Printed in Terry County, on the South Plains; the last stand of the Cattleman and the future home of the most prosperous Farmers in the United States

VOLUME 22

BROWNFIELD, TERRY COUNTY, TEXAS, FRIDAY, JUNE 17, 1927

NUMBER 43

## Chamber of Commerce C-U-R-R-E-N-T-S

By the Secretary

There seems to be a great deal of confusion regarding the present condition and status of the highway running east and west through our county and the impression seems to prevail that we have lost State designation. This is a mistake as we still hold it and there is not any immediate danger of losing it. As a matter of fact we are favored by the highway department for Federal designation on account of our route being situated almost directly between the Bankhead and the Lee, both of which are Military routes. However we can't sit still and expect to retain this position, as Lamesa and other counties on the south of us and Lubbock and other towns to the north of us are very active in the promotion of routes across the state and each of them is actively cooperating with the highway officials and arranging for a better type of road.

From the most reliable information that this office is able to secure, it is the intention to cancel not less than three thousand miles of designations throughout the state, on account of duplications, that is highways that run so close to each other that they serve practically the same territory.

In addition to the duplications, the mileage is so great that they cannot be properly maintained under the present revenue.

Examination of the map will show that these three highways serve practically the same territory from Albany west and at least one of them will be canceled out. It won't be ours if we cooperate.

At a meeting of the Fort Worth-Roswell Air Line Highway Association last Thursday at Post, it was decided that committees be appointed to canvass the counties who had not voted road bonds and did not have their roads hardsurfaced, whose duties should be to canvass their voters and ascertain the sentiment toward county wide bond issues the proceeds to be used in hardsurfacing all principal roads, which in Terry county would include roads leading toward Lubbock, Lamesa and Scarsdale. Advocates of an issue in this county also believe that an arrangement should be made to include an amount to each precinct in order that a better type of lateral road could be constructed.

Now regarding the proposed bond issue, let it be understood that the chamber of commerce is not taking a stand either for or against it and the above information is just merely a report of the proceedings that were taken by the highway association.

The committees appointed, are to report their findings at a meeting of the association that is to be held at Clairmont upon the occasion of breaking dirt for construction of a paved highway through Kent county, which contract is expected to be let by the highway commission within the next few days. Kent county voted a district issue of \$200,000.00, the proceeds to be used entirely on the Air Line route. The state will match them and maybe the Government.

Several hundred acres was planted to wheat last fall in Terry county and was the first attempt ever made to sow in any acreage above chicken pasture. The drought effected it as it did all over the wheat belt but our yield compared favorably with any other in West Texas. Sixty five per cent of the soils of Terry county are adapted to wheat and other small grain.

There is considerable criticism regarding the present price received for eggs and it is admitted that it is pretty low being eight cents the dozen. However I was in a store this morning and found that sixteen cents was being paid for some of the eggs received and investigation showed that they were guaranteed fresh and infertile and had the stamp of the producer upon them. If we had a good strong poultry association and followed it's rules, there would not be any more eight cent eggs marketed in Brownfield. If I can secure interest of a sufficient number of farmers I will undertake to secure some poultry specialist's to assist in an organization of the kind.

During the past few weeks I have had visitors in the office who were interested in growing sugar cane for syrup and also some who were interested in raising sudan for seed. If

## Aesculapias Sermonizes on General Conditions

(Gorman, Texas)

Thursday morning we cranked our oliver and left home for a short tour of the counties below the cap-rock. We have waited for some weeks that we might be able to say, "Yes, there has been abundant rainfall on the Plains, and the farmers are busy putting in a crop. Instead I have been informed by each of my old friends that "they tell me that you are very dry out there, and too late to plant cotton and not much chance for feed."

Conditions are not so bad there as I here down here. People are not leaving in droves. It is still possible to plant cotton with every possibility that a poor crop can be raised, while it is still early enough for any kind of feed crop that the farmer cares to plant.

I find that rain has fallen in most places from a few miles east of Wilson to most of the country east of Stephenville. That planting is in progress from near Wilson to Snyder. That the crops are progressively advanced as you come east, look well, are clean and growing and give promise of abundant harvest. Cotton appears to be the most backward. The plant is small and much of it has not been "chopped out." Corn is in silk and tassel, in many places, and "roasting ears" can be had occasionally. There is a large acreage of feed crops as compared with last year and in Eastland and Comanche counties the peanut will take the place of cotton on most farms. They brought a good price the past season, which stimulates an increase acreage this year. This morning, Monday, clouds look heavy, and a shower has fallen, however rain is not badly needed here in the vicinity of Gorman. I visited the new oil field north of Desdemona, but there is nothing doing. In fact oil appears to have a black eye. Gasoline is 20 cents here, where it is produced and 16 cents at Meadow. Strange isn't it?

Jobs are scarce and the roads are full of hobos, seeking a lift.

I am having an enjoyable time among old friends. Have poor eats and soft beds to sleep on.

Met up with Loomis Moorhead at Stephenville who looked and acted like an orphan.

Yesterday, Sunday, the State Singers Convention met here at Gorman, and the town was full of people.

From here we will cross the country to Wichita Falls and then turn homeward.

## New Rules of the Fire Department

The city of Brownfield has repainted and numbered its fire plugs, which not only helps their appearance, but their distinctive color makes them more easily seen.

The volunteer fire force is spending much time in practice and has already succeeded in lowering the fire insurance rate \$5.10 per thousand dollars in the past two years. But the people can help lower this rate still more by reporting their fires correctly and coherently, not only giving the name of the building on fire, but it is very important that the number of the fire plug nearest it be given also. Then the fire truck can be driven directly to the plug and the hose attached before the fire has gained headway.

These few minutes saved may mean the avoidance of losing several years work, not to mention the risk of a fatality.

So learn your fire plug number; the next fire may be yours.  
(24) —Fire Chief

Nearly every part of Texas is now supplied with natural gas for fuel and plans are making to pipe Texas gas to Denver and Kansas City.

we can secure a sufficient number of farmers who will plant either, this office can secure advance contracts for the output at an agreed price. The big trouble in marketing anything except corn and cotton is in not knowing just what you have to sell. We might raise a few cars of watermelons, but we should know the quantity before it was ready to come on the market.

## The Rain—the Glorious Rain Has Come at Last

Well, that rain has finally come—a real million dollar rain. Half of the million dollars being charged to the beneficial effect it will have upon crop conditions, and the other half in performing a "lifting" process on the faces of the business and professional men of the town, and the farmers throughout the trade territory of Brownfield. Of course it was light in some sections of the county, but with what they received the first of last week, they have plenty to start farm operations, and maybe the next one, due next week, will hit them in the big middle and all will wear a smile as broad as the first quarter of the moon. North of Brownfield in the Harmony, Needmore, Challis and Meadow sections, most of them did not get more than a half inch, but a full inch fell in Brownfield and it was reported heavier south. And the good old sandy loam soaked it up like a sponge—every drop.

Now you are probably inquiring where we got the information about the rain next week. Well, we got it from the same source we got it concerning the rain this week and last, from our old friend and moon profit, M. L. Crawford, and we have been watching his predictions for the past three years, and he has come nearer getting rains for us right on the dot than all the others such as Hicks, DeVoe, Foster, etc., all combined, and he don't get a penny for his work so far as we know. We have never even observed anyone offering him a cold drink or cigar. He not only states that we are due another rain next week, but that we will get two good ones in July, which augurs of a fine crop yet for this section.

Most of our farmers who had dry planted will now have their crops all up in the next few days and ready for cultivation, but those who stood still as if waiting for the world to end will have to plant yet. What if the business man of the towns were to close their doors just because it gets dry? How long would they last. But they just have to keep hammering away, wet or dry.

But the farmers of Terry and adjoining counties were not the only ones that were singing or humming "The Terry County Blues." We had a bunch of business men right here in town that were joining fervently in on the chorus, and they probably caused some to abandon their land and hike for the sticks, when a little encouragement might have kept them right here where they will or can make more from now on and easier than where they went perhaps. But we look for many of these sojourners to return now to the land of plenty and pitch crops, as many of them left their families here and left for the oil and harvest fields.

Sometimes we all act like a lot of children in swaddling clothes instead of grown up and intelligent beings. When it gets either to wet or dry; two hot or cold, we take the "rings and twists" and imagine that it is going to remain that way forever.

As an illustration of this point and to show you how easily people forget, a business man said to us Monday "this is the first rain we have had in about a year, isn't it." He had so soon forgotten that we swore and fumed all the fall because the farmers could not get in their fields more than two days in the week to harvest their crops. He had forgotten that during Christmas week we waded snow and slush here in the streets until we were disgusted, and that at least two big rains in January delayed corn harvesting until February, when it finally cleared up.

Human being are supposed to be intelligent, but sometimes they act more like a bunch of geese.

Later: Another good rain amounting to from one-half to three-quarter inches fell here Wednesday night. We can't say how much it rained anywhere else, or how much territory it covered at this time, but it was a very wide cloud as it approached. It, like the others, fell slow and all soaked into the ground.

## BARBERS NOTICE

Beginning June 25th the undersigned Barber Shops will close at 9 o'clock on Saturday night:  
Bobbett Barber Shop  
City Barber Shop  
Sanitary Barber Shop  
The Tonsorial Shop

A match may be down but not out.

## Two Local Banks Are In Fine Condition

The two local banks not having had a statement called for in some time by the comptroller and banking commission, and being in fine shape, decided last week to have some condensed statements printed and too distribute them to their customers, and for fear you did not get one of these statements, they are having them run in their regular spaces in the Herald this week, and we want you to go over them carefully, and we know you will be proud of the condition of your home banks.

Comparing their statements with their statements at the same time a year ago, we find that loans have been greatly reduced, showing a good substantial liquidation of accounts, even if the farmers did not get much for their cotton. The big corn crop, however helped out wonderfully in taking care of notes at the banks.

The money on deposit is not quite as much perhaps as last year, but there was some courthouse bond accounts in one of them and some of the sewer bond money in the other, but individual deposits is practically the same. Neither bank has a dollar of money borrowed up to this time.

We find that the combined resources of the two banks total the sum of \$606,995.88, which would be considered good in some sections in cities and towns of ten thousand people. The combined deposits of the two banks total \$485,998.94, or nearly a half million dollars, showing a healthy condition not only of the banks but of this section.

Their combined cash on hand and with reserve exchanges total a fraction more than two hundred thousand dollars. Some money when you put your thinking cap to work.

The boys at the head of these institutions, while conservative, are as accommodating as good sound banking policies will permit, and that is the reason they are showing such a good record today. One reason all of us should rally to their support and to keep all our funds at home, is because they are our neighbors, and prove friends when we are in need. If we can find no reason for patronizing in the above, then we can all agree that we can patronize them because they are safe and sound financially. The Herald for one is real proud of the home banking institutions.

## Queer Hybred Found In Terry County Tank

We cannot say that we have been "seeing things" any more recently than formerly, neither are we accusing any of our neighbors of "seeing things" and trying to entice us to publicly sustain them, but Chris. Quante showed us some reptiles, or fish or combination of the two recently that he obtained in a tank on his father-in-law's, the Jim Huchabee farm that cooked our meat, and has all who have seen them guessing. In fact everyone who has seen them have ventured a guess, but all guess differently, and for that reason we are the more confused until we seriously doubt that our own guess was right.

The four specimen in question are some four inches in length; have a head and tail not unlike a catfish, but no gills. The have four fins, two about where they would be on a fish and two back where a reptile usually has his hind legs, and these fins are shapped somewhat like illformed legs.

Some here have called them water-dogs, but water-dogs have well developed fore and hind legs, as well as the regulation reptile tail. Our idea is that they are a hybrid of the catfish and water-dog. What is your guess?

## MARRIED

Mr. Gould Winn and Miss Frances Jackson, of Wellman were married Saturday morning at the local Methodist parsonage, by Rev. J. G. Thomas. They left immediately for Lubbock, accompanied by Mr. and Mrs. Will Schroeder, of Wellman, and Mrs. Annie Haley, of this city. Sunday a nice dinner was prepared for them at the home of Mrs. Winn's parents.

Texas motorists will pay about seventeen million dollars in gasoline taxes in 1927.

## Herald Is Presented With Certified Eggs

Mr. and Mrs. R. M. Goodpasture, who live in the extreme southern part of the city called Saturday and presented the Herald with two dozen of his certified and guaranteed eggs, and so far, every one of them have been good, and we wish here to thank them for the treat, and also to wish that more of our farmers would do likewise. All the cost is simply a small rubber stamp.

To begin with, every egg looks exactly alike as to size and color, and in this case, all the eggs were white and spotlessly clean. After the eggs are cleaned and dried, Mr. Goodpasture stamps them with his name and also that they are infertile and are certified to be good. Any egg from this ranch will be replaced if found to be unwholesome.

Another citizen of the town told us recently that a friend of his bought a dozen eggs recently from a local grocery store, and out of the dozen only five were fit for food. Do you wonder there is no demand for eggs, and that they are hardly saleable? To merely break a few of such eggs is to ruin ones appetite for a meal. A timid appetite will revolt at such a sight, and they become disgusted with eggs in general, and consumption of them falls off in summer to such an extent as to lower the price of them greatly. Wholesome eggs are the very best of food, but bad eggs are the worst. Well, the groceryman was not to blame. He was merely selling what he bought in good faith.

Every manufacturer of food has long since learned that the more attractively he puts up his products, and the cleaner and more sanitary they appear, the larger his sale. One no longer sees bulk crackers in any modern grocery for the cat to bed up in, but they are put up in air tight sealed packages. Even the fresh fruits are now wrapped, and we wonder why the farmer does not learn a lesson from them and market his eggs not only in a clean condition but stand behind his products in a way to get a better price. There isn't 50 per cent of the butter put on the market here that is fit for human consumption. The makers wait until their cream is sour or spoiled to churn, and the butter tastes like it's rotten instead of being sweet and pleasing to the taste. Some of the farm ladies have learned how to handle butter, however, and some of the stores handle their butter, and their town customers have learned where it is to be had, and these ladies have a ready sale for their butter the year round, while others are go begging for a market. Indeed, these customers will take no substitute, but wait until they are supplied from the old reliable source. Anybody can make good butter if they would only try.

## 11 Cars Hogs Shipped In Last 3 Months

W. R. Lovelace informed us this week that he had shipped 9 cars and Mr. Quinn 2 cars of fat hogs from the Brownfield pens in the past three months. Mr. Lovelace further said that if a man had told him at the beginning of that time that there was over two cars of hogs all told in the county, he would not have believed it. Indeed, the Chamber of Commerce was trying to make up a car of hogs for breeding hogs back about that time, and never did get anywhere with it, like Mr. Lovelace and many other town people believing that there were no hogs in the county. The very fact that the county was pretty well supplied is found to be the reason that farmers did not take to the ship-in idea.

Mr. Lovelace said that he had not only shipped out many more cars than he expected to find, but that he never saw the like of pigs in the county. There are a bunch of them on almost every farm, he said, and by fall there will be several cars a week to be shipped from here if these pigs do well, which will bring in hundreds of dollars of outside money.

Estimating each of the 11 cars that he and Mr. Quinn have shipped at \$1,500, we found that some \$16,000 worth of hogs have been shipped out of the Brownfield pens alone in the past three months. And sixteen thousand dollars is not to be sneezed at these days.

## Small Twister Visits Challis Section Sunday

Those who did not go to church Sunday, or were out of doors saw perhaps the second twister ever witnessed in Terry county. Old timers will remember a small twister that passed over the railroad just this side of Meadow just after the railroad was completed, and before there was anything but one store to Meadow. It tore down the right-of-way fence and wrecked two or three telephone poles along the right-of-way and then seemed to have played out.

The one Sunday seemed to be moving toward Challis school house, and the folks gathered there for Sunday School quickly disbanded and got out of its path. It was about 100 yards wide, and played out in Uncle Billie Howard's filed about a mile and a half west of Challis. It appeared more like a huge whirl-wind than a cyclone, but observers said it came out of a small funnel-shaped cloud.

Dalton Lewis was among those who drove out there said where it hit the grass land, it swept it bare of all loose dirt, and seemed to have actually burned the grass, and in fields it took up the dirt just as deep as it had been plowed this year. Where it hit a fence, it seemed to have clipped the wire like nippers, and pulled up or wrung off the posts. Some people saw it from Lubbock, and came down to investigate what it had done.

Challis is about six or seven miles northeast of Brownfield.

## P. J. Nettles Accidently Killed Last Thursday

The town and community was very greatly shocked last Thursday afternoon when it became known here that P. J. (Price) Nettles, son of one of the oldest families in the county had been killed while repairing a windmill. A number of Brownfield people went up, including Dr. Treadaway, county health officer and Sheriff F. M. Ellington, as we understand an inquest had to be held.

It seems that he and another man were drawing the piping from the well with a large block and tackle, when the wire that held the tackle to the top of the tower gave way, and the weight of the block and tackle, weighing perhaps seventy-five pounds together with the momentum given it by the strain, fell and hit him on the back of the head. He was perhaps dead by the time he hit the ground.

The body was laid to rest in the Meadow cemetery. Besides a father, he has several brothers and sisters, a wife and some small children to mourn his untimely passing.

## A. B. Cook & Son Moving to Big Spring

We understand that a deal was consummated Saturday night whereby Mr. M. V. Brownfield became owner of the grocery stock belonging to A. B. Cook & Son, and they will probably be left where they are until sold out at retail or closed out to some other merchant, as we understand that Mr. Brownfield has no idea just now of conducting a retail grocery business.

Messrs. A. B. Cook & Son have rented a good location in Big Spring and are preparing to truck them over to that city as soon as possible, at which place they will handle dry goods and ready to wear only.

This firm has been doing business in Brownfield for several years and have built up a nice business, but on account of the fact that Big Spring is now enjoying an oil trade, these gentlemen figure that business will be better there at least for the present. Their many customers and friends have regret to see them go.

Note: Since the above was written, we understand that the deal for the groceries failed for some reason to go through, and Mr. A. B. Cook will remain here for the time being to clean them out.

## TACT

"You had no business to kiss me, Sammie Jan." "It was not a business, Marjorie, it was a pleasure." California Herald, \$1.00 per year.

### THE MYSTERY

"Taint me," says the farmer,  
"Who's getting all the stuff."  
"Taint me," says the packer,  
"I get just enough  
To pay a small profit,  
As far as can be."  
And all of them chorus  
Together, "Taint me."  
"Taint me," says the tanner,  
"Who get the high price  
For high shoes and low ones,  
For slippers and ties."  
"Taint me," says the rancher,  
"I live and that's all."  
"Taint me," says the dealer,  
"My profits are small."

"Taint me," says the canner,  
"My margin's the same."  
"Taint me," says the huckster,  
"who's bracing the game."  
"Taint me," says the gardner,  
"I'm poor all the time."  
"Taint me," says the grocer,  
"I ain't seen a dime."  
It's surely a puzzle  
To know where it goes;  
No maker or seller  
Or any of those  
Partake of high prices,  
So they all agree;  
And I'm a consumer,  
I'm certain "Taint me."  
—J. W. Foley in New York Times.

# Have you ever made good on one job .. for 39 years?

**T**HE extra mileage you get from Dunlop tires starts with the fact that Dunlop has had thirty-nine years of tire-building experience—more than any other tire-maker.

Each part of each Dunlop is built right. Dunlop owns its own cotton mills to spin selected long-fibre cotton into the special Dunlop cable-twist cords.

These cords mean extra strength—an added factor of safety against constant load and pounding of roads—longer life and greater mileage.

They mean extra "stretch"—so the tire carcass will give under blows, and come back to its original shape without the slightest injury.

Every Dunlop you buy has extra miles built into it because Dunlop knows each part of its job. That is why we recommend you put Dunlops on your car.

### DIPLOMA DIVIDENDS HANDED OUT AGAIN

Again the day of high school commencement has passed and gone and a new army of youths have stepped out into the world with a ribbon-bound diploma in one hand and a world-wide gesture in the other. The facts of the matter are that these young folks are going to change the world greatly in spite of the traditional laugh from the Smart Alecks as to their intentions along that line.

Here are a few facts, based on careful surveys as to the cash value of education—common school, high school and college: A high school education is worth twice as much as a common school education, according to a survey in Tomkins county, New York, and a college education is worth two and one-half times as much as the district school course, and a third more than the high school Texas figures that every day spent at school is worth \$9, a high school graduate's earnings being compared to an uneducated laborer's to get the value of schooling. Georgia, Illinois, Iowa, Indiana, Kansas and Wisconsin surveys show similar trends. A high school education permitted the farmers to own their own homes three years sooner than those farmers with only common school education, it was found in the latter state.

More and more emphasis is being put on education, and more boys and girls are going through high schools before taking up their life work. The trend continues: on up into the colleges, and, especially in the science and engineering courses, is attracting an increasing percentage of the ambitious forward-thinking youth of the land. Less hand and back labor and more brain management of machinery is the order of the day.

These young folks who are stepping up from high school to college and our business and commercial world deserve our highest respect, and at least an effort on our part to understand their viewpoint. They are starting with a great deal better equipment than our generation started with, just as we started with a better equipment for tackling the world than did our parents. Some will fail, perhaps, but the average will raise the average of this community if we can furnish them sufficient opportunity for advancement.

### A NEWSPAPERMAN'S QUALIFICATIONS

A young man asked our opinion about entering the newspaper field. We answered this wise:

If he can listen with a smile to tiresome things he's heard oftentimes before; if he can refuse to do what three or four people ask him to do without making them mad; if he can write in a way to make people laugh when he feels like cussin', or in a way to make them weep when he feels like cracking his heels together and laughing out loud; if he can remain silent when he feels like he'll burst wide open if he does not talk; if he can argue without getting mad; if he can refuse a woman's request for free publicity without making all the members of her set mad at the paper; if he can react on the loss of a good news story and catch a better one on the rebound; if he can explain a typographical error without using up more than 30 minutes' time; if he can concentrate and write intelligent copy while three different conversations are going on around him, several typewriters clicking away and the telephone ringing and the subdued hum of the presses in the next room drumming on his ears; if he can explain why Mrs. Jones' poetry on "The Sylvan Depth of October Woods" did not appear in the paper without her husband stopping his advertising; if he can make a four line story and spread it to a half column, or take a two-column story and condense it to two paragraphs; if he can read proofs without overlooking an error; or write headlines without murdering the King's English; if he has a nose for news and an itch for writing, and an inclination to work 15 hours a day, then we'd advise him to get in the game.—Mineral Wells Index.

### LARGEST EXPORT ORDER

The other day the largest export order for motor cars ever placed by telephone was consummated by an automobile company located at South Bend, Ind. Seated at his desk, the vice-president of the company talked over the new trans-Atlantic radio telephone with London and arranged for the delivery of 1,000 cars. This represented nearly \$1,500,000 worth of business.

Exports from Texas in 1926 amounted to \$648,991,954. This was exceeded only by New York. The next State was Pennsylvania with about half the value of exports as compared to Texas.

Sulphur Springs—Construction is now under way by the Lone Star Gas Company to bring natural gas to this city.

### Politics in America Got Napoleon's "Goat"

Napoleon had an unusually deep interest in world politics, extending even to the internal politics of a remote section of the United States. It was revealed when Col. Ducau K. MacRae of North Carolina went to Paris as consul general more than a century ago. Napoleon was puzzled as to why the people in one part of a country embraced one party, while their neighbors held opposing views. In some manner he had learned that Edgecombe county, in North Carolina, was Democratic, while Pitt county embraced the Whig faith. Informed that Colonel MacRae was from that state, he said to his courtiers:

"Now, I will find out the riddle of North Carolina politics." So he gave Colonel MacRae an extraordinary welcome and said to him:

"I understand that the same river flows through the counties of Edgecombe and Pitt in North Carolina, that the people of both counties till the soil and own slaves. I am told that practically all the people in Edgecombe county belong to the Democratic party, while most of the people of Pitt are Whigs. Why is it?"

Any other person than Colonel MacRae would have been flabbergasted, remarks the Raleigh News and Observer, but not so the eloquent colonel, known as North Carolina's first orator. Nobody knows the answer he made, but he was quick to give a reason that satisfied the monarch.

### Asbestos Long Known but Little Employed

People of modern time are engaged in a ceaseless search for ways to improve living conditions. Safety, comfort and reduction of expense rank among the principal things to be considered. Asbestos, a material known for centuries but put to use only a comparatively short time ago, has done as much or more toward the realization of these three fundamentals than any other one thing in its class. Traces of its use have been found in ancient China, in Persia, by the early Greeks and Romans, and later, in about the sixteenth century, in the island of Guam, now a possession of the United States. The sudden emergence of asbestos, from the long period in which it was almost entirely the subject of myths and legends, or treated merely as a costly curio, into one of the world's most important minerals and industry's most important aids, is remarkable. Even electricity did not have quite so sudden a transformation.

### British Army Club

The Union Jack club is a national institution of Great Britain where soldiers, sailors and airmen can go when on leave or passing through London, a place where they may deposit their kits and valuables, where they may obtain at moderate charges good meals and comfortable bedrooms to themselves and where they find the usual amenities of a club, including library and writing room, billiard room, baths, barber shop and also a club shop in which articles of everyday use and almost everything that service men require may be purchased. The Union Jack club was erected by public subscription as a national memorial to those who had fallen in the South African war and other campaigns, and was opened on July 1, 1907, by his late majesty, King Edward VII.

### Trust to Pictures

In these days of hustle and bustle, hyper-activity and constant "go," there is one thing that every one can do to neutralize to some extent the restlessness that has invaded our life. That one thing is to surround oneself with beautiful and restful pictures.

Pictures take the mind off the worries, petty details that are so irritating to the nervous system. A good-natured Jolly Cavalier to look down on us understandingly from the wall, or a lovely Madonna to fill us with peace and contentment are like real companions and friends, and have an advantage that even the best friends do not have; they make no demands and expect no favors; they are always equally dependable and ever ready to serve.

### Genius and Freedom

Genius can only breathe freely in an atmosphere of freedom. Persons of genius are more individual than other people, less capable, consequently, of fitting themselves, without hurtful compression, into any of the small number of molds society provides in order to save its members the trouble of forming their own character. If, from timidity, they consent to be forced into one of these molds, society will be little the better for their genius. If they are of strong character and break their fetters, they become a mark for the society which has not succeeded in reducing them to commonplace, to be pointed out as erratic, such as if one should complain of the Niagara for not flowing smoothly like a Dutch canal.—John Stuart Mill.

### AS LABOR SEES BANKS

Vast sums of money are lost each year by wage-earners through investments hastily entered into. With the confidence of the wage-earners, banks will be enabled to more accurately advise such investors and thus save money which might otherwise be lost by unwise speculation.—William Green, President American Federation of Labor.

"ALL KINDS OF BUILDING MATERIAL"

## VIBRATION!

Vibration shakes the battery to pieces. The plates are made of lead and lead peroxide in such form as to be more fragile than plain sheet lead. The incessant shaking of the battery while the car is being driven has the effect of not only wearing away the delicate parts but loosening of the active materials from the grid structure of the plates and making them fall to the bottom of the container. Excessive wear and tear results from unnecessary shaking and bumping when the battery is allowed to remain loose in the battery carrier.

### BUILD FOR FIRE SAFETY URGES OUR FIRE CHIEF

In review measures now being taken by the International Association of Fire Chiefs to combat the appalling loss of life and property by fire in the United States, Fire Chief E. D. Jones points out that the most effective way to reduce fire danger is to give such buildings as we erect the highest degree of incombustibility.

"It would be impracticable, of course, to build an all-fireproof structure," Chief Jones continued. "In a residence of this nature the beds would have to have steel or concrete slabs and furniture would have to be of similar nature. There could be no draperies, rugs, linen or clothing. But it never is impracticable to construct a building as fire-safe as is compatible with comfort."

"Take the average wood frame house as an example. When the wood frame is covered with wood sheathing of wood, and this in turn is covered with wood siding; and with the lath under the plaster and the shingles on the roof are of wood, you have a highly combustible, conflagration-breeding type of construction—one that would put surrounding structures in jeopardy if a fire should break out, particularly if there was a high wind blowing. For a high wind would carry embers to adjoining roofs and scatter sparks far and wide."

before wood frame houses will be altogether abandoned, particularly since the development of modern building materials has resulted in a protected type of wood construction which retains all the good features of the all-wood house.

"In building such a fire-protected wood house the wood frame is erected in the regular manner. But instead of a sheathing of wood being applied over the frame, an incombustible type of sheathing is now used. This protects the frame from the outside. To protect it from the inside a metal or rock lath is being used in place of wood lath. With a roof covering of asbestos or other fire-resisting material, a house so built possesses as high a degree of protection from fire as is possible in a frame structure."

The Chief feels that preventing fires is just as important a part of the fire department's work as fighting fires, and along with the thousands of other fire chiefs throughout the country, he is actively cooperating with the International Association of fire chiefs in its great "1927 Fire Prevention Year" movement, which, it is hoped will acquaint the public with means for reducing the annual fire toll.

W. B. Yeager, district manager of the Higginbotham-Bartlett Co., was a business caller in Brownfield the last part of the week.

"But it is probably a long way off."

**COUNTY TREASURER'S QUARTERLY REPORT**

In the matter of County Finances, in the hands of W. Y. Pippin, Treasurer of Terry County, Texas.

Commissioners' Court of Terry County, Texas, in regular session, of the June term, 1927.

We, the undersigned, as County Commissioners within and for said Terry County, and the Hon. H. R. Winston, County Judge, Terry County, constituting the entire Commissioners Court of said County, and each of us, do hereby certify that on this, the 13th day of June, A.D. 1927, at a regular term of our said Court, we have compared and examined the report of W. Y. Pippin, Treasurer of said Terry County, Texas, for the period beginning on the 1st day of Feb. A.D. 1927, and ending on the 31st day of April A.D. 1927, and upon finding that his report was correct have caused an order to be entered upon the minutes of the Commissioners' Court of said County, stating the approval of said Treasurer's Report by our said court, which said order recites separately the amount received and paid out of each fund by said Treasurer since his last report to this Court, and for and during the time covered by his present report, and the balance of each fund remaining in said Treasurer's hands on the said 31st day of April A.D. 1927, and have ordered the proper credits to be made in the accounts of said County Treasurer, in accordance with said order as required by Articles 1448-1449-1450 and 1451, Chapter 1, Title 29 of the Revised Statutes of Texas.

And we, and each of us, further certify that we have actually and fully inspected and counted all the actual cash and assets in the hands of said Treasurer belonging to Terry County at the close of the examination of said Treasurer's Report, on this the 13th day of June, A. D. 1927, and find the same to be as follows, to-wit:

JURY FUND		Dr.	Cr.

**BONDED INDEBTEDNESS**

The bonded indebtedness of said County we find to be as follows, to-wit:

Court House and Jail Bonds	\$68,000.00
Court House and Jail Warrants	59,394.78
Outstanding Road Warrants	20,000.00
Moline George Co., of Texas	3,500.00
Texas Bridge Co., of Texas	3,000.00
Galeon Road Machine Co., of Texas	2,734.00
Lewis Patten Company	4,000.00
<b>Total</b>	<b>\$160,628.78</b>

Witness our hands officially, this 13th day of June, A. D. 1927

H. R. Winston, County Judge.  
 W. E. Harred, Com. Pre. No. 1.  
 W. F. Stewart, Com. Pre. No. 2.  
 J. W. Lasiter, Com. Pre. No. 3.  
 W. H. Black, Com. Pre. No. 4.

Sworn to and subscribed before me by H. R. Winston, County Judge, and W. E. Harred and W. F. Stewart and J. W. Lasiter and W. H. Black, County Commissioners of Terry County, each respectively, on this the 13th day of June, A. D. 1927

Jay Barret, Clerk,  
 County Court, Terry County, Texas.

**TECH COLLEGE ISSUES INTERESTING TEXTILE BOOK**

Lubbock, June 13.—A booklet telling of the textile department of the Texas Technological College recently issued has caused widespread interest. Among hundreds of other inquiries from all over the country and abroad, a young textile engineer in a cotton mill in China has written for one of the booklets and for information about Texas Tech.

Seventy thousand acres are being planted to grapefruit and grapes by one company in the vicinity of Raymondville in the lower Rio Grande Valley.

**Early Peoples Know of Possibilities of Iron**

The peoples of the Near East were among the earliest manufacturers of iron, according to Dr. J. Newton Friend in an address before the members of the Royal Institution, London.

In 1300 B. C. the Hittites were using iron weapons in their numerous wars, and among the treasures of early history preserved to posterity is a letter thought to have been addressed to Rameses II of Egypt from the Hittite king, saying that he is sending with the communication an iron dagger.

The Romans were skilled metallurgists with considerable knowledge of how to handle iron ores. Virgil's Aeneid, written around 40 B. C., contains an account of a smithy in full blast, and Pliny in his "Natural History," which was brought out in 77 A. D., shows an equal familiarity with the working of the metal. An iron ring recently unearthed from a Roman site was evidently made by soldering together the ends of a bent strip of iron with some sort of copper alloy.

Cast iron, said Doctor Friend, was first known in Sussex in 1350 and soon became fairly common.

furnished by a bank in Atlanta. A banker-farmer alfalfa demonstration was held at the college and attended by 250 bankers and farmers. Alfalfa acreage has increased from 1,800 to 5,000, the demonstration being credited with 50 per cent of this increase. This year the state has produced 12,000,000 more bushels of corn than last year, has sold 50 cars of truck, \$2,000,000 worth of pecans, and has produced 150,000,000 pounds of meat and enough corn and hay for its own use.

**Penny Not Worth While**

At Times square a mad crowd waited for the long-distance buses. Other crowds pushed by in a steady stream, yet above the traffic noises came the clink of a dropped coin. These passing looked down, alert, curious, until a single penny whirled into sight, spun around and then stopped to the sidewalk. No one picked it up. It was tramped on, pushed and started rolling again. Many looked, but none stopped until a chubby little fellow, holding tight to his mother's hand, spied it.

"Mother, mother!" he cried in excitement. "I see my penny! Stop—let me—let me pick it up!"

"Come, come," chided the mother, impatiently, as she jerked him along. "It's only a penny. Let it alone. You'll get your gloves dirty, dear."

New York Times.

When the pumpkins began to turn yellow, plans were laid for a great community exhibit. Besides the poultry display, farm produce exhibits from the surrounding country were entered. Altogether it made an impressive exhibit, bringing home the lesson to Point Marion people that there were great undeveloped opportunities within their own door yards which they had overlooked.

The annual exhibit will be continued in the future by the bank. A horse show is sponsored, better seed corn and seed potatoes are made available to the farmers for planting and the bank will continue to build agricultural in the community as a sound basis on which to work. "It will probably be some time before we shall see large fruits of our endeavors," the banker says, "but we are looking ahead to fifteen years."

**THE NEW MENACE**

Hitch-hiking its way towards the nation's corncrib, the European cornborer is threatening to destroy crops to the value of billions of dollars and chase skyward the cost of production. If it worms its way into the Wabash and Mississippi Valleys, it can readily float downstream, spread out and become more difficult to control. Proper cooperation of all concerned will, no doubt, enable us to continue to grow corn profitably.

Agricultural Bulletin, American Bankers Association.

A corn and apple show is to be annual feature at a bank in Baltimore County, Maryland. Another bank has been able to get his county "thinking corn" over 500 farm-planting improved corn. Many other bankers in the state are giving me support and funds to this work.

**Grand Canyon Yields Pre-Dinosaur Fossils**

New finds of footprints of reptiles left in soft sand at least 25,000,000 years ago have been made in sandstone 1,800 feet down from the rim of the Grand canyon. This is the greatest depth in the canyon at which such prints have been found.

The level at which the fossil plants and reptiles have been found belongs to the latter part of the carboniferous period, or the time when the great coal beds of the world were being formed, and was a few million years before the famous reign of the dinosaurs.

One specimen shows a row of tracks very much like mouse tracks impressed in a small slab of red stone, and in among the tiny footprints is a wavy line which represents the track of the animal's tail. Other exhibits show prints larger than a man's hand, indicating that some of the reptilian creatures of this age may have become as large as crocodiles. No bones of these creatures have been found in the Grand canyon, though some bones of reptiles making similar tracks have been found elsewhere.—New York World.

**PEDDLER'S JUBILEE AT LUBBOCK JUNE 25TH**

Lubbock, June 13.—June 25 is the date set for the sixth annual Peddler's Jubilee to be held here and the "Knights of the Grip" will gather from all corners of the Southwest for the annual stag party.

South Plains Chamber of Commerce Secretaries will join with the Lubbock Chamber of Commerce in extending a welcome to the visiting traveling men to this section.

Invitations have been issued to all chamber of commerce secretaries to attend and help serve as host to the Peddlers. Hotel men over the south west have been invited to attend the Jubilee as guests, and the majority of South Plains Hostelry managers are expected to be here.

The Peddlers will register and get acquainted Saturday morning. A mammoth parade and ball game will take the afternoon and a big "feed" and the annual session of the R. O. R. E., fraternal order of the Peddlers will be the program of the evening.

**THE PUDDLE DUCK**

Said the puddle duck to the little white hen,  
 "I've not sold an egg since I don't know when;  
 Yet I feel quite sure that the eggs I lay  
 Are as good as a hen's egg any day."  
 Said the little white hen to the puddle duck,  
 "You think perhaps you're out of luck.  
 Your eggs are as good, I'll freely admit,  
 And larger, too, by quite a bit.  
 "But, my dear Mrs. Duck, I'll give you a tip;  
 The whole fault lies with your sales-manship.  
 You produce an egg and without a quack  
 To your swimming pool you waddle back.  
 "I tell the world to let it know,  
 So I cackle around for an hour or so,  
 There's a good demand for the egg I lay,  
 For I make my advertising pay."  
 Manchester Journal.

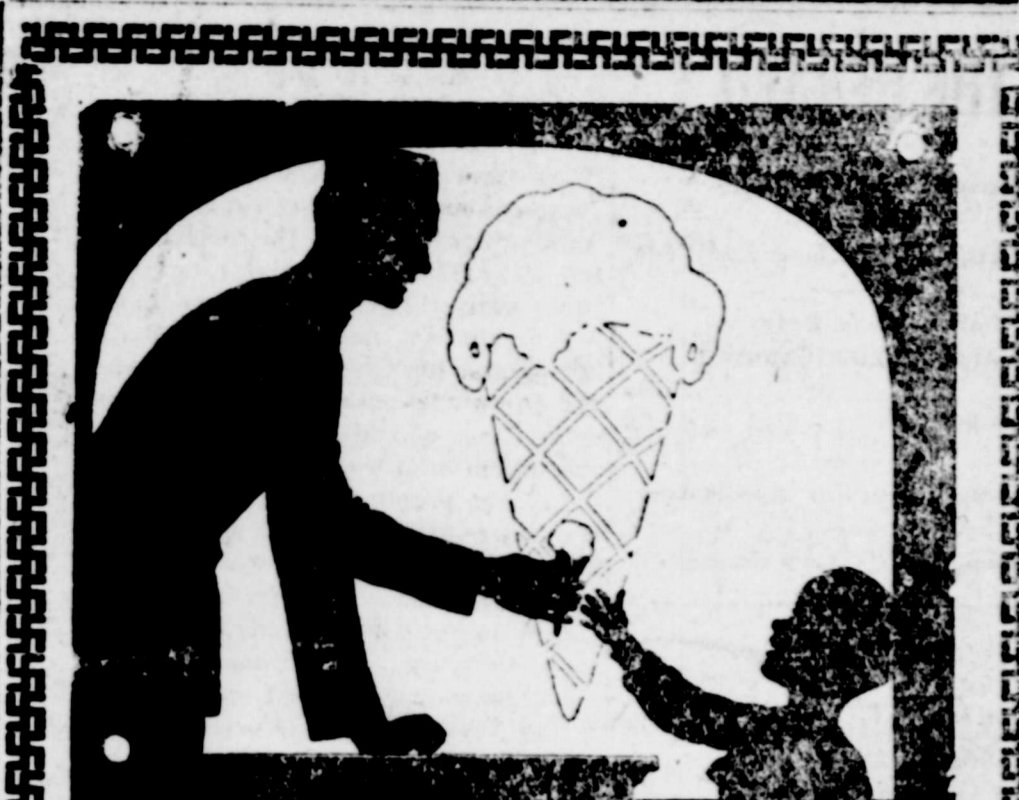

**TECH COLLEGE HAS OVER 500 SUMMER STUDENTS**

Lubbock, June 13.—More than 500 students have enrolled in the second summer session at Texas Technological College.

Those coming from lower altitudes almost shivered on the opening days with a mean temperature at Lubbock of 70 for the period. The enrollment will double that of last summer.

**Eloquence in Hiding**

Eloquence may be found in conversations and in the areas of writings; it is rarely found when looked for, and sometimes discovered where it is least expected.—La Bruyere.

**AVERY Sled and Two-Row Listed Corn Cultivators**

**Give a good crop a good start**

When your listed corn is young, is the time to lay a foundation for profitable growth. Careful cultivation at this time brings a generous reward.

Listed corn farmers who work their corn through the early stages with Avery Sled and Two-Row Cultivator, bring down to the young crop exactly the required amount of finely pulverized soil and give their crop the best possible start. They do the most for the crop, in the easiest and best way, when good care is most needed.

In designing the Avery Sled Cultivator, which runs in the furrow outside the row, every essential has been provided for doing the work easily and accurately. The Avery Two-Row

Listed Corn Cultivator offers a broader development of the same principles, but due to the exclusive Avery equipment and other features, it cultivates two rows with the same ease and accuracy as does the single-row machine.

Avery Sled and Two-Row Cultivators bear the unmistakable quality characteristics of all Avery tools. Because they do better work and last longer, they are the most economical in the end to buy. They are built in America's finest implement factory—to meet a need that springs direct from the soil—by men inspired by 100 years of farming-building leadership.

Ask for the details. We will gladly give you all the facts upon request.

There is a full line of famous Avery mowing, raking and tractor plows, tillage implements, and Champion harvesting and haying machines.

Official paper of Terry County.

Again we kindly ask the correspondents to get their articles in by Tuesday each week as we cannot use them later as we are making up, correcting, etc., Wednesday afternoon for press Thursday, and to carry the items over a week ruins their news value.

The supreme court has held that while we have "freedom of speech" written in our constitution, that fact does not mean that it carries the rite for radicals to make public or private speeches calculated to incite rebellion against this government, or to cause riots that may endanger life and limb. They thereby upheld the laws passed by a number of States to forbid red speeches.

Gov. Dan Moody has changed none from the position he took while district attorney of Williamson county. He at that time undertook and did punish a bunch of men for flogging another man, and he has recently volunteered aid of a Texas Ranger or two in Harrison county in running down the perpetrators of a flogging party in that county. He is still Dan Moody, the law enforcing, red-headed district attorney even in the governor's mansion. They want easily get by with many whipping stunts as long as he remains head of affairs in Texas.

Are newspapers who belong to and pay dues in the West Texas Chamber of Commerce, and get a copy of the West Texas Today, just the same as any other members, expected to then furnish a copy of their paper gratis to the organization? So it would seem from a notice we received this week. Do they ask the merchant members of the organization to put up any of their goods outside of the ten iron men per year? We have never heard of it. The Herald is for sale at \$1.50 per year and if the headquarters at Stamford want it that much, they know where to get it at that price.

Of all the quarrels the family quarrel seems to be the worst. Of all the strife, civil strife seems to be the hardest to overcome. It took two united wars, the Spanish-American and the World War to make the North and South forget their bitter Civil War, covering a period of 50 years of putting at each other. On the other hand, we have forgiven our

enemies of nine years ago, and they seem to be as friendly as kittens with us, judging from the reception the German people gave our Atlantic fliers recently. But for the past few years the North has been making its trade excursions into the South and the South has been busy repaying those calls. Even now Texas business men and newspaper men, accompanied by Gov. Dan Moody are off on an excursion of good will covering most of the principal cities of the north and northeast, and they have been promised a royal reception wherever they go. Much of this hatred and strife perhaps was kept up by the newspapers of both sides of the Mason and Dixon line as long as they were owned and managed by the older generation, but only recently the Georgia Press Association took ship at Savannah, Ga., instead of holding their meeting in that state, and called for Boston where they were received with open arms by the Massachusetts and Maine newspaper folks, including the Governor of the former State, who had his picture "took" along with a bevy of the Georgia "peaches" who accompanied the Georgia excursionists. Such things can have no other effect than once more seal the ties of kinship and blood of the nation into one inseparable union purchased by the blood of the Revolutionary fathers. Even the dialects are not so noticeable now, for with the automobile came more traveling, and the Southern drawl and the Northern twang has melted into one universal speech.

### THIS WOULD ALSO APPLY TO TERRY COUNTY FOLKS

Lubbock county farmers produce a sufficient quantity of poultry and poultry products, but because of the quality, they have never received an adequate return. There is only one reason for this, and it is within the power of poultry growers to correct the evil—they can and must produce a better grade of poultry and poultry products.

There are a few people—yes, lots of them, who insist that a hen is a hen, and one is as good as another. A hen is a hen, alright, but there are good hens, and hens not so good. It costs no more to feed a standard bred hen than it does a mongrel and she will net a much larger annual profit.

Lubbock county farmers are now selling eggs at about 10 cents a dozen. Dawson county farmers get 19c for theirs. Why the difference? Well, that is easy to explain—Dawson county farmers produce uniform infertile eggs—eggs that are better eggs; eggs that are clean, are guaranteed to be fresh and in good condition. Lubbock county farmers merely sell eggs.

There are a few Lubbock farmers who produce good infertile eggs, and if they have to deliver them over the city to the various individual buyers, they get a fair price for them, but if they are forced to sell them on the open market they must suffer—they get just the same price the fellow does who sells a mixture of good, bad and indifferent eggs.

Lubbock poultry growers should organize an infertile egg club, and every member who meets the requirements may expect a fair price for his eggs. People do not mind paying 25c for fresh eggs, but they kick like thunder when they are asked

ed to pay 10c a dozen for rotten ones. An egg club will double the summer profits without any cost to the producer other than a few cents for a rubber stamp. Mr. Poultryman think this over and tell us what you think. —Lubbock Avalanche.

### LEGAL NOTICE

In Re: Guardianship of the Estate of Mary Edna Criswell, Jessie Harrell Criswell and John Claude Criswell, No. 40.

In the County Court, Yoakum Co., Texas, in vacation:

Notice is hereby given that I, Bettie Criswell, Guardian of the Estate of Mary Edna Criswell, Jessie Harrell Criswell, and John Claude Criswell, minors, have this day filed my application in the above entitled and numbered cause for an order of the County Judge of Yoakum county, Texas, authorizing me, as guardian of the estate of said wards to make a mineral, or oil or gas lease covering all minerals as in said lease provided, upon such terms as the Court may order and direct, of the following described real estate belonging to the Estate of said Wards, to-wit: 192 acres undivided in Survey No. 642, Block D., Yoakum county, Texas, owned jointly by Bettie Criswell, who owns one-half of said survey and her three children.

Said application will be heard by the County Judge at Court House in the town of Plains, Texas, on the 20th day of June, A. D. 1927.

(1) Bettie Criswell,  
Guardian of the Estate of Mary Edna Criswell, Jesse Harrell Criswell, and John Claude Criswell.

### NOTICE TO BIDDERS

Notice is hereby given that sealed bids will be received by the Commissioners' Court of Terry County up until 11 o'clock A. M. Monday, July 11, 1927 for the purchase of one 12 foot leaning wheel grader with regular equipment and back sloper to be used upon the public roads of said county, and shall be demonstrated upon said roads for a period of three days prior to the awarding of contract.

The Commissioners' Court reserves the right to reject any and all bids. Given under my hand and seal of office, this 14th day of June, A. D. 1927.

(7-1) H. R. Winston,  
County Judge, Terry County, Texas

H. D. Parr and F. A. Hall, of Seminole, were business visitors here on Sunday.

## Local Merchants Are To Close at 7: P. M.

In line with the action of business houses of other towns pertaining to closing hours through the summer months, therefore, we the undersigned business men agree to close our places of business promptly at 7:00 P. M. each evening, except Saturday, through the summer months, until Sept. 1. This action being taken in order that the business men may not be retained in their places of business for so long hours thru the summer. This notice is to be printed in the local paper and to go into effect Monday, June 20th, 1927.

### SPECIFIC

The sweet young thing and her future life partner were making arrangements with the minister for the marriage ceremony.

"What is your name," the clergyman asked.

"Mary Jones, sir," (perhaps it was Smith.)

"And what is your age?" he continued.

"Nineteen," answered Mary.

"Where were you born?"

"What did you say, sir?" inquired the bride hesitantly.

"I say where were you born?"

Taking two steps nearer the minister, she lowered her voice—"at home, sir."

Elder Pummell, representing the Tipton Orphans Home at Tipton, Okla., filled the pulpit at the local church of Christ Sunday morning.

### FOUR HURT IN FAMILY ROW AT LAMESA

Two men were assessed fines of \$25 after pleas of guilty in Justice A. B. Cooper's court Tuesday morning following an affray which took place in a house on the west side during the night.

In the affray four persons received cuts and wounds. R. E. Holcombe received a gash across the head from a pocket knife, and other wounds. L. C. Cox, his father-in-law, received cuts and the latter's brother was cut across the arm, according to a report at the sheriff's office. Mrs. Holcombe, a daughter of L. C. Cox, also received slight cuts.

The sheriff's department received a telephone call late Tuesday night and immediately repaired to the scene. It was said that domestic trouble was the cause of the affray. —Lamesa Journal.

A. M. Jackson, wife and son, of Cross Plains, Texas, were here for a few days recently, the guests of his sister, Mrs. W. C. Smith and family.

H. E. Hogue, of Mt. Pleasant, Texas, had business here one day last week.

Mr. and Mrs. A. Jacobs, of Taylor, Texas, were guests of the Hotel Brownfield, last Wednesday.

Mr. and Mrs. D. F. Goodwin and Mr. and Mrs. W. D. Baker, of Anson, were through here last Wednesday.

E. C. Boswell, of Lubbock, was here on business last Thursday.

### BROWNFIELD LAUNDRY CHANGES HANDS

A deal was recently consummated in which Smith & Brown owners of the Brownfield Laundry sold the same to Mr. S. H. Shelton, of the Lahey community. We understand that Mr. Jim Walls, son-in-law of Mr. Shelton will run the laundry.

We understand that Messrs. Smith & Brown will buy poultry and eggs here and truck them to the Odessa section and sell them to the oil field workers.

Wm. Skyler and wife, of Philadelphia, were through here last week on their way west.

T. W. Bell, of Turkey and Roy Allen, of Silvertown, had business in our city last Thursday.

W. C. Beasley, of San Angelo, had business here last Friday.

Mr. and Mrs. Chas. F. Miller, and Mr. and Mrs. W. C. Davis, and Miss Mary Parr, of Hillsboro, stopped here Sunday night on their way to the New Mexico mountains and caves.

### HOT DAYS

Arriving home from the party, friend wife confronted her husband. "I'll never take you to another party as long as I live," she fumed.

"Why?" he asked in amazement. "You asked Mrs. Jones how her husband was standing the heat."

"Well?"

"Why, her husband has been dead for two months."—Ex.

### MRS. McSPADEN ENTERTAINS WITH LOVELY PARTY

Friday afternoon, June 10, the members of the Friday Forty-Two Club were charmingly entertained by Mrs. H. W. McSpadden with Mrs. Flem C. McSpadden assisting. Beautiful decorations appropriately grouped were Shasta daisies and ferns. Jardinieres and large vases were used as containers for the flowers. Electric fans made the entertaining rooms pleasant indeed. Invited guests, outside of the club guests, were asked to fill vacancies made by absence of members, who are on vacations or visits. Pretty, new table markers and baskets of mints were placed on each table and the game of "42" was never more truly enjoyed than this one. "Sunshine friends" were delighted to be remembered with gifts at this meeting. A huge basket contained many pretty and dainty gifts. These were distributed before the diversion of 42 began. At the completion of the usual number of plays the luncheon linens were put in order and delicious pineapple sherbet and angel food was served guests. Fruit punch refreshed the guests as they arrived and throughout the game. Club guests, and guests of the club are indebted to Mrs. McSpadden and her assistants for this delightful afternoon's pleasure. Guests were, Mrs. A. A. Sawyer, Mrs. Tom May, Mrs. Collins, Mrs. J. E. Michie, Mrs. J. G. Thomas, Mrs. W. B. Downing, Mrs. R. M. Kendrick, Mrs. H. E. Winston, Mrs. Jno. Scadday, Mrs. Chas. Hamilton, Mrs. J. H. Griffin, Mrs. W. C. Smith, Mrs. Dalton Lewis, Mrs. P. B. Brothers, Mrs. J. B. Knight, Mrs. C. E. Baldwin, Mrs. Claude Hudgens, Mrs. H. O. Longbrake and Mrs. Dallas.

### JUNIOR C. E. MEETS JUNE 12

The Junior Christian Endeavor met on June 12th at 4 o'clock having Eileen Ellington leader. Songs No. 18, 60 and 12 were used and pledge given in union. Subject, "How a boy stole his brother's blessing." Reading—Frances Brownfield. Discussions and questions. "A midnight wrestling match" (taken from Genesis 30th and 33rd chapters) will be topic for June 19th, Ray Brownfield, Jr. leader.

### MISS MAMIE SUE FLACHE COMPLIMENTED WITH PARTY

On Thursday morning at 9 o'clock a charming group of young ladies responded to an invitation to attend a party, honoring Miss Mamie Sue Flache. Mrs. W. H. Dallas being hostess. This was an "inside-out side" party, as tables were placed on the porch as well as in the reception room. Guests enjoyed the accustomed thrills of the 42 game for an hour, when prizes were drawn for high and low cut. Miss Louise Chisholm drawing high card and Miss Mamie Sue Flache low, received pretty bottles of toilet water. The honor guest prize going to Miss Mamie Sue, a large jardiniere. The hostess, and assisting hostess served peach ice cream and ribbon cake, to Miss Lucille Flache, Miss Mamie Sue Flache, Miss Beatrice Mitchell, Miss Mary Ann Bell, Miss Carrie Head, Miss Gladys Cox, Miss Julia Head, Miss Florence Holt, Miss Rebecca May, Miss Larue Sawyer, Miss Edna Patterson, Miss Christova Sawyer, Miss Louise Chisholm, Miss Helen Jackson, Miss Robbie Marion Hardin, Miss Vivian Winston, Miss Mary Thelma Copeland, Miss Anna Belle Scadday, Miss Gladys Kendrick, Miss Bernice Lane, Miss Fay Brown, Miss Oleta Swan, Miss Velma McClish, and Miss Mary Kathryn Anthony.

### GOMEZ COMMENCEMENT FRIDAY NIGHT

Mr. Gus L. Ford, member of the Texas Technological College faculty, of Lubbock, Texas, addressed the graduating class of Gomez High School, on Friday night June 10th. Misses Gladys Cox, Velma McClish, Florence Holt and Melba Cornelius were invited to sing at this time. Misses Cox and Cornelius sang a duet, "Memories of High School Days" and "Wyoming Lullaby" was rendered by the quartet of young ladies. The graduates were Miss Nelle May McLeroy, (valedictorian) Mr. Charles Broughton, and Mr. Ross Black. The entire exercise was very splendidly given and reflects credit on the instructors and superintendent, Miss Lucille Blackstock.

### NIGHT BRIDGE CLUB HAS DELIGHTFUL PARTY FRIDAY

Mrs. J. D. Miller very charmingly entertained the Night Bridge Club.

Guests of Mr. and Mrs. Miller were Mr. and Mrs. R. L. Bowers, Mr. and Mrs. A. M. Brownfield, Mr. and Mrs. Ray Brownfield, Mr. and Mrs. A. W. Endersen, Mr. and Mrs. J. E. Michie, Mr. and Mrs. Tom May, Mr. and Mrs. John B. King, Mr. and Mrs. W. A. Bell, Mr. and Mrs. W. R. McDuffie, Mrs. Ike Bailey, Mrs. J. H. McKinney, Mr. James McKinney, Mrs. J. E. Shelton, Mr. and Mrs. E. G. Alexander.

Concluding the Bridge game Mr. A. M. Brownfield made high score; Mr. A. R. next to high. Mrs. A. M. Brownfield held high for ladies and Mrs. Tom May next. A delicious two course plate was served by the hostess and assisting ladies. The plate No. 1 contained chicken salad, bread and butter sandwiches, olives, tomatoes with dressing and fruit punch. Second plate was pineapple sherbet and chocolate cake. This was truly a delightful party. Prizes presented were to gentlemen, set of cards and tie, high and low respectively. Ladies prizes were buffet set for high; box of stationery, next high.

### TRUE BLUE GIRLS

The True Blue Girls Sunday School class with their teacher Mrs. Ivy Savage, met at the home of the president, Miss Mary Thelma Copeland on Monday afternoon June 13 for the monthly business and social meeting. The interesting program was as follows: Class song—"Fait is the Victory." Prayer—Mrs. Savage. Reading of scripture—Mar. Thelma Copeland. Reading—Helen Jackson. Song—Ollie, Leta and Tallene Hancock. In a business session, Doris Bandy was made second vice-president, Norma Dell Welch, 3rd vice-pres., and Helen Jackson, temporary secretary, (in the absence of regular officers.) The class decided to meet at the home of Blanch Williamson, Friday for quilting. The quilt to be sold and the proceeds used for the class. As one of the members of the class was ill and had been in the Lamesa Sanitarium for almost 2 months, the girls planned for each one to be a "Sunshine friend" to her for the next 3 months thus hoping to cheer her in her hour of affliction. Delicious hot chocolate and cake was served guest. After a social hour, during which time, they enjoyed the Player Piano selections, and songs from their number, they adjourned to meet July 11th, with Miss Helen Jackson.

### MISS COX AND LANE JOLLY HOSTESSES TO I. H. F. C.

On Thursday afternoon the usual meeting of the I. H. F. C. was greatly enjoyed with Misses Gladys Cox and Bernice Lane hostesses, the guests gathering at the home of the former. The gayest time was reported, with pretty embroideries being done by their skillful hands. Mrs. Cox assisted as supervisor of the afternoon's pleasure. Delicious and generous refreshments were enjoyed. Two new members were initiated at this time. The club will meet at the home of Miss Brown Thursday.

Mayor and Mrs. McGowan and son Billy Joe, are visiting in Quanah this week. Leaving Sunday morning.

### PHILATHEA S. S. CLASS ENJOY MOONLIGHT PICNIC

The Philathea S. S. Class and their guests with Bro. May and our teacher Mrs. S. L. McDonald as sponsors, enjoyed one of their usual "good time" moonlight picnics out on the Brownfield ranch southeast of town Tuesday evening. About thirty were present. We are indeed indebted to our 2nd vice-president, Miss Nell Flache, for this enjoyable evening.—Reporter.

Mr. and Mrs. Redford Smith, returned home Tuesday, after having spent a pleasant vacation in some of our Southern states, principally Georgia.

Mr. Ed Cox, of Graham, Texas was a pleasant caller to the Herald office Wednesday morning. He is connected with the Graham Leader at that place. He in company with his wife and son, John Perry, are visiting Mr. and Mrs. J. R. Moore of Seagraves.

Little Miss Sallie T. Stricklin went out to the G. G. Gore farm in the Johnson community, Tuesday to be the guest a few days with her little friends, Minnie Hazel and Luna Maude Gore.

**BAPTIST WORKERS' COUNCIL MEET AT MEADOW**

On Tuesday, June 7, the Workers' Council of the Brownfield Association met with the Baptist church at Meadow. A large crowd was present both of the local church and visitors. A fine program was carried out throughout the day. At the noon hour the ladies of the local church served a good dinner to those present, which was enjoyed by all. The program was as follows:

10 A. M., Devotional, by Fred Hinson.

Some marks of a New Testament church by D. J. Johnson.

New Testament evangelism, Rev. R. E. Bost, pastor of the New Home church.

The 11 o'clock sermon was preached by Rev. V. E. May, the new pastor of the Brownfield church, who bro't a fine message, his text being, "Be ye not weary in well doing for in due season ye shall reap if ye faint not." We were all especially glad to hear Bro. May and welcome him into the association.

After noon the first thing was the board meeting for the pastors and men of the association. The ladies also held a business meeting at this hour, 1:30. The afternoon services were under the leadership of the women. Our associational president, Mrs. J. B. Walker, of Tahoka, presided in her usual pleasant way. The devotional was led by Mrs. Roscoe Moorhead, our subject for the afternoon being, "Some ways the women can help promote a revival in the local church."

First, "How soon to begin," Mrs. L. J. Dunn, of Brownfield.

"The work of the women during the revival," Miss Mary Preston, of Tahoka.

"How the laymen can help in a revival," Rev. Graves Darby of the Wilson church.

"Some suggestions how to promote the kingdom work this season," Rev. B. N. Shepard, Tahoka church.

Our former pastor, H. C. Draper, and wife came down from Petersburg to be with us, which we greatly appreciated, we still being without a pastor. Bro. Draper was voted in as moderator for the day.

We had a good program which was well rendered and was enjoyed by all present, and will be a great help to those present, and especially the local church. We are always glad to have the Workers' Council come our way. The next meeting of the Workers' Council will be with the Brownfield church on Tuesday after the first Sunday in July.—Reporter in Meadow Review.

R. N. Taylor of Lubbock was a business visitor here Tuesday.

**COURTEOUS AND EFFICIENT SERVICE**  
**CAPABLE MANAGEMENT**

It requires one million license plates to supply Texas motor vehicles.

**DEADLY TYPHOID FEVER CAN BE PREVENTED**

Typhoid fever for many years such a dreaded disease can now be prevented. Three injections of serum given at weekly intervals will protect one from two to two and one-half years. If every person would use this serum every two years, typhoid fever would almost be unknown. Army records have shown that the protection is almost absolute. The time is not far distant when it will be considered a disgrace to have typhoid fever, for the protection against it is so sure.

Typhoid is more prevalent in the summer and early fall, hence one should now use the serum for protection. The usual charge made by physicians for giving the three doses is only five dollars. Five dollars for two years safety from typhoid fever is a fine investment and very cheap health insurance.—Lubbock Sanitarium News.

**THE POWER OF PUBLICITY**

There are narrow-minded individuals who claim that the cost of publicity is not a legitimate expense of public service corporations. Publicity which encourages the widest use of an article is the most potent influence to reduce the expense of that article to the consuming public. Without publicity, the demand for an article is small and the cost of production is high. With proper publicity the demand for an article becomes universal and the cost of production drops to a minimum.

That is why Americans enjoy the best public utility service in the world—utility companies are consistent users of advertising space. They have acquainted the people with every phase of their business and shown them the advantages of using their products. Their success is an outstanding example of the fact that advertising does pay when applied to an article or service of merit.

**FARADAY'S SARCASTIC JEST COMES TRUE**

After seven long, hard years of labor with one object in view, Michael Faraday in 1831 succeeded in producing an electric current in induction. One day in his laboratory he explained the experiment to a friend, who was one of those matter-of-fact sort of chaps, who said: "Very interesting, but what is the use of it?" To which Faraday somewhat sarcastically replied: "Perhaps some day you can tax it."

When it is considered that the great electric industry of the present is based primarily upon Faraday's epochal discovery the truth of his great jesting remark may be understood. Today the electrical industry is the third largest taxpayer of corporation taxes in America, and will doubtless soon stand at the head of the list.

The electrical industry in the United States paid last year in taxes the sum of \$163,000,000.

**SOUTH TEXAS BOY GET STAR-TELEGRAM PRIZE**

Lubbock, June 13.—The Ft. Worth Star-Telegram Scholarship for the best all-round athlete in Texas Technological College has been awarded to Ransom Walker, of Mission. It carries a cash award of \$250. Walker was a star half back on the Tech football team, made his letter in basketball and also in track, in which he was an outstanding performer. He was high man with 20 points in the Great Plains track meet at Canyon last year and was only one-fourth point behind the winner this year.

**Bird Widows Don't Mourn**

In bird world, widowhood does not for long interfere with the rearing of a family. William Lyon, president of the Inland Bird-Banding association, saw the mate of a wren killed. Twenty minutes after its death, Mrs. Wren returned to her nest with a new mate.—Cappers Weekly.

**REGRETS OF LLOYD GEORGE**

In referring to the new transatlantic radio telephone service, David Lloyd George, former premier of Great Britain, declares that it would have been the greatest help during the World War. He referred to the fact that there were many subjects which he would like to have talked over directly with Woodrow Wilson, and that many things in this way could have been cleared up and arranged in a few minutes.

**NOTICE**

Notice is hereby given that no person is authorized to contract any debts or accounts for the Kingland Oil & Potash Company, nor make any contracts of any character whatsoever, except upon written order direct from the office in Amarillo, and signed by an officer of the company.—KINGSLAND OIL AND POTASH COMPANY. 7-1c

Mineola—A large compressor station is being built three miles west of this city by the Magnolia Gas Company.

Dallas—Production of electric power in Texas by public utility power plants during March is reported by the United States Geological Survey to have been 142,620,000 kilowatt hours, an increase of 25 per cent over the corresponding month last year.

Dallas—Public utility power plants in Texas used almost two billion cubic feet of natural gas as fuel during March according to government reports. This is almost one-half the total used in the United States in March.

Temple—Surveys are being completed for bringing natural gas to this city. A movement is under way at Belton also to secure natural gas service.

Shamrock—By a vote of almost two to one the people of this city decided to sell the municipal light plant to the Central Power and Light Co. The city by this sale, has been able to extend water mains, retire bonds and reduce the tax rate from \$1.50 to 75 cents.

Luther French was in from their farm near Lou Tuesday afternoon and reported that he was confident that they got four or five inches of rain Sunday night. He said the rain seemed to get heavier all the way from Brownfield south. We only had an inch here, and it got lighter as one goes north.

A small classified ad week before last found a good leather jacket for T. N. Bingham. Let them work for you.

Little Miss Helen Ruth Raymer, who has been visiting relatives in Lubbock, for the past three weeks, returned home Sunday.

J. T. Stricklin, wife and two youngest daughters, Misses Dessie and Anais Myrl, were the guests of his brother, A. J. Stricklin and family, Thursday and Friday of last week. Mr. Stricklin is teacher of history in the Fort Worth Junior high school. They will visit points in Colorado and Kansas before returning home.

Mrs. J. W. Welch and daughters, accompanied by Miss Belle Williamson returned last week from a six weeks visit with relatives in southern California. They report that they were delighted with their trip but glad to get back to old Terry.

R. Stice of the Johnson community was in Tuesday and reported that he did not get more than a quarter inch of rain. And it looked like it was raining all over the world.

**Pretty Indian Legend**

Long ago, before the white man came to this country, a great famine spread over the land, says the Detroit News, in telling of the legends of Michigan Indians. One day a mother bear with her two hungry little cubs, walked along the shore of Wisconsin and gazed wistfully over at Michigan. Finally, driven by the pangs of hunger, she plunged into Lake Michigan, followed by her two babies, and struck out for the Michigan shore. When only a few miles from the land of plenty, one cub, too exhausted to go further, sank. She struggled to reach shore with the other, but, it too, sank. She herself at last reached shore and sank exhausted. As she gazed out across the waters, two beautiful islands slowly arose to mark the graves of her children. And these are called Manitowish, meaning the home of departed spirits.

Thomas Parr, who lived to be one hundred and fifty-two years old, is credited with a record, but this longevity, as well as that of all other members of the animal kingdom, is easily surpassed by those of the vegetable kingdom. The life of the great forest trees varies from 100 to as much as 5,000 years, says London Tit-Bits. Cypress trees are said to live for 350 years, ivy 450, chestnut 600, cedar 900, oak 1,000 to 1,500 years, yew 2,500 and the baobab tree 5,000 years.

**CROSBY COUNTY MAN FAIR POULTRY SUPT.**

Lubbock, June 13.—Aubrey Ashley, of Lorenzo has been re-appointed superintendent of the poultry department of the Panhandle South Plains Fair. He was in Lubbock last week getting details of his department straightened out. Ashley is looking forward to the biggest poultry show this fall that has ever been witnessed on the South Plains.

D. F. Eaton, superintendent of the agricultural department has issued a warning to counties and committees that expect to enter the department with exhibits to be sure and get their bundles of small grain put up before it is all harvested.

Agricultural conditions do not now point to a bumper yield this year, but its the county and community that waches and gets up a good exhibit during these dry years that reaps the big benefits from the fairs, Eaton said recently.

**HIRED MAN MAKING MORE THAN THE FARMER**

Farmers who have recently started to keep records were startled to find out they paid the hired man more during the year than they made themselves, according to the University of Illinois investigators.

Reports this spring from many sections of the country are to the effect that farm help is scarce. There are plenty of unemployed men available, but they are unwilling to go to the farms for the wages the farmers offer and are able to pay. As a result of difficulty in securing competent labor during the last year or two and with no prospect of any immediate change in the situation, many farmers are equipping themselves with labor-saving machinery which makes it unnecessary to hire extra help. Two-row corn and cotton cultivators, tractors, larger plows, hay loaders, any number of labor-saving machines, might be mentioned which takes the place of a hired man.

**Chameleon Paint!**

A Swedish scientist has invented a paint that changes color with advancing temperature. The discovery may prove useful for painting machinery as a warning to the operators of overheating.

**A FEW STATISTICS ON THE COMMON HOUSE FLY**

For those who appreciate figures, let them consider the following indisputable facts:  
Female flies lay 120 eggs to a batch.

Four to six batches a season. Half a batch will hatch in 10 days. Each female, therefore, on an average is responsible for 600 descendants.

These in turn propagate at the same rate. In 30 days the descendants number 216,000.

In 60 days their number 46,000,000. In 90 days 10,977,000,000,000.

All from one female fly. In one fly speck science has counted 116 germ colonies.

In the body of one fly, six million single germs.

Flies transmit such diseases as typhoid, dysentery, and many intestinal ailments, infantile paralysis, cholera, tuberculosis, smallpox, diphtheria, diarrhoea and enteritis, from which later two 70,000 human infants die each year in the United States alone.

The fly causes the death of one in every 50 babies. Food touched by a single fly may be your ticket to the grave.

**UNDER THE NEW TEXAS LIBEL LAW**

"Are you the editor?"  
"We are."

"My name is Smith—Godolphus H. Smith."

"Sit down, Mr. Smith."  
"Not on your life! Your paper printed an article about me yesterday."

"Yes."  
"You called me a corruptor of public morals, a thief, a blackleg and a lot of things?"

"We did."

"Well, sir, I am here to tell you, by thunder, that my middle initial is H. and not J! If you can't spell my name right after this, let it alone!"

—Abbeon (Kans.) Tribune.

"Heath Money"  
"Heath money," levied in England between 1633 and 1660, was a tax on domestic linen, and had to be paid to the king. The clergy had their income, also, by levying a tax known as that of "smoke farthings."

## CITY BARBER SHOP

Solicits your business because we know we are in position to please you in any style of haircut, tonics or massage. Ladies' and childrens' work solicited.

### TAHOKA BOY KILLED BY HIGH DIVE AT COLLEGE

One of the saddest funerals ever conducted in Tahoka was that held last Saturday afternoon when the remains of Ovid Donaldson, son of Mr. and Mrs. J. D. Donaldson of this city was laid away in the City Cemetery. Young Donaldson died in a sanitarium at Abilene on Friday afternoon as a result of injuries received Thursday when he dived into shallow water in the natatorium of McMurray College, Abilene, where he was a student his head striking the concrete floor. As a result of the impact his neck was broken and his body paralyzed from the shoulder down. He was hurriedly taken to the Baptist Sanitarium and the best medical and surgical attention was given. A specialist from Dallas was called and an operation was decided upon as a last resort. Parts of three vertebrae were removed but the patient failed to revive, and died at 4 o'clock Friday morning.—Tahoka News.

### TWO EYES REMOVED ON ACCOUNT OF INJURIES

Mr. E. I. Auten, of Seminole, while working on a windmill, was struck in the eye with a piece of wire and the eye was so badly injured that it had to be removed. Mr. W. D. Bowen of Levelland, also received an eye injury and it became necessary to remove the eye this week. Mr. and Mrs. C. E. Duncan, of Brownfield brought their five weeks old baby to see Dr. Overton Tuesday night. The child had never been well and different kinds of food did not agree with it. The child is now much better and gaining weight rapidly. Mr. Arthur of Brownfield had a nose operation this week.—Lubbock Sanitarium News.

I. N. Jackson, Jr., of Abilene, had business in our city Monday.

G. B. Hickok, railroad man of Sinton, was a business visitor here on Monday of this week.

### FISH LONGEVITY IN TEXAS WATERS

By J. G. Burr, Game, Fish and Oyster, Dept., Austin.

How long a fish will live in Texas streams depends mainly on the skill of fishermen. Few fish die of old age; they are mostly caught young. The tragedy is abated only when "they are not biting." The under-size bass is a victim of hasty strikes at a supposed bug or fly, and all fish, one way or another, meet an untimely end from the standpoint of the fish.

But it's great sport to take them, and when an angler's reputation is at stake, there is a temptation to carry home 50 or 100, even if they are short, and before they have arrived at the age of reproduction.

Prior to a year ago the state had only one hatchery, located at Dallas, which sent out annually from 100,000 to 250,000 young fish since the time of its construction in 1915, but practically all were sent to lakes and private ponds. Last year with two hatcheries added, a few fish were sent to rivers and creeks. This year the application for fish include a greater number of streams.

That so few applications for fish to be placed in streams is due to the belief that they would soon be caught out by an irresponsible public. That is perhaps the greatest difficulty to a successful stocking of the fishing streams which were once the angler's delight.

The Commission, with four hatcheries now in operation, hope to send out from one half to a million fish annually. They must, of course, be allowed to reach maturity and reproduce, which will require at least a year. Observance of the fishing laws is imperative, and 100 percent cooperation by the public is essential to the success of this important enterprise of the State.

Eleven inches for bass and seven inches for white perch and crappie are the lawful lengths. Distribution of bass from the Tyler hatchery began this week, with Commissioner Will J. Tucker on the ground in close touch with the work.

Miss Edna Beard left last week for Plainview, where she will attend the summer session of Wayland College.

Rev. J. C. Lewis and wife visited their son, Myra, and family, at Clovis New Mexico, the past week.

### Unable to Put Trust in Alligator's Memory

Charles Ringling, of circus fame, who died at Sarasota, used to collect anecdotes of Florida crackers, poor whites and colored folk.

"One of Mr. Ringling's anecdotes," said a Sarasota realtor, the other day, "was about a cautious convert."

"There had been, you see, a colored revival, and the colored revivalist was about to baptize a batch of converts in one of those dark, silent, suspicious-looking streams that you find in our Everglades.

"Come," the revivalist said, as he stepped into the black water. "Come, follow me, breddern and sistern."

"But just then a couple of alligators raised their heads from the mud and opened their terrible mouths in a vast yawn. This caused the converts to step back with low cries of alarm.

"The revivalist rebuked them. 'Breddern and sistern,' he said, 'can't you trust de Lord? He took keer o' Jonah, didn't he?'

"'Yaas, he did, pawson,' said a convert soberly, 'but a whale's different. A whale's got memory. But if one o' dem 'gators was ter swallow dis coon he'd jes' go to sleep ag'in in de mud an' forget all about it.'"

### Big Discovery Made With Crude Telescope

One of the capital discoveries of astronomy was made with a crude telescope in April, 1945. It was the discovery of spiral nebulae, by Lord Rosse, an English peer. His large telescope was erected in a country district of Ireland more than eighty years ago, for the most part with local labor, and it lacked all the advantages that modern machine tools now afford. Its long tube, supported upon a ball-and-socket joint, and slung in chains between two high walls of masonry, peered through the Irish mist. Lord Rosse could observe objects only when near the meridian and then at the cost of constant effort. In modern instruments the apparent westward motion of the stars is counteracted by the steady motion of the telescope tube, turned slowly about a polar axis by a powerful driving-clock. Lord Rosse, after the tube had been worked back and forth with a windlass until the tedious task of finding a celestial object had been completed, then had to keep it in the field of view by constant recourse to similar primitive contrivances.—George Ellery Hale, in Scribner's Magazine.

### Birth of the Ego

It is easy to see that great economic advantage accrued to the individual, and hence to the race, through the acquisition of self-consciousness. It enabled each man to economize enormously his expenditure of energy by concentrating upon definite desirable accomplishments. Inactive impulses and urges now had something to anchor and control them, instead of being switched about by every new and passing sense impression. Man had acquired the capability of thinking consciously "I want, I will." And so was born egoism.—From "Concerning Frascible Strong," by William H. Smyth.

### Swiss Religious Founder

The Mennonites take their name from that of their founder, Menno Simons, a Swiss religious enthusiast of the sixteenth century, and they maintain, according to the Encyclopedia Britannica, "a form of Christianity which, discarding the sacerdotal idea, owns no authority outside the Bible and the enlightened conscience, limits baptism to the believer, and lays stress on those precepts which vindicate the sanctity of human life and a man's word."

### Portents of Sneezing

In the ancient days of Greece and Rome a sneeze was supposed to bear in its train far greater portents than mere cold. To sneeze while rising from the table or bed was said to indicate approaching death.

Yet, to sneeze between midday and midnight under favorable planetary conditions, was an augury of happiness. Again, if the Greek or Roman turned to the right while sneezing, it was regarded as a happy omen.

### Ridiculous Sentences

Imprisonment for 300 years at hard labor—believed to be the longest sentence on record in the Balkans—and 19 other sentences of 250 years each were given a leader of a band of Albanian brigands and some of his followers for the murder in 1915 of 16 Serbian soldiers in a convent near Trieste.

**English Woman's Ten Names**  
The petitioner in a case before the London divorce court was impositively described as Mrs. A. B. K. F. I. M. G. P. D. H.H.

When asked by counsel to announce her full name, Mrs. H.H. handed a sheet of foolscap to the judge. "Here they are," she said.

"Is your first name Aclie?" asked Lord Merrivale. "It is."  
"Well, that will do," said the president. "It is not your fault that you were given all these names."

Upon the paper was written:  
"Aclie, Bethel, Kitzinger, Firth, Ishi, Helena, Goiga, Pretoria, Dever Hill."

### ASSEMBLE CHEVROLET TRUCK IN RECORD TIME

Eight members of the Washington Section, Society of Automotive Engineers, demonstrated the advantages of standard automobile parts recently by assembling a half-ton Chevrolet chassis in the record time of six and one-half minutes, in competition with six other teams similarly engaged. The stunt was a feature of the Society's annual summer meeting at French Lick, Ind.

While the assembled delegates derived much amusement from watching the seven teams vie for a record in a line of work with which they were unfamiliar, except in theory, the performance also carried its lesson to many of the watchers. But for the perfectly fitting parts, the assembly might have required hours instead of minutes. The elapsed time

was strikingly short, in view of the fact that none of the assemblers were connected with Chevrolet nor familiar with its mechanical details. Three of the winning teams were engineers of the United States Bureau of standards.

The slowest team required only a few minutes longer than the fastest, and its hurry added amusement to the contest. As a test of each team's work, each car had to be run five times around the loop in the nearby driveway before the results were certified.

Mrs. J. M. Campbell and little son, Paul, of DeLeon, were here the past week visiting Mrs. Campbell's parents, Dr. and Mrs. W. M. Copeland. Mrs. Campbell will enter Simmons University for a special course during the rest of the summer.
