BACK IN ACTION-The grounded freighter Lake Charles is floating again, although with a down-tilted bow, after pumping operations in Manhattan's East River. Water-tight boxes, or cofferdams, were constructed in the flooded forward holds and water pumped out. The vessel rose 11 feet, enough to enable her to be towed three miles to a drydock in Brooklyn for repairs. The Panamanian freighter collided with a Japanese freighter, the Marinsan Maru, in a dense fog last November.
