LOCAL NEWS FROM CROCKETT

Crockett, Texas, May, 31, 1915. The closing commencement exercises of the Crockett High School were held at First Baptist Church in this city, Thursday night May 27th. The class is composed of twenty one members, nine boys and twelve young ladies. The invocation was by Rev. M. L. Shepherd pastor. The address to the graduates, and the delivery of diplomas, was by Prof. H. F. Estill president of Sam Houston Normal Institute. This address was happily received, full of excellent advice, logical, reasoning and fully appreciated by both the class and the audience present. A good many of Prof. Estill's former pupils greeted him cordially immediately the exercises were closed.

Miss Julia Spence, teacher of 4th. grade in City school, entertained the faculty at her home in west Crockett Thursday of last week. Music, readings, recitals and games were indulged in for two hours. Refreshments, consisting of cream, cake and sandwiches, were served.

Mrs. J. W. Woodson entertained the senior and junior classes Saturday night. This hostess, always a delightful entertainer, fully sustained her reputation in this function, and gave her guests a delightful evening, one that will long be remembered. The refreshments were served in courses.

LOCAL NEWS FROM AUGUSTA

(Delayed)

Augusta, Texas, May 24. Miss Fannie Mae Wall entertained quite a crowd of her friends at the Bobbit bridge on San Pedro creek Saturday complimentary to her sister, Miss Cina, who is at home for a few days visit from Alto. Those participating in the event were: Mr. and Mrs. W. H. Wall, Mrs. Beulah Newman and little son Octo, Mrs. Amanda Newman, Mrs. J. S. Long, Misses Fannie Mae, Cina and Lula Wall, Mrs. J. H. Scarbrough and children, Joe, Charlie and Sewell Wall, Coleman, Moultrie and Curtis Scarbrough, Sudie Story, Irvine Talley, Helen Long, Hugh Kirkpatrick, Frank McClenny, Olney-McLean, Fred Holcomb, Jim Wilson, Leonard Arnold, Henry Newman, W. B. Newman, wife and little daughter, Fay. The out of town guests were Mrs. Dr. Stafford and daughter and Miss Blanche Kennedy of Grapeland. Most of the forenoon was spent in an attempt to catch enough fish for dinner, but when the noon hour began to approach, you could hear the impatient remark, "I wonder if we arn't going to have any dinner!" running throughout the younger set, who were sitting on the bank of the creek engaged in divers phases of jubilant merriment. About 10'clock the ladies emptied the bounteous contents of their respective baskets out on a spot of verdant grass selected for that purpose and all partook most heartily of the gastronomic delight. Whosoever might doubt this statement just call around about lunch hour on the next similiar occasion and see if Augusta hasn't the most skilled gastronomers to be found are where. The men folks say th with a repetition of such every Saturday they will be able to survive these perilous panic times, notwithstanding the fact that Colonel Green is giving them a hard fought battle at present.

Arch Holcomb of Alto was here Saturday visiting the family of W. H. Holcomb.

Joe Wall was in Alto Friday to accompany his sister home.

Mr. Leonard Arnold of Arbor spent Saturday and Sunday in our midst.

Miss Mary Belle Holcomb went to Crockett Monday.

Rev. F. M. Trimble of Slocum preached two inspiring sermons for us Saturday night and Sunday. His subject Sunday morning was, "The Material Life of Christ." In our estimation it could have been handled no better. It is seldom we have the opportunity to listen to such an expository discourse.

The young folks had an enjoyable singing at Mr. Frank Newmans Sunday night.

Mr. and Mrs. Decker of Rusk are spending a few days with Mr. T. S. Cook's family.

Dorothy Dodd.

For an Impaired Appetite.

To improve the appetite and strengthen the digestion try a few doses of Chamberlain's Tablets. Mr. J. H. Seitz, of Detroit, Mich., says: "They restored my appetite when impaired, relieved me of a bloated feeling and caused a pleasant and satisfactory movement of the bowels. For sale by all dealers. adv

INBREEDING IN EDUCATION

"In round numbers," says a special writer for the San Antonio Express, in a recent issue of that paper, "2,500 students obtain instruction yearly within the walls of the University of Texas. Above 1,000 students go out into the state yearly, a portion with a full university course to their credit, the remainder having done one, two, or three years work in the institution.

"This leaven of advanced education being mixed and absorbed by the state each year makes incalculably for progress. There is danger of inbreeding in education, just as there is danger of inbreeding in people or in cattle.

"Suppose, for a moment, a state without higher institutions of learning to carry on the work begun in the common schools. Is it not clear that education would thus be reduced to narrow limits? The high school graduate becomes a teacher in the lower grades, and is eventually promoted to the higher grades and on to the high school. The high school then becomes officered and taught by its own graduates who have received no further training. There is no introduction of new thought, no widening of the horizon of knowledge or of methods, no new inspiration, or new ideals, and the machine's original impetus is overcome gradually by natural friction until the thing barely moves at all. It dies down like an unaided pendelum. You have inbreeding in education with all the deformities and weaknesses incident to inbreeding in the animal world.

"The higher educational in-

stitution of a state," continues this writer, "are the natural intermediaries between the common schools and the vast world of ideas and inspiration developed by the best thought and the highest paid talent in all the great educational institutions of Christendom. For example, a new and improved method of teaching modern languages is developed in some foreign country. It is the business of the higher educational institutions of a state to secure an exponent of this method direct from Germany for its faculty. This teacher teaches his students in the new method, they, in turn, go out as teachers in the state spreading the new method, and pretty soon it has permeated the whole educational system of the state. This is merely an exam-ple. It may not be a new method, but a new and original thought, or a new store of knowledge that is communicated in the same way. The point is that the higher educational institution maintains touch with the world of ideas and transmits new and advanced methods and fresh knowledge throughout all of its dependent institutions. It is as important to the vast school system of the state as the switchboard is to the telephone exchange. It is 'central' for the communication of new ideas, new methods, fresh knowledge, vaster inspiration."

DISTINGUISHED EDUCATOR.

Dr. Robert Emory, an educator of note and one of the early presidents of Dickinson college, was born 100 years ago in Philadelphia. He was the son of the Rev. John Emory, a bishop of the Methodist Episcopal church. Robert Emory was graduated from Columbia in 1881 and for two years studied law. He held the chair of ancient languages in Dickinson college from 1884 until 1839, resigning in the latter year to bes come a Methodist minister. In 1842 he returned to his professorship at Dickinson. In 1845 he was elected president of the college and continued to serve in that capacity until his death, which occurred while he was visiting in the city of Baltim

THE SERVICE FIRST STORE

THE GRAPELAND MESSENGER

A. H. LUKER, - - Editor and Owner

Entered in the Postoffice at Grapeland, Texas. very Thursday as Second Class Mail Matter.

THURSDAY, JUNE 3, 1915

COMPLIMENT TO GRAPELAND

We are told that Crockett is a good town, yet one would never holes in the ball park fence. know it by looking over the two papers published there. Both have been recently forced to the largest amount of advertissheriff's sales. It looks as if the really sensible thing for these editors to do would be to consolidate their plants and move them up to Grapeland, where the merchants are reaching after trade through the medium of the splendid little paper published there, the Grapeland Messenger. -Lufkin News.

The advertising columns of the Messenger are the arrows that point to better buying. Follow the arrows. You will not go wrong.

We have just heard how woman got her name. When the Creator made her he said, "woe man." In the transition of languages, the "e" has been dropped.

Uncle Sam is not hankering for a fight, but on the other hand, should the inevitable come he would not slide over the back

remember that a good first aid shows how little people do and editor of the Lovelady Home to matrimony is to be skilled in how "self" stands in the way of the art of handling frying pans community building .- Farm & and wielding a broom.

The Fable of the Stenographer and the Pleb an

By RaMel

Once upon a time in a city that MORAL-White collars add was populous enough to support more to appearance than to pay a big-league ball team there lived checks. a young man who earned almost a living by copying his employstationery by means of a type writer. This young man was always draped in the latest creations of the tailors' art. His collar was invariably the latest thing in neck decoration, and his cravat followed suit. His haircut bore semblance to those one would expect to see at a barbers convention, and his handsome face was adorned by a cigarette.

Every morning, much to his was forced to ride down town on the seven-fifteen car with another young man who never wore collar and who generally wore form with our hero, too, and the cob pipe he smoked bespoke but his repulsive fellow-commuter often needed a shave.

Now the fashion-plate was often heard to make slighting remarks And we suppose, Edwards, about the Plebian, such as "low brow," "rough-neck," "bruiser," ing of "what is what," and that and the like. But the Plebian there will be no misunderstand- never happened to hear them, so the stenographer kept on living.

On Saturday evening, it came to pass, that both of these young men stopped at Jerry's place to partake of refreshments and to cash their weekly pay checks. They stood side by side and surwonderment in the back bar, in community building.

while Jerry himself served them. The rough-neck exchanged his check for a schooner and twenty six, ninety-five, while the pretty stenographer received a highball and eleven, eighty.

Only One Entirely Satisfactory.

"I have tried various colic and diarrhoea remedies, but the only one that has given me entire satisfaction and cured me when I was afflicted is Chamberlain's Colic, Cholera and Diarrhoea Remedy. I recommend it to my friends at all times," writes S. N, Galloway, Stewart, S. C. For sale by all dealers.

The remains of C. A. Beeson, who died at his home at Augusta Sunday, were brought to Grapepeland Monday morning and shipped to Lovelady for interment. Mr. Beeson formerly lived at Lovelady and had been a resident of Augusta but a short time. He was mail carrier on the rural route recently established from Augusta to Weches. He is survived by a wife and four small children.

Rev. H. E. Harris, formerly pastor of the Baptist church in this city, attended the fifth Sunday meeting and filled the pulpit at the Baptist church Sunday morning and night, and his many friends here were delighted to hear him preach again. Just here we wish to thank Bro. Harris for the kind words spoken in our favor in his opening remearks Sunday morning, when he admouished the people to be loyal to their church, school and local paper, as these three instiveyed each other with much tutions were the greatest factors

NEW PROSPECT **NEWS ITEMS**

May 30.-We had a good rain last Wednesday night, which was needed, and everybody was glad to see it. Crops are looking fine now, and the farmers have got lots of work to do, though most all are getting along well with their work.

Sam Parker, who got his leg broke a few days ago, is getting ing about the rainy weather and along fine at this time, but it about the dry weather, etc. will be quite awhile before he can walk again.

The children's day program was carried out today as published last week. The opening address was delivered by Mr. Bob Parker. There was plenty of dinner and everybody had a nice time.

Ford Newman and family visited J. T. McKnight and family

morning.

The patrons of this school have voted a 25c school tax for the benefit of the school and if nothing happens they want to buy some nice desks and seat the building. The trustees have employed Mr. A. B. Milliken and his sister to teach our next school, so we are expecting a good school. If the school children of today could look back thirty years and see what the children of that day and time had for school houses and desks, they would open their eyes in amazement. In my school days, I had to walk four miles and when I got to the school house, or what should have been a house, there was no nice, warm, room for me-just a log house with a great big door in one side and nearly all of one end for a fire place and all the cracks left open for windows. But one night the house burned down, then we got a better one. So I would say to every school boy and girl, take advantage of your opportunities and strive to get an education.

adv enough planted to make enough N. Leaverton.

to do them next year. As for myself, my feed crop is just twice as large as it was last year and, of course, we are working on that sweet potato patch.

Big Jim.

ROCK HILL **NEWS ITEMS**

Rock Hill, May 31, 1915.

The people have been quarrel-

Now the only things they have to quarrel about is the grass. Crops are so small and sorry for the time of year, but probably they will move now.

Our debating society met the fourth Saturday night.

Every thing was very nice. The dialogue, "The Patent Right Agent," was good. We must not forget the debate, either! The subject was, "Resolved, that a pretective tariff is best for the R. A. Parker went to Galves. U. S. A." Of all the debates we ton on business last Friday have had at this place, this was night, returning home this the most interesting. The negative won.

> A good many people went from here to the Parker reunion the fourth Sunday. They report a nice time and plenty of dinner.

> Mr. and Mrs. A. H. Streetman's baby has been sick for some time. The Doctor came to see it several times. We trust that it will soon recover.

> Mr. and Mrs. P. L. Cook, Mrs. C. M. Streetman and Mrs. Jim Taylor have been visiting sick relatives near Percilla.

> We will say this to the farmer: Stop and ask yourself if you have plenty of corn, hogs, cattle, peas and etc., to supply yourself another year? If not, now is the time to rustle it.

> > Little Joe.

To Sleep Well In Summer.

Of Course You Are Going to See the Exposition

The World in Epitome Shown by Displays in the Vast Exhibit Palaces at the Panama-Pacific International Exposition.

Today the great Panama-Pacific International Exposition at San Francisco is being widely exploited throughout the world by the millions of sightseers who have visited the exposition since its opening on February 20th last as the most beautiful, comprehensive and interesting universal exposition that the world has ever known. The wonderful exhibit palaces house the treasures of the earth, while the grounds, planted to millions of rare bulbs, are a gorgeous mass of color and fragrance. To the visitor entering the gates for the first time, either by night or day, the scene is certain to hold the newcomer spellbound, as the vast panorama unfolds bit by bit before the gaze and the eye wanders from one beauty spot to another in an endless chain of amazing surprises. Entering the main gate at Scott street, for instance, the visitor sees the great Fountain of Energy directly before him. its giant sprays sparkling and flashing in the light of the warm California sun by day, or assuming the appearance of masses of flowing flames by night under the powerful beams of the great batteries of searchlights trained upon this work of art. As the spell is lifted the eye falls upon the Tower of Jewels, the great center piece of the exposition, and again aftention is arrested until the eye has conquered the dizzy heights of this gem-studded tower, every cornice and figure sending forth its share of dazzling lights.

The world's advance in all branches of art, science and industry is amazingly portrayed in the exhibits. Among the electrical exhibits, for example, is the Audion amplifier, invented by Lee De Forest. Through this invention the visitor in the Liberal Arts palace is enabled to converse over the long distance telephone with his relatives at the farthest section of the Atlantic coast and may hear the voice of the speaker in greater volume than was actually given into the transmitting telephone. The intensity of the sound is increased by passing through heat waves. Today it is possible for an orator in New York city to address through the telephone a large audience at San Francisco, the sound being increased so that it is of power great enough to fill a large hall. This single advance in the development of the telephone is paralleled in hundreds of other lines. The railroads have made low round trip rates and ample and reasonable accommodations are to be had in San Francisco and the adjoining cities.

ARTS AND CRAFTS OF 10,000 YEARS AGO SHOWN IN THE TEHUANTEPEC VILLAGE AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION

The Tehuantepec village on the Zone at the Panama-Pacific International Exposition is a bit of the oldest civilization of the world brought to San Francisco from the country of the Aztec ruins in Central America. Beautiful carpet weaving is shown, together with onyx cutting, clay and wax modeling, ancient dancing and singing, pottery making and coloring and other arts characteristic of the people. A typical garden is open to the visitor in the concession in which is to be seen the landscape art of this people.

Some Marvelous Exhibits at the Panama-Pacific International Exposition

Exhibits in Agricultural Palace at the Panama-Pacific International Exposition Show Caterpillar Gaining Favor Over Lug-wheeler Tractors in Farm Machinery.

An observer in the Agriculture Palace at the Panama-Pacific International Exposition at San Francisco cannot neip noticing, in the display of agricultural power machinery, the almost complete supersedence of the new design of power tractor, known as the caterpillar, over the cumbersome. unstable, high-wheeled engine of a few years ago. There are few of the old models on exhibition, while the caterpillar principle has been applied to almost every type of engine for agricultural purposes.

The caterpillar proper is a heavy sheet metal chain, varying in width from ten inches to two feet according to the weight of the engine, which passes around two heavy sprocket wheels like a belt. These wheels revolving, pass the chain about them, the lower part moving backward, with the weight of the engine resting on the broad surface of the chain between the two sprockets.

An engine of this type can be operated on ground soft enough to mire an ordinary farm wagon.

Duplicate of the Roosevelt African Shotgun.

A duplicate of the shotgun which Col. Theodore Roosevelt took with him on his African trip, a gun constructed expressly for him by an American armorer, is on display at the manufacturer's exhibit in the Manufacturer's Palace at the Panama-Pacific International Exposition, San Francisco, The gun cost its illustrious owner \$360, and its beautiful design, graceful lines and wonderful inlay work would justify the expenditure to any lover of fine pieces. The stock is elaborately hand carved, the barrels and lock are hand engraved, and the lock is inlaid with a hunting scene in gold. The barrels are of the finest Krupp steel. Before starting on the trip the ex-president wrote to the makers: "I really think it is the most beautiful gun I have ever seen. I am almost ashamed to take it to Africa and subject it to the rough treatment it will

The left barrel is choked and the right open. It is cored to shoot either buckshot or a single ball.

In a group in this Palace are displays by four of the world's greatest manufacturers of sporting arms, which form an exhibit which attracts hun-dreds of sportsmen. Each display is in charge of a firearms' expert.

Pearl Culture a New Industry. Among the interesting exhibits of

the Japanese in the Manufacturers' Palace at the Panama-Pacific International Exposition is a demonstration of the methods and results of pearl cultivation in the far East. The displays of this cultivated product, showing hundreds of pearls which until pearl culture was placed on a commercial basis a few years ago would have been the possessions of royalty, will delight any lover of beautiful gems, and the methods of production will prove interesting to any observer. Though pearl culture has become a thriving industry in Japan, attempts to reproduce it in other parts of the world have yielded but meager

The successful method of propagation was evolved by the Japanese scientist Kokichi Mikimoto, who discovered a species of oyster which produced the pearl on the surface of the shell. Though the finding of the oysters and inserting the nuclei, then waiting for the pearl to grow to a commercial size may seem a simple process, the fact that it has not reduced the price of the gems, even to that of the most expensive imitations, shows that it is beset with many diffi-

Daniel Webster's Plow at the Panama-Pacific International Exposition.

One of the most valuable exhibits commercially, in the Agricultural Palace at the Panama-Pacific International Exposition, San Francisco, is an ancient plow displayed in the Massachusetts exhibit, and forming a striking contrast to the highly-complex modern machinery displayed on the acreage of floor about it.

The plow owes its distinction to the circumstance that a hundred years ago Daniel Webster's youthful hands guided it along the furrows of his It was drawn by a yoke of oxen and daylight to dark.

Radium Used to Promote Plant Growth.

Some of the remarkable properties of radium are being demonstrated by an exhibitor in the Liberal Arts building at the Panama-Pacific International Exposition, San Francisco, in connection with a new invention making medicinal purposes.

Demonstrating the power of this mineral promoting metabolism a numwith and some without the aid of radium, are shown. Those in the radioactive soils are seen to be growing much more rapidly than those in com-

appearance.
This inventor has found a process of impregnating terra cotta bricks with radium-bearing minerals, and

these small bricks placed in water are said to give it remarkable curative properties. The porous bricks last almost indefinitely, losing only half their potency, it is estimated, in 1,800 years. Since the discovery of this mineral it has been found that many celebrated waters, as Carlsbad and Baden Baden, owe their health-giving properties to radium. The inventor claims that his process produces in ordinary waters the qualities of these famous springs.

The radium ore used in the manufacture of radioactive terra cotta is known as carnotite, a formation found mainly in Colorado and Utah, and now producing three-fourths of the world's radium. The European which the famous European springs are impregnated, is also displayed.

Most Rapid Photographs Ever Taken.

The most remarkable set of speed photographs ever taken are a part of the war department's exhibit in Machinery Hall at the Panama-Pacific International Exposition, San Francisco. They are pictures of a shell from a 12inch coast defense gun in flight, the set including the various phases of the flight beginning just as the great projectile pokes its nose out of the muzzle of the gun.

The pictures were taken with a lens having an exposure period of one five-thousandth of a second, this being the fastest shutter ever manufactured. The exposure at the proper time in the flight of the projectile was made by breaking an electric circuit in a wire stretched across the trajectory at the desired point and connecting with the shutter.

One picture shows the shell halfway out of the muzzle before any smoke and gas has escaped. Another was taken when the shell was two feet from the muzzle but hidden by a heavy ring of smoke. A third shows father's farm near Marshfield, Mass. the shell in flight a hundred feet from the muzzle. The photographs are so if the future peer of American ora- perfect and the exposure so rapid that tors and statesmen could turn an acre scarcely any blur is perceptible They of sod a day he had to work from were taken at Fortress Monroe, Va., under the direction of Capt. F. J. Behl of the coast artillery corps and head of the department of enlisted specialists at the Coast Artillery school at Fortress Monroe.

Indigestion and Constipation.

"About five years ago I began possible the radiofying of water tor taking Chamberlain's Tablets until it is used. after suffering from indigestion and constipation for years withber of young plants, some existing out finding anything to relieve me. Chamberlain's Tablets helped me at cace and by using them for several weeks I was mon soil, and to have a more healthy cured of the complaint," writes Mrs. Mary E McMullen. Phelps, N. Y. For sale by all dealers.

The heart of man is a small world in which the soul awhile must dwell,
And in this earthly habitat create a
future heaven or hell.—Dodson.

Adversity is one of the good things that is best appreciated after it is

GREEN TOMATO DISHES.

The first hard frost usually kills ants, leaving larg bers of firm fruit in various stages of growth. Those who have tried the experiment of pulling up the vines, when a frost is imminent, and storing them with the fruit left on the vines,

tomatoes until Christmas, Nearly all housewives like tomatoes in various ways for the winter's supply of pickles, preserves and the like.

say one may have ripe

Fried Tomatoes.-Cut green tomatoes in thick slices without peeling, soak in salt water for an hour, drain and sprinkle with pepper and dip in beaten egg, roll in crumbs and fry in hot butter until a delicate brown.

Japanese Chowchow-Take a dozen medium sized green tomatoes and the same number of pickled limes, put both through a meat chopper, using the medium cutter and removing the seeds from the limes. Add six cupfuls of sugar and cook slowly for three hours. Put into glasses and cover as one does jelly.

Green Tomato Mincemeat .- This is a large quantity to make before you are sure you will like it, so the recipe is best divided. Take a peck of green tomatoes, slice and sprinkle with salt and let stand twenty-four hours. Then drain and chop fine, add two dozen apples, chopped fine, five pounds of brown sugar, three pounds of seeded raisins, two pounds of chopped citron, one tablespoonful of cinnamon, one teaspoonful each of cloves and grated nutmeg. Add a pint of vinegar and cook all together for one and a half hours, then put away as any mincemeat. It will keep

Green Tomato Pie-Peel and slice the tomatoes and pour boiling water over them and let stand urtil cool, then drain. Line a pie plate with pastry; fill with the tomatoes, a half cupful of sugar, a tablespoonful of lemon juice, one of water, sprinkled with flour and dust with cinnamon; cut bits of butter over the top, cover with crust and bake.

Nellie Maxwell

WORKED HIS WAY THROUGH UNIVERSITY OF TEXAS

Jack G. Grissom

That there is no boy in Texas so poor who, having the ambition, the health and the will, cannot obtain a University education, is demonstrated by J. G. Grissom, whose photograph in reproduction appears above. Mr. Grissom will receive this year two degrees from the University of Texas, the degree of Bachelor of Arts and the degree of Master of Arts. He has earned himself every penny he has spent at the University. But for the munificence of the state in supporting a University it would be impossible for poor boys to secure a University education. Handicap young Grissom, for instance, with a payment of \$200 per year for tuition, and he would be unable to attend the University. The founders of the Republic pointed out this fact, that whereas the rich can send their son and daughters anywhere, to the East, to Europe, or to the Orient, to secure an education, the children of the poor must depend upon state supported institutions of higher education. Therefore, the University of Texas has been truly called "the poor man's school," since above half of the students within its walls are either in whole or in part self-supporting, and fifty per cent of the remainder would be unable to attend a university that demanded tuition-fees.

NATIVE LIFE OF THE FAR PACIFIC

The photograph shows the bell of the lateresting Samoan village the Panama-Pacific International E: position at San Francisco. The struc tures in this village, comprising th native thatched huts of the Samoat or as they were formerly called, th Navigator islands, were brought in tact from the native villages and art absolutely faithful in all their fea-tures. There are many native families living in the village who for the edification of visitors perform the aquatic feats in which the islander excel, and dance the rhythmic nati dances. The life of the people of th Pacific ocean is wonderfully illus trated at the Exposition, and of all the races none are more interesting than the Samoans who exhibit many traces of Aryan descent. No Exposition visitor should fail to see these unique tribespeople.

STENOTYPEWRITING: The Stenographic Marvel of The Age.

Stenotypewriting writing of the Byrne Simylified Shorthand with the ordinary typewriter instead of with a pencil. The principles of the Byrne Simplified Shorthand have been applied to a system of writing known as Stenotypewriting. By this system the stenographer is able to take dictation on the Underwood, Royal, Oliver, or any other make of typewriter with greater speed and accuracy than is possible with a pen or pencil. Just as the typewriter has displaced the pen and pencil for correspondence in the business office, it will eventually displace the pen or lives the life of a grouch, dies the pencil for reporting in the courts and handling the dictation of the business office.

Our Prof. Byrne again takes the lead in the stenographic art, being the firt author to put his system of Shorthand into type and make it thoroughly practical on the typewriter. This however, was not accomplished in a day; it took years of hard work and much careful study and

Students enrolling in the Tyler Commercial College may take up the study of the Byrne Simpliplified Shorthand, either to be written with a pencil or on a typewriter, as they prefer. However, anyone who has examined the merits of Stenotypewriting or the writing of the Byrne Shorthand on the typewriter will never want to spend the time necessary to learn to write and read any system of shorthand that is to be written with pen or pencil.

Stenotypewriting is as legible as print, because it is print. Every letter is made mechanically correct. The Tyler Commercial College will control the teaching of Stenotypewriting in this part of the country just as it controls the teaching of the other Byrne systems, which have made the Tyler Commercial College famous, and made it the largest commercial training school in America. If you want to get the most modern method of taking dictation or doing reporting it will be necessary to attend the Tyler Commercial College. Our work in Stenotypewriting is absolutely a money-back guarantee proposition; any student, who, at the completion of the course, is not satisfied that it is better than any system of shorthand written with a pencil or pen, upon request, may get his tuition back.

Stenotypewriting is learned in less time than shorthand, is more legible and rapid and the day's dictation or reporting is taken with much less fatigue. Students of Stenotypewriting make better typewriter operators it if you apply Chamberlain's perfected? We have the than those who study shorthand, as all the work of note taking done with a pencil in shorthand is done on the typewriter in Steneotypewriting, thus giving arms and shoulders. I got a doubly the amount of practice on bottle of Chamberlain's Liniment the typewriter while taking the course. We make no extra charge for stenotypewriting, the cost of the course is the same as that of adv. shorthand, fifty dollars, for a complete scholarship and seven dollars for books and supplies.

Write for free catalogue, state course interested in, Tyler Commercial College, Tyler, Texas.

RIPPLES ON THE

1 53

Reynard, May 31 We are able for the first time this year to report crops of all kinds flattering, and should the season hold out, will make a normal corn crop, and since the last rain it is "humping."

Rev. Henderson filled his appointment Saturday night and Sunday; had a good crowd at both services. The Stevens crowd sure does add to our singing.

P. L. Fulgham made a trip to Crockett Tuesday evening in his car and back home long before night without a bobble. C. H. Beazley came out with him.

William and Harry Beazley are spending awhile on the farm.

Our river bottom people are getting things shaped up again, and hope they will come out al right on the home stretch.

Miss Pearl Ady has been employed to teach for us the coming term, and think all will be well pleased. She is no stranger in these parts.

Mrs. Frankie Dunham of Cleburn is visiting her brother, Geo. Allen.

They say the mosquitoes are something fearful in the bottoms and not much pleasure to fish, but that does not worry us just

We are anxious to see some roasting ears and speckle peas.

Every white person on the W F. West farm was at Sunday school Sunday. They laid aside everything and hitched up "old Beck and John" and come.

ALL THE NEWS FROM WANETA

Mr. Bedsel of near Slocum died at Palestine Friday and was buried at the Muse Cemetery Saturday afternoon. We extend sympathy to the bereaved.

Miss Eulalia Lively of Grapeland is visiting relatives here for a few days.

Several of our people attended the Fifth Sunday Meeting at the Knighton school house Sunday. All report a nice time.

Miss Ruth Barnes was the guest of Miss Mary Lively Friday night.

Mr. Teems and wife visited J. E. Harrington and family Sunday.

Mr. John Alf. Rich entertained with an ice cream supper Friday night.

Mrs. M. F. Barnes visited her daughter, Mrs. Ross Sammons, a few days last week.

Mr. Will Moore and wife visited Mr. Shoemaker and family Sun-

Charlie Hendricks and wife were Percilla visitors Saturday night and Sunday.

Miss Eunice Edmondson was the guest of Miss Ruby Herrington Sunday.

Mr. Bruce Johnston, who has been visiting homefolks here for several days, will leave Tuesday for Huntsville to attend the summer Normal.

TRINITY RIVER STOMACH TROUBLE FOR FIVE YEARS

Majority of Friends Thought Mr. taking other medicines. I decided to Hughes Would Die, But One Helped Him to Recovery.

Pomeroyton, Ky .- In interesting advices from this place, Mr. A. J. Hughes writes as follows: "I was down with stomach trouble for five (5) years, and would have sick headache so bad, at times, that I thought surely I would die.

I tried different treatments, but they did not seem to do me any good.

and all my friends, except one, thought I kept in every family chest. would die. He advised me to try Thedford's Black-Draught, and quit

take his advice, although I did not have any confidence in it.

I have now been taking Black-Draught for three months, and it has cured mehaven't had those awful sick headaches since I began using it.

I am so thankful for what Black-Draught has done for me."

Thedford's Black-Draught has been found a very valuable medicine for derangements of the stomach and liver. It is composed of pure, vegetable herbs, contains no dangerous ingredients, and acts gently, yet surely. It can be freely I got so bad, I could not eat or sleep, used by young and old, and should be

YOUR LOCAL PAPER

The local newspaper promotes the interest of the town in which as the bulwarks of defense it is published to such an extent that it becomes impossible to place an estimate upon its worth. There is no enterprise that does so much for the corporation or news papers of the town and the individual citizen as the country should receive the suppaper. It stands opposed to the port of the public at large in a town knocker, the town kicker, very liberal degree, for it is the town fanatic and the town drones. It stands for action as ness enterprise for the communagainst dry rot. It stands for ity. -Ex. progress as against stagnation. It is ever feady to combat the schemes of visionaries and as ready to aid the comstructive plans of the wise and levelheaded citzens. It is for the upbuilding of the community. The paper has not yet come into its own, however, because it is never appreciated to the extent of its worth by the people at /large. Yet when battles are to be May, 31, 1915. fought for town or country a rush We had a nice rain last week. is made to find the loyal editor Crops and gardens are looking ready, frequently without hope of reward. Many other enterprises are encouraged by a bonus, but rarely is the newspap. follows the use of Prickly Ash er offered any help and still more Bitters. It purifies the blood. often not given the support it is liver and bowels and makes life

benefactor when they fail to recognize the local paper as such.

The editor and his paper stand against the attack of evil of designing schemes affecting the good of the individual or the town. For these and other reasons the really the most important busi-

The result of the Terre Haute political trials shows that there are some pretty smooth rascals in the democratic party, and that all the crooks are not in the republican ranks. The difference, however, between the two parties seems to be the fact that as soon as the democrats find out a member of their organization is a crook and a grafter they put him in the penitentiary, while under similiar circumstances the repub licans put him in office. -Harpoon.

Use Good Paint

A coat of paint—good paint—saves ten times its cost by protecting against weather and decay.

Pain: your house, porch and lawn fence with Acme Quality House Paints. They will stand between the wood and the weather and protect and beautify your property better than any other paint.

ACME QUALITY

-our trade mark -on any paint or finish means that it's the best that can possibly be made for the purpose.

We have paints and finishes for all surfaces-houses, barns, roofs, floors, carriages. In fact, if it's a surface to be painted, enameled, stained, varnished or finished in any way, we have an Acme Quality Kind to fit the purpose.

We will be glad to show you colors whether you buy

GEO, E. DARSEY

A NEW SUIT COSTS MONEY

Bring your old ones to us and let us clean, press and repair them.

We make them look like new suits and SAVE YOU MUCH MONEY.

This is the economical way and economy is the short cut to wealth.

M. L. CLEWIS
