Friday night we attended something which to us was rather unusual—a stork shower for a man!

The occasion was honoring I. T. Graves Jr. of Friona who "sweated out" his third son last week.

Anyhow it was really a lot of fun and the ones present had a lot of laughs out of I. T. and the way he was talked into showing up.

The "shower" was a secret as far as I. T. was concerned, and when the time came for the party a way had to be figured out to get I. T. to attend.

Homer Lindeman, a neighbor and friend of I. T., was named as the one to be responsible for making sure that I. T. showed up on time.

Now Homer is a very resourceful fellow, so he drops by the Graves place just about the time that I. T. is out changing his water and tells him a long tale about a sick horse.

Good-hearted I. T. stops his work and in his muddy overalls follows Homer to help with the "sick horse."

A few minutes later Homer and I. T. show up at the Lloyd Rector home where the shower was. By this time I. T. has gotten suspicious of the "sick horse" deal and when he sees the cars parked at Rector's, he refuses to get out of the car because of his clothes.

It was only after he was assured all the womenfolk were gone that he came in.

Before it was all over I. T. got his revenge on most of us for he was undefeated champion of the "42" games that night.

But—I. T. says never again will he believe anything that Homer Lindeman comes up with.

Some people have all the luck!

Last week we were handed a set of plans for the new building which will house the Star and were told to give them to our boss, Sonny Graham, and have him mark in where he wanted certain items then have him return the plans as quickly as possible.

This was on "press day"—that nemesis of a newspaperman—the day in which he spends his time fighting all the elements which surround him—the press, machines and time.

Anyhow, knowing the "sweat" which Sonny would be in, the plans were sent to him for his attention.

After getting home late that night Sonny stayed up to mark the additions called for and then crawled in his auto and brought the plans back to Friona.

Sleepy-eyed and harassed he stumbled into the Star office and laid the plans on the counter—a fatal move!

The Star counter—this is no everyday counter, but is one with a certain personality.

What makes our counter different from other counters is Kater Crume—Kater makes the trip from Hereford to Farwell daily to his job with McKillip Motor Co. and on his way acts as a carrier-pigeon for Parmer County newspapers carrying copy and stuff back and forth.

Now back to Sonny's fatal move—what he did wrong was to lay the plans down on the counter.

Each night we have learned to clear off the counter everything we need and just leave only that package of stuff headed for Farwell, for otherwise it will go to Farwell too.

We've accused Kater of bringing in a broom and sweeping the counter clean but he replies "I always take what's on the counter so if you don't want it gone, don't put it on the counter."

Anyhow back to Sonny. After a long hard trip home Sonny finally got to bed late that night.

The next morning the employees in the shop at Farwell were shaken by a scream of anguish when Sonny came to work.

What was lying on his typewriter—yep, you guessed it—"The Plans."

Good, dependable Kater.

As we said earlier, Sonny laid the plans on the counter. Friday morning when Kater made his stop he picked up the long white roll of paper along with everything else and off to Farwell it sped.

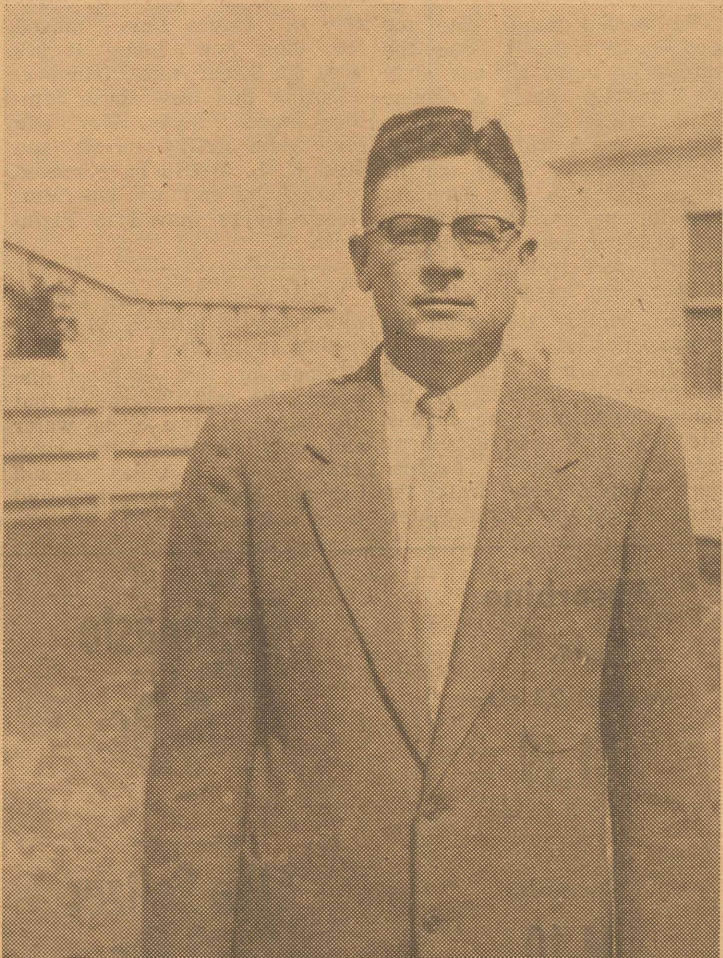

WT Telephone Co-op Signs Contract

The board of directors of the West Texas Rural Telephone Cooperative, Inc., of Hereford negotiated a new contract with Southwestern Bell Telephone Company for operator service for information last week.

The new agreement becomes effective today (Thursday). For information of new numbers not in the directory, subscribers on the Parmer and Hub exchanges can dial "Operator" and ask for information.

Council Selects New Manager

Lubbock Man Takes Over 8th

ALBERT L. FIELD

Albert L. Field of Lubbock, was named new city manager for the City of Friona by Mayor Raymond L. Fleming at a special session of the city council Thursday night.

Climaxing a two-week search of over 50 applications and endless personal interviewing, the council members agreed on the choice of Field.

Field will move to Friona shortly and is scheduled to begin work officially for the city on May 8.

Presently serving as tax appraiser for the City of Lubbock, Field has served in that capacity since November of 1954. Prior to that time Field served the City of Lubbock as right-of-way agent from March 1951 until November of 1954.

In addition to his experience in work in Lubbock, Field is a graduate of Texas Technological College and also holds a diploma from Draughon's Business College.

A veteran of World War II, Field, who is 34 years old, is married and the father of three small children, one daughter and two sons. Field served in the South Pacific during World War II in the U. S. Navy.

Field will replace Roy Wilson in the city hall in Friona, the latter having been relieved of his job by the city council in an earlier move.

In addition to his job as city manager, Field will do all the inspection work for the city and will be responsible to the council for action in the city government.

You can always get someone to agree with you if you say what he likes to hear.

In an earlier council meeting with County Sheriff Charles Lovelace council members agreed to share the expenses of the Police Chief's salary in Friona to save money for both the city and county.

The chief will work for both agencies and will be on hand to work for the sheriff's office out in the county when the call is needed, otherwise his duty will lie within the city of Friona.

Judge Bills Released

Judge E. A. Bills, who has been hospitalized at the Medical Arts Hospital in Littlefield for several weeks was released early this week and is convalescing at his home.

Members of the judge's staff report that his physicians report that he is making a satisfactory recovery rapidly and within a short time should be able to resume his regular duties.

MONDAY'S FIRE ALARM—Monday morning downtown Frionans were jarred by the shriek of the fire alarm and then scared by billowing smoke from the Main Street area. A crowd gathered quickly as members of the Friona Volunteer Fire Department rushed to the scene and sprayed a burning asphalt wagon and street leveling machine with water. The asphalt wagon caught fire from too much heat. The only fire damage was done to the tires of the wagon. The leveling machine needs only a little "elbow grease" to remove burned tar from its surfaces.

Two Girls Named Top Grads At Friona High School in 1958

BETTY AGEE

BARBARA O'BRIAN

Misses Betty Agee and Barbara O'Brian were named top graduates of the class of '58 at Friona High School by Principal Raymond Cook this week.

Miss Agee was named valedictorian of the class with a four-year-average grade of 94.89 and Miss O'Brian was named salutatorian with an average grade of 94.06 for her four years.

Both girls are active in extra-curricular work in addition to their work in class, and both played in sports at the school.

Miss Agee is the daughter of Mrs. Reeta Agee of Friona and Miss O'Brian is the daughter of Mr. and Mrs. Tom O'Brian of the Hub community.

Betty has compiled a record number of activities while a student at Friona High School which include the following:

Freshman class president, sophomore class reporter, senior class treasurer, FHA song leader, outstanding girl in home economics and FHA during sophomore year, citizenship award junior year, majorette junior and senior years, assistant drum major senior year.

Also, first chair flute in band, member junior and senior bands, two letters in basketball, district champion in girls' doubles tennis, sophomore year; first place winner in flute solo regional meet, senior year; first place vocal solo regional meet, senior year; football queen at-

tant, senior year; Parmer County Maize Days Queen, senior year; Lions Club Sweetheart, senior year; queen candidate Lions District Convention; church pianist; member of "Treblaires," member of FHA

area choir, senior year; And YWA Associational pianist of 1956-'57-'58; president of Baptist Young People's Department; and member of FHA, four years.

Barbara O'Brian's activi-

ties during her four years in Friona High School include a member of FHA for four years; FHA officer, senior year; member Pep Club for four years; Arrow, junior year; member girls basketball team freshman and sophomore years.

Variety Show Set for May 9

Plans are being made by members of the senior class for a variety show which is to be held in the auditorium beginning at 8 p.m. Friday, May 9. Featured entertainers will be the Hi Fi Quartet from West Texas State College at Canyon. Other attractions will be announced later. Pies, furnished by members of the class, will be auctioned off following the show and coffee will be served by the class. The theme of the program will be "Land of the Magnolias."

The program will be open to the public and admission prices will be 50 cents for all students and 75 cents for adults.

FFA Father-Son Bar-B-Que Friday

Members of the Future Farmers of America and their parents and guests, an estimated 200 strong, will gather Friday night at the school cafeteria at 8 for the annual FFA Father and Son Bar-B-Que.

The Bar-B-Que is sponsored annually for the boys and their parents by the Parmer County Implement Co. of Friona. The ladies at the cafeteria will prepare the food and employees of the Parmer County Implement Co. will serve.

The Hi Fi Quartet from West Texas State College will be on hand to provide the highlight of the program during the evening's festivities and afterwards the boys will have their woodworking handwork on exhibit in the school's ag workshop.

This year's menu will consist of barbecue, beans, potato salad, salad plate, cornbread, hot rolls, iced tea, coffee and ice cream sticks.

Marching Band Winner Of Regional Blue Ribbon

Friona's high-stepping Marching Band, 76 pieces strong, strutted off the field in Canyon last week to take one of the three top marks given to bands in the contest.

The band was presented with a handsome gold and wood trophy topped by a golden majorette for their pains at the contest.

The annual Regional Contests were attended by bands over the area and Friona was one of the three top bands which didn't receive a grade less than a "B" at the contest.

Band Director Richard Bentz of Friona says he is "very proud" of the showing the boys and girls made at the contests and believes that the youngsters will continue to improve.

He gives credit to the parents of the youngsters in urging them to practice and give their time so the band could make such a good showing at the contests.

Friona, which is Class A this year, and Borger High School, which is Class AAAA, got the only "I" at the contests in the marching category.

The Friona Chief Band put on a 6½ minute show and came onto the field in a company front, breaking up into squad cartwheels. From the cartwheels the band went into a "note" formation with the note moving in a dance step and

all the while playing "Say It With Music."

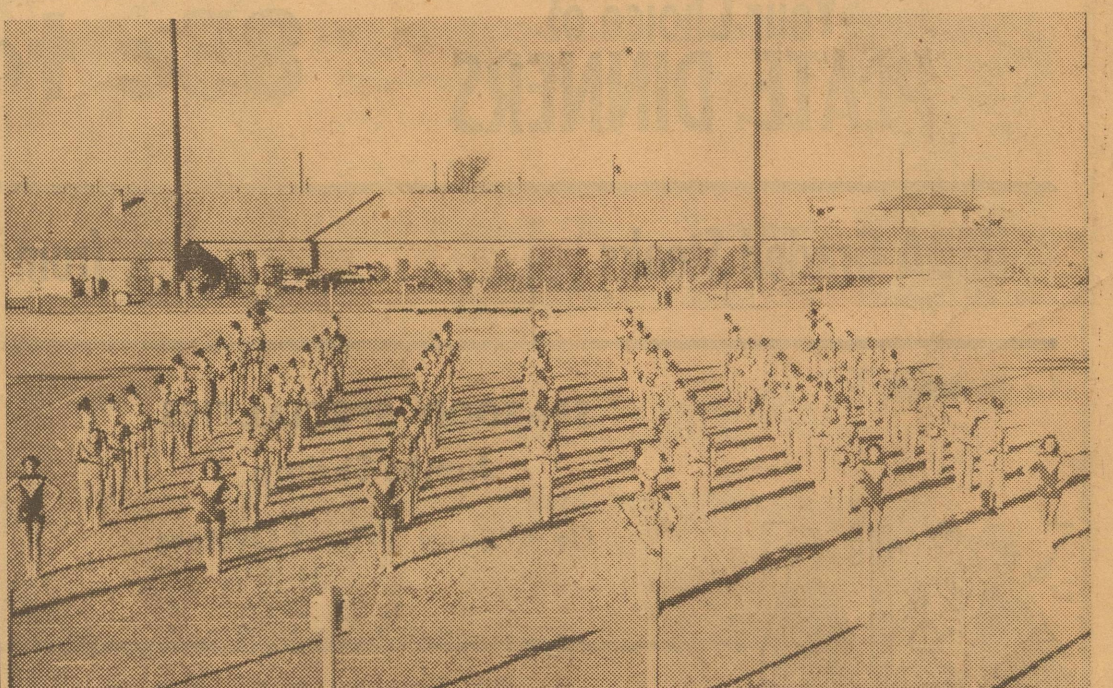

From this formation the band switched into a trumpet formation with the trumpet valves moving up and down while playing "Bugler's Holiday."

The judges were impressed by the latter movement and gave several nice compliments on the band's precision work in this formation.

The rest of the show consisted of several precision drills and

ended with a bowing routine.

Other bands in the contests included Farwell, White Deer, Clarendon, Sunray, Canadian, Gruver, McLean, Memphis, Panhandle, and Stinnett.

FRIONA'S TOP-RANKING MARCHING BAND—Members of the Friona High School Marching Band are shown in formation on the football field. The band was one of three bands which was awarded a top ranking "one" in marching at the recent contests at Canyon. The band was given a gold and wood trophy which will be placed in the high school trophy case.

14-Year-Old Dies in Wreck

Earl Jackson, 14, of Corsicana, Tex., became Parmer County's first traffic fatality of 1958 Saturday morning about 12:30 when a 1950 Chevrolet overturned one mile south of Friona on Highway 214.

The car, driven by G. W. Honea, 26, also of Corsicana, was attempting to round the 15-mile-an-hour curve south of town at too fast a speed when the car left the highway, crashed into a bank, and overturned in a field.

Honea and young Jackson's father, Jesse Jackson, 38, were injured in the wreck but were not considered in serious condition.

Honea has been transferred from the Parmer County Hospital to Corsicana and the elder Jackson is still under a doctor's care in Friona.

Honea suffered a broken

Friona Boy Has Close Shave

Jesse Turner, 20, of Friona narrowly escaped death only by a miracle Sunday afternoon when he lost his footing and fell over 200 feet into Palo Duro Canyon.

The young man was with three other youngsters from Friona, Bethel and Marie Drager and Jean Brannon.

The two couples had been climbing around the canyon walls during the day and when Turner climbed down to a ledge late Sunday he began climbing back to the top of the ledge, then lost his footing and fell.

Officers at the scene said the Turner boy fell about 20 feet from the ledge, rolled another 100 feet and then fell off a sheer drop of 100 feet to the canyon floor.

The place where the boy fell was almost inaccessible and it was not until 8:45 p.m. that help could reach him.

Turner is suffering from a broken arm and cuts and bruises from his fall.

Turner is the son of Mr. and Mrs. Carl Turner of Friona.

law, injured knee and other cuts and bruises. Jackson is suffering from lacerations about the face and body, and chest injuries.

Honea and the two Jacksons had traveled from Amarillo to Dimmitt Friday afternoon to visit a friend and the trio had planned to drive to Corsicana that night when they got on the wrong road.

They were entering Friona when the accident happened.

Honea had been working for a construction company in Amarillo while the elder Jackson had been employed in Plainview.

Deon Awtrey New "Boss" of Lions

Deon Awtrey was elected president and Boss Lion for the 1958-59 year of the Friona Lions Club at the annual Ladies Night last week in the school cafeteria.

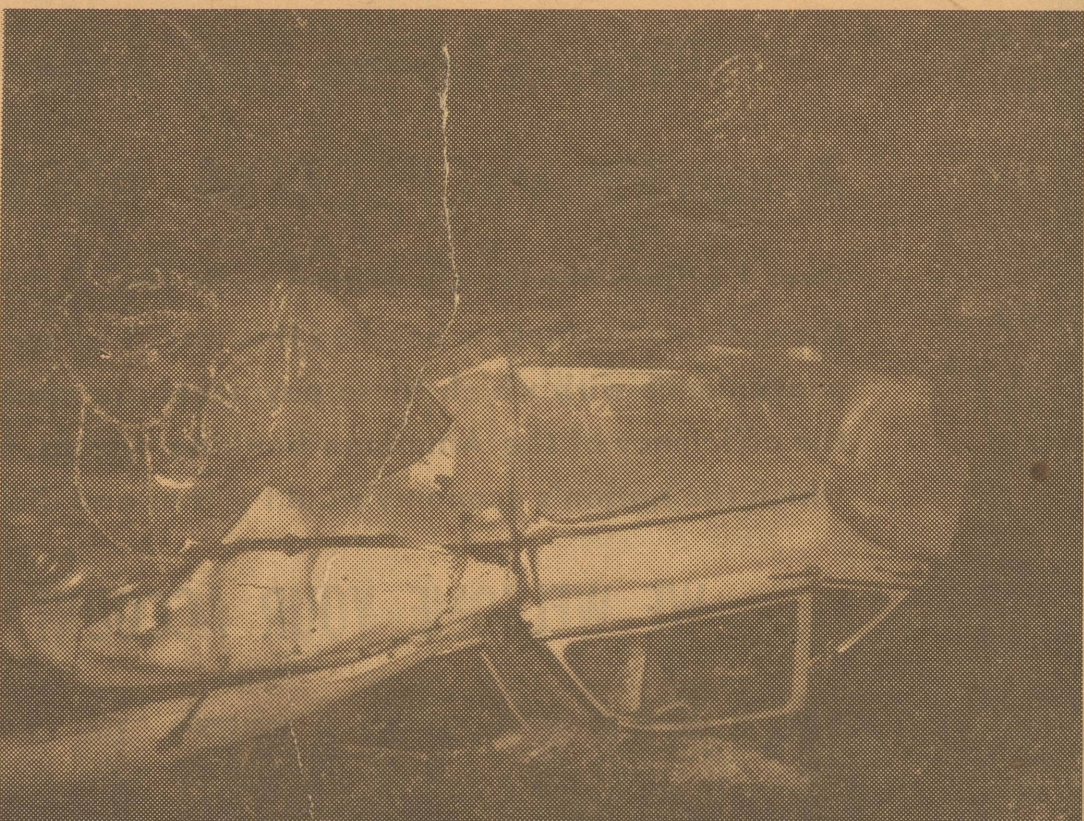

Other officers named to serve with Awtrey include George Jones, first vice-president; J. C. Claborn, second vice-president; Kenneth Williams, third vice-president; Kenneth Thompson, tail twister; Bill Nichols, secretary-treasurer; Hank Outland, Lion tamer; and Grady Dodd and Rev. Hugh Blaylock were named Lions directors.

Climaxing a night's festivities members voted on the new officers after campaign speeches, given in the negative from the floor.

Cub Scouts To Palava

All Cub Scouts of Pack 56 will attend a palava at Hereford Saturday. Any cub who needs transportation should be at the football field here at 11 a. m. Each person is to bring a sack lunch. All cubs are to wear uniforms with white tee shirts with the number 56 six inches tall on the back.

Cubs who do not go with the group are to assemble at the swimming pool park in Hereford for lunch at noon.

PARMER COUNTY'S FIRST TRAFFIC FATALITY—Fourteen-year-old Earl Jackson became Parmer County's first traffic fatality in 1958 last Saturday morning about 12:30 a.m. when this '50 model Chevy turned over on Goodwine's corner one mile south of Friona on the Muleshoe highway. Two other men were injured in the crash but not seriously.

Don't Forget--Monday Is Dollar Day in Friona!

THE STAR'S EDITORIAL COMMENT

Let's All Work For a Better Friona

This week the members of our city commission announced the appointment of a new manager for our city.

This appointment has brought about much talk, rumor and criticism in our city and now that the city council has made a choice it is time that all of us dropped our feelings and make a move to work with Mr. Field for Friona.

The new manager will be new to this area, although he has worked in Lubbock for some time. He will have no ties with anyone in town and from talking to him he is the type of man which we all like to have working for us.

If we will all put our personal feelings aside and keep in mind that in the end we are all interested in what happens to our city we will be on the right road.

For, after all, so goes the town, so goes the individual.

Let us keep this in mind, and at every session of the council and in our own businesses let us plan to do that which will benefit the most people most of the time and Friona will keep on the road to continued prosperity and growth.

Friona has a lot to brag about for a city of its size, our paving, churches and our business district are hard to

in & around FRIONA WITH JUNE

There is a theory that it is always good for anyone to get out of the regular routine once in awhile. It is one theory that we really go for but rarely carry out. Last week was certainly a departure from our regular routine.

About 6:30 Wednesday morning, Mrs. Lucy Welch, Mrs. Jack Miller and children, and I left Friona bound for the capital city of our state. As the sun rose, there was no wind and the morning was beautiful. Before we got very many miles south, the wind began to blow and dirt began to pick up.

At times our visibility was limited and it was necessary for us to drive very slow. As the day wore on, it began to get very warm and we found driving with all the glasses closed uncomfortable. At Big Spring we stopped and had the air conditioner put into motion.

All the way to Austin and most of the way on our return trip we really enjoyed the comfort of driving in an air conditioned car. However, before we reached home Thursday evening we would have appreciated having the heater on, but since we didn't know the mechanics of re-converting the air conditioner to a heater, we just made the best of it.

In spite of the lack of time, we had a very nice trip. At noon Thursday we ate lunch in Abilene with France and Novelene Welch at a delicatessen. Perhaps a correction on the time should be made. We did eat lunch with them, but it wasn't exactly at noon.

Between Austin and Abilene the power steering belts developed a whine and we lost some time finding out what the unusual noise was. At Lampasas we were told what the trouble was and that it wasn't serious, so no repair had to be made, but we lost some time.

Mrs. Welch had called from Austin to tell the Abilene Welch's to wait to eat with us, but by the time we got there they were probably wondering if perhaps she meant supper rather than lunch.

At any rate, it was lunch for us and the food was delicious. The delicatessen was in the River Oaks shopping center and of all the things we saw on the trip that we would most like to have in Friona that shopping center was tops on our list.

After thinking it over, we know it wouldn't really work for Friona. If promoting was in our line, we would just go out on some of the wide open spaces of the Plains and see

off a shopping center like it, then build houses all around it and have a completely modern up-to-date city.

In the shops there one could buy anything from a box of crayolas for the children to a foundation garment for the mammas. There would be no parking problem, no time wasted in going from store to store, no danger from crossing streets with small children, and almost no limit to the selection of things to buy.

France Welch, who is Mrs. Welch's son and well-known here, owns the River Oaks barber shop. He didn't say how business was, but from a practical standpoint it seems that it should be very good. What could be nicer than being able to shop all around while your husband or sons were getting haircuts?

The trees, shrubs, and flowers were beautiful in every city we passed through after we got a few miles south. We saw field after field of oats that were beginning to head out. The cattle, sheep, and goats were pretty and looked well fed.

One of the prettiest scenes we saw was a ranch house sitting at the foot of a hill with about ten acres of rolling land covered with bluebonnets in front of it.

The highway improvement that is being done never ceases to be amazing. Any direction you travel in Texas you do not go very many miles until you run into signs directing you to drive slow because road improvements are being made.

After being late for lunch at Abilene, we drove to Lockney before getting hungry again. We have been reading about the quality of vegetables produced in the Lockney Beacon and if the mustard greens we ate at the home of Mrs. Della Dagley are a sample, we can certainly vouch for their goodness.

We have often heard the expressions, "Well, there has to be a first time for everything" and "You aren't too old to learn." Both of these expressions came to our mind while we were visiting in the Dagley home. Mrs. Dagley, who is 74, told us that she had taken her first job outside of her home.

Upon being asked what she was going to do, Mrs. Dagley replied, "I'm going to take care of an old woman." Just as we were thinking, "How old are the old women here?" Mrs. Dagley said, "She's 95." She further explained that the woman wasn't helpless. In fact, she is able to take care of herself. The older woman gets lonely and isn't able to get out much and wants a companion in her home.

To us it is simply wonderful to know that at 74 a woman feels confident that she can do something she has never done before as well as to know that a woman who just lacks six years being 100 is still able to do things for herself.

How lucky can one person be? Saturday afternoon was the third time Marie Fleming's name has been called at the

drawing in the City Park. The second time, when she wasn't present, we told her that with her kind of luck they would soon call her name again.

It has been several months since that incident, but sure enough, her name was called for the third time.

Jaywalkers Are Everywhere

The traffic death rate for aged pedestrians is one the increase in many regions. Only two countries report a decline in mortality for pedestrians over 65, the World Health Organization states. They are the United States (a 12.8 per cent drop for pedestrians over 65, and 13.4 per cent for all age groups), and Ireland (7.3 and 5.9 per cent respectively).

The mortality rate for all age groups has also dropped in Canada and in Spain. Of all the countries covered by the study, Japan has the highest rate of traffic deaths among pedestrians, chiefly because more people there walk the roads than in the United States.

Moved

Friona has two new families this week. Mr. and Mrs. Dave Hicks and daughter have moved into Mrs. A. A. Crow's rent house and Mr. and Mrs. Howard N. Hayes have moved into their new home at 903 West 6th Street from Plainview. During this time three families moved away. Mr. and Mrs. Alvin McGill and Mr. and Mrs. K. L. McGill have moved to Amarillo and Mr. and Mrs. Henry Hayes moved to Plainview.

Then there was the farmer who defended himself for going fishing so much.

"Look at this map of the world," he said. "It shows that the earth is two-thirds water and only one-third dry land. That means a fellow should fish two-thirds of his time and farm only one-third."

2 Teenagers Jailed Following Burglary

Two teenage boys of Friona are in the city jail, awaiting action on charges of breaking and entering the Fleming & Son cotton gin on the outskirts of Friona over the weekend.

The two boys were arrested Monday afternoon about 6 after Friona Police Chief Ben Moorman took them into custody following an investigation of the theft of an estimated \$40 from the cash drawer and Coke box at the gin.

Ernest England reported the theft to the Friona Police Department about 3 p.m. Monday after returning from out of town.

A screen had been cut open and the entrance made through a window in the gin's office.

★ 'CHUTES CAUSE ALARM SUNDAY

Two parachuting men caused alarm Sunday morning as they drifted to the earth about five miles northeast of Friona.

Despite rumors of crashed planes and other consternation, it was found following investigation that two men had parachuted from planes "to see what it was like."

One of the men remains unidentified at press time, but the other had been tentatively identified as a resident of Bovina.

Religion and tolerance go hand in hand, but some of us evidently miss the connection.

Picture of Someone Trying To Do Business Without a CHECKING ACCOUNT

Over 7 billion checks are written each year . . . 90% of the nation's business is handled this way. The speed and convenience with which these payments are made show the efficiency of the American banking system, without which the nation's economy would wither and die.

WE WELCOME YOUR ACCOUNT

FRIONA STATE BANK

"Serving A Great Irrigated Area"

MEMBER FDIC

MRS. LLOYD RECTOR

Cook of the Week

Mrs. Lloyd Rector, who lives five miles south of Friona, has been chosen Cook of the Week. She is the mother of three boys Larry 5, Ricky 4, and Roy Don, 18 months. In addition to being a farm homemaker and mother of three active sons, she takes an active part in the Progressive Study Club, Hi-Point Home Demonstration Club, WSCS and serves as music director in the junior department of the Friona Methodist Church.

Mrs. Rector, who was Betty Louise McLellan before her marriage, is a graduate of Friona High School and attended West Texas State at Canyon one year. In high school she played basketball and was a member of the band. She also participated in band activities at West Texas State.

It seems rather unusual that a homemaker of 26 would select as one of her favorite recipes one for hominy. That type cooking is usually left to older homemakers or placed in the category of "something my grandmother used to make."

HOMINY

1 gallon corn kernels
4 tablespoons lye
Place corn in enamel pan with lye and cover with water to a depth of 4 inches above level of corn. Cook until eyes slip, about one hour. (Add more water if needed.) Remove from fire and pour into sink. Run water over corn and rub to remove eyes.

This process takes a lot of washing and rubbing. When all eyes have been removed, put into pressure cooker and cover with water. Pressure at 10 lbs. for 30 minutes. Drain corn and put in pint jars with one half teaspoon salt, cover with boiling water; seal and pressure for 40 minutes at 10 lbs.

Be careful not to let the pres-

sure go over 10 pounds. Makes approximately 16 pints of hominy.

For a colorful and different congealed vegetable salad, Betty Louise recommends the recipe below.

JELLO SPRING SALAD

1 package lemon Jello
2 cups water
2 teaspoons vinegar
Prepare Jello according to directions on the package then add vinegar. Let cool until partially set. Then add 5 chopped radishes, 1 small cucumber, and three fresh green onions.

The favorite dessert of the boys in the Rector family is as follows:

BANANA NUT CAKE

1 teaspoon soda
1/2 lb. butter or oleo
1 1/2 cups sugar
1 cup mashed banana
2 eggs
1 cup nuts
1 1/2 cups flour
1/2 cup sour milk
Cream sugar and butter thoroughly. Add eggs and banana. Sift soda and flour and add alternately with milk. Add nuts and vanilla and bake in loaf pan in 350 degree oven 30 to 35 minutes.

ICING

3/4 cup sugar
1/2 cup milk
1/4 lb. oleo
1 tablespoon Karo
1 teaspoon vanilla
2 mashed bananas
Combine ingredients except

bananas and vanilla in heavy saucepan. Cook to hard ball stage. Add bananas and vanilla. Cut slits in cake crosswise and fill with icing and then cover top.

FHA NEWS

by Geneva Floyd

The formal installation of FHA officers for the coming year will be held in the auditorium at 7:30 p.m. Tuesday. There will be no admission charge.

At 11:30 a.m. Tuesday in the home economics department Mrs. Eunice Ratliff, Mrs. H. T. Magness, Jacquelyn Magness, and Raye Jene Jones will present the highlights of their trip to the state convention at San Antonio.

BUILDING PERMITS

The following building permits were issued at the City Hall in Friona during the week ending April 29:

Eric Rushing—convert service station to office; cost \$1500.
Richard Perkins—move in private garage; cost \$25.
Mrs. J. P. Wilson—add bedroom to home; cost \$600.
W. E. McGlothlin—connect sewer; cost \$25.

The dairy industry is one of the largest users of nickel-containing stainless steels. Their uses in this industry range from milking machines and pasteurizing equipment to tank trucks.

Band Banquet Set For Saturday Night

Members of the various musical clubs and organizations at Friona High School will gather for their annual banquet Saturday night in the school cafeteria at 8 p.m.

Two new Texas Agricultural Extension Service publications, B-884, Oats in Texas, and L-390, Cotton Root Rot, are now available from the offices of local county agents. They may also be obtained from the Agricultural Information Office, College Station, Texas.

4,000,000th VISITOR TO UN

A New Jersey teacher arriving with her class at the Headquarters Building of the UN recently brought the number of visitors making the official tour since the opening

in 1952 to the 4,000,000 mark. Glenn Bennett, director of the UN visitors service, played host to the surprised Mrs. Hugh J. Caldwell of Closter, N. J., at a special luncheon in the Delegates Diningroom. The children were brought

by Mrs. Caldwell not as part of a classroom assignment but because "I'm a firm believer in the UN."

Intelligent adults are kind to the children they meet in life.

WHAT! WE WON SOMETHING—Dave McReynolds, editor of The Friona Star, hangs a plaque on the wall signifying the second place award won by The Star's special Maize Days Edition last fall. The award was presented to The Star by the Panhandle Press Association and has been placed in a prominent position in the Star office. At the time of the paper for which the award was given the staff of the Star was composed of W. H. Graham Jr., publisher; Leland Boyd, now publisher-editor of the Bovina Blade, news editor; and Mrs. June Floyd, society editor.

State President Addresses Clubs

Mrs. A. J. House of Yoakum, was the guest speaker at a joint meeting of the federated clubs in Friona last Monday evening. Mrs. House, who is state president of the federated clubs in Texas, stressed the importance of clubs in the state supporting a project now in operation.

The state-wide project of the clubs is providing for educations for worthy foreign students. Members of the Friona Woman's Club, The Modern Study Club, and the Progressive Study Club attended the meeting.

From Sunnyside

Mr. and Mrs. Neal Young and children, Jimmy and Kathy, of Sunnyside were Sunday visitors in the homes of Friona relatives. They were dinner guests in the home of Mr. and Mrs. Sam Williams; in the afternoon the Youngs visited Mr. and Mrs. Otis Massey, and in the evening they were guests in the home of Mr. and Mrs. Raymond Euler.

Shower Honors Recent Bride

Mrs. Gerald Barnett, who was Barbara Crow before her recent marriage, was honored with a bridal shower at the educational building of the First Baptist Church Saturday afternoon.

Refreshments of cookies and punch were served by the hostesses, Lucy Altman, Juanita Reed, Gertrude Murphree, Mrs. H. G. White, Florence Wilson, Mrs. Elmer Euler, Marie Roden, Mrs. Bee Westbrook, Mary Lawson, Mrs. Charles Scales, Mrs. Henry Lewis, Othelia Bennett, and Mrs. Leon Hart.

Those attending and sending gifts were Mesdames C. W. Dixon, Clyde Hays, Homer Hyde, John Wright, W. S. Crow, J. M. Bradley, Billy John Thorn, Claude Osborn, Don McMahan, Doyce Barnett and Cindy, Don Sanders, Ruby Barnett, Clifford Crow, Calvin Talley, A. W. Wood, C. P. Warren, and Fred Dennis;

Also Mesdames H. G. White, Paul Coker, Florian Jarecki, Waymon Wilkins, A. A. Crow, C. L. Vestal, Frank Truitt, C. L. Lillard, A. L. Carlton, B. E. Sanders, Dan Ethridge, Wright Williams, W. B. Norwood, Sam Williams, and G. B. Buske;

Also Mesdames Pug Collier, Floyd Brookfield, Wilburn Carl-

ton, W. A. Tinney Sr., J. T. Gee, Bill Flippin, Glenn Reeve, O. F. Lange, Bob Jones, John W. Renner, Glenn Taylor, Glen Williams, Rudolph Renner, Giles Cobb, H. T. Magness, and V. M. Settle;

Also Mesdames Sloan Osborn, Joe Beatty, J. B. Buske, Dale Hart, Raymond Euler, J. R. Southward, Roy Clements, Irene Wiley, ElRoy Wilson, E. L. Fairchild, Leonard Haws, Walter Haws, Rex Blackburn, Wilbur Brookfield, Bill McGlothlin, Fred Helmke, A. L. Black, Allen Stewart, and Reeta Agee;

Also Mesdames L. M. Crow, Milton Sullivan, Oliver Rieken, W. C. Williams, Roy Johnson, and E. S. White;

Also Phyllis Bainum, Betty Barnett, Linda Crow, Gaye Bennett, Rave Jene Jones, Margie Carlton, Suzie and Cindy Sanders, Judy Fesser, Estella Mae Scales, Tacy Smith, Faye Scales, Jean Wilson, Lois Norwood, Lila Gay Buske, Brenda Collier, Linda Gee, Lola Goodwine, Joy Crow, JoAnn Beatty, Faye Southward, Terri Lynn Wilson, Phila May Buske, Margie Haws, Betty Agee, Dora Martinez, Pauline Averitt, and Pat Cranfill.

To Arizona

Mr. and Mrs. Glen Smith and Cynthia of Friona and Mrs. Odom Smith of Farwell spent several days last week at Douglas, Ariz. They were guests in the home of Mr. and Mrs. Dean Smith and Charlotte. Dean is the son of Mrs. Odom Smith and a brother of Glen.

Missionary Society Meets Tuesday

Regular meeting of the United Pentecostal Missionary Society was held Tuesday afternoon. The scripture reading by Mrs. Kenneth Houlette was the 13th chapter of Romans. A poem "God Everywhere" was read by Mrs. J. B. Buske.

A special number on the program was a song "Tomorrow May Mean Goodbye" sung by Mrs. J. V. Riley. Mrs. Ed Massey read a poem entitled "Endureth" and "Others" was read by Mrs. Arthur Lutz.

Those attending were Mesdames Griffith, Lutz, Houlette, Morris, Thompson, Massey, Riley, and Buske. The next meeting will be at the church May 6.

Following a business meeting, the group was dismissed with prayer in unison.

Friona HD Club Meets Tuesday

Regular meeting of the Friona Home Demonstration Club was Tuesday morning in the home of Christine Williams. The opening exercise was a game conducted by Mary Bandy entitled "How Good A Neighbor Are You?"

When the roll was called, those present answered by repeating a Bible verse from memory. A program on Civil Defense was presented by Jimmie Lou Wainscott.

Refreshments of cookies and coffee were served by the hostess to Marlene Drake, Mary Bandy, Phyllis Sanders, Velma Jones, Blanche Woody, Stella Varner, Katy Stowers, and Miss Wainscott.

Class Members Have Birthday Party

Mary Dorcas class of the First Baptist Church has two birthday parties each year. One is for those whose birthdays fall in the fall of the year.

Those born in April and May were hostesses to a birthday party in the home of Mrs. Otis Massey Sunday. Her birthday was that day. Others helping with the covered dish luncheon at noon were Mrs. W. M. White, Mrs. Rosa Anderson, Mrs. Florence Buske, Mrs. Lou Busell, and Mrs. Nora Reagan, who was unable to be present.

Other guests were Otis Massey, W. M. White, Mr. and Mrs. B. C. Day, Mr. and Mrs. J. H. Wise, Mr. and Mrs. E. C. Chitwood, Rev. and Mrs. L. A. Sartain, Sarah Vernon, Lucy Jones, and Charles Mackenzie.

Party Honors Nine-Year-Old

Mrs. W. P. Riethmayer honored her son, Mike, with a party in the family home south of town in observance of his ninth birthday Thursday afternoon from 4:30 to 6:30.

After a session of baseball, games of Bingo were played. The birthday cake, which was white with a yellow top, and cold drinks were served. Favors were "fly backs."

Those present besides the guest of honor were Joe Murphree, Roger Simmons, Mike Wooley, Danny Nettles, Lavoy Thompson, Larry Johnson, DeWayne Procter, Don Hoover, Kenny Squyres, and Tommy Jarecki.

D. Magness Tapped For Honor Society

Nineteen Texas Tech students, who will be seniors next fall, have been "tapped" for membership in Mortar Board, national honor society for women.

Among this group is Deniese Magness, daughter of Mr. and Mrs. H. T. Magness of Friona, and a 1955 graduate of Friona High School. Miss Magness is a music major.

MR. AND MRS. DALE HOULETTE

Phipps-Houlette Wedding Read

In a candlelight service at the Friona Methodist Church Saturday evening at 7 o'clock, Jane Phipps, daughter of Mr. and Mrs. Charlie Phipps, and Dale Houlette exchanged wedding vows. Houlette's parents are Mr. and Mrs. E. E. Houlette.

The double ring ceremony was read by Glen Williams of Muleshoe before an arrangement of greenery and lilies of the valley holding white candles. Baskets of white gladioli completed the floral decorations. Family pews were marked by white satin bows.

The bride, who was given in marriage by her father, wore a bridal gown of white lace, satin, and nylon tulle. The fitted bodice ended in a V-shape in front and back and the full gathered skirt was made of tiers of satin edged in lace.

The long sleeves came to points over the hands and the back was decorated with tiny buttons to the waist. The neckline was edged with net. Her veil of illusion fell from a lace crown. She carried a cascade arrangement of white roses arranged around a lily of the valley with streamers of satin. Her only jewelry was a string of pearls borrowed from Mrs. Billy Wayne Nazworth.

Mrs. Kenneth Ferguson, sister of the bride, was the matron of honor and bridesmaids were Gwen Williams and Lavana Houlette, niece of the groom. Candelighters were Wenonah Williams and Shirley Phipps, nieces of the bride, and the flower girl was Jan Jameson, another niece of the bride.

All of the bride's attendants were dressed in ballerina length dresses of blue taffeta with fitted bodices, full skirts, and high necklines in the front dipping to V-shapes in the back. The matron of honor and bridesmaids wore head pieces of blue lace with illusion veils and car-

ried cascade arrangements of white carnations.

The candelighters and flower girls wore dresses identical to those worn by the bride's attendants. Their hats were blue lace with white satin streamers.

Despite the talk, this younger generation shows promise of great achievement.

Max Wells served as best man. Ushers were Virgil Phipps, brother of the bride, and Harold Joe Wells. Gary Phipps, nephew of the bride, was the ring bearer.

Mrs. Phipps, mother of the bride, wore a sea blue dress with white accessories and a corsage of white gardenias. The groom's mother, Mrs. Houlette, was dressed in a printed silk dress with white accessories and her corsage was also of white gardenias.

Wedding guests were registered by Shirley Houge of Lubbock. Immediately following the ceremony a reception was held at the club house. Janice Hutchins, niece of the groom, presided over the guest register.

The bride's cake, which was baked by her sister, Mrs. Conrad Williams, was white with blue wedding bells, love birds, and other appropriate decorations, and was topped with a miniature bride and groom. June Collier, sister of the bride, served the cake, and the punch was served by Betty Pruett, sister of the groom. The serving table was covered with white net over blue satin decorated with white satin ribbons and greenery.

After a wedding trip to Cloudcroft, Ruidoso, and other points of interest in southwestern New Mexico, Mr. and Mrs. Houlette are at home in Friona. She is an employee of the Friona State Bank and he is employed by Kendrick Fertilizer Company.

Despite the talk, this younger generation shows promise of great achievement.

Noel Welch Honored

Noel Welch, son of Mr. and Mrs. France N. Welch, and an eighth grade student at Lincoln Junior High in Abilene, was one of 73 students who have been admitted to membership in the Lincoln Junior High School Chapter of the National Junior Honor Society recently.

The five major qualifications for membership are scholarship, service, leadership, citizenship, and character. After the induction ceremony in the L.J.H. auditorium, visitors and members were invited to a reception honoring new members and their parents.

Noel is a grandson of Mrs. Lucy Welch of Friona. Mr. and Mrs. France Welch are former

residents of Friona. They also have a daughter, Vicki Lynn, who is 8.

Deann Buske On BSU Staff

Deann Buske and Deniese Magness, students at Texas Tech at Lubbock, recently attended the state-wide Baptist Student Union spring planning conference at San Marcos. Eight hundred students attended this meeting.

Miss Buske, daughter of the G. B. Buskes of Friona, was named to the state executive committee of the 43,000 member Texas Baptist student union.

The real test for most people comes when green folding paper becomes involved.

THE BULWARK OF A COMMUNITY IS ITS CHURCHES

JOHN'S DISCIPLES ENTER THE CHURCH

(Acts 19: 1-7)

While on a missionary tour of Europe and Asia, Paul came to Ephesus and found certain disciples there. He asked them, "Have ye received the Holy Ghost since ye believed?" They in turn informed him that they had not heard about such an experience. Then, he asked them how they were baptized, and they said, "Unto John's baptism." Paul informed them that John's way of baptizing folk was only a baptism of repentance, and "that they should believe on Him which should come after him, that is, on Christ Jesus. When they heard this, they were baptized (over) in THE NAME of the Lord Jesus." After having obeyed this form of baptism, Paul laid his hand upon them and "the Holy Ghost came on them; and they spake with tongues, and prophesied."

My friends, are you sure you are in the New Testament Church? Read Paul's warning in Gal. 1:6-9, along with Acts 19:1-7 and Eph. 1:13,14, and see for yourself.

The Truth About the HOLY BIBLE

SHALL YOU SET FREE

SOURCE OF AUTHORITY IN RELIGION

God's Word Only, Or God's Word Plus?

Not only must we embrace God's perfect law but we must avoid perverted and different gospels. Paul said, "though we, or an angel from heaven, should preach unto you any gospel other than that which we preached unto you, let him be accursed" (Gal. 1:8-10). A different gospel cannot be accepted even from an apostle or an angel.

When the aged Apostle John finished the Revelation letter, he warned those who would add or subtract (Rev. 22:18-19). We have now the complete and perfect word, "the faith that was once for all delivered unto the saints" (Jude 3).

To summarize the teachings of God's word about itself: it is inspired; it is written; it is complete and perfect; it has been once for all delivered; we must avoid perverted gospel; we must not go beyond the things which are written. With this reverent attitude toward God's word, we come with questions: Was any apostle the head of the church? Were the apostles to have successors? Were any to speak by inspiration after the days of the apostles? May infants be baptized? May sprinkling be substituted for immersion? May instrumental music be used in worship? To these and similar questions, the apostles were empowered to remember all that Jesus taught, and to tell us not to go beyond that which is written. They were guided into all truth (John 16:13). In answer to all the above questions, their silence is eloquent!

WELCOME to the Church of Christ, where the true word of God is the complete guide.

By S. A. FREEMAN

SIXTH STREET CHURCH OF CHRIST

Class Meets In Sanders Home

The Fidelis Class of the First Baptist Church met at the home of Fern Sanders for their regular business and social meeting recently. After the business meeting, Mrs. Claude Osborn reviewed "Thorn Crown Tree."

Refreshments of cookies and punch were served by the hostess to Katy Osborn, Mary Barnett, Laura Hart, Elwanda Campbell, LaVonia Vaughn, Bell Maynard, Betty Lewellen, Ann Osborn, and Elizabeth Worley.

Mary Dorcas Class Meets Friday

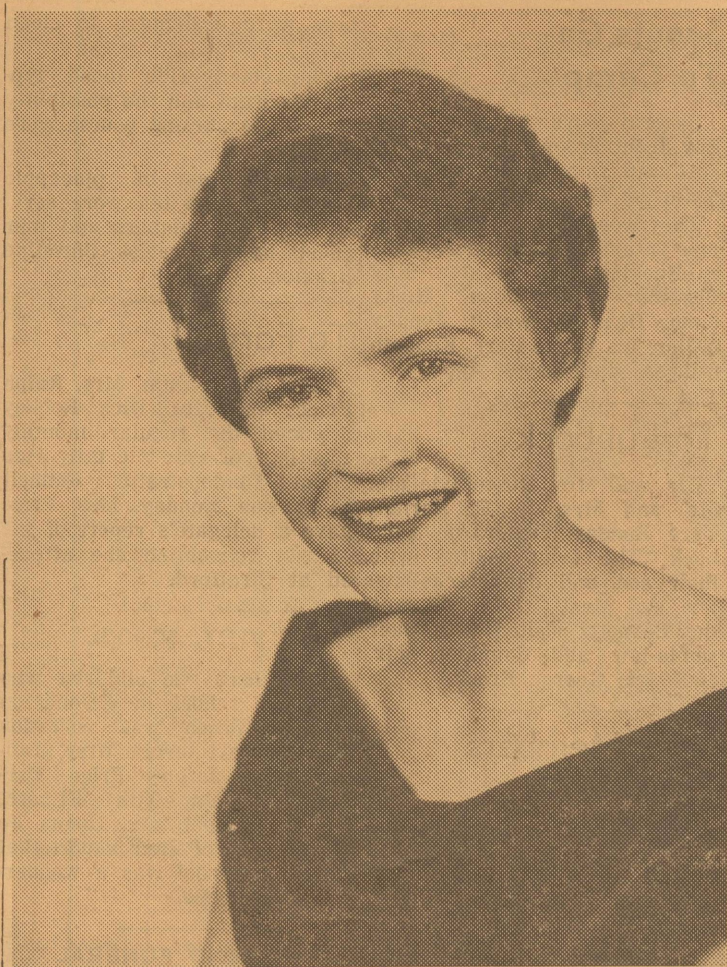

Twelve members of the Mary Dorcas Class of the First Baptist Church met Friday afternoon in the home of Mrs. Rosa Anderson for a period of Bible study followed by a social hour. Mrs. Anderson directed the study of the 5th, 6th, and 7th chapters of Matthew.

During the social hour the hostess served spice cake, coffee, and tea to Mesdames George Baker, Florence Buske, Lou Bussell, B. C. Day, W. M. White, Otis Massey, Clyde Scarborough, W. M. Floyd, J. H. Wise, Sarah Vernon, and E. C. Chitwood.

Shower Surprises I. T. Graves Jr.

A group of friends of I. T. Graves Jr., who recently became the father of a baby boy, was surprised with a lullaby shower at the Lloyd Rector home Friday evening.

Upon his arrival at the Rector home he was greeted with a shower of bibs, rattlers, toys, instructional diapers, and other things appropriate for an infant. Others present were Homer Lindeman, Lloyd Rector, Floyd Rector, W. H. Awtrey Jr., Dave McReynolds, and Marion Fite. Coffee and cake were served by the host.

JANE COLLIER

Jane Collier To Wed Jim Dixon

Mr. and Mrs. Vernon E. Collier of Happy have announced the engagement and approaching marriage of their daughter, Jane Latrell, to Jim Dixon of Friona. His parents are Mr. and Mrs. Clarence W. Dixon. There ceremony will be read Sunday, June 1, at 5 p.m. at the First Baptist Church in Friona by Rev. Aaron Mann of Canyon. All friends of the couple are invited to attend.

The bride-elect is a 1956 graduate of Friona High School and has been employed by the Parmer County Community Hospital for the past eighteen months.

Dixon, who is a 1954 graduate of Friona High School, will receive his degree from Texas A&M College this month.

Friona's Entry Wins Second

Jonnie Hand, daughter of Mr. and Mrs. Johnny Hand, who was Friona's candidate in the Miss REA contest at Hereford, placed second. First place went to Gayle Waggoner of Hereford.

During the business meeting of the electric and telephone coops at Hereford all officers were re-elected for another term. E. L. Fairchild and Louis Welch were re-elected on the board of directors of the telephone coop and Sloan H. Osborn is the holdover director of the electric company board. He was also elected vice-president of this board.

Cotton planted in March in the Rio Grande Valley made higher yields—more than 200 pounds of lint per acre—and utilized irrigation water more efficiently and made more growth than cotton planted in February in tests conducted by the Texas Agricultural Experiment Station. Maximum use and demand for soil moisture by cotton plants started prior to or about flowering and continued until most of the bolls were mature.

O. J. Beene Attends Meeting

O. J. Beene, representative of the South Coast Life Insurance Company, and his wife recently attended an agency meeting of Panhandle and Plains representatives of the company at the Herring Hotel in Amarillo.

Joe Woodward, president of the company, was the featured guest of the meeting. On arrival in Amarillo, Woodward said that economically speaking, this area of the state was one of the brighter spots. He said this was indicated by the new business by representatives in this territory. Through March, the Northwest Texas agency was leading the company's other territories in total production.

The optical industry uses crucibles and other equipment made of platinum for handling special types of glasses which are extremely corrosive to other materials.

THE STATE OF TEXAS

To any Sheriff or any Constable within the State of Texas—GREETING:

You are hereby commanded to cause to be published once each week for four consecutive weeks, the first publication to be at least twenty-eight days before the return day thereof, in a newspaper printed in Parmer County, Texas, the accompanying citation, of which the herein below following is a true copy.

CITATION BY PUBLICATION THE STATE OF TEXAS

TO: George G. Wright and Mrs. George G. Wright, N. H. Shannon and Mrs. N. H. Shannon and A. S. Curry, if living, and if deceased, the unknown heirs, assigns and legal representatives of all of the aforesaid parties; Defendants, Greeting:

YOU ARE HEREBY COMMANDED to appear before the Honorable District Court of Parmer County at the Court-house thereof, in Farwell, Texas, by filing a written answer at or before 10 o'clock A.M. of the first Monday next after the expiration of forty-two days from the date of the issuance of this citation, same being the 9th day of June A.D. 1958, to Plaintiff's Petition filed in said court, on the 19th day of March A.D. 1958, in this cause, numbered 1956 on the docket of said court and styled O. B. Moyer, Plaintiff, vs. George G. Wright, et al, Defendants.

A brief statement of the nature of this suit is as follows, to-wit: Plaintiff brings this suit in Trespass to Try Title, alleging that he is the owner in fee simple of Lots No. 3 and 4, in Block No. 42, of the original town of Friona, Parmer County, Texas; that on or about the first day of March, 1958, Defendants entered unlawfully upon such land and ejected Plaintiff therefrom and wrongfully withheld possession from such Plaintiff; alternatively Plaintiff pleads the five year, ten year and twenty-five year Statutes of Limitation of

the State of Texas; as is more fully shown by Plaintiff's Petition on file in this suit.

If this citation is not served within ninety days after the date of its issuance, it shall be returned unserved.

The officer executing this writ shall promptly serve the same according to requirements of law, and the mandates hereof, and make due return as the law directs.

Issued and given under my hand and the seal of said court at Farwell, Texas, this the

21st day of April A.D. 1958.

Attest: Hugh Moseley, Clerk, District Court Parmer County, Texas (SEAL)

29-4tc

NOTICE OF PUBLIC HEARING

Notice is hereby given to all property owners within the city limits of the City of Friona, Texas, and to all other interested persons as provided by law and Section 24 of Ordinance No. 118 of the City of Friona, Texas, that the City Council of the City of Friona, Texas, will hold a public hearing on the 5th day of May, 1958, at 8 p.m. in the City Hall in Friona, Texas, to consider amending zoning ordinance No. 118, presented to the City Council by and approved by the Planning and Zoning Commission of the City of Friona, Texas, and said proposed amendment proposes that all Lots 1 through 12, inclusive, Block 61, Original Town, City of Friona, Parmer County, Texas, be changed from a "C" zone to an "E" zone, and that All of Block 1, of the Drake's Revised Sub-division to the City of Friona, Parmer County, Texas, be changed from a "B" zone to a "C" zone and that Lots 1, 2, 3, in Block 11 of the McMillen-Fergus Addition to the City of Friona, Parmer County, Texas, All of Blocks Eight (8) and Nine (9) and Ten (10) of the Drake's Revised Sub-division, to the City of Friona, Parmer County, Texas, Lots 1 through 6 and Lots 23 through 28 of

Block 12, of Block 13, of Block 14, and of Block 15, Drake's Revised Subdivision to the City of Friona, Parmer County, Texas, and Lot 1, 2, 5, 6, 7, and 8, Block 11, Drake's Revised Sub-division to the City of Friona, Parmer County, Texas, be changed from a "B" zone to an "E" zone, and that this notice is particularly to all owners of the property described above and to all owners of property within 200 feet of said property in all directions and that all property owners in the City of Friona and all interested persons will be given an opportunity to be heard.

R. L. Fleming, Mayor

ATTEST: Roy Wilson, City Clerk 28-3tc

The precious metals platinum and palladium can be beaten into leaf in a manner similar to that employed in producing gold leaf. This leaf, only one hundred-thousandth of an inch thick, is used for decorating leather, books and picture frames when a permanent silvery-white color is desired.

Monel nickel-copper alloy is employed throughout industry for a wide variety of corrosion-resisting applications, particularly in the power, chemical and marine fields. This alloy is now finding wide use as protective sheathing for the legs of off-shore oil drilling platforms.

Have Your Blood Typed Tonight

There has been some misunderstanding about the typing of blood of all persons in this area who are over 16 years of age. This program is being jointly sponsored by the Civil Defense and the home demonstration clubs of the county. Due to a change of dates there was no typing done Monday evening.

Beginning at 6 p.m. today (Thursday) everyone who reported Monday evening and anyone else who cares to, can report to the Parmer County Hospital for blood typing. Each participant will be given a billiard size card with name and blood type printed on it.

This is the first in a series of programs which will be held in the next few weeks. Anyone who is over 16 can avail himself of this opportunity regardless of his place of residence.

Otho Whitefield To Attend Church Conference

Otho Whitefield, chairman of the board of deacons of the Union Congregational Church in Friona, has been elected delegate from the Central Oklahoma Association to the national conference in Boston.

This association is composed of churches in central Oklahoma plus the Panhandle of Texas.

The National Conference of Congregational Christian Churches will be in Carpenter's Hall in Boston, Mass., the last week in June.

"We are honored to have a layman from our group here elected to represent the Association at this conference," said Rev. Fred Dean, pastor of the Union Congregational Church in Friona.

A2-c George Ware Honored in Japan

A2/c George E. Ware, son of Mr. and Mrs. L. W. (Shorty) Ware of Morton, has been named Airman of the Month in his overseas unit, the 6921st Radio Group, Mobile.

Ware, who is the grandson of Mr. and Mrs. George M. Baker of Friona, was born here and began his formal education in the town of Muleshoe. He is a graduate of Muleshoe High School and the University of Texas.

He was active in extra curricular events in high school and the college and has completed several courses through ECI and USAFI. At the present time he is the assistant educational coordinator and advisor of his unit.

Rev. Fred Dean Attends Conference

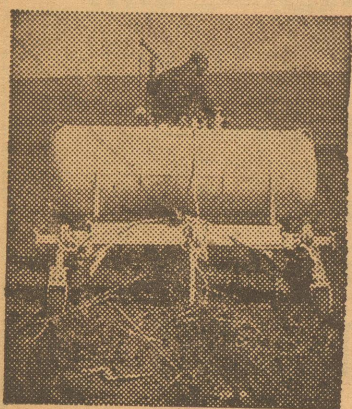

Rev. Fred Dean attended the Central South Conference of Congregational Christian Churches in Tulsa, Okla., last week.

The conference is composed of churches in Louisiana, Texas and Oklahoma.

Mrs. Dean accompanied Rev. Dean as far as Vici, Okla., where she spent the week with relatives.

Odom Smith of Farwell, son of Mrs. Henry Lloyd, was a guest in Mrs. Lloyd's home Wednesday.

Lower Farm Production Costs!

You need net profit to make a living from your farm. Well, one way to more net profit is to cut production costs. That's where Phillips 66 Agricultural Ammonia fits into your plans. This fertilizer contains 82% nitrogen, giving you more nitrogen per pound—the nitrogen you need to boost yields up higher over the "break-even" line.

See us about Phillips 66 AGRICULTURAL AMMONIA KENDRICK FERTILIZER CO.

SCHOOL ISN'T ALL WORK—Members of "next year's" first grades in the Friona Schools get a taste of what's to come at the Friona Elementary School. Around 65 of the youngsters attended classes at the school Friday to get acquainted with what they will do next year.

NEWS FROM BLACK

MRS. DICK ROCKEY

Black Residents Attend REA Meeting

A large number of residents of this community attended the annual meeting of the Deaf Smith County REA Thursday in Hereford.

Congratulations from our community go to our neighbor, Jonnie Hand. We are very proud of her for winning second place in the Miss REA contest.

Buckleys Attend Funeral of Relative

Mr. and Mrs. Jimmie Buckley and sons, Steve and Darrell, returned home Sunday from Paris, Tenn., where they had been called to attend the funeral of Buckley's aunt, Mrs. Edd Griffin. During their absence, Mrs. Buckley's mother, Mrs. J. L. Coke of Dimmitt, stayed with Janet and Larry.

Mrs. Buckley reports that they had a nice trip but that apparently they returned home just in time. Monday morning when Steve woke up he had the mumps.

LOST DOGS

Three families in our community are looking for their dogs. Two black cockers belonging to the Fern Barnetts have been missing several days. They stopped off for a

few days at the home of Mr. and Mrs. Claude Miller, then wandered off before the Barnetts learned where they were.

Butch, who is a brown and white English bulldog and belongs to the Ralph Prices, has been missing several days and they would like very much to get him back.

The Whitakers are looking for a mother dog with several small puppies. They have been gone several days and can't be located in the immediate neighborhood.

LUMBER

IS OUR BUSINESS!
COMPARE OUR PRICE and QUALITY Before You Buy!

ROCKWELL BROS. & CO. LUMBERMEN

Scouts Go To Camp

Several boys of the Black Boy Scout Troop attended camp at Camp Don Harrington near Amarillo last weekend.

They were Randy Price, Tommie Tatum, Larry Elmore, Larry Buckley, Jim Braxton, Ray Braxton, Craig Coon, Ricky Coon, Dean Nazworth, Johnny Miller, Ira Bruce Parr, Kenneth Duncan, and Wayne Agee.

To Lubbock

Mr. and Mrs. Rosco Ivie and Mr. and Mrs. R. E. Barnett were Sunday visitors in Lubbock. The Ivies visited with their son and daughter-in-law, Mr. and Mrs. Calvin Ivie, and the Barnetts visited with their son-in-law and daughter, Mr. and Mrs. George Brock.

Club Members Study Wills

The subject of study at the Thursday afternoon meeting of the Black Home Demonstration Club was wills. District Attorney Bill Sheehan discussed legal aspects of the subject. Roll call was answered by each member asking questions about wills.

Plans were made for the next meeting when the Hereford HD Club members will be guests. Helen Fangman and Lois Whitaker were selected to serve on the decoration committee. Geneva Ivie and Carrie Tatum are the refreshment committee members, and other club mem-

bers were designated to clean up.

The county-wide blood typing program and the possibility of a home nursing course were discussed.

Refreshments of pineapple cream pie and tea were served to eight members and four guests by the hostess, Christine Braxton.

To Farwell

Mrs. Ellis Tatum, Mrs. Ralph Price, and Mrs. Dick Rockey attended the regular monthly meeting of the county-wide Home Demonstration Council in Farwell Monday. Mrs. Price gave a delegate's report of the district convention she attended at Stratford.

VISIT SCHOOL

Pre-school age children who attended school in Friona on Friday, which was visitation day for next term's first graders, were Jeffery Price, Carlene Greeson, Tim Elmore, Danny Carthel, and Donna Jo Parr. Each of them report that going to school was a wonderful experience.

ATTEND FUNERAL

Mr. and Mrs. Coy Patton and Virginia left Tuesday to attend the funeral of a 19-year-old relative at Colorado Springs. He was killed accidentally while on a hunting trip. They returned home Thursday.

Mrs. Coy Patton and Virginia made a business trip to Amarillo Saturday.

Loyde Brewer of Friona was a Sunday dinner guest in the home of Mr. and Mrs. John Benger.

Mr. and Mrs. Howard Elmore were Sunday dinner guests in the home of Mr. and Mrs. T. J. Presley.

Mr. and Mrs. Woodrow Whitaker and Dwight attended a birthday dinner in Hereford Sunday honoring Woodrow's father, G. H. Whitaker Sr., who was observing his 89th birthday. Others present were Mr. and Mrs. Jim Bowden of Electra. Visitors in the home of Mr. and Mrs. Johnnie Benger were Mr. and Mrs. Hank Outland of Friona.

Mrs. Helen Fangman attended a parish council tea at Hereford Sunday afternoon.

Mrs. Ellis Tatum and Mrs. Weldon Tatum visited with Mrs.

Tatum's aunt, Mrs. J. T. Gilbert, in Muleshoe Sunday afternoon. Mrs. Gilbert then accompanied them to Littlefield to visit other relatives.

Earl Cline of Cuba, Kans., visited in the home of Mr. and Mrs. Howard Elmore last week. The J. R. Braxtons are driving a new car this week.

Prewetts Return

Mr. and Mrs. Lloyd Prewett returned home Sunday from Mineral Wells where they had spent the past week.

Nickel and nickel-clad steels are employed in many components of sea-going tankers where corrosion and contamination are constant problems in the transportation of liquid cargoes.

News From LAZBUDDIE

By MRS. CLYDE MONK

Senior Play Presented Friday

The senior play, "Small Town Romeo," was presented Friday evening to a near-full house and was thoroughly enjoyed by the audience. Those taking part in the play were Leon Wilson, Ronnie Ivy, Kirby Carrell, Roy Vanlandingham, Tommy Laney, Patsy Cox, Janis Clark, Clara Meyers, Marilyn Aduddell, and Mary Hartsell. They and their sponsor, John Bond, are to be congratulated on the performance. After the play Friday evening, the senior class, along with the John Bonds, the J. C. Scruggs family from Olton, Mr. and Mrs. Andy Brown and Mr. and Mrs. Larry Treider, enjoyed a party at the home of Janis Clark.

The remainder of the evening was spent singing and playing musical instruments. Refreshments were served by the hosts and her parents.

Jill Mimms Breaks Arm

Jill Mimms, a second grader, received a broken arm in a fall from a kitchen stool last Sunday night. She was visiting at the Dalton Mimms home at the time of the accident and was taken to Parmer County Community Hospital in Friona. Physicians were unable to keep the bone in place so Jill was taken to Amarillo on Monday where she was to consult a bone specialist. It was not known whether or not surgery would be necessary before setting the break.

Host Fish Fry

Mr. and Mrs. R. L. Forrester, who recently returned from a fishing trip, entertained with a fish fry at their home Friday night.

Enjoying this with the Forresters were Mr. and Mrs. W. R. Crabtree and children, Mr. and Mrs. John Crabtree and daughters, Mr. and Mrs. August Becker Jr. and daughters, and Mr. and Mrs. Nelson Welch and children, all from Levelland, and Mr. and Mrs. E. R. Horn from Sundown.

LUNCH MENU, MAY 5

Monday, wieners and cheese, black-eyed peas, creamed potatoes, grapefruit sections, plum pie, cornbread, butter, milk.
 Tuesday, chicken and dressing, cranberry sauce, green beans, celery and carrot sticks, pear halves, peanut butter, bread, milk.
 Wednesday, pinto beans, buttered rice, mixed greens, golden glo salad, apricots, hot rolls, butter, milk.
 Thursday, tuna, ham and cheese sandwiches, potato chips, pickles, lettuce, fruit Jello, peanut butter, milk.
 Friday, salmon loaf, buttered corn, potatoes, asparagus, raisins, hot rolls, butter, milk, ice cream.

Mr. and Mrs. George Crain, Mr. and Mrs. J. J. McDonald and Kim, and Mr. and Mrs. Mike Langford and daughters spent the weekend in Hubbard attending a family reunion of the Crains. They also visited in Malone with Mrs. Crain's mother, Mrs. J. O. Webb.

Mr. and Mrs. Leon LeBlue from Longmont, Colo., are visiting this week in the home of his sister, Mr. and Mrs. Lonnie Merriott, and relatives in Muleshoe. On Monday evening other visitors in the Merriott home were her mother, Mrs. Mary LeBlue, another brother and family, Mr. and Mrs. V. V. LeBlue, and a sister and family, Mr. and Mrs. O. J. Lorance.

Weekend visitors in the Calvin Embry and Robert Hooten homes were Mr. and Mrs. Mervin Wilterding, Muleshoe; Mr. and Mrs. Reece Wilterding and children, Tulsa; and Mr. and Mrs. Tom Surguine of Boulder, Colo. The Mervin Wilterdings are remaining in the Embry home for a few days while Mrs. Wilterding is recuperating from surgery. Other visitors in the Embry home on Sunday were the Virgil Teagues. Mrs. Opal Bewley and Mrs. Laura Treider spent the weekend in Abilene visiting with Mrs. Bewley's son and family, the Jack Bewleys.

BAPTIST CHURCH NEWS

Brotherhood of the First Baptist Church met last Thursday evening in their regular monthly meeting with about 32 men present. B. C. Ancira, pastor of the Mexican Mission in Friona, was the principal speaker for the occasion. Refreshments of cake and ice cream were served.

Brotherhood members, accompanied by some of the juniors and intermediates of the R. A., left Friday afternoon after school for an overnight outing of camping and fishing, returning Saturday afternoon.

Making the trip were Bill Curry, Weldon Clayton, Edgar Vanlandingham, Freddie, Ray and Ronnie, Bert Gordon and Richard, Sammy Blackwell, R. L. Porter, J. B. Young, Cooper and Steve, A. E. Redwine and Bobby, John Aduddell, Andy Fuqua, Leroy Cox, David Wimberly, Jimmie Broadhurst, Earl Peterson and Wayne, Wesley Barnes and Royce, Allen Grusendorf and Gary, and John Neal Agee.

On Friday night the GA girls enjoyed a slumber party at the home of Mrs. Bill Curry. Besides Mrs. Curry those present were Mesdames Earl Peterson, John Aduddell, and Andy Fuqua. Girls attending were Maudie Barnes, Marilyn Aduddell, Judy Jones, Lois Vanlandingham, Donna Redwine, Geraldine Broadhurst, Elaine Vanlandingham, Pat Peterson and Betty Mallouf.

Mrs. Robert Waggoner and Kim visited overnight last Thursday in the Buck Crim home.

Sunday visitors in the Bill Lancaster home were their son and family, Mr. and Mrs. C. R. Lancaster and son from Slaton.

Mrs. Walter Steinbock and Mrs. Wayne Moore visited in Portales last Monday and also attended a hair styling show in Clovis.

Mr. and Mrs. Rufus Carter visited with the Eugene Mortons in Dimmitt Saturday.

Robert Ivy was home over the weekend from Ft. Bliss to visit with his parents, the D. B. Ivys. Robert was accompanied home by five companions who are also stationed at Ft. Bliss.

The Dick Scotts were in Plainview and Lockney on Sunday.

Recent weekend visitors in the Ralph Cox home were Mr. and Mrs. B. F. Brown from Lubbock, Mr. and Mrs. Guy Cox, and Mr. and Mrs. Joe Cox and children, all from Farwell, and Mrs. J. P. Wilson from Friona.

Mrs. Lewis Beeman from Lovington, N. M., visited last week in the home of her sister, the Walter Steinbocks.

Mr. and Mrs. Weldon McGehee and family from Post visited Sunday in the John McGehee home. Other visitors were Mr. and Mrs. Raymond McGehee and daughter.

Don Watson and David Smith spent Sunday at Buffalo Lake. Harold Wilson, Pete Mimms, Lester Howard and Bill Harmon were in Dodge, Kans., last week on business.

Mr. and Mrs. O. D. Spitzer and children visited overnight last Monday in Skellytown with his cousin, Mrs. Kellard Rochelle, and her family.

The home of Mrs. Richard Barnett was the scene of a bridge club meeting last Tuesday evening. Present were Mesdames Adele Treider, Levinia Brown, Joyce Broyles, Shirley Steinbock, Betty Smith, Glenda Haley, Ruth Robbins and Janice Gaede.

Mr. and Mrs. Howard W. Carpenter and Sussie visited in Lubbock Sunday with their daughters, Miss Jimmie Frank Carpenter and Mr. and Mrs. Neil Ross.

Mr. and Mrs. J. W. Gammon and girls visited in Canyon Sunday with her mother, Mrs. G. W. Harwood.

Gorden Duncan made a business trip to Fort Worth this week.

Mr. and Mrs. Charlie Glover attended funeral services for Grandma Billings in Sudan Tuesday afternoon.

Mr. and Mrs. Noal Clemmons and family of Canyon were weekend visitors in the Tice Hugg home.

Billy Brown from Hobbs, N.

Mrs. Hardy Scott and girls, Sherri and Sharla, are visiting a few days this week with the Dick Scotts.

M. visited Sunday in the Ralph Cox home.

Mr. and Mrs. Sanger from Brownwood are visiting this week in the home of their daughter and family, Mr. and Mrs. Edgar Hartley.

Mr. and Mrs. J. W. Maddox were in Oklahoma City over the weekend visiting her brother and family, Mr. and Mrs. B. T. Reese.

Mr. and Mrs. Andy Brown and Sonya visited in Tulsa Sunday with his brother, Mr. and Mrs. Buddy Brown.

Mr. and Mrs. C. A. Watson, Bennie and Leon, were Sunday visitors in Anton with her parents, Mr. and Mrs. H. I. Bass.

Mr. and Mrs. H. H. Briggs were in Adrian Sunday with his brother, Mr. and Mrs. W. C. Briggs.

Mr. and Mrs. Roy Daniels and Mr. and Mrs. Garvin Thorn visited Sunday afternoon in Portales with the Carroll Hunton family.

Mr. and Mrs. Rhiney Steinbock spent the weekend in Wichita Falls with a daughter and son-in-law, Mr. and Mrs. James Kyle. They also returned Sheila Kyle to her home there after a few weeks visit here.

Corky Green from Muleshoe spent the weekend in the Gordon Duncan home.

Dee Brown and Fred Johnson spent a long weekend in Cotter, Ark., on a fishing trip. The men report trout fishing was very successful.

Weekend visitors in the Owen Broyles home were Mr. and Mrs. J. D. Tylei and Geradine from Hereford, Judy Dodson and Eugene Broyles of Amarillo, Mr. and Mrs. Vernon Petty and daughters of Friona and Mr. and Mrs. Beardiene Broyles and Becky.

Mrs. Junior Matthews, Mrs. Short Ivy and Gail and Mrs. T. D. Reed spent the weekend in Gilliland visiting with the Ray Beatus and other relatives.

Mr. and Mrs. Howard Spawn and Pam from Muleshoe visited in the Jackie Brown home Sunday. Others visiting with the Browns were Mr. and Mrs. C. M. Spawn, Patsy Morrow and Linda Lancaster.

Mr. and Mrs. Bill Brown, Scott and Lisa, visited last week with her mother, Mrs. W. W. Scott, in Stamford. Scott stayed with his grandmother for a longer visit.

Mr. and Mrs. K. I. Sharpes and children visited through the weekend with Mr. and Mrs. L. B. Hambricht.

Springs made from Inconel "X" nickel chromium-iron-aluminum-titanium alloy offer satisfactory service at temperatures up to 1,100 degrees Fahrenheit. Excellent resistance to corrosion and retention of spring properties are exhibited by this alloy.

Tableware made of nickel-containing stainless steel is resistant to heat and staining and will retain its polished finish with only normal washing.

NEWS FROM Rhea

By MRS. FRANKLIN BAUER

Men's Club Meets Thursday Night

The Men's Club had their regular meeting Thursday night at the Parish Hall. After business matters were discussed, Carl Schlenker led the group topic discussion. The remainder of the evening was spent in visiting and playing "42." Refreshments of jelly rolls and coffee were served by Gilbert Schueler to Carl Schlenker, Raymond Schueler, Franklin Bauer, Herman Schueler, Herbert Schueler, Florian Jarecki, Floyd Schueler, Eldon Garber, Ray Martensen, Walter Schueler, Melvin Sachs, Robert Schueler, Pastor Stroebel and Gilbert Schueler.

The group sang several songs, after which the three- and four-year-old children sang songs. Mrs. Florian Jarecki was in charge of the evening's entertainment while Mrs. Walter Schueler helped lead the singing.

Sandwiches, coffee and cocoa were served to the group after the entertainment.

V. B. S. PLANS MADE
 Plans are being made for the annual Lutheran vacation Bible school to be held at the Parish Hall the first week in June.

Any child wishing to attend is welcome and may register by informing one of the church members.

SICK LIST
 The mumps and measles germs are still floating around in the community. Those sick the past week were Roger Martensen with the mumps; and Dale, Kathy, and Gene Schueler, and Robert Schueler Jr. with the measles.

Dinner Guests
 Dinner guests in the Walter Schueler home Sunday were Mr. and Mrs. Herman Schueler, Herbert and Lillian, Cecelia Starr, Mr. and Mrs. Carl Schlenker and family, Mr. and Mrs. Franklin Bauer and children, and Pastor Stroebel.

Celebrates Birthday
 Leslie Jarecki celebrated his sixth birthday Sunday in his home. Guests were Harry Goetz, Steve Wagner, Mr. and Mrs. Oliver Rieken of Friona, and Mr. and Mrs. Milton Sullivan and family.

To prevent surveying errors in directional oil and gas well drilling caused by magnetic effects, "K" Monel age-hardenable nickel-copper alloy drill collars are used. Not only is this alloy non-magnetic, but it resists corrosion, wear and abrasion.

Children Entertain At Family Night
 Sunday School children entertained their parents at the family night held at the Lutheran Parish Hall Sunday night.

Educational Needs Viewed in County

A total of \$1,613,600 has been spent in Parmer County for new school buildings and equipment in the past five years, and indications are that building is barely keeping up with the demand for more room.

There is a shortage of two classrooms in one district in the county, that is now being met by present construction, and the predicted need in the county by 1963, will be 20 additional classrooms.

The above findings for the county were discovered by members of the Parmer County Hale-Aikin Committee of Twenty-Four. The county committee has met four times during the year, individual school districts have had four meetings, and four sessions for the general public have been slated. About 64 people in the county have participated in the study.

The local committee had many suggestions to make for improvement of the school program. Suggested courses to be added to the curriculum included public relations class, foreign language (Spanish), driver education, and at least one year of speech.

In reviewing the elementary program for the county, it was felt that improvement is needed in the following areas: spelling, speaking, writing; and science, with an expressed need for better facilities and equipment and supplies; also arts and crafts.

The committee felt that adequate training is now available in reading, arithmetic, history, geography, health and music. They feel that there is a need for a better rounded program in physical education in the lower grades, with better participation from all students.

LESS EXTRA-CURRICULAR
The group felt that the courses taught in the local high schools are adequate, but that standards are not high enough. They suggest higher requirements for each student and teacher, with more supervision and less activities NOT pertaining to actual curriculum studies.

It is revealed in the study that the Parmer County high schools now meet the requirements as to minimum course offerings that will become effective in 1959.

Two of the schools in the county have good guidance programs for students; two have none. The committee feels that vocational courses are suitable, with the possible exception of the addition of industrial arts for boys.

The study shows that no training for handicapped children is

ANNUAL EIGHTH GRADE BANQUET—Mary Ann Boggess and Reggie Hayes are "crowned" by St. Peter, alias Baker Duggins, as they pass through the Pearly Gates on their way into the cafeteria for the Annual Eighth Grade Banquet last Saturday night.

available in the county, and the group suggests that a unit should be provided by Texas Education Agency. There are no provisions for the gifted child.

"Above average" was the observation of the adequacy of teaching staffs in the county schools; but the schools fall short of having adequate library facilities in both elementary and high school. School transportation facilities are also noted as adequate, but financing of this phase on the state level is inadequate, they feel.

As for teacher supply, this seems to be a problem. To relieve already overcrowded classrooms, seven teachers are needed in the county. Three faculty members in the county now teaching, lack proper legal certificates; two are teaching "only until a replacement can be found," and seven should be replaced for other reasons. By 1963, the committee feels that 70 additional teachers will be needed in the county.

Four suggestions were given to aid in gaining more and better teachers: interstate teacher retirement plan provided, increased salaries, longer tenure on contracts and better living conditions.

Support State Sales Tax
The county committee recommends that necessary expenses to increase the teacher supply problem be financed through a state sales tax.

In explanation, the committee's report reads as follows: "General Sales Tax for Free Public Schools, Purpose Thereof: To equitably distribute the cost of schools to every segment of the people of the State. In many places, School property tax is now a burden and a further increase for an expanding School population would lead to further delinquent taxes and a general stagnation of building. Certain exemptions would be necessary to equitably distribute the cost of schools."

"(B) To finance the recommended changes in the Foundation School Program and to relieve the Legislature of its direct school appropriations."

In terms of the prevailing construction cost per school classroom in the area, estimates of costs of the additional classrooms that will be needed in the county by 1963, totaled \$400,000.00. The breakdown reads: Bovina, \$80,000; Lazbuddie, \$140,000; and Friona, \$180,000.

Farwell's present building program is expected to take

care of needs for the next five years, so no estimate is included for that school in the above totals.

Local Fishermen Have Good Luck

Buddy Lloyd, Johnny Brand, and Dennis Robards spent several days last week fishing at Lake Whitney. Monday evening a group was invited to the Lloyd home for a fish fry.

Those present were Mr. and Mrs. Dennis Robards, Mr. and Mrs. Rodney Hinkle and Delwin, Mr. and Mrs. Glen Smith and Cynthia, Fred Lloyd and Barbara, Mrs. Henry Lloyd, and Mrs. W. M. Lloyd, and Bill Allen.

DeWayne Neel Wins Election

DeWayne Neel, junior mathematics student from Friona, has been elected president of the student body for the 1958-59 session at West Texas State College at Canyon.

Neel, who defeated Cecil Irwin, Matador senior, in a campus wide election, will assume office in May and serve throughout the school year during 1958-59. He won in a close vote, 327-300. He is a 1955 graduate of Bula High School and served in West Texas State's Student Senate during his freshman year.

During the summer of 1957 DeWayne was director of the Little League program in Friona. He and his wife, the former Melba Williams of Plainview, are both attending WT. His parents are Mr. and Mrs. Otis Neel of the Hub community.

Charm Beauty Shop Reopens Thursday

Plans have been completed by Mrs. Pat Fallwell for the re-opening of the Charm Beauty Shop in a new building at 613 Pierce Street Thursday morning. Before Mrs. Fallwell purchased the shop several months ago it was located on Main Street next door to Taylor's Barber Shop.

Mrs. Fallwell has recently graduated from the San Jacinto School of Beauty Culture at Amarillo. She will be assisted by Mrs. Letha Turner, who is a graduate of Walker's Beauty School at Clovis and has been employed by Jessie McSpadden at Bovina.

The building and equipment are all new, and complete beauty service will be offered six days each week. Special arrangements are being planned to take care of late appointments. An announcement concerning this will be made later.

Final Rites Held For Susan Billings

Mrs. Susan Jane Billings, 86, who had made her home with her daughter, Mrs. Earl Chester of Friona, for the past year, died at the Parmer County Community Hospital Sunday afternoon. Mrs. Billings was born March 26, 1872, in Blanco County, Tex.

Survivors other than Mrs. Chester are two daughters, Mrs. G. W. Stowe of Vernon and Mrs. H. L. Gage of Brownfield; and four sons, M. R. Billings of San Antonio, Richard Billings of Alford, Tex., C. H. Billings of Lubbock, and L. A. Billings of McKinney.

Funeral services were conducted from the First Baptist Church in Sudan at 2:30 p.m. Tuesday under the direction of Claborn. Burial was in the Sudan cemetery.

Formal Opening Set Friday

The formal opening of the recently completed Methodist Church has been set for Friday evening and will begin with a covered dish supper at 7 p.m.

Special guests will be District Superintendent E. D. Landreth and Bishop William C. Martin. Special music will be presented by the choir and Kim Caffey will sing a solo accompanied by Cynthia Ann Caffey at the piano.

A history of the church will be presented by Mrs. J. T. Gee. The program will be followed by a tour of the building. The Friona Methodist Church was organized in May of 1914 with nine charter members.

The first building, which was built of adobe blocks, still stands just north of the new building and is known as the Methodist annex. The foundation, which is the oldest part of the newly completed building, was run in 1930 and then completed in 1939.

The present sanctuary was completed in 1948 and construction of the educational building began in the fall of 1956. At the present time the pastor is Rev. Hugh Blaylock, who has been serving the church since early fall of 1955.

In the past 44 years the church membership has increased from the original nine members to about 500.

New Businesses To Open Soon

In the near future there will be two new businesses opening in Friona. Joe Brummett plans to open his new Friona Appliance and Service on east Highway 60 Thursday morning. He will sell ironers, television sets, curtain rods and accessories, and other appliances.

Brummett will also offer repair on appliances and air conditioners.

Mr. and Mrs. Granville England plan to announce an opening date soon of their completely new coin-operated auto-

matic laundry in a part of the building formerly occupied by the City Steam Laundry.

The building is being remodeled and fixtures should be installed within the next few days.

Despite competition from aluminum and other metals, nickel-plating continues to be used extensively for decorative and engineering applications within the free world. Its use as decorative trim, especially by the automotive and home appliance industries, continues to grow.

Teacher's Mother Ill in Brady

Miss Ranghild Hanson, second grade teacher in Friona, was called to her home in Brady, Tex., Monday night after receiving word of the illness of her mother. She called friends Tuesday to tell of her safe arrival at home but word has been received as to the condition of her mother.

People who talk about religion all the time often fail to understand its true meaning.

NEVER NEEDS WATER...

NEW! WATERLESS BATTERY

Silicon

10-YEAR GUARANTEE
backed by the manufacturer and bonded by state-chartered bonding company.

Certified!

- The SILICON WATERLESS BATTERY delivers quick starting power for 10-ton truck engines at 70 degrees below zero... far more than your car needs.
- The SILICON WATERLESS BATTERY makes your lights burn brighter by Westinghouse light meter test.
- Tachometer R.P.M. tests prove that the SILICON WATERLESS BATTERY turns your engine over faster.
- The SILICON WATERLESS BATTERY is powerful enough to start your car engine 50,000 times a year for at least 10 years!
- In competitive laboratory tests, the SILICON WATERLESS BATTERY produced 400% more power than one of the nation's top-selling, nationally-advertised batteries!
- The above statements of fact are certified to be true in every respect.

INSTALL IT... FORGET IT!
Here at last is the battery science has been trying to perfect for more than 100 years! Think of it—now you can install in your car the most powerful battery ever built, then forget it completely for at least ten long years!

50,000 STARTS A YEAR FOR 10 LONG YEARS!
What other battery stores such tremendous reserve power that it can deliver the equivalent of more than 120 starts a day for 10 years or more? The SILICON WATERLESS BATTERY did it in the toughest battery test ever devised by any laboratory—made a total of half a million starts!

NEVER USES WATER... NEVER OVERHEATS... NEVER FREEZES... NEVER NEEDS ATTENTION

News From LAZBUDDIE

By MRS. CLYDE MONK

Kimbrough Home Scene of Fish Fry

A fish fry was enjoyed Saturday evening in the home of Mr. and Mrs. R. L. Kimbrough. Present for the feed besides the Kimbroughs were Mr. and Mrs. Lee Kimbrough, Nancy and Mark from Bovina, Mr. and Mrs. Finis Kimbrough, Mr. and Mrs. Ed Nichols, Pat and Nicky, Mr. and Mrs. Jack Hawk and Randy of Lubbock, Mr. and Mrs. Sig Kimbrough and Debbie, Mr. and Mrs. J. S. Horsley and Chet of Muleshoe.

Also, Mr. and Mrs. France Gaede and Mrs. Betty Wilhams, Pat, Peg and Pam, all from Limon, Colo., Mr. and Mrs. Glen Splawn of Muleshoe, Mr. and Mrs. Johnny Crowe, Mr. and Mrs. Eddie Hall, Brenda and Brent, Mr. and Mrs. Max Steinbock, Mr. and Mrs. Gene Smith and Timmie, Mr. and Mrs. Don Sanders;

And, Mr. and Mrs. John Vaughn and daughter, Mr. and Mrs. J. T. Eubanks and Max, and Mr. and Mrs. Bob Kimbrough, Brenda and Mike. The fish for the supper were caught by Mr. and Mrs. Don Sanders, Mr. and Mrs. Lee Kimbrough, and Mr. and Mrs. Bob Kimbrough at Lake Stamford.

Mrs. Wayne Clark and boys, Loy Dale and Danny, left Friday for a few weeks visit in Hartshorn, Okla., with her parents, the Floyd Templers.

Mrs. F. L. Wenner of Muleshoe and Virgie Lawson from Norman, Okla., visited last Tuesday in the home of Mr. and Mrs. Deller Wenner.

Weekend visitors in the Bill Jennings home were her sister and family, Mr. and Mrs. Ervin Robinson and children from Hereford.

Johnnee and Jackie Sue Seaton spent the weekend in Canyon visiting with their grandmother Seaton.

Mr. and Mrs. Charles Neely from Tulsa, Okla., are visiting a few weeks in the home of their daughter and family, the Raymond Treiders. On Tuesday and Wednesday of last week Neely, Raymond and R. G. Treider were fishing at Lake Stamford and report they caught a number of fish.

Mr. and Mrs. Arnold Peterson from Lubbock were dinner guests Sunday in the home of her parents, the Ernest Nowells.

Mr. and Mrs. Edd Clark from Hereford visited Sunday afternoon in the home of his

brother, the Calvin Clarks. Mr. and Mrs. W. S. Menefee are in Houston at the present time where Menefee is in a clinic for tests.

Mr. and Mrs. Carl Ellington and family from Muleshoe visited Sunday with Mr. and Mrs. Buck Crim and son.

Miss Johnny Nowell and her grandmother, Mrs. F. C. Wagon, visited in Sundown Friday night.

Mr. and Mrs. Joe Dement from Clovis were Sunday dinner guests in the E. T. Ford home.

Ben Foster celebrated his birthday Sunday by having his family with him in the evening. Sharing birthday cake and ice cream with him were Mrs. Foster, Mr. and Mrs. Dean Hurd and family from Muleshoe, Shan Foster and Mr. and Mrs. Demp Foster and boys.

Mr. and Mrs. T. C. Lewis from Frederick, Okla., visited a few days last week in the home of their daughter and family, the J. B. Wrights.

Mr. and Mrs. Ernest Wayne Spradlin and daughter from Seymour visited Sunday in the home of his uncle, Mr. and Mrs. R. L. Forrester. Other visitors were their son and family, Mr. and Mrs. Gene Forrester, David, Darlene and Paul.

Increasing amounts of ductile iron are being used for heavy gears because of this cast material's high strength, good wear-resistance and excellent machinability.

NEW U. N. STAMP

The "Central Hall" stamp, depicting the site of the first U. N. General Assembly session in London in 1946, is on sale at the New York headquarters, in three cent (blue) and eight cent (purple) denominations. It is the first in a series of stamps to be issued, showing the various buildings in which succeeding "GA" sessions have been held. Central Hall is in the Westminster district of London.

«The High Plains Farm and Home»

Water Table Drop Tapers Off With Coming of Rains

by W. H. GRAHAM JR.

Rains that came in the last half of 1957 and the early part of 1958 are probably responsible for saving Parmer County farmers about one-half year's supply of irrigation water.

This is only a guess, but it's an educated one, because figures released by the High Plains Undergrround Water District show that the decline in the irrigation water table under the county, which has been steady since irrigation started on a big scale, slowed considerably in 1957.

The decline in the water table in the 43 wells in which measurements were computed by Farm and Home amounts to an average of 2.67 feet for the year just ended. That compares with a drop of 4.99 feet for the previous year, indicating that pumpage declined considerably because of rainfall and that this decrease in pumping was reflected in the drop of the table.

There are many interesting things that can be noted in the report. One thing to keep in mind is that it is usually desirable to use figures from several well measurements and average them out for a good cross-section of the entire picture, rather than take individual figures from individual wells.

That is because it is difficult for a number of reasons to establish accurate patterns with only a few measurements. It is sometimes difficult to get an accurate reading on the depth to the water table, and sometimes special circumstances need to be figured in, such as the well's having been used fairly recently, or perhaps another well pumped nearby, or

perhaps the table being affected favorably by a large lake not very far away.

To make some concrete examples, well No. 20 in the northwestern part of the county showed a decline of 10.26 feet from 1956 to 1957. However, figures show that a rise of 4.97 feet in the table occurred from 1957 to 1958. Likely, one or more of the measurements is off and it will take an average to correct an error of this type. Measurements are made each January.

A similar condition can be noted in well No. 369, where a decline of 10.26 was measured in 1956-57, but the table apparently rose 3.88 in 1957-58.

The biggest difference of all is shown in measurements made at well No. 393, where a drop of 18.51 feet was recorded at the end of 1956, but the table came up 8.66 at the end of 1957.

These errors are comparatively minor, however, when thrown in with the entire group, as they have a tendency to average out. On the whole, the measurements taken and put on record may be regarded as completely reliable, and they represent the only authentic information available on the behavior of our water table.

The shallowest water in the county is shown in well No. 375 near Lariat in the southern part of the county, where measurement of 103.99 feet was made this year. Two years ago when measurements started, the depth to water was 94.80—less than 100 feet. Twenty-five years ago a pumping lift of more than 100 feet was considered uneconomic. When drawdown is subtracted from the static table, and this amount varies over the county, there is prob-

ably no farmer who is lifting water fewer than 125 feet.

The average depth to water in the county observation wells is 185 feet, and the pumping lift probably averages around 210 feet. This is twice as far as farmers thought they could lift water and make money with it just a few years ago.

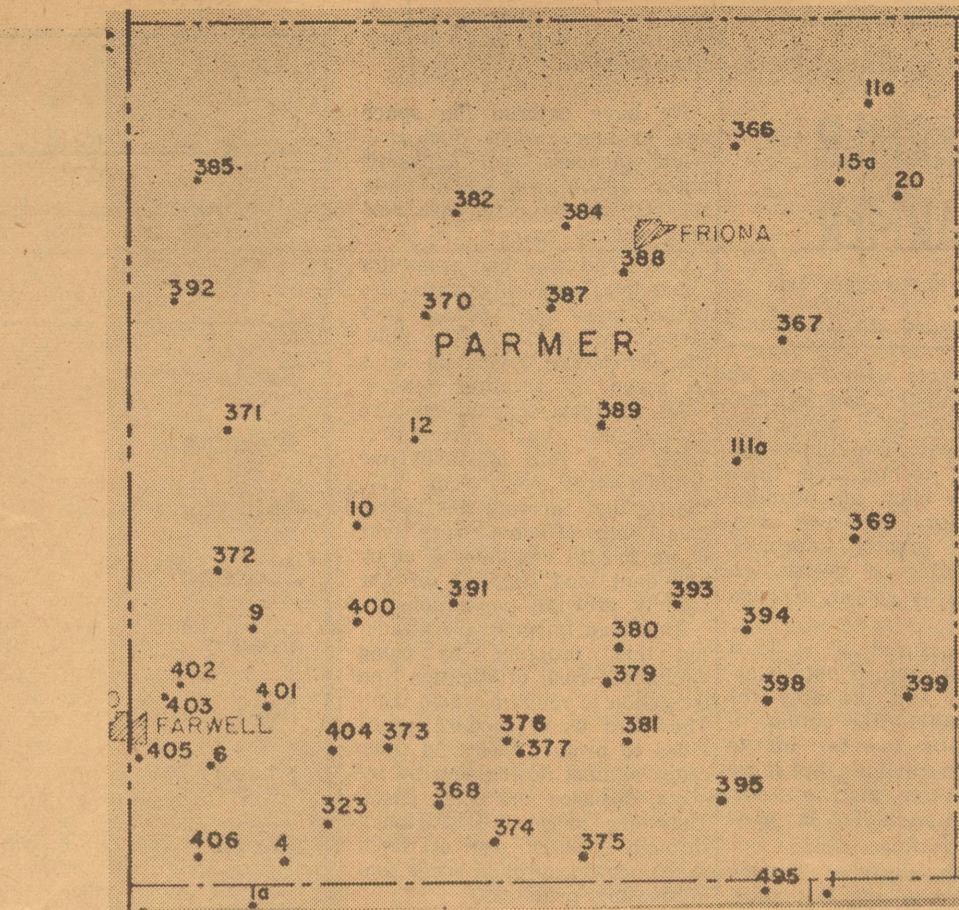

The deepest water in the county is in the northwestern area where well No. 392 records a static water table of 292 feet.

Some recharge doubtless occurred in wells during the year just ended, but by far the biggest part of the wells showed a decline of a smaller measure instead of a rise. That is to say, the fact that the table decline was practically cut in two in 1957 as compared with 1956 was a result of much less pumpage rather than a recharge of water in storage.

The thickness of the water-bearing portion of the Ogallala formation under Parmer County is about 200 feet. Farmers and investors who want to do a little projected figuring might assume that an average decline of four feet a year would mean that the water will last another 50 years at the present rates of usage.

However, there are many considerations that upset such far-reaching calculations. Recharge is a factor just getting started on the Plains. Within another 10 years it may be significant to the economy. Also, better water use is on the way, and future years will see farmers produce the same or greater amounts of cotton, grain, and vegetables with less water than is being pumped now.

Also, as the table declines the cost of lifting water in-

These are the Parmer County observation wells, where yearly field men of the U. S. Geological Survey, in cooperation with the state Board of Water Engineers, measure water table levels.

creases. There are numerous cases of "marginal" irrigation installations now that will not be continued if the water table declines, say, 100 feet. That would make the lift too great to justify with the crops being produced from the water.

Also, the Plains may be headed for another "wet spell" that could last several years. Declines of from four to five feet in dry years appear to be the maximum that can be expected, since the total irrigation system of the county is now developed almost to its potential. The return of rain would keep pumpage low.

This is graphically shown in the records of the past season. Most irrigation wells of the area were shut off in the early part of September last fall, and were not started again until March or later. That is a lag in pumping of a full one-half year, which is the most High Plains farmers have let their irrigation wells rest in a long time.

As time goes on, the records now being made in these observation wells will become more important. Actually, records are just getting started and it will take several more years before inaccuracies will be "leveling out" with the averages.

But enough figures have been compiled to show conclusively that the water table is declining at a regular rate, although

that rate is governed by pumpage, and that we may anticipate further declines as irrigation continues to be the lifeblood of High Plains farming.

SOIL CONSERVATION DISTRICT NEWS

OUR SOIL ★ OUR STRENGTH

What is Public Law 1021? The Great Plains area has long experienced problems peculiar to its environment. To provide a means of minimizing the hazards of farming and ranching caused by the extreme climatic conditions of the area, a program of conservation for the Great Plains was authorized by Public Law 1021.

The objective of the program is to assist farmers and ranchers in developing and carrying out, on a voluntary basis, a plan of operations that will bring about greater stability through soil and water conservation practices. Public Law 1021 provides that a farmer or rancher who enters into a contract under the Great Plains Conservation Program will agree to carry out his conservation and land use plan for his farm or ranch in accordance with the schedule of operations in the plan. In return for this agreement, the secretary of agriculture contracts to share the cost of carrying out the planned conservation practices for which cost-sharing is available.

The farmer or rancher can get help in determining the capabilities of his land and planning the kind of farming

operation that will help him cope with the climatic problems of the Great Plains. He also can get technical help in installing his planned conservation practices and in making land use changes.

Cost-sharing help provided under the Great Plains Conservation Program is for a period of years instead of one year at a time. It provides cost sharing for a combination of conservation practices that a farmer or rancher wants to undertake over a period of years. These practices represent the complete farm or ranch conservation needs.

Acreage allotments will not be decreased during the period of the contract because of changes in land use required by the contract.

This program is for any farmer or rancher who owns or otherwise controls the land for the period needed to carry out the plan of operations. It is not directed only to the co-operators with Soil Conservation District or A. C. P. participants. For further information concerning this program contact the Soil Conservation office in Friona.

Time says that "Britain's womb-to-tomb National Health Service is in the red again." Individual contributions are due for big increases. It was originally estimated that the plan would cost \$490 million a year. Actual cost, in the next fiscal year, will be in the neighborhood of \$2 billion.

These are the measurements from the surface of the ground to the static table in each observation well. The wells can be located on the map by the number. Records for three years are shown here.

Inconel nickel-chromium alloy resists oxidation up to 2,200 degrees Fahrenheit and has good mechanical strength at moderately elevated temperatures. This alloy, which contains about 77 per cent nickel, is a standard material for heat-treating, chemical and food processing equipment, and aeronautical parts such as manifolds and combustion chamber linings.

Over five miles of ductile iron piping go into many of today's new ocean-going super-tankers which transport crude oil. Ductile iron, a new engineering material developed by International Nickel, is used for piping and fittings because it is tough and gives without breaking under stress and shock, and resists the corrosive action of sea water and sulphur-laden crude oil.

Here's the Smoothest riding pickup...

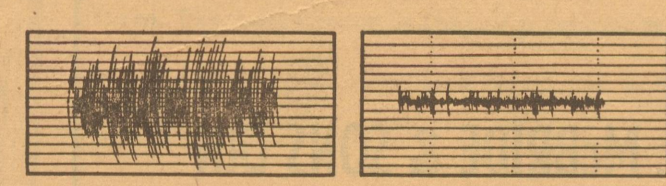

Ford Style Side pickup—lowest-priced pickup with cab-wide box.

'58 FORD

Proved by Scientific Impact-O-Graph ride tests

You (and your family) are in for a pleasant surprise when you drive a new Ford pickup. A new suspension system, with rubber-cushioned springs plus long two-stage rear springs, gives you a ride that's more car than truck—empty or loaded. Yet, Fords are priced with the lowest. Running costs are low, too—because of economical short-stroke design in Ford's V-8 and Six. Ford resale value is traditionally high. And an independent study by insurance experts proves Ford trucks last longer.

Impact-O-Graph picture of a competitive ride. The Impact-O-Graph (a scientific instrument used to measure bumps) records what you feel—jar and jounce. Same Road, Same Speed—but some difference! Ford's new suspension gives the smoothest ride of any pickup—a ride mighty close to that of a car!

Official registrations show: AMERICAN BUSINESS BUYS MORE FORD TRUCKS THAN ANY OTHER MAKE!

FORD TRUCKS COST LESS
... less to own ... less to run ... last longer, too!

Take a test ride today!

THE PARMER COUNTY IMPLEMENT CO. NEWS

"The Place Where Most People Trade" Friona, Texas Wednesday, April 30, 1958

We haven't seen John Aldridge's (Farwell) lawn in a year or two, but we remember once several years ago before everyone was using fertilizer that John tried some new kind of liquid fertilizer. He didn't put it all over his lawn—he just stuck holes here and there and poured the fertilizer in the holes. When we saw it early that spring, it looked like it had a bad case of green chicken pox.

PCICN

You are sure to need some packer wheels this planting season. We have plenty on hand. Better get yours early.

PCICN

We have some new neighbors in our part of town. Newlyweds Mr. and Mrs. Dale Houlette moved into the house vacated by Dale's parents last week. Mrs. Dale Houlette is the former Jane Phipps.

PCICN

We've been selling some new Oldsmobiles and have traded for some real good used cars. It will pay you to see these before you buy.

These are suggestions for keeping your alley clean and making Friona a cleaner, more beautiful city: 1. Be sure that all garbage cans have lids. (In Friona you can get a cover for your garbage container at Taylor and Sons Blacksmith Shop) 2. Separate trash from limbs and brush and cut limbs into 3 or 4 feet lengths. 3. Tie your garbage lids to a fence or post. Simple and easy. Friona has a city ordinance against burning trash.

PCICN

Our parts department is the most complete on the Golden Spread. For any kind of farm machinery parts, call us first.

Longer Staple Aim Of Cotton Spinners

Two striking facts—longer staple cotton and a better packaged bale—were cited today by 36 Texas High Plains cotton producers, ginners and businessmen who returned last week from a three-day tour of cotton and synthetic textile mills in South Carolina.

Roy Forkner, Lubbock ginner, who was chairman of the Plains Cotton Growers, Inc.-Plains Ginners Ass'n, sponsored mill tour, said visits and talks with textile mill officials bore out the fact that textile mills still prefer cotton from which to produce fiber goods, but the future use of cotton may hinge on longer staple and a better packaged bale.

Visits were made to the Riegel Textile Corp., Ware Shoals, where they saw a plain cloth mill, carding, spinning and weaving operations which turned out print cloth, sheeting and linings; to one of the largest finishing and bleaching plants in the nation located at Riegel's Ware Shoals plant; to the Abney Mills, Southside Plant where blended fabrics, cotton and rayon were produced; the Owens-Corning Fiberglas Corp.; the Lowenstein Cotton & Storage Corp.; and the Mathews Plant of the Greenwood Mills.

F. E. Grier, president of Abney Mills, who has visited Lubbock and the South Plains, told the Texas cotton producers and businessmen, that the fact that they—the cotton producers—were becoming concerned with cotton prices instead of Federal loan prices, was a healthy sign. He added that cotton may be pictured as not competing successfully with synthetic fibers in a time when success depends on competition.

When the Texas group visited the Lowenstein Cotton & Storage Corp. at Anderson, Robert W. Smith, vice-president, who buys as much as 375,000 bales of cotton annually, took the group through his warehouse, showed them neatly packaged bales of synthetic man-made fibers stacked next to ragged, dirty, poorly packaged bales of cotton.

"Better packaged bales of cotton could cut mill waste on cotton and perhaps result in more cotton being used," Smith told the group. The cotton storage

officially buys cotton for 16 mills in South Carolina.

P. Silas Bailey, vice-president of the South Carolina Textile Manufacturers Ass'n., told the group at a dinner Tuesday night that "Cotton consumption may continue to fall because of a shortage of quality cotton and a price high enough to make cotton non-competitive with other fibers."

"You Texans may think the High Plains grow large quantities of cotton, and you do, but I might add that we South Carolinians can consume more cotton than the High Plains can produce. In fact, we consume more cotton than any state produces—with the exception of Texas," he continued.

In South Carolina there are about 6½ million spindles, representing about 30 percent of all textile spindles in the U. S. Normal cotton consumption in South Carolina is about 2½ million bales of cotton each year—about 30 percent of all cotton consumed in the nation.

County 4-H Teams Enter Contests

Three teams and one individual will give demonstrations in district contests at Canyon Saturday.

Virginia Rea and Judy Billingsley will give a demonstration on electricity, and Barbara Rea will present a dairy foods demonstration.

Farm and home safety will be shown by James Brown and Richard Chitwood, while soil and water will be the topic of a demonstration by Calvin Mason and Cooper Young.

The contests will be on the campus of West Texas State College.

THE PARMER FARMER

by W. H. Graham Jr.

Most farmers with whom we talk are quietly hopeful that this year will be a better one than last year. Two things appear quite certain and these things help buoy up farmers' spirits: Natural moisture conditions are greatly improved, and, the price of cotton, especially quality cotton, is going up.

We are assured of at least a fair wheat crop, if not an excellent one and probably the best since 1949. For cotton, of course, that's too far off to make any predictions, but if we have no better than a "normal" year we'll be in good shape.

The grain sorghum outlook is about like it was last year, and most of it is destined to go into the loan again.

The High Plains farmer, who must pay his bills regularly and raises a crop every year to do just that, is inclined to think from year to year. That is natural.

But what of the long-term outlook for agriculture. Not only here on the High Plains, but the country over? We have picked up some opinions from the National Editorial Association, which has members in every rural area in the nation.

You may be interested in reading them:

Even though we are in the midst of an agricultural revolution and farms are getting bigger, the family farm is still the dominant type of farm in American agriculture.

The family farm has almost doubled in size in the past 10 to 15 years. Through the use of labor-saving equipment, a farmer and his son in the Corn Belt are now able to handle 250 to 500 acres of land, compared with 120 to 250 acres, formerly.

And because the farmer has better fertilizer and a greater supply of "know how" available to him, in addition to improved power, he can produce crops more cheaply. Thus he can provide the consuming public an abundance of quality

food, feed and fiber at a cost relatively lower than in any other country.

We have entered the space age in more ways than one. While pioneers are exploring outer space with man-made rockets, we on earth are running out of space.

Cities and suburban areas are expanding, new highways are taking more land as are new airports and factory sites. Wildlife groups are buying up lands to serve as wildlife refuges.

All of these expansions are eating into our agricultural lands at a rate of about one million acres every year. This means that farming has to become more efficient every year if we are to continue to enjoy abundant food supplies for our rapidly growing population.

American farmers are attacking this problem by using chemical brush eradication and irrigation to reclaim waste land. They are using modern pesticides to protect food and fiber crops against destruction by insects, diseases and other pests. They are increasing efficiency through greater use of farm machinery, improved seeds and cultivating practices.

The tremendous efforts far-seeing farmers are making to assure us of an abundant, wholesome food supply certainly deserve our wholehearted support.

Recently a special committee of the house of representatives reported that approximately 90 percent of the families purchasing meat in 1955 would have bought more meat per week if meat prices had been lower or their incomes had been higher.

Someone not acquainted with the economics of the meat business might assume that some meat was wasted—which, of course, is not true. All meat is consumed. Price regulates the flow, and price is determined by supply and demand. When producers raise and market more livestock there is more meat to sell and consume. When they cut back on marketing, as they have during the last couple of years, meat consumption declines. People can't buy any more than is produced, regardless of their income.

Actually meat prices have not increased to the same extent as those of many items. The consumer price index shows that whereas all commodities advanced 22 points since the base period of 1947-49, meat prices have risen only 10 points—eight points lower than the average of all food prices. Meat prices actually are lower this year than six years ago.

Recently, the president of one of our nation's 1,100 farm equipment companies took a look into the future for 25 years from the standpoint of agriculture.

"In the first place," he said, "we are going to have 250 million consumers in America—people to feed, clothe, and house. We aren't going to have any more land to use than we have today. Regardless of our technological advances, I can't believe that we are going to have any agricultural surpluses when our population rises to that figure."

"Also, we are going to have a smaller percentage of our population to do the work than we have today; and to offset that decline and get the added production, there is of course only one answer—further and increased use of power and mechanization."

From our current 170 million to 250 million domestic consumers in 25 years means tremendous business growth and prosperity for everyone.

The national average income per acre in 1956 from the sale of agricultural products was \$46, according to a study made for the National Plant Food Institute by National Analysts, Inc.

However, farmers who were high level fertilizer users (those who used fertilizer according to recommendations from their state agricultural colleges) had an average income of \$66 per acre, compared to \$37 per acre, for farmers who did not use fertilizer on their two principal crops.

Regardless of our politics, all of us can appreciate a statement made recently by Secretary of Agriculture Ezra Taft Benson when he said: "Too often we overlook some of the most significant factors underlying our achievements. Never in history have so many depended on so few to feed and clothe us so well."

"Think for a moment of the agricultural revolution which enables today's farm workers to produce in one hour what it took two hours to produce in 1940 and three hours in 1910."

Referring to the 7,000 additional mouths to feed every day, Secretary Benson continued: "Farmers can accomplish this miracle only by the aggregate effects of education, research, machines, plant food, specialized mixed foods, better seed and soil."

Germany Protects Pensions A system of "dynamic" pensions has been introduced in the Federal Republic of Germany. The term means that the amount of the pension is directly linked with the general level of industrial wages, thus protecting social security payments from downgrading by inflation. The International Labor Organization reported the new system and its significance.

Cotton Planting To Start This Week

Parmer County area cotton farmers, itching to get started on a "catch up" year after the poor season of 1957, will probably start putting seed in to the ground this week.

Especially in the southern part of the county where the climate is slightly milder and the soil is lighter and warms quicker, they will be active. Studies through the years show that May 5 through May 20 planting dates are considered optimum for the High Plains.

However, farmers usually pay more attention to their own conditions than to the calendar, and most will plant at the earliest moment they can. Soil temperature is a prime factor in germination, and most farmers like for it to average 50 degrees for 10 days at eight inches depth. It has been too cold for readings of this kind the past two weeks.

Plains Cotton Growers recommends a uniform stand of approximately four stalks per foot in 40-inch rows. From 20 to 30 acres of seed is recommended, but this should be adjusted according to the germination tests of the seed. POG suggest a seed press wheel and shallow furrows so that plant emergence will be rapid.

In past years Parmer County farmers have experimented with various planting methods in an attempt to increase yields. They have tried everything from skip-row planting to double-row planting with various results.

In the case of skip-row, however, Prentice Mills of the county ASC office has this to say in regard to what they will and will not measure in figuring plantings for allotment purposes:

"When measuring a field of cotton which is four rows in cotton and four rows fallow, the fallow strips must be at least four normal rows wide and long enough to amount to 1/10 of an acre. Each row must be 36 inches wide or wider."

"We ordinarily measure a cotton field from the farm or field boundary line and then deduct all areas in the field such as turnrows, ditches, roads, fallow strips and etc., which are not planted to cotton."

"We are permitted to deduct any continuous area around the outside boundary of a field, provided such area is at least one tenth chain in width and measures at least five-hundredths acre."

"We are permitted to deduct any continuous area within a field, providing such area is at least two-tenths of a chain or four normal rows wide and contains at least one tenth acre."

After many years of nickel shortage for civilian applications, nickel supplies came into close balance with demand during the last part of 1957 in nearly all areas of the free world. In fact, in the largest market, the United States, the supply exceeded the demand.

NEWS FROM THE FARM BUREAU

By RAYMOND EULER

The Parmer County Farm Bureau Weed Committee got a good delegation to the Annual Bushland Noxious Weed Conference last Thursday. Raymond Schueler, chairman of the committee, was accompanied by Carl Rea, Jack Patterson, Joe Jones, Roy Crawford, Joe Jesko J. T. Gee, Gus Schlabs and Bill Nichols. Several FFA boys from Bovina and Friona also attended. The FFA boys assist in the county weed eradication program by locating and marking location of bindweed on maps in their class rooms. Some of the weed committee met with Mr. Clark, Santa Fe representative, in Amarillo. The railroad is again pledging its support and cooperation in the program this year.

CROP. Christian Rural Overseas Program, is again being put into operation in Parmer County. Hugh Blaylock, pastor of the Friona Methodist Church is organizing this and two other counties. The Parmer County meeting will be in the Methodist church Thursday morning at 10, and everyone interested is invited to attend.

Through this program, farmers may contribute grain or cotton or dollars. For each dollar or bushel or bale contributed last year, 37 units of the commodity or dollar were sent to church representatives overseas, who distributed the commodities to hungry and needy people. This is a non-denominational program. We would like to see every farmer take some part in it this year. Besides helping the hungry with surplus foods, it lowers government stores in America. We don't know how it could be beat.

Governor Goodwin J. Knight of California discusses the California State DWI law in the April 26 issue of the Saturday Evening Post. We think Texas could use a law like it. Mandatory penalties are prescribed in the law, and the judge has no opportunity to by-pass prescribing the penalty in any case.

CONSIDER THIS: Every way of a man is right in his own eyes; but the Lord pondereth the hearts. Proverbs 21:2

County-Wide Cotton Meeting Set Next Thursday At Hub

A county-wide meeting to discuss production of more and better cotton has been scheduled for Thursday, May 8, at 8 p.m. at the Hub Community Center.

Joe Jones, county agent, says several authorities from the Extension Service have been called in to meet with farmers and ginners to discuss cotton production. The emphasis will be on "quality cotton."

Fred Elliott, cotton work unit specialist from College Station, will be on hand, as well as Freeman Fuller, entomologist, also of College Station. Dave Sherrill, district agent in charge of irrigation on the High Plains from Lubbock, will be the third authority on the program.

All three will discuss findings in their particular fields and the talks will be combined for a well-rounded outline on cotton production for profit on the irrigated High Plains. This is the first educational meeting to be held on cotton in the county this year. Usually, the county agent conducts a series of meetings later in the season when insect control is foremost in the minds of cotton farmers.

Agent Jones urges all cotton producers to attend the meeting.

Nickel and high nickel alloys play an important role in the television industry — in studio equipment and home receivers as components of cathode ray and vacuum tubes and for glass-to-metal seals.

HIGHWAY ROBBERY

Watch for hidden gas-robers—they can punch holes in your budget. Tires that are underinflated just 5 pounds, for instance, can cost you half a gallon of gasoline out of every twenty. Dirty air filters can steal 10 percent of your mileage. Poor compression, faulty plugs, and slow-acting chokes all work to pull mileage down. In oil-industry-financed "detection" laboratories all over America, researchers study and test continuously to help the motorist get the most value out of his driving dollar.

Nickel is a strong, tough and ductile metal, and does not respond to hardening by heat treatment or by the addition of carbon. For these reasons it is used extensively for electric arc electrodes for welding cast iron.

Council Reviews Plans For Events

The ten home demonstration clubs in the county, were represented when the county council met Monday, with 22 members and three visitors on hand for the discussion, according to Miss Jimmie Lou Wainscott, home demonstration agent.

Mrs. Lee Renner of Friona, council chairman, presided at the session, and in committee reports, it was revealed that 60 persons had expressed interest in a first aid course to be planned in the evenings. Twenty-three showed interest in a daytime course. The civil defense committee was instructed to check into the possibility of obtaining an instructor for such instruction.

Another topic for discussion was "mosquito control." Dr. Paul Spring, county health officer, had indicated to club members that they should stress mosquito control now. Puddles of water should be treated with oil to kill the eggs of the insects, he had informed the group. One of the projects of the home demonstration clubs is control of the mosquito, says Miss Wainscott.

On the agenda for the study in the coming months are pressure cooker workshops. Five sessions are slated, in Lazbuddie, Farwell, Friona, Bovina and Black. Times and places will be announced later, but present plans are to schedule the instruction the latter part of May and the first part of June.

The health and safety committee will contact the state department of public safety to see if it is possible to conduct driver re-education programs in the county. Further reports will be heard on this phase of work later.

In conjunction with civil defense, county home demonstration club members are urging blood typing of all club mem-

bers, and are asking other citizens of the county to perform this service. This is being done through the hospitals of the area, says Miss Wainscott.

Mrs. Ralph Price presented a report on the Texas Home Demonstration District meeting in Stratford the first part of the month. Other delegates other than Mrs. Price were Mrs. D. L. Carmichael of Lakeview Club and Mrs. Floyd Brookfield of Northside Club of Friona. Mrs. Price is a member of the Black group.

The other two delegates will present reports at the next council meeting.

Development of the electroejaculator to collect semen from bulls now makes it possible for cattle producers to evaluate the semen quality and determine how effective their bulls are in making cows conceive. During recent months semen was collected and tested from over 1,200 bulls. L. A. Maddox, extension animal husbandman, says that about six percent of the bulls checked were sterile while another eight percent had semen of such low quality that their value as breeders was very questionable.

Many builders of pleasure boats are standardizing on the use of Monel nickel-copper alloy for propeller shafts because it is strong and tough and highly resistant to salt water corrosion.

Attention: Parmer County Grain Sorghum Producers
IT WILL PAY YOU TO PLANT
TEXAS CERTIFIED SEED
IT'S THE PRODUCTION THAT COUNTS

You Get a Lot to Like When You Plant TEXAS CERTIFIED SEED
Texas Certified Seeds are available that were produced here in Parmer County last year. Since they were harvested they have been tested by actual growing, and their germination and purity is certified. You have plenty of reason for wanting to have the top producing seed planted on your farm. The best reason is that of a farmer who has planted Texas Certified Seed. "It is the production that counts."

The following varieties of Texas Hybrid Certified Seed are Available:

660	TEST
650	GROWN
620	IN
610	MEXICO

OTHER CERTIFIED SEED OPEN POLLINATED

Redlan Kafir	7078	Atlas Sargo
Caprock	Plainsman	Kafir 60
Martin	Westland	
Greenleaf and Piper	Sudan	
Sorghum Alnum

Texas home demonstration club women—over 36,000 of them—will be among the 6 1/2 million homemakers throughout the nation who will observe National Home Demonstration Week May 4-10, according to Maurine Hearn, state home demonstration leader of the Agricultural Extension Service. "Today's Home Builds Tomorrow's World" is again serving as the national theme of the week.

During the week, most of the 2,000 Texas home demonstration clubs plan special activities to highlight their programs. Special exhibits, community programs, feature stories, radio and television programs, and tours are planned to inform other homemakers and families of the purposes of home demonstration work and show its

contribution to family and community life.

The home demonstration program is planned by homemakers and carried on cooperatively by the Extension Service of the U. S. Department of Agriculture, the land-grant colleges and county governments. New research information in all phases of homemaking is brought to women and families through specialists, home demonstration agents and local leaders. Programs and demonstrations in foods and nutrition, housing and home improvement, home management, health and safety, recreation, family life, clothing, consumer buying and public affairs are developed to fit local needs and interests. Home demonstration club members also conduct special programs in civil defense and encourage and assist with local 4-H Club programs.

Get acquainted with the home demonstration club in your own county. Visit your local county extension office and take part in the special activities planned for National Home Demonstration Week May 4-10.

Parmer County Home Demonstration Club women are each planning some special club activity in their own club. Look for reports of each club activity.

CHEMISE OR NOT?

Women can look forward to a variety of silhouettes in spring and summer styles, without having to "take or leave" the chemise, according to extension clothing specialists.

Although the chemise influence is most dominant in new spring styles, women can choose classic styles that adapt some of its more pleasing fea-

tures. There are other silhouettes—a great variety of them—from which to choose the new garments for our wardrobes.

There is the two piece look, with jacket to the hip bone or shorter—the pleated skirt that stays closer to the body—the straight skirt with soft ease at the top—the classic shirtwaist dress a favorite of many years, with its new soft fullness in the bodice.

Two points of fashion are definite in all clothing this spring—all will fit a little more loosely, and all will be about an inch shorter.

Choose the silhouette that best suits your own personality—your figure and your needs.

QUESTIONS ASKED ABOUT STEAM IRONS

Steam pressing is a fast growing trend judging by the increasing number of questions on the selection, use and care of steam irons, extension home management specialists report.

For interested homemakers, specialists pass along these answers to some of the most-asked questions.

When it comes to selection, there are two main types: The flash or open water container type, which is usually filled through the front of the handle. Instructions say heat, then turn to steam. It's important to follow the instructions because the water runs through and doesn't turn to steam if not sufficiently heated.

The other kind has a boiler or sealed water container. To fill, the cap is unscrewed or removed. All the water is heated to the steaming point and continues steaming until the water is gone.

Prevent spitting and water spotting by following manufacturers instructions for filling and heating. These general precautions apply to most steam irons: Don't overfill or handle roughly, or tilt excessively. This is especially important for irons with flash or open water containers. Be sure the iron is hot before turning on the steam. Set iron at correct temperature setting. Water is likely to boil over or the steam may be too dry if the iron is overheated.

Use of tap water, unless it is naturally soft, will usually lead to a deposit of minerals that corrode the metal and close the steam passageway. Use of distilled (soft) water will prevent mineral deposits.

To open clogged vents, some manufacturers suggest the use of clear vinegar. This mild acid is effective in removing calcium, one of the minerals which collects in the iron. Fill the water container with 1/2 cup vinegar and steam 2 minutes. Let stand overnight, then rinse several times. Expect unpleasant odor.

THE HAPPY HOMEMAKER

BY JUNE FLOYD

As happens in most every well-run household, something has been misplaced. It isn't hard to figure out who had this week's Happy Homemaker column last, but where it got off to is anybody's guess. It happened like this:

At the time the copy for the column for last week was typed, a trip to Austin was being planned by the writer. With the idea in mind of keeping up with all work possible, two columns were typed at the same time.

Since a series of recipes is being run that are being copied from a recent issue of Parent's Magazine, the copy for this week's column was placed inside the magazine for safe keeping. And, if you haven't guessed by now, the magazine was promptly lost.

In all probability, the maga-

LES MEANS
SAM LEWIS (re-election)

zine and copy aren't really lost and will turn up soon. However, that doesn't solve the problem of copy for this week, so we will have something different and perhaps by next week all difficulties will have been ironed out and we will proceed.

Very often in different publications we read that specialists advise parents against making any effort to discourage children from sucking their thumbs or fingers. In our opinion, this is good advice up to a certain point.

Perhaps if the reason could be figured out and removed, the child would automatically lose the habit, but many of us are not able, even with the help of specialists, to determine what causes a child to acquire this habit.

Of course, if like many doctors say, "The child will soon outgrow it," all would be well. But what are you going to do when a child reaches the point of being embarrassed by the habit and yet is not seemingly able to stop.

Maybe if some persuasion is used or the child is encouraged to keep his thumb or fingers out of his mouth when he is young some success will be achieved and he will react favorably. It is impossible or almost impossible to force a child to stop such habits, but sometimes a little encouragement pays off in big dividends for the parents and the child.

When you start your spring house cleaning don't neglect to take all winter clothing out of the closets and have them properly cleaned and stored so that they will be wearable next fall. Too many of us just hang out-of-season garments aside thinking we will take care of them soon then forget all about it until they become moth eaten.

Edmund Schlabs, left, was recently proclaimed area sorghum growing champion at a banquet held at Plainview in honor of West Texas sorghum growing champions. His yield of 8553.60 pounds per acre was the top yield in Parmer County (irrigated) in the 1957 National Selected Five Acre DeKalb Sorghum Yield Contest. Runner-up winner was Jerry D. Bell with a yield of 7877.87 pounds per acre. Curtis Murphree placed third with a yield of 6655.87 pounds per acre. The three contestants are from Friona.

The warm weather ahead can cause poultrymen a loss in egg quality and price unless refrigeration equipment is provided in their operations, warns F. Z. Beamblossom, extension poultry marketing specialist. He points out that the cost to operate a unit that would handle a 2,000-bird flock laying 20 to 24 cases per week, including depreciation, would be only one-third cent per dozen.

A girl bought a ticket in a big lottery and insisted on number 51. It turned out to be the winning number and she received \$15,000.

A reporter calling on her asked: "What made you pick 51?" "Well, she said, "for seven nights I dreamed of number seven, and seven times seven is 51, so I bought the ticket."

Dover-Foxcraft, Me., Piscataquis Observer: "Before World War II the telephone system in Greece was run by Siemens, a privately organized and profit making German company that welcomed new customers and even paid a commission for them. After the war Siemens, as enemy property, was confiscated and the State Organization of Telecommunications for Greece was established. This transfer was immediately followed by a drop in efficiency. In a short time the firm that, as a private company, had been making enough profit to pay good salaries and commissions went into the red. . . . It again goes to prove that alert and carefully managed private enterprise is far superior to government controlled business."

Conscience is a small, inner voice that doesn't speak your language.

Heavy seas tossed the ocean liner about on its first night. Twelve passengers had gathered at the captain's table for dinner, and all appeared a little uneasy, as the captain started his usual speech of welcome.

"I hope," the captain began, "that you 12 have a pleasant crossing. It's a real pleasure to see on your 11 bright faces the cordiality you 10 feel at this gathering of nine strangers to partake of your eight dinners. After the meal, if you four care for a game of bridge, I shall be happy to entertain both you in my cabin. Or perhaps, sir, you will join me at the bar? Okay, waiter clear the table. I don't intend to eat alone."

FARMERS: ARCADIAN Uran Nitrogen

Fertilizer Is Available To Parmer County Farmers

Feed Your Crops Nitrogen The Easy Way

ARCADIAN URAN is the ideal nitrogen combination. Quick acting and long lasting Uran contains Urea, AMMONIUM and NITRATE Nitrogen.

It soaks quickly into the soil to feed crops for big yields. It may be sprayed on, dribbled on, or chiseled in. No pressure, no odor, no loss of nitrogen to the air. You can apply weed killers or fertilizer trace elements easily with URAN. Grain Sorghums and other crops do better with URAN Nitrogen whether you apply it on crop residues or sod before plow-down, as a pre-plant application on bare ground, or as side dressing after the crop is up.

Top-dress small grains, cotton, vegetables and wheat. URAN is nitrogen in liquid solution, available to crops as quickly as it soaks into the soil. It feeds roots fast and provides nitrogen that lasts to mature big yields. You get a certain amount of leaf feeding in spray or in sprinkler application. Uran is adapted to many kinds of ground and airplane applicators.

Uran metered into irrigation water provides just about the easiest way available to feed crops nitrogen.

Let Us Put URAN Down for You At a Reasonable Charge With Our Hahn Hi-Boy

Announcing **The NEW Eversman 410**

a Big Leveler at Low Cost for Farm Tractors

With Greater Length, Increased Capacity, Light Draft, and the Famous Eversman Automatic Action

Here in ONE MACHINE is an Automatic Land Leveler, Field Plane, Open Bottom Hydraulic Scraper and a complete Tilge Tool for Better Seed Bed Preparation. It gives you a big machine at a low price with greater leveling and dirt moving capacity. For large wheel and medium crawler tractors.

OUTSTANDING FEATURES—Length 40'; Blade capacity 2 cu. yds. Blade vertical travel 14". Weight 2250 lbs. Front V Smoother blade for clod busting and use on heavy, dry soil. Front Dolly Assembly for use in loose, moist and trashy soil conditions. Front End Support for ease in rehooking to tractor. Screw Adjustment on front truss for fast, simple regulation of dirt load in blade. Rear Smoother Blade adjustable to all soil conditions. The 410 is one of seven Eversman mechanical or hydraulic control models for all farm tractors.

Easy to transport from one field to another

Eversman RUBBER MOUNTED FLOATING HITCH DITCHER

The Eversman digs and cleans ditches up to 6' wide and 27" deep. Mechanical or Hydraulic control. Operated by any standard farm tractor. 4 models for trail-behind or 3-point hitch operation.

Come in today for full details on all Eversman models.
