

## Do You Think There is No Competition?

If anyone thinks there is no competition amongst the big packers he ought to go through a day's work with Swift & Company.

Let him begin at the pens when the live stock comes in; let him try to buy a nice bunch of fat steers quietly and at his own price without somebody's bidding against him.

Let him realize the scrupulous care taken at the plant that not one thing is lost or wasted in order that costs may be held to a minimum.

Let him go up into the office where market reports are coming in, -and reports of what other concerns are doing.

Let him watch the director of the Swift Refrigerator fleet, maneuvering it over the face of the country like a fleet of battleships at sea.

Let him take a trip with a Swift & Company salesman and try to sell a few orders of meat.

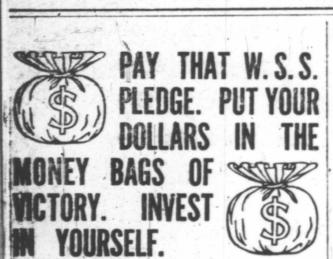

Let him stay at a branch house for an hour or two and see the retail meat dealers drive their bargains to the last penny as they shop around among the packers' branch houses, the wholesale dealers, and the local packing plants.

And then, when the day is over, let him have half an hour in the accounting department, where he can see for himself on what small profits the business is done. (Less than 4 cents on each dollar

If he still thinks there is no competition in the meat business it will be because he wants to think so.

Swift & Company, U. S. A.

G. O. DAVIS DIES OF PNEU.

MONIA AT CARLSBAD

At Carlsbad Springs Hotel, this morning, at 8:30, G. O. Davis expired of pneumonia. Deceased was a rancher, living between here and Toyah on the old Figure 4 Cottonwood ranch. He was taken sick last week in Oklahoma and started to his home, getting this far last Monday, when he was forced to stop over. His condition became so alarming that his wife and children were sent for, arriving yesterday morning at three o'clock, via auto, from their ranch.

Mr. Davis was 31 years old, a man of fine physique and apparently had many years before him. He was a member of the W. O. W. and Odd Fellow lodges, and the members of these organizations did all in their power to assist the bereaved relatives. The mother and two brothers arrived about an hour after his death coming from Pecos overland in a car.

The body is at the mortuary and will be shipped to the old home at Frisco, Texas, for interment, leaving tomorrow on the southbound for that point.

Our people, always sympathetic, toward those in sorrow, feel deeply for the bereft mother, wife, children and brothers, and would fain be of assistance, if possible, in this time of bereavement.—Carlsbad, (N. M.) Current, October 11th.

/U. S. Public Health Service Issues Official Health Bulletin on Influenza.

LATEST WORD ON SUBJECT.

Epidemic Probably Not Spanish in Origin-Germ Still Unknown-People Should Guard Against "Droplet Infection"-Surgeon General Blue Makes Authoritative Statement.

Washington, D. C .- (Special.) - Al though King Alphonso of Spain was one of the victims of the influenza epidemic in 1893 and again this summer, Spanish authorities repudiate any claim to influenza as a "Spanish" disease. If the people of this country do. not take care the epidemic will become so widespread throughout the United States that soon we shall hear the disease called "American" influ-

In response to a request for definite information concerning Spanish influenza; Surgeon General Rupert Blue of the U. S. Public Health Service has authorized the following official inter-

What is Spanish Influenza? Is it something new? Does it come from Spain?

"The disease now occurring in this country and called 'Spanish Influenza' resembles a very contagious kind of 'cold' accompanied by fever, pains

#### Coughs and Sneezes Spread Diseases

As Dangerous as Poison Gas Shells in the head, eyes, ears, back or other parts of the body and a feeling of severe sickness. In most of the cases the

symptoms disappear after three or four days, the patient then rapidly recovering. Some of the patients, however. develop pneumonia, or inflammation of the ear, or meningitis, and many of these complicated cases die. Whether this so-called 'Spanish' influenza is identical with the epidemics of influen-

za of earlier years is not yet known. "Epidemics of influenza have visited this country since 1647. It is interesting to know that this first epidemic was brought here from Valencia, Spain. Since that time there have been numerous epidemics of the disease. In 1889 and 1890 an epidemic of influenza, starting somewhere in the Orient, spread first to Russia and thence over practically the entire civflized world. Three years later there was another flare-up of the disease. Both times the epidemic spread widely over the United States.

"Although the present epidemic is called 'Spanish influenza,' there is no reason to believe that it originated in Spain. Some writers who have studied the question believe that the epidemic came from the Orient and they call attention the fact that the Germans mention the disease as occurring along the eastern front in the summer and fall of 1917."

How can "Spanish influenza" be recognized?

"There is as yet no certain way in which a single case of 'Spanish influenza' can be recognized. On the other hand, recognition is easy where there is a group of cases. In contrast to the outbreaks of ordinary coughs and colds, which usually occur in the cold months, epidemics of influenza may occur at any season of the year. Thus the present epidemic raged most intensely in Europe in May, June and July. Moreover, in the case of ordipary colds, the general symptoms (fever, pain, depression) are by no means as severe or as sudden in their onset as they are in influenza. Finally, ordinary colds do not spread through the community so rapidly or so extensively as does influenza.

"In most cases a person taken sick with influenza feels sick rather suddenly. He feels weak, has pains in the eyes, ears, head or back, and may be sore all over. Many patients feel dizzy, some vomit. Most of the patients complain of feeling chilly, and with this comes a fever in which the temperature rises to 100 to 104/ In most cases the pulse remains relative-

"In appearance one is struck by the fact that the patient looks/sick. His eyes and the inner side of his eyelids may be slightly 'bloodshot,' or 'congested,' as the doctors say. There may be running from the nose, or there may be some cough. These signs of a cold may not be marked; nevertheless the patient looks and feels very

"In addition to the appearance and the symptoms as already described, examination of the patient's blood may

ish influenza,' for it has been found

that in this disease the number of white corpuscles shows little or no increase above the normal. It is possible that the laboratory investigations now being made through the National Research Council and the United States Hygienic Laboratory will furnish a more certain way in which individual cases of this disease can be' recognized."

What is the course of the disease? Do people die of it?

"Ordinarily, the fever lasts from three to four days and the patient recovers. But while the proportion of If you own vacant grazing land and No. 54, twsp. 7, 276 acres. \$1.50 to deaths in the present epidemic has generally been low, in some places the outbreak has been severe and deaths have been numerous. When death occurs it is usually the result of a com-

What causes the disease and how is

"Bacteriologists who have studied influenza epidemics in the past have found in many of the cases a very small rod-shaped germ called, after its discoverer, Pfeiffer's bacillus. In othercases of apparently the same kind of disease there were found pneumococci, the germs of lobar pneumonia. Still others have been caused by streptococci, and by others germs with long

"No matter what particular kind of germ causes the epidemic, it is now believed that influenza, is always spread from person to person, the germs being carried with the air along with the very small droplets of mucus, expelled by coughing or sneczing, forceful talking, and the like by one who already has the germs of the disease. They may also be carried about in the air in the form of dust coming from dried mucus, from coughing and sneezing, or from careless people who spit on the floor and on the sidewalk. As in most other catching diseases, a the disease himself may give a very serve you. severe attack to others."

What should be done by those who catch the disease?

"It is very important that every person who becomes sick with influenza This will help keep away dangerous complications and will, at the same time, keep the patient from scattering the disease far and wide. It is highly sleep in the same room with the patient. In fact, no one but the nurse should be allowed in the room. "If there is cough and sputum or

running of the eyes and nose, care should be taken that all such discharges are collected on bits of gauze or rag or paper nappins, and burned. If the patient complains of fever and headache, he should be given water to drink, a cold compress to the forehead. and a light sponge. Only such medicine should be given as is prescribed by the doctor. It is foolish to ask the druggist to prescribe and may be dangerous to take the so-called 'safe, sure and barmless' remedies advertised by patent medicine manufacturers.

"If the patient is so situated that he can be attended only by some one who must also look after others in the family, it is advisable that such attendant wear a wrapper, apron or gown over the ordinary house clothes while in the sick room and slip this off when leaving to look after the others.

"Nurses and attendants will do well to guard against breathing in dangerous disease germs by wearing a simple fold of gauze or mask while near the

Will a person who has had influenza before catch the disease again?

"It is well known that an attack of measles or scarlet fever or smallpox usually protects a person against another attack of the same disease. This appears hot to be true of 'Spanish influenza.' According to newspaper reports the King of Spain suffered an attack of influenza during the epidemic thirty years ago, and was again stricken during the recent outbreak in

How can one guard against influ-

"In guarding against disease of all kinds, it is important that the body be kept strong and able to fight off disease germs. This can be done by having a proper proportion of work, play and rest, by keeping the body well clothed, and by eating sufficient wholesome and properly selected food. In connection with diet, it is well to remember that milk is one of the best all-around foods obtainable for adults as well as children. So far as a discase like influenza is concerned, health authorities everywhere recognize the yery close relation between its spread and overcrowded homes. While it is not always possible, especially in times like the present, to avoid such overcrowding, people should consider the health danger and make every effort to reduce the home overcrowding to a minimum. The value of fresh assume State indebtedness of \$1.25 air through open windows cannot be over emphasized.

"When crowding is unavoidable, as in street cars, care should be taken to keep the face so turned as not to inhale directly the air breathed out by another person.

"It is especially important to beware of the person who coughs or sneezes without covering his mouth and nose. It also follows that one should keep out of crowds and stuffy places as much as possible, keep homes, offices and workshops well aired, spend some time out of doors each day, walk to work if at all practicable -in short, make every possible effort to breathe as much pure air as pos-,

"In all health matters follow the advice of your doctor and obey the regulations of your local and state health

#### TRY IT! SUBSTITUTE FOR NASTY CALOMEL

Starts Your Liver Without Making You Sick and Cannot Salivate

Every druggist in town-your drugand everybody's druggist, has noticed a great falling off in the sale of calomel. They all give the same reason. Dodson's Liver Tone is taking its place.

"Calomel is dangerous and people know it, while Dodson's Liver Tone is perfectly safe and gives better results," said a prominent local druggist who sells it. Dodson's Live Tone druggist who sells it. A large bottle costs 50 cents, and if it fails to give easy relief in every case of liver sluggishness and constipation, you have only to ask for your money back.

Dodson's Liver Tone is a pleasanttasting, purely vegetable remedy, harmless to both children and adults. Take a spoonful at night and wake up feeling fine; no biliousness, sick headache, acid stomach, or constipated bowels. It doesn't gripe or cause inconvenience all the next day like violent calomel. Take a dose of calomel today and tomorrow you will feel weak, sick and nauseated. Don't lose

September 7, upon the approval the Fullerton School, Houston, of the president, fixed the price of cane sugar for next year, basis granulated, at 9 cents per cial service for the government. pound, less 2 per cent f.o.b. seaboard refining points. This price became effective Monday morning, September 9.

must sell their present stock on their stock not be disposed of the school teachers of Texas. prior to the time they receive sugar on the new cost basis, they will not be permitted to average their price; or, in other words, it might be possible that dealers will be compelled to sell their stocks of sugar at two different prices at the same time.

"The price for beet pulp, wet and dry, will be fixed by the Food Administration in the interest of cattle feeders, in the course of a few days.

"In this connection the attention of all distributors of sugar, i. e., wholesalers, jobbers and retailers, is called to the rule which requires that their stocks be sold on the basis of invoice cost without regard to market or replacement value. Sugar in the hands of jobbers must therefore be sold on a margin not to exceed 35 cents per hundred over cost, and in the hands of retailers, at a margin not exceeding 1 cent per pound, notwithstanding the general advance authorized.'

FIELD SUPERVISION FOR FOOD ADMINISTRATION.

H. L. Mills, associate director of education of the Federal Food Administration for Texas, has been designated by Administra-

for Peden as member of the staff of Field Supervision, with headquarters in Houston, and hereafter will devote his time to matters of investigation of complaints and assist in checking of licensees and unlicensed dealers tions are being observed. :Mr Mills, in coming to the Food Adthe price of sugar for next year: ministration permanently, sur-"The Sugar Equalization Board | renders his work as principal of and sacrifices a much better paying position to render spe-

> SUGAR FOR USE IN TEACHING CANNING.

The question has been asked the Federal Food Administration for Texas by various persons whether schools teaching Home Economics will be provided with sugar for lessons in canning at the opening of the school year, when these lessons are usually given. Administratori Peden is assured by the Sugar Division of the U.S. Food Administration that this sugar will be provided through the usual channels of sugar distribution.

This means that persons wishing to purchase sugar for teaching canning in departments of Home Economics of our schools and colleges, may apply to the Food Administrator for each quantity as they need for that purpose. It is urged, however, that teachers will make it a part of instructions to can with no sugar, or with little sugar, and with substitutes.

For Indigestion, Constipation Billiousness

Just try one 50-cent bottle of LAK-FOS WITH PEPSIN. A Liquid Digestive Laxative pleasant to take. Made and recommended to the public by Paris Medicine Co., manufacturers of Laxative Bromo Quinine and Grove's Tasteless chill Tonic.

ETTERS from our boys in the trenches and from the women in canteen and other war work, all bring to us the same message—SEND US NEWS FROM HOME.

World news is all right, but OUR BOYS want NEWS OF THIS TOWN. They want the home newspaper. Publishers are prevented from sending their papers free to anyone, even boys in the service. Consequently a national movement has been started by Col. William Boyce Thompson of New York, who is acting as President of the Home Paper Service of America to give the boys what they are calling for. Every community is joining the movement. Let us see that our boys are not forgotten.

Send to the publisher of this newspaper whatever amount of money you can-5 cents or \$50.00. We will publish a list each week of those contributing, and the amounts contributed.

Every cent received will be used to send this paper to our boys at the front. If at the end of the war, there is any surplus, it will be turned over to the local Red Cross Committee.

There is no profit in this to the publishereven in normal times, subscriptions are not sold at a profit. With war prices prevailing, and the high rate of postage on papers sent to France, our cost will scarcely be covered by our full subscription price.

Remember that over in France, some brave soldier or sailor from this town-perhaps even some splendid woman working within sound of the guns-is depending on you to "KEEP THE HOME LOVE KINDLED."

They are calling to YOU from "Over There" GIVE. WHAT YOU CAN

### What is Doing at the Training Camps

GERMANY'S, PEACE OFFENSIVE NOT SLOWING UP PREPARA-TIONS ON THIS SIDE OF THE ATLANTIC

Two bombing planes from Ellington Field, Houston, Texas, manned by four skillful army flyers, recently made a flight to Denver, Colo. the cities over which the planes flew en route to the Mile High City, were bombarded with Fourth Liberty Loan literature.

This flight was not originated for the establishment of any records but as an advertising feature of the Fourth great bond campaign. ships designed for the 1200 mile fly were equipped with powerful motors of the Hispana-Sulza type. These motors had been carefully overhauled and tested by expert mechanics for several days previous to the flight.

The home of the Second Provision-

al Wing at Park Place, Texas, eleven

miles from Houston, has been officially named Ream Field in memory of the first flying surgeon, the late Major William R. Ream. Colonel commanding officer, has received notification of the new name for the field, from the director of military areonautics, last Tuesday af-Because of the officially naming of Ream Field, Mr. Leonard T. Skeggs, the camp secretary of the Y. M. C. A. at Ellington Field, which has a branch at the Park Place Field, has changed the name of the organization from Ellington Field Y. M. C. A. to "The Army Y. M. C. A. of Ellington and Ream Fields,"

The first contingent of the new 97th division has arrived at Camp Cody, New Mexico. It consists of 585 graduates of the non-commissioned officers' training school at Camp McArthur, Waco, Texas. ends resting in St. Louis and Kansas for the U. S. Army. I volunteered is a sort of "rainbow" battalion with City. Many will receive commissions and some will be advanced to sergeants and all will be used in training the new division. Twenty noncommissioned officers from overseas have arrived to help in the instruction of the division.

When the Huns start an air raid in Paris, the Parisians duck to the cellars and the Americans go out to see a fighter. the fireworks, writes a former Camp Cody "Y" secretary. He says that and yours. because of the high cost of living, many of the Americans, outside of the soldiers, are adopting the French method of going without breakfast.

If your casing is blown out or the tread worn off we can repair or retread it and Guarantee to Give You Satisfaction : : : :

We will Give you the Best Service we can. Send Some Work And BE Convinced:

## Pecos Vulcanizing Co. Pecos, Texas

General Order No. 9. No public eating place shall use or permit the Many Cases of Influuse of an amount of sugar in excess served, including uses of sugar on the table and in cooking, excepting such sugar as may be allotted by the Federal Food Administrators to hotels holding a bakery license. No sugar allotted for this special purpose shall be used for any other purpose.

General Order No. 10. No public eating place shall burn any food or permit any food to be burned and all waste shall be saved to feed animals in other cities, is alarming, to say the or reduced to obtain fats.

General Order No. 11. No public to be displayed any food on its premises in any such manner as may cause its deterioration so that it cannot be used for human consumption.

General Order No. 12. No public eating place shall serve or permit to be served what is known as double cream or cream de luxe; and in any event no cream containing over 20 per cent of butter fat shall be served.

The general plan includes among others the following interpretations: Sparing use of cereals.

One portion of meat at a meal. Service of as few fried dishes as possible, to save fats.

One teaspoonful of sugar to a pa tron at a meal.

No candies after meals. No icing made with beet or cane sugar to be used on cakes.

Wide use of vegetables and vegetarian meals.

Because of shipping space to carry coffee, economize in its use. Discontinuance of service of Cheddar heese as a garniture.

Ice to be served sparingly. Elimination of fourth meal.

Elimination of meats at suppers and the use fo substitutes. Simple fare for lunches and ban-

Reduction in service plate and ware in public eating places and use of one plate instead of side dishes.

Standard menu cards with foods et forth in English. Cafeteria system recommended as

money, time, and labor saver. Use of local and seasonable sup-

animals for reduction to obtain fats. and were with him when the end No food to be burned.

Prices to be adjusted to meet reduction in quuntity of food served. Hotel, restaurant, and public eat-

ing place proprietors are reminded in this connection of Herbert Hoover's studies to become the family providpledge to the Allies:

"I have taken the attitude for the in the Green grocery store. United States that whatever the warfood program of the Allies requires of us we are prepared to meet; that in the service, but almost immediatethe World Conference need not con- ly on arriving in that city was taken sider whether or not we have supplies ill with influenza. -we are prepared to find them; that their sole anxiety must be to main- comes Reeves county's first casualty tain the health and strength of their among her soldier boys. people and conserve shipping to transreserves in food to supply all necessi- be brought here for interment.

soldiers-You can do your bit. darkest of dark hours.

## enza in Pecos Now

MALADY NOT AS SERIOUS AS IS REPORTED FROM OTHER LESS FORTUNATE CITIES-NO DEATHS TO DATE

The influenza situation in Pecos, though not as serious as is reported least. In fact Reeves county generally has been very fortunate up to eating place shall display or permit the present time. The influenza here is of a light form, and The Enterprise has not been informed of a single case of pneumonia, which seems to be the most common complication of the disease. Our physicians, Drs. Bryan and Lusk, have thus far evidenced an immunity, which is to be hoped will continue, for they are in demand day and night, and their work is little, if any, short of heroic.

As near as could be learned there are approximately 75 cases in Pecos. This number is being supplemented by people who live in the country, and their coming here for medical treatment at first presented quite a problem. This was solved by fitting up the school building as an emergency receiving hospital, and those who do come in will have the best of care. Substantial cots will be provided and if fresh air is a factor in combatting the infection, plenty is guaranteed.

In the meantime don't forget the hygienic rules to be observed to prevent the spread of the disease.

#### -Pay the President-HILTON BROWN VICTIM OF INFLUENZA IN EL PASO

A telegram to relatives in Pecos this morning conveyed the sad news that Hilton Brown, who recently joined the service of Uncle Sam, and who was stationed in El Paso, had died yesterday evening from influenza, contracted early in the week but reported as improving.

His parents, Mr. and Mrs. W. C. Brown went to his bedside as soon as All waste foods to be saved to feed his condition was reported serious,

Hilton was a bright manly young fellow, a hard worker, and for several years has been the main suport of his parents, leaving his school er. He was employed for some time

Sunday he, in company with three others, left for El Paso and enlisted

Thus, through the dread malady,

The Enterprise did not learn what port the American Army; that we, by disposition would be made of the the economy of our people, have the body, but more than likely it will

Sad, indeed, is this bereavement of the parents, and of the sister, and our people are deeply touched, and Let your idle books help our heartily sympathize with them in this

## Why Suffer?

Samme of the state of the state

Mrs. J. A. Cox, of Alderson, W. Va., writes: "My daughter . . . sutfered terribly. She could not turn in bed . . . the doctors gave her up, and we brought her home to die. She had suffered so much at . . . time. Having heard of Cardui, we got it for her."

The Woman's Tonic

"In a few days, she be-gan to improve," Mrs. Cox continues, "and had Cox continues, "and had no trouble at . . . Cardui cured her, and we sing its praises everywhere."
We receive many thousands of similar letters every year, telling of the good Cardui has done for women who suffer from complaints so common to their sex. It should do you good, too. Try you good, too.

Communication from him strong and sick women well. It is the prescription of Dr. Pierce, used by him in active practice many years and now sold by almost every druggist in the land, in liquid or in tablets. Send Dr. Pierce, Buffalo, N. Y., 10c. for trial pkg. Dr. Pierce's Pleasant Pellets are also best for lives and passed a good examination and would soon be on his way to the training station at San Francisco.

—Pay the President for liver and bowel trouble.

Waco, Tex.—"I was in very bad health and took Dr. Pierce's Favorite Prescription and got all right-felt better than I had in a long time. I took it for woman's trouble and nervousness and it did me a world of good. I can recommend the 'Prescription' to anybody, as being good medicine."

### Doings at Saragosa

C. G. Wright shipped a car of horses to Monroe, La., last Saturday.

Saragosa Wednesday, visiting Mrs. E. R. Cox.

Several bales of cotton have been

day from Pecos for a few days' visit with home folk. She is taking a course of telegraphy at the Western Union offices at Pecos.

and will soon be ready to gin the fleecy staple. The engine has arrived appreciated than at the present time. and has been put in place and now Women should learn war-nursing and is ready to start the machinery movnursing at home. There is no better ing: A dynamo has been installed to way than to study the new edition of the furnish electric lights for night running. W. L. Connelly will have full

Raymond Honaker recently made application for enlistment in the Marine Corps and received notice Sun-If a woman cuffers from weak back, day that his application had been favorably passed on. He left immediately for Pecos and from there went since then are to the effect that he passed a good examination and would

The Strong Withstand the Heat of

Old people who are feeble and younger people

Mrs. T. B. Pruett of Pecos, was in

picked and stored away, awaiting the new gin to open and start ginning. Several bales have already been hauled to Pecos.

Miss Lanora Williams came in Fri-

The new gin is nearing completion

Summer Better Than the Weak

who are weak, will be strengthened and enabled to go through the depressing heat of summer by taking GROVE'S TASTELESS chill TONIC. It purifies and enriches the blood and builds up the whole system. You can soon feel its Strengthening, Invigorating Effect. 60c.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is catarrh. Catarrh being greatly influenced by constitutional conditions requires constitutional treatment. Hall's Catarrh Medicine is taken internally and acts thru the Blood on the Mucous Surfaces of the System thereby destroying the foundation of the disease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative powers of Hall's Catarrh Medicine that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. YOUR CAST-OFF CLOTHING TO WARM BELGIANS

Campaign by Belgian Relief Commission During Week September 23-30. Commission Must Raise 5,000 Tons. Get in Touch With

Five thousand tons of clothing for the destitute people of occupied Belgium and France!

This is the objective of a drive to be conducted by the American Red Cross at the request of Herbert C. Hoover, chairman of the Belgium Relief Commission, during the week beginning Monday, September 23. The clothing drive of the Red Cross last March brought in 5,000 tons of garments and it

is estimated that at least as much more will be required to clothe the 10,000,-

000 people in the occupied territory during the coming winter. As in the previous campaign, the clothing will be collected by the chapters of the Red Cross throughout the United States, each chapter getting its allotment from its division headquarters. There are thirteen of these divisions and each has already been apprised by National headquarters in Washington of the amount of clothing its chapters are expected to produce. Every kind of garment, for all ages and both sexes, is urgently needed. Garments of strong materials are wanted, as they will be subject to the hardest kind of wear. Flimsy garments, ballroom dresses, high-heeled slippers, silk hats, straw hats, and derbies, which were donated in large quantities in the last clothing campaign, will not be accepted. Such articles would

This clothing can come from America only. Five thousand tons are needed to tide Belgium through the coming winter. Securing the clothing is a matter of life and death for this helpless, courageous population behind the

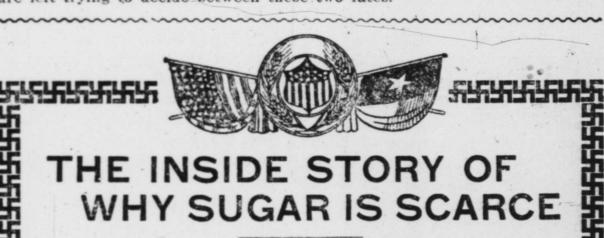

In Belgium it is impossible to buy shoes. There is no more leather of any description on the market. Every available substitute has been tried. For a time old belting from factories was used; and roofing paper, of which there happened to be a stock, was resorted to for re-soling shoes. But the Germans, after having seized all the leather, requisitioned these substitutes also, and soon not a single yard of belting was left in any Beigian industrial

Now the Belgians fasten pieces of old rugs onto wooden soles and wear them for shoes.

And they make coats out of old blankets-and blankets out of anything. Daily the ravages of tuberculosis throughout Belgium becomes more, terrible. Deaths from this disease have increased 100 per cent and cases of external tuberculosis 1000 per cent. The doctors, in spite of their untiring devotion, can no longer cope with the rising tide of disease.

Today, two die where one died in peace times, while owing to under-

nourishment the birth rate has been cut in half. An American, writing from abroad about the conditions of this brave little country, says, "Poor Belgium! One-third of her people has starved to death; one-third has been carried away to work for Germany, and those who remain are left trying to decide between these two fates.'

U. S. Food Administration Explains Facts With Regard to Reserve Stock; Geographical Complications in Sugar Distribution; Pros-

pects for 1918-19 Sugar Crops; and the Shipping Situation. <del>Ŭĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸĸ</del>

OUR RESERVE STOCK.

Our sugar comes to us in definite seasonal cycles. The cane sugar of Cuba, Hawaii, Porto Rico, Philippines, and other minor sources, is exported to this country in the period from January to October. Although there is some available even as late as December, the amount is relatively small. From October to January we depend chiefly on our own domestic beet and cane crops, but it is not until November that the beet sugar is available in the eastern part of the country. To bridge the gap between the end of the arrivals of cane sugar from outside of the country, and the arrivals of beet sugar from the Western States, we depend normally on our refiners' reserve supply of cane sugar of some 300,000 tons. Since our shortage during the latter part of last year our reserve stock has been in a depleted condition. Refiners now have only about 120,000 tons of raw cane sugar on hand, about 40 per cent of the normal reserve supply. Had our consumption in the past six months been reduced sufficiently, refiners' stock might now have been large enough to take care of our needs.

It is a striking fact that at no time this year have stocks been anywhere near those of the prewar years or of last year. At the latest date, August 10, stocks were still not much over one-half of last year's. This alone indicates the necessity for conservation.

GEOGRAPHICAL COMPLICATIONS IN SUGAR DISTRIBUTION.

An additional factor which complicates our sugar situation is the physical factor of the geographical extent of our country. It is possible that there may be an excess of sugar in the country as a whole, and at the same time severe shortages in particular localities far away from centers of distribution. Thus it has been stated "There will be considerable supplies of sugar available in the South and West, but because the gateway to the Atlantic seaboard through the Alleghanies and the Potomac Valley will be congested by the movement of munitions and war supplies for our overseas forces, it is extremely problematical whether any considerable tonnage can be moved East."

It is therefore not only necessary to make certain of sufficient supplies for the country taken as a unit, but-it is also necessary to plan ahead with a view to having sugar available in all parts of the country even in the face of transportation difficulties. This of course involves building up of larger stocks than usual.

PROSPECTS FOR OUR 1918-19 SUGAR CROPS.

With the shortage of labor already universally existent in the United States owing to the demands of the war industries, and with the prospects of further inroads under the new 18 to 45 draft regulations, there is serious question in the minds of the producers of our domestic beet and sugar crops as to their ability to maintain the normal rate of production this next season. It is most prudent to prepare for a reduced production of our domestic

beet and cane crops. From our main sources of supply, Cuba particularly, and also Hawaii and Porto Rico, come reports of severe labor shortages and difficulties in obtaining necessary supplies and fertilizers. While the probability of reducing production in these places is not as great as in the continental United States, some considerable reduction is certain to come. it would, therefore, be unwise to depend on the 1918-19 sugar crops to

make up for any deficiency in our present supply. It is better to build up stocks to provide against further crop reduction.

THE SHIPPING SITUATION.

All of the foregoing considerations, however, would not bring about a shortage in normal times. Sugar could be brought from distant places if the demand was sufficient to warrant the financial outlay to obtain supplies. In fact, at this time, there is some 500,000 tons of sugar available in Java of last year's crop too far away to be moved, either to the United States or to the allies, which in ordinary times would certainly have been brought here to relieve the situation. The economic use of shipping facilities in accordance with our war program makes it advisable that we reduce our sugar consumption and employ shipping for more necessary purposes.

In brief, then, the entire sugar situation is an outgrowth of war conditions, and must be attacked as a war problem. We may expect it to be with us as a problem until the war ends, and this makes imperative the restrictive regulations on sugar consumption, although at times there may appear

to be a surplus of sugar stocks in the country.

- This paper has enlisted with the government in the cause of America for the period of the war -

The "Flu", La Grippe, Call it what you will; Better go home and take the "dope" And be very, very still.

"Hindenburg Responsible for the New Peace Proposals," reads a headline in the daily papers. Well that old boy, between dying, fighting and making peace at one and the same time, is having his hands full.

Above all, do not forget the precautionary rules during the epidemic. It is just possible that no matter what you do the "flu" will get you. You'll find however that the observance of these rules will lighten the burden considerably.

Those who are holding back, thinking the Hun is ready for peace, better take another think about the matter, and attend to what is their duty - lend their money to the Government. Germany is planning a piece, all right, but it's a piece of their oldtime hellishness, and bonds is the only thing that will stop her.

Rumor has it that Prince Max who started the ball a-rolling in the present German peace offensive, is about to resign, on account of pressure. It wouldn't be much amiss to name our President "Woodrow the Chancellor Killer." His replies to these born. dignitaries makes such monkeys of them that they resign to escape the ridicule of the people.

Wilson's answer to Germany, just sent, is "Autocracy Must Go!" The ing interests in Reeves county, Sen-Your undying regret will always be put Reeves county "over the top" in that you had no part in it. No mat- previous Loan drives. Look up the committee and tell them you want in on the master | Reeves county and will take three stroke that's going to send the American Army into Berlin, plant the Stars Bonds. Am sending check for the and Stripes over the Imperial palace, while our bands play "Yankee Doodle" and make the Hun like it, too.

There is a state law prohibiting sweeping in public places before sprinkling first with some sort of disinfectant or dust-catcher. There never was a more appropriate time to enforce such a law, and especially as regards the sidewalks. Germs are more apt to be stirred up on the sidewalks than most any other place and each pedestrian must catch about a million or so of them each time he passes a sidewalk sweeper who is making a fog. The city and county authorities are hereby cited to take notice.

The epidemic of influenza, according to reports, is getting worse in our city. How many cases there are The Enterprise don't know, but there are enough to warrant the strict rules of quarantine that have been applied. It is to be hoped that these rules will be kept by the people who are affected, and in the advent of address of the soldier or member and failure to do so, the officers will step also the name of the person designatin fearlessly and see that they are ed to mail the parcel. The labels will kept. Every municipality has laws be prepared to serve as address labels on it's statute books that might well for the parcels. The label furnished have never been written so far as each soldier or other member of the their enforcement is concerned. By TOM HARRISON, Chairman, S. C. VAUGHAN, Clerk. \_Pay the President\_

Is your name on these pages? If

not, get it there by all means. There are those whose names are on this list that will have hard going meeting the obligation, but they didn't count the cost when the honor or their country was at stake. Nor did they hesitate when they considered that a prolongation of the war meant that sooner or later the names of loved onestheir own and their neighbor'swould appear on the list of the dead and dying. "Nothing matters, win the war," is their slogan. It should be yours. Get your name on the honor roll today.

-Pay the President

I will judge you not by the warmth of the tears you shed over the lists of the dead and the injured that come to us from time to time

"Actions speak louder than words" is an axiom that even the dullest can comprehend. The acts of vandalism by the Huns during the last few days when peace negotiations were in progress prove conclusively that ideas of peace are far from their minds. Any of our citizens who are holding forth the argument that peace is near to keep from doing his duty in the Bond campaign isn't even fooling himself. Peace, the kind that endureth, cannot be brought about by the mere bandying of words with a foe devoid of all honor. The only thing that will bring such peace with such an enemy as the Hun is the force of arms. In this task your dollars play the stellar role, and the quicker you lend of your wealth, just so quick will such peace be brought about, and just so quick will the cry of our own flesh and blood, torn by the bayonet and shell of the murderous Hun, cease to cry out. Lend, so that when your head touches the pillow at night, rest may be yours. Lend, that when you seek repose each night, your dreams will not be haunted by dreams in which you see the mangled bodies of your neighbor's boy-maybe your own. Lend, for the sake of a clear conscience before your Creator.

#### -Pay the President\_

This may be your last chance to prove you belong here. The Huns are losing the tools (the smaller nations allied with them) one by one. Even Bill can't work without tools, and the sign are good than soon he must quit the drive. Then both you and William will feel bad-he because he had the stuffing whipped out of him; you, because you didn't help do it. Come across.

#### -Pay the President-

The only thing that will make you hold your head erect, and feel plumcomfortable among other men, looking them fearlessly in the eye, is the knowledge that you, like the soldier in the trench, have gone the limit. He gives, you are asked to only lend.

General Haig in an address to his men, said: "I want every man to conduct himself as if the result of the campaign depended upon his per-sonal efforts." If we at home can eatch that spirit, the goal is in sight. It's the \$50 bonds that swell up the grand total. If we counted on the Pecos, big amounts every Loan would be a failure.

There is 1,900,000 reasons why you hould buy bonds They're in Europe and were it not that their bared some of those bullets might have found you.
