# FACTS

A fact is like a shadow-tags you all around as presistently as a Texas Oil stock man who has just heard you have sold your farm for cash .---

Folks here are some clothing facts that may prove interesting to a few men who seem to think \$25 to \$35 for clothing too high-

It only requires about 3 1-2 lbs. of scoured wool to make a suit -a small item of course-but the labor from the SHEEP'S back to YOURS is the "big noise" and is double what it was in 1914-

Clothing shows the greatest reduction from peak prices of any commodity, and we want to assure you that future reductions on clothes will be only in the same ratio to other things we consume or use. There will only be a gradual reduction for many years-

There are good, reliable, all wool clothers here at from \$25 to \$35, and let us impress you with this-in order to get back to "normalcy" we should all buy what we need and forget the "has beens" for its only in the consumption of goods, can materials we produce be used, and mills and factories with their millions of laborers kept moving-

# Time to stop eating fogge heavy food! CORN FLAKES wonderful for the whole family

Nature rebels against heavy foods in warm weather. Much illness in summer is caused by overtaxing the stomach. Change your diet-and keep snappy in mind and muscle!

Kellogg's Corn Flakes with cold milk and fresh fruit are wonderful for the hot days-for breakfast, for lunch, for supper or for "snacks." They digest without taxing the stomach and supply the nourishment the body needs.
