VOLUME 5—NUMBER 46.

FRIONA, PARMER COUNTY, TEXAS, FRIDAY, JUNE 6, 1930.

\$1.50 PER AN

## HAIL INSURANCE WOULD BE CANCELLED BY FARMERS ON ACCOUNT OF POOR PROSPECTS

Owing to the extended drought in this locality, with the probability of no wheat in many of the fields, there has arisen a demand for the cancellation of hail insurance policies by some farmers.

On account of this demand, Mr. Dixon of Amarillo, representing an old line company, was here first of the week looking after such a condition. His company offered the proposition to cancel its policies on a payment of fifty per cent of the premium. Mr. Dixon did not know whether any of his policyholders would be willing to cancel on that basis or not.

### ELEVEN-MILE NEWS

Every body is invited to attend a surprise party at Bippus school house June 13.

Mr. Stin and family, Bippus, took dinner in the Geo. Wells home Sunday.

L. M. Turner and son were in Hereford Saturday.

Bad weather kept many from the Bippus ice cream supper Saturday night.

Temple Lynch is working on Billie Stovall.

Mr. Pryor, Adrian, preaches at Bippus Sunday night, June 8.

Fred Collet visited the Williams home Sunday.

Leslie Willcock spent Wednesday in the Whitson home.

Mrs. L. M. Taylor and children and her father, Mr. Wright, were in Hereford Wednesday.

J. V. Wells visited his sister, Mrs. Ed Mackie, Saturday.

Mr. and Mrs. G. W. Wells were shopping in Hereford Saturday.

Mrs. Fred Collet is visiting her mother in Dallas.

R. C. Valentine is at the bedside of his father in Illinois, he having been reported very ill.

J. W. Puckett of Claude was at his ranch this week.

A large number attended a party at the Mackie home Friday night.

Fred Collet and Ben Bates have built a new house on their land.

Mr. and Mrs. Wilder and children of Progressive visited the Turner home Sunday.

Mr. and Mrs. Ed Mackie visited the G. W. Wells home Sunday.

A program and dinner were enjoyed at Valentine the last day of school.

Messers, and Mmes. G. W. Wells, Ed Mackie, L. M. Williams and daughter, Eunice, shopped in Hereford Monday.

An all-day singing and dinner on the ground at Adrian last Sunday was well attended.

Mr. Wright, Fort Worth, is visiting his daughter, Mrs. L. M. Turner.

Tom Amen of Nazareth visited his sister, Mrs. Whitson, and took his father, John Amen, home with him.

L. M. Williams and family visited the Turner home Saturday evening.

Mr. Wright, Miss Mildren Turner and Henry Turner were in Hereford Saturday.

Frank Annen and two friends of Nazareth spent Tuesday here with his father, John Annen.

### A CORRECTION

Mrs. J. W. Cotton and Miss Jewel Murry of Amarillo, daughters of T. H. Murry, who is confined to his bed at the home of his daughter in that city, were in Friona Tuesday and made the Star an appreciated visit.

It appears from the information given by Mrs. Cotton that the Star was in error in the article in last week's paper regarding Mr. Murry, wherein he expressed his gratitude to the people of Friona and appreciation of their kindness. This should have read Bovina instead of Friona.

According to Mrs. Cotton's statement, people of Bovina remembered her father with substantial financial assistance in his time of need, and with bouquets of flowers, and it was to them that his words of appreciation were directed.

The communication did not specify any particular group and knowing he had a large circle of sympathetic friends here supposed they were the ones referred to.

Mrs. Cotton stated that her father is yet in a critical condition and delighted to have friends call and help him while away his hours of suffering.

### VISITORS FROM BELLVIEW

W. D. Monroe and C. W. Kinch of Bellview, New Mexico, were business visitors in Friona Saturday and made the Star office a pleasant social visit.

### HOME FROM COLLEGE

A number of Friona's young people who have been away attending schools at various places have returned for the vacation. Among these are Miss Mary Lou Truitt and Hadley Reeve, W. T. S. T. C. Canyon, Miss Mary Reeve, who has been attending that college, is spending a few days in Wichita Falls before returning.

Edwin Johnson, Texas Tech, has returned, while Frank Spring, also a student there, remains until August, when he expects to receive his degree.

Miss Margaret Goodwine, C. I. A., Denton, has returned, Mrs. Goodwine who spent the winter with her, returning to her home here for the summer. Miss Alice Guyer of the same institution, returned Sunday night with her mother and brother and Miss Esther Reeve who drove to Denton Friday, and Miss Kathryn Crawford, also a student in C. I. A., returned home early in the week.

### TALKIES ABOUT JUNE 15

Friona is soon to have a moving-talking picture theatre equal to any in the land, according to H. P. Eberling, manager of the Marvioletta theatre, who announces he has arranged with the P.C.A. Photophone for installation of sound reproducing equipment for his show house. The equipment will be shipped from New York immediately and installation engineers will be on the ground for installation when it arrives. He made this selection only after lengthy experiment and investigation, and in his opinion bought the best type of equipment available.

This equipment has been installed in some of the largest picture theatres in the land, which went far to prove its worth to Mr. Eberling. He hopes to be able to announce the initial performance at an early date and will keep his patrons informed through the columns of the Star as to when the new equipment arrives and is ready for operation.

## Right-of-Way for 366 Route About Lined Up

(From The Hereford Brand)

The procuring of the extra 40 feet of right-of-way for federal highway 366 through Deaf Smith county is progressing nicely, according to L. Baskin, chairman of the highway committee for the chamber of commerce. Ninety-eight per cent of the property owners reporting to date have agreed to donate their land for the road, and only two men have said they will expect pay for the acreage taken over.

Those who are giving their land will stipulate that their fences be set back without cost to the property owners. Most of the landowners are taking the position that the benefits accruing from a paved highway through or adjacent to their property is much greater than the damage.

"Of course, it is generally known," said Mr. Baskin, "that the state and federal governments have the right of eminent domain. When the demands of property owners become too unreasonable, blanket condemnation proceedings are instituted and every land owner along the route is made a party to it. This obviates the necessity of separate suits and simplifies the whole proposition."

State highway engineers and surveyors will likely be on the job within a short time, laying out the most desirable route and making estimates.

### PLATEAU SINGERS TO LOCKNEY ON JUNE 14-15

Lockney.—The Plateau Singers, reputed to be the largest group of sacred song followers in the world, will hold their annual convention in Lockney June 14 and 15, when more than 10,000 singers from 25 West Texas and Eastern New Mexico counties are expected to be present at the meeting. The Lockney convention will be the 9th annual meeting of the organization, the convention having been held previously in Plainview, Canyon, Hereford, Littlefield and Amarillo, Texas; Rowell and Clovis, New Mexico.

### FORMER FRIONA PASTOR DIES

Many of the older residents of Friona and community will remember Rev. W. H. Hurbut, who was perhaps the second pastor of the Congregation church after its organization here. He was highly esteemed and loved by the people here and had been gone 14 years, for which reason only a comparatively few remember him. At the time of his death he was residing at Overbrook, Kansas, where he had been pastor several years and death was caused by internal cancer. Information of his death was received by a letter to Mrs. O. C. Axtell, Spring Lake, where he was also a pastor, the letter coming in answer to an invitation sent Rev. and Mrs. Hurbut to attend the Community Home Coming there last Sunday. His death occurred May 21. Rev. Hurbut was a man of noble character, an ardent servant of his God and the community wherein he labored will suffer from his passing.

### COMMENTS ON ROAD

T. H. Hughes who has just returned from a trip to Central Texas, stepped into the Star office Wednesday morning to announce that the worst and roughest roads he encountered on his trip lay between the Goodwine farm on the south side of town and the John White home on the north side.

Mr. Hughes seemed to be quite serious about his announcement, without any desire to flatter anyone.

### VISITING PLAINS RELATIVES

Clyde Powell and family of Greenville arrived here this week for a few days visit with his brothers-in-law, J. D. Hamlin and E. R. Furlong and families. Mr. Powell is fairly well acquainted with the Plains country, he having been here on former occasions and likes the country well.

### SOCIAL PURITY SERVICE

A thrilling and soul-stirring appeal to mothers and daughters on the subject of scientific observation—research—scriptural admonition and counsel.

The mothers and daughters of this community are urged to attend this meeting, which will be held in the high school auditorium Sunday afternoon at 2:30. Minimum age, eleven years.

Immediately following this meeting and beginning at 3:30, Minister L. C. Chapin will deliver a special sermon.

### J. B. LANG AND FAMILY HOME

Mr. and Mrs. J. B. Lang and family who have been residing in Denton since Christmas, returned to Friona Tuesday. Mr. Lang removed his family from Friona during the winter to Denton where his daughter, Miss Louise, was attending the C. I. A., and the family made their home there until school closed last week. They expect to remain in Friona for a short while looking after business matters after which they will remove to their former home at Sarasota, Florida.

### HAS FRACTURED RIBS

While doing some repair work at his home Thursday morning, J. B. Lang fell from a ladder and fractured three ribs. A physician was called and medical services rendered and while the wound is painful and Mr. Lang will be confined to his home for some time, it is not considered especially serious. His friends wish him a speedy recovery.

### CHURCH OF CHRIST REVIVAL

The series of meetings now in progress at the high school building are being well attended. The sermons are illustrated with blackboard drawing. A fifteen minute Bible drill is given each evening for the benefit of children and young folks.

The following subjects have been announced:

Saturday evening, "The most serious disease known to the human family," Sunday evening "The eyes of the world," Monday evening, "Parking along the highway."

Minister Thornhill of Wichita, Kansas, who is conducting these meetings, is of a most genial and sociable disposition and a man of most agreeable personality. He is an eloquent speaker, earnest in his work, and thoroughly imbued with the spirit of service. Those who hear him will be well instructed.

These meetings will continue all of next week and the Church of Christ extend a hearty welcome to all.

At 3:30 o'clock Sunday afternoon Minister L. C. Chapin will deliver a special sermon.

## Bellview's Old Settlers' Meet Is Postponed

The Old Settlers' Reunion, scheduled for Bellview next Wednesday, an annual affair, has been indefinitely postponed, according to information received from J. O. Garrett, secretary of the Bellview chamber of commerce. No reason was given for the postponement.

### MOVES TO PLAINVIEW

H. L. Vance moved his family to Plainview the early part of the week, where he will have charge of the Pool Corporation elevator. Mr. and Mrs. Vance with their children have been citizens of Friona the past year and made many friends, especially those who have been near neighbors. They have proven themselves real people, both as neighbors and citizens. During their stay here he has been in charge of the pool elevator, ably assisted by Mrs. Vance.

### GOES TO MOLINE, KANSAS

H. G. Harper, who has been in Friona for the past few months representing the Devlin Engineering Co. in the installation of the Friona water system, left Saturday night for other fields of endeavor. He is a young man of 24, and made many friends here. His wife left several weeks ago for the home of her people in Ames, Iowa.

Mr. Harper made a survey of the town with a view of ascertaining the cost of sewers for the town. From here he went to Amarillo for a few days while he completes estimates of this work. From Amarillo he goes to Moline, Kansas, to superintend some paving work.

### FIRST TAP MADE SATURDAY

W. H. Hughes, whose home is in the southwest part of town, had the first tap made in the new water mains of the city at his home last Saturday.

Mr. Hughes says he is well pleased with the service and can now supply water to all parts of his garden, which he is treating to a good cool drink each day until it is thoroughly wetted.

### MRS. KINSLEY HOME

Mrs. R. H. Kinsley, who has been in a hospital at Amarillo where she had suffered a surgical operation, returned home last Monday. Mrs. Kinsley is reported as steadily gaining in health and her many friends here sincerely wish for her a complete and early recovery.

### J. P. MARTIN HERE

J. P. Martin, formerly of this locality but now of Littlefield community, was a business visitor in Friona Monday. Mr. Martin says they have had some rain in his locality and that his cotton and row crops are up to a good stand, but they are needing rain there now.

### MAY INSTALL BAKERY

Ben Harding of Denton arrived here Sunday evening to give the town an inspection and inquire into the advisability of installing a first class bakery in Friona.

Mr. Harding expressed himself as well pleased with the appearance of the town and country, but at this time has made no definite arrangements as to his business proposition. Mr. Harding is a young man and an experienced baker, and should he decide to cast his lot with us will make a worthy citizen and a progressive business man.

### 200 ACRES ROW CROP UP

W. F. Cogdill was in town Saturday from his farm southeast of town and reported that the dry weather has farming at a standstill in his locality.

Mr. Cogdill says he has over 200 acres of row crops planted and up but that it is doing no good as yet for want of moisture. He is among those who are earnestly hoping for rain in the near future.

For notices, place cards, invitations, greetings, etc., FRIONA DRUG CO. 46

Word has been received of the birth of twin boys to Mr. and Mrs. Claude Biggerstaff, southeast of Friona, who are now at the home of Mrs. Biggerstaff's parents at Medford, Oklahoma. The boys have been named Jackie Jean and Bobbie Lee.

### PRETTY HOMES CONTEST

Following are the rules and regulations for the pretty homes contest as conducted at Friona under the auspices of the Friona Women's club:

1. All houses within the city limits of Friona are considered in competition and will be scored by the judges.
2. The contest will be in general charge of a committee of women of the above club, appointed by the president. All matters not fully covered by the rules and regulations are subject to the decision of this committee and its rulings shall be final.
3. Entries to contest will be closed June 20, and contest ends August 15.
4. Three out of town judges will be selected by the committee in charge to judge homes and determine winners. A member of the committee shall accompany them on their tour of inspections. Each judge shall keep separate scores until all homes are judged and the averages of the three judges after the scoring is completed will determine the standings. In case very close decisions the judges may make a second and third visit for the purpose of making comparison to determine the final winners.
5. A prize shall be given to first, second and third places.
6. Ten highest grades in each class shall be published.
7. The following score cards will be used in judging homes:

|                              |     |
|------------------------------|-----|
| Cleanliness front yard, curb | 15  |
| Cleanliness back yard, alley | 20  |
| Trees and shrubbery          | 15  |
| Flowers                      | 15  |
| Lawn                         | 15  |
| Painting, improvements       | 10  |
| General attractiveness       | 10  |
| Total                        | 100 |

Explanation of Terms.

Cleanliness back yards, etc., means lack of trash, garbage, weeds and other unsightly or unsanitary objects or vegetation.

Front yard and curb means that part of the property from front half of house to street and property lines on either side. The term curb does not apply only to concrete or stone curbing. If that part of the yard from the property line to street is kept clean and attractive the judges will consider that due care has been given the curb.

Back yard or alley means that part of property from back half of house to middle of alley at back of property and property lines or street on either side. Where there is no alley behind or on side of property the judges shall consider only that property within the property lines and curb.

Trees and shrubbery mean ornamental or utility trees or vegetation not planted annually. This includes vines not planted annually and plants likewise not planted annually.

Flowers mean ornamental vegetation planted annually.

Lawns means grasses or clover covered front yards. If there is a lawn covering back yard or curb it shall be considered in the general attractiveness score but not in the lawn score.

Painting and improvements mean all stationary or accessories which add to the attractiveness of the property.

General attractiveness means the general impressions created by the home and its surroundings.

The age of trees and shrubbery or flowers or lawn shall not count against the homes in those three classifications but may be considered in general attractiveness score.

For instance if the home is a new one and these have only recently been planted, the judges should give trees and shrubbery a good score if the young trees are well kept and attractive as young trees are well expected to be. The same applies to flowers and lawns.

The judges shall submit reports of their decisions in writing to the chairman of the committee and shall also submit a general report covering the contest with suggestions for the conduct of future contests.

The contest committee shall have the right to alter or change any and all rules and regulations without notice if in their opinion such changes will result in the general good of the contest and the purpose for which it is conducted.

If you care to enter contest notify the committee not later than June 20. If you desire to drop out of contest notify committee.

Mrs. J. C. Wilkinson, Chairman.  
Mrs. F. S. Truitt.  
Mrs. E. V. Rushing.

A surprise party was held at the home of Mr. and Mrs. P. W. Berg Wednesday night in honor of the birthday of their son, John. An enjoyable evening was spent in playing various games and visiting and at a late hour refreshments were served.

## PAUL HIGHFILL DRAGGED TO DEATH ON FARM BY HORSE; NO WITNESS TO ACCIDENT

### VISIT AT SPRING LAKE

Pastor Beattie and assistant, Elmer Richardson of New Haven, Conn., drove to Spring Lake Tuesday, returning Wednesday. The purpose of the visit was to show the assistant pastor the road to that place. Following the visit Mr. Richardson will return later in the week to Spring Lake where he will preach next Sunday. Services will be held at each of the churches every Sunday. Pastor Richardson preached at Friona Sunday morning and evening and his efforts induced many laudatory remarks from those who heard him.

### WILL SPEND SUMMER HERE

Mrs. J. H. Williams of Greenville, Texas, arrived this week to spend the summer with her daughters, Mmes. J. D. Hamlin and E. R. Furlong.

Mrs. Williams spent a winter on the Plains two years ago and likes this country very well. She expresses herself as well pleased to be able to spend the summer here.

### SURPRISE PARTY

Friday night, May 30, a surprise party was given Harold Lillard, son of Mr. and Mrs. L. F. Lillard, honoring his birthday. Those present were Harold Lillard, Marvin Key, Ernest Osborn, Forrest Osborn, Ross Lacy, John Burton, Ralph Taylor, Mabel Harry, Chas. Whitefield, Albert Conaway, John Beattie, Albert Conaway, Dayton and Harold Hanson.

Games were played after which refreshments of cake and ice cream were served.

## Stock Law Will Be Brought To Vote In Summer

(From The Hereford Brand)

A petition is being circulated in the county for the calling of an election to vote on a stock law for Deaf Smith county. The petition must have as many as 100 signers, and more than the minimum has been secured this week. The memorial will be presented to the commissioners court and an election called for some time during the summer.

The petition will have 400 signatures by the end of the week and will be laid before the commissioners at the next regular meeting, which will be Monday, according to the circulators of the paper.

A few years ago the issue of a stock law for the county was voted upon and defeated. Backers of the present move claim that present conditions of more thickly settled communities, more farms and growing crops have brought about a sentiment that will enact the measure when brought up again. Results of having a stock law, they say, were not understood in the preceding election.

"Instead of removing all fences, leaving all crops open to depredation of stray stock, as many voters thought before and cast an adverse ballot," states a prominent dairyman, "the object of the law is to cause the owners of stock to build adequate fences to hold their animals instead of forcing the public to fence against them."

## Will Complete Grade on Van Bibber Road

(From The Hereford Brand)

The Van Bibber road, which traverses Deaf Smith county and ties a large district, both north and south, into the Harrison highway has been graded from the Parmer county line to five miles north of the old Syndicate school house.

The county is now ready to complete the grading of the route to the Oldham county line, according to Earl W. Wilson, county judge, who said the grading would begin at an early date. There has been many inquiries from people served in the district concerning work on the road who are anxious for the improvements to begin, and the commissioners court has taken favorable action to put the thoroughfare into shape as soon as possible.

One of the saddest affairs that has visited Friona and community in many years occurred Monday morning, resulting in the death of Paul Highfill, the fourteen year old son of Mr. and Mrs. J. W. Highfill, whose farm home is a few miles southeast of Friona.

It appears that Paul had ridden his pony to the pasture to bring in a cow and young calf and nothing more was known of him until the pony appeared at the home with his lifeless body attached to it by means of a small rope, one end being tied around the boy's body while the other was tied to the pony's neck. The body was considerably mangled and death had evidently resulted from being dragged or kicked by the pony, and the facts as to how or why it happened will remain forever a secret as there was no witness to the tragedy.

The parents have been living here for several months but the boy had been here but one month, he having remained at his former home in Oklahoma until the close of school there, in which he was one of the brightest students, having won the state scholarship this year.

He was an unusually bright and promising boy in every way and his religious development had far exceeded that of the average youth. He was a member of the Baptist church and leading member of the Junior B. Y. P. U., of which he had been appointed as reporter, and it had been his duty to prepare and present the report of last Sunday's meeting and the program for this week for the Friona Star.

He had committed to memory many portions of the Scripture, including the 13th chapter of I Corinthians, and his favorite text was "Be thou faithful unto death and I will give thee a crown of life." His favorite song was "Down at the Cross Where My Saviour Died."

As an evidence of the esteem in which this unusually favored boy was held by the people of his former home was the fact that a large number of them came over to attend the last sad rites in his honor, among them being his teacher of the past term, who made known the fact that he had won the state scholarship.

Funeral services were held at the local Baptist church Wednesday afternoon, conducted by the pastor, Rev. Robinson, who delivered a most touching sermon. Following the services at the church, the remains were laid to rest in the Friona cemetery.

Pall bearers were chosen from among his boy associates and members of the Junior B. Y. P. U. They were Raymond and Lee Ender, John Burton, John Beasley, Virgil Weir, Ewell White, Donald Livings and Wilbur Meade.

The flower girls were also members of the Junior B. Y. P. U. and were Benna Burton, Imogene and Virginia Short, Eva Dilger and Madeline Beasley.

The bereaved parents have the sincere sympathy of the entire community in their great sorrow.

### CHRISTIAN ENDEAVOR

Topic, How missionaries advance world peace.

Leader: Chas. Reeve.  
Song.  
Roll call.  
Scripture: Helen Crawford.  
Leader's introductory talk.

President Hoover's tribute to the missionaries: Orville Whitefield.  
The memorable words of John E. Williams of Nazing University: Janet Hanson.

Contributions of Jas. Chalmers: Millford Alexander.  
Piano Solo: Esther Reeve.  
Mary Slessor's amazing influence in Calabar: Orma White.

The most stupid little girl in school: Lola Goodwine.  
Closing song.

Benediction.  
All young people are cordially invited to attend Christian Endeavor.

### HOMELAND NEWS

A number of people attended a play given recently by the young people of Homeland.

Among those on the sick list are A. O. Newman, Mr. Lipham and Mr. Manns.

Mr. and Mrs. A. J. Elliott are visiting in Oklahoma this week. A number of our young folks enjoyed a weiner roast Saturday night.

Mr. and Mrs. Elmer Elliott were Clovis visitors last Saturday.

# Ginger Ella

Copyright by Bobbs-Merrill Co. W.N.U. SERVICE

**STORY FROM THE START:**

In the usually quiet home of Rev. Mr. Tolliver of Red Thrush, Iowa, his motherless daughters, Helen, Miriam and Ellen—Ginger Ella—are busy "grooming" their sister Marjory for participation in the "beauty pageant" that evening. With Eddy Jackson, prosperous young farmer, her escort, Marjory leaves for the anticipated triumph. Overwork has seriously affected Mr. Tolliver's eyes. Marjory wins the beauty prize, \$50.00. She gives the money to her father to consult Chicago specialists. Ginger meets Alexander Murdock. Mr. Tolliver returns, the doctors giving him little hope. Ginger gets an idea for a "Parsonage Home for the Blind" and solicits funds. She gets results at once. Helen is married and leaves the parsonage. Mr. Tolliver goes to Eddy Jackson's farm for a rest. Hiram Buckworth is engaged as substitute pastor.

**CHAPTER V—Continued**

"Yes, such a nice man. That's your bathroom—you needn't be afraid to use it, it goes with this room. We have another one at the back. Marjory emptied the closet for you, and the bureau drawers are empty. We have supper at six o'clock, and— Oh, I forgot to introduce the girls. But they didn't come down, did they?"

Beneath the bed, Marjory writhed in helpless fury at the poor woman's fluttering anxiety. But she went out at last, and closed the door behind her. Marjory lay rigid beneath the bed, hating the young preacher, hating Miss Jenkins, despising herself for her childish curiosity. Her only hope was that quick-witted Ginger, missing her, would guess her predicament, and devise a scheme to get the new boarder out of the room for a while. Unfortunately, Ginger was in a predicament of her own.

But Hiram Buckworth knew nothing of these unpleasant complications. He put his bag on a chair, and opened it, leisurely. Then he went to the closet, and looked in. Crossed to the windows, and looked out. Stood before the bookshelves, examining the titles of books, now and then taking out a volume for a brief inspection.

"Oh, dear heaven," prayed Marjory, "don't let him get inspired to write a sermon."

Hiram Buckworth left the bookshelves, and had a look at the bathroom. He was whistling softly between his teeth. No hymn the tune that he whistled, something light, something catchy, with rolling cadences. Presently he broke into song, low song, barely more than a hum, in a pleasant low voice.

"Now I ask you—very confidentially—Ain't she—sweet?"

Slowly, he removed his coat, shook it out, and hung it over the back of the chair, and took off his collar and tie. From his bag, he drew out a fresh lot of ties, and selected one with nice discrimination, his eyes flashing quick comparisons in color tones from box to tie.

"Oh, I hope he isn't going to change his clothes," thought Marjory, and shut her eyes very tightly indeed.

Hiram Buckworth went to the bathroom, and turned both faucets into the tub. Marjory could hear the trickle of the water over his fingers as he tested the warmth of it.

"Very confidentially—"

Marjory, beneath the bed, was bathed in cold perspiration. He came deliberately back into the room, took shoes from the bag, removed the shoetrees noisily, shook out fresh shirts and placed them in the drawer. Finally, from the rack, he chose a thick bath towel. Marjory watching through the sheltering lace fringe saw him return to the bathroom. The door would be close it? His hand was on the knob. Yes, he pulled it—slowly. It was ajar—a little—just a very little—

The door slammed shut.

Not one moment did Marjory Tolliver linger beneath that bed. She gathered together all her little young muscles, and with one vigorous jerk, propelled her slim body from beneath the bed in the direction of the door, the hall door. She leaped to her feet, and flashed into the hallway. Hiram Buckworth hearing the slight sound, the click of the latch, opened the bathroom door.

"Yes?" he called. "What is it?"

The door to the hall stood open. He crossed the room, and looked down the corridor. At the farther end, he saw, or thought he saw, the flying French heel of a white slipper.

"Haunted," he said to himself. "That's nice."

But when he went back into the room, he not only closed the door, carefully, but turned the key in the lock as well.

"I ask you—very confidentially—"

—he whistled softly as he turned

back into the bathroom—"Ain't—she—sweet?"

Miss Jenkins had gone straight from her reception of the new minister to the rescue of Ginger Ella, for she had rightly interpreted both the sudden crash and the ensuing silence as indicative of disaster in that direction. Unfortunately for that young person, the apple barrel had nails in it, nails that stuck in ward. Ginger, bleeding on both arms, bruised on both knees, and altogether furious, was further annoyed by the fact that she was pinned into the barrel by the intruding nails. At every slight motion to extricate herself, there were ominous little sounds of tearing cloth spelling ruin for the summer frock. With Miss Jenkins' help, however, she managed at last, slowly, not without pain, to get herself out of the barrel with only a few minor rents and stains of blood upon the precious garment.

Some two hours later, Hiram Buckworth, with his most ingratiating smile, stepped out onto the rambler-shaded veranda, where his eyes fell upon a pleasant picture. Miss Jenkins sat in a low rocker, carefully mending

Hiram Buckworth Looked Hard at Marjory.

a torn new summer frock, while Ginger, in a plain flame-colored smock, sat on a stool shelling peas. And in the hammock, one slim foot crossed over the other, both white arms over her head, lay Marjory, so still and lovely that Hiram Buckworth caught his breath at sight of her.

"I beg pardon," he said pleasantly, "may I come out? I don't have to stay in my room until supper, do I?"

Marjory sat stiffly upright in the hammock. Ginger shook the dust of the garden from her hands, and set the pan of peas on the floor at her side. Miss Jenkins flushed and fluttered anxiously.

"Of course not," she stammered. "I mean, by all means. Come right over. I was going to introduce you to the girls, anyhow."

Hiram Buckworth joined the small group in the shadowy corner.

"This is Marjory, Marjory Tolliver," fluttered Miss Jenkins. "Not the oldest—Helen is the oldest, but she's married—Marjory is one of the twins. And this is Ginger Ella. Ellen, I mean. We just call her Ginger. She's the baby."

Marjory indicated the other rocker with a graceful gesture of a white hand. "Do sit down," she said.

Hiram Buckworth looked hard at Marjory.

"Twins," he said. "It doesn't seem possible."

Marjory's lovely eyes questioned him mutely.

"Does she, the other twin, look like you?"

**Seam of Burning Coal Keeps Mountain Warm**

A unique Australian phenomenon is the "Burning Mountain" at Wingen in northern New South Wales, which scientists say has been on fire 1,000 years.

According to a party of geologists, who have just returned from an exploration of the mountain, says an Associated Press dispatch from Sydney, there lies below the surface a burning coal seam. Long before European settlement in Australia "Burning Mountain" was known to the aborigines, and to them it owes its name, Wingen, signifying "fire."

The geologists report that the summit presents the appearance of the debris of a vast block of buildings consumed by fire with an explosion or

"Oh, no, no indeed, not a bit," chattered Miss Jenkins. "Just the opposite, you might say. Miriam is still and dark and—"

"Miriam is very brainy," interposed Ginger quickly.

"I thought there couldn't be two," he said, in a tone of great relief.

They talked together in the comradely fashion of parsonage people the world over, as a family, one in spirit.

"I wish I could see your father to day," he said. "I should feel more at home in his pulpit if I knew him personally. Don't you suppose we could rent a car tonight, and drive out to see him? If it is not too far?"

"Eddy Jackson would come for us," said Ginger.

"Tub Andrews would take us," suggested Marjory.

"Mr. Tolliver would be so pleased—such a nice man," said Miss Jenkins.

"Can't we just rent a car? I hate to bother your friends—and it wouldn't cost much."

"But when you take out ten dollars for board," said Ginger warningly.

"Or perhaps Miss Jenkins here forgot to tell you about it," Marjory added.

"I don't recall that she mentioned it," he said pleasantly. "It seems very reasonable indeed."

"But when you consider that you only get fifteen—" Ginger's voice trailed off to a significant silence.

"But we decided that if you objected, we would keep you for eight," encouraged Marjory.

"I shouldn't think of objecting," he said. "Quite the contrary. I am sure putting up with me is worth even more."

"And I will do your laundry with the girls," added Miss Jenkins. "And there really isn't much to spend money for in Red Thrush."

They told him of their father, of his patience, his faith, his sense of humor. They told him of Joplin Westbury, and the new church. They told him of Eddy Jackson, at Pay Dirt.

"And whose boy-friend is Eddy Jackson?" he asked, reflective eyes on Marjory, sitting stiffly erect in the hammock.

"Nobody's. Eddy Jackson isn't that kind," said Ginger indignantly.

"I may as well explain Ginger. I mean Ellen, right at the start," said Marjory, laughing. "She is against boy-friends. She thinks they are simply disgusting. And she thinks the rest of us—even Miss Jenkins—are simply man-mad. Ginger thinks a man who 'paws' should be shot at sunrise, if not sooner."

He smiled understandingly. "And who, then, is Eddy Jackson?"

"Eddy Jackson," exclaimed Ginger, with one of her broad sweeping gestures. "Is father's best and dearest and most intimate friend, a genuine character, and no base pretender."

In the early evening answering their meek request over the telephone, Eddy Jackson, busy with his experiments, sent one of the college students in his car for them and they drove out to the farm. Eddy was still busy in the laboratory, but Mr. Tolliver waited on the porch for them, with Miriam, and—this to Ginger's speechless fury—Alexander Murdock. Without a word to any of them, they marched into the laboratory, completely spoiling a delicate experiment.

"Eddy Jackson, you double-crossed me."

"I did not," he denied, quickly following her line of thought. "I didn't invite him. He came out by himself this afternoon, and he looked at Miriam, and stayed. I don't think he'll ever go home again. And besides, you didn't tell me to keep him away from anybody but Marjory."

This Ginger could not deny, so, with her usual sang froid, she dismissed the entire subject, and led Eddy out to meet the new minister.

Hiram Buckworth shook hands with him cordially. "I am glad to meet you," he said, "and I am looking forward most keenly to knowing your father. I have heard nothing but the recital of his rare virtues since I reached Red Thrush."

"My father?" Eddy was nonplused. "You must be mistaken. I have no father, my father is dead—"

"Oh, I beg pardon. I see I am mistaken. I inferred that you were my father—they merely spoke of him as Eddy Jackson, Mr. Tolliver's particular friend and cronny."

Eddy looked unutterable things. "Oh you mean me. I am Eddy Jackson. The only one."

"You? But, gracious, they said—well, I understand— My mistake, I see, excuse me."

"I know," Eddy Jackson laughed. "You mean Ginger Ella. Sure she puts me, and her father, and Moses in the same class. We're all archangels together."

by Mary Graham Bonner

Copyright by WALTER HENNINGER LINDSEY

**DOBBY AND BOSSY**

The cats, Dobby and Bossy, had been talking, telling jokes and having cat naps.

"You didn't like my joke," said Bossy, "because you're not as fond of jokes as I am. You like other things better. Maybe mine was a good one after all."

"It couldn't have been that," said Dobby.

"Oh, all right," said Bossy, "have everything your own way."

"I expect I shall," said Dobby, "unless you get yours first."

"We mustn't let our ways interfere with each other," said Bossy.

"No, we won't," said Dobby. "But I believe we will each get our own way here."

"It looks as if we would. Yes, we will each be spoiled, and so will the other cats."

"There are a number of other cats coming and I haven't yet made the acquaintance of some of those already here."

"Neither have I," said Bossy. "We will have to see what they are like."

"A young cat can't be too careful of the acquaintances he makes."

"Yes, that's right," said Dobby.

Both these cats had come from fine homes into a still finer one, and they

were very snobbish, superior cats, who liked cushions and cream, and who wouldn't have sat on a backyard fence for anything.

"I was saying that this was no more than we deserved," said Dobby.

"And I was saying the same thing," said Bossy.

"Think," he continued, "we have a sleeping porch and a great big sun parlor on the top of this house."

"We have a beautiful little garden, where we can lie in the sunshine or under the cool shade of a tree when the summer is here."

"The mistress of this house keeps us good and warm in the winter, too, and how cats do love the warmth."

"We certainly do love the warmth," purred Dobby.

"I'm getting very sleepy," said Bossy, "and I think I will take a nap on yonder cushion."

"I believe I will have a nap, too," said Dobby.

And after they had purred a little and dozed off several times they fell sound, sound asleep.

When they awoke they were greatly refreshed by bowls of milk and cream properly mixed together.

They were among a number of other cats kept by a lady who adored cats. She spent all her time looking after them and giving them the very best of everything, even to sun parlors, sleeping porch, a garden for the summer, and the finest of food all the time.

And Dobby and Bossy agreed many, many times that it was really no more than they deserved!

**Rode a Wild Lion**

Abdullah of Nairobi, as far as is known, is the only man in Africa who has ridden astride a lion and lived to tell the tale.

Others will tell the tale by many a camp fire that is lit by night to frighten the lions away, but the most grateful narrator will be Abdullah's employer, Major Mathews. He was out hunting near Kagera and Abdullah's feat saved his life.

The hunter had emptied both barrels of his rifle at a lion and lioness. The lion was brought down. The lioness, despite a wound, charged her assailant, carried him off his feet, and stood over him ready to finish him.

The brave headman, Abdullah, rushed to the disabled hunter's help and actually jumped astride the lioness, diverting her attention from Major Mathews, who rolled over to his rifle, which had been knocked out of his hand, rammed in a cartridge, and shot the lioness at close quarters.

The strangest thing about the combat is that Abdullah emerged from it without a scratch, although Major Mathews was badly mangled.

**Little Willie Walked**

Book Agent—Now that your little boy is going to school you should buy him an encyclopedia.

Mother—Nothing doing, let the little rascal walk or ride the street cars the way I do.

**Doing His Part**

Mother (to kid sliding down banisters)—What are you doing there, Cyril?

Cyril—Making trousers for poor orphan boys, Mummy.

**"Flies are Highly Dangerous"**  
Says The United States Public Health Service

WHEN children come down sick with typhoid or summer complaint, which kills more than 1/5 of the children who die under five, what is the cause? Often the disease has been brought into the home by flies.

Be comfortable and safe. Keep your home insect-free. Spray Flit, which is guaranteed (or money back) to be quick-death to flies, mosquitoes, moths, roaches, bedbugs and other household insects. Yet its clean-smelling vapor is harmless to humans.

Flit kills quicker if you use the special inexpensive Flit Sprayer. In-sist on Flit and don't accept a substitute. Get yours this very day!

**Costs 85 Cents A Month To Lose Pounds of Ugly Fat**

**Thousands of Women Know This Is True**

and also gain in ambition and keenness of mind?

Get on the scales today and see how much you weigh—then get an 85 cent bottle of Kruschen Salts which will last you for 4 weeks. Take one half teaspoonful every morning in a glass of hot water a day when you have finished the first bottle weigh yourself again.

Now you can laugh at the people who pay hundreds of dollars to lose a few pounds of fat—now you will know the pleasant way to lose unsightly fat and you'll also know that the 6 vitalizing salts of Kruschen (Salts that your blood, nerves and glands must have to function properly)—have presented you with glorious health.

After that you'll want to walk around and say to your friends—"One 85 cent bottle of Kruschen Salts is worth one hundred dollars of any fat person's money."

Leading druggists America over sell Kruschen Salts.

How would you like to lose 15 pounds of fat in a month and at the same time increase your energy and improve your health?

How would you like to lose unhealthy fat that you don't need and don't want, and at the same time feel better than you have for years?

How would you like to lose your double chin and your too prominent abdomen and at the same time make your skin so clean and clear that it will compel admiration?

How would you like to get your weight down to normal and at the same time develop that urge for activity that makes work a pleasure

Earl of Derby Here

The Earl of Derby, seventeenth to hold that title, is in the United States to renew his acquaintanceship with America and see his first Kentucky derby.

After a round of social entertainment in New York and Washington, the British nobleman will visit several famous breeding establishments in Kentucky and witness the running of the Kentucky derby at Churchill Downs.

Sprinter Gets Chance to Exercise His Skill

Once in a while a sprinter gets his chance to exercise his skill. Elder of Notre Dame, fastest back in football, had one such chance last year, and that was in the Notre Dame-Army game. He intercepted a forward pass on his own 3-yard line, and, with a clear field ahead, sprinted 97 yards, straight down the gridiron. Probably no other back could have eluded all tacklers as Elder did. It was speed and speed alone that carried him the length of the field. If Elder had been forced to sidestep, pivot or change his pace, he would probably have failed, but the opportunity that came his way was exclusively for a sprinter and Elder's track ability had full sway. All the situation called for was straightaway speed, but those situations rarely happen in a football game. There are few chances for a back to keep going on a straight line after taking the ball.

Point Adjusting Quite Easy If Car Is in Gear

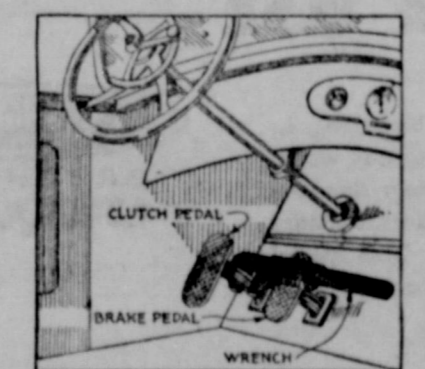

One of the things that slows up the work of adjusting breaker points is the difficulty of turning over the engine until the points just open. It seldom can be done with the starter motor, since the engine has a tendency to stop in the closed position of the points. The hand crank is the usual way of doing the job, but sometimes the owner does not have his crank handy, and getting it out at best is always a nuisance. In repair shops, therefore, they have figured out a way to accomplish results with a minimum of delay and effort. The trick is to place the car in gear, with ignition off, and move it a little, forward or backward. This turns the engine very slowly until the points break. Usually in their open position the points should space somewhere between .015 and .020 inch. It varies somewhat with different makes.

Billiards Will Gain Many Recruits in Near Future

More than 3,000,000 new billiard players will be developed within the next five years. This is the conservative estimate of G. Raymond Collins, president of the National Billiard Association of America. He is basing this estimate on a survey which he has been making for the last year. Reports which are reaching his headquarters daily from all parts of the country indicate clearly that billiards is gaining rapidly in popularity. This growth has been among the Juniors, great development being reported in boys from seven to fourteen

Ingenious Method of Holding Brake Pedal

A novel and ingenious method of holding the brake pedal while adjustments are being made on the brakes is shown in Figure 3. By setting the wrench so that it is fairly tight on

The Wrench, Clamped to the Clutch, Holds Brake Pedal While Adjustment Is Made.

the clutch pedal shaft, it will hold the brake pedal at any desired position so that the point is easily found where the brakes first begin to take hold.—Popular Science Monthly.

Six Farber Brothers Are Very Fond of Athletics

Maury Farber, Wisconsin crack southpaw, pitcher and basketball player, is the fourth of six brothers who have been prominent in Chicago athletic circles over a period of fourteen years. The fifth, Saul, is at present a freshman at Northwestern.

The oldest of the Farber boys, "Doc," pitched with Medill high school in 1916 and following his graduation played for four years with the old Hull House basketball five. At present he is practicing dentistry. Eddie was captain of McKinley's basketball team in 1919 and also played baseball. Since his high school days he has played pro ball with Montreal, Vernon City, Rochester, Rock Island and New Orleans and is still in the game.

Dave captained the McKinley cage team the year after Eddie and played in the outfield on the ball team. Maury then also captained the McKinley basketball team and pitched and played the outfield in baseball. Last year he carried the hurling brunt at Wisconsin and also played regularly on the basketball team. Saul, the youngest of the six, cap-

tained the Marshall cage team in 1927 and also played baseball. He has won his numerals in basketball at Northwestern and is at present on the Purple frosh ball squad.

The only one of the six brothers who has not been prominent in athletics is Nate.

Big Ten Dropped From Harvard's 1932 List

Harvard will resume football relations with Brown and Penn State in 1932, William J. Bingham, director of athletics, said when he announced the almost completed Crimson gridiron schedule for that year.

Brown, which has had a place on the Harvard schedule 31 times since 1893, last played against a Crimson eleven in 1927 and Penn State has not visited the stadium since 1921, when the Nittany Lions and Harvard battled to a 21-21 tie.

The scheduling of Penn State appeared to mean the end of Harvard's football relations with mid western elevens.

Veteran Spitter

Jack Quinn, veteran spitalier of the Philadelphia Athletics who has seen 17 years' service in the majors, appears to be as effective today as ever.

SPORTING BRIEFS OF INTERESTING NATURE GLEANED AT RANDOM

Since 1920 major league sluggers have hit 10,000 home runs, the records show.

Mickey Cochrane of the Athletics has dropped but two foul flies since he started in 1925.

Young Bob Walsh, second pitching son of the veteran Ed Walsh, has been sent to the Hazleton farm in the NYP league by the New York Yankees.

roll every semester he has been in college.

Judge Landis ruled the Chicago Cubs could not sell Charley Tolson, first baseman, to Reading.

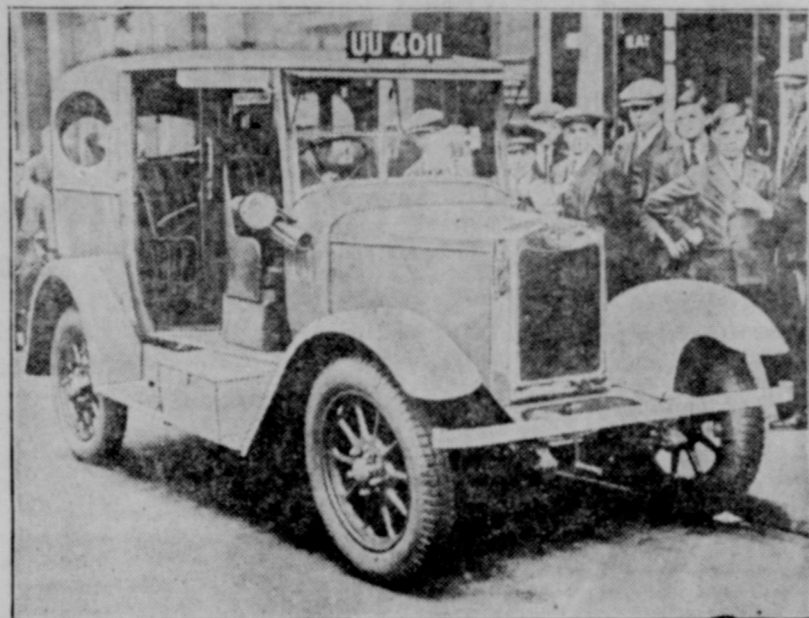

Walter Spence, clever all-round swimmer and record holder, has joined the New York Athletic club.

His bouts will just go on being top-

fielder John Winsett, purchased last year from Mobile, had been sent to the St. Paul club of the American association on option.

Two boys named Sid Terris are boxing around New York. One is Sid Terris, the east side lightweight, and the other is Sid Terris, heavyweight from the hills of North Carolina.

FLIVVER TAXIS MAKE APPEARANCE

The new two-seater taxi, with the safety-seat sliding door, opening behind the driver's seat, which aroused considerable interest on its first appearance on the streets of the British capital.

While a major league career is predicted for Bob, he still needs a season's work in the minors to fit him for another trial in the majors.

Mike Gonzales, former Chicago Cubs' catcher, is now a member of the Minneapolis American association club.

Freddie Sington, Alabama guard and tackle, has made the scholastic honor

sided, we guess, until some promoter matches Carnera with a falling safe.

John McGraw and Charles Comiskey are the only managers in the history of big league baseball to win four successive pennants.

Outfielders balk at playing in Jersey City because the park is so large they do extra duty chasing the flies that are home runs elsewhere.

Doc Painter, new trainer of the Yankees, hung up track and field records for Omaha high school and Colorado State college and has nearly all sports as a Y. M. C. A. instructor.

Jerome D. Travers, who won the American amateur golf championship four times, is now forty-three years old and still scoring in the low seventies.

Percy N. Collins of Chicago, present holder of the national amateur 18.2 ballkine billiard championship, has held the title in 1920, 1923, 1928 and 1929.

Jack Bonner has already won eight major sport letters at Temple university, three in football, three in basketball and two in baseball. He has another year left.

The Red Sox announce that Out-

EASY WINNERS OF BASKETBALL CROWN

When the Athens (Texas) high school quintet won the national basketball crown at Chicago for the second successive year they performed a feat that no other high school has ever duplicated. Four members were lost from the 1929 team, but Coach Jimmie Kitts assembled an aggregation that was able to repeat. Back row—Freddie Tompkins (selected as All-American forward), Dana Henderson, Oscar Moosberg, Capt. Bonnie Tompkins (selected as All-American guard), Louis Gregg. Front row—Coach Jimmie Kitts, Brakine Ware, Dan Adair, Alton Rowland, Troy Tompkins, Hodge Owen.

Good Turns

Five hundred phonograph records were collected from the citizens of Laramie, Wyo., by the Boy Scouts of that municipality recently, and sent as a gift to the United States Veterans' hospital at Sheridan, where the ex-soldiers recently were the recipients of two fine phonographs, the gift of the Albany County Post No. 14, American Legion Auxillary.

Find Indian "Apartments"

A crumpled-entrance apartment house with a broad veranda built by a prehistoric race of Americans has been found by Smithsonian Institution scientists in Yazoo county, Mississippi. H. B. Collins, curator of ethnology at the Smithsonian, says it is the first house floor plan of the American Indian ever discovered in the Southeast. Pieces of pottery in the ruins indicate that the inhabitants of the place had reached a considerable degree of culture.—Pathfinder Magazine.

FAMILY DOCTOR LEARNED THIS ABOUT CONSTIPATION

Dr. Caldwell loved people. His years of practice convinced him many were ruining their health by careless selection of laxatives. He determined to write a harmless prescription which would get at the cause of constipation, and correct it.

Today, the prescription he wrote in 1885 is the world's most popular laxative! He prescribed a mixture of herbs and other pure ingredients now known as Dr. Caldwell's Syrup Pepsin. In thousands of cases where bad breath, coated tongue, gas, headaches, biliousness and lack of appetite or energy showed the bowels of men, women and children were sluggish. It proved successful in even the most obstinate cases; old folks liked it for it never gripes; children liked its pleasant taste. All drug stores today have Dr. Caldwell's Syrup Pepsin in bottles.

The Affronted Moujik Theodore Dreiser, talking at a Greenwich village tea about his Russian visit, said that the Russian government has instituted compulsory baths with a view to arresting the typhus scourge.

"Well," he went on, "the Russian peasants need baths; there can be no difference of opinion on that point. "I was talking one day to a white-whiskered old moujik. "How old are you? I asked him. "Sixty-six," said the moujik. "Did you ever have a bath?" said I. "The old fellow drew himself up. He was affronted. "Plague take you, sir," he said. "I have had three baths in my time!"

Room for Improvement "I've changed my mind." "Well, does it work any better?"—London Tit-Bits.

Up to a Certain Point "And are you satisfied with married life?" "Satisfied in a way. I don't want any more of it."

HEADACHE?

Why suffer when relief is prompt and harmless:

Millions of people have learned to depend on Bayer Aspirin to relieve a sudden headache. They know it eases the pain so quickly. And that it is so harmless. Genuine Bayer Aspirin never harms the heart. Look for the Bayer Cross stamped on every tablet.

## COGITATIONS and APHORISMS of JODOK

Dock said the other day that this is a good time to have a drought, for there are very few other localities anywhere than can point the finger of scorn at us.

That expression seems well chosen for while we are having it dry here, other localities are suffering as bad or worse from floods, tornadoes and hail.

It is hard on farmers to lose their wheat, but it is not so bad as to lose all crops and property besides, and perhaps many lives, as has been the case in many places.

Owing to dry weather many of us cannot find a great deal to do on the farm, so we visit about in town, and while visiting the business concerns and listening to folk talk we gather bits of information and often hear the subject of advertising discussed.

One business man remarked he always carried an ad in the Star for he is sure it pays in a business way. He also said he reads all the other ads just to see what the other fellow says and gets a kick out of it and learns what they are putting out.

Another peculiar circumstance came to notice about this advertising, which convinces me that it pays.

Someone advertised in the Star for a young German police dog that had disappeared and a few days later the dog returned home.

It cannot be supposed the dog read the advertisement and returned of his own accord, but it is possible he may have been detained by someone who, seeing the advertisement, concluded that it possibly might become embarrassing for them if the owner of the dog or other person who might recognize him as the lost animal should find him in their possession and for this reason had turned him loose to return home.

Another man testified to the efficiency of advertising upon the fact that having tried to rent a house he proceeded to place an advertisement in the local paper and a renter called for the house before the paper containing the advertisement was printed.

It occurs to me that some may think this is giving too much credit to advertising, but the editor tells me people call on him for information as to where certain things may be obtained and if an ad for such article has been placed with him he will refer the parties to the person who placed the advertisement.

Thus it is seen that the results are really due to the power of advertising and it can also be seen that there is no definitely prescribed manner as to where an advertisement will produce its results.

Verily the mind of man is a marvel and as yet an unknown quantity and is constantly leading him into unheard-of achievement.

I recently read of a man sowing clover seed from an airplane and over a thousand acres were seeded in less than an hour.

It is estimated forty acres of smooth land would be a good day's work for a man with a hand seeder, and at that rate it would have taken 25 men to sow a tract of 1000 acres in a day, whereas it was done by plane in a few minutes.

Such things cause me to wonder what comes next. I shall not be surprised to learn that some genius has discovered a plan whereby we may do our eating, sleeping and resting by electricity.

I recently stated that our American system of government is one of majority rule. I still believe it such but in the case of our recent school bond election, it appears that it may become a case of minority rule. At any rate, according to reports, the minority seems to be doing its bit to thwart the will of the majority by throwing wrenches into the machinery of our school government.

That reminds me of an expression often heard which seems fitting here, but I am still well satisfied with the ability of our trustees to perform their duties in the right way as they see it, and I am perfectly willing to rely on their judgment.

I have been informed that the city water manager has begun tapping in on the city mains and that one man at least is now giving his garden a plenty of water. If our citizens will follow his example we shall soon see thrifty gardens, green lawns, fragrant flowers and leafy shade trees on all sides.

### EXPRESSION OF GRATITUDE

We wish to thank the friends and neighbors who contributed so liberally in alleviating the sorrow caused by the death of our dear daughter and sister, and for the beautiful floral offerings, which were so thoroughly appreciated. Waiter J. Talbot and Family.

### RABBIT DRIVE SUCCESSFUL

Harley Nallon, one of the enterprising and progressive farmers of the Homeland community was in the Star office Thursday afternoon and informed us that the rabbit drive held on his land Wednesday afternoon was a success so far as results are concerned.

He said there were about forty men present with guns, and that 175 rabbits were killed on the section of land they traversed. All present were careful about the use of guns and no accidents resulted to mar the sport of the occasion. Mr. Nallon said another drive was planned for Friday on the land of W. N. Wyatt a few miles south of Homeland with the expectation that many more of the wasteful little animals would be slaughtered.

# MILLION BUSHELS WHEAT PREDICTED THIS SEASON FOR DEAF SMITH COUNTY

(From The Hereford Brand)  
Predictions all the way from 300 carloads from the Hereford station to 1,000,000 bushels of wheat for Deaf Smith county are being made, as continued dry weather prevails, and one banker is quoted as saying there will be more money in the Hereford banks at the end of 60 or 90 days than there was at the same time last year.

One local man who has traveled extensively throughout the county within the last several days reports a few fields of wheat that will make from 35 to 40 bushels to the acre, and he asserts that in the short-yield sections the grain is of a high order in quality, even though shortened in quantity.

Apparently estimates of the probable wheat yield this season must be classed as wild guessing, but those who have investigated all parts of the trade territory emit a more optimistic tone than is dreamed by street rumor. They claim that Hereford will ship more carloads this year than during any other year, with the exception of 1929, the bumper year.

For those who may desire to do their own figuring and estimating and who are familiar with weather conditions in the county back to 1923, data has been secured from the Santa Fe freight office, through the courtesy of its local officials, giving the exact amount of wheat shipped from Hereford for each year, paralleled with cattle carlot shipments.

Wheat and cattle are listed for comparative reasons, since ranches disappear as more land goes into wheat. Before applying pencil to paper, it should be remembered

that the increase in acreage over last year is something tremendous, and this excess land is of such a proportion as to have an important bearing upon the final yield, according to those who are in position to keep up with agricultural conditions.

**Table of Shipments.**

| Year | Wheat | Cattle |
|------|-------|--------|
| 1923 | 67    | 557    |
| 1924 | 150   | 562    |
| 1925 | 10    | 436    |
| 1926 | 406   | 346    |
| 1927 | 326   | 571    |
| 1928 | 225   | 500    |
| 1929 | 931   | 297    |

In 1928 Summerfield, Dawn and Joel shipped 96 cars of wheat.

In 1929 Summerfield, Dawn and Joel shipped 322 cars of wheat. The coming of the railroad to Dimmitt in 1928 cut off a large slice of territory which was using Hereford as a shipping point. It is claimed that up to 1928 half the wheat marketed here came from the section which now sells through Dimmitt elevators.

When this fifty per cent loss is considered with the opening of the 1928 marketing season, the big increase of carload shipments for Hereford proper is little short of phenomenal and marks the vast acreage of new land which went into wheat in 1929.

### ATTEND LEAGUE ASSEMBLY

Mrs. D. VanPelt, district League secretary, accompanied by Miss Freda Hartsfield, left Monday afternoon for the League Assembly at Canyon.

Miss Hartsfield went as a delegate from the Friona Methodist League.

## James Lusk Has Good Profit In Feeding 8 Pigs

(From The Hereford Brand)  
James Lusk, club boy of the Ward community, marketed his ten-litter project in Hereford Saturday with G. W. Bramley, hog buyer, and when he had figured up his profit he found he had made \$75.70 on the hog enterprise. His sale check was for \$106.20.

The litter consisted of eight graded Poland China pigs that were six months old May 20. They weighed out 1,750 pounds and brought nine and one-half cents a pound. James' check carried a 25-cent premium on the hundred, added to the nine and one-quarter quotation Saturday morning. Mr. Bramley voluntarily donated the

premium to the youth as an extra reward for his faithfulness and industry in carrying his project to a successful conclusion.

James brought his litter to market time at a cost per pound of slightly more than five cents. Taking the eight pigs January 7, from his father, valued then at \$5 each, he put them on a balanced ration to May 31. During the four months and 20 days he fed them \$50.50 worth of feed. Deducting the \$40 as first cost and the feeding cost, his clear profit was \$75.70.

The balanced ration, which was fed under direction of R. O. Dunlap, county agent, consisted of a mixture of 85 pounds of ground maize, 10 pounds cottonseed meal, 2 1/2 pounds bran and 2 1/2 pounds shorts.

Young Lusk will reinvest part of the proceeds in a registered gilt for the production of a better grade of hogs.

James is the 14-year-old son of Mr. and Mrs. J. W. Lusk, who live

ten miles northwest of town. He made good in his grade work in rural school and was in the class which held promotion exercises here May 16. In addition to regular school work, he took expression and music.

As a diversion James is displaying four young curlews, hatching out the eggs in an incubator.

His parents milk 18 cows, both Jerseys and Holsteins, and the separated milk is fed to hogs.

### PROF. CONDRON COMING

The Star office is in receipt of a card from Mrs. VanPelt, who is spending a part of this week in Canyon attending the district assembly of the Epworth League, relative to the speaker for the first meeting of the Union Laymen's meeting to be held here the evening of June 15.

This will be the first of a series of meetings of this kind to be held

here. It is hoped that all city that care for the movement intended, more neighborly or acquaintance among the churches, and members of churches are urged to attend.

"WHERE YOU SPEND YOUR MONEY WISELY"

## 'Konjola Put Me Back On Road to Good Health'

Dallas Lady Eagerly Endorses  
New Medicine—Found Relief After Other Medicines Failed

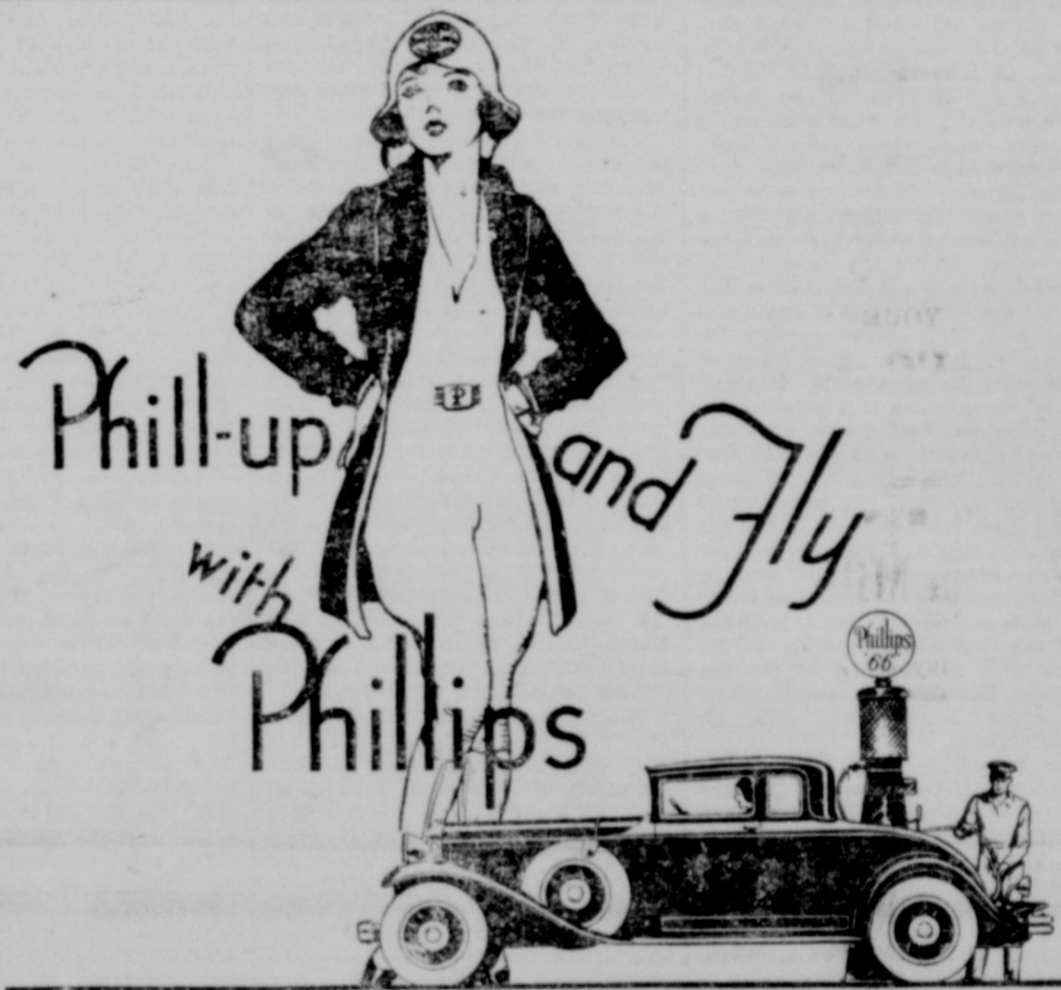

"For four years my system was in a rundown condition and for the past eight months, stomach and kidney disorders have caused me much suffering," said Mrs. F. L. Bethel, 406 Avondale street, Liberty Heights, Dallas. "G's formed after each meal and I had a burning sensation from my throat to the pit of my stomach. My kidneys were sore and did not function properly. I had pains across my back, and I was steadily losing in weight and strength.

"I finally decided to try Konjola and this medicine has put me back on the road to health. I am no longer troubled with the stomach condition. My vitality and general health have improved immensely and I am free from those terrible pains in my back. I sleep soundly at night and my whole system has taken on new life."

When taken for six to eight weeks, Konjola, the new and different medicine, will work wonders that will astonish those who suffer from the stubborn ills of the stomach, liver, kidneys and bowels and of rheumatism, neuritis and nervousness.

Konjola is sold in Friona by the City Drug Store, and by all the best druggists in all towns throughout this entire section.

# Some Other American Flags

By ELMO SCOTT WATSON

**T**HINK of the American flag, as all of us do on June 14, which is Flag day, and we naturally think of the national emblem with its thirteen alternate red and white stripes and its 48 white stars on a field of blue. But this flag, which is variously and affectionately known as "Old Glory," "the Stars and Stripes" and "the Star Spangled Banner," is not the only banner which calls for the respect and loyalty of all Americans. For there are "some other American flags" which have their place in our national tradition, even though they are not so well known as "the Red, White and Blue."

First of all, there is the President's flag, the personal banner of the Chief Executive of the nation. Some day, if you see flying from a short staff attached to the radiator cap of an automobile, a blue flag, edged with white and yellow silk fringe, bearing the United States coat of arms in the center, with four white stars in each corner of the flag, you won't need the cheering of the crowds to tell you that the President of the United States is riding in that car. Or if you see a flag of the same design, with perhaps a slight difference as to the fringe, floating over a house or snapping in the breeze from the bow of a ship, it will bring the same message—that the President is in that house or is riding on that ship.

But the President is not the only high official who has his own personal flag. If the secretary of war is making an official visit, there is displayed a red flag, bearing the United States coat of arms (with some minor differences from that shown on the President's flag) and four white stars in the corners. If it's the secretary of the treasury, you will see another blue flag but the design on it is even more complicated. Two crossed anchors are surrounded by a ring of thirteen white stars. In front of the intersection of the anchors is a shield bearing in the top half a pair of scales (of the balance type) and in the lower half a key. The symbolism of these is, of course, clear. The secretary of the treasury holds the key to the nation's strongbox and from the earliest days the balance scales were used in weighing precious metals. The secretary of commerce also has a blue flag with the four white stars but in the center is a white shield, at the top of which sails a three-masted vessel and below a lighthouse casts its beams abroad.

The Presidential flag has had an interesting history, insofar as the question of a proper design for it has resulted in a series of heated controversies over several points of heraldry involved. Its history has been one long record of changes and restorations until finally in 1916, under President Woodrow Wilson, there evolved the President's flag as it is today. Before that time each president had the right to select the design for his own flag and most of them did. But the Presidential flag used by President Wilson has been used by our Chief Executives since that time.

A distinctive flag for the President had its origin in the navy. On April 18, 1865, Gideon Wells, secretary of the navy, issued a set of naval regulations, prescribing that on the occasion of the visit of the President on board a man-of-war, the American ensign should be displayed at the main. This was the first official order to designate a flag denoting the presence of the President aboard a national ship. A change was made the next year when the rectangular Union Jack of dark blue, bearing horizontal rows of white stars, one for each state, was adopted as the President's flag when on board a national vessel. Although this was the first distinctive flag for the President, it was an unfortunate choice. In the navy the Union Jack at the foremast is a signal for pilot. Thus in the case of a ship with only one mast, the display of the Union Jack might mean either the President or the pilot; in the case of a two-masted the signal would be confusing; and since, at that time, a Jack at the rigging was a signal of distress,

**PATRIOTIC NEGLIGENCE!** The photograph shows, left to right, Elizabeth Vivial with the secretary of war's flag; Helen Appello with the Coolidge flag; Mary Devenny with Old Glory; Helen Basqui with the Taft flag; and Anna Corcoran with the Roosevelt flag. These Presidential and army flags are all manufactured at the quartermaster's depot in Philadelphia.

its use for the President was hardly one complimentary to the highest officer in the land.

In 1869, however, the national ensign was again designated as the President's flag and it remained thus until 1882, when William E. Chandler, secretary of the navy, issued an order, which was approved by President Chester Alan Arthur, that "the flag of the President of the United States shall consist of a blue ground with the arms of the United States in the center." It was not until 16 years later, however, that the army followed the lead of the navy by adopting a distinctive flag for its commander in chief, and when it did its action marked the beginning of a series of controversies which were to last for nearly two decades. Under a general order, issued March 28, 1898, from the adjutant general's office by direction of the secretary of war, the President's flag for the army was designated as a flag of scarlet bunting with white stars in each of the four corners and in the middle of the field a large blue star, outlined in white and bearing in the center the United States coat of arms. Around this central star were other white stars representing the states of the Union.

During the Spanish-American war the army Presidential flag was hung upon the wall of the cabinet room in the White House, symbolizing the position of President McKinley as commander in chief of the army and the first war flag of its kind that had thus ever been used. But for some unknown reason the navy Presidential flag, which would symbolize his position as commander in chief of the navy, was not thus displayed. The army Presidential flag was first exhibited publicly at the peace jubilee celebration in Chicago in 1899 and again at a similar celebration in Philadelphia. Later both the army and the navy flags were twice hung in the main hallway of the White House during army and navy receptions but the army flag was never hoisted until March 4, 1901, when it flew over the Presidential reviewing stand at the second inauguration of McKinley.

The first controversy over the Presidential flag came up in 1899. The War department order of 1898 had definitely directed that the official coat of arms on the central star should be "as determined by the State department" and the arms referred to are those shown on the great seal of the United States, which is in the custody of the Department of State. The shield thereon had always displayed seven red and six white bars, alternately red and white, which was strictly in accordance with the act of congress of June 20, 1782, establishing the great seal. In 1899 when the equipment officers at New York and Mare Island, where flags for the navy are made, were furnished their flag books for the year, they called attention to the fact that the shield on the President's flag erroneously displayed seven white and six red stripes, instead of the reverse. It was discovered that the design had been copied from a publication of the State department, entitled "The Seal of the United States."

The matter was taken up unofficially with the State department and ended with an admission from officials of that department that "there was no logical reason for the reversal of the colors which was presumed to be the result of an arbitrary heraldic license." In 1902 the acting secretary of the navy issued a memorandum that "the State department certifies that the shield has seven white and six red bars, alternating white and red, and it is ordered that such shall be the seal on the President's flag."

Meanwhile the army continued to make its flag with the seven red and six white stripes on the shield. In November, 1902, it was decided that

something should be done to reconcile the differences in the design on the shield. A committee from the War department and the Navy department called on President Roosevelt and suggested that since other nations had but one flag for its chief, it was not consistent for our President to have two. So it was decided to adopt a new flag, closely patterned after the older navy flag, but with several modifications. A short time later orders were issued by the secretaries of the two departments that the colors on the shield, as certified by the State department (seven white and six red bars) be followed and on November 21, 1902, it was officially announced that the controversy between the two departments over the design of the President's flag was at an end. The only other change was to make the eagle white, heavily stitched in black.

Despite the agreement, however, the flags used by the two branches of the service were not yet the same. True, both used the same device as to the eagle and the shield, but the navy clung to its blue field and the army to its red field. It was not until the next administration that decided steps toward uniformity were taken. On June 24, 1912 and again on October 29, 1912, President Taft issued executive orders that "the color of the field of the President's flag shall be blue," but the army did not immediately conform and a difficult situation arose at the inaugural ceremonies of President Wilson in March, 1913. The reviewing box in front of the White House was decorated with two President's flags, provided by the War department and the Navy department. The Navy department's was blue, but the War department's was red!

This revived the old controversy and when again in 1915 there was a double display of colors the matter assumed a serious aspect. It was pointed out to President Wilson that an agreement should be made and a standard flag adopted for both branches of the service. The President called in Lieutenant-Commander Byron McCandless, aide to the secretary of the navy, and requested him to prepare a design for the Presidential standard. The new flag was to consist of a blue field with four white stars in the corners, since the flags of an admiral and of a general bear four stars as a sign of command, and the President is the highest ranking admiral and general. Instead of an exact reproduction of the great seal, President Wilson expressed a desire to have his personal seal, a modification of the great seal used on the President's stationery in the White House, on the flag. This seal differs from the great seal in that the eagle's head is turned to the sinister (its left) and the stars above the eagle are differently arranged.

The new design was prepared by the bureau of construction and repair under the direction of Commander McCandless and was approved by the President in an executive order dated May 29, 1916. So at last the controversy was ended and a President's flag, uniform for both branches of the service, came into being.

But though the army-navy controversy over the President's flag was thus ended, there are those who are not yet satisfied with the President's flag. They point out the fact that the seven white and six red bars on the shield, even though it does have the endorsement of the State department, is not in conformity with the arrangement of these colors as prescribed in the act of congress of June 29, 1782, adopting the great seal of the United States, nor as prescribed by the act of congress of April 4, 1818, prescribing alternating red and white stripes in establishing the American flag.

But more serious than this, according to heraldry experts, is the fact that on the President's flag the eagle's head is turned towards the sinister, that is, away from the flag pole. It is one of the ancient rules of heraldry, they say, that no bird or animal ever look away from the staff, for if such a flag is carried into battle, the head thus turned would make it look as though the bird were retreating from the enemy. On all other flags on which the eagle appears, its head always faces the staff, regardless of which side of the flag one looks at.

## Chemists Aid in Erosion Battle

Experts Trying to Ascertain Most Susceptible Soils.

(Prepared by the United States Department of Agriculture.)

Chemists of the United States Department of Agriculture are assisting in the nationwide fight against soil erosion by determining just what properties of soils cause them to wash away readily and form gullies. They have estimated that erosion takes from the soil annually twenty times as much of the elements of fertility as is removed by all the crops grown on the land.

Every farmer knows that certain of his soils will run away with heavy rains or form gullies more readily than others. Soil scientists are measuring the amounts of soil carried away by erosion from the fields of the experiment stations which are being established by the government for the study of this menace of erosion, but in the past there have been no laboratory studies which have shown any relations between the readiness of soils to erode and their chemical and physical characteristics.

### Soils Influence Erosion.

Such a laboratory study was recently completed in the bureau of chemistry and soils of the Department of Agriculture, and the results have been described by Dr. H. E. Middleton of that bureau in the recently published technical bulletin 178-T, entitled: "Properties of Soils Which Influence Soil Erosion." The bulletin tells how the determination in the laboratory of certain chemical and physical properties of a number of different soils has made it possible to classify soils as to the ease or the difficulty with which they erode.

### Not Easily Washed Away.

"A soil cannot easily wash away," says Doctor Middleton, "unless the soil particles are picked up by water and held in suspension. The particles of certain soils can be readily suspended in water; those of certain others cannot. Then, again, if the soil readily soaks up a large amount of water before it becomes saturated it is less liable to erosion because it is the water which falls on a soil after it is saturated that runs off and causes the damage. By measuring these properties of soils we can measure roughly their ability to withstand erosion."

As the experimental work of the erosion-prevention field stations of the Department of Agriculture progresses in measuring the susceptibility of various kinds of soils to erosion, the findings of the soil chemists in the department's laboratories at Washington are expected to prove valuable in the movement to conserve America's soil resources.

Copies of the bulletin, 178-T, can be obtained, as long as there is a supply available for free distribution, by writing to the United States Department of Agriculture, Washington, D. C.

## Poison Potato Bugs Soon as They Appear

Potato bugs, when present, should be poisoned without delay. Paris green may be used as a dust when diluted with about 30 parts of hydrated lime. Dry arsenate of lime is likewise satisfactory and may be diluted with about 10 parts of hydrated lime.

Dusts are applied easily by placing in coarse meshed sacks which may be shaken over the plants. Applications made to dew covered plants adhere readily.

Two poison applications will often be necessary. Egg deposits on the plants should be watched and when young bugs begin to appear the second poison dust should be used. The bugs are controlled easily in this stage before they have been able to do much damage.

Poisons can also be applied as liquid sprays. For this method, from two to three pounds of dry arsenate of lead should be used to 50 gallons of water. Only eight ounces of paris green will be required for the same amount of water but from two to three pounds of lime should be added to prevent possible burning of foliage.

## Agricultural Notes

No weed should ever be allowed to go to seed in the garden.

A gardener's skill is reflected largely in the ability to mature vegetables early in the season.

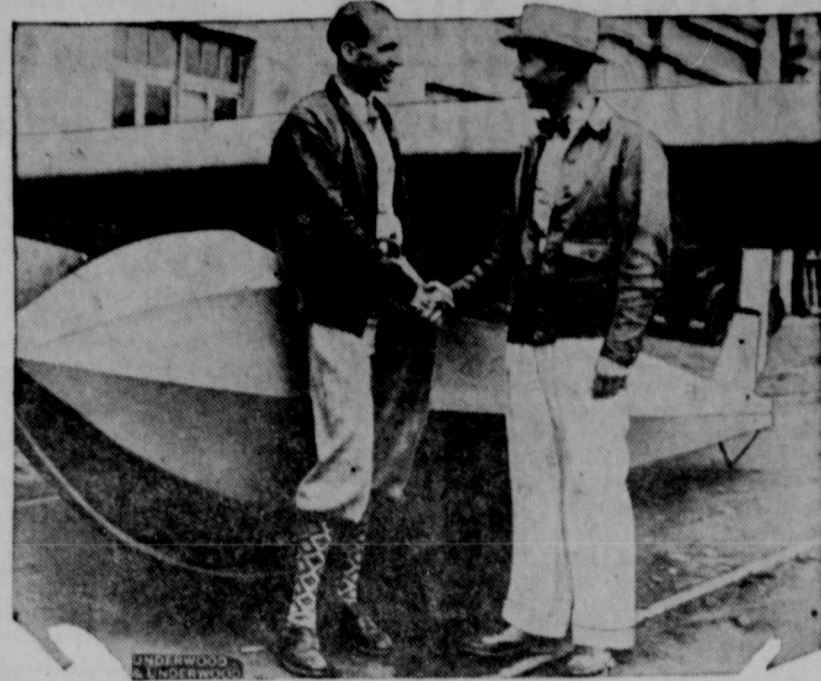

Clean up the garden thoroughly before you get ready to plant. Bugs will harbor in old vegetation from last year.

Give carrots a fairly dry situation this year. They make better roots if not oversupplied with moisture, but they don't want drought.

Among the garden crops which can be planted in late July and early August are endive, kale, kohlrabi, lettuce, radishes, spinach, and late turnips. Keep the garden working for the family larder.

Weeds in the garden and field crops are very thirsty during hot days. If allowed to remain they will get more than their share of the moisture in the soil. They will have a more beneficial influence if pulled out and left to lie on the ground.

## Gets No Credit for World Record

Jack Barstow, twenty-four, first-class glider pilot and gliding instructor (left), being congratulated by Clyde Freeman, vice president of the Bowlius Sailplane company, after Barstow had exceeded all world official and unofficial endurance glider flights by remaining aloft over Point Loma, Calif., in a Bowlius sailplane for 15 hours and 13 minutes. Absence of a barograph in Barstow's craft deprives him of official recognition for his flight.

## WEST POINT OF AIR DEDICATED IN JUNE

Randolph Field in Texas Huge Flying School.

San Antonio, Texas.—An outstanding event in the history of aviation will take place June 20 and 21 when Randolph field, the world's largest flying school, will be dedicated. Located seventeen miles northeast of San Antonio on the Old Spanish Trail, "the West Point of the air" covers 2,300 acres and will cost millions of dollars, \$11,000,000 of which has been appropriated by congress and is now available.

Eventually the government expects to spend between \$30,000,000 and \$40,000,000 on the project. Operating at an annual cost of over \$10,000,000, this training center will be the most complete and modern in the world. Elaborate plans are being made in San Antonio for the dedication of the field. The dedication ceremonies will take place at 10 o'clock on the morning of the 20th. Over 200 military planes from Brooks and Kelly fields, Fort Crockett and Fort Sill will be in the air at one time, flying in formation and performing various maneuvers.

On the morning of the 21st the June class will be graduated from Kelly field and special maneuvers are being planned for the members of the class. One hundred planes will take part in the exhibit.

### Unique Design of Field.

The design of the field is unique in that the building area is located in the exact center of the field. The flying area, surrounding on all four sides the almost square building section, is crossed by only one road, that being the wide entrance driveway that leads from the Old Spanish trail to the building area.

The flying area, comprising 1,625 acres, will provide from 3,000 to 10,000 feet of landing field for ships landing or taking-off from any side of the field against wind from any direction. An extensive study has been made of the wind currents, and the runways will be built in accordance with the prevailing breezes, which come from the southeast during eight months of the year.

The only tall building, the administration building, is located in the center of the circle at the entrance to the building area.

The artery for traffic will enter the building area at the center of its northwest boundary and divide at the small entrance circle, forming a large circle 2,500 feet in diameter around the center of the post. The officers' clubhouse, located in the exact center of the circle, will serve as a hub, and the officers' quarters will radiate from the center as spokes of this gigantic wheel.

The remainder of the buildings in the area are located in the square which surrounds the circle. The entire building area includes 475 acres. Diagonal roads from the center to the outside give a spider-web effect to the layout.

### Tribute to Texas Flyer.

Randolph field is a tribute to Capt. William M. Randolph, adjutant of Kelly field. He met his death in a crash September 17, 1928, while on a cross-country flight. He was born in Austin, Texas, September 9, 1893, and had served in the army from before the World war until the time of his death.

Aeronautical instruction now in progress at the primary flying schools Brooks and March fields will be brought together at this field along with the advanced training now being given at Kelly field. The personnel to be stationed at Randolph field will consist of 350 officers, 500 flying cadets and 2,000 enlisted men. Inclusive of the families of the married men on the field the post will contain 5,000 people.

### Huge Hangar

Not a post or pillar breaks the 7,800 square yards of floor surface in the Munich municipal airplane hangar at Oberwiesenthal. The building can be opened completely on three sides and can accommodate airplanes of any size.

## Aerobus Service Given to Paris Hotel Guests

Paris.—The hotel aerobus has come. A famous Paris hostelry has acquired two planes for the convenience of its patrons.

The machines start at any hour. The larger will fetch patrons with their baggage from the boat at Cherbourg or convey them to London, Berlin, or Madrid. The smaller is available for short journeys for golfing or gambling at such resorts as Deauville or Le Touquet.

## MAGYAR PLANS HOP ACROSS THE OCEAN

Will Try Nonstop Flight, Detroit to Budapest.

East St. Louis, Ill.—Lieut. Alexander Magyar, wartime Austrian bombardment pilot who intends to fly nonstop from Detroit to Budapest in a Lockheed Sirius monoplane in June, has been doing his preparatory work at Parks Air college here. He spent several hours in the air daily familiarizing himself with controls after almost four years of aerial inactivity, and did intensive work in navigation under the direction of Ensign Norman Anderson, U. S. N. R.

Lieutenant Magyar will be accompanied by Lieut. George Endres, Austrian commercial pilot and wartime pursuit flyer. The Lockheed in which they will make the trip is identical with the ship in which Colonel Lindbergh established a new transcontinental flight record recently.

Magyar's flight is sponsored by Hungarian-American societies in Detroit, Toledo and other American cities as well as by similar organizations in Canada. It is designed to draw attention to the dismembered state of Hungary which lost more than two-thirds of its total area through the Treaty of Trianon after the World war.

Magyar intends to take off from Detroit with a comparatively light gasoline load about June 15. He intends to refuel in the air at St. Johns, Newfoundland, and from that point will continue across the ocean. If necessary he will refuel again in Ireland but under normal conditions his ship is capable of a nonstop flight from St. Johns to Budapest with a comfortable margin of safety. The distance from Detroit to Budapest is 4,500 miles.

## Navy Obtains Fastest Bomber in the World

Washington.—Accomplishing a feat which never has been attempted before, a bomber built for the navy by a Baltimore company made a vertical dive of 6,000 feet with a full load including a 1,000-pound bomb, levelled off without releasing the missile and then was put through a series of stunts by the pilot to demonstrate its strength and fighting ability.

The new plane gives the United States navy the fastest bombing plane in the world and when placed in production will give the navy the most powerful bombing fleet of any nation. The planes will be able to hurtle out of the clouds, drop their bombs squarely on the decks of the enemy ships and return to a safe level in but a few seconds, it is said, the release of the bomb enabling the bombers to climb even more rapidly than present-day attack planes.

Carrying machine guns and standard fighting plane equipment, the bomber, after it has released its missile, may enter the aerial battle as an attack plane or return to its base for another bomb. The plane already has been accepted by the Navy department.

### Minimum Age for Mechanics

Washington.—The minimum age requirement for airplane mechanics has been placed at eighteen and no licenses will be issued to mechanics who have not attained that age, according to an announcement by Clarence M. Young, assistant secretary of commerce for aeronautics.

## SIMPLICITY MARKS BRIDAL DRESS; PICTURESQUE HATS FOR WEDDING

TRUE to tradition, here comes the June bride. From a fashion standpoint, she is a creature of moods this season, playing many roles. A favorite part she enacts is that of the "period bride" whose gown and those of her attendants stage quaint themes—perhaps a scene a la directoire or an exquisite classic of medieval inspiration.

To successfully re-picture a bridal cortege reminiscent of the romantic yesteryears is no slight undertaking. On the part of the bride-to-be and those who are assisting in her plans,

in the chapters which relate to the haunting of those radiant creatures to whom is assigned the coveted role of attending the bride.

Owing to the fact that millinery in general trends to the colorful, the sheer, the more elaborate and the picturesque this season, the line of distinction between hats for the bridesmaid and those for dressy occasion in the smart world, is not nearly so sharply drawn as heretofore. Wherefore in describing the fantasies which will crown the heads of the bride's

"SIMPLE AND DIGNIFIED BRIDAL COSTUME"

It requires no little amount of research and delving into past style history, for every detail of dress and accessory for the entire wedding group must be faithfully carried out down to the minutest item.

Competing with the bride of romanticism is the bride who prides herself on being ultra modern. Rather than reclaim the past, her fancy turns to a sophisticated styling which declares the very latest. The bride in the picture registers in this class. Her gown reflects the very new silhouette which is fitted to the figure through deft shirring of the material inset at the front of the bodice. A sweetly feminine touch is expressed in a yoke of exquisite lace, the same achieving a flattering neckline. The lower portion of the sleeves are also of lace. While the ingenuie and picturesque types flaunt the new puff sleeves, and other cunning sleeve fantasies, when it comes to the classic satin wedding dress, the sleeves are usually long.

The smartest brides of the season are making a feature of simplicity and this voguish lady in the picture is no exception to the rule. As ever,

attendants a picture is at the same time drawn of just such headgear as women will wear with their floweriest, frilliest, and sheerest of frocks this summer.

The airy fairness which is so all-prevailing this season in the realm of millinery reaches a climax of sheerness and transparency among hats created for the bridesmaid. Lacy effects are the outstanding call of the moment. Not only lace in the usual sense of the word is employed in profusion but straw and hair laces provide an intriguing theme for the milliner.

The group of chapeaux herewith illustrated tell at a glance that in addition to the wide-brim picturesque capeline, many striking novelties are being introduced into the bridal scene in the way of poke bonnets, baby bonnet types and off-the-face models.

That very beautiful ribbioned capeline sketched at the start of the illustration is of thinnest possible natural colored horsehair lace. The idea is to vary the color of the ribbon to tune in with the pastel tint of each bridesmaid's frock.

A huge hair capeline is draped in

HATS FOR THE BRIDESMAIDS

satin either white or "altar" (a new deep ivory) is holding its own as first choice for the bridal robe.

Spending of media for the wedding group is very evident that quite a few brides-to-be have become that lace-conscious they are choosing a gown all of lace. A very lovely model recently completed for a spring bride was a sleeveless type of antique sten-con lace over white satin. A cape of the same lace fell from the shoulders, developing into a graceful train. Another cape of the lace draped from the fitted cap, caught under a bow at the back of the neck.

Crowning the Bridesmaid. Now, as ever, millinery writes its most fascinating stories of romance

off-the-face-fashion for the model at the top to the right—a silhouette which is repeated again and again this season.

A bevy of lace gowned bridesmaids at a recently Paris staged wedding wore quaint baby bonnet types as centered in this group, made of lace matched to the orchid, rose, light green and pale blue of their frocks.

The poke bonnet with a transparent brim is a popular theme this season, not only for the bridesmaid, but for garden party and other summery wear.

JULIA BOTTOMLEY.

## Lucky Mother

"MY success with Betty Jean isn't just luck," says Mrs. D. H. Keating, 1318 Hays St., San Antonio, Texas. "It is due to a plan. She has always been in perfect health, has escaped the ill effects of colds and upsets because we have kept California Fig Syrup in our medicine cabinet, ready for the first sign of constipation. She loves its pleasant taste and we like its gentle, thorough action."

Mothers by thousands now praise California Fig Syrup. For fifty years physicians have endorsed this pure vegetable product. It gives tone and strength to weak stomach and bowels; stimulates appetite; encourages digestion and assimilation. Its use helps make fallow, listless children rosy, energetic and strong.

Look for the name California when buying. That marks the genuine, proved safe and effective for babies and children of all ages.

**CALIFORNIA FIG SYRUP**  
LAXATIVE-TONIC for CHILDREN

### Snip and Snap

Angry Employer (to Irishman who insisted on leaving his service)—Well, goodbye, Pat, and had luck to you.

Pat—Good luck to you, sir, and may neither of us be right.

### Reason to Be Annoyed

"I suppose the boss was annoyed when you told him I was leaving next week?"

"Yes, he thought it was this week."—Border Cities Star.

### By Inference

"Did you know his business had gone down?" "I suppose so. I heard he was going to wind it up!"

All things must change to something new, to something strange.—Longfellow.

## Makes Life Sweeter

Next time a coated tongue, fetid breath, or acid skin gives evidence of sour stomach—try Phillips Milk of Magnesia!

Get acquainted with this perfect anti-acid that helps the system keep sound and sweet. That every stomach needs at times. Take it whenever a hearty meal brings any discomfort.

Phillips Milk of Magnesia has won medical endorsement. And convinced millions of men and women they didn't have "indigestion." Don't diet, and don't suffer; just remember Phillips Pleasant to take, and always effective.

The name Phillips is important; it identifies the genuine product. "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

**MILL WORKER BENEFITED**

Picked Up After Taking Lydia E. Pinkham's Vegetable Compound

Towanda, Pa.—"I was working in a silk mill and got so tired and rundown that I weighed only 80 pounds. I was not well enough to do my work. As soon as I began to take Lydia E. Pinkham's Vegetable Compound, I began to pick up. After being married for thirteen years, I had a baby boy and the next year I had another boy who now weighs 37 pounds and is healthy as a bear. The Vegetable Compound has helped me in a dozen ways and I hope others will try it too."

Mrs. C. B. Johnson, Webb Street, R. D. #6, Towanda, Pennsylvania.
