I never chewed tobacco, and I never tasted coffee...I just don't know if that had anything to do with it."

## CHANGES IN FLOYDADA

Sitting in the house "I had built in 1918" at 308 West California, the alert Warnie Hilton discusses the changes he has seen in Floydada since coming here in January 1915. "This fellow had a little two-chair shop which had two lemon boxes with a boxing plank. Two borrowed looking glasses on the wall and a coal oil stove for heating water," Hilton says in describing the Floydada barber shop he purchased from Shorty Lauderdale and moved his family to this infant West

Texas town from Texaco, N.M. He brought his equipment here, "threw Shorty's stuff out in the alley," and hired Lauderdale as a second barber.

The building housing the business was a small frame on the south side of the square, "where Hale's Department Store is now."

Barber shops were one of the more popular businesses. Floydada had three places where men and boys could get a haircut and shave, as well as "swap a few yams."

There also were three wagon yards, two livery stables, three hotels, four grocery stores, two dry good stores, a tailor shop, and maybe a couple more businesses when Warnie Hilton moved to this town of 600 people.

## ONLY BEAUTY SHOP

He later owned a beauty shop in the balcony above his barber shop. "That was the only one in town at that time...I'll bet there's 20 now," he declares.

"There wasn't no sidewalks," Hilton says in explaining some of the features Floydada did not have when he moved here 64 years ago. "We just waded in the mud when it rained."

Warnie Hilton's barber shop was a place where customers "came in to read the paper and have a place to loaf." Saturday was "the big day" for a barber shop and every other business in fledgling West Texas towns. Farm families brought cream, butter, and eggs to town that day to sell or trade for groceries. This was their day to buy and visit friends.

"I cashed a lot of cream checks...if they weren't too big," Hilton remembers. Floydada "had a creamery at one time."

Saturdays were "full days, starting at 7 in the morning and lasting 'till 11 or 12 at night...sometimes 'til 2. We just stayed 'till we got shut of the customers."

## HAND MADE BOOTS

He says a friend in New Mexico, "an old bachelor," hand made his boots. "I guess that's why it never bothered me to stand on my feet (while working many hours)."

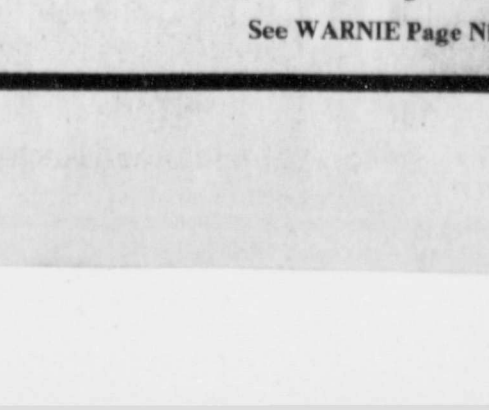

## HELPED WITH PROJECTS.

He was a part of these projects because of his love for his community. Hilton neither played baseball nor rodeoed. "There weren't any organizations in town I know of then," Hilton relates. "The town sure has changed," the small framed Hilton says in reminiscing. Have the changes been for the better or worse? "Oh, I think it's better...of course, everything's higher. Floydada is a good place to live."

## ONE OF THE MAJOR CHANGES

One of the major changes has been in the mode of farming. "Every farmer had his own cows, chickens and hogs." Gardens also prevailed. That also held true for city dwellers. "I always raised a garden and had

Engagements

ENGAGEMENT ANNOUNCEMENT: Mr. and Mrs. Bill Gray of Lubbock, and Virgil Boothe of Las Cruces, New Mexico, wish to announce the engagement of their daughter, Trina Boothe, of Mobile, Alabama, to Rex Savage, son of Mr. and Mrs. Tom Savage of Mobile. The couple plan a May 13 wedding in the chapel of First Baptist Church, Floydada. The bride-elect attended school in Floydada and is a graduate of Monterey in Lubbock. She also attended the University of Southern Alabama in Mobile, and is presently employed as Computer Operator for Gayfers Department Stores. The future bride-groom is a graduate of Monterey High School, and is Grocery Manager of Del Champs Grocery Stores in Mobile. Trina is the granddaughter of Mr. and Mrs. Wayne A. Russell of Floydada and Mrs. John Taft of Lubbock.

Munch Bunch May 3

The "Munch Bunch" will meet at the Baptist Church at noon on Wednesday May 3. Bring you sack lunch and enjoy a review of "First

Ladies of Texas" by Mary D. Farrell and Elizabeth Silverthorne - presented by Anne Willson. Hope you will join us!

El Progreso Tasting Bee Held  
In Mitchell Home

The El Progreso Study Club met in the home of Alice Mitchell for a lovely "Tasting Bee," April 25. For the roll call each member told what kind of dish she had brought and some of the interesting facts about the dish. After the short business meeting, everyone was invited to the dining area to taste each of the foods and to receive a recipe for their own files. Many delicious and different foods were on display. After a sumptuous feast and exchange of recipes, the club

was dismissed by repeating the club collect.

Those present were Pauline Sams, Kathrine Ball, Ann Brock, Hazel Johnson, Dimon Schacht, Roberta Seago, Josie Taylor, Faye Holmes, Marie Brock, Bobby Kellison, Faye Ferguson, Polly Gilbert, Anna Dell Quebe, Jeanette Marr, Arla Copeland and hostess Alice Mitchell.

The last meeting of the year will be a luncheon in the home of Kathrine Ball on May 12.

Beta Sigma Phi Celebrates 48th Anniversary

Beta Sigma Phi, a social, cultural, and service organization for women, plans the celebration of the 48th anniversary of its founding.

Beta Sigma Phi is the largest women's sorority in the world. Celebration will take place in the 30 counties in which the organization's 250,000 members in over 12,000 chapters exist. The organization is non-academic, non-political, and non-sectarian. The keynote to Beta Sigma Phi is friendship. Chapters of five different degrees meet the growing needs of various age groups. Members are active in small chapter groups. Each chapter adapts the plans for social, civic, and service and cultural activities to fit the interests of its members.

When Beta Sigma Phi events or civic endeavors are larger than one chapter can plan alone, all chapters in a city or area may combine their strength. There are state conventions each year which any members may attend.

Internationally, the chapters have created several special funds: The Interna-

tional Loan Fund, through which members help one another; The International Endowment Fund, which has donated over one million dollars to cancer research cystic fibrosis, homes for underprivileged children, and many other causes; The Exemplar Fund, which helps to support Literacy Village in India; and a college scholarship fund for members or their sons or daughters.

Outstanding projects and activities of the local chapter, Alpha Mu Delta, are: First Lady of the Year, Volleyball tournament, and parties at the nursing home.

The Founder's Day celebration on April 30, 1979 at K-Bob's in Plainview, marks the 48th anniversary of the founding. The organization was founded in Abilene, Kansas, by Walter W. Ross. Carrie Bertrand is serving as chairman of the Founder's

GIRL SCOUT SERVICE UNIT MEETING

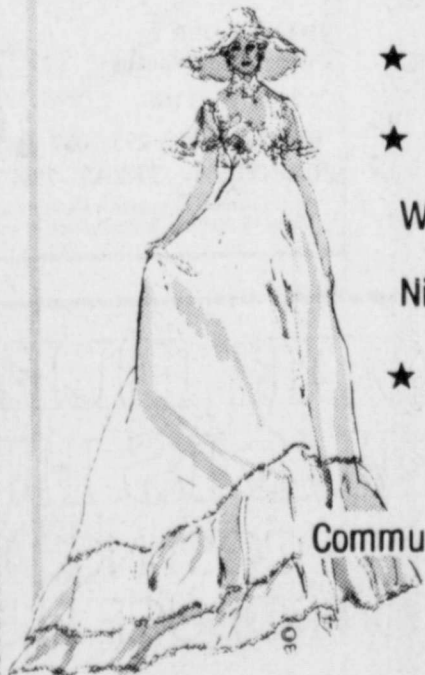

There will be a Girl Scout Service Unit meeting at 5 p.m. Monday April 30 at the community room at the bank.

The first woman dental school graduate was Lucy Hobbs Taylor, who first practiced in 1861.

## NEWS 'N' NOTES

(by Sharon Hillis)

**New Decor With Old Furnishings**  
Go creative!  
Blend old furnishings into new decorative schemes.

**START WITH SLIPCOVERS**  
In the case of upholstered furniture, slipcovers offer an ideal solution for recycling the couch or chairs.

**GO BOLD WITH OLD**  
Wool furniture also will integrate into a new scheme with some ingenuity—and a touch of boldness.

Heirlooms we inherited from our parents will not give us decorating trouble, but those first purchases we made as newbies probably will.

The blond wood dining set, for instance, or that dark wood Mediterranean bedroom suite, need special boldness.

**'OVERPOWER' BLOND WOOD**  
To play down blond wood — in the dining room, for example — try a bold wall color of red, charcoal brown or emerald green.

This makes the furniture secondary in importance. Also, a new lighting scheme can remove emphasis from the furniture.

**'RE-FRESH' DARK WOOD**  
For the darker woods of the past, such as a Mediterranean bedroom set, try a "total" decorating scheme based on printed fabrics—new bedspread, draperies and carpet.

They may transform the room into that "all-fresh-and-new" look.

**STENCIL, ANTIQUE IT**  
If the furniture is not valuable for re-sale or for sentimental reasons, another idea takes daring, too: paint it, stencil it, or antique it.

There is nothing to lose with this approach, and the furniture pieces may become important parts of the new scheme after all.

Re-using carpet is difficult — but not impossible — with today's selection of wall-paint colors and fabrics.

Dyeing carpet is not successful, however, and it is quite expensive.

One idea for wall-to-wall carpet is complete change, especially if it's patterned and hard-to-use.

Change it to an area rug — just have it cut down and the edges bound. Also, large carpet pieces can become stair runners. Or they can be carpet for smaller rooms.

**WHIRLETTE number one golf team included, left to right: Patti Campbell, Beverly Burleson, Teresa Weaver, Melissa Hale, Lisa Welborn, and Shonda Fulton. Not pictured is LaDelle Noland. Dale Tyer is their coach.**

**WHIRLETTE number two golf team, left to right: Stayce Day, Deean Fry, Drew Ann Johnson, Debbie Martinez, and Hope Hartsell. Dale Tyer is the FHS golf coach.**

## School Records Set Eighth Grade Breezers Capture 4-AA Crown

Eighth grade Breezer athletes establish four new Floydada Junior High boys track records and tied another as they outdistanced four rival teams for the District 4-AA championship in their division. The district meet was April 20 in Tulia.

The Floydada lads of Coach Johnny Martin racked up 209 1/4 points to 140 for runner-up Tulia. Lockney finished with 74, Abernathy had 51 1/4 points and Idalou scored 17.

"The eighth grade boys had five track meets this year and were very successful in all five," Coach Martin said, adding: "They won all these track meets with the closest team to them in any track meet being at Post where they won by 41 points. These boys did a spectacular job this year and we are looking forward to seeing them as Whirlwinds."

The 440-yard relay — Mike Salazar, Todd Beaty, Bruce Williams, and Floyd Hightower — ran a 47.5 to capture first in district. This eclipsed the old mark of 48.5, set in 1978.

Another relay record came in the 1,320 yard event. The team of Randy Rendon, Hightower, Salazar and Beaty ran a 2:45.7, far better than the old 2:50.6 school record.

Donnell Weeks posted one of the meets top marks when he won the pole vault event with a mark of 11 feet even. This was exactly one foot better than the previous school record.

Beaty scored an individual honor as he ran the 330-yard dash in 39.4. The previous record was 40.0.

Williams tied the FJHS record of 24.4

as he won the 220-yard dash

**RESULTS LISTED**  
Following are results of 4-AA District Breezers in the 4-AA District Track Meet:  
Coach Martin:

Lipham, 112'6"  
Shot put: 1. Soliz, 47'9"; 41'9"  
(\*indicates new school record)

## Seventh Graders Place Second

Paul Resio captured two first places and a trio of teammates won blue ribbons to pace the Floydada seventh grade Breezers to a second place finish in their division of the District 4-AA track meet. Tulia was the site.

Resio established a new Floydada Junior High record as he won the 660-yard dash in a time of 1:34.9. He also took first in long jump.

Other members of Coach Mike Brownlee's seventh grade Breezer squad winning blue ribbons were: Mark Hatley, pole vault; David Martinez, shot; and Troy Garza, discus.

Floydada totaled 132 points to place behind Tulia, which had 182. Idalou posted 93 points, Lockney had 64 and Abernathy scored 28.

**FLOYDADA PLACERS**  
Following is a list of placings in district:  
Shot: 1. David Martinez, 47'9"; 41'9"  
tree, 4. Troy Garza  
Discus: 1. Garza, 2. C. Crabtree  
Long jump: 1. Paul Resio, 112'6"  
High jump: 3. Resio, 5'4"  
Pole vault: 1. Mark Hatley, 11 feet even  
McLain, 4. Shannon Shurtz, 10 feet even  
440-yard relay: 3. (Resio, Beaty, Salazar, Hightower) 47.5  
660-yard dash: 1. Resio, 1:34.9  
80-yard hurdles: 4. Troy Hatley  
330-yard dash: 5. Robert Beaty, 39.4  
220-yard dash: 1. Crabtree, 24.4  
1,320-yard relay: 2. (Resio, Salazar, Beaty, Hightower) 2:45.7  
Gonzales, Resio)

## First Baptist Media Center

**BETH PRATT**  
David Redding, pastor of Liberty Presbyterian Church in Delaware, Ohio has written a delightful book entitled **Jesus Makes Me Laugh**. He says, "Jesus makes me laugh differently now. I am ashamed to say that in the past I did not laugh with Him, but as His expense. I was not the first." In these words, Redding begins describing the comic ways in which God has punctured his pride and hypocrisy and has turned his laughter from scorn to a redemptive gift. He believes that when we begin in Jesus Christ we experience the helpless laughter that overwhelms and heals. It is then that we are engulfed in love and forgiveness by the One we can count on to make us happy. This is a book to shatter walls built up to keep love and laughter out of lives. It is a book for everyone—for those who know and love Jesus and can appreciate and identify with His working in the life of a fellow believer—and for those who are seeking (or who are but don't know it).

of hamsters could have in one year. This is a story about Michael and his new pet. You will learn just how to take care of the furry little creature and enjoy the colorful photographs of a boy and his hamster friend.

**Prayers That Changed History** by R. Earl Allen is a look at prayer through the lives of Old Testament characters. The focus of the book shows prayer to be practical and workable as it brings alive Abraham, Moses, Hezekiah, Hannah and others. It will relate to you where you are now.

"God's White Stone" and "Why Worry" by Boyce Evans are ready to be checked out on cassette tape.

Remember the Media Center Munch Bunch will meet at First Baptist Church Chapel Parlor, Wednesday, May 2. Ann Willson will be presenting a book review.

Meet Winslow The Hamster by Rebecca Anders and learn what kinds of animals are related to hamsters—how hamsters help scientists who study human diseases or how many descendants a pair

## Softball League Being Formed

# YOUR ELECTRIC BILL IS HIGHER

## IT'S COSTING US MORE TO PRODUCE ELECTRICITY

Electric bills are higher these days, and even though the cost of almost everything else is higher too, you are still concerned about your cost of electricity. We're concerned too.

The cost of the fuels necessary to operate generating plants is increasing by leaps and bounds. To counter the shortage and spiraling costs of natural gas and fuel oil, SPS has built new plants which use lower-cost coal. But building these plants costs money, too — three times as much as gas-fired plants. Even so, fuel is the largest single expense we have. About 51¢ of every dollar SPS received from its customers in 1978 went for fuel. Fuel always has been and always will be part of your electric bill. It's higher today than it was yesterday, and tomorrow it will be higher still. SPS is working to keep the price of electricity as low as possible, but as the cost of producing electricity goes up, our only choice is to ask our customers to pay a higher price. It's the only way we can maintain the adequate supply of power and the dependable service you expect.

# Black And Green Recipients Of DECA Scholarships

DECA SCHOLARSHIP winners Bobby Green (left) and Calvin Dick look on as they receive a letter announcing the award. Presentation to the two students was made by Principal Charles Tyer during Tuesday night DECA banquet.

Kalvin Dick and Bobby Green were revealed Tuesday night as co-recipients of the first annual DECA scholarship. Floydada High Principal Charles Tyer explained that \$100 scholarships "may be used in any form of furthering a person's education."

Principal Tyer complimented DECA at the organization's annual banquet in Duncan Elementary Cafetorium by noting that "distributive education, like a circus, keeps getting bigger and better" in Floydada High.

The local Distributive Education Clubs of America (DECA) Chapter consists of DE students in Floydada High.

Advisor Bill Neeley presented plaques to "very deserving people."

President Alex Torrez was handed a plaque for leadership. The DECA "Comeback Award" went to Ernest Torrez, who is taking four correspondence courses in addition to his regular classroom work.

Jim Cornelius was cited for "outstanding work" in helping plan and carry college-career day at Floydada High. "Scholar of the Year" was Robby Thrasher. He was described by Neeley as "a thinker...a trailblazer."

### SCHOOL OFFICIALS PRESENTED PLAQUES

Tyer, commended by Neeley as "a principal who has supported us...given us leadership and advice," was recipient of a special plaque.

Another to receive a special plaque was Counselor Joanne Cagle. She was especially cited for arranging college-career day.

"DECA Student Trainee of the Year" was Mark Mayo. Stacy Leatherman received

a plaque for her job dedication.

Neeley told the DECA students, their employers, and guests that "I have a special place in my heart for each student." He was presented a gift by DECA members.

### Hazel Stovall

Services for Mrs. Richard L. (Hazel) Stovall, 69, of Plainview were at 2 p.m. Friday in First United Methodist Chapel in Plainview with Dr. Tilden Armstrong, retired Methodist minister from Paducah, officiating, assisted by Dr. R.L. Kirk, pastor.

Burial was in Floydada Memorial Park under the direction of Wood-Dunning Funeral Home of Plainview. Mrs. Stovall died at 1:30 a.m. Thursday in Central Plains Hospital after a lengthy illness.

A native of Calvert, she moved to Floydada in 1929 where she was a schoolteacher. She married Richard L. Stovall on May 20, 1930 in Calvert. They moved to Plainview from Floydada in 1963.

She was a member of First United Methodist and of Circle 3. She also was a life member at duplicate bridge.

Survivors include her husband; three sons, Frank of Houston, Robert of Floydada and Judge Van Stovall of Plainview; one sister, Mrs. Mamie Francis Cheek of Dallas; and eight grandchildren.

## OBITUARY

### John Lee Pearson

Services for John Lee Pearson, 93, of Truth or Consequences, N.M. were Friday morning in the First Baptist Church in Lockney with the Rev. John Jenkins, pastor, assisting the Rev. Fred Blake, pastor of the South Plains Baptist Church, who officiated.

Burial was in Lockney Cemetery under direction of Moore-Rose Funeral Home. Pearson died Wednesday in Temple after a lengthy illness.

He was born in South Plains and married Leona Bell on Dec. 9, 1920 in Dimmitt. She moved to Truth or Consequences from South Plains in 1972.

Pearson was a retired farmer, a World War I veteran and a member of the South Plains Baptist Church.

Survivors include his wife and several nieces and nephews.

## Bryan Thomas Hospitalized Following Sunday Accident

Bryan Thomas, eight-year-old son of Mr. and Mrs. Keith Thomas, suffered injuries Sunday, April 22, when he fell from a moving pickup near his Floydada home.

The youngster is a patient in Caprock Hospital. His condition is stable, but he is expected to remain hospitalized "at least two more weeks."

The injured lad will require bed rest for some time after being released from the hospital. Bryan's doctor says he may have visitors. In fact, visitors are encouraged.

## Public Notices

### NOTICE TO BIDDERS

Sealed proposals addressed to the Honorable Mayor and City Council of Lockney, Texas, will be received at the office of the City Secretary, City Hall in Lockney, Texas, until 9:00 a.m., C.D.T., May 15, 1979, for furnishing all necessary materials, machinery, equipment, superintendence and labor for placing a seal coat, consisting of one application of asphalt covered with aggregate on approximately 21,500 square yards on street pavement. The estimated quantities are:

6,500 gallons of asphalt

180 cubic yards of aggregate

Bidders shall submit their bid on the forms attached to the specifications and must submit therewith a Certified Check issued by a bank satisfactory to the Owner, or a Proposal bond from a reliable Surety Company, payable without recourse to the order of the City of Lockney, Texas, in an amount not less than five percent (5%) of the largest possible bid submitted on the project as a guaranty that the Bidder will enter into a contract and execute bond and guaranty in the forms provided within fifteen (15) days after notice of award of contract to him.

Information for bidders, proposal forms, specifications and plans are on file at the office of the City Secretary, Lockney, Texas, and copies can be secured at the office of the Consulting Engineer, A.C. Bowden, 1716 Avenue M, Lubbock, Texas, upon deposit of \$10.00 as a guarantee of the safe return of the plans and specifications. The full amount of deposit will be returned to the Bidder on submission of a bonafide bid on the work, with such plans and specifications, or upon returning the plans and specifications immediately after examination of same, but before the time of receiving bids and advising the Engineer that a bid will not be submitted. Otherwise, the deposit shall be forfeited. Suppliers may secure copies of the plans and specifications as outlined above, but will be given five (5) days after bids have been received to return said documents to the Engineer's office before the deposit shall be forfeited. No obligation is assumed to return the deposit under other conditions.

### NOTICE TO BIDDERS

Sealed bids addressed to the Mayor and City Council of the City of Floydada, Texas, will be received at the office of the City Manager, City Hall, 114 West Virginia Avenue, Floydada, Texas, 79235, until 7:30 o'clock P.M. on May 8, 1979, for one or more contracts to be let by the City for the purchase of materials, supplies and equipment for an electric substation tie facility.

Each bid submitted shall be in a sealed envelope and plainly marked as: PROPOSAL, Tie Substation Facilities and bearing the name of the bidder. The materials, supplies and equipment to be purchased must meet or exceed the specifications therefor and all proposals received will be publicly opened and read aloud at the time and place hereinabove mentioned. Any bids received after closing will be returned unopened. All bids will be referred to the City's Engineers for tabulation and checking. Should an acceptable bid be submitted, the City Council proposes to award the contract(s) for which bids are being taken during a meeting of the Council to be held at 7:30 o'clock P.M. on the 15th day of May, 1979, at its regular meeting place in the City Hall.

Specifications and instructions to bidders may be obtained from the office of Quinton T. Colwell & Associates, Inc. Consulting Engineers, 2161-50th Street, Lubbock, Texas 79412, (806) 744-8436, and examined in the office of the City Secretary, City Hall, 114 West Virginia Avenue, Floydada, Texas.

No bid may be withdrawn for any reason for at least thirty (30) days after the scheduled closing time for the receipt of bids.

The City of Floydada reserves the right to reject any and all bids and to waive any formality or irregularity in any bid received. In the case of ambiguity or lack of clarity in stating the prices in the bids, the City reserves the right to consider the most advantageous construction thereof, or to reject the bid.

**Floyd Philosopher Says Shortage Of Energy Not As Bad As Shortage Of Horse Sense**

**Editor's note: The Floyd Philosopher on his Johnsongrass farm on Floyd County examines the energy situation this week.**

Dear editor:  
It looks like this country is faced not only with a shortage of energy but a shortage of horse sense.

Take the 55 mile an hour speed limit. If that's what we want it looks like a better way to achieve it could be found than pleading with everybody to comply, especially when about two-thirds don't.

The horse-sensical way would be to require governors on cars, set for a maximum speed of 55 miles an hour. That'd do it and it wouldn't cost very much. Most cars are being re-called anyway and the governors could be installed then.

This would be a lot cheaper and far more effective than having highway patrolmen trying to slow millions of drivers down, which is about like having one cowboy on a bicycle trying to head off a wild stampede.

While we're waiting to get the governors

installed, control traffic by having two patrol cars travel side by side at 55 mile an hour at 50-mile intervals down two-lane highways. If it's a three-laner, use three cars; four, use four. This will work, except that it'll back cars up from the Pacific to the Atlantic, from Floyd County to the state Capitol.

Or take lawnmowers. There must be 25 or 30 million of them, a large percentage of which will start. Think how much gasoline could be saved if the Energy Department spent some of its money not on pleading with people to conserve but on a crash program to produce a lawn grass that grows only two inches high. Think how much more sleep city people could get by not being woke up Sunday mornings by the roar of power mowers.

I realize this would throw lawnmower makers out of work but they could turn to something else, although I don't recommend farming.

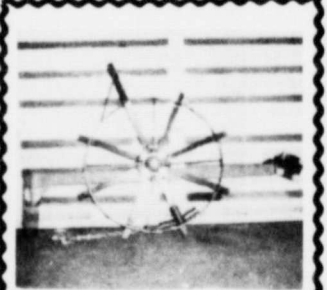

I don't believe you can talk people into saving energy, any more than you can talk politicians into saving their breath.

Yours faithfully,  
J. A.

## Use Water Efficiently For A Better Lawn - Garden

**By Birch L. Lobban**  
County Extension Agent

If irrigation water is limited in your area it is essential to make efficient use of what is available. Most people fail to realize that soils differ in their ability to take up water. It is useless to apply moisture to the surface of a soil at a rate faster than the soil can absorb it. When you apply water at the surface, the top layer of soil becomes saturated; that is, it takes up all the water it can hold.

**Roll-A-Dikers**  
AN ATTACHMENT USED BEHIND YOUR LISTER OR CULTIVATOR MAKES A DAM IN THE FURROW LAWSON FARM SUPPLY

933-3940  
503 E. Missouri  
Floydada, Texas

Some of the water then moves down into the drier layer of soil below. The speed of this downward movement is influenced by the soil structure. In a tight or heavy, compact soil, the movement will be slow. In light, sandy soil, it will move much faster. It is important to note the rate at which the soil in your yard can take up moisture. When you apply it faster than the soil can absorb it, you simply waste water as it runs off the surface into the low areas, into the gutter, or into the natural drainage system.

The professional golf greens keeper gets the most good from every gallon of water by carefully timing the water application — 5 to 10 minutes on and 20 to 30 minutes off.

This system allows time for the water to saturate the top soil and then redistribute itself uniformly in the soil below. Utilizing special timing mechanisms he keeps repeating the on-off process until the soil is wet to a depth of 8 to 10 inches. Depending on the type of soil and the amount of vegetation the soil will not require water for at least a week to 10 days.

Another efficient system is to use sprinklers that cover large areas but which have a low rate of discharge. It may require 5 to 6 hours to saturate the soil to the depth necessary but there will be little or no loss due to surface run off.

A steel rod about 3/8 to 1/2 inch in diameter and 2 feet long makes an excellent tool for checking moisture penetration. One end should be bent to form a short handle. In a freshly watered

## WHOOZITS . . .

**Lakeview Team In Whozit Photo**

Many people's span back to 1931. Last Sunday's Hesperian Whozit, the 1931 Lakeview basketball team which won the county championship, was identified by several persons.

Roy Anderson and Leonard Alexander were shown at the top and the bottom row consisted of G.W. Smith, Willie Bunch, and Herman Nelson.

Orval and Lorene Newberry were among those making correct identifications. They noted that Anderson now lives in California and Nelson is an Oklahoma City resident.

Also naming the entire team were Adrian West, Otis Anderson, Mrs. J.C. Odom, and Earl Edwards.

Sam Spence correctly named Smith and Bunch, but he believed the others were Bill Hambright, A.M. West, and Homer Newberry.

**FLOYDADA WHOZIT** — This should be one of the easiest Whozits to identify! To even name his vocation would give away this identity, but he is seen each day by a multitude of people. If you would like to guess please contact our office between Monday and Wednesday.

**Merle Mooney**  
Lockney Whozit

Last week's Lockney Whozit was Merle (Myers) Mooney. It must have been a tough one, because only one person — Claudette Hulcy — guessed the identity of the mystery picture subject.

**LOCKNEY WHOZIT** — Can anyone identify the young stock show exhibitor in the center of the picture? Cooperation may be the key to solving this week's Lockney Whozit. Call The Beacon, 652-3318, if you know or would like to guess the identity of the mystery picture subject.

## 230 LEVEL-ACTION™ DISK

3-section flexibility with hydraulic fold

Three-section flexibility makes this disk an ideal match for rolling land; it can follow three separate ground contours in each pass. Choose working widths from 20 to 25 1/2 feet. Overlapping front gangs cut away the center ridge most disks leave under the surface. Offset rear gangs pull in the same amount of soil front gangs throw out — and spring-loaded scrapers keep blades working. An exclusive self-leveling hitch puts up to 100 percent working weight — 95 to 120 pounds — on every blade.

## TORNADO SAFETY RULES

TO KNOW WHAT TO DO WHEN A TORNADO IS APPROACHING  
MAY MEAN THE DIFFERENCE BETWEEN LIFE AND DEATH!

### 1. IF YOU ARE NEAR A TORNADO CELLAR:

When time permits, go to a tornado cellar, cave or underground excavation which should have an air outlet to help equalize the air pressure. It should be kept fit for use, free from water, gas or debris; and preferably equipped with pick and shovel. THERE IS NO UNIVERSAL PROTECTION AGAINST TORNADOES EXCEPT UNDERGROUND EXCAVATIONS.

### 2. IF YOU ARE IN OPEN COUNTRY:

1. Move at right angles to the tornado's path. Tornadoes usually move ahead at about 25 to 40 miles per hour.
2. If there is no time to escape, lie flat in the nearest depression such as a ditch or ravine.

### 3. IF IN A TOWN OR CITY:

1. Seek inside shelter, preferably in a strongly reinforced building. STAY AWAY FROM WINDOWS!
2. In homes: The corner of the basement toward the tornado usually offers greatest safety, particularly in frame houses. People in houses without basements can sometimes be protected by taking cover under heavy furniture against inside walls. Doors and windows on the sides of the house away from the tornado may be opened to help reduce damage to the building.
3. Standing against the inside wall or on a lower floor of an office building offers some protection.

### 4. IF IN SCHOOLS:

1. In city areas: If school building is of strongly reinforced construction, stay inside, away from windows, remain near an inside wall on the lower floors when possible. AVOID AUDITORIUMS AND GYMNASIUMS with large, poorly-supported roofs!
2. In rural schools that do not have strongly reinforced construction, remove children and teachers to a ravine or ditch if storm shelter is not available.

### 5. IF IN FACTORIES AND INDUSTRIAL PLANTS:

On receiving a tornado warning, a lookout should be posted to keep safety officials advised of the tornado's approach. Advance preparation should be made for moving workers to sections of the plant offering the greatest protection.

6. Keep calm. It will not help to get excited. People have been killed by running out into streets and by turning back into the path of a tornado. Even though a warning is issued, chances of a tornado striking one's home or location are very slight. Tornadoes cover such a small zone, as a rule, that relatively only a few places in a warned area are directly affected. You should know about tornadoes though, "just in case."

7. Keep tuned to your radio or television station for latest tornado advisory information. Do not call the Weather Bureau, except to report a tornado, as your individual request may tie up telephone lines urgently needed to receive special reports or to relay advisories to radio and television stations for dissemination to thousands in the critical area.

# Warnie: Barber Here 56 Years

Continued from Page One  
 Warnie Hilton remains the love of the town let me keep the town as it was. "A lot of town people own their own milk cows and horses."

**WESTOCK**  
 Warnie Hilton retains the love of the town let me keep the town as it was. "A lot of town people own their own milk cows and horses."

Warnie Hilton retains the love of the town let me keep the town as it was. "A lot of town people own their own milk cows and horses."

Warnie Hilton retains the love of the town let me keep the town as it was. "A lot of town people own their own milk cows and horses."

Warnie Hilton retains the love of the town let me keep the town as it was. "A lot of town people own their own milk cows and horses."

in 1974. The other daughter is Blanche Grundy of Aransas Pass. Warnie lost his partner of 57 years when his wife Lola succumbed Sept. 24, 1962. They were married in Hillsboro in 1905.

**TWO GRANDSONS**  
 Two grandsons and six great-children are points of pride for Warnie. Pictures of the two grandsons — Doyle Grundy, a chemical engineer in Port Aransas, and Bob Grundy, an Odessa accountant — are visible in both Hilton's living room and bedroom.

A 50-year Masonic certificate has its place on the living room wall. It was presented in March 1970. "I'll soon get my 60-year certificate....If I live that

long," he says. He served 20 years on the Floydada Volunteer Fire Department. Yet another certificate which he has hung proudly in his living room is a gold framed certificate which was presented May 24, 1978 — Old Settlers Day. It states:

"Floyd County Pioneer Association salutes you, W.H. 'Warnie' Hilton, a pioneer of Floyd County, for your loyalty and years of service. For your dedication to and love of your community and for the many years of residence, we do honor you this day."

This is symbolic of the affection Floydada residents feel for Warnie Hilton. And that path of love travels both ways!

### Waiting List Started For Cowboy Game

Floydada Chamber of Commerce Manager Lance Barrow reminds the public that a "waiting list" has been started after 102 area residents registered for a two-day September trip to Dallas to view a Cowboy football game.

Those on the waiting list will be accepted should those signed for the trip be unable to attend. Interested persons should contact Barrow at the CoC office.

# FARM & RANCH NEWS

## Warm Soil Can Mislead Cotton Planters

Soil temperatures on the South Plains already have warmed up enough that farmers are anxious to begin planting cotton. Although soil temperatures are an excellent guide for establishing the earliest feasible time for planting, they could be misleading, specialists at the Texas A&M University Agricultural Research and Extension Center here cautioned.

"Soil temperature by itself may be misleading," warned Dr. James Supak, area cotton agronomist with the Texas Agricultural Extension Service.

In many areas of the South Plains, the soil has reached a 10-day average temperature of 60 degrees at a depth of eight inches. The soil usually doesn't reach that warmth until early May, Supak noted.

"In addition to the soil temperature, we need to look at the calendar, and especially at the long range weather forecast," Supak said. Several days of cool, rainy weather are normal in this area during late April and early May, he noted.

In fact, the 30-day weather outlook valid through mid-May predicts just the type of weather about which Supak is concerned, said Kenneth Wigner, agricultural meteorologist with the National Weather Service, stationed at the TAMU center.

Through mid-May, the forecast says,

below normal temperatures are expected over the entire area. Near to slightly below normal rainfall is expected for southern counties of the South Plains,

but above normal rainfall is likely over the rest of the area.

"Often, there is a dip in the soil temperatures in the South Plains in the

first week of May," Wigner said. This occurs following rains which are common at that time," he explained.

The last 15 days of April often are

much warmer than the first 15 days of May, agreed Elmer Hudspeth, director of the USDA cotton research laboratory at the center. The 60-degree average minimum soil temperature tells when not to plant as much as it tells when to plant, he added. Research has shown that until the 10-day average soil temperature surpasses 60 degrees, the percentage of emergence of planted seed is only about 30 percent, he said.

Supak said the present soil temperatures might induce farmers to plant now, but do not insure an earlier crop than if cotton is planted about May 1.

He cited a three-year study conducted on the South Plains by Dr. J.D. Bilbro Jr., research cotton agronomist with USDA — Science and Education Administration, Lubbock. It showed that cotton crops planted on April 10, April 20 and May 1 all reached the first bloom stage around July 5. (See Table.)

Earlier planting increases the possibility of stand reduction from early hail and sand, Supak said, just looking at two major hazards and not counting about the same," the agronomist said.

Since there is no stage in earlier fruiting and anticipated rain and next two weeks can be problems with seedling emergence, farmers might be wise to wait until May, he said.

### ACCIDENT CONTROL

While only 5 percent of workers are engaged in production, this group accounts for 80 percent of all work-related accidents, those statistics are the most common.

## 'More Practical' Transportation Guidelines Urged By Cotton Head

The president of the National Cotton Council has called for "more practical" transportation regulations, but cautioned against any deregulation that might adversely affect the economic and efficient movement of farm commodities and other essential products to market.

Hoke Leggett, Hobgood, N.C., producer, made the remarks in an address at the annual meeting of the Cotton Warehouse Association.

He especially warned against changes that would allow railroads to (1) raise freight rates "whenever or how ever much they like," (2) abandon spur lines regardless of the consequences to rural communities, or (3) indulge in predatory pricing that would eliminate healthy competition from trucking lines.

The Council president said he was

concerned about deregulation that might have a harmful effect on shipments of baled cotton and cottonseed products as well as those of fertilizer, fuel, chemicals, and other supplies vital to cotton production.

Noting that boxcar shortages are continuing to delay raw cotton shipments, Leggett pointed out that some rail lines in the Cotton Belt are now showing renewed interest in upgrading their lines and ordering new freight cars. As an example, he cited Illinois Central Gulf's recent announcement that its 1979 capital spending program will be the largest in the company's history. Plans call for adding about 2,000 new freight cars, rebuilding another 800, and improving locomotives and tracks.

"These are encouraging developments," he said, "and should prove beneficial in moving cotton to market."

Reviewing other issues, Leggett noted that cotton dust continues to head the list of industry concerns. He said an appeals court decision on the Labor Department's strict new cotton dust standard could come as early as June or some months later.

"But no matter what the court decides — whether it's in our favor or in OSHA's — the cotton dust problem will remain our most critical issue until we can eliminate or deactivate the unknown factor in cotton dust that can potentially cause byssinosis," he emphasized.

In this regard, Leggett said the Council has urged Congress to restore agricultural research cuts proposed in the Administration's fiscal 1980 budget.

"Unless Congress restores the funding to its present level, over half a million dollars would be taken away from USDA's Southern regional lab in New Orleans where important work is being done on the cotton dust problem," he added.

The Interior Department's proposed regulations to enforce acreage and residency requirements of the 1902 Reclamation Act were cited by the Council president as another issue with widespread implications for cotton. Noting that the proposed rules would set a 160-acre limit on the amount of land a farmer could own or lease, Leggett said this would mean that the federal government for the first time would be putting a limit on the size of a farm.

He pointed out that under a recent court ruling these same acreage limitations also would apply to farmers using water from Corps of Engineers projects. "There are dozens of such projects across the Cotton Belt, many of which serve our producers," Leggett noted. He said the Council and a number of other groups are supporting repeal of the act's acreage and residency limits as "outdated and inequitable" in today's

agricultural economy.

"We think it's short-sighted to put any kind of acreage limitation on farm size," the Council president said. "With the rapid changes in farming, any figure put on acreage might be just as obsolete a few years from now as 160 acres is today."

Calculated average first-bloom dates and prebloom periods for five selected planting dates of Lankart Selection 57.

Planting date	First-bloom date	Prebloom period, days
April 10	July 6	88
April 20	July 5	77
May 1	July 7	68
May 10	July 11	63
May 20	July 15	57

## Springtime Storms Increase Lightning Deaths

Four out of five human deaths or injuries from lightning occur in rural areas, the Texas Department of Agriculture warns, and, as spring approaches, the likelihood of the violent electrical charges increases.

Isolated buildings and equipment in rural areas are interconnected by a network of water pipes, electric wires and metal fencing to make them irresistible conductors in lightning's search for a path to the ground.

Barns are particularly vulnerable as they are often the tallest structures around and regularly contain highly combustible material. Burning country homes and buildings are also at the mercy of limited rural fire-fighting equipment.

A farmer perched high in the cab of a tractor or rancher straddling a metal corral fence join the ranks of highly susceptible targets.

Like humans, animals are not nearly as often hit directly by lightning as they are electrocuted by ground currents radiating from a tree or other object. An estimated 80 percent of all accidental livestock losses have been attributed to lightning Agriculture Commissioner Reagan V. Brown pointed out.

Cases of electrocution as the result of current passing from land to animal have also been documented, including one Utah incident in which more than 500 sheep were killed instantly when the pasture in which they were grazing was struck. The ability of electrical current to travel from object to object explains the fact that most people and animals struck by lightning bear no visible scars.

Some good seems to come along with most of nature's evil and such is also the case with lightning, as it causes some of the nitrogen in the air to combine with part of the oxygen, forming nitric oxide gas. The gas, eventually dissolved in precipitation, comes back to the earth as soil-enriching nitrate at a rate of hundreds of million years.

While lightning presents danger, both in rural environments the way to protect himself and his animals explained Brown. "Lightning is the best preventive measure lightning has struck, damage immediately."

In case of a storm, get out of the car and away from metal electrical equipment and car is a good place to be. Your chances are still good of being hit by lightning, statistic doesn't offer to remember the wise words expert:

"If you heard the lightning didn't strike you."

"If you saw the lightning you."

"And if it did strike you, you won't have known it."

### Estate Planning Seminar May 3

With problems of inflation and estate taxation burgeoning, Texas Tech University is offering as a public service the second annual Estate Planning Seminar on May 3 in the fifth floor auditorium of the School of Medicine.

To be led by noted tax attorney Conrad Teitell of New York, the seminar will be divided into two sections: "Estate Planning Techniques for Professional Advisers...Including Charitable Giving," at 8:30 a.m.-12:30 p.m., and "For the General Public: Estate Planning," 1:30-3:30 p.m.

Five hundred or more High Plains cotton producers, businessmen and industry leaders from other areas of U.S. Cotton Belt are expected in Lubbock May 2 for the Twenty-Second Annual Meeting of Plains Cotton Growers Inc.

The meeting will begin at 2:30 p.m. in the Arco Ballroom of the South Park Inn, near Loop 289 and Indiana Avenue in Lubbock.

In addition to standard reports to the membership by PCG officials, two authoritative speakers have been selected to speak on worldwide marketing of the area's two million bale annual average production of raw cotton fiber.

A 20-minute film on the research, market development and production work of Cotton Incorporated, the production fiber research and marketing company, will also be shown.

The two principal speakers are John Garner, a producer and owner and editor of Cotton Outlook magazine, and Paul Hull, Executive Director of Cotton Council International.

Cotton Outlook is a highly respected international publication from which readers get weekly reports on U.S. world cotton production, consumption, supplies, exports, imports, government policies and attendant economic data that together determine U.S. cotton market demand and prices.

CCI under Hull's direction organizes and supervises teams, mill technical services and other cotton processing programs in countries around the world, including cooperative advertising programs with some 40 textile mills, manufacturers and retailers.

"With their extensive knowledge of the international cotton trade and almost daily contact with its principal states PCG Executive Vice President Donald Johnson, and Garner are well qualified to brief us on opportunities in our cotton in world markets and to advise on how we can best take advantage of those opportunities."

Both Johnson and President Lloyd Cline of Lankart report to the membership on PCG activities, financing plans for the future.

The membership will be called on to confirm or elect and re-elected directors, two from each of the organization's 25 High Plains counties.

### Around the County

#### County Agent's Column

By Stephen R. Herber  
Floyd County Extension Agent

There is something about a beautiful lawn; it is almost as if the best part of spring spent the summer at your home. A bit poetic, but a lush, green lawn is still the result of knowing and keeping tabs on what you have done.

More frequently, we are finding that some homeowners have lost track of what is occurring on their lawns. As a result, these homeowners are beginning to learn new words such as chlorosis (yellowing and poor growth), iron deficiency and micronutrients.

These conditions and the need for micronutrients can be brought about by excessive phosphorus levels in the soil. The very high to excessive soil phosphorus levels in the soil can be caused by naturally high phosphorus levels in the soil or from continuous over utilization of fertilizers containing phosphorus.

A survey of the soil samples tested in 1978-79 indicated that 21 percent of West Texas homeowners with lawn problems had very high to excessive phosphorus levels, reported Dr. Dale Pennington, Extension area soil chemist who supervises the Texas A&M University soil testing laboratory at Lubbock.

To address how and why this situation occurred, one can only guess. The first guess is that the homeowner did not realize how to properly apply the correct amount of fertilizer. The second guess is that the homeowner, over the

years, failed to keep tabs of how much phosphorus had been applied each year. "Losing track" of applied phosphorus may have resulted in the phosphorus build-up.

A soil analysis prevents this phosphorus build-up from occurring and it also determines how much phosphorus should be applied. If you feel you need a soil test; here are some tips that will help you obtain better results from your soil analysis.

Prior to taking small samples, scrape the litter from the surface; then, use a spade, soil auger or soil-sampling tube. To use a sharp shooter, dig a V-shaped hole and take a half-inch slice of soil from the smooth side of the hole. Repeat in 10 or 15 different places.

Place subsamples in a clean container (plastic bucket, paper sack, etc.), mix thoroughly, and take out approximately one pint for the composite sample.

To aid in the interpretation of the soil test and in making recommendations, fill in Form D-495, Soil Sample Information Sheet for Lawn, Garden and Flower Beds, as completely as possible and submit with your samples.

Each soil sample should be marked with your name and sample number, which should correspond with the information furnished on the information sheet. Mark the analysis desired and include the proper fee. The information sheets and soil sample boxes are at my office.
