## The Gay Philosopher

By J. W. S.

THE U. S. NAVY in peace time is quite different from the same organization in war time. That's the conclusion we've reached after spending two weeks on active duty. The peace time Navy is operated like a large corporation. Everything is business-like. In war time, of course, the objective was different.

Our two weeks at the Naval Air Station, Dallas, was the first time we'd been in uniform for some 3 years. The Dallas base's business is largely the training reserve officers and men. In addition to those who come in annually for two weeks, the base has several organized reserve flight squadrons. These units train twice a month.

The air station has planes of all types. While we were there, we organized reserve squadrons on their two weeks' tour. And the flying business was right good.

In addition to this work, the base handles recruiting work for the regular and reserve groups. Waves also join the navy at Dallas.

THE OFFICERS stationed permanently at the Dallas base are reserves, with two or three exceptions. They treat you well, and they have a well organized program for the reservists.

Since we are a Naval Reserve aviator, a large part of our two weeks was spent in brushing up on flying. In addition, every effort was made to bring us up to date on "What's New in the Navy."

ONE THING WE noticed was morale was particularly good among the mechanics and the guys who keep 'em flying. A lot of these crews are made up of reservists who were in for a few weeks. And they enjoy their duty. Many of them are the Navy for the first time. Others are battle-scarred veterans.

THE NAVY OFFERS a pretty attractive proposition to the reservist. They've worked out a plan under which you can receive in 20 years on a pension. It would be expensive to buy insurance sufficient to provide a like sum upon retirement. We're in the recruiting business, and we don't hesitate to recommend the Naval Reserve. We can't remember when we had a more enjoyable two weeks.

## PARENTS ANNOUNCE APPROACHING RITES

Mr. and Mrs. Carl Pence wish to announce the engagement and approaching marriage of their daughter, Doris, to Bill Greenhaw, son of Mr. and Mrs. Hugh Greenhaw of Cisco.

The young people are both graduates of Cisco High School and are now working in Fort Worth. The marriage is scheduled to take place sometime during July in the home of the bride's parents.

## LONGHORN STEERS TO OPEN 1949 FORT GRIFFIN FANDANGLE

The Symbol of the Longhorn Steer on the Fort Griffin Fandangle Flag will be a reality when the Longhorns, only herd in this part of Texas, will cross the giant out-of-doors stage at the Albany High School stadium this week on June 23, 24, & 25, the 7th showing of the Fort Griffin Fandangle. Longhorns went North through there in 1875.

A new show with the theme of the Fort Griffin Echo, its editors, the stalwarts of the Frontier is in store for the visitors this year. Fort Griffin Town was rough and tough, accurate historians recount 17 hangings on the pecan trees fronting the Clear Fork River. The Indians were raiding and warring on the ranchers, but Connecticut Cal-

## Dairymen's Artificial Insemination Program Shows Signs Of Growth

A total of 597 dairy cows have been signed up for artificial breeding in Eastland County to date according to Harry Crow, Carbon, artificial insemination technician.

Out of the 286 cows artificially bred up to June 1, at least 70 per cent were bred to Jersey bulls, 25 per cent to Guernseys and only 5 per cent to Holsteins, Crow reported.

"We are growing right along and hope to have at least 1,000 in the program by fall," commented A. Z. Myrick, Cisco dairyman and president of the Eastland County Dairy Association, sponsors of the breeding program.

"The very first goals that we set up when we organized in May of 1948 was to establish an artificial breeding program in the county. We actually started to artificially breed cows on February 8, only ten months after we perfected our organization," Myrick said when discussing the results of the organization.

Any owner within a 30 mile radius of Carbon can get his cow artificially bred to either a Guernsey, Jersey or Holstein bull for a total of only \$8.00 with two repeat services free if necessary. Cows can be signed up with either Crow at Carbon, Myrick at Cisco or at the County Agent's office in Eastland.

## Robert Rendall Has Operation

Robert (Rudy) Rendall, son of Mr. and Mrs. R. V. Rendall, underwent major surgery at Graham Hospital Tuesday morning and was reported to be in good condition. He will remain in the hospital for approximately two weeks.

Young Rendall was a member of the spring graduating class of Cisco High School. He was captain of the 1948-49 football team and was selected as all-district back. He was selected by popular vote to the throne of King Lobo XVII.

## SUFFERS STROKE

Neal Agnew, 82, one of the old timers of Cisco, was taken to Graham Hospital early Tuesday after suffering what was thought to be a paralytic stroke. His condition was said to be serious.

# Buster Reed Of Dallas Wins Cisco Invitational Golf Tournament By Defeating J. V. Dixon, Abilene, 5-4

Buster Reed, Lone Star Conference winner, was 11 under par for 40 holes Sunday when he walked away with the championship honors in the 14th annual Cisco Invitational Golf Tournament, played over the Country Club Course. Reed, who was never pressed after the third hole, took the championship of the snappiest tournament ever staged by the local club by defeating veteran J. V. Dixon of Abilene 5-4.

Dixon sank a circling 20 foot put on the No. 1 hole for a birdie three to go one up on the youthful North Texas State College star who was in the trap on his second shot. Dixon lost the second hole to Reed when he missed a four foot put for his par. Reed overshot the green on

his tee shot but made a good recovery and sank his put for a par 3.

Reed took No. 3 when Dixon sliced into the rough on his first shot and was in a trap on his second. Reed took the hole with a par four.

Dixon lost No. 4 when Reed sank a long put for a birdie four. They halved No. 5 and No. 6 but Reed took No. 7 when his tee shot soared over the rough to land in the fairway for an easy approach to the green. The

Abilene trucking contractor had a chance to take No. 8 when Reed overshot the green on his second shot but the collegian pitched up for an easy par and halved the hole.

Dixon won No. 9 with a birdie three after slicing his tee shot into the road. His second shot was resting five feet from the pin while Reed was still trying to make the green. Dixon was two down at the turn. From there on in it was all Reed. He played cool calculating golf and Dixon was never able to come close.

That match wound up the most successful tournament ever staged at the Country Club. The entry list was studded with stars from all over the state and was featured by close matches and good golf in all six flights. The tournament matches were as follows:

## Temperature Hits 94 Degrees; More To Come

The mercury rose to 94 at 3:30 p. m. Monday but failed to reach the high mark for the year — a warm 98 which was recorded early in the month. The high reading Monday was a reminder that summer is just beginning and that old Sol will be shooting his hottest rays at the earth's surface for the next three months.

Today will be the longest day of the year, 15 hours and 17 minutes. Beginning Wednesday the sun will rise a minute later and the days will gradually get longer until along in December. The low for Monday was 71 and the low for Tuesday was 70. The forecast called for continued clear and warm. A cool front moving toward Texas will possibly bring slightly cooler weather later in the week with possible scattered showers.

HOT ON A WARM DAY—Smoke clouds rise from a storage yard and two adjacent buildings swept by a fire in West Philadelphia, Pa. The blaze roared through a garage, a warehouse and a yard containing dairy equipment. Damage was estimated at \$150,000.

# How deep is an oil well? . . . How long is a piece of string!

This is an exploratory well being drilled by the Humble Company on the Continental Shelf 7 miles offshore from Quatre Bayou, Louisiana. It will be drilled to a depth of 14,000 feet.

Humble has production 12,026 feet deep in the South Mayes Field in Chambers County, Texas.

The great East Texas oil field was discovered in 1930 at an average depth of only 3,570 feet. Today, most oil is found in the United States at much greater depths.

The oil industry is going deeper to find more oil for your needs, to discover reserves of oil that will be available for long-range increasing needs and for national emergencies.

Fifteen years ago, the average depth of a Humble well was 4,362 feet. Ten years ago, the Company went 700 feet deeper, to about 5,000 feet, to find oil for you. And the average depth of producing Humble wells drilled in 1948 was 6,695 feet.

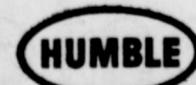

That's average. The oil companies go a lot deeper if they think they can find oil farther down. The deepest well drilled in 1948 was 17,696 feet; it was a wildcat well which discovered neither oil nor gas.

How deep is an oil well? It's as deep as it has to be to find or produce oil, or to prove that there's no oil there.

Costs go up as wells go deeper. A well 10,000 feet deep costs, on the average, about three times as much as a 7,000-foot well; a 15,000-foot well may cost 12 times as much.

To find and produce more oil for you requires a tremendous lot of money. And in any territory, there's a considerable risk involved, for only by drilling can you prove, or disprove, that a geological or geophysical "prospect" actually contains oil. In fact, a good many hundreds of millions of dollars have been invested in drilling "dry holes." In an unproved area, the odds are 9 to 1 against the chances of finding oil.

But the oil industry continues to drill wherever scientists think there is a possibility of finding oil; it will go as deep as today's equipment will permit in its hunt for oil . . . because it is a responsible, dynamic industry whose major interest is to supply the oil you need today, and to provide reserves of oil for your needs, and those of the country, in the years to come.
