

# The Terry County Herald

Printed in Terry County, on the South Plains; the last stand of the Cattleman and the future home of the most prosperous Farmers in the United States

VOLUME 23

BROWNFIELD, TERRY COUNTY, TEXAS, FRIDAY, SEPTEMBER 30, 1927

NUMBER 6

## Are We Preparing Our Future Farmers?

Considerable has been said the past few years hereabouts about a county agent. But talk is cheap. It costs but an effort and a little exhaling of hot air, and that is the price we are willing to pay for one. Talk will never get us anywhere unless we are willing to put our talk into real action. We must really want an agent enough to go out and get one if we want one at all.

In the meantime, are we treating our future young farmers just right? Are we giving them an equal chance with the coming young farmers of the surrounding counties? Hardly. Not a bit of it. We are handicapping them in their race against adjoining counties, and ourselves too. Of course these boys and girls are raising no howl. They can't as yet realize what it all means. But counties that are furnishing agents to teach their boys and girls to care for stock, learn to love them, (the stock) and learning the girls how to can and preserve; learning each how to judge the best calf, pig or hen, and to feed them a balanced ration, are really preparing them to enrich that particular county as useful citizens and also capable of bringing in more dollars per capita than the county of the untrained boys and girls. The latter are handicapped because they have to get up against the matter just as their daddy's have in a haphazard manner, and get the best they can out of main strength and awkwardness, together with whatever native wit they may possess. Of course education and training is not all of it. They must have backbone and stamina, but with the addition of training and education their rows will not be so long and hard to hoe.

But, there always bobs up that old tax business. We are all against higher taxes, every mother's son of us. We dread taxes; we hate taxes; we cuss taxes, and a county agent has to be paid. But should we become so narrow in our effort to keep our taxes to a minimum that we are willing to hold up a thin dime in front of our eyes and exclude a dollar bill in front, but in reach of our hands? This is the question for us to consider. All men who have made money have been men of vision. There are precious few that have just stumbled upon money, but they have mostly been men who were able to see that by investing a dime they stood a chance of earning a dollar. If the Herald believed that a county agent would not be able to teach our young men and women how to more easily earn a living and increase the wealth of our county, it would be the last to advocate the expense of one. But, on the other hand, if a county agent can increase the earning capacity of 1000 farmers in Terry county only \$5 per year—that's very conservative—we are certainly willing to pay the price. As we understand it, an agent only costs some \$2500 per year, and the Federal government pays half or more than half of that amount.

Of course there are some farmers in Terry county who do not seem to want a county agent, but it is because they have never worked with one. Ask any farmer in the county that came from a county that did have one; what they think of a county agent, and ninety-nine out of one hundred chances, he will tell you that they are worth all they cost and more. So, after all, it is a matter of opinion of two classes, one who does not know, and one who does know.

We hope the proper authorities will, before another season rolls around take this matter under serious advisement, and if in their opinion a county agent will be a help, appoint one, and if it causes them to lose prestige politically, let it go at that. It is far better that many good men be sacrificed politically, if in doing so, the county of Terry is put on a par with neighboring counties. When the farmer prospers the town prospers, so the low tax town man can have nothing to grumble at on that score.

### ONE REFORM

"My wife married me to reform me."  
"Did she succeed?"  
"You bet! I wouldn't marry again if I lived to be a thousand years old."

Borger—Borger is building a new city hall to cost \$28,000.

## Marchbanks Lets Contract For Brick

N. R. Marchbanks, one of our prominent farmers, has let the contract to Lee Thompson for the construction of a 25x100 brick and tile building on the north side of the square, on the site where the small frame building was partially destroyed by fire recently. It had been the intention of Mr. Marchbanks to build a permanent building for some time, and the old frame burning so badly that it was beyond repairs, probably hastened matters.

Construction work started Monday morning of digging the foundation, and the work will be rushed with all speed, as the building is to be turned over to the owner by the first of November. Mr. Thompson says that with favorable weather conditions, he can turn the completed job over within 30 working days.

The building, we understand, will be occupied by Mr. J. E. Michie, local grocery and hardware merchant, who has purchased the M System rights of Terry county, and who will open the first M System store in the city as soon as he can get the building.

With the completion of this building, in the midst of some shacks, it will likely encourage neighbors of Mr. Marchbanks in erecting modern fire proof buildings by the side of his, and thus remove the last vestige of shacks from the north side.

## Cold Rains Again Visit Terry County

A week almost to a day from the previous cold spell, another, maybe a little more saner visited us, and made our inhabitants hunt shelter and more clothing. It all happened Monday with the wind out of the north and leaden clouds from the same general direction that began misting and kept it up all day, with occasional showers. And, to add insult to injury, radios, those you could get anything over, all alike reported that it was snowing at Amarillo and northern Oklahoma. Poor old Amarillo, it has to bear all the brunt of scary tales about cold weather and doesn't seem to make much headway in heading them off. Always when the first norther hits north Texas, the Fort Worth and Dallas papers begin to tell their readers how cold it is and how deep the snow was in Amarillo, no matter if that Panhandle city is enjoying balmy sunshine.

But, as stated above, even the mention of snow added none to our comfort, and we went home Monday night fearing the worst. During the night, however, the weather moderated some, and the inhabitants were awakened Tuesday morning by the flash of lightning and the roar of thunder, and soon a good shower was falling. This of course will nip cotton picking for some time.

Let us add just here, too, that although we stated above that the weather had moderated some, it was barely some, and as this is being finger-picked on the old Smith-Premier, it lacks a ding sight of being the kind of weather we had back in July and August.

## Mary Alice Perkin Presents Birthday Cake

Little Miss Mary Alice Perkins, daughter of Mr. and Mrs. F. H. Perkins, who live about a mile south of this city, celebrated her 10th birthday Sunday at home, but she did not call on mamma to make the cake. She did the trick all by her "lonesome." And it was fine, too, for the editor was favored with a liberal piece Monday morning by the little Miss as she was on her way to school. It was the cocoanut variety, well flavored, and as good as many mature women produce. If more of our girls were really learned the art of cooking, and could cook, there would probably be a big decrease in the divorce mills.

Miss Mary Alice not only gave us a nice piece of her birthday cake, but also two big red tomatoes, as fine as you ever tasted. Herald enjoyed the treat very much, and was especially pleased that we were remembered by the little lady.

Texas has 5,845,918 beef cattle, valued at \$122,630,336.

## Residence Section To Be Well Lighted

Work of setting the poles has been under way the past few days for lighting the streets of the residential section of Brownfield, and city superintendent E. D. Jones informed us that all material had been ordered and expected to arrive in the next few days for the completion of the work. Among the other material, some eighty odd high powered lights have been ordered to put up when ready.

We understand that the lights will be paced on every other street in the thickly settled portions of the city for the present, with the expectation of putting them on every street as the city can pay for the work and material, but these lights will be placed at corners in order that they may do as much good as possible to the greatest number of people. In the thinly settled portions of the city, the lamps will not for the present be set with any regularity, but placed where they will render the best service to the people.

When the work of installing these lights is complete, Brownfield will be one of the best lighted cities of its size in West Texas. In fact, few cities the size of Brownfield in West Texas have any residential streets lighted by night, and therefore present a very dead, sleepy appearance by those coming in after night. Then too, these lights will probably minimize the danger of collisions of cars after night, especially with those who insist on driving without lights.

There is still another side to the matter. It will have a wholesome effect upon the night prowler, the petty thief and burglar, who love the darkness better than the light. The honest man craves more light, but the dishonest love to do their work after night, when it is dark and the honest are asleep.

The Herald takes this means of thanking the city dads and our progressive mayor for this big step forward in making and putting Brownfield where it belongs—to the forefront of any its size in real progress.

## Lost Seagraves Girl Found in Houston

Last week when so much was being printed in the dailies concerning the 14 year old girl found murdered near Fredricksburg, Texas, it was found that a Seagraves girl, but living just over in Terry county, who had temporarily disappeared answered the description of the murdered girl almost to a "T" and the mother of the girl became quite uneasy about her daughter. It seems that the young lady had gone to Lubbock where she worked for some time, but had left Lubbock, and the lady she worked for had notified her mother at Seagraves.

Sheriff Frosty Ellington, who had been notified about the missing girl drove down near Seagraves Friday and carried the distracted mother to Lubbock to see if some trace could be gotten of the girl. It just so happened that the lady at Lubbock she had worked for had just received a letter from the girl written after the murder at Fredricksburg. She was then in Houston, much to the relief of the mother of the girl.

## Local Chevrolet Co. Expecting Caravan

Ralph Carter, local manager of the Carter Chevrolet Co., is making big preparations for the reception of the big Chevrolet Truck Caravan, expected here from Fort Worth in the very near future. There will be something like 20 trucks in the Caravan with that many different body suggestions, and it will be the advantage of everyone, especially of those who expect to buy a truck in the future, to see this caravan. There will be trucks to suit every need.

It is said that the caravan will have some very unique entertainment features that will be worth going miles to see. So be on hand that day if possible. After the parade through the business section of the city, the entertainment will take place in front of Mr. Carter's place of business.

## Shelton Goes to Lubbock With Exhibit

It seems that Terry county was just about to fall down on the Panhandle South Plains Fair this year, as no plans had been made toward having a Terry county exhibit up there, but on the last minute Secretary Shelton of the Chamber of Commerce got the Board of Directors to agree to let him carry up an exhibit on his own accord, with the explicit agreement that it would cost the Chamber of Commerce nary penny.

Of course, with this last minute understanding, only a few days were left to gather a creditable showing, which would represent Terry county with any degree of accuracy, but Mr. Shelton almost worked day and night for the rest of the time, and when the truck of exhibits left the courthouse Monday afternoon, it was said that a creditable showing would be made.

Now of course no one expects Mr. Shelton to get anywhere near the top of the prize winners, for we must consider that many of the counties and especially those with county agents, and that's nearly all of them, have been busy, under the direction of their agents for the past several weeks, or maybe months, preparing to stage an exhibit worthy of the South Plains section, and no jumped up exhibit is going to compete with these. But Mr. Shelton is prepared to go in and probably win enough prize money to at least pay expenses, and also to show folks that Terry is still kicking even if pretty sick. With the proper preparation, an exhibit could have been carried up there that would have been among the best, but there was no leader, and it went by the boards just like our county fair.

But Shelton has the "guts" to get up against the best, and we feel sure we will get our money's worth in good advertising at his expense.

## Farmer Says Wolves Getting Bad Again

A. P. Stewart, of the Tokio community was in one day this week and informed us that wolves (coyotes) were getting quite fierce in his section of the county again. He has lost quite a number of chickens this summer from the depredations of these useless animals, and from reports, others are missing chickens, believed to be caused by wolves.

He said a few years ago someone in that section had a pack of hounds that chased these varmint out of that section, and that it was for some time that a coyote would seldom be seen, but that with the removal of the man with the dogs, they were coming back in increasing numbers. It looks to us as if the farmers of that other sections will have to jointly organize a hound club, each keeping one or two, and get the pack together every once in awhile and give these varmints a chase for their lives. A few chases, and the death of a few of their pack, and Mr. Wolf will move to safer quarters.

## TECH OPENS WITH INCREASED ENROLLMENT

Lubbock Sept. 26.—At the opening convocation of the third annual session of Texas Technological College, President Paul W. Horn announced that 1214 students had already enrolled with several others on the campus awaiting their turn. He called attention to the opening enrollment of 745 the first year, and 1065 at the opening convocation the second year. He confidently expects the enrollment this year to reach 2000 students not counting the summer term.

Senator T. J. Holbrook of Galveston and Hon. Claude Pollard, attorney general of Texas, were speakers at the opening exercises on Thursday. Gov. Dan Moody spoke to an audience of over 4000 on the Sunday before. These visitors expressed themselves as profoundly impressed by the tremendous growth in numbers and the progress made in the organization of the school and the physical improvement made on the campus. Senator Holbrook said he expected it to be the largest educational institution in Texas within a few years.

Rev. H. D. Heath and son, of Tokio took in the fair at Lubbock, Tuesday. They report a fine exhibit of county products, and lots of fine livestock and poultry.

## Seniors Patronize Mail Order Outfit

Well, the Herald thought it had just about got the pupils of the Brownfield High School weaned off from mail order concerns, but we find we were consulting without our host, for as early as it is, and as uncertain yet as to whether all will graduate or not, we have been informed by one of the faculty members that the Seniors have ordered their announcements from a traveling salesman at about twice what the Herald asks for the same stuff.

Of course he told the boys and girls that he had high grade stuff, and put the price on to prove it to them. The Herald, or for that matter any of the faculty members could also put the price on if that is what the pupils want, for we are allowed a 33 1-3 percent discount, and a five percent one on top of that for cash, or 30 days. All concerns have just about the same samples and about the same grade of paper and about the same prices if the big discount is added, which the Herald did not take last year, and then figured the printing at just about cost.

But that is perfectly all right, Seniors, we are still your friends, and you are more than welcome to space in the Herald for whatever you may wish to use. If you want to spend a big lot of money and your parents will stand the gaff, take it, but we refuse to overcharge, because you are home boys and girls, and your parents are our neighbors and friends.

Supt. Fagala has had some 20 years experience in schools and he informed us that he had never seen any better or more appropriate announcements than those put out by the Herald for the 1927 class.

## FIRE IS ONE OF MOST DESTRUCTIVE AGENCIES

1. The dollar loss from fires in the State of Texas for the year 1926 was approximately 20 million dollars.
2. The dollar loss in the United States for the year 1926, was approximately 560 million dollars.
3. The dollar loss in Texas from January 1, to Sept. 1, 1927, approximately 11 million dollars.
4. A conservative estimate of the fires in Texas that are preventable is 85 per cent. The same per cent is estimated by the National Board of fire in the U. S.
5. Lives lost in Texas in 1922, 260; Lives lost in Texas in 1923, 210; Lives lost in Texas in 1924, 228; Lives lost in Texas in 1925, 284; Lives lost in Texas in 1926, 231; Lives lost for the first 6 months of 1927, 126.
6. Ten thousand lives lost in the United States in 1926.
7. The percentage of fires in Texas of incendiary origin for the past five years is approximately ten per cent. This estimate was hard to arrive at, but was made from the estimate on facts that were available for use.
8. Twenty-four town in Texas have wholly paid fire departments. Ninety-eight towns have partially paid fire departments. The protected towns that have wholly volunteer fire departments are 216.
9. The protection of the forest from fires is carried on under the United States Government. Texas has not forest fire department.

## ENCOURAGING

The action of twenty motion picture-producing units in banning profanity, ridicule of the clergy, and sneers at the Federal Constitution, particularly the Eighteenth Amendment, from the pictures produced in their studios gives promise of the elimination of these crude efforts at humor which for so long have offended the sensibilities as well as the taste of high-minded people. It is encouraging to those who are honestly trying to improve moving pictures to have such a forward step taken by one of the largest group of producers in the country. The educational power of pictures has made the faults now to be eliminated of special danger. They are constantly presented before children and uninformed minds, and therefore the harm is very great.—Nashville Christian Advocate

## UNPAID FOR

Complaining Customer: "That lawn mower I bought has all rusted."  
Hardware Merchant: "Maybe it's because there is so much due on it."

## Methodist Revival Progressing Nicely

A good crowd greeted Rev. Chisholm at the first service of the Methodist revival Sunday morning, and there was an especially good crowd on hand Sunday night. With unfavorable weather conditions Monday, the crowds were greatly lessened, but many braved the cold north wind and misty conditions to hear the pastor Monday night in an excellent discourse on the life of Moses. He took up the excuses offered by Moses when called by Jehovah to lead the children of Israel out of bondage, and compared the same with many of the modern day excuses not to obey God.

The morning services are announced for 10 A. M. till eleven, and the minister will deliver a series of sermons during the morning hours of this week on "The Sermon on the Mount." The evening subjects will, we understand be selected from night to night to fit the crowds.

Raymond Simms has a good choir under his direction that are rendering good music, and the pianist is assisted by two local violinists. Special songs by local soloists and others, as well as songs by the children are making the pre-sermon time real interesting and appropriate.

Many are hearing Rev. Chisholm for their first time, and the writer has heard many express themselves as being highly pleased with the plain, convincing sermons of the pastor.

## "Tell it to the Marines" Full of Big Thrills

Gee, girls! Whenever you see the blue uniform of a Marine on the street it's going to give you the thrill of your life—after you see Billy Haines in "Tell It To The Marines" at the Rialto Theatre, October 3 and 4th.

Yes—Billy is a Marine—and those who liked him in "Brown of Harvard" will adore him in his uniform, in his troubles with the tough sergeant, and his battles and adventures all over the world. It's all so human.

That's the way the whole story is. Lon Chaney as the old sergeant makes you laugh—but he makes you cry a little too—when he isn't keeping you almost screaming with excitement in the big fight with the bandits, or when he fires the big guns on the battleship.

The battleship scenes—the great fleet practice at sea—the hundreds of Marines and Chinese bandits fighting on the Hangchow plains; the strange Chinese cities and dark jungles—the cloudburst—these are all wonderful thrills.

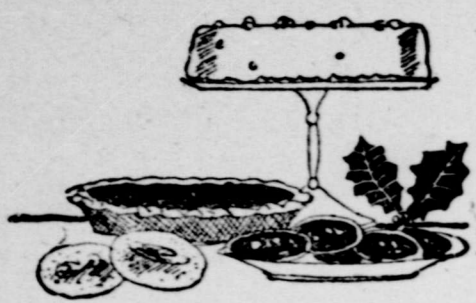

And then there is the love story of Billy Haines and Eleanor Boardman through it all. Carmel Myers is wonderful, too, as the island vamp.

## LEARN A LESSON FROM BIDDY AND BOSSEY

Poultry records kept by 542 Ohio farmers last year disclosed the fact that the Leghorn flocks which produced less than 100 eggs per bird made a labor income of 37 cents per bird while flocks producing 180 eggs per bird returned \$4.23 per bird to their owners. Further records show that dairymen whose cows produce less than 9000 pounds or 4500 quarts of milk per year stand little chance of making a profit on the year's dairying. The same fact applies to the farmer and his hired man, points out the Research Department of the National Association of Farm Equipment Manufacturers. If he does not produce a certain amount of corn or wheat per hour's work and spends more than a certain number of hours in producing an acre of crop, his chance for a fair labor return is less than nothing. Realizing this fact through keeping of records, farmers are rapidly replacing hand methods by tractors, combines, hay loaders, corn binders and other machines which double and triple his capacity for getting work done.

Amarillo—The Southwestern Bell Telephone Co. is reported to be planning a new warehouse and supply depot here.

San Angelo—Contartet has been let for the erection of a \$250,000 junior college here. The money is to be available from a bond issue.

# QUESTION BOX

ON HEALTH subjects Edited by  
STATE DEPARTMENT of  
HEALTH  
J C Anderson MD State H.O

THIS column will be given to discussion of matters pertaining to public health. Any questions regarding public health administration, prevention of diseases, child care, sanitation, etc., will be answered in succeeding issues of this paper. Questions in regard to cure of diseases will not be answered, as the scope of this Department includes only disease prevention. Address Question Box, State Department of Health, Austin.

#### QUESTION

1. Can you give an expectant mother some advice that would be helpful to her at this critical time?
2. Is there any substitute for a mother's milk that is equally as good?—(Mother.)
3. Do you recommend immunization of children against diphtheria as a protection against this disease?—(J. R. D.), Bonham.
4. I have been bothered very much during the past year by cockroaches, and would appreciate it if you would tell me how to get rid of these pests.—(Housekeeper), Killen.
5. Are cockroaches disease carriers?—(Housekeeper), Killen.
6. What is the difference between Certified Milk and that which is Pasteurized?
7. The milk that I have been using has an odor that is very noticeable at times. Is its use likely to be harmful to health?—(Don't give name)
8. I am bothered very much with hay fever in the fall of the year. Is there a cure for this disease?

#### ANSWERS

1. The bureau of child hygiene of the state department of health, has prepared a series of parental letters which are sent to any expectant mother upon request. These letters give advice upon minor matters such as diet, rest, exercise, dress, etc., but are not intended to take the place of one's physician, as every expectant mother should place herself under the care and direction of her family physician in the early stages of pregnancy.
2. No, there is no substitute for a mother's milk that is as good. When other milk is used, it should be modified, and made as near like the baby's natural food as possible. As babies differ, and what will agree with one does not always agree with another, one's family physician should be consulted when other food than baby's milk has to be given baby.
3. Yes. Toxin-antitoxin will prevent diphtheria, and can be given without any harmful results to the child. Every child between the ages of 1 and 10 years, should be given this immunization.
4. One of the most effective simple means of getting rid of roaches, is to take commercial sodium fluorid, and mix with an equal part of flour, and dust on tables, shelves and runways of these pests.
5. We have no positive proof that cockroaches are disease carriers, but they have been suspected as being such. They are among the most offensive insects which habit human habitations, and where they occur in any numbers, leave an offensive, sickening odor. This odor comes partly from the excrement, but chiefly from a dark colored fluid from the mouth of the insect.
6. Certified milk is the very best, freshest, cleanest, and purest milk milk that is possible to produce, and is called Certified, because it has to

be passed by a medical milk commission, before it can be sold as such. Pasteurized milk, is milk that is heated to 148 degrees Fahrenheit, and kept at that temperature for 30 minutes.

7. Milk absorbs odors and flavors readily, and will soon taste of any strong flavored food which is placed near it. Milk should have no odor, and a "cowy" odor to milk, probably means smelly barns, poor dairy methods and tainted milk. Any offensive odor to milk should be a good reason for stopping its use, and procuring milk from another source.

8. Hay fever is usually caused by sensitization to the pollen of plants. Experiments made by the director of our state laboratory show that the cedar pollen is the most offensive in this respect. It is possible to ascertain the pollen or pollens to which a hay fever sufferer is sensitive, and quite often, relief can be obtained through this knowledge.

#### Victorian Orators

The marquis of Huntly knew most of the leading political figures of the Victorian era, and in his recent book of reminiscences he contrasts the methods of some of the great parliamentarians. The most successful speakers, he says, are not those who wave their arms with perferid declamation. Parnell, who never moved from an erect attitude, and spoke in measured sentences, with a cynical manner, was very effective. Dilke, on the other hand, in speeches crammed full of knowledge, was too verbose and seemed to tire the house. Joseph Chamberlain, in his clear-cut tones with a penetrating and incisive voice his right arm moving slowly to point or emphasize a remark, was one of the most delightful speakers to listen to. The marquis of Huntly adds that Sir William Harcourt was fluent and bombastic.

#### Strauberreries Beauty Aid

Dr. Walter J. Svingle, a field agent of the Department of Agriculture, has arrived at San Francisco with specimens of strange and exotic fruits from the Orient. Among them is what is described as a giant strawberry, a strawberry wonder said to grow on a tree.

The idea of plucking strawberries from trees is sufficiently novel in itself, but it is further set forth that this fruit of the tree has remarkable beauty-giving powers. Those who eat of it may, as a result, reduce their weight, and, at the same time, beautify the complexion. Its native habitat is on the Chinese coast, south of the Yangtze river, but it is believed that it may be grown in many parts of the United States.—Boston Transcript.

#### Largest Loom

At Rodewisch, in Saxony, the center of the German textile industry, there is in operation what is thought to be the largest weaving loom in the world. This huge crank loom is 77 feet long and 60 feet wide. It stands 10 feet high and weighs 35 tons. The shuttle is of corresponding proportions, and travels to and fro at the rate of 15 times a minute.

This machine is capable of turning out seamless disks of felt, such as are used in paper mills, up to 233 feet in circumference.

#### Legend of Faust

Faustus (Dr. Johann Faust) was a person born at Kündling, Wurttemberg, or at Roda, near Weimar. He is said to have died in 1538. He was a magician, soothsayer and astrologer, and boasted of having performed the miracles of Christ. It was believed that the magician was carried off by the devil, who had lived with him in the form of a black dog. Legends say that this event occurred on the night between the twenty-third and twenty-fourth of October, 1538. Goethe's tragedy (published in 1808) is based on the Faust legends.

#### Complete Success

### C. D. SHAMBURGER

"ALL KINDS OF BUILDING MATERIAL"

#### THE DAIRY COW'S

##### CHEAPEST FEED

The owner of a cow which produced 10,584 pounds of milk and 542.6 pounds of butter fat last year was asked, "what is the cheapest and best form of food for dairy cows?"

"Pure water," he replied. "Eighty-seven per cent of milk is water and farmers should be sure the water is put in the cow and not in the milk can."

A high producing cow will consume from 25 to 30 gallons of water per day, says the research department of the National Association of Farm Equipment Manufacturers, and to insure maximum production she should have access to pure, palatable water at all times. Cow testers have found that with the installation of drinking cups in the cow's stall the milk production increased as much as 8 per cent immediately. A reliable automatic water supply system has proved to be one of the most important parts of a dairy farm's equipment.

#### NEW BUILDING FOR

##### TECH STARTS SOON

Lubbock, Sept. 23—Construction work on Texas Tech's \$240,000 engineering building will be started not later than Monday, September 26, J. W. Sampson, of the Sampson Construction company, stated last night. Mr. Sampson's firm was awarded the general contract for the construction of the building yesterday afternoon when members of the Board of Regents' committee on buildings met at the college.

Fourteen general construction bids were received by the committee, and the successful figure was \$194,125. The J. E. Morgan company of El Paso, was next with \$194,420. The Sampson company has headquarters in Lubbock.

The American Automatic Appliance company of Amarillo, was awarded the wiring contract; Johnson and Davis will do the plumbing and Young and Pratt the heating.

"Where there is no vision, the forest perishes—and the people." Dr. C. A. Schenck.

There are 60 species of oak in the United States. Only about 14 of these are of commercial importance as furniture wood.

J. Edgar Fite has changed his address from Seagraves to Brownfield.

### OPERATED ON FOR APPENDICITIS WITHOUT PAIN

Thursday morning Mr. Thurman Whitis, whose home is in Levelland, was operated on for appendicitis under local anesthetic. During the operation which consumed only fifteen minutes, the young man discussed with the doctors and nurses the approaching prize fight, and when the operation was completed, he declared he had not had any pain at all. Mr. Whitis is in Lubbock attending Tech College this year.—Lubbock Sanitarium News.

### BAKE SALE

If you will phone us early we will deliver your preferred cake or pie. Philathea S. S. Class Bake Sale, door east Chapman's

### STOMACH GAS DRIVES MAN FROM BED

"I had gas so bad I had to get up nights on account of the pressure on my heart. I used Adlerika and have been entirely relieved."—R. F. Krueger.

Even the FIRST spoonful of Adlerika relieves gas and often removes astonishing amount of old waste matter from the system. Makes you enjoy your meals and sleep better. No matter what you have tried for your stomach and bowels, Adlerika will surprise you. Alexander's Drug.

### BAKE SALE

Buy your cakes and pies from the Philathea S. S. Class, Saturday. You will find them door east of Chapman Dry Goods.

CHATTEL MORTGAGES—At the Herald office now, at 5c each or better prices in quantities.

GOOD 5-room house, stuccoed and plastered, with bath and water furnished free and fair barn and garage,

### Not in This World

Men and women do not get along well. The quarrel is mainly about money. A woman never seems to care much because her husband isn't as much of a lover as when they were first engaged. She doesn't expect it; and realizes she has cooled off, too. We have learned that these things are natural, but men are still shocked at the extravagance of women, and women are still shocked at the stinginess of men. Is there any way of coming to a better understanding on this subject of money?—E. W. Howe's Monthly.

### Comedienne

Here's another one on Allentown. A visitor recently dropped in a restaurant on the "main drag" and after perusing the menu, ordered the native dish of sauerkraut and spare ribs. There must have been an unusually heavy run on that savory platter, for the Pennsylvania Dutch waitress shook her head and said: "All." Wishing to be funny, the man returned: "All what?" She: "All over." He: "All over what?" She finally: "All over with."—Philadelphia Record

### First Fossil

What is probably the first fossil to have been collected by man is in the possession of Barnum Brown, associate curator of fossil reptiles in the American Museum of Natural History. The priceless relic is an elephant's tooth dating back around 5,000,000 years and was picked up by Mr. Brown in the ruins of the Asklepieion, the medical school of ancient Greece, where Hippocrates, the father of medicine, carried on his studies.

### Roman Numerals

The Romans had no symbols to indicate mathematical processes and operations. Originally they expressed every process and operation in words of full length. Their mathematical calculations were never simplified further than to abbreviate centum, 100 into C; mille, 1,000, into M, and so on. The Romans were never reputed specially good mathematicians and they contributed little to the science.

### BUFFALO WALLOW BATTLE GROUND MARKED

"Stand silent, heroes, here have been, who cleared the way for other men."

These lines are engraved on a monument which is placed on a Texas Panhandle site where 53 years ago Monday six white men defeated 125 Kiowa and Comanche Indians, fully armed and on the war path. This historic battle took place Sept. 12, 1871, at Buffalo Wallow, in what is now Hemphill county, 22 miles southeast of Canadian.

Buffalo Wallow is 75 miles southeast of Adobe Walls where the battle of Adobe Walls occurred less than three months before the Buffalo Wallow battle. Three thousand people gathered at Adobe Walls on June 27, 1924, the 50th anniversary of that battle, and unveiled a beautiful monument commemorating the bravery of the 28 white men who defeated 700 Kiowa, Cheyenne and Comanche Indians.

Two scouts and four soldiers composed the little band which won the Buffalo Wallow fight. The scouts were William Dixon and Amos Chapman, who were scouts under General Nelson A. Miles. The soldiers were Sergeant Z. T. Woodall, and Privates Peter Rath, John Harrington, and George W. Smith. General Miles was in command of a campaign against the Plains Indians in 1874, and was camped on McClellan Creek, his base of supplies being at Fort Supply in Indian Territory. Rations were running low and on Sept. 10, the General Dixon and Chapman with dispatches to Fort Supply for relief. Four soldiers were sent as guards.

Early one morning, when the little party was approaching a divide between the Washita river and Gageby creek, they encountered the Indians, who upon seeing them, circled quickly and surrounded them. They saw at once that they were in a trap and the best thing to do was to make a stand and fight for their lives. Realizing that they could work better on foot, they dismounted and placed their horses in the care of George Smith. In a moment Smith was shot down and the horses stampeded. In less time than it takes to tell it, all the men were wounded, four seriously. Billie Dixon seeing a buffalo wallow where the buffalo had wallowed in the soft earth a short distance away made a dash for the slight protection and called for his companions to follow. It was several hours before all the men succeeded in reaching the depression. Chapman's knee was shattered by a bullet and he could not walk. Dixon at the risk of his own life, carried Chapman in on his back. Using their hands' and butcher knives they were able to throw up a slight breastwork for protection from the Indians.

About 3 o'clock a black cloud came up in the west and in a short time rain fell in blinding sheets. Water gathered in the Buffalo wallow and the wounded men bent forward and drank from the muddy pool. It was more than muddy—the water was red from blood that flowed from their wounds.

During this time Smith lay where he had fallen and during the day gave no sign of life. Late in the afternoon someone suggested that as he had been shot early in the fight his belt would be full of cartridges. Ammunition was running low and Rath offered to go for the belt and soon returned and said Smith was still alive. Dixon and Rath at once got ready to bring the wounded man to the wallow and by supporting him between them he was able to walk. He died during the night.

Billy Dixon believed the rain saved their lives. A chilling wind came up from the north and the wounded men shivered in their thin clothing. An Indian dislikes rain, especially a cold rain, and these were no exception to the rule. They gathered in groups out of rifle range, sitting on their horses with their blankets drawn tightly around them watching their prey. Night was approaching, said Dixon, and it looked blacker to me than any night I had ever seen. Ours was a forlorn and disheartening situation. The Indians were still all around us, the nearest relief was 75 miles away. Of the six men in the wallow, four were badly wounded and without anything to relieve their suffering. We were cold and hungry, with nothing to eat and without a blanket, coat or hat to protect us from the rain and biting wind. It was impossible to rest or sleep on the damp ground.

Like everything else, the long night came to a close and the sun rose clear and warm the next morning. The Indians were not in sight and had evidently abandoned the attack sometime during the night. Early the morning of the second day Billy Dixon started for help. He had gone over a mile when he struck the main trail leading to Fort Supply. Hurrying along as fast as possible he got sight of an outfit that covered about an acre. This proved to be a detachment under Major William R. Price of the 8th U. S. Cavalry from

Fort Union, New Mexico, on its way to join General Miles' command.

Major Price rode over to where the wounded men were, taking his surgeon with him, and the latter examined their wounds. The soldiers turned over a few pieces of hard tack and some dried beef which they had tied behind their saddles. The Major refused to leave with the wounded any of his men, nor would he provide them with firearms. Their ammunition was exhausted and the soldiers carried guns of different make and caliber from those in buffalo wallow. However, Major Price promised to let General Miles know of their condition.

And so the little band watched and waited until midnight of the second day after the troops passed until help came. Then from far off in the night came the faint sound of a bugle nearer and clearer it came. A gun was fired and soon the soldiers came riding out of the darkness.

As soon as the wounded could be turned over to the surgeon, the body of George W. Smith was wrapped in a blanket and placed in the buffalo wallow, where the brave men had fought and suffered together, and covered with the dirt that had been rigged up for breastworks.

The wounded scouts and soldiers were sent to Camp Supply where they received careful treatment. Chapman's leg was amputated below the knee. Thus ended an episode in the history of the Texas Panhandle which is worthy of comparison with the most courageous deeds recorded in our country. The congress of the United States recognized the heroism of the participants in the battle by awarding them congressional medals of honor. Of the six men who fought, there is not one living. Amos Chapman was the last to go. He died at Seiling, Okla., July 18, 1925.

The site of the Buffalo Wallow Indian battle ground, southwest of Canadian, was marked with an appropriate monument on Tuesday, Sept. 20, by the Panhandle-Plains Historical Society. Large delegations of old timers and members of the Historical Society attended. A basket lunch was served at noon.—By Olive K. Dixon.

Furniture wood at the time of manufacture should have a moisture content of about 6 per cent. This is about the average of moisture it will contain during its life, although this fluctuates with the seasons and with the humidity in the atmosphere.

### Napoleon Had Planned Unification of Europe

But though he dismisses Fouché from his ministerial post and has the watcher watched, Napoleon cannot get on without him and talks to him about the most private matters.

"Since my marriage people fancy that the lion is asleep. They will soon learn whether I am asleep. I need 800,000 men and have them; I shall tow all Europe in my wake. Europe is nothing more than an old woman and with my 800,000 men I can make her do whatever I please. . . . Did not you yourself say to me, 'You let your genius have its way, because it does not know the word impossible?' How can I help it if a great power drives me on to become dictator of the world? You and the others, who criticize me today and would like me to become a good-natured ruler—have not you all been accessories? I have not yet fulfilled my mission and I mean to end what I have begun. We need a European legal code, a European court of appeal, a unified coinage, a common system of weights and measures. The same law must run throughout Europe. I shall fuse all the nations into one."—From "Napoleon, the Man of Destiny," by Emil Ludwig.

### Dog's Smart Trick

An old hunter says that on one occasion a small dog belonging to him chased and caught up with a very large raccoon. The dog flew at his enemy and tried to shake him, but the raccoon, being quick, caught the dog by the side of the head.

His teeth were sharp and his hold firm, so that the dog found it impossible to break loose. Suddenly, as if a bright idea had occurred to him, the dog began to drag the raccoon into a neighboring creek.

Once in the water the dog held the raccoon under the surface, adroitly keeping his own nose out, until the raccoon released his grip. Then the dog easily mastered the half-drowned animal.

### Lucky

A woman with a particularly disagreeable expression had been holding forth to the man sitting next to her at the dinner party.

"Ah," she said at last, "my husband has always been lucky. As a child he was thrown by a horse, but wasn't injured; as a youth the ice broke beneath him, but he wasn't drowned; and as a young man he was caught in an avalanche, but escaped uninjured."

"Yes," put in the man, quietly, "but strangest of all he has now been married to you for 20 years and is still alive."—Pittsburgh Chronicle-Telegraph.

### NOTICE OF FIRST MEETING OF CREDITORS

In the District Court of the United States for the Northern District of Texas in Bankruptcy. Abilene, Texas.

IN THE MATTER OF A. B. Cook & Son, a partnership composed of Archie B. Cook and Allen Guthrie Cook, as a firm and individually, bankrupt. No 1217, in Bankruptcy, Abilene, Texas, September 25, 1927.

OFFICE OF REFEREE: To the Creditors of A. B. Cook & Son, a partnership composed of Archie B. Cook and Allen Guthrie Cook as a firm and individually of Brownfield in the county of Terry and District aforesaid, a bankrupt. Notice is hereby given that on the 9th day of September A. D., 1927, the said A. B. Cook & Son, et al, as aforesaid, was duly adjudged bankrupt and that the first meeting of his creditors

will be held at my office in the city of Abilene, Taylor County, Texas, on the 11th day of October A. D. 1927 at 10 o'clock in the forenoon, at which time the said creditors may attend, prove their claims, appoint a trustee, examine the bankrupt and transact such other business as may properly come before said meeting. D. M. Oldham, Jr. Referee in Bankruptcy.

Rich Bennett will arrive in Brownfield Friday to officially take charge of the Sanitary Barber Shop. Chief cashier Wilt Alf Bell of the First National Bank had business in Munday, Texas this week.

"My wife is threatening to leave me." "That's tough. Can't you get her to promise?"

Official paper of Terry County.

Cotton had begun to arrive in Brownfield pretty fast last week but the rains of the first part of this week has put a big crimp in receipts. As it has waited this long, it is now hoped that pretty weather will prevail until the crop is gathered.

The Brownfield Herald copied two short items from the Advance last week that the Herald editor thought sounded a little queer, and asked, "what the Advance editor had been drinking." We have not had a thing but gyp water recently, but admit that white corn gave us the inspiration for the items mentioned. Isaac is the given name.—Rotan Advance.

We often imagine that many of the Asiatics live more cheaply than we because most of their foods are made and gathered by hand with very cheap labor. Our attention was recently called to the fact that Texas and Louisiana rice that was machine harvested at least, was freighted to Japan and sold in competition with Japanese rice made and gathered by 30c per day labor, when our labor was costing nearer 50c per hour. Just so, our cotton, machine raised and gathered cannot be duplicated in Egypt with the cheapest kind of labor.

Contrary to the commonly accepted idea that farm families spend much less for clothing than their city cousins an investigation by the Bureau of Home Economics of the Department of Agriculture indicates that clothing allowances are approximately equal in the two groups. Only in families having incomes well above the average is there a wide difference, with city families spending more. In 1,337 farm families covered by the survey the average total expenditure was \$1,559, of which \$225 was spent for clothing. City families with about the same total expenditure averaged \$238 for clothing.

The old idea of every man for himself is rapidly becoming a practice of the past. Those who have experienced working with others for the general benefit of the business as a whole have found that they have received greater individual benefit than when working for self alone. Co-operation is team work and many working together for the development of a business as a whole will

accomplish much more than single effort. Playing a lone hand in any line of business is harking back to the days of the stagecoach.—Wisconsin Press "Howler."

We noticed a comment from a very prominent man recently that rather caught our attention. The gentleman's business had a great deal to do with farm statistics, and it was his habit to get the local chamber of commerce secretaries to go with him among the farmers. Naturally, some of these secretaries recognized almost every farmer, and called most of them by first name, while on the other hand, many of them had to first introduce themselves to most of the farmers. This gentleman found that it was very much easier for him to get just what he wanted and right now when he found a secretary that knew the farmer, and he advises all chambers to be sure they are securing a man that will not only learn the names of city folks, but also the farmers of the county. Such a man can serve them much better.

Last week's Lynn County News carried 181 inches of foreign advertising and 223 inches of local advertising, the latter being a very poor showing for a town the size of Tahoka. In other words out-of-town business men bought three-fourths as much space in last week's News as did the local business men. Local businesses should have carried at least three or four times as much advertising as did the foreign advertisers. Big business has learned that advertising even in the thousands of country weeklies of the nation is paying proposition, and nationally advertised businesses are rapidly putting the concerns out of business that do not advertise their wares or their service. Small town merchants should profit by what the big business men of the nation have already learned—advertising pays. Start an advertising campaign, advertise judiciously and we'll guarantee that it will be a paying proposition to you regardless of how long you have been in Tahoka or how small or whatever your business is.—Lynn County News.

He: "Any one can see a lot of grace in that dance."  
She: "You're wrong. Her name is Helen."

"Here about the Scotchman who just went insane?"  
"No, what was the matter?"  
He bought a score card at a game and neither team scored.—Webfoot.

M. on said day, at the Courthouse door of Terry County, Texas in the town of Brownfield, I will offer for sale and sell at public auction, for cash, all the right title and interest of the said A. J. Burks in and to said property.

WITNESS my hand, this 3, day of September A. D. 1927,  
F. M. Ellington,  
Sheriff of Terry County, Texas.

### Common Thing Now to Advertise for Mates

It is customary in France and Germany—and particularly Germany—to advertise for a husband or a wife, as the case may be. Judging from the newspapers, indeed, it would seem as though the respective countries were full of well-endowed men and women who, for some reason, have failed to find the right person with whom to share their lives.

It is rather new to see the same procedure in England in the guise of well-advertised newspapers devoted almost entirely to the promotion of marriage. In England the romantic view of marriage has held, at least in the story, and King Cophetua and the beggar maid have everywhere received approval, tacit or other.

There is the greater difficulty of marrying today owing to the discrepancies in the number of men and of women. It is probably a feeling that many women are practically unable to marry today which has caused greater concentration on the subject of marriage to the extent of making it almost a public matter.

Quite apart from the natural desire to marry, the life of the single Englishwoman is often intolerably lonely. She has her work, but she has little besides. And work for work's sake is a dull business. A single man, besides being better paid, has community interests, which are as a rule not shared by women. He has his club, his games, even his favorite bar.

He has strength left over at the end of the day to be vigorous concerning politics or some other hobby. The woman has a narrower sphere, and she has not as a rule the necessary money with which to enlarge it. Matrimony provides some refuge from loneliness—a loneliness from which in the rather sad world of today, the average woman is thankful to escape.—Manchester Guardian.

### New Religions in Russia

In Kobryn, Poland, and in neighboring localities a new religious movement is developing among the Jews. They are said to be breaking away from the orthodox Jewish church and are being baptized as Protestants. Long curls are being cut off and black robes are being exchanged for European dress. Last month 142 Jews, in Kobryn, were baptized as Protestants. Some observers speak of it as a mass desertion from the Jewish faith. Another movement is in the form of a new religion, which resembles communism, but is more like a free-thinking sect. Many members of this sect receive liberal funds from America. Both ideas seem to have come from over the Russian frontier. In both Russia and eastern Poland Baptists are making converts, mostly among Ukrainians and White Russians. In Yugo-Slavia a new and strange sect was discovered recently. It was headed by a German, Otto

Webb. Gendarmes arrested Webb on his eight converts. He was teaching resistance to compulsory military service, and refusal to use arms. Pacifism the Serbs took upon will keep deep suspicion.

### A Lesson

Governor Ritchie of Maryland said in a talk to high school graduates:

"I was sixty when he began to write the tense prose dramas that won him world fame.

"Bernard Shaw had to compose over a dozen excellent plays before the big managers would look at him.

"Wagner was a middle-aged failure, was about to commit suicide when the king of Bavaria agreed to finance his operas.

"These facts show us that failure is due to a lack of perseverance, often rather than to a lack of ability. The road to success, in fact—"

And Governor Ritchie emphasized his words with a trenchant gesture.

"The road to success," he repeated, "is all choked up with men who, getting discouraged, have turned back."

### Plants Useful During War

Among the ingenious uses to which plants were put during the World war were: Sphagnum moss, dressing for wounds; charcoal from fruit pits used for gas masks; birch and willow pulp, used as a substitute for cotton and the nettle for making textiles; meal obtained from clover, horse chestnuts, oats, Indian corn, barley, beans, peas and buckwheat, used in place of flour; roasted barley and oats and roasted acorns and beech nuts, substitute for coffee; in Germany eventually a substitute for coffee was made from carrots and yellow turnips; bloom of the linden tree mixed with beech buds was found to make an excellent beverage; roasted peas and oats, a substitute for cocoa.

### Trail-Measuring Easy

One of the foresters of the Yosemite National park has devised a cyclometer to use in connection with trips over the trail where ordinary surveying methods would be prohibitive, says Scientific American.

He uses an ordinary cyclometer and wheel attached to a long handle, which he can manipulate while he is riding his horse. The cyclometer is attached to the hub. It works very nicely and gives rough computations which are all that are needed. This device is a variation of the well-known odometer.

### Time Will Remedy That

They start 'em young out in Hollywood. According to reputable information, Jackie Coogan and his director had a bit of an argument recently while filming the youthful star's latest picture.

"See here, Jackie," began the director. "I've directed bigger stars than you."

Jack interrupted with a scornful look.

"Bigger, yes, but only 14 size," he retorted.

### BENEFIT PARTY

The Maids and Matrons Club entertained with a benefit bridge party at the home of Mrs. Dalton Lewis, Thursday afternoon at four o'clock. The party was given for the purpose of raising money to sponsor "Book Week" the third week in November. After several games of bridge, score was counted and high went to Mrs. Michie, a six month's subscription to the library, and next to high went to Mrs. Brownfield, a three month's subscription. The guests were served informally with a plate of sandwiches, plate of potato chips and tea on each table. The ladies present were Meses. W. A. Bell, Earl Jones, A. M. Brownfield, Hurst, Gracey, Claude Hudgins, Fred Smith, W. C. Smith, Stricklin, Ellington, Fagala, Holmes, King, Michie, May, Flem McSpadden, Graham, Miller, Winston, and Bowers and Misses Marie Bell and Margaret Bell.

### CHARLIE ENDERSEN'S BIRTHDAY PARTY.

Friday afternoon, September 23, at four o'clock, Charlie Endersen celebrated his fifth birthday by inviting a host of friends to his home. When the cake was cut, he found the thimble, Gene Green, the button, Bobbie Virginia Bowers the ring and several found marbles. Cake and ice cream cones were served. The following guests were present: Rebecca May, Tuella and Wanda Graham, Lucille McSpadden, Eunice Michie, Virginia, Joe Pete and Thelda May, Charles and Buck Michie, Kathleen and Mary Earl Alexander, Queenelle Sawyer, Elray, Bobby and Von Dee Lewis, Katherine Copeland, Laddie Lynn and Jane Brownfield, Odie and Junior Greenfield, Caude, R. W., Vera, Jimmie and Martha Jackson, Betty Shelton, Earlene and Evelyn Jones, Jim Shelton, Billy McGowan, Aubry Wayne and Vernal Brothers, Gene Green, Helen Quante and Bobbie Virginia Bowers.

### OOKEY CLUB WITH MISS ELLINGTON.

The Ookey club met Friday afternoon immediately after school at the home of Miss Eileen Ellington. The young ladies put on a modern play contrasting the modern flapper with her old-fashioned sister. Lemonade and cake were served and then later ice cream sandwiches were served. Members present were Misses Alma Brown, Kathryn Holgate, Pauline Hunter, Francis Brownfield and Lenore Brownfield with Miss Florence Holt as guest.

### MRS. BROTHERS ENTERTAINS FRIDAY FORTY TWO.

Mrs. Brothers entertained the Friday Forty Two Club, September 23, at four o'clock. During the games punch was served and when the guests were through playing, they were served delicious fruit with whipped cream and Angel Food cake. Those present were Meses. Dalton Lewis, Collins, Michie, McBurnett, Downing, Clint Rambo, Claude Hudgins, Graham, Dallas, Hamiton, Chester Gore, Hurst, Longbrake, Knight, Ditto, W. C. Smith, Kendrick, Scudday, Tiernan and Glenn Harris.

### GRANVILLE LYNN BOHANNAN'S PARTY.

Monday afternoon from four to six Mrs. J. C. Bohannan entertained a number of little folks in honor of her son's, Granville Lynn, second birthday. Hot chocolate and cake, candy and fruit were served. The guests present were Mary Lena Winston, Juanita Bryant, Marjorie Sue and Kathleen Bynum, Velmaice Burnett, Marion Kenny, Geraldine Py-catt, Billie Hudgins, Buster Burnett Oral Greenfield, Jack Kenney, Joe Bob Burnett and L. C. Kenney.

### MISS MARY ANN BELL ENTERTAINS.

On Saturday evening, Miss Mary Ann Bell was hostess at a dinner party given in honor of a few of her friends. Covers were attractively laid for six. A three course dinner consisting of fried chicken, cream gravy, rice; Potato croquettes, English peas, stuffed olives, pickles, grape salad; banana sherbet, cake and iced tea was served to the following: Misses Sue Crawford, Ruth Lawlis, Fay Brown, Espie Castleberry, Margaret Bell and the hostess. A very enjoyable time was had by all.

### MRS. MCGOWAN'S BRIDGE PARTY.

Mrs. Joe J. McGowan entertained Tuesday afternoon at three o'clock with a bridge party. Fame and ruse colors were used, carrying out the autumn motif. Mrs. Henry Alexander won high score, a beautiful light shade, and Mrs. Tom May won next to high, a leather cool book. A delicious salad course was served to the following: Meses. Earl Alexander, Ray Brownfield, A. M. Brownfield, Dallas, Endersen, May, Miller, King, McDuffie, Fred Smith, Bailey Shelton, DuBois, Collins, Michie, Holmes, Lewis, Arthur Sawyer, McSpadden, Henry Alexander and Bowers.

The Freshman class was organized September 16. Green and white were chosen as the class colors with the motto, "Green but growing." The following officers were elected:

Miss Espie Castleberry, Sponsor; Eileen Ellington, President; Alma Brown, Vice Pres.; Pauline Hunter, Secretary and Treasurer; Kathrine Holgate, Reporter.

The Presbyterian Missionary Society met Monday afternoon at the home of Mrs. Ellington with Mrs. Alexander as leader. The topic of study was Africa. The members present were Meses. Shelton, Earl Alexander, May, Flem McSpadden and Miss Perkins.

Mrs. Vernal Renfro of Amarillo is visiting her parents Mr. and Mrs. L. F. Hudgins.

Sunday, Mr. Cecil Smith carried his wife and children to visit Mrs. Smith's parents Mr. and Mrs. Ross Renfro near Amarillo.

### SANSOUCI CLUB ORGANIZED

Tuesday evening some of the young ladies of the town met at the home of Miss Violet McBurnett to organize a club for the home town working girls. Sansouci was the name selected. The chief diversion will be bridge but other entertainments are also planned. Miss Margaret Bell was elected President. The members of the club are: Misses Violet McBurnett, Marie Bell, Aggie Hamilton, Lucy Drury, Lucille and Nelle Flache, Margaret Bell and Belle Williamson.

The club will be entertained at the home of Mrs. A. J. Stricklin, Friday night, but Tuesday of each week has been selected as the regular meeting date.

### SIX O'CLOCK DINNER

Mr. and Mrs. F. M. Ellington entertained Saturday, September 24 with a six o'clock dinner, followed by "42" party at 8 o'clock. After the games delicious fruit cake and punch was served to the following: Mr. and Mrs. Dick Brownfield, Mr. and Mrs. Tom May, Mr. and Mrs. Ray Brownfield, Mr. and Mrs. W. H. Dallas, Mrs. Glen Harris and Miss Perkins.

### NOTICE OF BIDS WANTED

The State of Texas, County of Terry.

Notice is hereby given, that the Union Independent School District at its October meeting, A. D. 1927 the same being the 12th day of October A. D. 1927 will receive proposals from any Banking Corporation, Association or Individual Banker, in said Terry County, that may desire to be selected as the Depository of the Funds of said Union Independent School District.

Any banking corporation, Association or Individual Banker in Terry County, desiring to bid shall deliver to T. C. Garner, President of said Board of Trustees on or before 1 o'clock P. M. on the 12th day of October A. D. 1927, a sealed proposal stating the rate of interest that said banking corporation, association, or individual banker offers to pay on the daily balances of the funds of said Union Independent School District payable every 30 days, for the term between the date of such bid and the next regular time for the selection of a Depository.

Said proposal shall be accompanied by a certified check for not less than \$100.00 as a guarantee of the good faith on the part of the bidder, and that if his or its bid should be accepted he will enter into a bond as provided by Article 2771 of the revised Civil Statutes of the State of Texas for 1925; and upon the fail-

ure of the Banking Corporation, Association or Individual Banker that may be selected as such depository, to give bond as required by law, the amount of such certified check shall go to the Union Independent School District as liquidated damages, and the said Board of Trustees shall re-advertise for bids. Said Board of Trustees reserves the right to reject any and all bids.

Given under our hands at Brownfield, Texas, this the 22nd day of September A. D. 1927.

T. C. Garner, President of Union Independent School District Trustees.

Attest: J. A. Drennan, Secretary of said Board. (10-7.)

Wife: "Did you notice the chin-chilla coat on the woman sitting in front of us at church this morning?"

Husband: "Er—no. Afraid I was dozing most of the time."

Wife: "Um! A lot of good the service did you."

Judge: "Do you mean to say you stood by and allowed this man to brutally beat his wife and not render assistance?"

Witness: "He didn't seem to need any help."

### Devotee of Lamaism Has Simple Belief

The biggest word in Lamaistic nomenclature is circumambulation—the philosophy and simplicity of simply going round and round some inanimate holy object.

Some religions are comparative. Lamaism is entirely and completely round. The devotee of this mystic system spends his life on earth going round something and turning round and his life in hades continues the unending movement, the wheel of transmigration, says the North China Herald.

The poor Tibetan, morning, noon and night, with his hands and feet and brain is eternally going round and round. He walks round sepulchers, cenotaphs and holy symbols; he walks round stone heaps, temples and mountains; he will patiently and laboriously and persistently circumambulate any and every holy object and while doing so manipulate his rosary in one hand and turn his prayer wheel in the other.

Whoever invented and perpetuated this form of religion bequeathed to the inhabitants on the roof of the world a system at once so simple and ingenious, so satisfying, and accommodating, so free from hypothesis and argument, that the Tibetans have adopted it en masse and now spend the greater part of their lives walking round some sacred edifice, firmly believing the more they go round in this life the less they will go round in the next.

Imagine Dean Inge spending 40 years walking round St. Paul's cathedral, or Bishop Tucker passing his days circumambulating Lake Chad. If it were not so absolutely serious and so patently hopeless, this whole system would seem utterly ridiculous.

There is a wealthy Tibetan temple in Tachienlu, situated quite near the riverbank. An old man nearly seventy and an old woman just around the same age spend their days walking round this building. The old man's lips mumble "Omni-padme-hum," the old man's head turns Omni-padme-hum and the old man's legs walk round Omni-padme-hum. We occasionally meet him and he smiles but keeps on forever going round and round. His rosary tells him how many times he has prayed and how often he has circumambulated the holy temple.

Circumambulation is considered one of the most meritorious and indispensable duties in the Lamaistic religion and is performed sometime, somewhere, by everybody in the forbidden land.

### Skyline Road

In the vicinity of Canon City, Colo. is a unique road. It lies along the summit of a hogback ridge a thousand feet above the surrounding plain on both sides. This drive is about 35 feet wide. It winds to and fro and sweeps gently up and down on the narrow crest for about four miles. The view from this skyline is beyond description. The top of this ridge is really the "skyline" on the west of Canon City, and as vehicles are driven along the skyline for miles they are silhouetted against the sky in a very interesting fashion. Thousands of autos visit this place every year to take a ride over this unique road, which is as smooth as a city street. It is a monument to John Cleghorn, warden of the State prison, who has the work done by convicts, free to the state.

Arlington—The North Texas Agricultural College has completed plans for a \$100,000 science building.

Oats make a splendid feed for the dairy cow if they are ground and properly mixed with other concentrates. They are just about as high in digestible crude protein as wheat bran, and cottonseed meal.

A flaming meteorite, 25 pounds in weight, is reputed to have caused a recent forest fire in the Walla Walla section of the Umatilla National Forest in Oregon. The meteorite, according to reports to the Forest Service, broke off a 28 inch tree 20 feet from the ground and lodged in the stump.

Good dairy cows while milking should not be overly fat. They can well be fed enough to put on some flesh during the dry period and should be fed so as to keep in good condition while in milk. The general principles for correct feeding are (1) feed a balanced ration, (2) feed according to production—all the good roughage that the cow will consume, and generally 1 pound of concentrates for each 3 or 3½ pounds of milk produced. If a balanced ration is fed and the cow gets too fat, the amount of feed should be reduced somewhat. If she is producing heavily and getting poor in flesh, she is either not receiving enough feed or the ration is not properly balanced.

Quick silver production is growing in Brewster county. One mine has produced 4,500 flasks. The total production since the mine started has been about 98,500 flasks.

The average milk production per cow in Texas increased 660 pounds from 1919 to 1925. Texas has 849,240 dairy cows, producing nearly \$50,000,000 in dairy products.

Texas has more than 600,000 telephones, of which about 400,000 are Bell System phones and 200,000 are independent company phones.

### LIVING ON ONE'S INCOME

A former young bank teller of Kansas City, arrested in Los Angeles on a charge of embezzlement, explains in defense that he was led to take the bank's money because he could not support himself and his wife on the salary he received. The salary was \$150 a month, the youth was 21, and, of course of limited experience. We need not enlist the aid of the experts to tell us how well a young man and his wife can live on the income this youth had. But it is enough to state that many thousands of young couples do live on it, on even less, many of them with children to support in the bargain.

That, however, is beside the main point, which is this: If a man does not find it possible to live on \$150 a month without dishonesty, he would not find it possible with an income of double that amount or even more, the Kansas City Times says. The amount of income is the sorriest kind of excuse in any such case. The big question is a willingness to live within an income, regardless of what it may be. That willingness this youth did not possess. Therein was the trouble. He must have not only one motor car, but two cars. He must take a chance at gambling and loose money, some of it perhaps from his salary, some of it from the funds of the bank.

Yet it wasn't necessary in this case to have even one motor car. It was not needed in the young man's business. Other men, many of them much older men, and with larger incomes than this youth had, do not feel able to own motor cars. President Coolidge didn't up to the time he became the nation's chief executive; and even while vice-president, he refused to make use of a car that he might have had without cost to himself.

There is a big lesson here for young men who can take it. There is no more common source of unhappiness than the feeling that one cannot live on what he earns. Dissatisfaction

with a limited income, there should be; but it should be the kind that arises from an ambitious desire to do better work and to command better pay. That ambition coupled with thrift, patience and industry, will bring results. Dishonesty will not. This youth knows that now. Others may know it, if they will, without following his example.—Sudan News.

Some of the local Dempsey fans are just a little touchy about the matter yet, so better not rub it in too much.

Mrs. Hugh Snodgrass was in one day last week to renew their Herald for another year.

# Have you ever made good on one job.. for 39 years?

**THE** extra mileage you get from Dunlop tires starts with the fact that Dunlop has had thirty-nine years of tire-building experience—more than any other tire maker.

Each part of each Dunlop is built right. Dunlop owns its own cotton mills to spin selected long-fibre cotton into the special Dunlop cable-twist cords.

These cords mean *extra strength*—an added factor of safety against constant load and pounding of roads—longer life and greater mileage.

They mean extra "stretch"—so the tire carcass will give under blows, and come back to its original shape without the slightest injury.

Every Dunlop you buy has extra miles built into it because Dunlop knows each part of its job. That is why we recommend you put Dunlops on your car.

FOUNDERS OF THE PNEUMATIC TIRE INDUSTRY

T. I. Brown returned last week from South Texas, where he has been buying cotton through the summer months.

Rotary District Governor, Mr. Cline, we believe, of Wichita Falls, was a guest of the local club last Friday night.

### CREAM SEPARATORS RETURN OWNERS A PROFIT

There are occasionally farmers who are strong advocates of better breeding, and raise and milk better dairy cows, feed them and milk them twice a day, then lose a part of the valuable butterfat and feed it to the hogs because of inefficient separation methods, says the Research Department of the National Association of Farm Equipment Manufacturers.

At the Indiana agricultural experiment station, careful tests have been made to determine how much butterfat is lost by different methods of separation. This test was taken over a period of one year from the production of one cow. The amount of fat lost by different methods was deep setting methods, 10.1 pounds; shallow pan, 26.2 pounds; water dilution, 40.5 pounds; cream separator 1.2 pounds.

The average milk production per cow has been increased by proper feeding methods, installation of automatic drinking cups, and other barn equipment; why throw away the good results by poor cream separation methods?

### LARGE TOMATOES RAISED IN TERRY COUNTY

The Seagraves country is good for tomatoes if not for nothing else. On the farm of J. W. R. Bachman, across the line in Terry County, was raised one of the largest tomatoes ever raised in this country. It is a large flat tomato and measured 15 inches around in one way, and lacks a small fraction of an inch of being 12 inches around the other way, and weighs about a pound. Can you beat it?—Seagraves Signal.

Messrs. Bynie White and Pete Morgan of Big Spring were Brownfield visitors the first of the week.

Lee Walker was down recently from the farm and informed us that as he was in the dry belt this year his crop would be light, but he would make some cotton and enough feed to run the farm next year.

Jewel Bell was in from the Needmore community this week and informed us that he had secured a six section pasture over in New Mexico, and would move his cattle over there before cold weather.

On account of bad weather conditions the church of God meeting at the tabernacle was called off a few nights the fore part of the week, but they intended to start up again as soon as weather conditions would permit.

Crede Gore has accepted a position as yard man with the Cicero Smith Lumber Co.

The Herald thanks N. W. Jeter for a renewal to the Herald.

### Inconsistent Queen

Queen Elizabeth attempted repeatedly to dictate to the English people on dress and had stringent laws passed defining the classes who might indulge in laces, velvets and other extravagances. But when she died she left 3,000 dresses in her wardrobe.

### ORDINANCE NO. 310

Be it ordained by the City Council of the City of Brownfield, Texas,

An ordinance granting a franchise and certain privileges to the WEST TEXAS GAS COMPANY (a corporation), with its principal offices in the City of Amarillo, Potter County, Texas, and establishing rules and regulations for the use of natural gas for light, heat and power, and establishing a maximum limit for price to be charged for such gas.

Whereas, the West Texas Gas Company (a corporation) has applied to the Mayor and City Council of the City of Brownfield, Texas, to grant said company the right to lay and maintain and operate a gas plant for the distribution of natural gas for light, heat and power within the City of Brownfield, Texas, upon the following terms and conditions and reservations, such rights and franchises to be as follows, to-wit:

Section 1. That the right to furnish, distribute and sell natural gas for light, heat and power, for all such purposes for which gas may be used within the City of Brownfield, Texas, for a period of twenty years from the date of the passage and approval of this ordinance is hereby granted to the West Texas Gas Company (a corporation) its successors and assigns, hereinafter called the grantee, subject however, to the provisions hereinafter incorporated in this ordinance and for such additional period or extensions of time as may at the expiration of said term of years, and upon conditions then found to be satisfactory to the officials of the City of Brownfield, and to this grantee, and provided that this ordinance and franchise is to be in effect and run from and after the day and date of its passage and approval.

Section 2. That the said grantee is to have the right to lay mains, pipes and equipment, and to construct such building and install such machinery and equipment and to sell or lease such equipment to the citizens of Brownfield, Texas, as may be necessary or advisable in their judgment for the proper performance of the service to be rendered to the City of Brownfield, and to its inhabitants and citizens to the best interest of the gas consumers and to have, at all times, access to the streets and alleys

of said city for the purpose of laying such mains, pipes and equipment as may be needed from time to time during the term of this franchise, or any extension thereof, provided, that at no time shall the grantee obstruct the streets or alleys so as to interfere with the public use thereof for a period longer than twenty-four (24) hours, and that immediately such mains, pipes or equipment is laid and tested same shall be covered and such streets or alleys shall be replaced in the same or as good condition as before such work was done.

All excavations to be properly guarded by barriers by day and by red lights by night, and the said grantee shall hold the said City of Brownfield harmless from any and all damages to persons or property resulting from their negligence in the manner of constructing such distributing plant or system; guarding the same while under construction, by good and sufficient bond executed by the grantee and some reputable surety company permitted to do business in the state of Texas, in the penal sum of Twenty-five Thousand Dollars (\$25,000.00).

The work done in connection with the construction, maintenance and operation of said plant and transmission, transportation and distributing system, and the location of regulating stations, vent pipes, gate valves, gauges, stock boxes, manholes, low, intermediate and high pressure mains, pipes, feeders, service pipes and conduits, and service pipe extensions, and all appurtenances in the streets, highways, alleys and other public places in the City shall be subject to and governed by the regulations, rules and ordinances now in force or that may be hereafter lawfully adopted.

Section 3. That all mains shall be laid at least eighteen (18) inches below the surface of the ground, and so laid as not to interfere in any manner with water mains or pipes or sewer line of said City, or pipes or conduits of other utilities already installed; and that connections with the gas mains and pipes shall be placed and laid to the property line of the consumer at the expense of grantee. That the grantee shall not be required to extend main lines more than one hundred and fifty (150) feet to any one consumer.

Section 4. That said grantee shall at all times after said gas distribution system has been established and placed in operation, be prepared to furnish said city and its inhabitants with a good quality of gas for light, heat and power, and other purposes, and said grantee shall furnish said gas for all purposes for which same may be used in sufficient quantities to supply the needs of the said city and its citizens.

The said gas shall be furnished to said City and its inhabitants for domestic use at a net price not to exceed sixty-seven and one-half (67 1/2) cents per thousand cubic feet for all gas used; provided, however, that gas used for heating public buildings, churches, hotels and apartments shall be sold at the following rates:

For the first 50,000 cubic feet used per month, 67 1/2 cents per M.

For all used in excess of 50,000 cubic feet per month 40 cents per M.

That the maximum rate for industrial gas shall not exceed the rate set out in the following schedule:

For the first 50,000 cubic feet used per month 45 cents per M.

For the next 150,000 cubic feet used per month 35 cents per M.

For the next 300,000 cubic feet used per month 30 cents per M.

For the next 500,000 cubic feet used per month 25 cents per M.

For the next 10,000,000 cubic feet used per month 22 1/2 cents per M.

For the next 20,000,000 cubic feet used per month 20 cents per M.

For the next 29,000,000 cubic feet used per month 18 cents per M.

For the next 60,000,000 cubic feet used per month 16 1/2 cents per M.

For all above 120,000,000 cubic feet used per month 15 cents per M.

That the above rates are to be charged for gas used through one meter only.

That all bills shall be due and payable monthly, and within ten days from date rendered, and in case of default or non-payment within said time, the grantee shall have the right to discontinue service to said consumer, and to make an additional charge for the gas used for any purpose equal to one-ninth (1-9) of the bill rendered. And in case said consumer shall make application to have service re-established and gas reconnected with his premises, he shall be required to pay all delinquent bills, together with the penalty thereon, and to pay a cut-on charge not to exceed \$1.50 for domestic use and heating purposes, and \$2.50 for industrial use. It is further provided that the grantee shall be allowed to make a minimum charge of \$1.50 per month for gas for domestic and heating service and \$25.00 per month for industrial gas service.

All gas furnished or supplied by grantee shall be metered, and for this purpose the grantee shall, at its own cost and expense, provide and install for each consumer a good and accurate meter of standard make. Grantee shall also provide and maintain at its own expense a standard meter prover of not less than five cubic feet capacity, equipped with suitable thermometers and other necessary accessories which shall be maintained to the accepted standard of accuracy, all to be to the satisfaction and approval of the City Council.

Such meters shall be and remain the property of said grantee, and the grantee shall have the right to require the customer or consumer to deposit with it a sum equal to the minimum monthly bill to the consumer, provided, however, that no deposit shall be in a less sum than \$10.00 for domestic meter, and \$15.00 for industrial meter.

Section 5. The natural gas to be furnished hereunder shall be at all times kept to a standard of eight hundred British thermal heat units or higher per cubic foot at the point of

consumption, at a temperature of thirty-two degrees Fahrenheit, or zero Centigrade; and to determine whether the gas supplied is of heating value above specified the City of Brownfield may have tests made by a competent analyst under recognized and scientific processes, according to the approved method of making such tests, and said tests shall be from samples of gas collected from the grantee's mains at any point or points within the City. If the result of such tests show that during a month the daily average of gas supplied was below eight hundred British thermal heat units, then there shall be deducted from the customer's bills for gas during such month a proportionate amount, based upon the deficiency below said eight hundred British thermal heat units. In any month when such tests are being made, the City shall advise the grantee of the results of each test within a reasonable time after it is made, and the official report of such analyst, of which said grantee is so advised, shall be taken and accepted as the agreed prima facie correct test of the heating value of the gas furnished during such month and thereafter until a different result is determined or ascertained in a similar manner; said grantee shall furnish gas to consumers at a pressure of not less than four ounces, nor greater than eight ounces, measured at the consumer's meter outlet.

Said grantee shall supply and install not less than one and as many as may be needed approved self-registering pressure and gas gauge, capable of recording the pressure of the gas, in the mains at points in the city designated by the City Council and said self-registering pressure gauge shall be placed at a station which in the opinion of the City Council fairly represents the pressure on adjacent territory; and said station shall be securely enclosed under lock and duplicate keys to said station shall be retained by the City Manager, or some officer authorized by the City Council; and such self-registering pressure gauge shall be equipped with removable recording dials to record the pressure, and the said City Manager, or some representative authorized by the City Council, shall remove or cause to be removed from said pressure gauge the pressure records of the preceding period, and provide the gauge with recording blanks for the next period during which such record is desired by the city; and each record taken from such pressure gauge shall be filed in the office of the City Secretary of the City of Brownfield, and a record thereafter be entered upon the books of the City by the City Secretary; and the said City Manager, or some representative authorized by said City Council shall keep self-registering dials in said pressure gauge continuously for a month, or as often as is required by the City Council and the said book record shall be competent and prima facie proof of the pressure at the point at which such record was made at the time as shown by said gauge record.

Each consumer of gas shall install and maintain suitable piping within his property lines and suitable appliances and fixtures, except meters, subject to the approval of the City Council or such supervisor, inspector or other representative as may be authorized by said City Council to pass upon the same.

Section 6. The City reserves the right to lay and permit to be laid electric conduits, water and other pipe lines or cables, and to do and permit to be done any underground work that may be deemed necessary or proper by the City Council, in, across, along or under any street, alley, highway, or other public place occupied by the grantee; and whenever, by reason of change in the grade of any street, or in the location or manner of constructing any water pipes, electric conduits, sewer or any other underground structure, it may be deemed necessary by the City Council to alter, change, adapt or conform gas mains and service pipes of grantee, such alterations or changes shall be made by the grantee when ordered in writing by the City Council or any supervisor or other representative of the City Council so authorized to act, without any claim for re-imbursements for damages against the city; said grantee shall indemnify and save harmless the City of Brownfield, from any and all claims for injury or damage to persons or property occasioned by or arising out of the construction, maintenance, operation or repair of said grantee's transmission, transportation and distributing system, and by the conduct of the business in the City.

Section 7. The right to use the streets, alleys, highways and public ways or places of the City of Brownfield by the grantee, as provided in section two above, shall be and is subject to the following restrictions, limitations and conditions, viz: that in building additional mains or lines of pipe, said grantee shall build and construct the same along and under the alleyways, where alleys exist, rather than along and under streets, and shall only use the streets for same insofar as may be necessary in connecting from one alley to another; and said mains and pipe line shall be placed below the surface of the street or alley and so as to protect all paving, wire, cables, water pipes, underground wires or sewer laterals, and shall be so constructed and located with reference to water lines and sewer mains as not to interfere therewith, and under the direction and to the satisfaction of the City Council or the City Engineer.

Section 8. That the City Council hereby reserves the right to install at the point where said grantee receives its gas for distribution in the City a meter through which all gas for distribution to the City and its inhabitants shall be passed an adequate self-registering pressure gauge adequate to record the amount of gas distributed to the City and its inhabitants and the pressure at which the same was received by the grantee.

Said grantee shall also supply and install one distant pressure gauge under direction of the City Council and at the place designated by the City Council which will indicate the pressure at such designated point, said gauge to be placed in the City Hall in the office of the City Engineer.

Section 9. That after the said gas distribution system shall have been fully constructed, equipped, and in operation as herein provided in the City of Brownfield, if the said grantee shall then fail to substantially comply with the conditions of this franchise, the City of Brownfield shall have the right by ordinance duly passed therefor to forfeit all the rights and franchises herein granted to the said grantee, provided that the City of Brownfield shall give the said grantee, its successors and assigns, sixty (60) days notice in writing, specifying the conditions claimed to have been violated and giving full and fair opportunity to be heard thereon before declaring such forfeiture which notice shall fairly and fully set out all the conditions claimed and complained of and shall be given by the said City Secretary under the seal of the said City after having been properly authorized by the Mayor or City Council of the said City; provided, however, that the said grantee shall have sixty (60) days after receiving such notice in which to rectify and correct such violations and to substantially comply with the terms and conditions of the ordinance; should the violations of this ordinance so complained of not have been rectified and corrected and the terms and conditions of this ordinance fully complied with at the end of said sixty (60) days, then and in that event the City shall have the power to forfeit this franchise on account of the violations specified in said notice. That in case of forfeiture as herein provided, the City of Brownfield reserves the right to purchase the distributing plant of the grantee at its fair appraised value or to allow the grantee to remove same within one year from the date of such forfeiture, provided that before any of said property may be removed, the grantee shall be required to give the city a good and sufficient bond that the streets and alleys will be placed and left in as good condition as found.

For each and every breach or violation of any of the provisions of this ordinance by the grantee, it shall be liable to a penalty of Twenty-five Dollars to be recovered in any court of competent jurisdiction by suit, of any person, firm or corporation injured or damaged by such breach or violation; and if the breach or violation shall be a continuous one, each day during which such breach or violation continues shall be deemed a separate breach or violation and separate ground for recovery against the grantee.

Section 10. That in further consideration of the privileges and franchise granted to the West Texas Gas Company, it shall adopt and use all and any reasonable safeguard to provide for the protection of persons or property against injury or damage growing out of the use of gas and that they shall construct and maintain in good order all mains, pipes and equipment used in said city for the distributing of gas, and shall always be prepared to furnish said City and its inhabitants a sufficient quantity of gas for all purposes; provided, however, that in case of explosions or accident of any character or nature beyond the control of said grantee, to the main lines or to the distributing system provided herein, or shortage of gas supply in the fields from which grantee secures the gas, and the grantee is not able to furnish on account of such unavoidable conditions gas for all purposes, that preference shall be given to domestic consumers, schools and hospitals in the use of gas until such time as the supply may prove adequate for all purposes. Provided further that grantee shall not be liable for any damages resulting from such accidents either to the line of the grantee or to the lines on property of consumers.

Section 11. It is provided that the grantee shall in good faith begin the construction of its main lines and distributing systems by May 1st, 1928, and shall complete such main lines by Dec. 1, 1928, and shall be prepared to serve gas to consumers on or before Jan. 1st, 1929, provided, however, that grantee shall not be liable for time consumed out of such period by strikes, acts of providence, or acts of constituted legal authorities, or acts beyond the control of grantee.

Section 12. That grantee herein shall have the right and privilege of assigning this franchise and all the rights and privileges granted herein, and wherever the word "grantee" appears herein it shall be construed as applying to its successors and assigns.

Section 13. This ordinance shall take effect and be in force from and after its passage and approval and publication as provided by law. Passed and approved this 16th day of Sept., A. D. 1927.

Joe J. McGowan,  
Mayor, City of Brownfield, Texas.

Roy Herod,  
City Secretary of Brownfield, Texas.

STATE OF TEXAS,  
County of Terry, ss:—We, the undersigned Mayor and City Secretary of the City of Brownfield, in Terry County Texas, do hereby certify that the within and foregoing is a true and correct copy of the ordinance and franchise approved and passed granting to the WEST TEXAS GAS COMPANY the right and privilege to use the streets and alleys and public grounds of the City of Brownfield for the purpose of laying and maintaining gas lines for distribution of natural gas to the City of Brownfield and its inhabitants thereof for a period of twenty (20) years, and that such ordinance was duly read, approved and passed as required by the City Charter of said City, and duly signed by the undersigned Mayor and attested by the undersigned City Secretary this 16th day of Sept., A. D. 1927.

Joe J. McGowan,  
Mayor, City of Brownfield, Texas.

Roy Herod,  
City Secretary, City of Brownfield, Texas.

**MEADOW BRIEFS**  
By Aesculapias.  
A young woman in her teens, of  
medium height and well rounded  
form with eyes that set awry, visited  
our town Friday, and made the ac-  
quaintance of a few of our unsus-  
pecting citizens. While not pretty,  
she was at least passable, but she made  
up for missing female charms in hav-  
ing a smooth tongue and nimble fin-  
gers. She was away from home and  
out of money, but was staying here  
for a few days and the money would  
be forthcoming. On being refused by  
some of the merchants, she pro-  
ceeded to pick up the bundles and to  
march out. She hid herself to a resi-  
dence in the community where she  
was apprehended by the owners of  
the pilfered merchandise and forced  
to give up the pilfered articles. She  
then proceeded to try to borrow mon-  
ey on which to leave but failed to

land it. Meadow might buy a few  
oil stocks or a gold brick.  
The writer knows her parents.  
They are very good people and were  
of moderate means. Alas! however,  
the fast life was too alluring and the  
girl who could have been a blessing  
to her parents is a criminal and a re-  
fugee from justice. Will she ever re-  
form? I fear not. I have come to  
believe that once a criminal, always  
a criminal. There are exceptions, no  
doubt, but not enough to disprove the  
rule.

It is rather astonishing to those of  
us who can recall the days when pug-  
ilism was regarded as the pastime  
of the slums and those who indulged  
in what sports of that period called  
the manly art of self defense, were  
regarded as little more than crim-  
inals, have in the years following the  
World War, made the sport—if one  
can call it sport—the very acme of  
the athletic goal.

For the past few weeks, and thru  
them, the champions and their friends  
have kept up a vigorous propaganda  
on the coming battle. We have all  
been worked up to a high pitch, and  
as the day approached, the young  
and old made preparation to be at  
the "ring-side" through radio, at  
least. The most of the population of  
this village and the country side were  
on hand, male and female; the young  
man and maiden; the infant at the  
breast, and they that were stooped  
with age. Why? It is an answer of  
an instinct come down to us thru the  
"struggle for existence" of the ages  
and eons past.

Why condemn Spanish and Mexi-  
can bull fights when we can sit with  
bated breath and pounding hearts,  
while two giants trained for the busi-  
ness, beat and maim each other until  
one is knocked into unconsciousness.  
Who of those who listened to the  
mighty shouts that went up in Chica-  
go, when Tunney was knocked off  
his feet and lay waiting for the  
count, doubt that the brute in man  
and his love for gore has even com-  
menced to be eliminated.

These gladiatorial contests are for  
giants. The man under six feet and  
weighing less than 190 pounds, nor-  
mally isn't in it. Light weight con-  
tests are just about as well attended  
as Wednesday night prayer meeting.  
The future will compel us to call to  
our aid the comparatively new sci-  
ence of eugenics. Parents selected  
whose union will probably result in  
offspring possessing the nearest  
ideal qualities for this work.

The schools, from the little red  
school house up to the great univer-  
sities are running rapidly to athletics.  
Why don't some millionaire endow a  
chair of pugilism? We have the oth-  
er sports already. It isn't right that  
our boys should be denied the train-  
ing that would make them look for-  
ward to the day of reaching the goal  
of Tunney and Dempsey. Yet a little  
while and "heroes of the prize ring"  
will be compulsory reading and Demp-  
sey's "come on and fight" will have  
a place with Farragut's "Dam the  
Torpedoes" and Nelson's "England  
expects every man to do his duty."

Interested? Yes. They could not  
have been more so if the fate of the  
Republic had hung in the balance.  
Watching them I could vision the  
hosts of Philistines and Israelites  
waiting the outcome of the duel be-  
tween David and Goliath.

On the other side of the loud  
speaker were groups of listeners of  
both sexes. As the fight progressed  
the space about the speaker gradu-  
ally dwindled, and at the close of the  
tenth round there was no open space.  
One of our prominent citizens sitting  
with his face in the instrument, Jack  
was easily the favorite of the crowd.

Physical contests have always met  
the approval and acclaim of the peo-  
ple. The savage and the noblemen  
each delight in the spilling of blood.

offer M today.—Draughton's College,  
Abilene, Dallas or Wichita Falls,  
Texas. 10-7p

**EVANGELISTS WANT TO  
RETURN TO BROWNFIELD**

(Published by request)  
Wichita, Kans., Sept. 13, 1927  
To our dear Sister in Christ, and all  
the Household of Faith:—  
Greetings in the precious name of  
Jesus; may the richest blessing of the  
Lord rest and abide upon your home  
as well as the many we are interested  
in. Our interest is for the benefit of  
the Lord, so we cease not to pray for  
you and all the dear saints in Brown-  
field, making supplication in their  
behalf before God; to keep those that  
were saved during the revival. Many  
are called, but few are willing to pay  
the price and go all the way with the  
Lord. The blessing you received Sun-  
day night is only a beginning  
of what the Lord has for you. I be-  
lieve the Lord will put it on your  
heart to visit a great number of those  
who were saved in the meeting and  
encourage them from time to time,  
praying with them. If the children  
of God would do more personal work  
among christians as well as among  
lost sinners, etc., speaking for myself,  
I might have power to become more  
of a soul winner.

We began our revival Sunday  
morning and the Lord is blessing al-  
ready. Many are interested in me  
bringing the tent here for a meeting.  
I am interested in seeing a taberna-  
cle seating three or four thousand  
erected in this place where the full  
Gospel can be preached. As large as  
this town is there is not a very large  
building of any kind in Wichita.

We are determined by the help of  
the Lord to come back for the big  
meeting in the Garage just as soon as  
we can. We are not only talking  
about it but we are praying for it,  
and asking God to help the little Fri-  
day night prayer meeting keep going  
till we get back. I do hope you or  
someone will get in behind the peo-  
ple and visit thru the week getting  
the people interested in a prayer  
meeting and praying God to send us  
back for a greater and bigger victory  
for the Lord. Praise his name.  
There are so many I want to write  
to in the next week or ten days and  
encourage them in the things of God.

We had a splendid trip and got  
here Saturday about 2 P.M., not a  
puncture or anything, roads fine. We  
were sent 50 miles or more out of the  
way, and had to turn about and go  
back, so it was one o'clock when we  
got to bed Thursday night. If I had  
one of our bills in the room I would  
send it to you. I forgot Friday night  
we spent with U. S. Sen. Calahan in  
his home in Enid. A very dear  
friend of mine. Wants us to come to  
Enid and have a meeting there. But  
of all the places I want to go back to  
Brownfield for the big meeting in the  
Brick Garage. We want to keep in  
touch with all you dear people. We  
shall never forget your kindness.  
Pray for us and you may rest assured  
we are praying for you. Let us know  
how things are coming. Guess you  
have had a caller or so. Just pray  
and God will fill your soul. Others  
may forsake or turn you down but  
God never will, bless his dear name.  
Yours for Jesus trying to be a soul  
winner,  
Wyatt and Kerr, Evan.

Friends:—If more of us had God  
and his love for lost souls on our  
hearts, as these men of God, we  
would not have time to stand on the  
street corners and do so much back-  
biting and evil talk about men of  
God. We are praying that God may  
send his spirit of conviction upon the  
hearts of those who are always think-  
ing and speaking evil of God's child-  
ren. There were many conversions  
through Bro. Wyatt's preaching here  
at this town. If we would only take  
Christ as our partner in life and  
think of his goodness and mercies,  
we would not have time to be censur-  
ing others. May God's richest bless-  
ings rest and abide with each and  
every one of you, is my prayer.  
Mrs. Geo. W. Neill.

**FRUIT SPRAYS NOT POISONOUS**

Refrain not from eating your "ap-  
ple a day" for fear that the juicy  
red skin hides some arsenic or other  
poison advises the Research Depart-  
ment of the National Association of  
Farm Equipment Manufacturers.  
Numerous tests by various state ex-  
periment stations and laboratories  
have proven that while lead and ran-  
sanic, are both used in sprays the  
amount sticking to the ripe apple is  
negligible. There are no cases on  
record in the United States of people  
having died from eating sprayed  
fruit, or even being slightly hurt from  
eating such fruit. Such sprays,  
however, enable the health seeker to  
obtain high grade fruit which would  
be unobtainable if the codling moth  
was allowed to satisfy its appetite for  
apple uncurbed. Power sprayers  
have enabled the fruit grower to  
spray as frequently as necessary to  
produce perfect fruit, at a very small  
expense per tree. Apple washers  
have been developed recently which  
gently remove all traces of spray  
accumulation from the fruit,  
another step forward in the grover's  
efforts to furnish a healthful addi-  
tion to the American diet.

**BIG DOLLS!**

Your choice of a large variety of 24 inch  
dolls if you trade \$10.00 at our store for  
only 99c. See them in our show win-  
dows.

Also be sure to visit our  
**FIVE CENT WINDOW SALE  
SATURDAY.** You will be surprised at  
the variety of rare bargains.

**ENTERPRISE MARKET and GROCERY**

**School Notes**

**SENIOR CHUCK BOX**

Fay Brown - Editor  
Voncile Holgate - Social Editor  
Virgil Burnett - Athletic Editor

**Time Flies!!**

Another week of school has be-  
gun and we have all found our places  
and enter into our work with real  
"zeal." Even the Freshmen no longer  
ask questions but go about in  
their humbly manner, silently.  
Each of the classes have organized.  
Football practice has been going on  
for some time, with bright prospects  
for the season; and a "Pep squad"  
has been organized to boost the boys.

**On Observation:**

We have more High School stu-  
dents than usual.  
We haven't enough school spirit.  
We should neither be too "opti-  
mistic" or too "pessimistic" but a  
happy medium.  
All wise cracks from Dumb Owls  
solicited for the Chuck-Box.

**Senior Rings Ordered.**

Monday afternoon the 1927 Sen-  
iors purchased rings from a repre-  
sentative of an Indianapolis jeweler.  
The rings will be in, rather on our  
stands by five or six weeks.

**If looks would kill, a good many  
mirrors would be tried for murder.**

**Miss Lawlis: "Just what is life,  
anyway?"**

Dick: Oh, a pickle sandwich be-  
tween two eternities.

**Did you ever hear about the ab-  
sent-minded professor who fell in  
while boating and sank twice before  
he remembered he could swim?**

Robbie: Why do they make the  
students wear gowns in chapel.  
Vivian: They have to have some-  
thing to sleep in!!

**The Pep Squad.**

A Pep Squad has been organized  
for sometime and have been having  
daily practice under the leadership of  
Misses Hazel Stafford and Florence  
Holt. A good crowd attends but not  
as many as should. The Pep Squad  
increases school spirit and is a factor  
in helping our boys to victory. Let's  
go to Pep Meeting!

**Eddie Ballard To Lead The "Cubs"**

Eddie Ballard has been elected to  
Captain the 1927 High School Foot  
Ball team to succeed Luther Tannery  
who did not return to school this  
year. This is Eddie's third year on  
the team and is an athlete of great  
promise. With his coolness and  
knowledge of foot ball together with  
his generalship of play he should lead  
the "Cubs" to their greatest year in  
foot ball. He is a back-field man  
and will alternate with his brother,  
Roy, at Quarter position.  
The boys are hustling every after-

noon and promise to give a real fight  
with all teams we meet this year.  
The first game of the season will be  
next Friday, at O'Donnell, then we  
are home for three games. Lets all  
pull together for a good season and  
help promote good sportsmanship.

**Junior Theater Party**

On Friday evening of the 23rd a  
dozen happy Juniors met at Miss  
Louellen Brown's, where we were  
entertained by music until 7:45. We  
then started for the theater, our  
gang increasing one, making an un-  
lucky thirteen. But this time it had  
no effect on our pleasures.

On the screen the thrilling picture,  
Adolphe Menjou in "Blonde or Bru-  
nette" was enjoyed through out by  
all. And as for the Gegaloo dance  
put on by Jack Holt of Los Angeles,  
we have seen nothing of the season  
to surpass it.

Among the survivors were: Blue  
Eyes, Eddie, Lee Orval, Florence,  
Lena Mae, Lillie Mae, Louellen, Hazel,  
Christova, Jim, Otis, Clovis and Ker-  
ney.

**TOKIO SCHOOL NEWS**

School opened September 19th  
with a good enrollment, considering  
the cotton crop which is under the  
progress of harvesting.

We have with us as teachers: Mr.  
E. W. Knoll, Principal; Mrs. B. W.  
Knoll, intermediate, and Mrs. W. R.  
Patterson, primary.

Tokio is a very little lively village  
Sunday School is held in the school  
building and also in the Community  
Hall, with singing each Sunday even-  
ing in the latter place.

The seventh grade organized an  
English Club and has been a success  
so far, and we hope it will continue.  
Today's program is as follows:

Catherine Young: How to organ-  
ize a club.

Lowell Front: How to conduct a  
meeting.

Carrie Velma Jowers: How to  
persuade others.

Willie Wauson: It never pays to  
brag.

Melvin Anderson: Haste makes  
waste.

O. D. Lovelace: A health talk.

Evelyn Pinnin: How to make a  
request.

Olamae Lovelace: Better speech.

The eighth, ninth and tenth grades  
are progressing very well. The 8th  
grade in agriculture do not get their  
lessons very well. The tenth grade  
have just received their new Science  
books this morning, so don't know  
just what they are doing, but will  
know next week.

Thirteen pupils are enrolled in the  
primary room. All are doing excel-  
lent work, and the free hand drawing  
done last Friday was a credit to the  
little folks.

The most interesting fact about  
the fourth grade is that it is com-  
posed of boys only.

The fifth grade boasts only one  
boy among the girls.

The sixth grade is doing some real  
work in sentence structure, and we  
are expecting some real English  
speakers and writers of them.
