Good Sire Means Good Milkers

A production-bred sire is the key to a profitable dairy herd. Of course, says R. N. McClain, County Agent, breeding alone doesn't make high milk producing cows. A herd must also have good management and, especially, proper feeding to keep them at top milking form. And at this time of year, sheltering cows when the weather is bad will result in more milk and a saving in feed.

In the matter of breeding, McClain says there is much need in Terry County today for improving the quality of bulls in service. The cross breeding which has occurred during the past few years has resulted in a race of cows being kept for milk production which is of uncertain parentage. For the most part the milk yield of these animals is low.

A man desiring to buy a dairy bull today has fewer problems because he has more facts to back his judgement than at any previous time. With the production testing and classification work which has been done, it is possible to have an accurate check on the performance of the prospective herd sire's relatives. Of course, this does not remove all of the guesswork from choosing the right kind of bull, but it does take away a lot of it.

The Star Rating system which is used with the Jersey breed was developed as a means of assisting in rating the ability of young bulls. Older bulls should be judged on the performances of their offspring.

NEW DIRECTOR FOR HEALTH UNIT ARRIVES

Dr. Frank C. Miller, of Austin, with his wife arrived in Brownfield late last week, and becomes director of the four county health unit with headquarters here. Dr. Miller has just finished five years service with the medical corps of the army.

Prior to that he was a practicing physician at Amarillo for 14 years. He is a specialist in diseases among children. Has also been connected with State Health Department at Austin for some time.

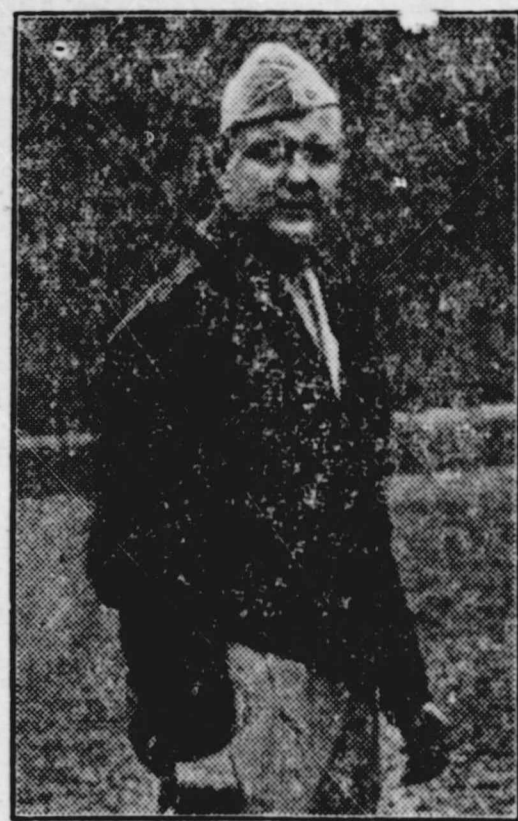

Diseases of the heart and arteries constitute the No. 1 Killer among life insurance policyholders today, accounting for nearly one-third of all policyholders deaths annually. The Life Insurance Medical Research Fund plans to make \$3,500,000 available over the next six years to get the causes and cures of these diseases.

Had you ever thought that it is man's plow that has made the waters of our rivers thick with mud, leaving behind acres of barren sub-soil.

McClain suggests another important thing along with the need for more good young sires. That is the importance of keeping bulls in service until their value becomes known. Too often a bull is removed from a herd before his daughters come into production.

When a herd sire is obtained McClain recommends feeding him plenty of hay and limited concentrates along with some green grass whenever possible. This keeps him in good working condition.

Japan Finished As World Power

(U. S. Coast Guard Photo)

Paul Manning (standing in above photo), widely-known commentator and magazine writer, and the only correspondent to witness and broadcast both the German and Japanese surrender ceremonies, declares in the current issue of the internationally-circulated "Sperry-scope" magazine, that the kind of peace administered by General of the Army Douglas MacArthur is a guarantee that Japan will "never again be a world power."

Manning, whose human interest broadcasts from Europe and the Pacific over a nation-wide network gained him a large following, during the last five years, predicted Tojo's suicide attempt ~~two days~~ before the event.

In the "Sperry-scope" article, Manning quoted from an interview with Gen. Yoshijiro Umezu, chief of the Japanese Imperial Staff, that the Japanese "could have continued to fight" with 9,000 Kamikaze pilots and 2,500,000 soldiers in the home islands. "I believed the General," Manning says, "when I traveled through Japan. Civilian economy had been virtually paralyzed but the Japanese army was sufficiently well equipped for at least another year of war."

Life insurance companies now have more than \$4,000,000,000 invested in mortgages covering homes and housing for American families, an all-time peak for such financing aid. The companies are now prepared for a still greater role in post-war housing. At least one billion dollars will be available for new mortgages each year in the early post-war years.

A fertile soil supports a healthy people; a poor top soil is the basis for poor health.

SIDELIGHTS From Washington

By George Mahon

Congress is in recess until January 14, and I am glad to be back in the district. During this time, I expect to get about over the district as much as possible. On account of the shortness of the recess I will not undertake to open an office, and regular mail should still be addressed to me in Washington.

I think the following notes on the changes which Congress has recently made in the G. I. Bill of Rights will be of interest.

Heretofore, a veteran has been allowed \$50 per month living allowances for educational purposes and \$75 if he has dependents. Under the new law, \$65 will be allowed for single veterans and \$90 for those with dependents.

Previously, veterans were presumed to have had their educa-

tion interrupted only if they were under 25 years of age when they entered the service. The new bill removes that limit, so that now any veteran, regardless of age, can get a year's training plus as many years as he was in service, with a maximum of four years.

Short, intense courses are also approved in the new amendment, as are recognized correspondence courses—cost not to exceed \$500.

Heretofore, the veteran was required to start to school within two years after discharge or the end of the war, whichever is later. This is changed to four years, and instead of being compelled to complete his course of study in seven years, this has been extended to nine years after the end of the war.

Considerable change is made in the loan provisions of the G. I. Bill.

The maximum guarantee on real estate loans is raised from \$2,000

to \$4,000. However, guarantees are still limited to fifty percent of loan, and guarantees on non-real estate remain at \$2,000. Maturity of all non-real estate loans is set at ten years. The amortization period on real estate loans is fixed at 25 years unless the real estate is a farm, in which case the period of amortization can be as long as forty years.

The term "reasonable normal value" has been a confusing and difficult requirement in making appraisals of the value of property. Under the new law, the term "reasonable value" is substituted which will liberalize the act.

Anyone interested in further details of the new law can secure a

U. S. Chosen As Home Of United Nations

LONDON, Dec. 15.—The United States was chosen Saturday as the permanent home of the United Nations Organization after a long, hard-fought battle, and the preparatory commission decided to meet Monday to select the city in which the world peace agency will be located.

The selection becomes final with the stamp of approval of the general assembly, and the Belgian and French delegates, who with the British Delegates led the fight for a European site, said the choice would not be challenged again.

Accidents are more costly in human lives than war. Total combat deaths in World War II were about 265,000 and about 650,000 were wounded; while during the same period accidents on the home front killed 350,000 persons and injured 36,000,000, of whom 1,250,000 suffered some permanent disability.

There are now seven times as many people who own life insurance policies in the United States as there were in 1900. One-half the population now own policies, while only one-eighth owned them then.

BROCK FAMILY HOLDS A FAMILY REUNION

Mr. and Mrs. Wayland (Monk) Parker were hosts during Christmas Eve and Christmas day to Mr. and Mrs. L. L. Brock, parents of Mrs. Parker; Mr. and Mrs. Lawrence Magee of Lubbock; Lt. Steve L. Brock, U. S. N.; J. O. Brock, of Seminole; Mr. and Mrs. Delbert Swindle, of Carlsbad, N. M.; and Mozelle Brock of Lubbock.

All members of the Brock family were re-united for the first time in eight years. A real old-fashioned Christmas dinner, including turkey, dressing, and all the trimmings were served the immediate family, while the "in-laws" played the role of waitresses and nurse-maids. A prayer of thanksgiving, for the rare privilege of being together and being led safely through the war, was offered by the parents. It was a grand occasion for all who attended.

National 4-H Dairy Production Winners

Three of six national 4-H dairy production winners are shown here, with their favorite animal and preferred liquid refreshment—milk. They are (left to right) Bill Van Cleave, Chapel Hill, Tenn.; James Galbreath, Street, Md.; and Earl Edwards, Jr., Floydada, Tex. They received college scholarships presented by the Kraft Foods Company. Bill started out eight years ago with one heifer, now has three cows, four heifers, two calves and a herd sire. Total income from dairy products is \$5,454, including \$803 in cash prizes. James has raised 16 dairy animals in eight years, won five junior, one senior and four grand championship awards; has grossed \$5,425, including \$550 in cash awards. Earl is milking a herd of 21 purebred Jerseys, with gross earnings of \$7,089 of which \$267 was prize money. He won grand championship and reserve champion in a county dairy show last year. He is secretary-treasurer of the Texas 4-H organization.

New Year's Mummers Parade Big Event

The Mummers' Parade on New Year's Eve is to Philadelphia what the Tournament of Roses is to Pasadena—only the Mummers have a priority on tradition.

The earliest settlers in the vicinity of present-day Philadelphia were English and Swedes. The English cherished the traditional Mummer play "St. George and the Dragon," while the Swedes were fond of masquerading informally on New Year's Eve. The two customs had merged long before the Revolution and it was customary—even among the Quakers—to extend hospitality to the masqueraders or give them a dole for refreshments.

After the Revolution, George Washington replaced St. George as the central figure of the festivities which continued along the path of spontaneity until 1886 when the parade was sponsored by the Silver Crown New Year's association.

The Municipal administration officially recognized the parade in 1901, and representative citizenry began turning out to watch and participate in the festivities.

The number of organizations sponsoring the parade, the divisions and elaborateness thereof increased through the years. On New Year's Eve in 1930, 12,000 participated in the line of march down Bond street and 300,000 spectators watched the parade which lasted from early evening through the wee hours of the New Year.

New Year's Compliments.
Danish families save their broken crockery—to toss against their friends' doors on New Year's Eve. The crockery tossed, the tossers run; but not too far; they expect to be invited in for doughnuts.

The most popular household in the community is so designated on New Year's morning by the debris around the doorstep.

Farmers this year set a new peak in the purchase of life insurance. Countrywide, they bought nearly twice as much as in pre-war 1941.

MRS. ROOSEVELT MAY GET POST WITH UNO

WASHINGTON, Dec. 15.—Mrs. Eleanor Roosevelt is "under consideration for appointment to an important position with the United Nations Organizations, it became known today.

Sources close to the administration who asked not to be quoted directly said that the delegation to the UNO would be announced before very long and that there was ground for speculation that she might be in the group.

The Low Down From Hickory Grove

You know, gettin' a compliment from a banker is some shakes. I just got one—so I gotta tell you. It may be some spell before I get another, if ever. Well, this banker gent, he says to me, Josephus, you get around some, tell me, he says, what there is to this "take-home-pay" I been reading about—I would like to try takin' some home, he says.

Ed, I says—everybody calls him Ed—I didn't know that bankers ready fairy stories. There is no such animal, I says, as "take-home-pay"—I mean where you take it home and keep much of it, if that is what you got in mind. "Take-home-pay" is a slogan. It sounds skookum. And if you are head-man down at the Labor Temple, it helps you keep your job. Or if you are a senator you can make speeches on same and it has been helping on votes, or anyway they been thinking so up to recent-like. But with new elections in the offing, it is looking different as more people get hep—and registered.

Advisin' a banker, brother, it is hard to keep the buttons on my vest.

Yours with the low down,
JO SERRA

The proportion of people keeping their life insurance policies in full force, in spite of financial emergencies, is today at an all-time high. Approximately 98% of all ordinary policies in force at the start of the year became payable under the policy terms during the year or remained in force throughout the year.

January 31 THE LAST DAY FOR MEN NOW IN THE ARMY TO RETAIN THEIR PRESENT GRADES BY REENLISTING...

Men now in the Army who reenlist before February 1 will be reenlisted in their present grade. Men honorably discharged can reenlist within 20 days after discharge in the grade they held at the time of discharge, provided they reenlist before February 1, 1946.

There's a long list of attractive reenlistment privileges in the new Armed Forces Voluntary Recruitment Act of 1945. The ability to keep your present grade is only one of them, but this privilege expires on January 31.

There are plenty of other reasons why many thousands of men have enlisted, and more thousands are enlisting every day. You'll certainly want to know all of the opportunities open to you. If you'll read them carefully, you'll know why a job in the new peacetime Regular Army is being regarded today as "The Best Job in the World."

HIGHLIGHTS OF THE NEW ENLISTMENT PROGRAM

- Enlistments for 1½, 2 or 3 years. (1-year enlistments permitted for men now in Army with 6 months' service.)
- Enlistment age from 17 to 34 years inclusive, except for men now in Army, who may reenlist at any age.
- Men reenlisting retain present grades, if they reenlist within 20 days after discharge and before February 1, 1946.
- The best pay scale, medical care, food, quarters and clothing in Army history.
- An increase in the reenlistment bonus to \$50 for each year of active service since such bonus was last paid, or since last entry into service.
- Up to 90 days' paid furlough, depending on length of service, with furlough travel paid to home and return, for men now in Army who enlist.
- A 30-day furlough every year at full pay.
- Mustering-out pay (based upon length of service) to all men who are discharged to reenlist.
- Option to retire at half pay for life after 20 years' service—increasing to three-quarters pay after 30 years' service. All previous active federal military service counts toward retirement.
- Benefits under the GI Bill of Rights.
- Family allowances for the term of enlistment for dependents of men who enlist before July 1, 1946.
- Opportunity to learn one or more of 200 skills and trades.
- Choice of branch of service and overseas theater in the Air, Ground or Service Forces on 3-year enlistments.

Brownfield High School Band

The First Semester is drawing to a close but actually it spells only the beginning of Band work. Thus far the schedule has been such that it was impossible to get the full band together at one time. This obstacle will be largely overcome and better progress is expected.

Interest is high in the ranks of the beginners for so many came back after the holidays with new horns. Many more have stated their interest in getting instruments and these are becoming easier to get all the time. The High School Band is beginning to work on program material in preparation for some concerts in the future. Other bands in this territory have expressed to Mr. Horn a desire to trade concerts. This would be an idea worth working toward. Mr. Horn states that the band is not yet ready to give concerts but with some good hard work it can be done. Emphasis is being placed on individual practice at home, for there is where the foundation is laid. At school the idea is to learn to play together.

Officers of the church of Christ meeting at Main and Third, have purchased property from Mrs. M. V. Brownfield, part of which fronts on Lubbock Road, and part across the street east, upon which the church will soon build. The Main street property has become so valuable as business property that it was decided to sell it. Two other churches with big memberships are also situated within a block, making parking traffic hazardous. These are the First Baptist and First Methodist.

One piece of this property recently purchased fronts 150 feet on Lubbock Road and runs back east 290 feet. Across the street east of the above mentioned property they have a lot fronting south, 140x230, making in all 290x520 feet.

Our understanding is that there is an option on the Main Street property at a good figure.

More Readers Take Five Years of Herald

Last week we stated that two readers had renewed for five years of the Herald. By the last of the week three others had given us a five year order to be delivered between now and the first of Jan. 1951. In every case, they are Terry county farmers, and in each one of the cases the reason was the same:

"I can't think to renew when the paper comes due, so will just put 'er up five years and forget the matter." The three men were R. C. Young, D. A. Lowe and J. W. Christesson. Let others go and do likewise.

Allen Harkins came in to renew this week, and as there were two men in to announce for political offices, came near getting Allen in on that, too.

Clarifies Regulations On Poll Tax Exemptions

According to County Tax Collector-Assessor Virgil Burnett, there has been no little confusion arising from apparently conflicting information being issued from various sources upon whether or not an exemption certificate is required for those who have recently reached their twenty-first birthday and for those over sixty-five.

The information sent out by the office of Comptroller of Public Accounts states that in counties having a town of 10,000 or more population, a certificate of exemption is required. In counties having no towns of ten thousand or more—as is the case of Terry county—a certificate is NOT required. However, should anyone in the above age groups desire a certificate of exemption, it may be obtained free of charge at the Collector-Assessor office. Election officials may require that the over or under-age voter in the counties where no certificate is needed sign an affidavit as to his age at the time of voting, but each polling place will be amply equipped to take care of this detail with a minimum of bother to the voter.

Burnett states that some uncertainty has arisen in the minds of some Terry county people upon hearing a radio broadcast originating in a nearby town urging those who are exempt from poll tax payments to obtain their certificates. Certificates are required in particular, as it has a city of over ten thousand, and Terry County people, upon hearing such announcement, should assume that the speaker is appealing directly to voters of that county only.

Men in service are exempt from poll tax payments for a period of 18 months after the duration of the war which, incidentally, is technically still going on. Discharged service men are exempt for a period of 18 months after date of discharge. The latter may be required to show discharge papers or other papers establishing their status at the time of voting.
