Wranglers Lose 37-6 Battle To Strong Navarro Bulldogs

The Cisco Junior College Wranglers lost a 37-to-6 game to Navarro Junior College here Thursday night, but they did a better job of holding the Bulldogs than any other member of the Texas Junior College conference has done this year.

The Bulldogs, who had scored an average of 45 points per game, were led to the victory by Richard Gaines, a 180 pound hard driving halfback, who scored all five of their touchdowns.

Bob Huffmyer, Wrangler back, climaxed a 75-yard march with a 35-yard run for the only Cisco score. The Wranglers were a better offensive outfit than they have been in a long time from the standpoint of a ground game.

A high and cold wind, which kept the crowd small, didn't help

either team. The wind was from the northeast and the team defending the east goal had a very definite advantage.

The Cisco team took the kickoff on their 26. Bobby Gibson took a 6-yard pass from Burl Moses. Two plays failed and Chambers kicked out on the Navarro 28.

ANNUAL TEXAS GAME HARVEST IS OPENED TO FULL THROTTLE

AUSTIN, Nov. 16.—The annual harvest of Texas' varied game crop was opened at full throttle November 15 and 16.

With the waterfowl season already underway, south zone residents open the mourning dove season at noon, November 15. And the general state season on deer and turkey began a half hour before sunrise November 16.

The other major phases of the fall shoot opens December 1 when the general state quail season opens.

Prospects for the big game shoot are below par, according to the Executive Secretary of the Game and Fish Commission.

One popular phase of the fall shoot is opening later this year. It is the big game season West of the Pecos which begins November 20 and extends through November 25.

Hunters there may bag either a prong antlered black tailed deer or a white-tailed deer. Heretofore, sportsmen West of the Pecos could have one of each or two of the same species.

tailed deer are concentrated, suffered heavily from extreme weather during recent months.

However, the feed in scattered areas was stimulated by late-summer rains and some sportsmen will get their big, fat bucks as usual.

The general limit on whitetails is two bucks with pronged antlers. The general state limit on wild turkey is three gobblers per hunter. Forty four counties allow only two gobblers. Seven others allow only one gobbler per individual.

The last part of the mourning dove season is expected to more or less duplicate the poor shooting in the northern zone which ended October 10. Dove hunting was restricted to afternoons this year.

Motor Vehicle Safety Laws Will Follow Drivers To Other States

AUSTIN, Nov. 15. — Texas motorists who become involved in traffic accidents in other states and motorists from other states who become involved in accidents in Texas are most likely to find that the long arm of the new Motor Vehicle Safety Responsibility Law has followed them right to the scene of their misfortune, Public Safety Director Homer Garrison, Jr., pointed out today.

As explained by Director Garrison, here is how it will operate when the law becomes effective in Texas on January 1:

Assume that a Texas motorist is driving his automobile in another state having a similar security type safety responsibility law and is involved in an accident that results in death or injury to a person or property damage to any one person in excess of \$100. He will be required, under the laws of that state, to furnish proof of his ability to meet damage claims either through insurance or by depositing sufficient security to cover the apparent damage he caused.

Should the Texas motorist fail to do this, the authorities of the other state will suspend his privileges to own or operate a motor vehicle in that state and will send a certified copy of its suspension order to the Texas Department of Public Safety. If the circumstances in the other state would have resulted in suspension in Texas, his motoring privileges will also be suspended in Texas. They will remain suspended until he has satisfied the law of the other state to the same extent that he would be required to satisfy the Texas law.

In the same manner, the new Texas law applies to non-resident motorists who are involved in accidents in this state, resulting in death or injury to a person, or property damage to any one person in excess of \$100. Non-residents who fail to meet the requirements of the Texas law will have their privileges suspended in this state and also in their home state if the circumstances would have called for similar action there.

"When you understand that 10 per cent of the traffic accidents in most states are caused by out-of-state drivers," Director Garrison said, "you will appreciate the importance of this provision in our law. It means that a visiting motorist will no longer be able to skip out of responsibility for his damages by crossing the state line. If he does, he will find the administrator of his own state's safety responsibility law waiting for him with a suspension order. I think this alone will do much to promote greater safety on our highways."

Since 34 other states have enacted safety responsibility laws similar to the one that soon will become effective in Texas, the area where motorists are not subject to these modern statutes has been considerably narrowed. While the safety responsibility law in a few of these states does not include this reciprocal provision, they are rapidly adding it. In addition, traffic accident experts predict that most of the 13 states that have failed to enact these statutes will do so within the next two years.

Jersey Ends Life By Milking It Away

The milking career of the champion lifetime butterfat producer of the nation's dairy cows came to an end this fall. The cause of her death was given as "she just milked away."

Silken Lady's Ruby of F., a registered Jersey cow owned by the Estate of J. W. Coppini, Ferndale, Calif., milked her last at well over 21 years of age, more than three times the average life of a dairy cow. She had been a revered champion of the dairy world for many years, having held the lifetime production title for five years and adding to it until the very last.

Her production accumulated in 20 milking years stands at 196,457 pounds milk and 10,936 pounds butterfat, which is equivalent to 91,375 quarts milk and 13,123 pounds butter. This is enough milk to furnish the needs of a family of five for over 60 years and enough butterfat to meet all of its fat requirements for over 77 years.

Old Ruby, as the production champion is known throughout the dairy world, had 18 calves. She is survived by a host of descendants, the exact number of which is not known. She was honored recently at two of the leading dairy cattle shows in the nation by having her picture hung in the show barns with the caption, "Old Jerseys never die, they just milk away." The statement describes Old Ruby's passing. She milked away, but her name will continue to live in the hearts of the nation's dairymen.

World's Record Prices

A world's record price for heifer calves in auction was recently set in Moberly, S. D. when 400 head of Shorthorns were purchased at an average of \$44.00 per hundredweight. The American Shorthorn Breeders' association says that wide demand for Shorthorn range-bred calves and yearlings such as pictured above far exceeds present numbers, and points to another record set on the Omaha market in September when \$40.00 per hundred was paid for a load of Wyoming yearling heifers, another all-time high-price for their kind. Most of the heifers will return to range country to produce more calves.

No chance of fouling up this Thanksgiving Tom for the children of the Texas Scottish Rite Hospital for Crippled Children in Dallas with Diane Canaday, Quitman, and Ray Greathouse, Mobeetie, two of the hospital's star patients, on hand for the roasting.

KEEPING HER OAR IN—Sixteen-year-old Sonya Klopfer of Queens, N.Y., is shown practicing for the Olympic trout to be held in Indianapolis in December. Sonya is the senior singles skating champion of the U.S. and North America, and she's doing all this work in an effort to retain her title.

One of the big problems, of course, is the title problem. We tell them frankly that a few dollars invested in an abstract now may save them hundreds of dollars later on. LIFE IN KOREA

ORGANIZED FUN—For the first time since the war, school kids in Seoul, Korea, organized a day of games, races and track-and-field contests recently. Young girls in neat formation, top above, spell out "Seoul" in Korean alphabet characters, while grandstand harmony from a school band, below, keeps the mood of the occasion festive. About 2500 youngsters participated in

the events which permitted them to see their friends again, and even hear teachers' familiar voices. Huts of various shapes and sizes such as those above dot the countryside outside the city, and happy children from this peaceful setting, that belies the true situation, got into the spirit of things. One of the mass games, called "Thanks UN Forces," took place in the vast

playing field in the heart of the city, top above. Spectators jammed the surrounding buildings to cheer. A cheering section is shown closer, below, shouting strong vocal support to the champions, as the gymnasts, sprinters and jumpers vie for honors. It was a happy event in a war-ravaged city which is beginning to re-open its schools once again.
