

Filling Station Robbed Here Sunday Night; Robber Kills Lubbock Man Later

V. A. Baggett, night attendant of the Roy Herrod, Mack's Oil Well, 66 filling station at corner of Tate and Highway, was held up at the point of a gun, by a young man and woman about 3 A. M., Sunday morning, and about \$115.00 in cash taken with 1500 gallons of gas stamps. Less than an hour later, W. T. (Bill) Lamb, former resident of Brownfield, night attendant at a Lowmore filling station on 19th st., in Lubbock, was shot, in a gun battle with similar couple attempting to hold him up, Lamb died thirty minutes later. The pair fled.

Later Sunday morning an automobile abandoned was found at the edge of paving on the road leading south to the Slide Community. An intensive man hunt resulted in which State, county and city officials, and officers of Lynn, Terry and Hockley aiding by tracking the couple afoot all Sunday and Sunday night, they felt sure they were in that vicinity. About 9, Monday, they apprehended a couple walking down a lateral road three miles south west of Slide store. They were carried to Lubbock, where according to officers, gave their name as A. J. Wright, 21 from Abilene, Texas, and Winnie McKeever of Deming, N.M. The car found abandoned proved by check up to have been taken from its owner, who had given a couple a ride, near Weatherford Saturday morning. Officers felt sure from all descriptions, they were the same who held up the Herrod Station.

It was learned the pair walked into the Herrod station, asked for candy, then pulled a gun, a 17 year old boy who happened to be in at the time, with Baggett, was also ordered to put 'em up. They said the woman, small in stature also wielded a gun, and after procuring the money ordered her male companions to jerk the telephone from the wall. They immediately drove north in the car, but attendants thought turned west on Main Street.

Local officers are connecting up all clues, and upon more positive identification will file charges here, for robbery with fire arms.

Sheriff Joe Price took Ben Baggett the victim, and Claude West operator of the Turner Tourist Court on North Lubbock Hiway, with whom the couple stayed Friday night, and stated both identified the couple. The Sheriff, with County Attorney Neill, have filed charges here against them, for robbery with fire arms. The pair are in Lubbock jail under murder charges. Officers there state, no bond will be allowed.

We All Like To Boast Of Our Circulation

Having spent the major portion of our life in a print shop, we have reached the point where the smell of ink misses us. We have become immune. But there are certain ethics, or rules, fiction or methology about a print shop that lingers. We got it in our bones in our youth, when the men we worked for liked to boast of their circulation.

We have read many such articles of late in our exchanges, and despite dry weather, they seem to have fine luck collecting subscriptions due as well as the addition of new readers. One stated just how many had been added the past two weeks, which was 39 we believe, which is good in any man's country. So, we were not too lazy to look back for the same period and find that ours was exactly 56 to a gnat's bristle.

But as for going back six or eight months and making the count, we just got down on the floor, stuck our knife (bowie) in the floor (concrete) and counted our money.

This we will admit, however. The Saturday Evening Post evidently has a few more readers than the Herald.

S. 2-C James Baker Aboard the McNair

Aboard the USS McNair in The Pacific—James W. Baker Seaman, second class, Brownfield, Texas., is serving aboard this hardy destroyer which has taken a crack at the Japs in every kind of naval warfare during her first year of Pacific operations.

McNair specializes in blasting enemy shore replacements to bits, but she is equally capable on convoy runs, hunting Japs submarines, rescuing downed American fliers, shooting down Jap planes, exploding mines and carrying mail. In performing all these jobs she has steamed a distance of three times around the world.

Her superb gunnery in pounding Jap shore installations has won her many plaudits. Her main battery shot more than 6,000 rounds in the engagements at Saipan, Palau and Luzon.

At Saipan the McNair dropped anchor close off shore to exchange pointblank firing with Jap batteries. Machine gun slugs peppered her hull but the destroyer's marksmen wiped out the opposition before an accurate enemy salvo could be fired.

Sailors, Marines Must Request the Herald

Heretofore newspaper subscriptions to service men over seas, were sent without much formality, especially to sailors, marines and coast guards. But beginning July 1, the Herald as well as all other newspapers and magazines MUST have a written request, from the service man, before we can enter their subscription, if the paper is to leave continental United States.

As we understand it, this will not apply to those now getting the paper, but new ones, and also those that are to be renewed, MUST have a written request from the service man or woman. On July 1, all newspapers must submit a list of papers addressed to service men overseas, to the local postmaster, and this is to be done at stated frequencies. The postmaster must also see the request, which must be kept on file.

If you want your son, husband or brother to get the Herald, you must please remember this.

LT. EUGENE ELLIS HOME FROM GERMAN PRISON

Lt. Eugene Ellis, who won note and medals by his heroic flying over German held territory, until shot down and captured nearly two years ago, is home. He was liberated by advancing allied armies in April. He arrived in Brownfield, Tuesday.

Wade Hampton Collins II of Lubbock, spent the week end with his grandparents, Mr. and Mrs. W. H. Collins.

Dr. and Mrs. E. C. Davis and son, Earl were in Throckmorton the latter part of last week, on business.

Louise Daugherty and Estelle Swan, spent Sunday in Lubbock, visiting Irene Brantner.

Miss Margurite Nobles, of Hamilton visited her aunt, Mrs. W. H. Collins last week.

J. O. Gillham, general chairman of the Mighty Seventh War Loan Drive in Terry county, stated to the Herald this week that we have a heck of a way to go on the purchase of E Bonds if we are able to meet our quota, and not to do so, and we are not quoting Mr. Gillham now, will be a disgrace to the whole county.

Here is the low down as given by Mr. Gillham. Our over all quota is \$455,000, which we will probably reach, but we are a heck of a way behind on our \$290,000 E Bond quota. These are called the people's bonds, and evidently the people of Terry county are shying away from them.

One man was heard to say this week that he had bought considerable bonds, but that was as far as his interest went, he intimated. Let those who have sons, husbands and brothers worry, was about the substance of his conclusion. If we did not have a single relative of blood kin in the front lines, the fact that our neighbors' folks are in danger would worry us.

When those boys who have suffered come home, or such of them as do get home, we wonder what they are going to think of people who say such things? What will be their conclusion? Thank God there are few of such in Terry county.

But there seems to be many that are carelessly indifferent to the fact that we must keep guns and food and medical supplies flowing to our fighters. The fact that they are not buying E bonds is the proof of the pudding.

So, go to the bank, your bank, or the postoffice today and buy all the E bonds you can.

Japs Tough—Mud Deep—Milton Bell

As stated elsewhere in this issue, Mr. and Mrs. Herbert Bell, of Marshall, are here visiting his brother, W. A. Bell and family. Both families were reared at that old east Texas city, and for some time about 1912-14, both families lived here.

The Herbert Bells have a son, Staff Sgt. Milton Bell, who many will remember as an employee of the Brownfield State Bank until he entered the service. They will also likely recall that Milton is no giant in size, His dad related about the following extract from a recent letter:

In effect, he stated, "my statute being what it is, the mud on Okinawa and Japs are making it pretty tough for me. The mud just comes to the knees of the ordinary guy. Imagine where it strikes a level on me." Milton is helping to operate amphibian tanks.

Khiva Temples Birthday Will Be Celebrated

On Monday June 25th, Khiva Temple will be twenty-five years old, and the occasion will be celebrated with a full form ceremonial, said Mr. W. R. McDuffie, Potentate's Aide in Terry county. A large class of candidates have already petitioned, and Nobles from all over Khiva Temple's jurisdiction will be in attendance.

Special attention will be paid the Charter members, who twenty-five years ago signed the application for a charter, said Mr. McDuffie.

The committee on Masonic Bond Sales will make a report on the bond purchases of members of Khiva Temple during the 7th War Loan Drive, which are well over a million to date, said Mr. McDuffie.

Then there was the fellow who spent all his money to rid himself of halitosis, only to find out that his friends didn't like him anyway.

Editor Estlack of the Donally County Leader, Clarendon, arises to remark that the iron from old granddad's junked Chevy that was sold to the Japs back in the 30ties, is killing off his grandsons on Okinawa, now. The writer saw acres of such stuff piled high at San Pedro, Calif., in 1934, and some, even then, who were not in the junk business, remarked that the iron would probably be shot at us, as Japan was no doubt preparing for war, and was already training their sights on us.

Every dog to his own vomit, but this individual has never been able to get a thing worth a tinker's dam out of Winchell's column. The only reason for its existence, that we can see, is a kind of press agent for the play-boys and cuties of Hollywood and Broadway. Fans of that class of people may get a kick out of Walter's column. Busy people, interested in winning the war and getting our boys home—get a headache.

Luckily, we people right out

here where feed and cattle meet, are most likely to connect with a T-bone occasionally. A magazine writer on that subject, recently, stated that the further one gets away from the heavy population of the Atlantic coast and approach the middle west, the more meat was to be found. And when he arrived in the rural sections of Wisconsin, there was plenty meat and no talk of shortage. They who like to be bumped, shoved and elbowed in the big cities have our permission to do so, but let 'em pay the fiddler.

One of our old reliable citizens informed us last week that his daughter, who lives in the ship-building area of California, wrote him recently that many are being layed off, and that she expected her husband to be layed off soon. Yet, every night, we hear them howling and cajoling over the radio that more and more workers are needed on the west coast to keep ships going and coming to the armed forces. And then next day comes newspaper reports of wholesale layoffs. This man's daughter reported that she entertained with a dinner, four that had been layed off. Looks like someone, somewhere, is just messing up things.

Few people think of the matter in this light, but our Uncle Sam is one of our major tax dodgers. Build what he may, no state or county or city can tax the property, and in many cases the people of the locality have their taxes raised in order to provide more roads and other accommodations to government projects. As a war measure, many plants of one nature and another were built with federal funds. Will the government operate them after the war? If so, will they pay taxes like individuals or corporations? Experience is a great teacher; we judge the future by the past. In the state of Tennessee, for instance, public utilities were paying a big share of the huge road paving bonds, not to mention the schools, colleges, eleemosynary

institutions. But when TVA took over, the taxes stopped. Well, says one, rates are cheaper. Maybe so, but if you happen to know of a utility outfit that has not reduced rates in the past 20 years—not once—but many times, we would like their address.

There might be a diversity of opinion whether or not Esquire magazine with its semi-nude gal pictures is good, bad or indifferent. But, according to Judge Arnold of the US Circuit Court of Appeals, Postmaster General Frank Walker had no right to pass on that matter, but only on whether or not the literature or pictures were obscene. It seems there is a fine spun distinction, not discernible by the laity, as between art and obscenity. However, most of us agree that the magazine in question is not exactly the kind of literature one would pass out to a Sunday School class. Yet, it is stated by the Judge that was not the question at issue, and PMG Walker took it upon himself to rule that Esquire was not a fit publication for public perusal. Judge Arnold not only ruled that Walker was out of bounds, but advised him to stick to carrying and delivering the mails. If the decision had favored the PMG, henceforth, if a Democratic PMG happened to think that a Republican publication was not the class of literature that the people should have, it could be excluded from the mails, or vice versa. So, once more the freedom of the press has been sustained in this Republic.

THE OLD DEPOT AT MIDDLETON BURNS

Last week in glancing over the Hardeman County Times, published at the county seat, Bolivar, Tennessee, we noted that the depot at Middleton, along with three freight cars, one loaded with lumber had burned. That old depot must have the Old He skinned in age by several years, for the building looked old when we were a cotton headed, bare-foot boy.

The reason we can remember the old depot so well is that at that time, they had one of the most crabbed agents this side of hades. Us country lads would rather had our hands cut off than dare ask that old bird when a train was due—not that we were going anywhere—and that was perhaps the reason he snapped our heads off about any question asked him. But let a finely dressed lady or a dudish "drummer" ask him, and he was as sweet as honey in the honey comb.

My! how things have changed. We have fooled around that old depot several times the past ten years. They now have a young guy that knows the first name of nearly every fifteen year old boy that lives in the New Hope settlement, and is as nice to them as to anyone. They sometimes go places. But this agent is just different. Railroad companies long ago got rid of scolds.

But the old depot has been moved about 200 feet east of where it used to be, when as a lad we used to watch negroes unload merchandise out of box cars into a narrow gauge railroad that ran some 50 miles down in Mississippi. Mississippi was dry even at that time, and we have seen the tiny baggage coach absolutely loaded with whiskey jugs from the two saloons in Middleton, for the thirsty in the Ole Miss state.

And too, the narrow gauge is now standard and runs from Mobile to Chicago, and both railroads run streamliners. The other, now the Southern, runs from Memphis to Washington, main line, with part of the original road, the Memphis & Charleston, goes on to Charleston, S. C. from Knoxville, Tenn., and the old depot, now in ashes, was acting as a "union" depot when the Old He was back there in Feb. 1944.

Hate is condemned in the Bible, but we'll bet there are few country lads, our age, that was reared in that section that liked that old prune that sold tickets at Middleton 50 odd years ago.

Colored Sergeant Retires Here

S/Sgt. Robert Fuller, well known Brownfield colored man, after three years service with the army in the Pacific Islands, and with 179 points, came in recently to retire to civil life. His first act was to have his discharge papers, which were crowded with meritorious citations, recorded and his next was to the Ration Board, for his first book. Our Cub Reporter, who wishes every race, creed and kind, to have their just dues, in a lengthy interview, found him very intelligent and interesting.

Robert went with the very first shipment of troops to the Pacific, landing in Australia, in New Guinea, and nearby islands, finishing up with the task force that taken Leyte. His job was to haul munitions up to the front, with the jungles so thick they often met the Japs hand to hand, before either knew it. "God made them jungles a million years ago, went off and left 'em, and nobody bothered them, till now," the fallen leaves and muck often waist deep. His worst complaint was the sultry heat, fever and insects. Often a rain in torrents for a few minutes, then the sun shines out hot, and many boys suffered sunstrokes, toppling over. Their supplies and heavy weapons were carried over the Stanley mountains by the natives, who can carry unusual heavy loads, on their heads and back.

Sgt. Fuller says the Japs are hard fighters, very cunning and tricky. Our men have to take no chances, and few prisoners. They come out with raised hands, in surrender, then when close enough will pull one or more hand grenades, and kill or wound several of our men, with himself. Fuller was head of a platoon of fifty men, and 15 trucks, always on detached duty. Just before any landings, the air force bombed all installations possible, and the Navy's long range guns would make a "prairie out of the jungle," where they landed. He stressed the value of teamwork, between the many branches of the military, and among their own men, and remarked, that their main object was to live and help their buddies live.

The Sargeant, has five major battle stars, good conduct ribbons and a Presidential citation. Loud in his praise of his General Kreuger, who he declares merits more credit than he is getting.

He is little nervous and jittery, and desires, quietude for a while.

NAVY SAYS DON'T CONCENTRATE CHRISTMAS MAIL LOAD

Dallas, Texas, June 12—The Navy Department encourages the mailing of overseas packages throughout the year. Although the War Department advises that the mailing period for Christmas parcels to Army personnel will be the same as last year—September 15 to October 15—there is no restricted mailing period for the personnel of the Navy, Marine, and Coast Guard. All Christmas packages should, however, be mailed not later than October 15 to afford some degree of probability of delivery prior to Christmas Day.

Due to distances—more than five million square miles have been won from the enemy since 1941—and the size and frequency of combat operations in the Far Pacific, no guarantee of relivity can be made.

Some Peoples' Idea Of Vacation Fun

This paper had a letter this week from Miss Vona Lee Ditto, of Washington, D. C., at that time abiding with some other girl friends in the Hotel Lincoln, (1400 outside rooms) in New York. Contrasted with what our idea of a vacation is, she said she was having fun.

Just as far as we could have gotten from that tall, crowded hotel, crowded streets and foreign smells, not to mention a lot of noise and confusion, suits us. Now our idea of fun and a real vacation would have been back some miles north of Gotham in the Andironack mountains, somewhere near where Rip Van Winkle took his 20 year nap.

But we accord everyone his own flea powder remedy. Some like honking, police whistles, rattle and rumble, while we prefer the croak of frogs and the hoot of owls, or even a few songs from lonely mosquitoes, to noisy cities.

MARTHA GRAVES-OLDHAM MARRIES MR. ASHLEY

Judge and Mrs. R. L. Graves received a letter Wed., stating their daughter, Martha, was married Sunday in Dallas, to J. R. Ashley, Electrical Engineer of the Magnolia Petroleum Co.

Now that the War in Europe is over

What about travel?

Now, you may naturally ask, "Won't it be a little easier to get accommodations?" ... "Won't it be a little more comfortable to travel?"

We of the Santa Fe would like to hold out some hope to our friends who have good reasons for taking a trip, but who find it difficult to do so.

We would like to give those who do travel all the little niceties of service that are part of the Santa Fe tradition.

Bigger Traffic Loads

The stubborn facts are that the traffic to our Pacific ports of war is stepping up instead of letting down!

This means, in the war days to come, there will be more passenger and freight

traffic—new loads and greater loads and less space for civilian travelers than ever on Santa Fe rails.

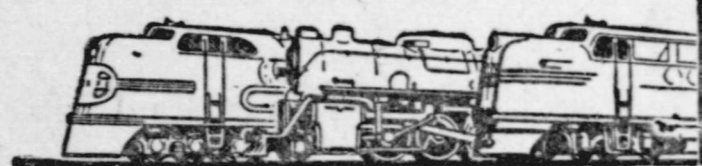

In The Meantime

Santa Fe facilities have been enormously increased—bigger yards; more freight Diesels; centralized traffic control at key points; and improved shop tools and practices which keep our locomotives rolling.

In peacetime these increased facilities will enable us to provide better service than ever. But in the meantime, the stuff needed to lick Japan is top priority.

So—again we ask, "Unless your trip is essential, can't you put it off until we have a little better opportunity to serve you in the traditional Santa Fe manner?"

SANTA FE SYSTEM LINES
ALONG THE ROUTE TO TOKYO

Help The Voluntary System

It is interesting to note that most of the talk and agitation about so-called state medicine and socialized medicine, comes from sources that seek to curry public favor, and too often votes. The people are led to believe that they will get something for nothing under government control and subsidized medical and hospital plans.

The movement so vitally affects all the people, and it is so important that all individuals have proper medical attention, that the principles involved in plans to socialize medicine are apt to be overlooked. Fortunately, there has been resistance to the socializing process for medicine, because of the well grounded fear, born of experience, that under bureaucratic control, mediocrity is promoted as individual initiative is stifled.

If the forces that seek to put government into the medical business, would, instead help the medical profession perfect plans which would be covered by voluntary programs for prepayment of medical and hospital bills on a monthly basis, they would be upholding the American tradition of private initiative, saving the taxpayers countless millions of dollars, and what is most important, they would be encouraging instead of discouraging the expansion of medical service on a more sound basis than in any other manner.

Fortunately, the medical profession, industries and individuals have already worked out prepayment plans under which millions of people are now being cared for and millions more are being added so rapidly as they understand the advantages of such a system. They are acting as free citizens on a voluntary basis, and not under state compulsion against them whether or not they so desire.

TO LOOK FORWARD TO

Forty per cent of the lighting in new homes built after the war will be provided by fluorescent tubes, predicts Miss Myrtle Fahs-bender, director of Home Lighting for Westinghouse. They're most likely to be used first in the kitchen, bathroom, basement, breakfast room and sewing room.

Mr. and Mrs. Ray Kebodeaux and family left Friday to make their home in Corpus.

Sgt. Curtis Bass, of Shepherd Field spent three day pass visiting his parents, Mr. and Mrs. J. C. Bass.

Mr. and Mrs. Johnny Bost and daughter will spend the coming weekend in Carlsbad, visiting Mr. and Mrs. E. J. Bost.

We could have used a bit of those 7 and 8 inch floods they had in East Texas, instead of dusters. But the weatherman has given us the sold shoulder this year, it seems.

Don't Worry About Us!

Well do it!"

THEY tell us that the fat salvage problem has got to be licked in the small cities, the towns and on the farms.

Our country has to have one hundred million more pounds of used fats this year over last. And we're the people who must save it.

We've rolled up our sleeves! We'll save every drop and bit it is possible to scrape—and keep on doing it till the last Jap is licked.

HOW TO DO IT: Save all used fats in a tin can. Keep it handy to the stove. Scrape your broilers and roasting pans, skim soups and gravies, for every drop counts. Keep solid pieces of fat, such as meat trimmings and table scraps, in a bowl. Melt down when your oven's going, add the liquid fat to the salvage can. Take the can to your butcher as soon as it's full. He will give you four cents and two red points for every pound. Your County Agent or Home Demonstration Agent can give you full particulars.

100,000,000 More Pounds of Used Fats Are Needed This Year!

Approved by WFA and OPA. Paid for by Industry.

Training Riding Horses, advertised in our columns, is a book every cattleman should have. It tells by pictures and simple words how to make good riding horses. John C. Burns, manager of the 6866 Ranch and president of the Southwestern Exposition and Fat Stock Show, whose long experience on ranches makes him competent to speak, says:
"Horses on commercial cattle ranches are a means to an end. The business requires that cattle be handled at times by men on horses. The better the horses are, the fewer will be required, and the more efficient the work. The gentle, well-trained horse that responds promptly and accurately to the rider will accomplish far more than the 'Bronc' or the 'Outlaw' and is both safer and more dependable. A gentle, well-trained horse will result if proper training begins with foalhood, provided he has been well endowed with possibilities through good breeding."

FINDERS AREN'T KEEPERS IN TELEPHONES

Often it is necessary for us to disconnect a telephone when new tenants move into a house, thus leaving them temporarily without service.

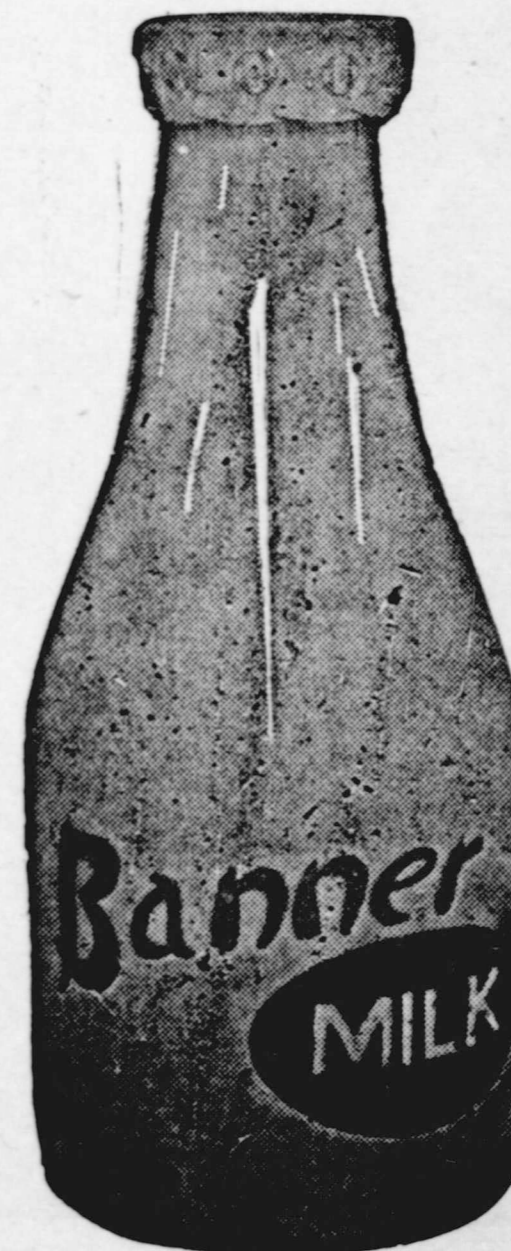

We do this only if the new tenant did not have a telephone at his previous address, or if others have made prior application for service.

This is the fairest way we can stretch our facilities to serve as many as possible.

Two Ways to Get A Good Feed

The Old He and the woman he lives with, went out to the Ed Thompson farm Sunday, potentially to visit, but incidentally to get our faces fed—and we did—both. What with a lot of good vegetables on the table, they had our prime favorite—fried country ham and streaked gravy.

Like an old cow, we ate too much and had to have a pretty long nap in the afternoon. No crops out that way, of course, but the weeds and johnson grass appeared in healthy condition. They would!

Talking of feeds, we saw a lady come out of a grocery a few weeks ago, with a lot of groceries, and we casually remarked to her that we would be there for dinner (noon variety.) At about 11 A. M. she phoned it would be ready at noon. And what a dinner, with fried chicken as the piece de resistance—it resisted very little—all at the expense of Luther Cruce. Thanks a lot Mrs. Cruce.

The wife and the Old He eat out a lot, and while the cafes feed us nicely, there is nothing quite so satisfying as a good old home cooked meal.

P. S. Ed took a nap while we took one, but our snoring was quite harmonious; his tenor, ours bass.

THE YOUNGER, THE BETTER

If the annual crop of spring chickens now due puts a bird within your reach, then make a mental note that this is the time for fried chicken at its best. The younger the bird, the more tender and tasty it's likely to be, say Westinghouse home economists, recommending that you choose fryers weighing from 2 1/4 to 2 1-2 pounds.
