

Hailstorm Rips 'Heart Of Texas' Area

Coleman And Eastland Hit Heavy Blows

COLEMAN — (P) — A driving hailstorm ripped through a broad stretch of the Heart of Texas Saturday night. It smashed windows, damaged roofs and destroyed shrubbery and young crops that had broken through the ground. Cities reporting damage were Coleman, Eastland, Pioneer and Cross Plains. Here, the hail piled up to cover the ground. In Southeast Eastland, it lay six inches deep. Several witnesses described the stones as being as big as hen eggs. The commercial peach orchard belonging to Doss Alexander, three miles east of Pioneer, was stripped. In Coleman, all windows and venetian blinds on the south and east sides of the Coleman County Courthouse were destroyed, Sheriff H. F. Fenton reported. Milton Autry, Coleman editor, said all the south windows of the five-story Coleman State Bank Building were driven in. Autry said automobiles were dented badly. He saw the top of a convertible ripped to shreds. The hail destroyed the windows of the glassed-in porch at Autry's home. Like Sledge Hammers A high wind accompanied the hail. Utility lines were torn down. At least one telephone pole was toppled. Autry said he was in his automobile when the hail hit. He said it sounded like someone was beating on the car's top with sledge hammers. The roof of a warehouse on the second story of a building was ripped up. The warehouse was used by (Continued On Page 11)

Battle For Life Of Ball Club Looms

Midland faces a baseball crisis Sunday morning. Unless the city rallies behind a move to retain the Midland Indians, they will be moved to a new venue on the Ballinger-Winters reservation. A delegation from these cities will be at a Loughorn League meeting at 10 a.m. Sunday in Hotel Scharbauer to make Owner-Manager Harold Webb an offer to transfer the Midland franchise to Ballinger. But a counter-move was forming in Midland Saturday night. Baseball enthusiasts urged interested persons to meet at 9 a.m. Sunday at the hotel, either to make an offer to Webb or to seek a delay in a transfer vote to allow time for money to be raised here to purchase the Indians from Webb. Webb said he would be at the hotel at 9 a.m., an hour before the league meeting, "ready to listen to a proposition to present to the league." The Midland baseball mogul said a telephoned proposition came from Ballinger Saturday. Meeting Urged "An automobile dealer said they'd be here with a letter signed by 100 men in Ballinger and Winters endorsing the move. They're coming prepared to make an offer. "If I go there I'll still own the club and the players." Cotter Hiett, one of the first to bring organized baseball to Midland, issued an announcement over the baseball park public address system Saturday night urging boosters to meet in Hotel Scharbauer at 9 a.m. Sunday to save baseball for Midland. Heavy applause by the fans followed the announcement. J. C. Smith, retired businessman and baseball booster, also urged in (Continued On Page 11)

European Manhunt For AWOL Diplomats Shifts Toward Italy

LONDON — (P) — Two AWOL British diplomats led master detectives and secret agents on a will-o'-the-wisp chase Saturday night in one of the greatest manhunts in European history. The cold trail appeared to shift from France to Italy. The day's only important news came in a Foreign Office disclosure that a cablegram concerning a "long Mediterranean holiday" of the Russian-speaking Guy Burgess was filed from Rome. Roman police and customs officers of Italy—which has the largest Communist Party outside Russia—quietly joined in the quest for Burgess and his companion, without results. No Certain Trace Fifteen thousand sleuths ferreted through continental hideouts, but no certain trace of either had been spotted since their trail went cold in Rennes, France, two weeks ago Saturday. Fears mounted here that the pair may have decamped or been spirited to the Communist East with British-American secrets. Burgess is the 40-year-old hatcher and expert on Marxist lore recalled from his job as second secretary of the British Embassy in Washington after he used his diplomatic immunity to get out of three jams for speeding in Virginia, February 28. He vanished 15 days ago with Donald D. MacLean, 38, scholarly but debonair chief of the Foreign Office's American department. MacLean's American-born wife, the former Melinda Marling of New York, is expecting their third child shortly.

Reds Stiffen Resistance In 'Triangle'

TOKYO — (P) — Red resistance has stiffened along the Korean battlefield the last 24 hours and an Eighth Army spokesman said the foe showed "every indication" of fighting for Chorwon and Kumhwa. Allied units pressed closer to the two vital road and rail hubs anchoring the "Iron Triangle" assembly area. United Nations troops thrust close enough to Chorwon to see 3,000 Reds digging entrenchments. To the east, an Allied tank patrol reached within four miles of Kumhwa. Evacuation Reports False Earlier, field dispatches had said thousands of Chinese were abandoning the two cities. An Eighth Army spokesman said Sunday there was no sign of any widespread evacuation. "There is every indication that, quite to the contrary, the Communists intend to defend that area," he added. UN infantry slogged through muddy terrain for gains up to three and one-half miles northeast of Yonchon. It is 13 miles southwest of Ohorwon. Immediately south of the threatened city, Allied troops were held to advances of a mile and a half by stubborn fighting near guard Reda. AP Correspondent Tom Bradshaw at Eighth Army headquarters said heaviest Red resistance still was in the Yonchon, Hwachon and Yangju areas. Yonchon and Hwachon are on the approaches to the triangle; Yangju is in East-Central Korea. Saturday's field dispatches, heavily censored, indicated thousands of Reds were pulling back while rear guards were engaged by the Allies with bayonets and hand grenades. These reports said the main body of Reds appeared to be falling back toward Kumson, 12 miles northwest of Kumhwa, and toward P'yonggang, the triangle's apex.

LAST ROUNDUP?—It's four to one against the calf in this scene at the Chicago Stockyards. The lone calf has an escort of four handlers on its way to the slaughterhouse, giving a graphic picture of the situation at the major meat-packing centers, where beef on the hoof is disappearing in the wake of protests by cattlemen and packers over government price rollbacks.

California Exposes Texas Divorce Mill

LOS ANGELES — (P) — Detectives said Saturday up to 1,000 California couples who think they were divorced in Texas still are legally married. The arrest of Willie Hawkins, 38, negro law student, disclosed he worked through two lawyers in Texas in obtaining "divorces" at \$120 each, Detective Charles Ribblett of the Bunco Detail said. Hawkins was booked on four counts of petty theft and three counts of violating the business and professional code. The Texas lawyers were not identified. The California State Bar Association and the district attorney's office here conducted the inquiry. It was set off by seven bigamy cases in Sacramento, where Ribblett said Hawkins employed an assistant. Hawkins himself denied anything was wrong. As evidence of his conviction the divorces are legal, he said his own wife obtained a divorce from a previous husband by the same method. Ribblett said "clients" were told they could get a divorce in 30 to 60 days without having to establish residence in Texas. Investigator George Bezanens of the district attorney's office said that except for Hawkins, all the other persons questioned so far in the case are white. Innocent Victims He added that the Texas Bar Association has launched an inquiry to determine whether there is evidence of a conspiracy to defraud the courts. Lt. Walter Sullivan of the district attorney's office here said the number of innocent victims of the scheme "must run into the hundreds." "We want to know who they are. "We know they are innocent victims, but we're thinking of the term (Continued On Page 11)

Ralph Mills Named MHS Band Director

The Board of Education of the Midland Independent School District Saturday announced the selection of Ralph L. Mills as band director for MHS. Mills is a graduate of McMurry College and attended San Jose State in California. This summer he is assisting at Texas Tech's band school. He is a graduate of Abilene High School. Mills is married and has two children. He was band director at Crockett Junior High of Odessa two years and held a similar position at La Mesa High School for two years.

Experts Seek Cause Of Nation's Worst Jet Plane Disaster

RICHMOND, IND. — (P) — Air Force and FBI experts Saturday tried to determine whether sabotage, a thunderstorm, mechanical trouble, or human errors caused the nation's worst jet plane disaster. Eight fast-flying F-84 Thunderjets, racing at 500 miles an hour across the Indiana-Ohio border in a group of 71 jet planes, suddenly floundered and flopped to earth Friday from stormy skies. Three pilots were killed, two were injured, and three others escaped unhurt in the mysterious mass crash. Two of the unhurt pilots rode the sleek planes down and a third parachuted. Among theories studied was one that "wrong" fuel was used. Before investigators sealed their lips, one surviving pilot told newsmen the crash cause "wasn't the weather." Another said the jet power unit of his plane exploded as his craft streaked 17,000 feet above Richmond. The possibility of sabotage was investigated by federal men. But an Indiana State Police lieutenant, a World War II flier, said "the sabotage theory is far-fetched."

Man Has No Home; Police Provide One

Police Officer Herb Runyan tried to be as accommodating as possible Saturday afternoon. He sat in his car at Big Spring Street and the railroad tracks and watched a man trying to climb into a box car. Three times he tried and three times he fell flat on his face. Officer Runyan walked up to the man and offered to see him safely home. "I have no home," answered the man. Officer Runyan provided him with one—in the city jail—on a charge of drunkenness and vagrancy.

Doughboys Forcibly Eject Red Mission From American Zone

SALZBURG, AUSTRIA — (P) — American soldiers put an armlock on a struggling Russian chauffeur, dragged him from his car and forcibly escorted him and two other members of a Soviet reparations mission from the U. S. zone Saturday. The mission was asked June 1 to leave. It ignored the deadline of midnight, June 8. The mission, here to assist Russians who wish to return home, repatriated only 26 persons in the year ending last September, and American officials considered its business was ended. Saturday the Russians—headed by Col. Alexander Smirnov—were tricked into leaving the American-requisitioned Cheesemakers Inn, where they occupied 21 of the 24 rooms in this U. S. headquarters city, to go to the displaced persons branch of the U. S. Army for talks. They again refused to leave the zone. Returning to the inn, they found the door blocked by an American Army truck and their baggage being loaded by American soldiers. Dragged From Car When the truck was loaded, Maj. G. E. Hartel, the American escort officer, approached the big black car in which the Russians were waiting and asked them peacefully to follow the truck to the Soviet zone border. Again the Russians refused. Thereupon Hartel, assisted by a lieutenant and two GI's, opened the driver's door. Together they dragged the stouky chauffeur, Sgt. Vasily Elistrator, from his seat and held him while the American lieutenant took the wheel. The convoy, including the Russian car, two U. S. Army sedans and the truck, then drove to the Euns River bridge at the American-Soviet border, 78 miles east of Salzburg. The three Russians were handed over to Soviet officials.

Lee Price Elected New JayCee Chief

MIAMI, FLA. — (P) — The U. S. Junior Chamber of Commerce adjourned its national convention Saturday after electing Lee Price, 33, of Swainsboro, Ga., its new president. Price won the election over Ed Rood of Tampa, Fla., and Bill McDanel of Dallas. He was chosen on the ninth ballot after McDanel, who had trailed the other two candidates throughout the voting, withdrew. Rood then asked that his name be withdrawn and Price's election made unanimous. The Howard A. Marks awards for outstanding work among Junior Chambers of Commerce throughout the nation went to Baytown, Texas, for cities under 25,000 population, and Dallas for cities of more than 100,000.

Broadened Search For Odessa Plane Proves Fruitless

ROSWELL, N. M. — (P) — Another day of search for a missing Texas plane with four persons aboard ended Saturday without success. During the day, 20 military craft from Reese Air Force Base at Lubbock, Texas, searched a vast area charted by an air rescue squadron from March Air Force Base in California. The area is bounded on the east by the Sacramento Mountains, on the west by the San Andres Mountains, on the south by El Paso and on the north by the Salinas Peak, northwest of Alamogordo. The search area was broadened when earlier flights along the route of the missing plane from Ruidoso to Odessa and over the White and Sacramento Mountains proved fruitless. Aboard the missing aircraft, last reported at 9 a.m. Monday from Ruidoso, were James Roe, 51, an Odessa businessman; his wife Edna, 34; Mrs. Edith Sharpe, 36, owner of an Odessa drugstore, and Evelyn Wright, 34, an employe at the drug store.

Bell Cuts Service To Cafe Sending Out Race Results

ORANGE — (P) — Telephone service was shut off Saturday to an East Orange, La., cafe from which the Texas attorney general charged racing information was transmitted to Galveston. The termination of service included the unlisted number of Felix DeMary's Border Cafe, the telephone in DeMary's office and that listed for the Border Cafe in the Orange directory. Jack Bailey, Orange manager for the Southwestern Bell Telephone Company, said the service was discontinued under a standing order which forbids "the use of our facilities for illegal purposes."

Preacher Named Humane Officer

The appointment of a new humane officer for the City of Midland was announced Saturday. He is J. C. Hughes, pastor of the First Free Will Baptist Church. Hughes, according to the announcement by Assistant City Manager Morris Howard, will be charged with the enforcement of the city's dog ordinance. He replaced E. M. Stewart, who was transferred to other duties. Hughes took over his duties, including the operation of the Animal Shelter, at noon Saturday.

Truman Slates Radio Talk Thursday Night

WASHINGTON — (P) — President Truman will address the nation Thursday night in another effort to rally support for his anti-inflation program. The White House Saturday announced the speech will be made at 8:30 p.m. CST, and will be carried by all radio and television networks. The President will speak from his office in the White House. Hoover-Sales Service, Midland Hardware & Furniture Co.—(Adv.)

★ LATE NEWS FLASHES ★

TOKYO — (AP) — For the third straight night, B-29 Superforts Saturday night sprayed the Reds' "Iron Triangle" with 50 tons of 500-pound fragmentation bombs, and carrier-based aircraft used napalm to make the assembly area a flaming hell. DENTON — (AP) — Rain fell here in torrents, accompanied by some hail and high winds, late Saturday night as a series of cool front storms crept across Texas. TEXARKANA, TEXAS — (AP) — Returns Saturday night showed Bowie County had voted dry again, 6,678 to 3,445, but thirsty Texarkanas still can buy all the drinking liquor they want across the state line in wet Arkansas. Hoover-Sales Service, Midland Hardware & Furniture Co.—(Adv.)

Midlander Named Vice President Of Scouts, Landmen

BEAUMONT — (P) — Lee Steedman, Pure Oil Company scout from Tyler, was elected president of the National Oil Scouts and Landmen's Association here Saturday. Steedman defeated W. C. Farquhar of Sinton. Leroy Francis, Jr., Jackson, Miss., was elected first vice president; Dave Ridgway, Casper, Wyo., second vice president; R. L. Denton, Midland, third vice president, and E. T. Hall, Calgary, Canada, secretary-treasurer. (Continued On Page 11)

PUT AWAY THAT WALLET, CORPORAL— Korea Veteran Just Drops In To See His Folks In Midland

By COPE ROUTH The slender, khaki-clad negro hesitated a few minutes before he finally opened the door and walked in. "I just wondered," he said, apologetically, "how much it would cost to get a little item in the paper." "What about?" he was asked. "Well," he answered, "I just got home and I thought maybe you could put a piece in the paper about it tomorrow." "Where've you been?" "I've been in Korea, but I got a 30-day furlough and I came home to see my folks. It's been a long time." "What's your name?" "Sanders. Howard Sanders—How-

ard Sanders, Junior. My papa's name is Howard, too. He works around town, don't yard work an' odd jobs. My mother is Willie Howard. She works for some families here in town." The little negro soldier shifted nervously and removed his colored glasses. Landed At Incheon "How long were you in Korea, Howard?" "Well, it was eight months. I first went in at a place called Incheon. Went in with the First Marine Division. Been there ever since." "Did you see much action?" "He instinctively glanced down at his brown shirt, where three tiny stars gleamed from a second row of ribbons. "Yes, sir. I guess I saw all the action I want to see for a long time. "From Incheon we fought on north to the Manchurian border. We got right to the Yalu River before we stopped. That's when those other people came into the fight." "You mean the Chinese Communists?" "Yes, sir. The Chinese. That's when things got pretty tough, too. "The North Koreans weren't so bad. But those Chinese, they were good fighters and there were lots of 'em. They used to send maybe 4,000 at us at one time. Well, at least 1,000 wouldn't have any guns (Continued On Page Five)

MISSING BRITISH DIPLOMATS—The mystery of the disappearance of two high ranking British diplomats, Donald MacLean, right, and Guy Burgess, center, deepened in London when it was discovered their families had received messages from them which were not in their handwriting. At the left is MacLean's American-born wife, Melinda Marling MacLean. A Europe-wide search for the missing officials is underway. (NEA Radiophoto)

+ Rankin News +

RANKIN—The Adult Council for Youth met Tuesday night in the Park Building. It was decided to sponsor a youth party each Saturday night through the vacation months, the first to be a play party June 18, chaperoned by Mrs. Jack Smith and Mr. and Mrs. Ralph Daugherty. All Junior and Senior High School students including the

recent graduates are invited. A meeting of the Youth Council is called for 8 p.m. Monday in the Park Building.

Another Story Hour was enjoyed Saturday morning in the library in Rankin. Lucy Schovajsa told "Silly Billy" by Sally Scott and "The Elves" by Lucy Crane. Elbert Eckols told "The Golden Touch" by Nathaniel Hawthorne and "A Tale of Peter Pig" by Esther Cooper. Mary Anderson read the fifth chapter of the book, "Martin Butherford" by John Burgan, and Ruth McGill read "Mr. Dawson Had Cold Feet," "Mr. Dawson Does Some Painting" and "Mr. Dawson Delivers The Eggs."

Mrs. J. S. Lindley is in Rankin at the home of her daughter, Mrs. S. H. Boyd, where she expects to visit for an indefinite time.

The white stork is believed to be strictly monogamous.

LIMITED QUANTITY
Quicksilver, or mercury, occurs in nature in a free state, but only in very small quantities. Commercial mercury is obtained chiefly from cinnabar ore, the sulphide of quicksilver.

REGAL REPRESENTATIVES
Canadian governors - general are appointed by the king and represent the crown, performing functions similar to the king in Great Britain.

TOOK BIDS FOR CANNONS
The earliest cannon manufacturers formed a guild who kept the secrets of their craft and sold their skills to the highest bidder, according to the Encyclopedia Britannica.

* IN HOLLYWOOD *

Joan Blondell Is Pouting At Hollywood These Days

By **ERSKINE JOHNSON**
NEA Staff Correspondent

HOLLYWOOD—Gays and Dolls: Joan Blondell left for Manhattan with a mild mad-on at RKO for drumming up the fact that the song-and-dance number she does in "The Blue Veil" is her first since "Goldiggers of 1933."

When I saw her, Joan was growling about the questions concerning Ruby Keeler, Dick Powell, Ginger Rogers and her other teammates in the early Warner musicals.

"All those questions about 1933," Joan said. You'd think I'd been under a rock all these years.

Time was when Bob Mitchell worried about story line and dialog but now he's a relaxed character. He says:

"Retakes, remakes, nothing bothers me. I just come to work in the morning, say the jokes, quit at five and fall into bed. I lost my dramatic innocence long ago."

It may not have anything to do with the size of TV screens, but the market's wide open around the casting offices for glamorous pee-wees like UI's new and sultry Susan Cabot.

The lass is only an inch or so over the five-foot mark and her studio is grooming her to fill Yvonne de Carlo's pumps as a charmer.

Getting ready to do a scene with towering Jeff Chandler in "Flame of Araby," Susan told me: "They'll have to get a step-ladder for me. I get the shakes working with big hunks of men. But then I think of Gloria Swanson, Bette Davis and Helen Hayes, and I feel better. They did all right as short girls."

THEY'RE slapping the powder and paint on husky grid hero Bob Woodward for his film debut in a Jungle Jim thriller, and wife Jane Russell is as unhappy about it as Bob.

The queen of the RKO lot frowned and fumed:

"Poor Bob. They're putting that horrible body makeup on him. They're drawing things around his eyes and making him look like a ghoul."

But there's not one molecule of fear in Jane's noggin that Bob will turn out to be a ham.

"It's strictly a business proposition with Bob," she says. "He may have makeup on his face, but there's no stardust in his eyes."

Rod Cameron hemmed and hawed, but finally admitted it.

"That's Rod and not just a look-alike in some of these old western films on the TV screens."

"But heck, I didn't even know how to ride a horse then and you have to look awful quick to see me," the cactus-and-sagebrush hero said. "I played everything—musicals, mysteries, even a priest once—when I was with Paramount years ago. I even did the test with Ingrid Bergman that got her the role in 'For Whom the Bell Tolls.'"

Rod's playing a deep-sea diver in the "Sea Hornet," but he denied that he's giving up whiny-and-snort pictures because the top Hol-

lywood profile boys are all going in for westerns these days. The Cameron observation on the trend:

"Some of these guys are cutting their throats. They just can't look like cowboys."

ON THE ROAD

SHORT TAKES: Frances X. Bushman, the veteran star who plays King Saul in "David and Bathsheba," will hit the road to lecture on the old Chautauqua days. Theater managers are predicting a serious film product shortage by Fall. Another flock of re-issues will be dusted off. . . . Hal Roach, Jr., has sold a new TV film series, "Don't Be a Sucker" to a cigaret sponsor.

Gertrude Astor, star of the silent flickers, is celebrating her 37th year in the movies and her 1400th role—the landlady in Columbia's "The Dark Page." She came to California in 1914 to star in the first screen version of "Under Two Flags."

Jack Benny's entertainment tour in Korea this Summer now has Uncle Sam's official blessing. He'll leave in late June when his radio series concludes for the season.

Joan Evans is hopping mad over rumors she's battling to get out of the junior miss set. Sweet-sixteenish Joan told me: I'm not fighting with anybody. As long as I'm a teen-ager, I may as well play these parts."

Hedy Lamar still is walling about that famous in-th-flesh swimming scene in "Ecstasy."

"People won't let me forget this infamous thing that happened to me 20 years ago."

Economy flash: A major lot just put a \$100,000 ceiling on all star salaries. During the war they went as high as \$275,000 per film.

Building Permits \$66,200 For Week

Construction permits issued in Midland during the week ended Saturday were comparatively light, \$66,200. The 1951 building permit mark now is \$6,665,803.

Two permits, one for \$12,000 brick veneer residence at 2308 West Kansas Street and another for an \$8,000 frame residence at 203 West Ham-by Street, were issued to Marion Taylor. The two permits totaled \$20,000.

H. G. Walters received a permit for a \$15,000 brick veneer residence at 1001 Douglas Street, 31 by 76 feet.

J. S. Burkett took a \$12,000 permit for a brick veneer residence at 3215 West Louisiana Street, 36 by 53 feet.

Other Permits Granted
Other permits of the week included: W. K. Bigham, \$5,000, frame residence at 422 Spruce Street, 28 by 38 feet; F. C. Fitzgerald, \$4,500, frame residence at 406 South C Street, 24 by 44 feet; E. J. Boyce, \$3,000, frame servants quarters at 1006 South Colorado Street, 20 by 26 feet.

Delbert Harris, \$2,500, tile block beauty shop building at 210 East Florida Street, 28 by 40 feet; Earl Bradford, \$2,000, frame servants quarters at 2011 North Bryant Street, 18 by 28 feet; Samuel B. Menchaca, \$1,200, frame residence at 710 North Dallas Street, 20 by 20 feet; L. D. Harris, \$1,000, frame storage vault at 604 West Kentucky Street, 8 by 26 feet.

Sunday Program Will Dedicate Cabin For Scouts

A log cabin meeting house for Boy Scout Troop 151 and Explorer Post 151, provided by the Midland IOOF chapter, will be dedicated at ceremonies scheduled at 3 p. m. Sunday.

The ceremonies will be held at the cabin.

Speakers include a representative of the Buffalo Trail Council and Leonard Miller of Midland, Grand Warden of the Grand Lodge of Texas IOOF.

The log cabin meeting house is located on East Florida Street on the site of the IOOF Park. It was built of logs from New Mexico and is 24 by 20 feet.

Lodges of Big Spring, Odessa, Andrews, Brownfield and other surrounding cities will have delegations at the dedication.

Boy Scout Troop 151 and Explorer Troop 151 members will be present for the ceremony in full uniform. Also, representatives of other Scout units in Midland have been invited to attend.

Much of the work in building the log cabin was contributed by IOOF members. Approximate cost of the building was \$1,000.

A get-together and feed for visiting Odd Fellows will be held following the dedication, at the IOOF hall.

Midland Students Among Texas Tech Men To Be Trained

LUBBOCK—Eighty-seven ROTC students from Texas Tech will begin a six-week Summer training camp next Saturday.

This training, necessary to advanced students before they are commissioned, will be conducted at four different camps, depending on the branch of service. The training will be completed July 27.

Col. Willard White, professor of military science and tactics at Texas Tech, is camp commander for the Engineer Corps center at Fort Belvoir, Va.

ROTC officials announced that approximately 30 percent of the cadets going to camp have been tentatively designated Distinguished Military Student. Should they maintain this high standard of proficiency until graduation, they will be eligible for consideration for a commission in the regular army.

Cadets who will attend the Belvoir training include Richard E. Clark, Larry A. Bedford, and Elmer F. Lamb, all of Midland; Joseph E. Ashton, Lamesa; and Duane Fritz, Midland, who will train at Fort Hood, Frank N. Foster, Pecos, who will go to Fort Mammouth, N. J.; Charles E. Clarke, Midland; Billy C. Cook, Odessa.

MIDLANDER GRANTED PERMIT
AUSTIN—An oil and gas dealer license for Joseph R. Bossman of Midland was mailed Friday from the office of John Ben Sheppard, secretary of state.

At the equator, twilight is very short because the sun goes down more quickly in those latitudes than farther north or south.

MIDLANDER HAS GUESTS

Mrs. Mollie McCormick has as her houseguests this weekend her brother and sister-in-law, Mr. and Mrs. John Vest of Roswell, N. M.

The moon was shaken off an unstable young earth thousands of years ago, according to the latest report of the origin of the moon.

Gossett Confirms He'll Quit Congress For Telephone Job

WICHITA FALLS — (AP) — Rep. Ed Gossett announced he was resigning from Congress to take a \$25,000-a-year job with Southwestern Bell Telephone Company.

Judge Frank N. Icard of 30th District Court said he would run for Gossett's place in Congress. There was speculation a number of others planned to do the same.

Gossett said Friday his resignation as representative from the 13th District would become effective July 31.

He will become general attorney for Texas for the telephone company, with headquarters in Dallas. Gossett, a leader in the fight against federal ownership of telephones, has been in Congress since 1939. Before that he was district attorney for the 46th District and earlier had practiced law in Vernon and here.

State Senator George Moffett of Chillicothe, defeated twice by Gossett in the race for Congress, said he would not run again.

Gov. Allan Shivers said he had not received Gossett's formal resignation and would not set a date for a special election to select a successor until he had received the formal notice.

Texas Construction Totals \$582,074,134

AUSTIN — (AP) — Construction awards for non-residential building totaled \$20,754,223 in Texas this week.

Residential accounted for \$4,457,800, and engineering \$3,230,098. The 1951 accumulative total for lettings climbed to \$582,074,134.

Advertise or be forgotten.

Telephone Science Fights To Stay Ahead In Race With Texans' Abundance Of Gab

Texas are the talkiest people. Billy G. Yeatts, district manager for Southwestern Bell Telephone Company, is the authority for this—with facts to prove it.

Last year Texans lifted their telephone receivers more than 74,000,000 times to give "Long Distance" the number of Aunt Minnie in Chicago, to talk to sister away at college, or to make a call to the factory about that merchandise order that hadn't arrived.

To handle all of this conversation, Southwestern Bell, principal carrier of long distance calls in the state, has made tremendous strides expanding its Texas network in the five years since the war, according to Yeatts. And just in the offing are marvels of modern communication to bring even more improvements.

For instance, there's direct dialing of long distance calls by the operator, and there's microwave radio relay and more coaxial cable going in to handle more calls by the millions. Much of this will be at the service of talking Texans before the year is out.

Growing Texas is requiring more and more wires, cable, switchboards and intricate carrier equipment to channel the constantly growing flood of long distance calls to every corner of the state and nation.

More Advances To Come
Texans now make a third more long distance calls than they did five years ago. Their talk flashes over more than 7,600 circuits on 500,000 miles of wire that crisscross the state. More than 3,300 of these circuits and 110,000 miles of wire have been added since 1945.

But if Southwestern Bell has made big expansions in the last five years, the next 18 months hold even more advances in store in the art of telephony. The company plans

to spend more than \$43,000,000 in 1951 and 1952 to improve its long distance system in the state. It plans to have more than 1,800 additional circuits in service in the next year and a half so it will be able to handle the 91,000,000 calls Texans are expected to place in 1952.

One of the biggest advances in the handling of long distance calls is direct operator dialing, already in service between several cities in the state, which is scheduled to get its big push this year when 15 cities are put on the national network.

When this happens, operators in these towns will be able to dial direct the numbers of telephones in more than 1,000 other cities from coast to coast. In 1952 a dozen more Texas cities will be added to the network, and the company will have spent more than \$8,000,000 in two years on equipment alone to handle this ultra-modern type of calling, not to speak of some \$16,000,000 scheduled for some talking circuits.

New Microwave System
To telephone users it will mean their calls will go through faster, as the operator in their own city will be able to dial a number direct in such places as New York, Chicago or San Francisco. Speed of calls has increased rapidly in the last five years—from an average of about five minutes a call in 1945 to less than two and a half minutes. With the increase in operator dialing, telephone people expect calls to go through even faster.

More circuits for these faster calls in Texas are being provided by two projects now in progress. A coaxial cable link between Dallas and Houston is being plowed underground for service next fall. A section of the transcontinental coaxial cable already crosses the state underground from Shreveport to El Paso. These

Three Reese Fliers Die When Bomber Plunges Into Field

LUBBOCK — (AP) — Three Air Force fliers died Friday when their B-25 bomber smashed into a plowed field and exploded.

Reese Air Force Base here identified the dead as First Lt. Stephen C. Frost, 31, Emmett, Idaho, Pilot; First Lt. LeRoy Adams, 35, Kansas City, Mo., co-pilot, and T/Sgt. Billie D. Jantzen of Hammond, Okla., flight engineer.

The plane had left Reese on a routine practice flight 15 minutes before it crashed, 10 miles southwest of here.

Reford Clark, who was plowing in the field, said the plane exploded the instant it struck the ground. Cause of the crash has not been determined.

Cables are capable of carrying up to 2,400 conversations at one time on four pairs of copper tubes.

An even more recent development is transmission of calls by microwave radio relay. A microwave relay system now is being installed between Austin and San Antonio to be in service early next year. This consists of a series of four towers between the two cities which alternately pick up and relay to the next tower hundreds of telephone conversations at one time. This system is planned for extension eventually through Dallas to Kansas City.

These and probably other costly super-voiceways, both through the air and on cable will be needed in the future to carry long distance messages for talking Texans. And if calls continue to increase as they have in the last few years, Texans will be lifting their receivers for "Long Distance" almost twice as often next year as they did back in 1945.

Cowboy Guitar Player Pleads Insanity In Little Girl's Murder

SANTA ANA, CALIF. — (AP) — The man charged with kidnaping and murdering Patricia Jean Hull, 10, says he was insane.

Henry Ford McCracken, 34, pleaded innocent and innocent by reason of insanity at a hearing Friday. The court named three psychiatrists to examine the cowboy guitar player and set the date of his trial as July 9.

The child disappeared May 19. Her body was found in a mountain grave May 24. McCracken has insisted he knows nothing about the death.

Pioneer Managers To Hold Meeting

Pioneer Air Lines managers from Dallas, Fort Worth, Midland, Big Spring, Sweetwater, Mineral Wells, Abilene and San Angelo will meet in Abilene Monday with company officials from Dallas, according to an announcement by Tom E. Nance, superintendent of stations.

Those who will attend the meeting, and their home cities, are Jack A. Russell, Dallas; George A. Allen, Fort Worth; Marshall E. Warren, Abilene; Jack R. Merrick, Sweetwater; Billy R. Watson, Big Spring; O. H. Morgan, Midland; James Tuttle, Mineral Wells; and E. L. Taylor, San Angelo.

From the Dallas general offices of the company will be Nance; George K. Harris, operations manager; J. W. Womack, assistant to the superintendent of stations; John W. Force, superintendent of reservations; and W. D. Price, Jr., superintendent of communications.

The first U. S. Army was composed of 10 companies of flemen—six from Pennsylvania and two each from Virginia and Maryland.

Higher Wages Will Bring Phone Rate Hike, Manager Says

Higher wages for telephone employees will mean further increases in rates for telephone users, according to Billy G. Yeatts, district manager of the Southwestern Bell Telephone Company here.

"The increased wages granted telephone employees Tuesday will have to be reflected in increased rates," Yeatts said.

"The company's total earnings on its Texas property last year, even with former wage levels, were far too low—much lower than other representative industries make. The increase will, of course, force our earnings even lower unless they are recovered through higher costs of furnishing telephone service.

"This must be reflected in increased rates throughout the state. It makes even more urgent the need to reprice telephone service in line with present costs.

"Total costs of this wage increase in Texas are estimated at well over seven million dollars a year. This brings the current annual cost of wage increases granted in the state since 1939 to 42 million dollars, while the company has received 21 million dollars annually through increased rates—about half of the increased wages.

"This," Yeatts said, "is a situation which cannot continue without jeopardizing the future of good telephone service. Wage costs take half of all the money we take in from the sale of telephone service."

Slumber On Our "Sleepy Time" VALUES

the 1, 2, 3, FOLD-A-BED

In Nationally-Advertised Smith or Kroehler Brands

Imagine a loveseat, graceful and well-designed, that is not easily recognized as a dual purpose piece. Yet when the occasion demands, opens to provide a sleeping surface greater than a standard-length mattress! Upholstered with rubberized, curled hair padding, lifetime upholstery material... giving added comfort for both sitting and sleeping. The three fold bed section is fitted with 182 innerspring coils.

Specially Priced at **139⁵⁰**
(Also available in twin-bed sectional style - 249.50)

1 To open the Fold-A-Bed, merely grasp the concealed head strap and pull gently upward.

2 With the other hand, ease the front edge out and down. The back automatically glides into position.

3 To close the Fold-A-Bed simply lift the outer edge and push inward and down.

SIMMONS' HIDE-A-BED

Recognized throughout America as one of the finest, most comfortable divan-beds ever made! Come in and test for yourself the cushiony quality of extra-deep springs... see for yourself the graceful style upholstered in rich fabrics to harmonize with your furnishings. Full and three-quarter size.

289⁵⁰

Simmons' Deep Innerspring Mattress

A name that assures satisfaction is behind the manufacture of this multi-coil mattress! And it's beautiful! Broad contrasting stripes... colorful, long-wearing material... and a strong invitation to try the famous comfort underneath.

Texbook For Kremlin

From the moment the Senate decided to investigate General MacArthur's dismissal and the whole field of U. S. Asiatic policy, it was evident there would be a security hazard.

The feeling among Senate leaders nevertheless was that the inquiry was of such great importance as to justify the risk.

To a substantial degree, their judgment has been proved sound. Probably never before in history have the American people had so complete a lesson in the ways by which the nation's key political and military policies are conceived and carried out.

In an age when perhaps too much government is conducted behind closed doors, this has been a basically healthy thing. It is a stirring example of government being responsive to the people.

Yet this demonstration of democracy at work has not been had without a price. The Russian news agency, Tass, gets a complete transcript of testimony from the MacArthur hearings. It is thereupon transmitted to the Kremlin. Even the number of words deleted by committee censors is recorded by Tass.

These deletions are the committee's way of meeting the security hazard. Generally, they strike out figures dealing with troop dispositions, plane concentrations, submarine deployment, and the like.

There is a growing fear, however, that even with such deletions the testimony is supplying the Russians with intelligence so supremely vital that our national safety may be endangered. General Bradley voiced deep concern the other day, Senator Tobey, New Hampshire Republican, struck a similar chord in urging a quick end to the inquiry.

The greatest danger doesn't necessarily lie in disclosures of specific figures. It may reside in unfolding to the Kremlin how we evaluate particular political and military situations, what processes of thinking our high command goes through in arriving at decisions, how we react to certain types of Soviet behavior.

In other words, while we are giving ourselves a lesson we also are instructing the Russians intensively. And we may be sure not one chapter in the lesson is being passed over lightly by the Kremlin.

Obviously, some of this was inevitable once it was decided to release a reasonably complete account of the hearings.

But some of the senators engaged in the inquiry seem bent upon turning up for public gaze every last document with any bearing, however remote, on either the Korean war or our Far Eastern policy.

Is there to be no limit to the willing disclosure of confidential information? Are we virtually to invite the Russian Politburo into the President's private study, to eavesdrop on our most critical secrets?

Lawmakers who believe their senatorial responsibilities compel them to seek out such vital information are not well guided in the interpretation of their duties.

Men who press the search to gain purely political advantage are not likely soon to be forgiven by the people they are sworn to serve.

The role of Congress in our government is secure. Its vigor is apparent. To hold its own it needs neither to strut its strength nor to take blatant risks with the safety of this nation.

Why is it that some folks usually use an office to look for sleep they lost the night before?

If you must hand out the lowdown on your friends, make it high praise.

Who remembers when folks used to go to movies to practice reading out loud instead of to crunch popcorn?

A lecturer says if you look any wild animal straight in the eye, it will run. Which way?

A professor says students gain little by burning the candle at both ends. Unless it makes their outlook brighter.

There's a lot of difference between knowing what you ought to forget and forgetting what you ought to know.

The money you have to pay back-always looks about twice as large as the money you borrowed.

Some folks call these days hard times because they're unable to borrow the full price of a new auto.

If you want to join the upper crust, just become the toast of society.

The best passing remarks we know of are the correct answers that youngsters give to school problems.

Firmly Planted

DREW PEARSON ON THE WASHINGTON MERRY-GO-ROUND

(Copyright, 1951, By The Bell Syndicate, Inc.)
Drew Pearson says: Some businessmen have had ties with underworld; American distilling executive was partner of Bugsie Siegel; Dean Acheson impresses senatorial critics.

WASHINGTON — They have managed to keep their names out of the crime headlines, but many legitimate businessmen have been found dealing with the underworld.

Somehow, they have avoided the front-page publicity given to the politicians whose underworld ties have been exposed by the Senate Crime Committee. For example, Chicago businessman George S. May, noted efficiency expert, was permitted to testify behind closed doors. He did not have to go before a public hearing. Yet even in privacy, May was tightheaded. He refused to answer questions about paying racketeer Ed Vogel a 40 per cent cut in the Tam O'Shanter Club's gambling profits.

Another big businessman, whose name has been shielded from the public, is Sam Rothberg, millionaire vice president of the American Distillery Company of Pekin, Ill., maker of Stillbrook bourbon, Old Coler's gin, Burton's 51 and various other brands. Senate investigators discovered that Rothberg was the financial angel, who helped mobster Bugsie Siegel build the flashy Flamingo Hotel in Las Vegas, Nev. Later Siegel was murdered by the underworld in the home of his girl friend, Virginia Hill.

The Flamingo story has been told in newspaper headlines, and was even made into a Hollywood movie. Yet Rothberg's part in the deal never got past the Senate investigators' report, and Rothberg was never called on the witness stand. Rudolph Halley, counsel for the crime committee, asked that the senators not cross-examine him.

However, Rothberg was given a significant grilling by Senate investigators, at which time he tried to explain the inside story of the Bugsie Siegel-Flamingo Hotel deal. At this grilling Rothberg told Senate investigators the highly important story that he had no idea Siegel was a notorious racketeer, and that he had invested \$860,000 in the Flamingo on a week's acquaintance with Siegel. Most businessmen, of course, do not invest \$860,000 on mere hearsay.

"He (Rothberg) was asked why he had sunk almost a million dollars into a venture on a week's notice with a nationally known gangster, and was further asked what his net worth was at that time," the Senate investigators' report states. "He said that his net worth was about two million dollars, and that he was impressed by the projected earnings of the Flamingo."

"He (Rothberg) said that his brother, Harry, knew Bugsie better than he did; that Bugsie knew all the better people in Los Angeles—actresses, etc.—and that he seemed to be in the social swim," the report continues. "Rothberg said that he never checked on Bugsie and never knew that he had been run out of New York."

"The (Rothberg) story, as reported by the Senate investigators who questioned him," Rothberg said that in 1945 or 1946, he went on vacation to California and visited his young brother, Harry, in Los Angeles. Through him, Rothberg said, he met Bugsie Siegel—where and when and under what circumstance he was not too clear about. He thought it might have been at the La Rue Restaurant, which was then managed or owned by Bill Wilkerson. The only persons present at this meet-

ing were his brother, Wilkerson and himself. "During this meeting, or shortly thereafter," the report continues, "Siegel, Wilkerson and his brother talked to him about a hotel project which would bring fabulous profits. Asked why he was interested, Rothberg said that he was desirous of giving away money to charity. When questioned further, he admitted up to that time he had engaged in philanthropies to the extent of about \$5,000."

The report goes on to tell how Rothberg, after only a week's persuading, invested \$250,000 in the Flamingo. This was supposed to represent 50 per cent of the undertaking, although Rothberg eventually was hit for a total of \$860,000. The Nevada Projects Corporation was formed to build the hotel with racketeer Bugsie Siegel as vice president. Met Virginia Hill "When Rothberg went out there to the grand opening of the Flamingo in the Spring of 1947, he said he met Virginia Hill for about half an hour," the report adds. "However, he said that he had never met a man with Bugsie who was supposed to be his bodyguard, but did admit meeting and knowing Allen Smiley and Moe Smedway and Morris Rosen (West Coast racketeers)."

"Rothberg does not believe that his Flamingo venture has militated against him or affected him in any way with his American distilleries position or interest," the report notes. "Rothberg persistently reiterated that no force or anything like 'muscle' was used in inducing him to make the investment. The only thing anything resembling persuasion was used, was when they were calling for more money to meet the construction costs."

"The place (Flamingo Hotel) was sold in 1948 about thirty days after Siegel was killed," the report winds up. "Rothberg still has stock in the Nevada Projects Corporation, and expects to get 70 per cent of his money back."

Questions and Answers

Q—Who has the authority to determine the colors for automobile plates?
A—The Motor Vehicle Commissioners of the individual states.

Q—What title did Archibald M. Willard first give to his famous painting "The Spirit of '76"?
A—Willard's title for the painting originally was "Yankee Doodle," under which name it was shown at the Centennial exhibition, but subsequently he re-titled it "The Spirit of '76."

Q—Who missed being President of the United States by one vote?
A—Aaron Burr. He became instead Vice President and while in that office killed Alexander Hamilton in a duel.

Q—Have the American ships lent to the Soviet Union in World War II been returned?
A—About 500 naval units were lent to the Soviet Union during the war. Of this total only one cruiser has been returned.

Q—Did Caesar really say "Et tu Brute" when struck down by Brutus?
A—There is no actual Latin authority for attributing it to Caesar. Shakespeare is responsible for the wording which appears in his play, Julius Caesar.

Q—Who wrote on the blackboard, "I didn't have no fun last week" and then asked the class of fifth-graders, "How should I correct that?"
Willie said, "Get yourself a fellow."

Q—A teacher wrote on the blackboard, "I didn't have no fun last week" and then asked the class of fifth-graders, "How should I correct that?"
Willie said, "Get yourself a fellow."

Q—A teacher wrote on the blackboard, "I didn't have no fun last week" and then asked the class of fifth-graders, "How should I correct that?"
Willie said, "Get yourself a fellow."

JACOBY ON BRIDGE

By OSWALD JACOBY
Written for NEA Service

Today we have a little contest for our expert readers. Cover up the East-West cards and study just the North-South cards. How would you play the hand to make sure of six no-trumps?

A moment's thought shows you that the contract is ice-cold unless one of the opponents has all four of the missing clubs. Therefore your plan has to provide against a 4-0 club break—in either direction.

The best plan is to win the opening spade lead with dummy's queen and return a low club. If East follows, South can finesse the queen. Even if West then shows out, South has two club tricks and can easily make three hearts, three spades and four diamonds for a total of twelve tricks.

As the hand is shown today, East discards a diamond on the first round of clubs. This makes it harder for declarer.

South must put up the ace of clubs and return the three of clubs. West dares not take his king, for

Bridge hand diagram showing North and South cards and a table of card counts for North, West, East, and South.

then the entire club suit could be brought in. Hence he plays the nine, and dummy wins with the jack of clubs.

Now declarer has won two club tricks without losing the lead. He enters his hand with the king of spades and returns a heart to finesse dummy's ten. Whether this finesse wins or loses South is sure of three heart tricks. These three hearts together with three spades, two clubs, and four diamonds guarantee the slam contract.

Q—Who missed being President of the United States by one vote?
A—Aaron Burr. He became instead Vice President and while in that office killed Alexander Hamilton in a duel.

Q—Have the American ships lent to the Soviet Union in World War II been returned?

WASHINGTON COLUMN

Don't Overlook Russell When Picking Presidential Timber

By PETER EDSON
NEA Washington Correspondent

WASHINGTON — When Senator Richard Breyard Russell of Georgia first was elected to the U. S. Senate in November, 1932, before he even came to Washington to take his seat the following January he memorized the Senate's long and intricate book of rules.

That prodigious feat has served him in good stead during the 18 intervening years that he has served continuously as Georgia's junior senator. It has made him one of the best parliamentarians on the floor. The only two times that Vice President Alben Barkley has been overruled while presiding over the Senate have been on appeals and motions by Senator Dick Russell. He knows the rules better than any of them.

This also has served him in good stead as chairman of the Senate's Joint Armed Services-Foreign Relations Committee investigations into the firing of Gen. Douglas MacArthur. Senator Russell didn't want this job. He knew what had happened to Maryland's Senator Millard Tydings for his chairmanship of the investigation into Senator Joe McCarthy's charges against the Truman Administration.

So far, nothing like that has happened to Senator Russell. On the contrary, he has gained stature. His rulings have been supported by a majority of the committee. This in spite of Republican Senator Knowland's charge that an "iron curtain" had been lowered over the testimony, and Senator Wiley's charge that the investigation was a whitewash.

Up to the testimony of the Joint Chiefs of Staff, a good case has been spread on the record in support of the Truman Administration's handling of the Korean war. If the hearing can be completed on that note, the Democratic Party will owe a great debt to the chairman, Senator Richard Russell of Georgia. He may be heard from.

That will make him even more of a person to be reckoned with. Most people probably have forgotten it, but Senator Russell was nominated for the presidential candidacy at the 1948 Democratic National convention in Philadelphia. Senator Russell didn't seek the nomination. He wasn't even at Philadelphia.

He was nominated by the revolting Southern state delegates who were protesting against the civil rights plank put into the platform after a tough fight by the liberal wing of the party. In the final count, Truman got 947 1/2 votes to Senator Russell's 263. Paul V. McNutt of Indiana got the other half vote.

After the convention was over, however, Russell did not join the Dixiecrats. He was a candidate for reelection to the Senate himself. He stayed regular. And he helped carry Georgia for Truman in the November election.

It was the next year that Senator Russell gave the liberal Democrats their greatest pain in the neck. President Truman's civil rights proposals, carrying out the platform, were presented to Congress. Senator Russell became leader of the Southern bloc, in opposition to the Administration, and he licked 'em in a 17-day filibuster.

On the civil rights issue itself, Senator Russell is portrayed by his supporters as not being a race baiter. His record as governor of Georgia, in granting pardons to

Linda isn't around Hoopy is content to play quietly. The mothers parfed with mutual animosity.

LUCILLA was fiercely maternal for two whole days afterward, even encouraging Hoopy to come sit and listen to stories while she put on a face. The stories—and Lucilla's nerves—were inclined to be jumpy; it was hard to concentrate on a plot line about a fairy or a cowboy, and simultaneously the line of the upper lip, while Hoopy was clamoring, "Tell it faster. And then what happened?"

Once, after she'd spent 15 minutes doing a flawless gem of a mouth, Hoopy tackled her from behind just as she was filling in the upper indentation, knocking the brush so that it smeared lipstick up one cheek. This meant removing the entire face and putting it on all over again—a real tragedy. Lucilla, after the first outraged cry, thought she did remarkably well to request Hoopy in a calm, controlled voice to go play in her own room.

The next day she brought her jumping rope home as a special treat, only to discover that Hoopy was as positive as Paris, in wanting to demonstrate the proper stance. Moreover, Hoopy favored the one-foot-at-a-time skip, and since Lucilla had already been won over to Paris' system of "make like your feet are tied together," she was rattled by counter-instructions and ended up in a snarl of rope and irritation. Hoopy said, "Why does somebody as old as you want to jump rope anyway? I think it's silly."

Lucilla had pictured herself and her child doing setting-up exercises together, perhaps in identical mother-daughter outfits, but this preliminary bout wasn't encouraging. Hoopy, bored, soon roamed away, then returned to whine that she had to see Linda. "You may not see her. You behaved so badly over there that I was humiliated even to hear about it. Hitting Linda over the head with your skate."

"But that was two days ago," Hoopy pointed, "I don't feel like hitting her now. Besides, she's my best friend."

MRS. CANTWELL met her at the door with the news that Hoopy had hit Linda over the head with a skate. "I had to phone you for a picnic, although it may well wind up at a garbage dump. The atmospheric winds had already wafted to Lucilla a sniff of something not quite pleasant, but Derek was still so delighted and now to look at that she couldn't bear not to continue around the next curve."

When they strolled down Madison Avenue, after leaving the cocktail bar, her shoulder bumped cozily against his in the homegoing crowds, and every few yards she compared Derek with the male half of a passing couple, and thought smugly no other woman had so handsome an escort. In fact, no other twosome seemed as attractive; it was a shame she had to rush off to collect Hoopy, but it

she assures Hoopy, although when

So They Say

We are storing up swords—atomic swords—and if we do not have to use them in war, we will make them into plowshares—atomic plowshares.

It was two ounces of gunpowder that forced patriotism out of our chamber of deputies.

—Seyed Mojtahab Navab Safavi, leader of Padayari Isalm, Iranian organization whose members assassinated Premier Razmara.

Rather than let the government break him, a (cattlemen) will sell to the black market. And you can't condemn him.

—C. E. Weymouth, former president Cattlemen Ass'n., Texas.

Our government should cease being the "Great White Father" to the Indians and should provide them with every opportunity to become useful. . . . American citizens as soon as possible.

—Rep. P. J. Hillings (R., Cal.).

If the Anglo-Iranian Oil Company doesn't hand over its installations to Iran, the burden of responsibility for distributing world peace will rest with them. This will mean the beginning of the third World War.

—Hossein Makki, secretary, Iran parliamentary oil committee.

What's Right?

You are smoking while sitting waiting for a clerk to wait on you in a shoe store.

WRONG: If there are no ash trays near you, flick your cigarette ashes on the floor.

RIGHT: Never smoke in any building in which you have to flick ashes on the floor.

The Form Divine by Hildegard Dolson

was ironing day, and if she'd asked Gretel to go to the Cantwells, Gretel might have retaliated by scorching the yellow Elizabethian ruff.

At Fifty-First street he said, "Look, I have a marvelous idea. We're only three blocks from my apartment, so why don't you come over and have a minute?" She said she couldn't possibly, because she was already late. Derek became charmingly boyish in his pleading. "Please. You can phone home and say you've bumped into an old friend. It was unthinkable, of course, but her laughing denials of the unthinkable gradually changed into a lingering, "It isn't that I don't want to—you know that."

Even after she hailed a cab and got in, Derek stood with one foot on the running-board, pointing at her desertion. "I hope you have a hideously dull evening, so you'll think of me sitting alone playing 'Finnegan's Wake.'"

Regrettably, there are moments when a woman doesn't want to know what's what or even where she's going, preferring the unexplored road that looks as if it would end in a perfect little spot for a picnic, although it may well wind up at a garbage dump. The atmospheric winds had already wafted to Lucilla a sniff of something not quite pleasant, but Derek was still so delighted and now to look at that she couldn't bear not to continue around the next curve.

When they strolled down Madison Avenue, after leaving the cocktail bar, her shoulder bumped cozily against his in the homegoing crowds, and every few yards she compared Derek with the male half of a passing couple, and thought smugly no other woman had so handsome an escort. Texas, California Production Assure Plenty Of Oil For U. S.

By The Associated Press
Regardless of what may happen in Iran, there will be no shortage of oil in the U. S. if Texas and California can help it.

The two big oil producing states are racking up new records almost every week. Their combined output is well over three and three-quarter million barrels a day. And if they

can get enough steel for drilling new wells, it may go still higher.

New oil production is highly important right now. The federal government has asked the industry to drill 44,000 new wells this year. War in Korea, international tension in other areas and trouble in the great Iranian oil fields point up the situation.

Texas oil production hit a new peak in April and has been setting records steadily ever since. An estimated 2,800,000 barrels of crude a day was gushing from the state's 127,929 wells at the end of May.

That's roughly one-fourth of the crude oil produced by the entire world. Naturally that makes Texas the nation's No. 1 oil-producing state.

British Claim U. S. Owes \$10,000,000 For Infringing Upon Jet Engine Rights

By DOUGLAS LARSEN
WASHINGTON (AP)—Claiming the United States has infringed on its jet aircraft engine patents, the British government corporation,

Power Jets, Ltd., has asked Uncle Sam for a \$10,000,000 settlement.

The case involves more than 200 basic patents, which, it is claimed, cover all jet engines in U. S. military aircraft and all gas turbine engines manufactured here. They were filed in the U. S. Patent Office by Power Jets just after the war, when Allied secrecy restrictions on the existence of jet engines were lifted.

A shortage of steel may curtail drilling activity before the end of 1951, but the Lone Star State's output for the year still is expected to exceed the record flow of 898,000,000 barrels in 1948.

Four Reasons For Boom
Prior to this year, Texas' highest rate of flow was 2,620,000 barrels per day in September of 1950.

Pace Says America Prepared To Fight

FAYETTEVILLE, ARK. (AP)—Secretary of the Army Frank Pace said Saturday "the time since Korea has been well spent" and "we are prepared to fight if the Soviets choose to bring on a full-scale war."

"That very readiness may be one of the factors which will cause them to recognize the futility of war," he said in an address at the commencement exercises at the University of Arkansas.

Other military diplomatic and mobilization officials have said the U. S. will not be ready for any full-scale war before 1952 or later.

"By the swiftness of our action in Korea and the rapidity with which we are arming, we have set an obstacle in the path of Soviet expansion which must give its leaders serious pause," Pace said.

As the nation's top oil state, Texas accounts for 42 per cent of the country's output. Even this big chunk is not enough to make independent producers happy. They feel Texas should be allowed to deliver in proportion to its share of known U. S. oil reserves, now figured at 56.8 per cent.

Political and economic factors have prevented Texas' gaining this greater share of national production. The State Railroad Commission is supposed to regulate permissive flow according to market demand and in the best interest of conservation.

The necessity of maintaining foreign oil imports at a certain level also has a limiting effect on Texas production.

Seating Limited For Mac's Speech

AUSTIN (AP)—A public address system will be rigged up so General MacArthur's speech to the Texas Legislature can be heard at any spot on the capitol grounds.

A joint Legislative Arrangements Committee expressed regret Saturday that "it will be impossible to have reserved seating spaces for anyone other than the members of the Legislature and the official party with General MacArthur."

Acheson Ends Eight-Day Siege On Senate Grid In Long-Range Clash With MacArthur

WASHINGTON (AP)—Secretary of State Acheson ended his eight-day siege on the Senate grid Saturday after a new clash of views with Gen. Douglas MacArthur and a parting barrage from Republican critics.

The secretary appeared unruffled and in good humor as he emerged from the closed-door Senate inquiry into the firing of MacArthur and the Administration's Far East policy.

High Court Judge Hands Down Advice To Attorneys Here

Judge W. A. Morrison of the Texas Court of Criminal Appeals said here Saturday district attorneys soon may be forced to improve their procedure before his court.

28-Year-Old Ex-Convict To Devote Life To Saving Souls Instead Of Robbing Safes

RANGER (AP)—Jimmy Houghton is out of the penitentiary and determined, he says, to save souls instead of rob safes.

Mr. Perkins believes it is the first time in the history of any church that anyone has been baptized, licensed to preach—and then will preach.

Judge Morrison made the statement at an organizational meeting of the West Texas District and County Attorneys Association at Hotel Scharbauer.

The black-haired, 28-year-old convict was sentenced to an indefinite term last year after pleading guilty to several counts of robbery and burglary. More than 30 counts were stacked up against him.

The mild-mannered, soft-spoken Jimmy, son of a respected business man here, began his crime career after Navy service during World War II. He was wounded in the Marshall Island campaign. He operated in several Central and West Central Texas counties.

He explained that under a legislative measure pertaining to bills of exceptions it will be much easier for a defendant to get before the Court of Criminal Appeals with his claimed errors.

Several of them are fairly hot potatoes, especially the election code revision bill which has brought some demand for veto on grounds it will hurt the Democratic Party. There have been about an equal number of letters or telegrams urging Shivers to sign it.

In February, 1946, he was arrested. In the county jail at Eastland, he became a trustee. Deputy Sheriff Elton Reeves, who was jailer, came to like him.

He cautioned the group that "as district attorneys you are going to have to improve in the next few months or you will have more cases reversed."

Several of them are fairly hot potatoes, especially the election code revision bill which has brought some demand for veto on grounds it will hurt the Democratic Party. There have been about an equal number of letters or telegrams urging Shivers to sign it.

At Humbleville, he became a Bible student and organized a Prisoners' Christian Association. Attendance grew to 150, including some guards. Religious organizations heard about it.

Speaking on procedure that should be used by the prosecutors when they have to support a verdict before the appeals court, Judge Morrison advised the West Texans to minimize discussion of facts and not to vary from the record.

Another important bill still without action is the measure bringing violators of the anti-closed shop law under terms of the civil anti-trust statutes. The governor has not said whether he would or would not sign it.

The Ranger Ministerial Alliance and the First Baptist Church here were among the groups which worked for his parole. Jimmy now is on parole to the alliance. He plans to spend the rest of his time, he said Saturday, trying to convince his fellow men to turn to Christ.

California's oil industry, in full stride in the defense effort, is heading for a new production peak. It also may hang up a new development and exploration record.

Crude is coming from the ground at a new high daily average of more than 960,000 barrels. Only Texas, the No. 1 oil state, exceeds that.

California's current daily flow of oil exceeds the World War II peak of less than 960,000 barrels.

If the average daily crude flow of 961,640 barrels so far this year is maintained, California wells will yield about 350,000,000 barrels this year. That would be a new high, compared with the present record of about 340,000,000 barrels in 1948. Last year's output was 327,606,801 barrels.

Truman Takes Off On Overnight Cruise

WASHINGTON (AP)—President Truman went aboard the yacht Williamsburg at 3 p.m. Saturday for an overnight cruise on the Potomac River.

He took along a few personal friends and his Naval aide, Rear Adm. Robert L. Dennison. Names of the guests were not announced. The yacht is due back Sunday afternoon.

He explained that under a legislative measure pertaining to bills of exceptions it will be much easier for a defendant to get before the Court of Criminal Appeals with his claimed errors.

Another important bill still without action is the measure bringing violators of the anti-closed shop law under terms of the civil anti-trust statutes. The governor has not said whether he would or would not sign it.

The Ranger Ministerial Alliance and the First Baptist Church here were among the groups which worked for his parole. Jimmy now is on parole to the alliance. He plans to spend the rest of his time, he said Saturday, trying to convince his fellow men to turn to Christ.

Pennsylvanian, Spraberry Wildcats Staked In Midland

Two Pennsylvanian wildcats and one lower Spraberry exploration have been scheduled for immediate drilling in West-Central Midland County.

Spartan Drilling Company of Dallas will drill No. 1-A Mary Scharbauer as one of the Pennsylvanian tests. Location is 600 feet from south and west lines of the east half of the 340-acre lease in section 12, G. F. O'Neal survey.

The same operator will drill No. 1-B Mary Scharbauer as a Pennsylvanian test 600 feet from west and south lines of the west half of the 340-acre lease in section 12, G. F. O'Neal survey.

Projected destinations for the Spartan ventures are 10,000 feet. Near Parks Area.

The closest completed Pennsylvanian wells are in the Parks Area one and one-half miles to the west.

The Texas Company will drill No. 1-B-C Clarence Schrabauer to a possible bottom of 8,700 feet. That depth is calculated to take the project through the Spraberry and into the top of the Dean.

Location is 1,900 feet from north and 600 feet from east lines of section 43, block 39, T-3-S, T&P survey. That puts it about 1 1/2 miles southwest of the city of Midland and 7,800 feet east of Texasco No. 1-C Clarence Schrabauer. That project is now preparing to hydrate and test the Spraberry through perforations at 7,785-7,795 feet.

Most interested observers expected the well to be flowing soon after the swabbing started. The project has flowed at the rate of 18 1/2 barrels of clean oil per hour from the open hole at 11,247-283 feet. That flow was steady for six and one-half hours through a one-half-inch tubing choke and it was natural.

The pay section has not made any water. Age of the pay has not been definitely determined. Location is 407 feet from west and 600 feet from south lines of the east 300 acres in the southeast part of section 14, block 38, T-3-S, T&P survey.

The test was made in the interval from 6,893 to 6,793 feet. Tool was open two hours. A good blow of air was at the surface throughout that period. Gas surfaced in one hour and 40 minutes.

No fluid surfaced while tool was open. Recovery was 154 feet of heavily oil and gas-cut mud and 30 feet of free oil.

Maximum flowing bottom-hole pressure was 300 pounds. Shut-in pressure after 30 minutes was 350 pounds.

The reef line was topped at 6,900 feet. Datum point is minus 4,493 feet. Location is 600 feet from south and east lines of section 1, block 42, H&G-N survey and 13 miles northwest of Claremont.

The test was made in the interval from 6,893 to 6,793 feet. Tool was open two hours. A good blow of air was at the surface throughout that period. Gas surfaced in one hour and 40 minutes.

No fluid surfaced while tool was open. Recovery was 154 feet of heavily oil and gas-cut mud and 30 feet of free oil.

Moore Is To Start Production Tests In Midland Discovery

Moore Exploration Company No. 1 A. R. Baumann, flowing oil discovery from a lower Pennsylvanian formation, three miles south of the southeast side of the City of Midland is due to start a production test some time Sunday.

The new field opener had run tubing and late Saturday was connecting the well to tanks. It was expected that swabbing would start late Saturday.

Most interested observers expected the well to be flowing soon after the swabbing started. The project has flowed at the rate of 18 1/2 barrels of clean oil per hour from the open hole at 11,247-283 feet. That flow was steady for six and one-half hours through a one-half-inch tubing choke and it was natural.

The pay section has not made any water. Age of the pay has not been definitely determined. Location is 407 feet from west and 600 feet from south lines of the east 300 acres in the southeast part of section 14, block 38, T-3-S, T&P survey.

The test was made in the interval from 6,893 to 6,793 feet. Tool was open two hours. A good blow of air was at the surface throughout that period. Gas surfaced in one hour and 40 minutes.

No fluid surfaced while tool was open. Recovery was 154 feet of heavily oil and gas-cut mud and 30 feet of free oil.

Wilshire Schedules Outposts In Upton

The Wilshire Oil Company staked locations for two three-quarter-mile outposts to the Wilshire-Pennsylvanian - Ellenburger field of West-Central Upton County.

The projects will be drilled as No. 23 and No. 24 R. S. Windham. No. 23 is 600 feet from north and east lines of the southwest quarter of section 118, block D, OCEDE-RONG survey.

No. 24 will be drilled 600 feet from south and east lines of the same quarter section.

Each of the two tests will drill to around 19,000 feet to try for Ellenburger production.

Drill sites are about 25 miles southeast of the City of Midland.

Drill sites are about 25 miles southeast of the City of Midland.

Five More Drilling Concerns Added To Midland's Roster

Five oil well drilling concerns have established offices or have located representatives in Midland recently. All of these concerns now have rigs running in the Permian Basin.

West Texas and Southeast New Mexico. Thomason In Charge. BSM Drilling Company of Houston has established an office on West Highway 80 in Midland. V. V. Thomason is in charge of the office and of the BSM operations in this region.

Christmas carols became more popular than Christmas hymns before the twelfth century. Early Christmas hymns were too theological and, therefore, too hard for the common people to understand.

McBride Is Added To LL&EC Staff

George B. McBride is a new geologist on the staff of the district office of Louisiana Land & Exploration Company in Midland. He was formerly employed in the Midland office of Texas Gulf Producing Company.

Jacobson Heads Lucerne Corporation

DALLAS —(AP)—F. M. Jacobson of Dallas has been elected president of the Lucerne Corporation. He will succeed R. F. Nyswander, Jr., who has been elected Chairman of the Lucerne Board.

Moore Is To Start Production Tests In Midland Discovery

Moore Exploration Company No. 1 A. R. Baumann, flowing oil discovery from a lower Pennsylvanian formation, three miles south of the southeast side of the City of Midland is due to start a production test some time Sunday.

The new field opener had run tubing and late Saturday was connecting the well to tanks. It was expected that swabbing would start late Saturday.

Most interested observers expected the well to be flowing soon after the swabbing started. The project has flowed at the rate of 18 1/2 barrels of clean oil per hour from the open hole at 11,247-283 feet. That flow was steady for six and one-half hours through a one-half-inch tubing choke and it was natural.

Big Spring Man Is To Re-Drill Failure In SW Kent Sector

I. Weiner of Big Spring has filed application with the Railroad Commission of Texas requesting permission to drill out plug at 5,300 feet in an old dry hole in the Polar field of Southwest Kent County.

The failure was plugged by Humble Oil & Refining Company in 1946 at total depth of 7,957 feet in the Ellenburger.

Weiner will use cable tool in drilling out to 5,300 feet. The section above that point, lower Permian, will be tested for possible production.

Location is 600 feet from north and west lines of the northwest quarter of section 45, block 5, H&T-C survey and two miles northwest of Polar.

That puts it one-half mile west of Humble No. 1 Vick, discovery well of the Polar-Ellenburger field. That well is now off production.

C-S Martin Wildcat Pumping To Final In Spraberry Sand

Union Sulphur & Oil Corporation, No. 1 Snyder and Arnett, Central-South Martin County wildcat, is pumping to test and try to complete as the opener of a new Spraberry petroleum producing area.

The project is getting its fluid from open hole in the top of the Spraberry between the bottom of the 7-inch liner which is cemented at 7,150 feet, and the total depth at 7,245 feet.

That section has been hydrated. On the last 24 hours of pumping it produced 90.46 barrels of fluid. It was 60 per cent salt water and 40 per cent oil.

All Load Oil Out. That was 54.27 barrels of salt water and 36.22 barrels of oil. The oil is new oil. All the load oil which had been put in the project has been recovered.

The well is making enough gas to run the pump engine and the casing pressure is beginning to register.

It is expected that operator will pump the well steady as official Railroad Commission potential test and put it on production.

It is four miles southwest of Stanton, four miles north of the Germania-Spraberry field and 600 feet from north and west lines of the southwest quarter of section 30, block 36, T-1-S, T&P survey.

NW Martin Opener Is Coring Deeper In Fusselman Lime

Pan American Production Company, Forest Oil Corporation and Houston Oil Company of Texas No. 1 F. D. Breedlove, Northwest Martin County flowing discovery from the Devonian between 12,070-148 feet, is coring ahead below 12,305 feet in Fusselman lime.

A core at 12,255-305 feet recovered 50 feet of slightly porous lime. No other description of the core was reported. It apparently did not show any appreciable show of oil or gas, or a test would have been run on the section it covered.

This project had water in the bottom of the Devonian between 12,148-185 feet and it had oil and water in the top of the Fusselman in a test at 12,218-255 feet.

The wildcat flowed at the rate of 45 barrels of oil per hour from the Devonian at 12,070-148 feet. It is due to go on to the Ellenburger.

The new field opener is 13 miles northwest of Tarzan and 600 feet from south and 4,820 feet from east lines of league 258, Briscoe County School Land survey.

Unofficial Reports Say DST In Borden Wildcat Develops Oil

According to unofficial and unverified reports, The Superior Oil Company and Intex Oil Company No. 15-535 Wallace J. Jones, Northeast Borden County wildcat, has found some shows of possible production in a drillstem test in the Mississippian above 8,200 feet.

Some sources have reported that the prospector filled up to the top of the drill pipe in a test. Those sources say that the tool was closed when the oil reached the surface.

It is asserted that there was no water in the test.

There is no official information available on any activity at this project.

Location is 600 feet from south and 1,900 feet from east lines of section 535, block 97, H&T-C survey. The wildcat is two and one-half miles northwest of Fluvanna and two miles west of the lone producer

Three More Oilers Given Tex-Harvey

Amerada Petroleum Corporation, York & Harper, Inc., and Glendale Oil Company have each completed another Spraberry producer in the Tex-Harvey field of Central-East Midland County.

Amerada No. 4 K. S. Boone, 690 feet from north and west lines of the lease in section 17, block 36, T-3-S, T&P survey, was finished for a daily flowing potential of 127 barrels of 38.4-gravity oil, plus three per cent water.

Gas-oil ratio was 722-1 and tubing pressure was 50 pounds. Completion was from Hydratect open hole at 6,895-6,975 feet.

York & Harper No. 1-6 A. S. Boone was finished for a 24-hour flowing potential of 426.12 barrels of 38.9-gravity oil and no water.

Open hole from 6,930 to 6,968 feet was Hydratect with 4,500 gallons. The potential was based on an eight-hour flow through a one-half-inch choke.

Location is 600 feet from north and east lines of the lease in section 6, block 36, T-3-S, T&P survey. Glendale No. 1-21 Floyd was completed for a daily flow of 392.71 barrels of 36.7-gravity oil and no water through a 7 1/8-inch choke.

Open hole from 7,113 to 7,185 feet was Hydratect.

Wildcats Staked In Midland-

NW King Tester Is Waiting On Orders

Lawson Drilling Company of Tulsa No. 1 Starr Pope, Northwest King County wildcat, is at total depth of 6,348 feet in the Mississippian - waiting for orders. This project may be plugged back to around 3,650 feet and tested above that point in the Cisco. No. 1 Pope drilled through the Canyon reef and into the Mississippian without finding shows of commercial production in either of those formations. Location is 660 feet from north and east lines of the southwest quarter of section 199, L&GN survey.

SW Martin Project Swabs Salt Water

The Blackwood & Nichols Company of Midland No. 1 Stinson & Burley, wildcat in Southwest Martin County, swabbed 18 hours from open hole in the lower Spraberry from 8,642 feet to 8,672 feet. Recovery was 71 barrels of load oil and 58 barrels of salt water. Operator is now preparing to seal off the above section and drill out to 8,730 feet and test at 8,695-8,730 feet in the shale part of the lower Spraberry. Location is 680 feet from west and south lines of section 36, block 33, T-1-N, T&P survey. That makes it seven miles north of Midland.

Conoco Abandons Crockett Venture

Continental Oil Company No. 3 C. T. Harris has been plugged and abandoned at 9,080 feet in the Devonian lime. No other information is available. This prospector is a northeast offset to the Continental No. 1 Harris, the discovery of flowing production from the Devonian to open the Lula field of Northwest Crockett County. The failure was 660 feet from north and east lines of section 16, block 3, WCRW survey. No. 3 Harris Swabs Continental No. 3 C. T. Harris, south offset to the Lula field discovery is swabbing on perforations at 8,507-13 feet in the Devonian after treating with acid. Recovery is two barrels of fluid per hour. Some of the fluid is new oil and some of it is acid residue. Operator is still testing. Location is nine miles northeast of Iraan and 660 feet from south and 1,980 feet from east lines of section 15, block 3, WCRW survey.

Crockett Wildcat Waiting On Orders

Moore Exploration Company No. 1 Don Ryburn, wildcat in Central-Northwest Crockett County is waiting on orders after running electric surveys. Operator took a drillstem test from 8,110 to 8,150 feet in the Ellenburger which was topped at 7,880 feet. Elevation was 2,736 feet. The tool was open one hour. Recovery was 2,700 feet of slightly oil and gas-cut muddy sulphur water and 280 feet of sulphur water. The wildcat is 660 feet from south and east lines of section 3, block Q, MK&T survey and 17 miles east of the town of Iraan.

SE Coke Project Finds Ellenburger

Pan American Production Company No. 1 Lucille March Stone, Southeast Coke County wildcat, is drilling below 6,969 feet in Ellenburger dolomite. Top of the Ellenburger is at 6,936 feet, 4,658 feet below sea level. The prospector is 1,100 feet from south and 730 feet from west lines of section 46, block Z, D&SE survey and 10 miles south of Robert Lee. It is approximately two miles southeast of Amerada Petroleum Corporation No. 2 Lucille March Stone, a 7,315 feet dry hole.

Placid Quits Failure In SE Crane Region

Placid Oil Company and others have plugged and abandoned their No. 1 S. E. Carter estate, wildcat in Southeast Crane County. It was drilled to a total depth of 6,390 feet. Location was 660 feet from southeast and southwest lines of section 11, block 6, H&TC survey and 15 miles south of Crane.

Corrigan Field Is Set For New Site

Tide Water Associated Oil Company No. 2-B Nystel is a new location in the Corrigan field of Southeast Terry County. It is one-quarter of a mile south of the same operators' No. 2-A Nystel, new producer. Location is 1,980 feet from south and west lines of section 9, block C-38, psi survey. Rotary tools will be moved in and drilling toward projected depth of about 11,600 feet will begin immediately.

Tide Water Finals SE Terry Oil Well

Tide Water Associated Oil Company has completed its No. 2-A Nystel as the fourth well in the Corrigan field of Southeast Terry County. The well flowed 353 barrels of oil in 24 hours through a one-quarter inch choke from open hole between 11,552 feet and total depth of 11,587 feet. Gas-oil ratio was 29-1. No water was present. Gravity of the petroleum was approximately 34 degrees. Production was natural. Location is 1,980 feet from west and north lines of section 9, block C-38, psi survey and 14 miles south of Brownfield. That makes it one location southeast of the same operator's No. 1 Nystel, which was completed as the discovery well of the pool.

NE Ward Wildcat Drilling After DST

Gulf Oil Corporation No. 272 Hutchings Stock Association, wildcat in Northeast Ward County is drilling below 5,413 feet in dolomite after taking a drillstem test in a middle Permian lime. The test was from 5,281 feet to 5,339 feet. Tool was open one hour. There was a weak blow of air to the surface for a part of the period. Recovery was 155 feet of gas cut drilling mud with no shows of oil or water. It is 1,980 feet from north and east lines of section 77, block N, G&MMB&A survey and two and one-half miles southwest of Monahans. That puts it approximately two miles east of the closest completed oil wells on the east side of the North Ward-Estes field.

E-C Upton Project Testing Spraberry

Plymouth Oil Company No. 1 B. R. Greathouse, one-mile south out-pout to the Pembroke-Spraberry field of East-Central Upton County, is at total depth of 6,952 feet in Spraberry sand. Operator has hydraulic fracturing the open hole from 6,898 feet to 6,962 feet with 1,500 gallons and is now swabbing. Location is 660 feet from north and east lines of the northwest quarter of section 3, block A, CCSD and RONG survey.

Deep Rock Stakes Venture In Runnels

Deep Rock Oil Corporation has staked location for a Northwest Runnels County wildcat three miles northeast of Bronite. No. 1 Earl Black will be 330 feet from north and east lines of the 230-acre lease in H. A. Thompson survey No. 2. It will be three quarters of a mile east of the Coke County line. The wildcat will be projected to 5,600 feet with rotary tools starting at once.

Schleicher Test Running Survey

Stanolind Oil & Gas Company No. 1 R. S. Williams, wildcat in Northwest Schleicher County is taking electrical surveys after a drillstem test of the Ellenburger from 7,987 to 8,087 feet, total depth. Recovery was 320 feet of drilling fluid, 100 feet of drilling water, 250 feet of muddy, salty sulphur water and 270 feet of salty sulphur water. Location is 16 miles northwest of Eldorado and 660 feet from north and 1,980 feet from east lines of section 1204, TC survey.

NW Nolan Wildcat Flows Oil On Test

Eight miles southwest of Sweetwater, Skelly Oil Company No. 1 Evelyn Cox, wildcat in Northwest Nolan County, flowed 87.7 barrels of oil and 9.4 barrels of salt water in seven hours through a one-half inch choke and open hole from 6,975 to 7,024 feet. Operator will continue testing. Drillstem is 660 feet from south and west lines of section 85, block 23, T&P survey.

Permian Pete

"IT COULD BE DEVONIAN — BUT IT DOESN'T LOOK LIKE IT — ON THE LOG IT LOOKS LIKE THE TOP OF THE MISSISSIPPIAN — HOWEVER IF THAT'S RIGHT IT IS RUNNING TOO HIGH — THEN ON THE OTHER HAND IF IT IS THE DEVONIAN IT IS RUNNING TOO LOW — IF YOU CORRELATE FROM THE SAN ANDRES DOWN IT MAKES IT LOOK LIKE MISSISSIPPIAN — IF YOU COME FROM GRANITE UP IT COULD BE ELLENBURGER — THEN AGAIN —"

Barnes Of Midland Sets A Record-16 Tries-16 Oilers

J. C. (Jake) Barnes, Midland independent oil operator, has set a record for the industry. During 1950 he drilled 16 oil explorations in various areas of the Permian Basin. Two of those projects were 10,790-foot projects to the Ellenburger in the Yarbrough & Allen area of Southwest Ector County. The others were shallows. During 1950 Barnes completed 15 of his 16 efforts of the year as oil wells. The sixteenth was not an oiler at the end of the year. That well was a reef lime test on the edge of the Diamond M-Canyon field in Southwest Murray County. At the close of 1951 it had found a little oil in the reef—but not developed enough production to make it commercial. Barnes was afraid he would have to list one failure for 1950. However, after definitely proving the Canyon would not make oil well in that exploration he plugged it back to the Clear Fork of the Permian and completed it as a pumper for commercial production of 81.7 oil per day from pay at 3,130-3,290 feet. He is now happy. He has a perfect record—for 1950.

Amerada To Drill Two More Wildcats In North Dakota

Amerada Petroleum Corporation, which brought in the discovery well that made North Dakota the nation's 27th oil state, is following up its announced plan of further exploration in the region. It disclosed two new tests will be drilled, one about 12 miles north of the successful Tioga well in the same county, Williams, and another approximately 38 miles to the south in McKenzie County. After the discovery produced 47 to 80-gravity oil from 11,630 to 11,660 feet, Amerada officials said it would have to be followed by more exploration to turn up additional geological data. The Tioga well was killed and is now being deepened below 11,900 feet.

C-S Coke Project Waiting On Orders

Pan American Production Company No. 1 Lucille March Stone, wildcat in Central-South Coke County is waiting on orders at 7,140 feet in lime. No shows in any formation were indicated by a Schlumberger survey, which corrected the top of the Ellenburger from 6,936 to 6,926 feet. Derrick floor elevation is 2,411 feet. No. 1 Stone is 1,100 feet from south and 720 feet from west lines of section 46, block Z, D&SE survey and ten miles south of Robert Lee.

Midland Venture Is Drilling Deeper

Gulf Oil Corporation No. 1 John Windham, wildcat in Southwest Midland County, is drilling ahead below 7,906 feet in upper Spraberry after a drillstem test at 7,810-7,906 feet. Tool was open three hours. Recovery was 630 feet of oil and gas cut mud. The venture is projected to 13,500 feet for a test of the Ellenburger. It is located at the center of the southeast quarter of the northwest quarter of section 32, block 40, T-3-S, T&P survey. That puts it 17 miles southwest of the city of Midland. It is four and one-half miles south of the south side of the Parks-Pennsylvanian field and seven miles north of the Pegasus-Ellenburger area.

WASHINGTON OIL — Government Plans To Press Anti-Trust Action Against Broad Segment Of Industry

WASHINGTON—The Justice Department indicated it does not take the defense program too seriously when it announced last week plans to press anti-trust action against a broad segment of the American petroleum industry. The disclosure came as it dismissed the 11-year-old anti-trust action against the American Petroleum Institute, 21 majors and more than 340 other oil companies, a dismissal of the so-called "Mother Hubbard" suit which had been expected since the end of the war. The surprise came when Attorney General J. Howard McGrath went on to assert that pending suits against the industry will be pressed and that a number of others are being prepared for submission to the courts in various sections of the country. The dismissal ended the most extensive suit ever filed against the oil industry, a suit never pressed during the war for fear it would hurt the war effort. Today, of course, the situation is similar to the wartime period of a few years back. What's ahead for oil was stated in these words: "Investigations have been or will be made of complaints from smaller members of the petroleum industry that common carrier pipe lines are not available to them; that thousands of retail outlets are closed to their products; that refining processes are available to them only through patent pools charging excessive royalties; and that supplies of crude oil are controlled by a relatively few companies. "Other investigations include alleged illegal price fixing arrangements at both the crude oil and finished product levels; misuse of legitimate conservation programs; and denial to independent distributors of access to supplies of petroleum products at prices which would permit their competition with distributors controlled by or exclusively handling the products of major oil companies." A new set of oil and gas industry advisory committees to the government, operating under government men as chairmen, may be created in the near future as a result of the White House compromise announced over the future of the National Petroleum Council. In concessions to the oil industry and the Petroleum Administration for Defense, the agreement provides that the council shall "continue to function as it has in the past," but with restrictions. The council, also, is to become an industry advisory body to the PAD as well as, at present, to the Oil and Gas Division of Interior Department. But in concessions to the Justice Department, the council, a four-year-old organization which grew out of the Petroleum Industry War Council of the last war, is curbed. The council is not to get into the fields of "specific allocations of supplies or materials, or the use of facilities of the petroleum industry." This area is reserved only to "special committees" to be created by Secretary of the Interior Oscar Chapman, and operating under the Defense Production Act, and all the restrictions, probably, set up by the Justice Department. Specifically, such committees of industry men shall have a fulltime government man as chairman. The council says it never had power in such fields, a statement which may mean little, for under the voluntary agreements act of three years ago, it entered this field to meet oil shortages. Under the defense act, it had hoped for authority to do the same. Decisions to be made include the setup of the new Gas Industry Advisory Council, and of district committees of oil men to advise the government. Beta are, these will be re-

By Littlejohn

SEG Slates Annual Meeting In Dallas

The Society of Exploration Geophysicists will hold its annual Mid-West Regional meeting November 19 and 20, at the Baker Hotel in Dallas. It will be sponsored jointly by the Dallas, Fort Worth, Midland, Shreveport and Tulsa local sections of the SEG, and the Geophysical Society of Tulsa will be responsible for the program and arrangements. Dr. E. M. McNatt, of The Carter Oil Company, is in charge of the two-day technical sessions; Jay P. Garner, president of Oil Exploration, Inc., will arrange the entertainment; and K. M. Lawrence, of Amerada Petroleum Corporation, will accept advertising for the printed program. Other members of the Tulsa section serving on the arrangements committee are Dr. W. H. Courrier, of Phillips Petroleum Company, Bartlesville, and Frank Searcy, of Continental Oil Company, Ponca City. Most of the papers presented will concern geophysical problems encountered in the Midwestern oil producing region of the United States, and will include a featured address by an outstanding exploration scientist. More than 1,000 geophysicists from all parts of the country are expected to attend the meeting.

Frenchmen Learn About WT Production Methods During Visit To PBE Capitol City

By JOE SALMAN Reporter-Telegram Oil Writer Pierre, Emile and Jean are three French oil men sent to Midland and Texas under the sponsorship of the Economic Cooperation Administration to study reservoir engineering methods as practiced in Texas. All three, Pierre Albert, Jean Rochet and Emile Clarac, are veteran oil men. Clarac, of Montpellier near Marseilles, has been associated with the Petroleum National Society of the Mediterranean Langedoc for nine years. He is a petroleum engineer. Albert has been a production engineer for the French Institute of Petroleum for several years. His home town is Paris. That also is his company's headquarters office. Jean Rochet, who hails from Chambéry, a small village in the Alps, is also a production engineer. He works for Tunisian Society for the Study, Research and Exploration of Petroleum. The three were welcomed to Midland by J. L. (Joe) Greer, supervisor of the Railroad Commission of Texas' District 8 office here. Before coming here they spent one week in Austin as guests of the University of Texas, one week as the guest of the RRC headquarters there and two weeks as guests of the RRC district office in Kilgore. Visits Plant Since they have been in Midland they have visited West Texas' famed Slaughter field gasoline plant operated by Stanolind Oil & Gas Company. In the same field they visited Service Pipeline Company's Slaughter station. They were amazed at the ease with which the plant's machinery boosted 130,000 barrels of crude per day through the line. Back in Midland the oil men were treated to a real surprise. They visited the Schlumberger Well Surveying Corporation. There they met one of their countrymen, M. P. Tixier, who lectured to them for more than two hours, in their native language, on the operations of Schlumberger in West Texas. Tixier is chief petroleum geologist for the company. He operates out of the headquarters office in Houston. Maybe To China Although Jean, Albert and Emile are veteran oil men they could hardly believe it is true that Americans can not drill to 80,000 feet in search of oil. Some of their test wells in France have been drilled to 12,000 feet. If they can dig that deep they see no reason why Americans should not go four times as deep. Charles Slack, RRC engineer, took the visitors east of Midland for a trip through the Tex-Harvey field. Their reaction was the same as most Midlanders. How could so many rigs be going at one time in Midland County? Before they leave Midland, they will get a good look at all the exploration and reservoir methods used here. Clarac, who speaks very good English, and speaking for the other two, says they have learned much about the Texas oil industry. Now they want to learn about everything else. Pretty Girls They plan to go to as many baseball games, barbecues, etc., as they can. They think it would also be nice to meet some of "these pretty Midland girls." When they leave Midland next week they will head for Corpus Christi where they will be guests of the RRC there. They will spend two weeks in that city and then return to Midland.

O&G Leases On 148 Tracts Of University Lands Bring \$5,651,500 Cash Bonuses

AUSTIN—Oil and gas leases on 148 tracts of University of Texas lands in West Texas sold for cash bonuses totalling \$5,651,500 at an auction here Friday. It brought the total revenue from the auction of leases to \$53,824,639. The total of \$5,651,500 compares with \$2,510,650 paid at a December 1950 auction. Highest bonus at Friday's sale was \$1,280,000 that Magnolia Petroleum Company paid for a 2,588.8-acre drilling block in Northeast Andrews County. Superior Oil Company paid \$875,000 for a 2,564.2-acre drilling block in the same part of Andrews. Other Large Bids Sales on which bonuses of \$50,000 or more were paid include: Andrews and Martin Counties—Humble Oil & Refining Company bought tract 3 for \$70,000. It covers 320 acres. Martin County—Gulf Oil Corporation paid \$55,000 for tract 4 of 160 acres; Humble paid \$55,000 for tract 5 of 320 acres and Stanolind Oil & Gas Company paid \$90,000 for tract 8 of 320 acres. Andrews County—Superior bought tract 17, a drilling block of 2,564.2 acres, for a bonus of \$875,000; Phillips bought tract 18, a drilling block of 2,588.8 acres for \$100,000 and Magnolia bought tract 19, a drilling block of 2,588.8 acres for a cash payment of \$1,280,000. Other Deals In Andrews Gulf paid \$300,000 for tract 20, which covers 323.6 acres, in Andrews County. Stanolind paid \$150,000 for tract 21, which has 161.8 acres. Stanolind also bought the lease on tract 22, which has 161.8 acres, for \$150,000. The same concern leased tract 23, of 323.6 acres for \$130,000. Phillips bought tract 24 of 161.8 acres for \$65,000 and the same company acquired the lease on tract 25, which covers 323.6 acres for \$145,000. New Concern Buys State Exploration Company of Texas, a new concern in the oil business, bought the lease on tract 26, which includes 161.8 acres for \$75,000 and The Atlantic Refining Company and Phillips jointly bought tract 47 of 323.1 acres for \$50,000. In Crane County Atlantic leased tract 48 of 160 acres for \$131,000 and in Reagan County Sinclair took tract 95, of 329.8 acres with a bid of \$50,000. Reagan And Pecos Sites Sinclair paid \$9,000 for a 2,605-acre drilling block, two and one-half miles north of the Big Lake pool, in Reagan County. Earl C. Frates bid \$15,000 for a 2,485-acre drilling block west of the Taylor-Link area in Pecos County. Sinclair paid \$33,000 for a 1,920-acre block, 10 miles northeast of Fort Stockton, in Pecos, and W. H. Rhodes paid \$6,000 and \$8,000 respectively for two other Pecos blocks. One drilling block was passed. More than 200 firms and individuals participated in the auction, the highest number in the history of the sale, and more than \$4,000,000 was offered in bids during the first hour.

Drilling Activities Still Are Increasing In Midland, Basin

Midland County and the Permian Basin are continuing to increase in number of active rotary rigs. In Midland County on June 1, 1951, there were 90 active operations as compared to 89 on May 15 of this year. A total of 628 rotary rigs were reported in the Permian Basin area of West Texas and Southeast New Mexico on June 1. On May 15 there were 601 active rotary rigs in the same region. The June 1, 1951, total was an increase of 69 over the count for June 1, 1950. Other counties with their number of active operations as of June 1 and May 15 are as follows: Ector, 64, 57; Scurry, 56, 50; Upton, 51, 37; Howard, 17, 21; Kent, 15, 17; Borden, 14, 25; Terry, 13, 16; Glasscock, 13, 10; Martin, 10, 3 and Reagan, 8, 6. Booming demand for natural gas will send consumption to about 20 per cent more next winter than last, according to a spot survey by the Petroleum Administration for Defense.

Phillips Announces Personnel Changes

K. S. Adams, chairman, and Paul Endacott, president, of Phillips Petroleum Company have announced a number of personnel changes in the engineering and research and development departments of the company. Effective immediately E. F. Kindsvater, who has been manager of the engineering department, will transfer to the Washington office under the supervision of R. C. Jopling. He will work primarily on the procurement and allocation of materials. Riney Resigns A. H. Riney, who has been head of the engineering department for 30 years, has resigned as vice president, engineering department, and will retire from active duty. Riney will be available, however, for consultation by the manager of the engineering department and on specific assignment of the chairman or the president. George R. Benz, who was originally employed in the engineering department 26 years ago and has been in many varied engineering assignments with the company since, will become manager of the engineering department. C. K. Buell, presently assistant manager of the chemical engineering division of the research and development department, will replace Benz as its manager, and R. C. Cole will replace Buell as assistant manager. R. E. Weis succeeds R. C. Cole as superintendent of Philtex Experiment Station.

McFarland Given Promotion On Sun's Geological Staff

DALLAS — Paul W. McFarland has been advanced to the position of assistant chief geologist for Sun Oil Company's Southwest Producing Division, with headquarters here. McFarland will continue as regional geologist in charge of the San Antonio, Corpus Christi and McAllen districts, a position he has held for a number of years. He joined Sun on Nov. 17, 1923, and served about two years in Venezuela. On his return to the United States, he worked briefly at Tulsa, Okla., before going to Laredo, Tex., in October, 1925. He spent two years there and a similar period at San Antonio before coming to the Dallas Office in August, 1929.

218 Completions Keep '51 Drilling Ahead Of Last Year

AUSTIN — (P) — Oil well completions remained at a high level last week. The Railroad Commission reported 218, which kept the year's total almost 100 ahead of last year's pace at 4,716. Only three gas wells were brought in. Operations have drilled 399 this year compared with 327 a year ago. The commission reported 109 dry holes. Wildcat drilling produced 12 oil wells, no gas wells, and 68 dry holes. Plugging of wells included 107 dry ones, three gas, and 57 oil. The total average calendar day crude oil allowable Saturday was 2,912,946 barrels, up 15,306 from a week ago.

Magnolia Schedules Pennsylvania Test In NE Lea Sector

HOBBS, N. M.—One and one-half miles west of the Crossroads-Pennsylvania field of Northeast Lea County, Magnolia Petroleum Company staked location for a 9,800-foot wildcat.

It will be drilled as the concern's No. 1-B Santa Fe, 960 feet from north and 1,980 feet from west lines of section 29-9s-36e.

The contract depth is calculated to take the prospector into the Pennsylvania.

Lynn Greer No. 1 M. J. Dintner is to be a 4,000-foot Permian wildcat in extreme Central-West Roosevelt County.

Actual drillsite is 660 feet from east and 1,980 feet from north lines of section 14-3s-30e. That puts it 27 miles west and slightly south of Portales.

Southern California Petroleum Company is preparing to run five and one-half-inch casing in its No. 1 Valley Land Company, flowing discovery from the Delaware sand in Southeast Eddy County.

Casing will be cemented on total depth of 2,775 feet and completion will be made through perforations.

The last gauge made was 25 barrels of fluid flowing in 14 hours, 90 per cent oil and the rest water.

Prior to that gauge the open hole had been hydraulically fractured with 750 gallons. The Delaware sand was topped at 2,775 feet.

The discovery is 2,310 feet from north and west lines of section 7-24s-29e.

Skelly Oil Company, Seaboard Oil Company of Delaware and J. C. Maxwell, Inc., of Fort Worth No. 1-J Mexico, Clear Fork discovery in Southeast Lea County, New Mexico, is making hole below 6,580 feet in lower Permian lime and shale.

The latest drillsite test on this prospector was at 6,480-6,593 feet. The tool was open three and one-half hours.

Gas surfaced in 15 minutes. No fluid came to the top while the tester was open. Recovery was 700 feet of clean oil and 200 feet of oil and gas cut drilling mud.

There was no water. No pressures were reported.

The wildcat is expected to continue drilling until it penetrates the full Permian section.

The project developed flowing oil from the Tubb dolomite of the Clear Fork on a drillsite test from 6,135 feet to 6,250 feet.

Tool was open four hours and 40 minutes. Gas surfaced in 10 minutes and oil was at the top in two hours and 10 minutes.

It flowed 21 barrels of oil in two and one-half hours. No water was made. Gas-oil ratio was 1,500-1. Gravity of the oil is 36.8 degrees.

Hole was deepened to 6,400 feet and a drillsite test was made to that point with packer set at 6,300 feet. On this test tool was open three hours. No fluid surfaced while the tool was open. Recovery was 90 feet of heavily oil and gas cut mud, which was 50 per cent oil. No water developed.

Eighty more feet of pay was proven when a drillsite test was taken from 6,405 feet to 6,480 feet. Recovery on that test was 1,260 feet of clean oil and 270 feet of oil and gas cut mud. No water developed.

The Tubb dolomite was topped at 6,140 feet, elevation 3,180 feet. That makes it about 150 feet high on top of the Tubb to the lowest wells in the Dollarhide field of Southwest Andrews County. Those wells are about one mile to the east.

Operator will continue drilling No. 1-J Mexico to at least 7,800 feet for a test of the lower Permian. Location is 660 feet from south and east lines of section 32-24s-34e.

Two more wildcats have been staked in North Lea County, both to drill to 12,500 feet for a test of the Devonian.

Eight miles west of the Denton-multipay field Magnolia Petroleum Company will drill No. 1 Dewey L. Gann, 1,980 feet from north and west lines of section 9-15s-16e.

Humble Oil & Refining Company staked the other deep test. It will be No. 1 Federal-Elliott, 660 feet from north and east lines of lot 1, section 1-14s-34e and eight miles southeast of the Saunders field and nine miles west of Lovington.

A three-eighths miles southeast

The Ohio Oil Company No. 1 Carruth-Federal, extreme northeast Lea County wildcat, 1,980 feet from north and 660 feet from east lines of section 24-19s-37e, is being drilled below 4,855 feet in dolomite.

Sharples Oil Corporation of Midland and Denver No. 1 Seth Alston, wildcat in North-Central Lea County, is drilling below 14,096 feet in lime. This project is at the center of the southwest quarter of the southwest quarter of section 17-13s-25e.

Continental Oil Company No. 1 W. P. Thurman-Federal, wildcat in extreme Central-North Eddy County, is being drilled below 10,500 feet in dolomite.

Location is 660 feet from north and east lines of section 11-16s-27e.

Watts, PAD Official, To Speak In Midland On Oil Tubular Goods

Midland is one of nine cities in the United States at which officials of the Petroleum Administration for Defense will speak during this week.

Frank A. Watts, director of materials for the PAD, who is on leave from his regular job as general sales manager of Humble Oil & Refining Company to handle the government assignment, will speak at the City-County Auditorium in Midland at 1:30 p.m. Friday.

Watts will explain the oil field material situation and report on new developments in the PAD program for the distribution of oil country tubular goods.

His address will be of an informal nature and he will answer all questions asked from the floor.

Sponsors of the meeting are every oil company and oil operator in the Permian Basin to have representatives attend the session.

Watts is well known to oil industry personnel in this region. He served as director of the Petroleum Administration for War during World War II.

Other cities in which meetings will be held during the week to explain the PAD program include Chicago, Denver, Los Angeles, Tulsa, New Orleans, Dallas, Houston and Wichita Falls.

Corrosion Tour Is To Be Discussed At PB-NACE Meet

The Permian Basin Section of the National Association of Corrosion Engineers will hold an important meeting Monday night in the Gulf Auditorium in Odessa.

E. B. Ray, chairman for the organization, urges all those interested in corrosion problems to be on hand to help determine whether or not the association will sponsor a corrosion tour this year.

Y. W. Titterton, development engineer for Dowell, Inc., of Tulsa will be guest speaker.

He is to talk on "An Investigation of the Effectiveness of Magnesium Anodes in Reducing External Corrosion of Oil Well Casings."

Tom Smith, oil editor of the Odessa American, and Johnny Shelton, of the National Tank Company of Midland will report to the meeting on what they have found out about possibilities of the corrosion tour.

A booklet containing information gathered during the last corrosion tour, in 1949, will be available at the meeting.

The meeting is open to the public. Starting time is 7:30.

WGA To Meet In Sinclair For Sixth Annual Conference

CASPER, WYO.—The oil possibilities of South-Central Wyoming will receive a thorough investigation August 1, 2 and 3 when more than 200 geologists, representing most major oil companies as well as state and federal agencies, gather in Sinclair, Wyo., for the sixth annual field conference of the Wyoming Geological Association.

The program will include transportation of participants in a 65 car caravan to various points of geologic interest in a 4,200 square mile area, of which less than 12 square miles now produces oil or gas.

Will Make Comparisons

The purpose of the conference will be to throw new light on past detriments to exploratory efforts in the area and to point out the possible presence of fault and stratigraphic trap oil accumulations similar to recent discoveries in other parts of Wyoming.

Past field conferences of the Wyoming Geological Association have invariably been followed by important new oil discoveries in the regions covered, the latest being General Petroleum's successful Tip Top test in Sublette County, site of the 1950 conference.

General chairman of the conference is R. W. Mallory, Stanolind Oil and Gas Company geologist. W. F. Brinker, Cities Service Oil Company, and Dr. D. L. Blakestone, Jr., are joint directors of the 200 page Guide Book now being prepared, and George Veronda, Ohio Oil Company, is in charge of caravan arrangements.

Shivers To Urge Compact Extension

AUSTIN —(P)— Gov. Allan Shivers will urge a congressional committee Monday to extend the Interstate Oil Compact four years.

Shivers will fly to Washington Sunday, accompanied by Maurice Akers and Weldon Hart of his staff. He will return to Austin Tuesday.

The Texas Governor is chairman of the Interstate Oil Compact Commission, which has existed since 1935. The hearing before the House Committee on Interstate and Foreign Commerce is on House Joint Resolution 206.

SOLO TO PROPOSE END OF MACARTHUR HEARINGS

WASHINGTON —(P)— Senator Hunt (D-WVA) served notice Saturday he will bring up a resolution Monday to end the MacArthur inquiry on June 30.

The hearings have been under way since May 3.

Advertisement for MIDLAND MAP CO., 412 N. Big Spring, Ph. 3238

Denton Is Elected By Scouts, Landmen To Head Publicity

R. L. (Bob) Denton of Midland was elected third vice president in charge of publicity, for the National Oil Scouts and Landmen's Association Saturday.

Denton will serve in that position during the next year. His election came at the close of the twenty-eighth annual convention of the association. The meeting was held in Beaumont.

Denton is a representative of the crude oil purchasing and sales department of Magnolia Petroleum Company and is a member of the Permian Basin Crude Oil Scouts Association.

Winckler Gets A Job

William H. Winckler of Abilene, a former Midland resident, was elected editor-in-chief of the scout association's yearbook. Winckler is also a Magnolia employe, being scout at Abilene for the West-Central Texas district.

Lee Steadman of Tyler, with the Pure Oil Company, was named president of the NOS&LA at the Beaumont meeting.

H. Leroy Carter of Jackson, Miss., with Carter Oil Company was elected first vice president and David J. Ridgeway, of Casper, Wyo., with Phillips Petroleum Company was elected second vice president.

Canadian Named

Eugene T. Hall of Calgary, Alberta, Canada, was named secretary-treasurer.

Hill C. Adams of Houston, with American Republics Corporation was made an honorary member of for having rendered, "Distinguished Service to the Association."

The 1952 convention will be held in Albuquerque, N. M.

Midlanders Offered Radio Talks With Sons In Japan

A Midland radio operator offered Saturday to span the 6,500 miles between here and Japan to bring Midland residents and their sons, husbands and sweethearts together.

He is J. A. Price, 1003 North Main Street.

Price maintains daily radio communications with Yokohama and Tokyo in Japan and is ready to offer this service to anyone in Midland, whose loved ones are in Japan.

"All they have to do," he said, "is let me know where their loved ones are located in that area and with what outfit."

He will then proceed to contact the military base in Japan and make arrangements for the person there to be available at a specified time—probably on the following day.

The person in Midland will be notified and, when contact is made a conversation can be carried on over the radio-telephone.

The best time for communications with Japan, he said, is between 6 a.m. and 8:30 p.m. each day.

"I barely missed talking to my own son, Bob, in Tokyo the other day," he said. "But I did get to talk to his company commander."

While Price is unable to contact armed forces radios in Korea he can send messages, which will be forwarded.

Price said he is at home during the day on Sundays and can be reached at telephone 1232-W. During the week he can be reached at home after 5 p.m.

Recently promoted to private first class is Kelly Joe Proctor, son of Mr. and Mrs. Ira Proctor, 1407 West Ohio, and husband of the former Juneta Jones, 705 North Weatherford.

He is an instructor at the chemical replacement training center at Fort McClelland, Ala.

He was graduated from Midland High School in 1945 and attended the University of Texas.

Chief C. R. Isaacs, recruiter from the Navy recruiting station in San Angelo, will be in Midland Monday afternoon and can be contacted in the basement of the post office building.

He said Saturday the quota for June enlistments is considered high in order to allow qualified men just out of school to make application for enlistment in the Navy.

Due to lower physical and mental requirements, many young men who previously were rejected now may apply for enlistment.

Word was received here last week that Captain A. V. Johnson, Jr., former Midland chiropractor, has been assigned as commanding officer of headquarters and headquarters company of the 15th Medical Battalion of the First Cavalry Division in Korea.

M. Sgt. Boyd Knowles of the U. S. Marines recruiting office in Odessa will be in Midland Monday at the post office.

All men interested in the Marine Corps can contact him for information on enlistment. He explained that requirements include good physical condition for men between the ages of 17 and 29. Men can enlist for three years or join the reserves for an indefinite period.

A phone call at 1 a.m. last Wednesday caused considerable excitement in the home of Mr. and Mrs. E. G. Whigham, 205 East Washington Street.

It was Tokyo calling and M. Sgt. W. J. Whigham was on the line. He hadn't been home in two and one-half years and had been in Korea since the war broke out there.

For 30 minutes he talked to his parents and Mrs. C. L. Clary of McCamey, his sister, who was visiting.

He gave them the good news that he was on his way home and will be here in about 20 days.

Carrier Sets Speed Record In Returning From Korea Theater

SAN FRANCISCO —(P)— The 27,000-ton aircraft carrier Philippine Sea came home through the Golden Gate Saturday, setting a speed record for the Japan-San Francisco crossing.

She has been serving in Korean waters the last year.

Aboard the big flattop was one of the Navy's crack flying units, the much-decorated Air Group 2, 2,800 men strong, commanded by Cmdr. Robert Rynd of Alameda, Calif.

A swarm of Navy fighting planes left the carrier's deck while she raced toward shore.

They assembled at Alameda Naval Air Station, where the Philippine Sea berthed.

The Philippine Sea bettered by some five hours the previous speed record set last year by the carrier Boxer, which made the crossing in seven days, 18 hours and 36 minutes.

The Philippine Sea, skippered by Capt. Ira Hobbs of Coronado, Calif., has been in Korean waters since July, 1950.

Another group of fliers will return home Sunday from the Korea Theater. Members of Carrier Air Group 19, they call themselves the "Navy Bridgebusters." They have had six months of war, aboard the veteran carrier USS Princeton.

The carrier still is operating in Korean waters. The 400 enlisted men and nine officers are aboard the transport Gen. Nelson M. Walker, due here late Sunday.

Andrews News Friday

ANDREWS —(P)— A terrapin race Friday morning and commencement exercises Friday night climaxed the one-week Daily Vacation Bible School at the First Baptist Church. Mrs. L. B. Williams, general principal, was assisted in the administration of the school by the Rev. and Mrs. E. Brand; Buff Miller of Hardin-Simmons University and Maxine Adams of Wayland College, two state workers; and other local women and girls.

Mr. and Mrs. Claude Isaacs are new Andrews residents. They came here from Midland. Isaacs is meat salesman for the Andrews Packing Company.

Mr. and Mrs. Willard Bell of Jal. N. M., recently purchased the Rogers Courts from Willard Rogers, who has moved to Roswell, N. M. Bell said the courts will now be known as the Lone Star Courts.

The school's Summer recreational program got under way with an enrollment of 42 boys and 30 girls. The program calls for basketball, volleyball, tennis, baseball, softball and swimming. Miss June Moreton will direct the girls' recreational activities and Truman Miller and Neal Taylor will be in charge of the boys' program.

Swimming Begins

The Andrus County swimming pool has been opened to the public. Truman Nix will be in charge of the pool and will serve as life guard. The pool will not be open mornings.

Nelson Dyess, son of Mr. and Mrs. Sam Dyess, a Hardin-Simmons University graduate, has arrived home for the Summer. He is employed by the Magnolia Petroleum Company. Dyess plans to return to school in the Fall to continue his studies.

Mr. and Mrs. Vance Sellers and their twin sons, of Houston, were recent guests of Mrs. Seller's sister, Mrs. L. W. Nix.

Barry Brooks and Rex Perrin have gone to Lubbock, where they will attend the Summer session at Texas Tech.

Mrs. Naomi Keethley and Miss Lillian Knowles of San Angelo were recent guests in the home of Mrs. Keethley's daughter and son-in-law, Mr. and Mrs. Charles A. Dean. The guests have gone to Alpine where they will enroll in Bull Ross College for the Summer.

Victim Of Scooter Accident

Mrs. Charles Roberts, Sr., has returned home from a visit in Abernathy with her sister, Mrs. Clayton Barrick, who is ill.

Mr. and Mrs. Walton Creech and their grandson, Bobby, of Carlsbad, Texas, have returned from a trip to San Antonio and other towns in South Texas. The Creeches attended the Memorial Day services at Fort Sam Houston National Cemetery where their son, Lt. Elbert W. Creech, is interred.

The Rev. and Mrs. William C. Watkins of Flint, Mich., and Mr. and Mrs. Dan Falon of Cadillac, Mich., were overnight guests recently of Mr. and Mrs. Harold Roberts.

Mr. and Mrs. D. Mower and their daughters, of Wichita, Kan., were guests recently of Mr. and Mrs. James Willet, who are on vacation in Phoenix, Ariz.

Annual Boys' State Slated June 17-23

AUSTIN —(P)— Lone Star Boys' State, an annual experiment in government by teen-age Texas boys, will be held in the capital city June 17-23.

This year's "state" will have the largest enrollment in the 12-year history of the program, with 476 high school juniors from more than 200 communities on hand. They will operate under the watchful eye of the American Legion.

The boys form their own "political parties," hold caucuses, choose officers by regular election procedures, and "legislate" on almost as many matters as the regular Texas Legislature.

Speakers who will address the Boys' State citizens include Chief Justice J. E. Hickman of the Texas Supreme Court; Secretary of State John Ben Shepperd; French Robertson, director of civilian defense for six southwestern states; House Speaker Reuben Setteritt; Public Safety Director Homer Garrison, and R. L. Thornton, chairman of the Dallas Mercantile National Bank, and Claude Glimmer, chairman of the Board for State Hospitals and Special Schools.

More than 2,500 Rainbow Girls will be hostesses at a dance at which the boys will be guests. The dance climaxes the twenty-eighth session of the Grand Assembly of Texas, Order of the Rainbow for Girls.

Mims And Stephens Observe Birthday

The Midland insurance firm of Mims and Stephens last week celebrated its twenty-eighth anniversary. The firm was founded June 3, 1923, by Percy J. Mims and R. V. Hyatt.

The firm is now owned by Edwin R. Stephens and James W. Mims, son of the late Percy J. Mims, who Mims entered the firm in October, 1945, when he returned from the Army. Stephens came to Midland in April, 1946.

The original firm of Hyatt and Mims later became known as Hyatt, Mims and Crane. Claude O. Crane, the third member, now lives in Durango, Colo.

In the 1930's the name again was changed to Mims and Crane until 1947, when the firm assumed its present name of Mims and Stephens.

Mims and Stephens handles general insurance and at present operates a real estate department under the management of Hugh Wallace, who came here about a year ago from Denver, Colo.

The firm at one time owned the West Texas Abstract Company, sold in 1946 to Barney Grafs and Mrs. Susie Noble.

Texas Polio Level Stays Below Normal

AUSTIN —(P)— Texas' 1951 polio level continues to be lower than normal.

The State Health Department Saturday reported there were 22 new cases for the week ended June 2. That is four below the median for this time of year.

Sulphur sells for about one cent a pound.

Texan Named Heir To \$600,000 Estate Of Stranger Cousin

LEWISTON, ILL. —(P)— William F. Crothers, 73, of San Antonio Saturday was the only legal heir to a \$600,000 estate left by an eccentric woman he never saw.

She was Mrs. Martha E. Waggoner, about 70, wealthy recluse found near death on the floor of her littered Lewiston mansion in March. She died in a hospital a few days later, March 26.

Fulton County Judge Albert Scott Friday signed an order declaring Crothers the only legal heir to the estate.

Glenn Ratcliff, lawyer for a dozen or more other claimants to the estate, promptly filed notice of an appeal to circuit court.

Crothers and Mrs. Waggoner were first cousins. He testified in county court Friday that he had heard of the eccentric widow but never had seen her.

Funeral Services Held For Van Camp

Funeral services for Van Camp, 51, who died Friday in a Midland hospital, were held at 9:30 a.m. Saturday in the First Christian Church with the Rev. Clyde Lindsay, pastor, officiating.

Brief services and interment were held at Pecos Saturday afternoon.

Funeral services were held by C. M. Webb, James Voucher, Leo N. Montgomery, Dudley Howard, J. F. Godfrey, O. Alsup, Clifford Cool and W. D. Gill.

Survivors include the widow, Mrs. Maurine Camp of Midland; the mother, Mrs. Jo Camp of Fort Worth, and two brothers, Ray M. Camp of Fort Worth and Jo W. Camp of Pecos. He was a nephew of Dr. Jim Camp of Pecos.

Camp was born Dec. 29, 1896. He had been associated with the Magnolia Petroleum Company for many years and was division engineer here at the time of his death, having transferred back here from Florida about four years ago. He had been stationed here about nine years before going to Florida.

Camp was born and reared in Pecos and had lived in Fort Worth. He was a graduate of TCU and was an Army veteran of World War I.

Perrin Field Flier Dies In Jet Crash

WILLIAMS AIR FORCE BASE, ARIZ. — (P)— Capt. Charles John Webb, Perrin Field, Texas, was killed in the crash of his F-80 shooting Star jet plane in a routine flight Friday afternoon, officials said Saturday.

Captain Webb was on temporary duty at this base as a student in a jet upgrading course. His personnel records were not available here.

He died when his plane crashed and burned near Bagdad, Ariz., 160 miles northeast of this base.

His widow, Colleen Webb, and their two daughters live in nearby Chandler, Ariz.

Midland Bandmen To Attend School

ABILENE — Eight students of Midland High School have been accepted for the McMurry College Band School to be held July 23-August 4.

They are Lanny Story, Phillip McFaddin, Jack Mathews, Fred Haase, Doris Haase, Charles Fredregill, Rip Griffith and Gene Adkins.

On the band school faculty is George Gates, director of the Cowden Junior High Band at Midland. He will teach percussion instruments.

The school is open to college, high school and advanced junior high students. Classes will be offered in general music, conducting, marching, twirling, elementary and intermediate theory and band performance.

Week-Old Siamese Twin Sisters Die

TORRINGTON, CONN. — (P)— Siamese twin daughters born to Mr. and Mrs. Robert Litchfield of this city a week ago died Friday night at Charlotte Hungerford Hospital.

The twins, joined at the chest and possessing a mutual heart and liver, had been kept alive in an incubator seven days. They had been born by Caesarean section.

Their 20-year-old mother, still at the hospital was reported Saturday to be in "good" condition.

Colts Blank Indians 5-0

The league-leading San Angelo Colts methodically chopped down the uncertain Midland Indians here Saturday night 5-0 behind the six-hit pitching of Indo Beltran. Wayne Wallace smacked a home run off loser Eddie Jacome in the fourth inning to score Bob Cruces ahead of him and put the Colts in front 4-0. It was his eleventh four batter of the year.

Midland threatened in the sixth when Eddie Melillo singled and went to third on a double by Kenny Jones, with no outs. But Bill Hornsby struck out. Dick Campbell also whiffed and Eddie Jacome waved futilely at a third strike as Beltran pitched his way out of the hole nicely.

Dutch Funderburk, Angelo manager, was taken from the field and to Memorial Hospital for treatment of a hand injury in the eighth inning. The same two teams meet here at 3 p.m. Sunday.

Former Texan Paces All-Marine Event

OCEANSIDE, CALIF. —(AP)—Camp Pendleton's Tom Rogers, former University of Texas cross-country star, breezed to easy victories in the 880-yard and mile runs in the finals of the All-Marine Track and Field Championships here Saturday.

His two wins Saturday raised his total victories to three for the two-mile meet. Friday, he won the two-mile run in new meet time and he posted another record Saturday in the mile with a 4:31.1 effort.

THE REPORTER-TELEGRAM, MIDLAND, TEXAS, JUNE 10, 1951—9

Nine Records Fall As Aggies Capture Texas AAU Crown

SAN ANTONIO —(AP)—Nine records were broken and one tied Friday night as Texas A&M College swept to the team title in the Texas AAU Track and Field Championships.

A&M scored 126 points to 99 for second-place Texas Athletic Club. Brooke Medical Center was third with 51 1/2 points, followed by Prairie View with 38 1/3 and Trinity University with 25.

New records were set in the 100, 200, 400 and 800-meter runs, and 200 and 400-meter hurdles, shot put, high jump and javelin throw. The 110-meter hurdle mark was tied.

Darrow Hooper of A&M set records in the shot—51 feet, nine inches, and discus—156 feet, 11 inches.

Dean Smith of the University of Texas won the 100-meter run in 10.3 seconds and Teammate Charley Thomas ran 200 meters in 20.6.

Don Parker of Texas College, Tyler, posted a time of 48.3 in the 400-meter run.

New Javelin Mark Charles Holding, East Texas State, won the high jump at six feet, seven and one-half inches.

Paul Faulkner of Abilene Christian set a javelin mark of 211 feet, nine inches.

Herb Falkenberg of Trinity ran the 400-meter hurdles in 53 seconds and Billy Bless of A&M topped the 200-meter hurdles in 23 seconds.

Gerald Scallorn, Texas, tied the 110-meter hurdles mark of 14.8 held by Augie Erfurth and Bill Cummins of Rice.

Leonard Lepard, Abilene, set the 800-meter mark in 1:56.9.

Lemon Tames Bosox As Tribe Wins 5-1

CLEVELAND —(AP)—Bob Lemon tamed the Boston Red Sox Saturday with a seven-hit pitching performance that gave the Cleveland Indians a 5-1 decision. The Indians clinched matters in the first inning by banging lefty Mel Parnell for four singles and two runs.

The score:

	R	H	E
Boston	000	100	000-1 7 1
Cleveland	210	002	00x-5 11 0

Parnell, Kinder and Moss; Lemon and Hegan.

Yanks Chill Sox Second Straight

CHICAGO —(AP)—The onrushing New York Yankees chilled the Chicago White Sox for the second straight day Saturday 10-5, trimming the Pale Hose lead to two and one-half games and shattering a five-game win streak by lefty Billy Pierce.

A crowd of 24,726 saw the Yankees relentlessly run their season mastery over the Sox to four games to one behind a 14-hit attack.

Although Frank (Spec) Shea started and surrendered a 6-2 lead to Reliefer Tommy Byrne in the fifth, the victory was credited to Byrne, his second decision against one defeat. The wild left-hander allowed only one hit until he got wild in the eighth and was yanked in favor of Joe Ostrowski after hitting a batter and walking two to fill the bases.

The Sox, who owned a six-game win string and 20 decisions in 22 starts before the Yanks showed up Friday, had to derrick the ineffective Pierce in the fifth after the Yanks had battered him for nine hits and a 6-2 lead.

It was Pierce's first defeat since May 3, when he bowed to Washington 7-1, and left him with a 7-3 season record.

Twin Bill Sunday The Sox—who must face the Yanks in a twin bill Sunday—used four pitchers in all.

Off-afflicted Joe DiMaggio was benched by a sore left leg, but the Yankees didn't miss him as they leveled off on Pierce for six hits and four runs in the fourth and got the only other run they needed in the fifth on Phil Rizzuto's single and Gil McDougald's double for a 6-2 margin.

Three more Yankee runs clamored across in the sixth when Kretlow wavered after a fine fifth inning relief stint, and the Yanks got an insurance marker in the eighth.

The score:

	R	H	E
New York	100	413	010-10 14 6
Chicago	010	120	010-5 7 3

Shea, Byrne, Ostrowski and Rizzuto; Pierce, Kretlow, Rotblatt, Gumpert and Masl.

TCU Frogs To Play Trinity U In 1952

PORT WORTH —(AP)—Texas Christian University and Trinity University will meet in Football at San Antonio next year.

A joint announcement of Athletic Directors Dutch Meyer of TCU and Bill James of Trinity said the teams would clash for the first time in San Antonio's Alamo Stadium on Oct. 11, 1952.

Addition of the Trinity game leaves TCU with one open date for 1952 and negotiations to fill that spot are well advanced. The Purple already has games with Kansas at Lawrence and UCLA at Los Angeles, plus six conference games.

Oilers Tag Indians 6-3

A five-run outburst in the fifth inning sent Midland starter Gabby Blumenthal to an early shower and started the Odessa Oilers on the way to a 6-3 win over the skidding Midland Indians here Friday night.

Juan Guerrero scattered 10 hits in hurling the Oilers to victory.

Blumenthal had the Oilers on his hip until the fifth, allowing two bingles the first four innings. But he walked a pair and allowed a two-run double by Barney Batson that led to his defeat when Leo Eastham doubled off reliever Bill Reed. The runs that Eastham knocked in were charged to Blumenthal.

Reed pitched good relief ball, allowing one run in the fifth and another tally in the eighth. He struck out six, and walked only one—but the damage already had been done.

The Indians scored first in the second inning as Catcher Gordon Tanner smacked a ringing triple to center field and scored when Bill Hornsby reached base by error. Two more runs crossed the plate in the fourth as Tanner again started the rally, this time with a double. Hornsby reached base by fielder's choice, as Tanner was erased at third. Campbell reached base by error and Hornsby scored. He earlier had pilfered second base. Eddie Jacome then laced a double to center field, Campbell taking third. Blumenthal failed to score the Midland first sacker, and the Indians were up there, 3-0.

Then came the Odessa rally that gave the Oilers their seventh straight win and tagged Midland with the latest of many losses.

Browns Nip Senators In Overtime Contest
 ST. LOUIS —(AP)—Ray Coleman, who tripled twice earlier in the game, singled Jim Delahogue home from third in the eleventh inning Saturday to hand the St. Louis Browns an 8 to 7 victory over the Washington Senators.

The Senators had taken an early lead on Sam Melle's grand slam homer but the Browns tied the count in the sixth when Coleman tripled with the sacks loaded and scored on a wild pitch.

PITCHING IN PUDDLES—Rain doesn't spell rest for the surprising White Sox. With the game postponed, and the tarpaulin covering the infield, Pitcher Howie Judson warms up under the critical gaze of the Chicago club's driving new manager, Paul Richards. (NEA)

Pull Up A Rocking Chair; It's Old Joe Vs Old Savold

By SYD KRONISH
 AP Newsfeatures Sports Writer
 NEW YORK—Time was when the mere mention of Joe Louis would send shivers up and down the spines of heavyweight boxers. Now that the ex-champ is 37 years old and fighting with a crutch under his arm, all sorts of fistic characters are creeping out of the pugilistic woodwork. They all want a crack at old Joe. And old Joe, sad to relate, wants to take 'em.

Latest heavyweight to take up the cudgel is Lee Savold, himself 35 Summers young. He will meet Louis Wednesday in New York's Polo Grounds. The bout is scheduled for 12 rounds—if both contestants can keep from tripping over their heads.

It will be bout number six in the Louis comeback campaign since he lost to Ezzard Charles Sept. 27, 1950. The other fights were with such men as Freddie Besore, Andy Walker, Cesar Brion and Omelio Agramonte—the last mentioned twice.

Louis in his prime could have taken all five in the same ring and still have had enough stamina to paralyze Charles.

The Brown Bomber of today, however, has slowed down to a walk. He knows what to do and when to do it but his reflexes have failed him. He lacks that murderous wallop and thunderous finish he displayed against such guys as Jim Braddock, Max Baer, Tony Galento and Max Schmeling.

Savold is recognized as world's champion by the British Boxing Board of Control because he halted Bruce Woodcock in four rounds June 6, 1950. Since then however, Lee hasn't been inside the ropes officially.

Winner Gets Charles
 Jim Norris, president of the International Boxing Club, says that the winner will meet Charles sometime in September in a championship go.

Louis has been pointing for this second crack at Ez and hopes Savold will be the stepping stone to that goal.

Savold may prove a slippery stone, though. He can punch as his record of 53 KO's indicates, but he can be punched, too. Five times in his career he received the lethal treatment.

The night of June 13 may be a lucky one for Joe—but the creaking of old bones may be louder than the thud of leather against flesh somewhere near second base in the home of the New York Giants.

Rotary, Plastics Win In JayCee Softball League
 Rotary Engineers dumped Shell Oil, 12-6, in City Major play in the JayCee Softball League Friday night, as Jerry Matajek hung up his seventh win of the season. He allowed nine hits.

Will Salmon was the loser. Rotary got eight hits off Salmon and Jack Rogers. Chappell smacked a home run for the losers in the fifth, with one on. Rotary scored four runs in the last inning to sew up the game.

Martin Wins
 In a second contest, Western Plastic defeated weak American Legion, 12-4, behind the two-hit hurling of speedy Lefty Martin.

Both of the Legion hits were home runs by Center Fielder McCullough, and both came with one on.

Martin helped his own cause with a home run in the fourth, scoring a teammate ahead of him. Howard, the losing hurler, was touched for 13 hits by the Plastics.

Club	W	L	Pct.

HURT HITTING TRAILER
 C. C. Jameson of Levelland was given emergency treatment at Midland Memorial Hospital Friday night for lacerations on the thumb and forefinger of his right hand suffered as he was hitching a trailer to a truck.

Pirates End Brooklyn's Win Streak

BROOKLYN —(AP)—Little Murry Dickson, ace pitcher of the Pittsburgh Pirates, ended Brooklyn's six-game winning streak Saturday as he checked the Dodgers 4-1 for his seventh victory of the season.

Dickson allowed eight hits but spread them over as many innings. He held the Dodgers hitless in the sixth. Three double plays eased Dickson to his second victory in as many tries over the Dodgers.

The Brooks nicked Dickson for their lone run in the first inning on a walk and a triple by Duke Snider. Wally Westlake was the Pirates' big gun. He drove in three runs on a single and his fifteenth home run of the season.

Don Newcombe started for the Dodgers and was charged with the defeat. He retired in the fourth inning, complaining of a pulled muscle in his right shoulder.

Newcombe injured his shoulder pitching to Ralph Kiner, Pirate leadoff batter in the fourth. Kiner grounded to Second Baseman Jackie Robinson. Robinson made a two-base wild throw of the grounder. It was Robinson's first error in 29 games.

Gus Bell doubled Kiner home and then came across on a single by Westlake. Newcombe retired the next two hitters but was clipped for a single by Dickson. He worked the count to 3 and 2 on Hank Schenz and gave way to Clyde King.

King held the Pirates at bay on one hit. George Metkovich's fifth-inning single, until the eighth, when Westlake sealed the verdict with his two-run homer.

The score:
 Pittsburgh 000 200 020-4 9 0
 Brooklyn 100 000 000-1 8 2

Dickson and McCullough; Newcombe, King, Palca and Campa-nella.

Longhorn League—Oilers, Dusters, Rockets, Broncs Notch Loop Wins

By The Associated Press
 Longhorn League baseball was as variable as Texas weather Friday night. One of the games was a well played, 11-inning pitchers' duel, another was a wild scoring affair. The other two were just good ball games.

San Angelo and Big Spring tangled in the pitchers' duel with the Broncs taming the league leaders 3-2 when Manny Junco tripled and scored on a single by Charlie Lofland in the eleventh.

Pancho Perez and Lou Lozano were tight in the clutch with Perez taking the decision.

Roswell and Sweetwater tangled in the slugfest with the Rockets winning an 18-9 decision. It was a wild game from the first. Roswell scored 11 runs in the first three innings then finished with seven in the last two.

Sweetwater got started slowly but finished by holding its own. The Swatters scored seven times in the last three frames.

Vernon whammed Artesia 10-7, and Odessa trimmed Midland 6-3 in the other two games.

It was Melvin Miller night in Artesia as fans honored the 18-year-old pitcher. But he didn't do so well on the mound. Vernon shelled him hard and he was relieved in the seventh.

Odessa scored five runs in a big fifth inning to beat Midland. The rally, paced by Barney Batson, wiped out a 3-0 Indian lead.

The scores:
 R H E
 Vernon 400 000 321-10 12 1
 Artesia 020 020 201-7 7 0

Epperson and Herring; Miller, Lopez, Finkler and Brown.
 Sweetwater 020 000 241-9 7 6
 Roswell 614 000 43x-18 15 3

Piloto, Zavala and Ortosky; Grimes and Sanders.
 Big Spring 000 002 000 01-3 12 3
 San Angelo 010 010 000 00-2 9 1

Perez and Valdes; Lozano and Garza, Funderburk.

Greenies, Scotties And Bronchos Dominate Third All-State Schoolboy Nine

AUSTIN —(AP)—Champion South Park of Beaumont and Runner-up Highland Park of Dallas placed four players on the all-tournament team picked here by sports writers covering the third annual High School Championship Baseball Tournament.

The balancing factor hinged around the second base post with Sam Rowland of Highland Park barely nosing out South Park's Johnny Bloodsworth by one vote.

South Park also had the tournament's outstanding player in Jerry Nelson, who pitched the Greenies to two of their three victories in winning the Class AA title, including a two-hit victory over Highland Park in the final.

The team and the players' tournament batting or pitching averages.

1b—Jack Dulaney of Highland Park (.250).
 2b—Sam Rowland of Highland Park (.364).
 SS—Tommy Warner of Odessa (.167).
 3b—Ray Mitchell of South Park (.222).
 C—David Verble of South Park (.250).

OF—Frank Gee of Odessa (.206).
 OF—Jerry Singletary of South Park (.333).
 OF—Fred Ablon of Highland Park (.545).
 P—Jerry Nelson of South Park (2-0).
 P—Ed Henning of Tyler (0-1).
 P—Garland Fuqua of Odessa (1-0).
 P—Jim Robertson of Highland Park (1-1).

Honorable Mention
 Players receiving mention include:
 Infielders—Elton Stanberry of Wichita Falls, Billie Bob Brashear of Wichita Falls, Kermit Cummins of Wichita Falls, Richard Stone of Wichita Falls, Johnny Bloodsworth of South Park, Johnny Sanchez of Roy Miller (Corpus Christi), Tommy LeBlue of Roy Miller, Hamilton Shaw of Highland Park.

Outfielders—Maur Lloyd of Austin, William Perrigo of Tyler, Avi Susman of Highland Park, Herbie Taylor of Wichita Falls, Larry Cobb of Wichita Falls.
 Pitchers—David Fleming of Wichita Falls, Billy Stone of South Park.

TO HAVE TONSILS REMOVED
 Lee John Helis, six-year-old son of Mr. and Mrs. George John Helis, of 404 West Jax Street, was admitted to Midland Memorial Hospital Saturday for a tonsillectomy.

WILSON'S

Eddie Jacome Is Longhorn League's Leader, Games Won

ARLINGTON — Midland's Eddie Jacome still is the leader in games won in the Longhorn League this season. The strong-armed right-hander had won 11 games as of June 8, date of the official averages.

Jacome's 188 innings pitched and record of 10 complete games tops the list also.

In percentage, San Angelo's Bob Garza is in front with a 6-0 record. He also has the best ERA—1.78.

Vernon's Marshall Epperson leads in both strikeouts and walks. He has whiffed 71, walked 79.

Hitters

On the hitting side, Sweetwater's Walter Graham tops the loop with a lusty .413 average. Odessa's Leo Eastham has scored the most runs, 53, while Julio de la Torre of Artesia has banged out 71 hits to lead that department.

San Angelo's John Tayoan leads in total bases, 161. Tayoan, de la Torre and Valdez of Big Spring had 14 two-base hits to top that department. Warren Sliiter of Sweetwater and Bill Martin of Odessa have banged out seven triples. Wayne Wallace, the San Angelo slugger, leads in home runs. He has 10. RBI leader is John Reinhold of Vernon, with 59.

Ozark Schoolboy Gridiron Star Is Enrolled At Tech

LUBBOCK — Buddy Jones, Hot Springs, Ark., schoolboy football star, enrolled in Texas Tech Saturday and doused reports he allegedly had been held incommunicado this week at a Roanoke, Va., YMCA.

Jones said his credits already had been mailed to Texas Tech before he visited Virginia Polytechnic Institute.

"They were kind enough to invite me to visit the campus," he said, adding that he did.

"They treated me very nice while there," he added.

VPI officials scoffed at the report Jones had been held incommunicado.

SPECIALIST SOUGHT

The U. S. Civil Service Commission has announced the closing date for applications for the position of industrial specialist will be June 18. Applications for the position, paying from \$3,100 to \$6,400 a year, must be in the Office of the Regional Director, Fourteenth U. S. Civil Service Region, 210 South Harwood Street, Dallas, by that date.

King's Row

By LARRY KING

A Midland woman, who is a rabid baseball fan, told us point blank Saturday it is our fault the Midland Indians are not in the Longhorn League's first division.

While our won-lost record may not be impressive enough to boost the club to the first four, we'd wager we could win in the loop if the club would get us enough runs, although the number of runs required might be between 68 and 70.

But, said the lady, she didn't refer to our pitching or batting talents—of which we have absolutely none—but to our writing talents, of which we have very little.

Her beef was because we have disagreed publicly and quite frantically with dynamic Harold Webb, owner-manager of the Midland Indians.

"It's the woman's opinion the club would be in better standing and grace if we had," she said, "operated with Harold" throughout the season.

Actually, with the way the Midland team has played at times this year, we doubt if honeyed words of encouragement would have helped much, even in the last of the

season. But, sadly enough, that doesn't seem to be the case. The Indians have needed pitching since the middle of last season and there hasn't been—and doesn't seem to be—any relief in sight.

Webb says he can't buy pitching with the crowds he draws at Indian Park.

Perhaps so. But he can't expect larger crowds until the pitching situation improves.

Our job is to report the facts to the people in news stories and add our opinion somewhat in this column.

The box scores and Longhorn League standings will show our opinions haven't been exaggerated greatly when we say the Midland pitching situation is either tragic or comical.

To be sure, we know the players on the Midland club are fine fellows and we like Kenny Jones, Eddie Melillo, Eddie Jacobs and the rest of the fellows personally.

And, strangely enough, Webb himself is a fine old boy in a lot of ways. He did indeed bring Midland its first baseball, turned out good teams for several years and won the pennant in 1948.

But that's little consolation this year, when you sit through a three-hour game at Indian Park and see the team defeated.

Webb himself admits he has seen his best days in Midland baseball. When he says that, and many fans agree, it's time to quit.

We want baseball to stay in Midland. We hope Midland fans and businessmen will buy the club here Sunday and go all out to build a winner. We'll help in any way possible, if they'll do their part.

Now, we've spoken our piece. Go ahead and shoot.

Advertise or be forgotten.

BACK FROM DALLAS

Mrs. W. G. Keeler and children, Jerry, Donna and Linda Kay, have returned from a trip to Dallas where they visited relatives and friends.

Presbyterians Say Controls Too Late To Help Ministers

ORLANDO, Fla. — A complaint was made Saturday night that meat price controls had come too late for retired Presbyterian ministers "because they have only a fading memory of what steak resembles."

The 31st General Assembly of the Presbyterian Church in the U. S. from 18 Southern states was told by Dr. Wade H. Boggs of Louisville, Ky., that government financial policies had just about ruined annuities.

Dr. Boggs, executive secretary of the Board of Annuities and Relief of the church said:

"While our pension system is in excellent condition at the present time, the lot of many of those who are retired upon its benefits is far more difficult than was contemplated when the fund was opened."

"This condition is due to the depreciated dollar, a condition with which all salaried people are painfully familiar."

He said "for many years something has been basically wrong with our beloved church in the way she has used up the lives of her ministers without making provision for their retirement."

"To be sure we have an adequate pension, but it still is in its infancy. The accumulated responsibility from the days before it opened must be met."

Later in the afternoon, Junior Odd Fellow team awards were presented to Pampa, first place, and Fort Worth, second place. Accepting awards for the Theta Rho girls were Hereford, first; Pampa, second; Odessa, third; Fort Worth, fourth, and Houston, fifth.

In the final session of the two-day convention here Johnny Ralls of Fort Worth was installed as Junior grand chief ruler and Dolores Gramb of Pampa as president of Theta Rho.

RETIREMENT DIES

DALLAS — The Rev. John T. Price, 85, Presbyterian pastor at Childress, Garland and Rockwall before his retirement in 1948, died here Saturday. Funeral services will be held here Monday.

PENN MAKES AIR TOUR

W. Y. Penn, 819 West Storey, has returned to Midland from a business trip in his plane to Beaumont and Austin.

CEASE-FIRE

(Continued From Page One)

not mentioning Marshall's visit, gave a reporter this view of recent cease-fire rumors:

"We will do something in desperation if the United Nations should make any decision contrary to our national security."

He did not say what.

Rhee, in reference to the 38th parallel, said there no longer was any line between North and South Korea and United Nations forces should go ahead. The cease-fire rumors mention a halt somewhere around 38.

"We are fighting and will continue to fight to do without such a line," Rhee added. "Our aim and determination to fight communism will never change."

On his arrival Friday, Marshall went off immediately for a tour of the Korean war front. He held conferences in Korea with high field officers. He told correspondents his visit was "purely military."

Back in Tokyo, Marshall spent many closely-guarded hours Saturday talking with Gen. Matthew B. Ridgway, supreme Allied commander.

Speculation persisted that some big war announcement was in the wind.

PIONEER BIG SPRING RANCH WOMAN DIES

BIG SPRING — Mrs. Mable Quinn, 76, pioneer ranch woman and one of the first graduates of Baylor College at Belton, died Saturday.

She taught music a year at Hardin-Simmons University before marrying the late J. T. Quinn, West Texas ranchman. A son, Navy Capt. John Quinn, survives. The funeral will be held Monday.

NEW PRESBYTERIAN PASTOR AT LUBBOCK

LUBBOCK — The Rev. Tom B. Anderson of Helena, Ark., has assumed the pastorate of Lubbock's First Presbyterian Church and will preach his first sermon here Sunday morning.

The new minister replaces Dr. Jack M. Lewis, pastor emeritus, who resigned his pastorate recently after more than 29 years of service.

TO UNDERGO SURGERY

R. V. Baker, 801 South Baird, has been admitted to Midland Memorial Hospital for a laceration above the right eye.

EMERGENCY PATIENT

Robert Bleuer, 402 West Gaden, received emergency treatment at Midland Memorial Hospital Friday night for a laceration above the right eye.

TO SAN ANTONIO

Mrs. and Mrs. James C. Watson will leave Sunday on a trip to San Antonio.

RESIDENTS FIND WEATHER ODOROUS

Everybody talks about the weather but not even the Midland police can do anything about it.

Residents along East Highway 80 complained to police Saturday afternoon that a peculiar odor had hovered over their neighborhood all afternoon.

Officers Jack Tranum and Harold Wallace investigated.

They reported it was only the odor of the city's dumping ground, carried to that neighborhood by a stiff south wind.

BOOT SHOP SOLD

The purchase by M. P. Friday of the E. J. Rasco Boot Shop at 122 East Kentucky Street was announced Saturday.

Friday, who has been associated with the shop the last 14 years, invites the continued patronage of the firm's customers.

OLD BAGS BURN ON TRUCK RIDE

A couple of old bags were really burned up Saturday morning.

They were part of a load of bags blazing on the back of a truck enroute through the city.

City firemen extinguished the blaze and reported the only damage was to the load of bags being hauled by an Odessa trucker.

SURGICAL PATIENT

Nestor Larz, 506 North Tyler Street, was admitted to Midland Memorial Hospital Friday for an appendectomy.

ADMITTED FOR SURGERY

Frank Albright of Andrews was admitted Saturday to Midland Memorial Hospital for surgery.

It's Time For Some STRAIGHT THINKING! WHAT ARE YOU WAITING FOR?

If you are planning to buy a home or make a real estate investment, are you delaying in the hope of a better selection and lower prices? Believe it or not, every indication is just the opposite for the better type desirable homes . . . a situation that will hold for many years, and perhaps forever. IT TAKES SKILLED LABOR—carpenters, masons, plumbers, electricians—to build a home. Do you look for lower wages in these trades? We don't!

Continued high taxes, high wages, and a shortage of mortgage money indicate a high level of construction cost for some time to come even though most material for the construction of ordinary houses is available at this time.

A nation of home owners is a nation of free people—Let us be free. Certainly the wage earner is getting more home for his money than he did 20 years ago and the satisfaction and pride of home ownership will remain long after the price is forgotten. Buy today.

Look For This Emblem!

Wherever you see the emblem of a REALTOR, you are assured of the services of a qualified, fully experienced real estate agent who complies with the code of ethics of the National Association of Real Estate Boards as well as that of the Midland Real Estate Board. When you want to buy or sell a home or other real estate, consult your Realtor!

Boss May Hire Secretary After Look At Beautiful Certificate

NEW YORK —(NEA) — Don't ever call a private secretary a stenographer, or vice versa. Any self-respecting private secretary would be horribly upset to be classed with the help. Secretarial work, say secretaries, is a highly-developed profession. There's a lot more to it than speed in typing and skill in lap-sitting.

That being so, the National Secretaries Association is going to make the difference official. They're going to certify secretaries. Any girl who has the necessary experience and passes a long test will become a Certified Professional Secretary.

Ever after, a certified gal will carry an impressive collection of initials behind her name. She'll be "Janette Skidmore, C.P.S." for example. The degree-type initials will serve two purposes—they'll show prospective employers she's good, and they'll help build up her ego, too.

By Association
"It'll be just like certified accountants," explains Marion Musante, the pretty president of NSA's New York chapter, "except accountants are certified by the state. With us, the Association will do the certifying."

The first exam will be given in August, she says. Any girl can apply, providing she is over 21 and meets the experience requirements. She must have four years of work if she is a high school graduate, seven if she didn't go to high school or three if she's a college graduate. The test itself will be a 12-hour affair, given in two days. It will be given in many cities across the country, although the exact dates and sites have not yet been established.

The 10,000 members of NSA, in 300 chapters, feel that the certification process will help separate the wheat from the stenographers. And a man seeking a secretary will know, after one glance at her big blue certificate, that she's experienced and capable. It'll save them time, the girls feel.

The exam is being prepared for the association by its Institute for Certifying Professional Secretaries, under the direction of Dr. Irene Place of the University of Michigan. It will embrace all fields of secretarial work, except how to keep a desk between boss and employee.

Marion Musante: "Women have a much better mind for details."

Among the subjects will be shorthand, grammar, typing, spelling, composition, secretarial accounting, office procedure, business law and business administration. The toughest thing to test, says Miss Musante, who is secretary to

the president of an advertising agency, will be "secretary-type personality." She says that will play a big part in the exam.

Highly Proficient
"Not every girl can be a good secretary," she says, "even though she is highly proficient in office work. It takes a certain type of personality to get along with people in an office."

With a twinkle in her eyes, she says that a good secretary has to be able to keep her boss on the right track.

"Men see the long range things," she says, "but women have a much better mind for details." Physical attractiveness won't count toward certification. The Association feels that an ugly girl can be just as efficient as a pretty one. Ha!

Chemicals Prove Effective Killers Of Johnson Grass

AMARILLO —(AP)— The Texas Agricultural Experiment Station here has proved chemicals can kill effectively that scourge of the farm—Johnson grass.

But three experiment stations—Texas A&M experts admit chemical eradication of the grass is too expensive at this stage of development to allow its use on entire fields.

But the chemicals do have important uses in places where you can't easily or efficiently reach the grass with plows or other mechanical means. And the researchers contend the chemical are cheaper than digging out the grass with hand tools.

The grass shouldn't be allowed to grow uncontrolled, the experts point out, for plants along fences and in roadside ditches can infect clean fields.

The report was prepared by R. D. Hamilton, assistant agronomist of the Amarillo Conservation Experiment Station; C. J. Whitfield, superintendent of the station, and H. E. Rea, associate professor of agronomy at Texas A&M College.

The experiments were conducted in roadside ditches about one mile north of Bushland, in Potter County.

100 Per Cent Kill
The researchers reported up to 100 per cent kill resulted from use of sodium trichloroacetate (TCA) and polyborochlorate (P-C).

Sixty to 90 per cent of the old Johnson grass plants treated with P-C in October, 1949, were dead the next June 15. Plots receiving these treatments did not become reinfected with seedlings until August, 1950.

Ninety-five to 100 per cent of the old plants were dead by August, 1950, on the plots treated with TCA the previous June. These plots later became reinfested.

Rainfall has considerable effect on the amount of kill and the length of time the ground remained sterile. Rainfall is needed to send the chemicals down to the plant roots, but rain also favors growing of seedlings.

Tests are continuing to determine best how to kill the seedlings. The two chemicals used in the tests overcome objections raised against other chemicals used by farmers for some time.

TEXANS IN WASHINGTON—

Soak The Rich Schemes Are Impractical, Says Poage

By TEX EASLEY

WASHINGTON—(AP)—Schemes to tax only the rich and reduce prices may sound wonderful, says Rep. W. R. (Bob) Poage of Waco, but they just don't hold water.

The congressman gave his views in answering some 50 constituents who sent him a petition protesting soaring living costs and asking "that prices be rolled back to pre-Korea levels."

The petition, one of many said to be in circulation throughout Texas for submission to congressmen, says: "We also urge that new taxes not

Educator Criticizes Tests For Deferment

Dr. J. A. Hill, president emeritus of West Texas State College in Canyon, strongly disagrees with the Selective Service system of deferring students from the draft on the basis of intelligence tests.

Expressing his views in an article placed in the Congressional Record by Rep. Walter Rogers of Pampa, Dr. Hill said the examination procedure will overlook "an emotional quotient, an EQ that is equally important."

"When the government tells a boy, after some kind of examination or test, that he has been selected to go to Korea instead of college, what will be the effect upon his personality?" asks the veteran educator.

"Here is a youth, 18, 19 or 20 years of age—still in the formative stage of life—not having yet come to himself—perhaps lacking an earlier opportunity—still wrestling for the controls of his physical appetites—but having vast resources, unknown even to himself and undiscoverable through any known instrumentality (and there are millions of such)—to him Uncle Sam steps up, applies a very fallible measuring stick, decides he is just medium or less in intelligence tattoos him accordingly, and sends him off to be shot at."

"What will be that boy's mental and moral reaction to such treatment? Either he will accept the government's evaluation of himself, or he will resent it with all the animus of his soul."

be placed on low income families, and suggest that needed revenue be secured from corporations with their record profits and from high income families who are not carrying their share."

Poage replied: "The tendency of the hour is to feel that we can cure any problem by passing a law." In his opinion, he added, the time has come to get at the fundamental cause of inflation—lots of money in circulation and not enough things to buy with it.

He said he favored across-the-board freezes on prices and wages at the outbreak of the Korean war. Since that wasn't done, another approach must be tried.

Most Effective Attack
"The simplest and most effective attack on inflation would, it seems to me, be for everyone to work longer at present hourly rates," he continued.

"If we increased the work week by only four hours we would increase production by 10 per cent. The workers would have more money, but there would be more things to purchase."

As to the age-old idea of soaking the "have-gots," Poage said: "It is a mistake to believe that we can raise the funds needed simply by additional taxes on corporations or the rich." The total corporate income in the U. S. is only about 20 billion dollars per year—less than one-third our governmental expenditures. We now take approximately one-half of this income.

He then noted that personal income taxes already are high, up to 87 to 90 per cent of an income above \$80,000 yearly. Those who make such incomes account for only a relatively small percentage of the total national income, he observed, and added:

"There is no easy way to carry the tax load. We all must share it."

El Paso Jurist Fast On Uptake

Federal Judge Ewing Thomason of El Paso and Mrs. Thomason have been honor guests at a number of receptions here during the last week on their first visit to Washington since he went on the bench about four years ago.

One of the most popular men to serve in Congress from Texas, Thomason showed he still can give with a quick answer when the occasion demands.

Newsmen who had covered the House Military Affairs Committee when Thomason was the No. 2 man and the chairman was Kentucky's Andrew J. May noted in jest that the two top men left Congress about the same time to go to work for the government. (May went to the penitentiary in a war contract fraud case.)

"Yep," smilingly answered the jurist, "but we work in different kinds of buildings."

DADDY RINGTAIL

Daddy Ringtail And Wings Of The Wind

The Huffen Puffen, the friendly wolf, is a very important fellow. The Huffen will tell you himself how important he is. "I am a very important fellow, I am," the Huffen says.

Everyone there in the Great Forest now knows that the Huffen is a very important fellow indeed. But there was once a time when people didn't know.

It all began on a far-away day of the long ago, when the Huffen was the only one who thought the Huffen was important. The Huffen went around saying to everyone: "I am a very important fellow, I am."

I am." But no one paid the least attention. No one thought he was really important. The Huffen was quite unhappy about it. He talked to Daddy Ringtail.

"Huffen," said Daddy Ringtail, "for people to think how important you are, the news will have to be carried on the wings of the wind."

"Hur!" asked the Huffen. Daddy Ringtail said again that the news of the Huffen's importance would have to be carried on the wings of the wind. Yes, and the Huffen would have to stop telling people. The Huffen must do exactly what Daddy Ringtail said, and so the Huffen did it.

The Huffen dug a hole in the ground not far from the river. He whispered in the hole how import-

ant he was. He covered the hole with dirt, and river reeds grew on the spot, and the wind blew through

the reeds with a noise of "Sshh! Sshh!"

"Why does the wind say 'ssh! sshh!'?" everyone asked, and someone whispered the answer. The wind was saying "ssh! sshh!" for no one to tell the secret of how important the Huffen was, and so everyone whispered the secret of how important the Huffen was indeed.

The Huffen smiled to hear the whispers, but the Huffen said not a word. He smiled and looked as though he knew a secret — which he did — because the secret was the hole in the ground where he had whispered the words of his own importance.

To this very day, the wind forever whispers "ssh! sshh!" and

people know now, they do, that the Huffen is very important indeed. Happy day! (Copyright 1961, General Features Corp.)

'GULAG' SPELLS SOVIET SLAVERY FOR 14,000,000—The Soviet Union, comprising one-sixth of the world's land surface, actually is one vast slave labor camp so far as its 14,000,000 forced laborers are concerned. This newspaper, based on a documented map prepared by Isaac Don Levine for the Free Trade Union Committee of the American Federation of Labor, shows the location of most of the known slave labor areas administered by the "GULAG"—the Soviet slave labor trust. Hammer and sickle symbols represent individual concentration camps. Dot-shaded portions represent sprawling areas served by prisoners of the GULAG, who are a vital element in almost every essential industry. Excessive crowding of the map prevents spotting every slave labor camp verified by the Free Trade Union Committee.

+ McCamey News +

MCCAMEY — Mr. and Mrs. H. H. Qualls left Friday on their vacation. They plan to attend the golf tournament in Kermit and will visit in El Paso and Oklahoma City.

Mr. and Mrs. Ott Haley are vacationing this week in Olney. Haley's sister's home was destroyed during the tornado in Olney two weeks ago.

Mr. and Mrs. Ross Smith and daughter, Donna, plan to leave Saturday for a vacation in Denver, Colo., and other points.

Mr. and Mrs. Tom Lynch returned last week from a visit with their daughter, Mrs. Johnnie Allison in Houston.

Mr. and Mrs. John Kellerman plan to leave this week end for a vacation in Colorado.

Mr. and Mrs. Newton Key are vacationing in Colorado.

Mrs. W. E. Pulley is visiting in Midland in the home of her daughter and son-in-law, Mr. and Mrs. Bob Kellerman.

Mr. and Mrs. Jack Tilson and children, Nickie and Mike, of California, are visiting Tilson's parents, Mr. and Mrs. Bob Barger.

Newspaper Representative

Mr. and Mrs. Guy Williams and Mr. and Mrs. Sleepy Leach, plan to attend the golf tournament in Kermit this weekend.

Mr. and Mrs. Terry Roach are on an extended vacation in Houston and Corpus Christi. They attended Rice Institution graduation exercises last week when their son, Richard, was graduated. Richard Roach will be employed by the Houston Chronicle during the summer.

Lewis Sizemore has been appointed as representative of the Midland Reporter-Telegram in McCamey.

Colby Belcher, Leslie Fambrough and Ben H. Porter of McCamey received the degree of Associate in Arts from Southwest Texas Junior College in Uvalde on May 31, according to Dr. H. S. Von Roeder, president.

Jimmy Paul Moore of Hearne, son of Paul Moore, is here visiting his father and other relatives.

Mrs. J. L. Roberson and daughter, Barbara Allen, and Mrs. Cora Moore, left last week for a trip that will take them to the Grand Canyon, the Petrified Forest and other scenic points in Arizona and New Mexico. They plan to be gone a week.

Charles Robert Rubie and Graves L. Shafer, Jr., of McCamey were among those receiving degrees in Business Administration from Texas A&M College.

Mr. and Mrs. Bill McKinney of Dallas are visiting in the home of Mr. and Mrs. Ernest McKinney this week.

O. B. Robbins and family left this week for Tatum, N. M., where he has been transferred by the TP Coal and Oil Co. They have lived in McCamey for the last several years, and their son was a graduate of McCamey High School this year.

Mr. and Mrs. Tom Nevinger and daughter returned on Monday night from a two-week visit in St. Louis and Illinois with relatives.

Mrs. Martha Foster and Mrs. Hattie Ramsey have gone to El Paso as delegates for the local B&PW club to the 31st annual State Convention.

Mr. and Mrs. J. M. Purser and family of Kermit, former residents of McCamey, have returned to make their home. Purser will be employed by Noble Drilling Co.

Mr. and Mrs. Lawrence English and children left Wednesday for a 10-day vacation in Amarillo and other points.

Mrs. Horace Slaughter and children, Carolyn, Annette and Janis, accompanied by Mr. and Mrs. M. L. Sullivan, of Odessa, have returned from a two-week trip to California. They visited in Los Angeles, San Francisco and the Sequoia National and Yosemite parks.

Mr. and Mrs. Bill Winters and son, Roy Vaughan, have moved their house from Rio Pecos Camp to Benedum near Rankin where he is employed by the Humble.

Mr. and Mrs. J. E. McAnally and family visited in Pecos Memorial Day with his mother, Mrs. E. E. McAnally.

J. V. Davis, a junior at Tulane University, is at home for Summer vacation. He is playing ball with the McCamey Merchants and working for Continental Oil in Texon.

Summer Recreation Started

Mr. and Mrs. E. D. Williams of Midland visited in the home of Mr. and Mrs. G. N. Joyce over the weekend.

Mr. and Mrs. C. O. Holt of the Rio Pecos Camp left Tuesday for Abilene on a vacation trip.

Mr. and Mrs. W. O. Clary, Jr., of San Angelo, are visiting in the Rio Pecos Camp with his parents, Mrs. Clary is a 1951 graduate of San Angelo High School.

Babe Joyce, a student at NTSC, is at home for the Summer vacation. She is a junior, majoring in physical education.

The McCamey Summer Recreation program began this week, with surprisingly light registration, according to director Charles Morris.

DROP ON THE "ROK"—He's carrying a white flag and wearing the uniform of a South Korean soldier, but Sgt. Lonnie Kiefer of Sparta, Ill., keeps his carbine poised as he questions the soldier before sending him to the rear. Allied troops follow a policy of "strictly no trust" of unidentified soldiers, because of the Reds' favorite infiltration trick of masquerading as friendly troops. (NEA-Acme photo by Staff Photographer Jim Healy.)

Iron Curtain Just Too Close To Town

PASSAU, GERMANY—This ancient Danube city is suffering from a lack of tourist traffic.

Passau, biggest German city on the Eastern border, has a population of 35,000, nearly one-eighth of whom are unemployed. In addition there are 8,000 refugees in camps.

For centuries visitors have provided virtually all Passau's outside income. It is a city which never has had a major industry. It prided itself on being a cultural center and a bishopric. It pointed out its seminaries to the thousands who used to visit the city and the great cathedral, begun in the bustling days of Rome's northern conquests but border regulations have stifled those tourists coming from Austria, most West Germans have neither the time nor the money to travel as they did in the old days, and the Iron Curtain is close by.

"People don't want to come so far east," one councilman says. "Until they do Passau must just wait in the sun."

Away Too Much Why Is Wasted

COLUMBUS, OHIO—Food is being made from whey, a by-product of cheese making, reports Perry R. Ellsworth, extension specialist in dairy technology at Ohio State University. Ellsworth states that the United States Department of Agriculture dairy scientists have made an "exceptionally good, smooth spread from whey protein."

USDA dairymen expect the new product to provide an outlet for some of the billions of pounds of whey produced every year in this country. Some whey is used for livestock feed. Some is concentrated and dried for use in human foods such as process cheese and whey candy. Much is wasted in spite of the fact that whey contains highly valuable proteins, minerals and vitamins.

Rouge Gives Glass Final Polish Touch

TOLEDO—Operating in the red is one way of staying in the clear. At least that's true in the glass industry where clearness, smooth finish and transparency mean so much.

To attain a clear finish men on the grinding and polishing lines of Libbey-Owens-Ford Glass Company, rub on about \$30,000 worth of rouge annually to put the final polished surface on the glass.

Glass technicians explain that the rouge is not used primarily for its color as it is in cosmetics, but as a very mild abrasive in the final finishing process of plate glass manufacture.

AIR CONDITIONING with GAS

- ★ One Compact Unit Heats and Cools
- ★ Flick a Switch to Cool or Heat

Nothing disturbs sound sleep more than changeable weather. Especially in summer, when it's hot and humid outside, it takes hours for the house to cool off so you can sleep comfortably. What a difference when your home is Servel "All-Year" Air Conditioned. You enjoy a full night's sleep every night in the year.

One compact unit does it all. Provides "mountain resort" air in summer... draft-free warmth all winter. Circulates clean, dust-free, pollen-free air that is never too dry... never too humid... but always as you like it.

Just flick a switch. That's all you do. Year 'round control of the climate in your home is at your fingertips.

STARLING TURNS STOOL PIGEON—That little bird that tells the newspapers things about people is finally caught in the act. It turned out to be a friendly starling that flew right up to the window of the Allentown (Pa.) Evening Chronicle to give reporter Tony Matilawic a full-feathered interview.

Average Home Is Down To Minimum Size, Designer Says

If the average American home gets any smaller, the doorknob will be in bed with the residents.

So says Alfred S. Levitt, designer of the 15,000 homes built by his firm, Levitt and Sons, Inc. in the four-year-old community of Levittown, Long Island.

"The average low cost American home basically is down to its smallest possible size," Levitt said. "With builders caught between the pincers of increasing labor and material costs, they must make every inch of space do its share of 'work' for the home owner."

The man who has designed more

American Bathroom Is Symbol Of High Living Standard

One of the promising symbols of this country's high standard of living is the American bathroom. But even the most gleaming bathroom can be a bottleneck if not planned for utility and comfort.

There is more to a new bathroom now than just the tub, toilet and lavatory. Modern homemakers design the bathroom so it has color, adequate storage, adaptability for family and guests, and comfort. All these factors are made possible through new planning concepts and new equipment.

If you are building a new home, or remodeling an old one, here are some suggestions taken from a Title Council of America report on bathroom construction and design, to bear in mind when you begin.

Planning: If the room must serve parents and children, plan it for multiple use. Placing fixtures in separate compartments can speed up bathroom traffic.

Wide Color Choices: Wall and floor surfacing: Make sure you install waterproof, colorful materials such as clay tile which can be cleaned with a damp cloth, easy to maintain, and in wide color choice.

Storage: Plan bathroom with ample and accurately proportioned space for towels, bathroom supplies, medicines, cosmetics. If possible, place a floor-to-ceiling cabinet along one side of room to be used for linens, blankets and other household supplies.

Fixtures: Manufacturers make it possible to install new countertop lavatories, space-saving tubs and shower cabinets. If colored fixtures are chosen for the bath, plan to have them blend with the tilework rather than seek an exact match.

Lighting: Get generous daylight through wide windows. Install both indirect ceiling lighting for nighttime and direct spot lighting for lavatory and dressing table.

Ventilation: To prevent room steaming up and to keep air fresh in your bathroom, install a ventilating fan in wall or ceiling. Windows are needed, too, for mild-weather use.

homes than any man in America—all of the 20,000 built by his firm during the last 20 years—declared home designers must use the utmost ingenuity in order to prevent future homes from becoming too small for comfortable living.

"Intelligently designed built-ins are the answer because they make the small house larger," he said. "Wasting usable house space is as senseless as concentrating everything in the Empire State Building on five floors and leaving the other 97 vacant."

"In this age, the living room has become even more congested with perhaps 85 per cent of the family's activity taking place there. Builders should take some of the load off the living room by building better, more usable storage closets in the bedrooms. Then we can replace dressers and chests of drawers with chairs and a table, or desk, where Mama and Papa can read and work—and the children can do their homework."

The noted home designer said closets offered one of the best ways of increasing living space in a house.

"The old-fashioned closet with its door wastes a lot of space," he added. "Our Levittown closets, on the other hand, are really alcoves in the bedrooms with light, bass-wood doors which slide open the way for easy access to the whole closet. Built-in shelves and hangers offer convenient storage for every day articles while higher shelves can be used for out-of-season garments and such things as suitcases and hatboxes. The closets also are deep enough for a chest of drawers."

"Nooks and corners in a hall or bathroom are another good place for practical and esthetic built-ins. In our hall, for example, we build in a three-tier chest of drawers in one corner. Three feet above the chest—we leave space for the housewife to decorate the top of the chest—four shelves with sliding doors are built into the hall recess. The result is ample storage space for the average-size family's linen."

The kitchen is another place where proper use of built-in equipment can achieve the maximum of efficiency with a small space, he said.

"Built-in wooden cupboards around three sides of the kitchen furnish attractive storage space while a chest for linens and shelves about it separate the kitchen from the dining room."

Back Yard Living Keeps Family Cool During Warm Days

With the first Spring breezes the urge to move outdoors takes hold of most families. The hot dog or hamburger, and the family looks forward to spending many happy and cool days out in the yard.

A porch or a terrace out in the yard can be a family retreat beginning in Spring and lasting until early Fall. But, until the porch or terrace is "summerized" by good planning, outdoor living is just something to read about in magazines. Here are some ideas from the Title Council of America on how outdoor living can be a reality and not just wishful thinking.

A small, walled terrace connecting with the home has secluded charm even in a crowded suburban area, and creates a setting for outdoor living. A durable floor surface material such as quarry tile is easy to maintain since a quick hosing down is all that's required to keep it clean and it will last a century of Summers. A barbecue stand with clay tile work counters in a corner of the terrace and ice-cream-parlor chairs pulled up to a wrought-iron table make a luring background in Summer for three meals a day.

Integral Part Of Home Ideally suited to warm Summer climates, the patio-porch combination has become an integral part of many homes. It incorporates privacy and comfort necessary to gracious living. Porch furniture can be moved to patio for a place in the sun and an adjustable umbrella table makes it possible to dine in shade at any time of day.

If there is a breezeway between home and garage, consider its possibilities for outdoor dining around a simple plank table surfaced with clay tile. The family can enjoy dinner in cool shade. The kitchen is only a few steps from dining table, and the table top can be cleaned in a jiffy with a damp cloth. Stack unpainted storage units along wall for handy flower arranging, holding vases and tools.

Although nominally part of China, Sinkiang province has long had the status of a virtually independent country.

Modernize Bathroom With Plastic Tile

Modern plastic tiles are set individually, as above. They come in brilliant colors. Enameled wall-covering is similar to linoleum and can be applied in large sections as shown at right.

By MR. FIX
Distributed by NEA Service

Lots of people are perfectly happy living in old houses until they start peering into brand-new ones, and then they get the natural urge to bring things in the old home—stead up to date.

The bathrooms seems to be the place where the comparison is most noticeable. While we haven't seen a bathtub ancient enough to be standing on legs in a long time now, there are plenty of bathrooms that would look young again in an awful hurry if the walls were tiled.

These days it isn't necessary to use heavy ceramic tile to get the effect you're after. There is tile made of aluminum and plastic, there's heavy, enameled wall covering in patterns that simulate tile, and there's a tempered hardboard covered with a tough plastic finish in a variety of patterns. Any of these can be installed by the Mr. Fix in your family if you give him proper

encouragement.

Least expensive is the enameled wall covering. This has a felt base, is something like linoleum, and is installed about the same way except that it goes on the wall instead of the floor. It usually comes in widths to equal wainscoting height (54 inches) and with it you'll need base molding and cap strip of the same material, as well as inside and outside metal corner strips.

The aluminum and plastic tiles come in individual pieces, about 5x5 inches or less, and are some what easier to install than the wall covering, which has to be cut out in wall-size pieces.

The individual tiles are easy to cut, and each type comes in half-sizes and strips to fit into odd corners. There are special moldings and cap strips, too, and the whole job goes on with a special cement.

Installed In Sections
Like the wall covering, the plastic-finished tempered hardboard is installed in large sections, and is a bit tougher to handle. You've got to make sure everything's pasted down tight so there won't be any buckles.

That gives the individual tiled while in office.

Since each manufacturer has his own special installation hints for the product he puts out, be sure to get a full set of directions from your supplier before you start out on the job.

Any of these would be fine for converting a large unused closet—or maybe a small unused room—into a downstairs powder room. Before you get into this project, though, better get a plumber to put in the fixtures.

Vice President Alben W. Barkley is the first vice president to be married while in office.

King Cotton Still Top Money Producer

DALLAS —P—What agricultural commodity brings in the most money to the Southwest?

It's still King Cotton, the Federal Reserve Bank of Dallas reports.

The principal sources of the Southwest farmer's dollar in the years 1947-1949 covered by the bank report were: Cotton 28 cents, cattle 23, wheat 11, dairy products seven, chickens and eggs five, hogs four, rice and grain sorghums three each, wool and peanuts between 1 and 2, and turkeys, corn and hay less than one cent.

SMOKING IS BURNING ISSUE

TEL AVIV—Austerity smoking in Israel means not only that it is difficult to get any genuine American or British brands—even if you are willing to pay the high import duties. It may soon also mean that you won't get a pack of cigarettes if you don't hand your old carton back.

The thing is still being tried out in some parts of Tel Aviv to economize paper and cardboard.

Although American railroads now make use of some 200,000 miles of telegraph and telephone lines, radio is rapidly coming into use, particularly to communicate with moving trains.

SUNNYSIDE UP ON FRONT LINES

TOKYO — A company of U. S. Fifth Cavalry soldiers recently got fresh fried eggs while in their foxholes atop a 1,200-foot hill.

"Nothing has helped morale more—short of rotation," said Pfc. Willis J. Marcantell, Lake Charles, La. He's a cook. The credit went to Lt. John Higgs, commanding officer of the group.

He consulted a mess steward, arranged for a field stove, the eggs and two cooks. Usually such food is prepared in the unit kitchen at a battalion rear position, then brought up.

RABBITS FULFILL TRADITION

OSHKOSH, NEB.—It's true what they say about rabbits.

A white New Zealand doe here produced 36 bunnies in four months. One litter had eight baby rabbits, the next 11, and the third 17.

One In Five Texas Homes Lag Behind Living Standards

AUSTIN—More than 402,000 homes in Texas, or one out of every five, are lagging far behind modern standards of living and comfort. The postwar building boom has obscured the fact that 789,155 homes in the state were built before 1920, causing this serious obsolescence, it was revealed in a report on the state of the American home, just completed by the Minneapolis-Honeywell Regulator Company.

An indication of the rapidly increasing obsolescence of Texas homes were obtained by studying the three most functional areas of the house. These include the heating system, the kitchen and the bathroom.

Two out of every three homes in the state are using inadequate or old-fashioned heating equipment, only two out of five have remodeled kitchens, while 1,316,571 homes, or one out of two do not have private bath facilities, the report disclosed.

The study stressed that this obsolescence may aggravate this year's toll of home accidents. Last year accidents in the home accounted for 27,500 killed and 4,100,000 injured. Falls, burns, explosions and fires, common to over-age homes in need of modernization, were the most frequent types of accidents.

However, the report pointed to several factors as influencing state-wide home improvement programs this year. First, most of the older homes are free of mortgages, making it easier for homeowners to obtain improvement loans. Second, latest Federal Reserve Board figures indicate that owners of these homes have the greatest accumulation of savings of any group.

In recent years, American homeowners have demonstrated forcefully their desire to bring their older homes up-to-date. National expenditures for remodeling and alterations have averaged almost a billion dollars annually the last four years.

SURPRISE SWITCH
MONTREAL — Newspaper men here were served apple cider at a press conference held by the Quebec Corporation of Agronomists preparing for its annual convention in July. Increased milk consumption is the theme of the convention. The conference was held at the farm of Nolasque April, veteran cider maker.

HOMES DOWN UNDER GO UP
SYDNEY — Brick houses built shortly before World War II are now selling at four times their initial cost.

That is an indication of the housing shortage in Australia today. Some houses that cost \$2,664 to \$3,330 to build in 1936-39 are now selling for \$11,000 to \$13,320.

It is believed that the moths, which are responsible for the ruin of many American clothes are not native to the United States but were imported from Europe.

Newlyweds Make New Home From Old

BY GAILE DUGAS
NEA Staff Writer
NEW YORK — For the average young couple, getting married means starting from scratch. It means finding an apartment, buying furniture, rugs and drapes. It often means, in these days of high living costs, making an unsatisfactory apartment into a charming and gracious home. And all on a limited budget.

The problems of one young couple who married this spring are typical of the problems of many. Ronnie Halckenhauer and Bob Wacker found their two-room apartment on the second floor of an old brownstone house in New York's Greenwich Village.

Ronnie is a business woman, Bob is a newspaperman. Only after they had signed a two-year lease did they realize exactly what it meant to start from scratch.

On a rainy evening in early spring, they surveyed what was to be their new home. And they felt dismayed. The living room, 13 1/2 by 15 1/2 feet, was painted a dark, dank green. The doors and woodwork had been painted white by a former tenant and the paneling of the doors marked out by strips of white adhesive tape.

A once-beautiful parquet floor was coated with years of grime and dirt, dirt that had been ground in. The brick of the fireplace was almost black and the white marble mantelpiece had turned gray.

They were not encouraged when they looked into the small room off the living room. The walls and ceiling had been painted the ugly shade known as tenement tan. A narrow strip of mirror had been fastened to the closet door; the interior of the closet itself was an ugly pink.

To the left of the closet, on the same wall, was a recessed doorway that had been blocked up. It led, formerly, to the foyer. To top everything, this room, to which they wanted to use as a study, was only 8 by 9 feet. Somehow, it must be made to look larger.

The kitchen was microscopic, L-shaped and littered with small metal cabinets placed at the wrong heights. It was painted a dingy, hard yellow. Directly off the kitchen was the bath, partly white tile, partly paint in the same shade of yellow.

Ronnie and Bob got pencil and paper and sat down on the window sills in their dark, unfurnished living room to figure just what had to be done and how much it was going to cost.

The rooms must have paint, they decided. The dark green, the tan, and the yellow were impossible. The floors had to be sanded and scraped. The picture molding near the ceilings in both living room and study had to come down in order to make both rooms seem larger.

Ronnie, they said, would have to make drapes for both rooms and a studio couch cover in addition. Bob would do the painting and would remove the molding, scrape and sand the floors and turn the recessed doorway in the study into a bookcase and cabinet.

They were really starting from scratch. They would have to serve with fresh paint, a new color scheme and the removal of some of the clutter caused by the numerous metal cabinets.

They were really starting from scratch.

This is one view of two-room apartment, before and after redecoration. Windows (left) front on street, are deeply set. Radiator grill is broken, was replaced by modern screen. Parquet floor is coated by years of grime. Windows get (right) multiple width of coral drapery fabric, designed by Goodall. Closed, drapes create dramatic wall in contrast to brown-and-yellow scheme of room. Open, they disclose pale yellow venetian blinds. Floor looks new after sanding and scraping. Table and cocktail table are light, sturdy plywood; rug is beige cotton.

shaped and littered with small metal cabinets placed at the wrong heights. It was painted a dingy, hard yellow. Directly off the kitchen was the bath, partly white tile, partly paint in the same shade of yellow.

Steps Suggested For Making House Cooler In Summer

Summer is only as hot as you make it.

Maybe you can't control the hot spells outdoors, but you can do a lot now to lessen their intensity in the home when they do come. Many a family goes through the Summer relaxed and cool as a cucumber just because a wise homemaker learned the tricks of making a home seem cool, and put them into practice, points out a Tile Council of America report.

To make your own home cooler in hot weather, first of all remove the clutter. Put away heavy ornaments and bric-a-brac, store extra pillows for sofas and chairs, clean out the magazine rack and in general strip the house down to the minimum necessary for comfortable living.

Bare floors look cool, so roll up your rugs and put them away for the Summer. Small cotton throw rugs or straw or rush mats will dress up the living room as much as necessary.

Fix up a corner of the backyard for outdoor living. A small patio finished with clay tile will dry off quickly after rains and will be ideal for picnic suppers and evening gatherings. A frostproof tile won't be damaged by Winter weather.

Store Draperies
Store your draperies to make the house cooler, and either use only blinds during the Summer or put up light-weight materials in cool shades. Slip-covers in cool colors will make upholstered furniture seem light and airy. Disguise the fireplace for Summer, so it won't remind you of its warmth. A good idea is to bank the fireplace opening with a few pots of growing plants.

If the family ordinarily eats in the kitchen, fix up your porch as an outdoor dining room. A floor of quarry tile will give it color, and the tile can be cleaned with a simple hosing-down. With a paint job and simple furniture, the porch can be an ideal meal spot, away from kitchen heat.

Finally, use glassware as much as possible for meals. It looks cool and in turn will make your family and guests feel cool.

LARGEST FISH

The largest fish ever captured was a spotted whale-shark, 38 feet long and weighing 26,594 pounds, harpooned off the Coast of Florida by Captain Charles Thompson in 1912.

ROCK 'BATHTUBS'

Excavations near Mexico, D. F., brought to light well-preserved remnants of the bathing places of the ancient Aztec aristocracy. The "tubs" were carved from solid rock.

State Librarian Post To Be Filled

AUSTIN —(P)— The State Librarian and Historical Commission announces it is ready to receive applications for the position of State Librarian, which has been vacant since September 1950.

The commission hopes the place can be filled without going outside of Texas. It invites qualified Texas Librarians, of either sex, to file their applications. Applicants should acquaint themselves with the statutory qualifications for the position. The deadline for applications is July 15.

Applications should be addressed to John Gould, P. O. Box 82, Wichita Falls. Gould is vice chairman of the commission.

Insurance Firm Cuts Rates For Women

DALLAS —(P)— The United Bankers Life Insurance Company has announced substantial reductions in the cost of its life insurance for women — because women live longer than men.

Women live five to six years longer than men. For years insurance companies have recognized this fact by charging them more for annuities than for men of the same age.

United Bankers Life, of which Don J. Willmon is president, claims it is the first to reduce life insurance costs to women because of their greater longevity.
