MEET A SUCCESSFUL TURKEY RAISER!

"This is our 8th year on the Texo Turkey Program."

and Mrs. B. J. FISHER Cumby, Texas

"This is our 8th year on the Texo Turkey Program, and we can honestly say that we've never found a better feed. We like the Texo Turkey Program, because it gives us the best feed conversion we've ever had. We've made money every year with Texo, and we intend to stay on the Texo Turkey Program," say Mr. and Mrs. B. J. Fisher, your TEXO neighbors in Cumby, Texas.

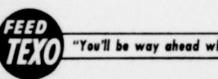

What makes profit-minded feeders like the Fishers keep on coming back using the same feed year after year? The reason is results. That's particularly true of turkeys, because there's just no way to fool yourself when you figure feed conversion. The Texo Turkey Program is a balanced program, especially designed to give the best conversion from poult to finished marketing bird.

If you're not already on the Texo Turkey Program, it'll pay you to stop in and get complete information.

> SEE US FOR BEST PRICES ON ALL TEXO FEEDS.

Tuberculosis Is Losing Ground As Death Cause

AUSTIN, Dec. 16. - Tuberculosis, many years ago the nation's leading cause of death, is losing out because of man's fight for better health. Once the leading death in Texas, too, tuberculosis now ranks ninth in Texas as a cause of death, says Dr. Henry A. Holle, State Health Officer. Last year all forms of tuberculosis killed 1,070 Texans while twenty years ago with a popula-tion of only two-thirds of our present population there were 4,020 deaths.

Tuberculosis usually attacks the lungs. The disease is spread from person to person, through germladen droplets or sputum dis-charged by an infected person. It can be spread through kissing, breathing air containing tuberculosis germs, and through handling objects used in common with tuberculous persons. Children are easily susceptible to tuberculosis infection, as they are to other disease germs.

Tuberculosis victims have a good chance to recover, if the disease is found in its early stages, and the physician's instructions for treatment are carefully followed. The outlook is becoming more encouraging as time goes on, but we cannot rest while the disease is still taking so many

Often, tuberculosis does not show any noticeable symptoms until its victim has become extremely sick. The most common signs are chronic indigestion, steady loss of weight, an irritating hoarseness, poor appetite, and a constant feeling of fatigue, without any apparent cause for it. The warnings are more definite when a persistent cough appears, or when a person begins spitting blood or blood streaked sputum, feels persistent or recurring pains in the chest, or runs daily fever in the afternoon.

If you experience any of these symptoms, don't delay - see your physician. One or more of these symptoms may or may not mean tuberculosis, but it is best to learn the cause. Don't try to diagnose your own condition, let your phy-

surest way to detect early tuberculosis. Every Texan has an opportunity to have his chest xrayed by one of the mobile x-ray units operated by the Texas State
