Thinking Big and Small  
An Ancient Dread  
No God Exists, for Russia  
The Tough One Speaks

Henry Ford will say in *Capper's Magazine* for April that "it is just as easy to think big as it is to think small."

It is, after you get a start. For instance, in 1850, sixty-one years ago, John D. Rockefeller, who began working as office boy for \$15 a month, started for himself as a commission man. He began "thinking big." He had accumulated \$17,000 in 1862 and took a partner, Maurice B. Clark. They invested their money in a crude oil "refinery" in Cleveland.

That was the beginning of "thinking big."

In 1865 Mr. Rockefeller, who is now approaching his ninety-first birthday, and was then twenty-six, bought out his partner for \$72,500. Standard Oil corporation papers were signed on January 10, 1870. Standard Oil is now sixty years old.

John D. Rockefeller has been "thinking big" ever since.

His best "big thinking" has been devoted to the fight against disease. Instead of using a few dollars to relieve individual cases, he uses tens of millions to eliminate disease permanently.

Signals to protect pedestrians from automobiles are to be installed in big cities and "amber colored" lights were suggested. The police say: "Drivers will pay no attention to anything but red. That makes them stop."

Why is it that red impresses men, and even the lower animals? Is it, perhaps, because men, for forty million years, and animals through hundreds of millions of years before men came, have known and inherited one great dread, the red blaze of a forest or prairie fire?

Russia continues her systematic drive on religious belief, and the right to religious belief. More churches, synagogues, are confiscated or destroyed, and many Mohammedan mosques.

Russia apparently objects to the suggestion that anybody except Lenin might have something to do with the management of this earth and the universe around it, whether it be Jehovah, the Christian God and Trinity, or Mohammed's Allah.

Eight thousand enthusiastic atheists volunteered to tear down a monastery. Art treasures in the churches confiscated are to be changed into money

and the money used to buy tractors for Russian farms.

Frank McLane, "the tough one," shot three times by gangsters as he lay wounded on a hospital cot in Chicago, is home at his mother's now, full of war.

"Never mind who shot me," he tells the police, "McLane takes care of the next time you find some rat dead in a ditch, like a sieve." "Like a sieve" means with many bullet holes.

Lots of energy and gameness going to waste in our gunmen. The police say McLane is the inventor of "the ride" from which a man marked and "put on the spot" never returns.

The national industrial conference board tells you that the wealth of the United States amounts to three hundred and sixty billion one hundred million.

It sounds a lot, but it is only \$3000 for each American, with about \$500 extra for New Yorkers. That isn't enough.

Human machines alone, leaving out mines, real estate, factories, are worth more than three hundred and sixty billions.

This land and its people are worth whatever science and industry choose to produce—certainly not mere billions, but trillions.

John D. Rockefeller, Jr. says, and every well-informed man believes it, since Mr. Rockefeller tells the truth, that neither he nor his father caused the recent cut in crude oil prices. They learned of such cuts from newspapers. The elder Mr. Rockefeller does not pull any strings from "behind the scenes," but probably follows what goes on with mild interest. Past ninety years of age, Mr. Rockefeller is interested in making his money useful. He has sailed the ocean of millions for many years. A few dollar waves more or less make as little difference to him as salt waves do to an old captain.

Secretary Lamont of the Department of Commerce learns that 75 per cent of business failures are due to carelessness.

Mr. Solomon, who owns forty beauty parlors, asked "Is that a good business?" replied: "It's a good business if you know how to manage it. But any business is a rotten business if you don't know how to manage it." Personally, as he will tell you, Mr. Solomon pays more attention to business than to beauty.

Taxes may be bigger.

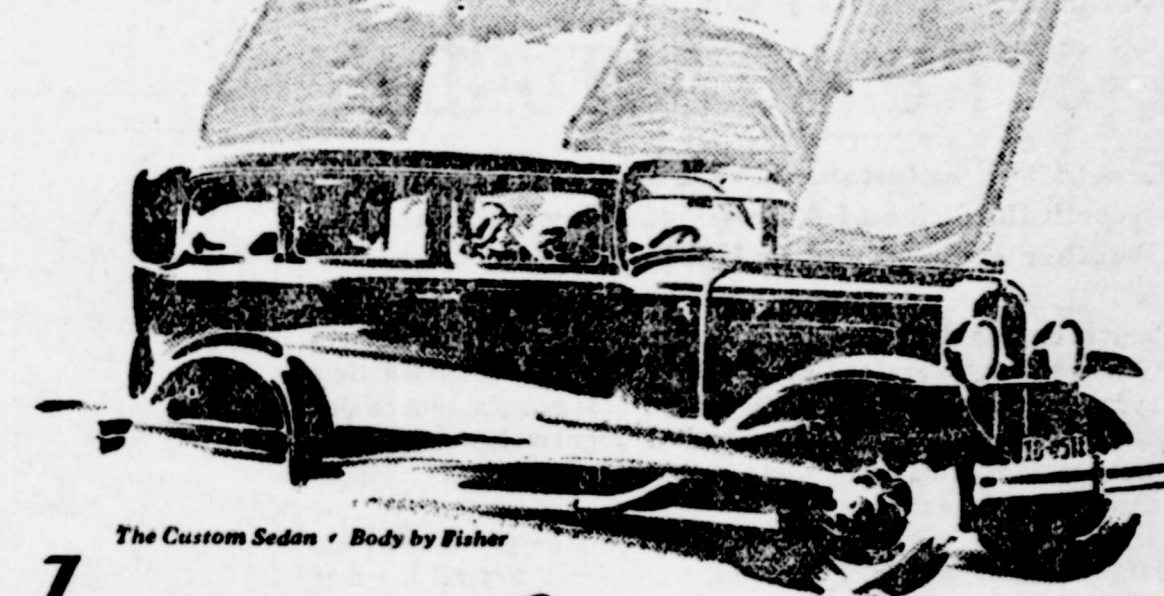

President Hoover warns congress that it is inclined to spend money too freely. An increase of 40 per cent in taxes might follow any too liberal appropriations.

because of improvements in its 60 horse-power engine

Much of Pontiac's increased smoothness is due to new type rubber mountings which now insulate its engine from the frame, and to a more rigid crankcase which assures more permanent bearing and crankshaft alignment. Then too, smoothness is intensified by the Harmonic Balancer which counteracts torsional crankshaft vibration. Finally, Pontiac's basic engine design enables it to develop 60 horsepower at moderate engine speed. No matter how fast or hard you drive, the engine runs smoothly and silently. . . . In this car you get reliability and long life seldom equaled except in cars of much higher price. Furthermore, you get remarkable economy. Your own good judgment should suggest that you investigate this finer Pontiac.

### Konjola Makes Good After All Else Fails

St. Louis Lady Glad To Relate Her Fine Experience With New and Different Medicine

MRS. DORA BAUER

Konjola is a different medicine simply because it secures victory after victory in cases that have defied and resisted all medicines and treatments tried. This is not a boast. It is a fact established and proved in thousands of cases like that of Mrs. Dora Bauer, 3403 St. Vincent avenue, St. Louis. Read her grateful words:

"How I wish that every sufferer from neuritis could know what Konjola did for me. For ten years I endured agonies from this awful ailment. I had to keep my arms wrapped tightly to ease the pain. My digestion was bad, too, and this weakened me, making me still easier prey to neuritis. I can not remember how many medicines and treatments I tried, but found nothing to give relief, until I found Konjola. In just five weeks this remarkable medicine restored digestion, rid my system of poisons and impurities, and then the neuritis left as if by magic. What a boon Konjola proved to be to me. No wonder Konjola is known as the medicine with more than a million friends. It should have a billion."

Konjola is sold in Brownfield at Alexander Drug Co., and by all the best druggists in all towns throughout this entire section.

### UNION SUNDAY SCHOOL AND PREACHING SERVICES

Sunday School meets at 2:30 and will be followed by preaching at 3:30. The Sunday School has continued to grow in attendance and interest since its organization. Mr. A. J. Holder came for membership at our last preaching service.

The Texas Electric Co. is building a high line connecting Big Spring and Lamesa.

Incidentally, next Sunday will be a good day to go to church.

### ENTRIES TO DAIRY SHOW PRIOR TO MARCH 15TH

PLAINVIEW, March 3, 1930—Entries for the annual auction sale of pure bred registered dairy cattle at the Texas Panhandle-Plains Dairy Show must be made to manager Maury Hopkins, at Plainview, not later than March 15th. This announcement was made by S. J. Payne of Tulla, who is vice-president of the Texas Panhandle Plains Dairy Association and chairman of the sales committee. Other members of this committee are D. F. Eaton, county agent of Lubbock County and F. R. Phillips, of the West Texas State

### Teachers College.

Chairman Payne is stressing the importance of all entries being in the hands of the manager on or before March 15 because a catalog must be prepared and the sale advertised. The committee also must pass on the prospective entries before they are allowed in the sale ring. The sale is one of the outstanding features of the show and will be held on Thursday, April 10, the final day of the exposition.

### POOR HEALTH IN CHILDREN CURED BY FARM FOODS

Dallas, Texas, Feb. 24.—Abolishment of bad teeth and rickets among children in Texas is one of the chief objectives of Red Cross activity for 1930, according to Miss Esther Clark, Red Cross nutrition expert now working in Dallas county.

Following scientific discoveries made during the late war when a nationwide survey was conducted into the causes and cures for poor teeth, rickets and other diseases among children, Red Cross workers suggest the use of more dairy products as the most efficacious and natural treatment for these ailments.

Vitamins contained in butter, milk and other Texas dairy foods, they say, have been found to be indispensable elements for preventing and curing many pulmonary, bone and skin diseases. For this reason a general "eat Texas farm products" movement is being encouraged by Red Cross workers over the state.

"It is only recently" Miss Clark said, "that science has discovered in animal butter fats the necessary vitamins to build bone structure and healthy flesh. Consumption of butter fats is important not only in growing children, but in mothers before the birth of children. Doctors now attribute poor teeth, in most instances, to lack these necessary elements in their prenatal existence."

One great objection women have advanced against eating quantities of butter and milk is that they feared increased weight. Physicians now, however, are agreed that butter in itself is not fat producing, unless accompanied by quantities of sugar and starch, Miss Clark pointed out.

This nutrition expert and others working with the Red Cross have spent years experimenting with the use of these natural foods as preventives and cures of diseases prevalent in children. Their reports show unusual success wherever the method has been conscientiously carried over a period of time.

Messrs. Casey and Harred of Claude, Texas, who reported they had the prize winning dogs at the rodeo the past Saturday, paid the Herald a pleasant call Monday morning before returning home. They have their dogs advertised in this week's Herald.

**Big Corporation Useful On Crime's Highway**  
Worrying the Burglar Education and Money

The General Electric company has perfected a device to transport electric power over longer distances at less expense. The invention, called a "thyatro," is described as a modified vacuum tube, adapted to power transmission uses.

Some day science will "hook up" the world's great power stations of North America, Niagara, those in the Rocky mountains, on the Columbia river, Brazil, with other great stations in Africa and all over the world, as radio stations are now hooked up. Then will come wireless transmission of power, so that airplanes will be able to "pick up power" at various points in their journey, instead of carrying tons of fuel.

The research work done by such institutions as General Electric, United States Steel, Westinghouse, Standard Oil, etc., will give back to the public in increased prosperity a hundred dollars for every one that those big corporations have ever received.

This country is traveling rapidly on the road that leads to thoroughly organized crime and complete contempt for law.

A United States grand jury reports that officials supposed to suppress the sale of drugs are organized on a "racket" basis, misrepresenting their activities to get more money from the government.

Some of them are alleged to be narcotic addicts. The charge is made that the big men in the business can "buy their way out" if they get in trouble.

In the seven months past criminals and others have purchased three times as many pistols as were sold together in the twelve months of 1928. A big demand for killing machinery.

Mr. Louis Pierson of New York's Irving Trust company delights in annoying burglars. He built, far underground, below his new fifty-story building, a safety vault lined with toughest steel, thick as the ancient walls of Jerusalem. It is the biggest vault in the world except those of our Reserve Bank and the Bank of England.

Now he surrounds his steel walls with a thick layer of water, so that the poor bank burglar, even if he did break through the heavy steel, would have to do his work in a diving suit, most awkward for handling dynamite and drills.

Henry Ford, planning to spend one hundred millions educating young people on his own lines, making them "fit into life," teaching every one a trade, wants no advice.

He is right. No one knows better than he how to prepare boys for useful work. But Mr. Ford spoke hastily when he said he wanted no advice on education from those that never earned or saved a dollar.

The world's greatest educators have not been money makers or savers. Aristotle, who taught Philip's son, Alexander, made no fortune for himself. Alexander, conqueror of the world, spent collecting specimens for Aristotle, greatest naturalist and philosopher of the world, more than the total fortune left him by King Philip.

Conrad Hubert, who changed his name from Horowitz, made many millions, left \$6,000,000 to useful charities, left \$1,000,000 to his brother.

The brother, who sticks to his old-fashioned name, Horowitz, has been a humble court interpreter and he says he will now devote his time to German opera and charity.

Why did the rich brother wait until he was dead to give a million dollars to his mother's other son?

Many of us forget the proverb often quoted by Nathan Straus: "What you give in health is gold, what you give in sickness is silver, what you give after death is lead."

Automobile makers will spend \$15,000,000 scrapping old cars to clear the way for new cars and moderate the second-hand car nuisance.

R. H. Grant, vice president of General Motors, one of the best salesmen in America, is chairman of the scrapping committee.

Perhaps Mr. Grant could find a way to slip those old cars, knocked down to foreign countries—China, Africa, anywhere. Ten million old cars scattered over the earth would soon create an appetite for ten million new cars just as the little car creates a demand for a larger car.

An expert says that in nine years from the end of 1920 to the end of 1929, stocks were going up 66 per cent of the time, and going down 34 per cent.

The difficulty is to pick out the time when they are going up.

Two \$50,000 speed boats, each carrying three Liberty motors, with 31 knots speed, will help hunt rum runners in New York waters.

Other fast boats, costing \$250,000 will be put on the lakes to check rum running there.

**Pointers On Being a Successful Reporter**

These suggestions were taken from an authority on writing equitette. Write regularly.

Send in items the same week they happen so that they can be printed while still fresh.

Write news of many kinds. There can be no poorer correspondent than he from whose news letter it is possible to tell what family or clique he belongs too.

If a person gives you an item you cannot use, better say so and give reasons; do not leave the impression that it will be printed.

Ordinarily news items should answer the following questions in so far as they concern the item: Who? What? When? Where? Why? How?

Every person has the right to spell his name to suit himself. If one branch of a family calls itself Davies and another Davis, respect the taste of each. If a lady writes her name Grays instead of Grace, write it the same way. If some one had rather be called O. Wellingholthausen Bosh than Oliver W. Bosh, call him so.

When writing about ladies, always use Mrs. and Miss. Refer to a married couple as Mr. and Mrs., rather than J. P. Jacobs and wife. Do not use the title Mr. when speaking of men only. The name itself is sufficient.

Use titles such as Dr. Judge, Rev., Prof. Serg., Capt., Governor, etc. In writing of children say, "George, the 10-year-old son of" or "Beatrice, the infant daughter of."

The next question is what is it that has happened. Next where or what time, and when possible use figures of the hour as 7 o'clock Tuesday morning. Next is where? And then Why? Not every item gives an answer to this question, but in case of a wreck or fire, say why. How? The answer to this question should comprise all details not answered in above.

Spring is not far away, and it is now time to begin to beautify your part of Brownfield.

Most spices are grown on islands.

**Hung Jury Results in Roberts Case, Takoka**

The jury in the Adlee Roberts case was discharged Wednesday morning after having been out since early Tuesday afternoon and after assuring Judge McGuire that there was no possibility of their being able to agree. It is our information that the jury stood five for conviction and seven for acquittal.

Roberts was charged with the murder of Calvin Petty, the homicide having been committed several years ago near O'Donnell. Roberts was convicted on a former trial but the judgment of conviction was reversed and remanded for another trial.

The State was represented by County Attorney G. H. Nelson and the firm of Lockhart and Garrard. The defendant was represented by Mr. Vickers of the firm of Vickers & Campbell.

When the jury was discharged Wednesday morning, they were excused for the week, no other cases being ready for trial at this time.

The Mrs. Mollie Turner case, murder, has been set for trial on Monday, March 10.—Takoka News.

Well, our old friend Ed Thompson (we always called him Jim when he was a boy) and family have moved down to Terry from Lubbock county. Ed said he had as soon or rather fight sand than blue weeds, at least he thought so. They live about three miles north of the city, and he and wife dropped in Saturday after the rodeo to become readers of the Herald. Ed is also going to be missionary out that way for us, saying he had another newcomer out there about ready to subscribe for the Herald. A friend once is always a friend unless we mistreat them somehow.

We must apologize for the uncompleted article of Capt. F. M. Burnett's death in last week's Herald in which while making up we left off the names of Charlie Burnett, Colorado, Texas, three nephews, Will, Kid and Vernon from Dublin and J. R. and F. M. Burnett of this place. This was unintentional we assure you.

The Singing School closed last Friday night with a box supper, the returns of which went to pay the teacher. There were thirty-nine boxes, a cake for the prettiest girl and a pair of socks for the ugliest man. Orville Wasson drew the lucky number for the extra box. Everybody reported a good time and lots to eat. Bro. Allen filled his appointments

at the Baptist church last week end. Misses Wilma Holand and Viola Sappenfield visited with Miss Lena Roper Sunday. The Jowers family took dinner with their daughter, Mrs. Bill Blevins, last Sunday. The Snodgrass family entertained a large crowd of friends and relatives at their home Sunday. The Snodgrasses have also installed a Delco lighting system lately. There are a large number of pupils absent from school this week.

Some of them are Misses Buelah Young, Mary Lou Hughes, Ruth Roper and Viola Sappenfield. Also Otis and E. R. Roper are ill. Mr. Charles Stuart and Miss Ola Mae Lovelace were seen out driving Sunday evening. Misses Nellie, Rena, Dollie and Vivian McLeRoy were visitors at Tokio Sunday night. Miss Edneith Green accompanied a crowd of Johnson young people to the Singing at Forester Sunday night.

**A Line-up For Strife When Peace is Needed**

For some years Texas has had enough strife apparently to satisfy the most belligerent hair pullers. But still we are offered more strife, even though Mr. Ferguson enters the field this time with the most peaceful declarations. Four years ago the Ferguson administration was so exceedingly unpopular that the people elected Dan Moody, not for any ability he possessed to guide the ship of State, but rather because he was stout in his criticism of the Fergusons and making this an issue. Mr. Moody's administration has been weak while Mr. Ferguson has been returning some of the criticism so liberally given the Ferguson administration, with the chief demand for the Ferguson's today, that of opposition to the weak administration of Mr. Moody. Just what opportunity has Texas to go forward by this kind of floundering between those tried and found wanting? There has been extensive complaint against those already listed, some of which is founded upon reason and quite a bit founded upon prejudice of one type or another, while those more capable of making good and putting Texas politics and government upon higher grounds and not so deeply involved in prejudicial fights, are evidently waiting to see if the voter is still determined to hang on to old fights that mean: Texas loses which ever side may win. Prohibitionists appear to lose sight of their cause in their desire for factional domination, with one faction claiming just about 100 per cent of pure, undefiled righteousness for themselves while holding a dagger up their sleeve to those prohibitionists who hold to different views. Then another faction let their disgust for this fanaticism drive them to other extremes. In fact Texas prohibitionists would not be very heavily misrepresented if charged with pulling hair over an empty bottle while their opponents are taking all the good wine. While these things go on Texas suffers, sound legislation lags, weak politicians are honored and the more capable men refuse to enter the field. The weakness of the Ferguson administration gave Mr. Moody no special ability, even though he was a good and stout critic of that administration. Now that the Moody administration has proven weak, this gives no new ability to the Fergusons. Those who have fought over the prejudices involved have done themselves and the State hurt and yet there are many who appear to want

to carry on in the same old zizzzag rut.

Barring those who are favored with appointments and thus are a part of this political school, all the people lose, whichever may win in scraps to settle old scores where neither contestant is constructive and capable.

There is a pressing need that the people rise up and draft, if need be, some man of constructive ideas and removed from bitter personal politics, clans or cliques, who could lift a few of the burdens from the shoulders of the tax payers and rectify a few of the wrongs that have developed these past several years. Then too put Texas on the road where reason and justice rules rather than bitterness, prejudice, hatreds and incompetence.

The people are not yet lined up in hostile camps and surely there is ground for hope that the better judgment of the people will yet avoid another round of this type of cheap political harrang that divide rather than unite the people and cheat rather than serve their needs.—Green-ville Messenger.

**CARD OF THANKS**

We take this means of showing our appreciation to our many friends and neighbors for their kindness and words of cheer and comfort in the death of our little daughter and sister. May the blessings of God be with each of you. Mr. and Mrs. J. P. Rowe and sons.

Our old friend, J. W. Casey, of "the place of rest" (Tokio), and who serves them well as P. M. out there, informed us this past week that we could send out samples of the Herald any time we had them, and he'd see that the people on the route out of there got them. He volunteered this help to the Herald, and we want the world to know we appreciate this. Postmaster Nelson of Meadow recently told us the same thing. Each of them as well as other postmasters of Terry and Yoakum counties are authorized agents of the Herald.

Among the many new readers that have come in of late is J. E. Bradley of route 2. The efficient carriers on the routes out of Brownfield have certainly been instrument in helping to put the Herald over on the routes of late, and the Herald is going to do something real nice for them some of these days as well as the postoffice force here. Any of them are authorized to take your subscription to the Herald if it is not convenient for you to come in.

The rate of \$1.55 for the Herald and Farm News is cut. But we can still sell them at the old rate of \$1.80 for both in Terry and Yoakum.

**BOB SIMMONS ANNOUNCES FOR CITY MARSHALL JOB**

To the voters of the City of Brownfield:

After careful consideration I have decided to make the race for City Marshall of Brownfield. I feel that I am competent and fully qualified for the office, having a good size family to support, and a desire to work and cooperate with your official body to the progressiveness of a better Brownfield. In making my announcement as a young progressive citizen I want to say that I am not the candidate of any club or organization, but am making the race on my own merits and qualifications, and promise a square deal to all and special privileges to none. I cordially solicit your vote, support and influence.

Yours truly,  
 BOB SIMMONS.

"No, madam," replied the surgeon, "I think not."

But still she was not satisfied.

"But," she continued, "how long will it be before I know anything?"

"Madam," replied the doctor gravely, as he signalled to his assistant that he was ready, "don't you think that is asking a great deal of the anesthetic?"

Many a Hollywood star found out that she could not talk.

Ruth Chatterton in the title role, is every bit the sterling "talkie" actress she proved to be in "Charming Sinners"—and then some.

As the darling of society who becomes innocently embroiled in a scandal which threatens to ruin her social standing, she gives a portrayal which stacks up neatly against the same portraiture which Ethel Barrymore did with the part several seasons ago in the original stage play, by Alfred Sutro.

Miss Chatterton laughs at those who had accused her and plunges forcefully into her own well-planned battle against them, emerging the victor, with a romantic conquest of Clive Brook, her erstwhile enemy, to boot.

After seeing and hearing this brilliant comedy-drama one realizes why Miss Chatterton has such a great fan following.

Exerting a bite of 640,000 pounds a giant fender press in the stamping plant of the Oakland Motor Car Company forms two front fenders at a time from heavy gauge sheet steel.

Nonchalantly munching the fare fed into its capacious jaw by skilled workmen, the immense machine produces 720 front fenders per hour. The power of big electric motors is multiplied so tremendously by gearing that the fender dies shape the steel as though it were wax.

The fender giant is only one of

200 presses in the Oakland stamping plant which range in power down to machines of only 30 ton pressure designated by the biased attendants as "midgets."

The big stamping plant, covering a quarter of a million square feet of floor area, produces approximately 150 different stampings for each Oakland Eight and Pontiac Six, representing about 500 press operations per car. During 1929 nearly 100,000,000 pounds of metal was fabricated in the plant.

**A crop well started is half made**

As your corn is started, so will be the crop. That is why many up-to-date listed corn farmers are turning to Avery Sled and Two-Row Cultivators.

These famous cultivators deliver just the required amount of finely pulverized soil to nurse the young crop to health and strength. They do the most for the crop, in the best and easiest possible way, at the time when good care is most needed.

The Avery Sled Cultivator runs in the furrow stride the row, doing the work easily, accurately and effectively. The Avery Two-Row Listed Corn Cultivator offers broader

development of the same principles, but due to the exclusive Avery equalizers and other features, it cultivates two rows with the same ease and accuracy as the single-row machine.

The Avery Sled and Two-Row Listed Corn Cultivators—because they do the best work and wear longest, with the least upkeep expense—are in the end the most economical to buy. Their modern design, fine adjustments and good materials reflect the 100 years of experience back of them, and the resources of America's finest implement factory.

High Lights in the Grammar School Life

Friday the 28th day of February was designated as visitors day in all schools of the United States. There were forty-five parents who visited the grade school here on that day. We appreciated having them and hope they come again and wait for visitors day to visit us again.

The Seventh grade had another debate Friday the 28th, and the low sixth visited us. Mary D. Price and Marion Chisholm as negative against Carl Jeter and Wilton Smith on affirmative side. The subject was: Resolved that Country Life is Preferable to City Life; and the judges were Mrs. W. B. Lindsey, Miss Grace Hulse and Mrs. W. G. Harris, who decided for the affirmative. The conduct of both rooms was extra good.

There have been registered in the public school library, four hundred and forty-three library books. Miss Dumas and several pupils have fixed them up to date with cards and pockets.

The State Inspector came to the Brownfield grade school Friday and inspected our school. She commended us on our public library.

Sporting News All the students have been so busy at other things that it has been all quiet along the grade school sports front.

At recess I would play football or baseball. If I were a boy I wouldn't play hockey or sauce the teacher. —Elray Lewis, Low 5th.

The Cougar, or Mountain Lion A Cougar is a lion. He is brown color and is about the size of a large dog. He is very wild and vicious. The cougar belongs to the cat family. His head resembles that of a cat, but is much larger. He lives in the woods, in a cave or in the thick bushes. The cougar eats cows and calves, goats, deer, foxes, coons, rabbits, beavers and, even gophers, rats and mice, porcupine and he has been known to eat his cousin, the lynx. The cougar is not very valuable except for his skin. He is an enemy to man. —Lucille Harris.

If I Were A Girl If I were a girl, I would not be bossy, and think I could do something that others can't do. I would not stamp my foot when I got angry. If I were a girl I would not say ugly words and frown all the time. I would not put a whole lot of rouge and lipstick on my face. If I were a girl I would not steal or gamble. I would not smoke or chew. If I were a girl, I would not be idle like some girls I know; and I would not dip snuff for it is a bad habit to form. I would keep clean and healthy and be strong. —Charles Michie, low 5th.

Good-bye bad English habits, Farewell to slang and foe, It's a long, rough road to Better English, But it's worth while to go.

Book Review of "Smockey" Smockey was written by Will James. It is the biography of a horse and is a good book for boys and girls. The scenes were laid in the western states, in the latter part of the nineteenth century. The cast of characters are: Smockey—a wild range horse. Pecos—Smockey's brother. Clint—a cowboy that broke broncs for the Rocking R outfit. He was the one that broke Smockey. Old Tom—One of the owners of the Rocking R outfit. The most interesting part was when Smockey had been broken a Mexican stole him. Smockey killed the Mexican and escaped. About a year from the time he escaped he was captured and taken to the grandstand of a bronc show. Every man that tried to ride him was thrown off. One day a man stayed on Smockey till he was unconscious. If you want to know whether or not he rode him to the finish read the book "Smockey" by Will James.

Book Review The title is, "The Adventures of a Brownie." The author is Miss Muellock. It is a very humorous book and is good for both boys and girls. The scene was laid in the latter part of the nineteenth century. The scene is in a coal cellar, in the kitchen of a large farm house, on the ice in the forest, and in a large farm yard. The characters are: A very mischievous brownie; Muff—A very dumb cat; The cook—Who was mean to the brownie; The children who were the best friends of the brownie. The part that I thought was the most interesting was when the brownie made the cow run away when the cook's husband was milking her. But while the brownie was running away he caught his foot in a rabbit trap. When the cook's husband got there he picked up an iron rod and raised it to beat the brownie to death. Read for yourself and see what happened to the brownie. —Bonnie Dale Gross.

SOMETHING NEW IN COTTON PLANTING! HUDGENS & KNIGHT

Announces Display of Avery "Hill-Drop" Planters—a Startling Improvement Cotton farmers this past season have been trying out a new development in cotton planting which promises substantial savings in labor and seed. Chopping cotton has always been an expensive operation. Now it can be eliminated from 50 to 100 per cent, according to farmers who have used the new method. Savings in seed also run from 50 to 75 per cent, a very worthwhile saving, with improved cotton seed costing as much as \$3 a bushel. Even if crop seed is used for replanting, less is needed and greater profits made at the mill. These savings alone would justify "Hill-Drop" planting. But farmers also report getting better stands and yields in most cases. No matter what cotton brings, the "Hill-Drop" farmer is due for greater profits on his crop, because he cuts his cost of production. The "Hill-Drop" feature as perfected by Avery of Louisville is now incorporated in seven of their planters. This feature enables the farmer to plant as many seeds as desired in hills only, spaced as far apart as conditions require. The planting mechanism is a clever device which operates automatically for single or double row planting. Seed is seldom scattered between hills, hence most chopping is eliminated. When you consider that one man can chop only an acre of cotton a day, on an average, it is evident that labor costs are considerably reduced. That's over three months' work eliminated on a plantation of 80 to 100 acres! If the lowest estimate of savings in seed is taken—50 per cent—that will amount to 50 bushels for 100 acres. Avery of Louisville has letters and telegrams from cotton farmers stating that savings in seed and chopping have run much higher. All of the farmers using the new Avery "Hill-Drop" Planters this past season are enthusiastic— seldom has a new development been received with such universal approval as this "Hill-Drop" feature. It has proved itself in the field, so there can be no question but that cotton farmers can now make bigger cotton profits even without bigger cotton crops. We are watching this development with great interest and will undoubtedly have further information to report after the present season. J. W. Campbell, of Checotah, Okla. is a new reader of the Herald complimentary of his son, Leo, of route one, here. We hope by the time the year is up the elder Campbell will become a Territe indeed.

# ANALYZE THE ALLOWANCE ON YOUR USED CAR

*If a dealer pays you more than the true worth of the car he must make up the difference by extra charges on the new car or re-sell it to some one else at too high a price*

**P**ERMANENT value is always better than a temporary bargain in the purchase of an automobile. It pays to look ahead and consider reliability and ultimate up-keep costs, as well as comfort, safety, speed, and beauty of line and color.

Since most automobiles are bought for replacement, the value set on your used car is a factor in almost every purchase. Frequently it is given an importance beyond its true worth.

Used cars have a definite market value and you are justly entitled to an allowance based on that value. It is not fair that you receive less. It is not to your best interests to receive more.

**I**f a dealer pays you more than the true worth of the car he must either re-sell it to some one else at too high a price or make up the difference on the new car. This he cannot do unless he is allowed an excessive profit on the car or on financing, extra equipment and other charges. In either case, you pay the bill, for no way has yet been found to give something for nothing. The money must come from somewhere.

You may not get the largest used-car allowance from the Ford dealer, but that very fact should give you confidence that you are receiving full value in the new car. *Ford charges are not marked up or increased to cover a high trade-in allowance on your old car.*

Because there is no waste, extravagance or undue profit in manufacturing, distribution or selling, every dollar you pay for a Ford brings a full dollar in return. In lower first cost, in reliability and long life, in the low cost of operation, service and replacement parts, the Ford will save you much more than the seeming difference in trade allowance.

**F**URTHERMORE, at least \$75 extra value is given to you in the new Ford in the Triplex shatter-proof glass windshield, the Rustless Steel, the five steel-spoke wheels, and the four Houdaille hydraulic double-acting shock absorbers. The unusually large number of ball and roller bearings, and the extensive use of fine steel forgings instead of castings or stampings, are other features that show the extra quality built into the Ford car.

**Per Capita Wealth**  
The commonly accepted impression that the United States leads the world in per capita wealth is corrected by a table issued by a Wall Street house, says Capper's Weekly. We stand in third place. Switzerland leads with a wealth per capita of \$3,120, New Zealand follows with \$3,020. The United States is third with \$2,908. Other important countries are not far behind, Canada following this country with \$2,770; Australia, \$2,710, and Great Britain, \$2,677. At the tail of the procession is Russia, whose wealth is estimated at but \$215 to the head of population.

Wealth is saved capital, and statistics show that a people with little wealth may still be prosperous, even though the living costs are relatively high.

**Not at All Typical**  
John J. Raskob said at the Savannah Golf club on his way to Biloxi: "The South impresses me with its energy and enterprise. The South ought to advertise itself more. A good many Northerners think that it is typified in the grocery yarn.

"A man, the yarn runs, went into a southern grocery to buy a ham. He plunked down a five dollar bill on the counter and said:  
"Gimme a ten pound—"  
"But the grocer, who was sitting with his feet on a cracker barrel, interrupted him.  
"I can't serve ye just now, sah," he said. "Ye'll have to call round some time when I'm a-standin' up."

**Grizzlies Passing**  
Forest rangers in the Far West who have been making a census of grizzly bears report that this interesting animal is almost extinct. It is estimated that there is only about a score of grizzly bears in the entire Pacific coast region. In times gone by these animals were common in the mountain forests and hunters and trappers had many adventures with them. But they are going the way of the buffalo, the passenger pigeon and the great auk.

### AN INITIAL BID

"Tom," said Bill, as he caught up with him on the way back to the camp, "are the rest of the boys out of the woods yet?"  
"Yes."  
"And are the six of them quite safe?"  
"Yes, quite safe," said Tom.  
"Then," said Bill, his chest swelling with pride, "I've shot a deer."

This club has a membership of 5,500 members and a National meeting is being planned to meet at Lubbock March 10-16.

By Monroe Jones in Seagraves Signal Way down on Sleepy Avenue Bill Jenkins kept a store. Had crackerjacks and cheese for sale, But we see him there no more; He sat out by his grocery door And winked his sleepy eyes While the customers all passed him by— He did not advertise.

He sat and smoked his old cob pipe While the smoke around him curled, He did not get a bit of trade From this old SPENDING world. He sat there till his beard grew long, Reaching down about his thighs. But no knew he had that beard— He did not advertise!

He stayed there for a year or so Then moved away in despair, But the people did not miss him, They had never known that he was there; Just why they did not know Should cause us no surprise— He had never tried to let them know. He did not advertise.

**KIND GARDENER**

She was on one of her few visits to the country and was very attentive to the trees and flowers. "This plant," said the gardener, "belongs to the begonia family." "I see," said the lady. "How kind of you to look after it while they are away."

### METHODIST CHURCH

Remember our goal of 150 at Sunday School. Every teacher and pupil in his place each Sunday is the first requisite of a successful school.

Much inspiration has been gained by the car load of workers who have gone to Lubbock every night this week to the Standard Training School.

Thursday was another red letter day in the Sunday School and W. M. S. work with a joint meeting of the Zone at the church.

Brethren let us say with Moses "God forbid that I sin against the Lord in ceasing to pray for you." We are entering a revival campaign which will get results "Not by might, nor by power, but by My Spirit, saith the Lord."

C. F. (Chock) Hamilton met us on the streets the day his Herald played out and renewed for same. He remarked that was the 15th dollar he had paid us for the Herald. Dog-gone, don't time pass off rapidly.
