## Bracero Muddle

Adding fuel to the flames of misunderstanding, certain folks down in Austin are adding salt to the open wounds of the bracero mess in which the farmers of the Plains and neighboring states find themselves.

Apparently the forces of organized labor have penetrated the ranks of the Texas Employment Commission to such a degree that they have gotten together and made up their minds to force the prices of farm labor right out of sight.

We would like to go on record right now as saying that we are not against any man getting what his labor is worth, but it does seem to us that the forces of organized labor aren't exactly examples of what the laboring man can do according to his pay.

We would like any man who works hard, applies himself and is proved a trusted employee to climb the ladder to higher wages.

Be he Mexican, Negro or whatever, the sky is the limit in our opinion if he is willing to work.

But — the idea of paying a worker more for loafing — well, we just don't cotton to the idea.

Our farmers have proved that they want to do the right thing in most instances. The TEC has told many of them they couldn't have bracero labor until they tried to recruit native help in the areas of unemployment in the North.

On more than one occasion a group of farmers has gone north and payed out good money to try to get men to come and work their crops.

All these efforts have proved fruitless and just more money down the drain.

Let's face it, Americans aren't willing to do the jobs which a vegetable farmer needs done.

Work on an assembly line, yes, that is ok. But in a field — never.

This seems to be the train of thought among our unemployed — as one of them told a farmer — "Hell, man, I ain't that hungry!"

The braceros seem to be the only answer and here the snag rips your britches.

By piecework a man can see what he is getting for his money. But with the TEC's plan of graduated riches all the braceros have to do is for 10 per cent to sit on their cans, thereby "no-qualifying" that week under our laws and a farmer is forced to raise their wages.

Is this fair?  
If some of the folks who are doing so much of the screaming about "rights of farm workers" down at Austin would get out of their oak chairs and go poke their nose into the problem instead of taking someone else's word on it perhaps their perspective would change.

In our opinion, the American has priced himself out of a job, and now his unions are turning upon the farmer and are making an all out effort to price the farm workers out of a living too.

### Rhea Residents Celebrate July 4th

Rhea community residents and their friends celebrated July 4 with an evening filled with activity.

A meal of fried chicken, salads, cherry pie and homemade ice cream was enjoyed by the group as they arrived. Mrs. Helen Potts was in charge of the food. Mrs. Walter Schueler, assisted by Mrs. Jack Patterson and Mrs. Ray Martensen, was in charge of the program which followed the evening meal.

Children participating in the program were Angie Goetz, Sharon Martensen, Harry Goetz, Steve Wagner, Carolyn Johnson, Shirley Schueler, Loretta Laceywell, Connie Vaughn, and Sandra Patterson.

Following the program given by the children the group enjoyed a display of fireworks. Herbert Scheuler and Billy Sifford were in charge of the fireworks.

Visitors present for the evening were Mr. and Mrs. Maynard Steas and Lonnie of Ames, Neb., were Sunday dinner guests in the Florian Jarecki home. Also present were Mr. and Mrs. Milton Sullivan and children and Mr. and Mrs. Oliver Rieken of Friona. Mrs. Steas is an aunt of Mrs. Jarecki and Mrs. Sullivan.

Have you visited Allen's Jewelry in its new location? The entire store is very pretty and the merchandise is attractively displayed. Everyone in this area should be proud that there is such a nice place to shop and such a wonderful selection of merchandise is available locally.

Most of you probably know that Monday is the busiest day of the week in the Star office. It is also the day that we depend upon the telephone most. This past Monday we really had telephone troubles. Several times right after noon the telephone rang. When we answered it there seemed to be someone on the line but no one would answer our repeated "Hellos." This kept happening and several persons who tried to call came to the office to see what was wrong. After about two or three hours we learned that calls coming in on the Parmer exchange were as usual but anyone in Friona or on the Hub exchange got a busy signal each time they dialed.

By late evening everything was back to normal. Anyone who tried to call and found the number busy each time is asked to try again. We do appreciate all calls and hope that

THE BIBLE CAN BE UNDERSTOOD

The Bible can be understood. If men can understand and profit by the fallible writings of men — why can't he understand the teachings of God given through men and for men?

Can God not give a law that can be understood and obeyed? Is God not so wise as men? God did not give us a book whereby we have to use a Divine Dictionary to understand it. He gave us a book in the language of men, through the medium of "earthen vessels," in order that we might be able to understand and believe.

SIMPLE EXAMPLE

If a man can understand that two and two equals four, why can't he understand that BELIEF plus BAPTISM equals salvation? "He that believeth and is baptized shall be saved." (Mk. 16:16). In all kindness I say that it surely must take help to misunderstand so simple a statement by Jesus. Especially so, when one only has to turn to the eighth chapter of the book of Acts to find the examples of the Samaritans (Acts 8:12) and the Ethiopian Eunuch (Acts 8:35-39), who carried out this commission of our Lord so simply and clearly.

Read these scriptures soon and you, too, will see that the Bible can be understood.

SIXTH STREET CHURCH OF CHRIST Friona, Texas

THE BULWARK OF A COMMUNITY IS ITS CHURCHES

"Thought For The Week"

Psalm 33:12 reads, "Blessed be the nation whose God is the Lord; and the people whom He has chosen for His own inheritance."

God has given us a pleasant land, a fruitful land, a land blessed with intelligence, liberty, and Christian faith. This is our goodly heritage. On this day, we should remember, the founders of our country recognized God as the author of all freedom. It becomes increasingly clear that we may be Christians and patriotic Americans at the same time.

We may not be Christian secretly. We must make this clear to the world. While we are not yet a completely Christian nation, we are perhaps on the right path.

May Almighty God hasten the day when our entire nation shall be made up of openly avowed and consecrated Christians. Then we shall indeed be a people whose God is the Lord.

You are invited to attend church somewhere each Sunday.

Joan Cozart, who had been visiting in the Bender home three weeks, returned home with her parents.

**Homeowning Can Be Hazardous Too!**

No matter how long the bronco-buster has been riding, he can never be sure the next horse won't throw him.

Such is the case with the homeowner. No matter how careful he tries to be, an unnoticed frayed electric cord, overloaded circuit, or smoldering cigarette can leave his home in cinders.

It's too late then to realize his insurance is "too little—and the wrong kind."

Be sure when you insure. Call on your local independent agent for a thorough appraisal of your needs.

# WEATHER BRINGS GOOD, BAD NEWS TO FARMERS

Parmer County area farmers, who have been among the most fortunate on the irrigated High Plains in recent years when it comes to getting a good break from the weather, have gotten several rounds of rough treatment within the past month.

Rains beginning last Thursday and continuing through Sunday over the weekend have been beneficial to almost everyone receiving them, but along with the rains have come some of the most severe hailstorms ever experienced by the farmers.

Hardest hit in the Friday afternoon onslaught of weather, which turned on nature's own brand of July 4th fireworks, were farmers in the extreme south-western part of Parmer County and the northwestern part of Bailey County. A very severe hailstorm there laid low sorghum-type crops and stripped cotton plants three months ahead of schedule. A swath about five miles long and three miles wide was cut east-and-west south of Farwell.

The severity of that storm was matched three weeks previously east and north of Friona, where farmers on over 50 sections of land in the Black-Summit-Lakeview communities reeled from the sight of fields hailed flat.

The afternoon of the 4th, storm heads hovered over other parts of the county, also, inflicting damage that was not widespread, but certainly locally severe. Keeping track of the strikes of the storm has posed a problem for Farm and Home.

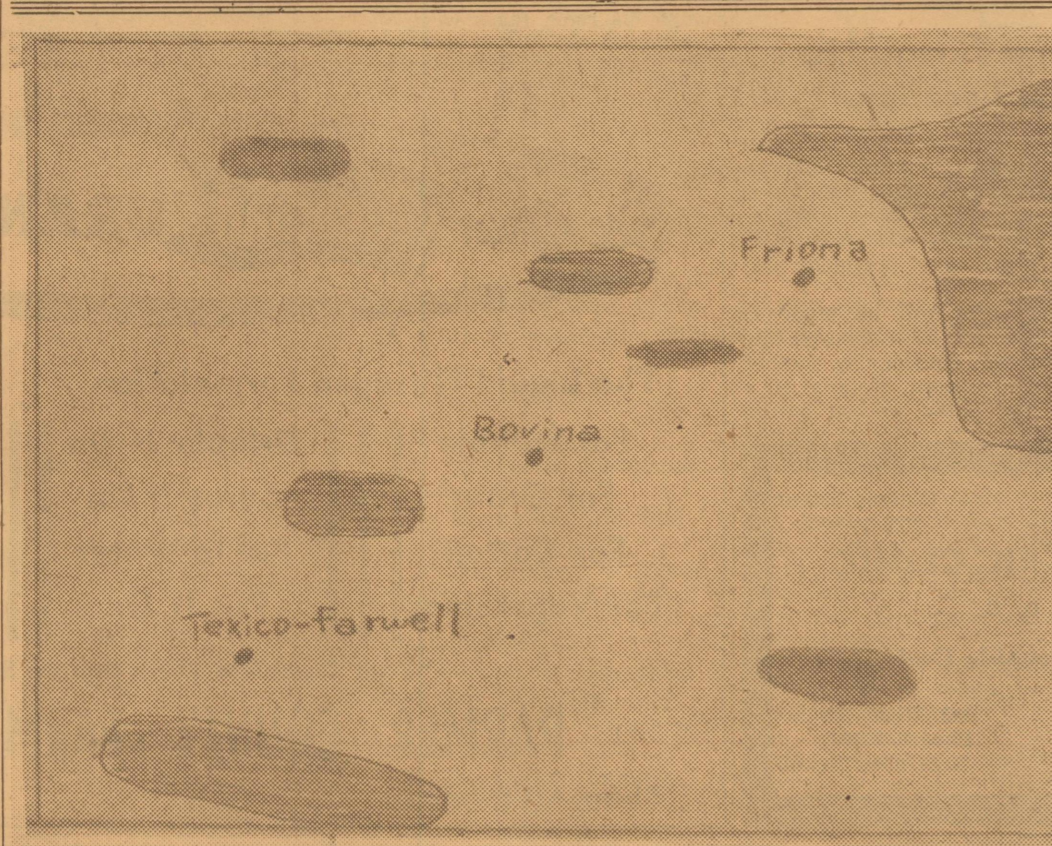

Almost every contact with farmers brings reports of additional areas that have received damage to a greater or lesser extent.

In cases where the cotton has felt the full brunt of the storm, the crop has been written off as a total loss. Cotton plants

that are "stripped naked" on July 4th don't have time to rebound with foliage, squares, blooms, and bolls and give the fruit enough time to mature into quality cotton before frost.

That would be too much to expect on the High Plains. Damaged feed, on the other

## "The High Plains Farm and Home"

Farm and Home makes no claims about the close accuracy of this map, but it does serve to illustrate how widespread moderate to severe hail damage has been this year. Some of the boundaries of areas indicated here may be too general; there may be some other spots that are missing from the map altogether. It is very difficult to piece together such a map from reports.

hand, may recover in time to make some grain, although its potentialities for significant production have been minimized considerably. Re-planting hailed-out cotton to sorghum crops is under consideration, but likely little of that catch-cropping will be done.

Ordinarily, even early maturing grain sorghums planted after July 4 do not have time to "make," and few farmers are interested in producing just bundles of irrigated farmland with its production costs.

Some are considering using some of the land thus vacated for specialty vegetable crops, but this will be a very insignificant acreage.

It is very difficult to accurately appraise the amount of damage that has resulted from the storms. Until harvests are complete and yields of hail-damaged fields can be compared with those untouched, not even a good guess is possible.

However, if the total Parmer County crop valuation is \$25 million this year, the extent of the hail-hit areas suggests that it would not be too rash to conclude that the storms have represented a million-dollar loss to farmers within the past month. Perhaps the total would be even more.

Meanwhile, the moisture received from the violent weather has offset, or at least partially so, the adverse effects on crop. Rainfall has been very general, although the amounts received at local points have been variable.

Amounts reported range from about an inch in the "almost missed us" sections to over four inches in the storm

centers. Averaged out, a figure of 1 1/2 inches for the typical farm would be approximately correct.

The rains have come at a timely moment. Both grain sorghum and cotton are at or near a stage where irrigations would be necessary. In fact, the dashing rains have cut silent several hundred wells that were already at work supplying the supplemental moisture necessary for maximum yields in this semi-arid region.

The wheat harvest was out of the way, so farmers welcomed the moisture practically across the board. In today's complex High Plains farming picture, it's unusual to find a time when almost everyone welcomes rain, but this could be considered one of those moments.

Crops are continuing to make good growth, and cotton appears to be ready to get a good fruit set. Were it not for the hail which has hurt a sizeable number of farmers now, crop prospects would still be considered the best since 1956—which was a record yield year for just about everything.

This promising grain sorghum was badly ragged by pelting hailstones Friday afternoon on a farm north of Bovina. This crop is expected to recover, however.

## Elevator Goes To Hub

Parmer County elevators are a building, and the newest one is to be at the Hub Community. Work is supposed to start this week on a 646,000-bushel unit south of the Fleming & Son Gin.

time for grain sorghum harvest this year.

Woodrow Fleming of Friona made the announcement this week, which was a follow-up to several unofficial reports that an elevator was to be built there this year.

The elevator will be equipped with two dumps and a continuous-flow style grain dryer.

First to be constructed will be the 60-foot scales and office, and work was to begin on those units, this week.

In business with Fleming will be W. E. Stringer of Vernon, Holland Metcalf of Chillicothe, and H. E. Wilson of Electra, all grainmen in the Red River area northeast of here.

Stringer, who has purchased a home and is moving to Friona will be manager of the new elevator, which as yet has not been named.

The elevator will be composed of both flat and tank storage. An 80x240 steel flat-storage unit will be put up, plus four 21x56 steel cylindrical tanks to make the 646,000-bushel capacity. Plans already call for an expansion of the first units to give the elevator a 1,000,000-bushel capacity later in the year. However, 646,000 bushels is all the men hope to get completed in

"The Place Where Most People Trade" Friona, Texas  
Wednesday, July 9, 1958

Don't know how many of the Friona Lions had to have help to get out of bed Monday morning after the ball game, but we do know that several of them were very disappointed. The last time they'd played ball they'd been the star player able to throw a fast or curve ball at will, able to catch a fly ball or grounder, and always quick enough to keep the opposition from stealing home. Oh! Well! Time marches on.

Hand embroidery on the scarf and bag Kirsti Gunther, center, is showing Gale Hadley, left, and Lou Ann Hadley, right, was done by her aunt. The items are part of the native costume she brought with her from Norway on a visit sponsored by the International Farm Youth Exchange. She will leave Friday after spending the past two weeks with the John Hadley family southwest of Texico. A gray blouse, a long black skirt with similar embroidery, and a green vest laced together with a tiny metal chain complete Kirsti's costume.

## Rodeo Is New Experience

by Laurie Cooper  
 "We have horse races and sulky races but nothing like a rodeo," smiled Kirsti Gunther of Norway when asked for her impressions of the annual July 4 rodeo at Elida. Kirsti (her name is pronounced Shisti) attended the rodeo with the John Hadley family whom she is visiting under the auspices of the International Farm Youth Exchange program sponsored by the National 4-H Foundation. Her two weeks with the Hadleys will be up Friday and she will go to Colfax County in northwestern New Mexico before going to Illinois.

New Mexico is very different from the southern part of Norway where Kirsti lives. "We have mountains and trees. But I like it here," she hastened to add. Kirsti's family lives on a farm of about 100 acres near Halden. The 19-year-old has been a member of 4-H clubs for five years. She is a junior leader and vegetable growing has been her major project. Norwegian clubs offer projects in the same areas as in the United States, but not so many are available. She was astounded at the wheat yields that were considered good in this area. Average is 90 bushels per acre in her fertile home land. Methods and machinery used on Norwegian farms are comparable—many are the same brands—those used here and their costs are about the same. Kirsti was graduated from what they call high school just before coming to the U. S. It is equivalent to three years of college in our school system. She has studied English for seven years. It is a required course and so are French and German. Only a slight hesitation before words of several syllables can be noted in her speech. Mrs. Hadley says, "She

speaks better English than we do."  
 Parents of five children, the Hadleys were surprised when Kirsti more than once expressed a preference for staying home rather than going out. "Evidently they stay at home much more than we do," says Hadley.  
 "We have movies, dances, and parties," says Kirsti, "but, of course, we don't drive." She rode a bicycle 10 miles to and from school each day. Singing and playing the piano with the Hadley youngsters has been a favorite pastime of the visitor. She was already familiar with Elvis and also "Sugar-time." Music is much the same as in her country except that church music is more formal and hymns used in our services are heard only in religious meetings outside the church. In addition to participating in the family's activities, Kirsti will give an illustrated talk on Norway at the Texico Farm Bureau meeting tonight (Thursday) and she spoke to an education class at Eastern New Mexico University Tuesday night and also on her agenda was a trip to Carlsbad Caverns Wednesday.

Kirsti has been impressed by the hospitality of the United States. "I don't think you will find that in any other country," she smiles, "People are very friendly and more informal." Her poise, ability to discuss anything from farming to education to popular music, the merry twinkle in her blue eyes, and her ready smile make Kirsti an able ambassador for her country.

Upon her return she will share her experiences with Norwegian youth groups, rural organizations and civic clubs in an effort to further the IFYE objective of promoting world peace through understanding people. Through giving farm youth an opportunity to learn another way of life by living it, the project helps rural young people to understand the problems and attitudes of rural young people in other countries.

Parmer County Farm Bureau offices, now in the Galloway Implement Company Building in Friona, will soon be moved to new quarters, announces Gilbert Kaltwasser, president, this week. The move will be made to accommodate an expansion into the present quarters by another Friona business. Details of a plan are being worked out to have Elmer Euler construct a 25x60 building a block north of the present location, and lease one-half of it to the Farm Bureau.

### Farm Bureau Plans New Location

One expanded service that Farm Bureau is contemplating when moving into more adequate quarters is developing their participation in the Plains "cotton pool" which often enables farmers to sell certain grades at better prices.

### A SAFE DRIVER HAS SAFE TIRES

Safe tires are important to your driving. Safe tires can mean the difference between an accident or an uneventful trip.

You can be certain of the above facts. But the majority of today's drivers are not aware that they can have the safety of new tires without having to pay out a hunk of cash every 25,000 or 30,000 miles.

The facts are that you can have safe tires for half the price and still drive about the same amount of mileage. Retreaded carcasses is the way to have safe tires without excessive cost.

H&R Tire Service of Clovis, N. M., puts new treads on sound carcasses with about the same method used to build new tires. All details of retreading are carefully checked. You can have your own sound tire carcasses re-tapped, save money, and at the same time have perfectly safe tires.

You are invited to get further details by calling at their tire service store, at 300 E. 1st St., Clovis, N. M.

### H. D. AGENT'S CORNER

Jimmie Lou Waincott

(Editor's Note: This is the last in a series of columns written by Miss Jimmie Lou Waincott from Ft. Collins, Colo., where she took two extension courses.)

By the time this comes out in the paper, I'll be back in Parmer County. Everything is over except one class at 11. Since we have the 4th of July for a holiday, Mrs. Janie Fletcher and I are coming home the long way. We plan to go through the Rocky Mountain National Park and spend the night at Grand Lake. Then we plan to go to Leadville and on home.

In the family financial management class we have been giving committee reports. The whole class was divided into eight groups and each group went through the process of making a family spending plan for a specific family. These families had incomes from \$900 a year to \$8700.

Each family situation was a little different and each committee represented 6 to 8 states, so we really had some stormy sessions in the committee meetings. It was hard for a Kentucky agent to realize how a large irrigation farm operates. I was lucky enough to work on a committee whose family was from the irrigated section in Washington. Their situation was much the same as Parmer County's except that their irrigation water does not cost quite as much as it does here. This

has been really informative and enjoyable.

In rural recreation class we have had a field day. On Tuesday we toured the Colorado State 4-H Camp on Cameron Pass. They have converted an old CCC camp into a very nice 4-H camp. There are 20 counties in northern Colorado who use the camp during June and July.

Do you realize how important recreation is to your community? That is what we have

been learning.

1. Recreation contributes to human happiness.
  2. Recreation is vital to physical health.
  3. Recreation is mental health insurance. (One half of our hospital beds are filled with mental patients.)
  4. Recreation counteracts delinquency and crime.
  5. Recreation areas are safety zones.
  6. Recreation facilities enhance property values.
  7. Municipal recreation attracts desirable industries.
- All of these are the responsibility of the community. Did you know that each community needs one acre of playgrounds or parks for each 100 persons? Parmer County falls short on this item, doesn't it? I could keep writing but will stop and go to class.

1/2 cup brown sugar  
3 tablespoons boiling water  
1/2 teaspoon soda dissolved in 1 tablespoon cold water  
1/2 cup shortening  
1/2 cup granulated sugar  
1 cup flour  
1 1/2 teaspoons cinnamon  
1 1/2 teaspoons ginger  
1/4 teaspoon salt  
1 cup flour

Mix brown sugar and boiling water. Place over low flame and bring slowly to a boil, stirring until sugar is dissolved. Cool to lukewarm. Cream granulated sugar and shortening, add brown sugar syrup and dissolved soda, and beat well. Mix cinnamon, ginger and salt with 1 cup of flour and sift twice. Add to creamed mixture and blend thoroughly. Then work in 1 cup additional flour to make a stiff dough. Chill, roll thin, cut into shapes and place on buttered cookie sheet. Bake in moderate oven. If desired, these may be iced.

If you want a seven-minute icing that is different, try this recipe made with powdered sugar. Stir together 3 tablespoons hot water and 1 cup powdered sugar, then boil in a covered pan until the sugar is dissolved. Place in a small mixing bowl 1 unbeaten egg white, 1/4 teaspoon cream of tartar, and 1/8 teaspoon salt. Add the hot syrup. Beat these ingredients at high speed until the icing is the right consistency to spread (from 3 to 4 minutes). Add 1 teaspoon vanilla white beating. Sufficient for the tops of two 9-inch layers.

### THE HAPPY HOMEMAKER

BY JUNE FLOYD

A lot of garden produce is beginning to reach the proper stage for serving fresh and for canning and freezing. Anyone who is using instructions more than one year old should check with the home demonstration agent for the latest information on these two subjects.

Several new methods have been proven and are being recommended by authorities on the subject of proper food preservation. Another item which homemakers should not overlook at this time of year is the preservation of fruit. Fresh fruit will be available in large quantities at a reduced price at different times during the coming months.

If you are a new homemaker and have never tried making jellies, jams, and preserves, you have a wonderful opportunity awaiting you. It is not necessary to trust to luck when you begin the job. By adding prepared pectin you not only get a better turn out but you can easily make the desired product simply by following the instructions on the label.

Next time you want to make cookies for a party or picnic, try the following recipe. The cookies are very delicious and can be served plain or iced to suit the occasion. The recipe yields about fifty two inch cookies but if more are desired it is better to make two recipes than to double the in-

A statewide poll of the legal profession, conducted by the State Bar of Texas, shows the vote to be:

This is the overwhelming verdict of members of the candidates' own profession after carefully weighing their qualifications and experience, studying their record and considering their judicial temperament and personal integrity.

The lawyers of Texas have thus joined farmers, ranchers, merchants, laborers, businessmen and other professional people in supporting the candidacy of Judge JOE GREENHILL because all of them want to keep a fair, honest and sincere judge on the Texas Supreme Court.

Judge Greenhill is a former attorney for High Plains Underground Water District No. 1. He has done much to procure a tax reduction for irrigation farmers (see Cross Section).

### SOIL CONSERVATION DISTRICT NEWS

The Parmer County Soil Conservation District Board of Supervisors held their regular business meeting Tuesday morning. During the meeting several important subjects were discussed.

One piece of surplus equipment that was granted to the District has not yet been received. It will be sent in the near future. The board hoped to get the other equipment in operation as soon as possible.

Several new conservation plans on new cooperators in the Soil Conservation District were approved and signed by the board.

The supervisors made plans for the District banquet which will be the first part of September. The details will be worked

out in the next meeting as to time, location, and who the speaker will be.

Have you received your news letter yet? They are out and if you would like to have more let us know. We would like to know how you liked it and any suggestions or comments would be appreciated.

Something to think about: At least three billion tons of solid soil materials are washed out of the fields and pastures of the United States each year by

water erosion alone. It has been figured that to move such a bulk of American soil on rails would take a train of freight cars 475,000 miles long—long enough to gird the earth 18 times at the equator.

**NEWS FROM THE FARM BUREAU**  
By RAYMOND EULER

Rhea Farm Bureau had one of the best 4th of July get-together meetings they have ever had. One political candidate walked through a mile or two of mud to get there, they say.

Several Parmer County men are checking location of bindweed plots on State Highway rights-of-way the first part of this week. The accumulated information will be turned over to Lloyd Killough, of the department, who will see that these lots are treated, provided the farmer adjoining has treated his. Have you?

American Farm Bureau is opposing efforts being promoted to increase farmers social security benefits and taxes. The proposal being offered would require payment of 7½ percent on up to \$6,000 in 1975, or a payment, in addition to Federal Income Tax, of \$427.50. As usual, there is also a provision for federal health "benefits" included in the proposal. Farm Bureau is continuing its opposition to proposals leading to socialized medicine, too.

We think the following subject is of vital interest to agricultural people: If anyone who reads this column has any leaning toward, or any sympathy whatever for Walter Reuther or the things he stands for regarding labor, agriculture or otherwise, we hope they will consider the last line of a letter he wrote to his brother while he (Walter) was attending a training school in Russia: "Carry on the fight for a Soviet America." He has never denied he wrote it. Yet he poses as a friend to American labor, agriculture and all other groups outside the big industrialists. Compare the plight of Russian labor and ag-

If any of you members happen to be in Waco on Tuesday, July 15, you are cordially invited to attend Open House in Texas Farm Bureau's new Headquarters, 401 Franklin Avenue. That's just across the street from where it has been. (There will be a move of Par-

mer County Farm Bureau's Headquarters within the next few months, too.)

Membership in PCFB, as of June 30, was 622. Have you paid your dues? Don't overlook filing for the three cents per gallon Federal Road Use Tax refund on Farm Used Fuels. Farm Bureau made this possible.

Tests indicate that laying hens perform best when the temperature ranges from 45 to 85 degrees F. Ben Wormeli, extension poultry husbandman, says poultrymen should make sure their laying houses are properly ventilated and that the supply of drinking water is adequate to meet hot weather needs. Too, when temperatures are around the 100 degree mark a fogging or sprinkler system installed in the laying house will pay dividends.

**Big Question Mark by Spuds**

Parmer County area potato growers, after a so-so year in 1957, are holding their breath this week, as first diggings get underway.

The biggest concentration of spuds is around Friona, where 600 acres are reaching maturity. John O'Haugherty, salesman at Friona Growers and Shippers, who keeps an eye on the all-important markets, is playing a cautious role.

"It looks like there's going to be lots of potatoes this year," he says, "and we just can't tell what it will do to the market."

He says his attitude can be summed up this way: "If I was guessing, I'd be afraid to guess."

About the only thing that O'Haugherty can be coaxed to say is that he feels that this year will be some better than last year.

Last season, High Plains potatoes sold for about \$2.25 a hundred. That was a price far less than disaster standards, but it is usually felt to be too low from the producers' standpoint.

"\$2.50 is a pretty good price," the salesman says, "and anything above that is a good price."

On the production side of the potato deal this year, Kenneth Neill of the shed says that it looks as if tonnage may be

down, although it won't be easy to tell until digging actually gets started.

He is basing this idea on the relatively unfavorable season that growers have had. A slightly later start, a cold, wet spring, and some rough weather on mature vines in the late part of the season, have all had an adverse effect on production.

The big storm, filled with hail, that visited the eastern part of the county four weeks ago landed astraddle of the potato growing section. "About half of our 600 acres was damaged by hail," says Neill. Digging was scheduled to begin this week. Some last-minute changes are being made at

the shed, where handling procedure and equipment is being changed because of a large expansion program.

Potatoes and carrots were handled out of one shed last year. This year, the carrot equipment has been moved to a new building and the spud processing will be in a building by itself also.

I am your County Judge. The duties of this office are a full time job, and in order to discharge these duties properly it is necessary that I stay on the job as much as possible. Therefore, it is almost impossible to see all of you personally, so, I will appreciate it if you would consider this my personal request for your vote and support.
