

Rosy Cheeks & Satin Skin

Because of her rosy cheeks and satin skin a woman attracts the admiration of all men. When the young woman peers in her glass, she may see pimples and blotches and she immediately goes to the drug store for paint, powder and beauty creams, when she should go there for a blood medicine of stomach alterative known as "Golden Medical Discovery." This vegetable tonic and blood purifier clears the skin, beautifies, increases the blood supply, stimulates circulation, while pimples, blotches and eruptions vanish quickly. Get your nearest druggist for Dr. Williams' Golden Medical Discovery in tablet or liquid form or send for the booklet package of tablets to the "Invalids' Hotel in Orange, N. Y."

ASPIRIN FOR HEADACHE

"Bayer" is on Genuine Aspirin—say Bayer

"Bayer Tablets of Aspirin" contain proper ingredients for Headache, Colds, Pain, Rheumatism, Lumbago, and Rheumatism. "Bayer" means genuine Aspirin recommended by physicians for nineteen years. Handy tin boxes of 12 tablets each. Aspirin is trade mark of Bayer, Manufacturer of Monoacetic Acid Salicylic Acid.

COULD HARDLY STAND ALONE

Terrible Suffering From Headache, Stomachache, Backache, and Weakness, Relieved by Cardui, Says This Texas Lady.

Cherokee, Tex.—Mrs. Minnie Phillips, of this place, writes: "Five years ago I was taken with a pain in my back. It was right under my shoulder blades. It would commence with a dull ache and extend up into my left shoulder and down into my back. At that time the pain would be so severe I would have to take to bed, and would usually about three days. I suffered this way for three years, until I was a mere skeleton and was unable to go anywhere. I had had my house work go. I suffered with a pain in my back and I could not do a thing. My life was miserable, my stomach got in an awful condition, caused from taking too much medicine. I suffered so much that I had just about given up all hope of ever getting anything to help me. One day a Birthday Almanac was given in my yard. After reading the medicine list I decided to try Cardui, and I am so thankful that I did. It began to improve when on the second bottle. I am now a well woman and feeling fine and the cure is permanent for it has been so since my awful bad health. I will always praise and recommend Cardui." Try Cardui today.

Do More Work.

Remove sore ambitions and you get more out of everything when your system is in good condition. Impurities in the blood cause a very depressing effect on the system, causing weakness, laziness, nervousness and sickness. GROVE'S TASTELESS CHILL TONIC restores Energy and Vitality by Purifying and Refreshing the Blood. When you feel languid, nervous, invigorating effect, see how it brings color to the cheeks and how it improves the appetite, you will then realize its true tonic value. GROVE'S TASTELESS CHILL TONIC is a patent medicine, it is simply SODA and QUININE suspended in Syrup. It is pleasant even children like it. It contains Quinine to Purify it and Iron to strengthen it. These reliable tonic properties fail to drive out impurities in the blood. The Strength-Creating Power of GROVE'S TASTELESS CHILL TONIC has made it the most famous tonic in thousands of homes. More than thirty-five years ago, folks would travel a long distance to get GROVE'S TASTELESS CHILL TONIC when a member of their family had Malaria or needed a body-building, strength-giving tonic. The formula is just the same today, and you can get it from any drug store. 50c per bottle.

JACKSON SYNDICATE COMPANY TO PROMOTE FARM LIFE

The Pecos Valley of Texas is not only becoming known all over the United States for its oil fields, but is coming into its own as an agricultural country. Large reservoirs are being built along the Pecos river for irrigation purposes. This land has always been among the most fertile of any part of the United States, and this new irrigation project will place it in the class of the richest agricultural sections of the country. Any crop can be raised in this valley in abundance, all kinds of fruits, vegetables, grain, and berries being plentiful, and cotton, corn and alfalfa yielding tremendous profits. The wheat raiser, cotton planter, stockman, horticulturist, and truck gardener can all make big money on the irrigated lands of the Pecos Valley. Alfalfa is the best money producer in this section and can be cut from five to seven times a year. The climate is one of the best in the world. It is 2,750 feet above sea level, the average temperature in summer is 67.7 and in winter 51. Winter days are favorable for out of doors work.

To Develop Huge Tract
The Jackson syndicate was formed some few months ago to develop and irrigate the land in the Pecos Valley near Pecos on the Pecos river. They now have in working order a reservoir covering 8,000 acres of land. This syndicate has only 10,000 acres of land to sell, this being the last and only available irrigable land in this section, and it looks to be one of the biggest projects of its kind in this country, bringing a vast territory of Texas under irrigation for agricultural purposes. The syndicate is selling the land on reasonable terms, thus putting it within the reach of the people who now live on rented farms. These terms give them a chance to own their own farms. The syndicate has planned to build a town on their acreage and have every convenience that is necessary for the up to date farmer. The project brings to mind the great "back to the farm" movement which is due to sweep the country in the near future. It gives the man with moderate means the chance to own his own farm and make money and pay for it at the same time.

COUNTIES FIGHT IN COURT ANCIENT BOUNDARY LINE

Midland, June 23—Brewster and Pecos counties are in the Reeves County district court as a result of a dispute over their boundary line. Since their division in 1879 and two years ago the boundary line was stationary. In 1918, for some reason, the State land commissioners office issued abstracts placing a two mile strip of territory that had been previously recognized as in Pecos County, in Brewster county, and that county has collected the taxes for 1919 on this area. Pecos county has formally objected to this loss of revenue, and has brought suit in a neutral county to enjoin Brewster county from collecting further taxes from the residents of this strip of territory. The strip is 75 miles long and two miles wide, and is situated fifty miles southeast of Pecos. Although now in an oil country and surrounded by development, the suit merely concerns the collection of taxes on the land and does not affect the oil lease holdings to any degree beyond the fact that the filing of leases may have to be changed from one county to the other and this can easily be accomplished.

The suit has been brought in the court presided over by Judge Chas. Gibbs, of Midland.

THINK BOLL WORM LAW WILL BE SATISFACTORY

Austin, June 23—The bill providing non-cotton zones in pink bollworm areas in Texas, passed late yesterday by both houses of the legislature, will be approved by federal officials, executive members expected today.

The measure, based on present laws but providing no non-cotton zones this year, marked completion of work for which the special legislative session was called.

Its retained provisions for stamping out the cotton pest because of which a national quarantine against Texas cotton products was threatened provides for reimbursement of farmers whose crops are destroyed or who can not grow cotton.

One large non-cotton zone of counties in the Trinity Bay area as first considered is not provided, however.

TOYAH JOURDON WELL NEARS COMPLETION—WATER GONE

The Jourdon well is in a fair way toward being brought in. The water has at last been cased off and the drillers are only waiting for the cement to set before drilling into the sands. This well has had particularly hard luck since a five-foot strata of fine oil bearing sands were struck five weeks ago. Water was encountered at that time and has been bothering ever since. It is believed now, however, that all difficulties have been overcome and that another two or three days will tell the story.

BALMORHEA MAKES READY FOR BIG OIL BOOMERANG

Activities of the Presido Oil Co., in acquiring acreage around the company's No. 1 well in the Green Valley, 50 miles southeast of here, is cited as indicative of big development in the Big Bend country. The company is said to have invested approximately three-quarters of a million dollars in acreage alone since the discovery of oil in its well. Offset leases are changing hands rapidly at prices declared to be higher than ever known in other than proven fields, according to J. S. Cook of the Marfa Chamber of Commerce.

SOMETHING REFRESHING.

"Can you boys tell me where I could get a job on a farm?"

He was a big, good-sized, lusty, clean-cut, clear-eyed, reddish complexioned young man with good clothes and a straw hat on his head. The serious look on his face and his question to two young men of this locality as they sat on a box, was put as a matter of course and his manner showed that he meant every word, that it was a man's question put by a real man.

The two young men on the box looked puzzled for a moment, for it was a real American young man who put the question, not a Mexican. The Enterprise reporter who heard the question was "stumped." Such a question from a young American had not been heard by the reporter in years and he felt sure the young men on the box were equally surprised thereby.

The fine looking, lusty young man was an American. The reporter, after he had given his surprise time to subside, thrilled with patriotic pride, that an American asking for that farm job, the writer had not heard such an inquiry from a lusty young American in several years.

"Well, young man, you are a curiosity in this southwestern country; you, an American, asking for a job as a farm hand. Only Mexicans do that down in these parts. Where are you from, any way?"

"I am from Illinois," he answered, and there was nothing apparent in those eyes and face but honest surprise in the faces of his three listeners.

"Illinois," repeated the reporter, "the land of corn."

"Yes," answered the young man, "and we raise lots of alfalfa, too; I have pitchel lots of it."

Then the two young men told him how he could probably stand a better chance over in the neighboring town of Barstow as that was strictly a farming town, and lots of cotton and alfalfa were grown in that vicinity. "I don't know anything about cotton," replied the young man and asked questions about how to get to Barstow and whether there was a hotel there, showing that he meant what he said and was independent.

Evidently not comprehending the

surprise he had given his three listeners, there came from him these words, with no brag but with a ring of sincerity: "I am not afraid to work. I'll do anything."

With a "thank you," he turned on those clean-cut legs of his and strode away as much as to say: "I will find work!"

And the reporter turned away musing: "Well, how refreshing. Young Americans who want to do real productive work are not yet extinct. I conducted a federal employment office for a time during the war, and when I referred a farm job to an American he looked insulted or was met with such as this: 'I want to drive a car or a truck, I am a stenographer, a soda fountain man, a time keeper.' How refreshing that young man was and he is an American."

CULBERSON COUNTY WILL HAVE A NEW POST OFFICE

Van Horn, June 22—There has recently been established at the plant of the Great Southern Sulphur Company, on the east side of this county, a new post office, known as "Sulphuria." Heretofore, the people in that part of the county were by necessity, forced to go to Pecos, Toyah, and Orta for their mail, and a short time ago the post office at Orta was discontinued, thus increasing the inconvenience of many of the ranch people who live in the vicinity of Orta in that many of them have had to go to Pecos and Toyah for their mail. Since the establishment of "Sulphuria" such inconvenience no longer exists. It is our information that the new post office will enjoy daily mail service and in as much as many of the citizens live nearby they will encounter no difficulty in getting their mail regularly.

NEGRO DEPOSITS \$1,000 BILL

Milford, June 2—It is not often that other people besides newspaper men and bankers are lucky enough to have in their possession very many \$1,000 bills, but here was a notable exception to this rule. The past week Henry Hall, a negro farmer living two miles south of Milford, came to the bank of Milford and deposited a thousand dollar bill.

HER IDEAL

By HELEN E. IVERS.

(Copyright, McClure Newspaper Syndicate.)

After a long and boring evening, Roy G. finally said "Good night."

"You don't know when you're well off, Joy," she cried. "Here you have the chance to marry a young man with good prospects and who loves you."

It was a fine bit of sarcasm, but Joy did not mind. "He is not my ideal, mother," she said.

Mrs. N. sighed. It was certainly no use to talk to Joy.

Two weeks later, Joy went to New Hampshire for her usual autumn vacation with her grandmother.

They were a jolly crowd and she enjoyed herself immensely, but all were glad to rest for dinner.

"You look fine, Joy," she said after surveying her guest. "I want you to look your best tonight, because a man has just come, whom we want you to meet."

At dinner, therefore, Joy was introduced to King W., the aforesaid Prince Charming.

On the other hand, Joy herself was a bewitching little creature. She had quantities of wavy, chestnut hair, violet eyes, and a clear, transparent complexion.

For the next few days, she was in the seventh heaven. Every place that she went, she was accompanied by King, who proved to be wonderfully congenial.

It developed that he had a wonderfully mellow voice and nobody but Joy could play his accompaniment suitably.

Two days before she was to go home Joy went back to her grandmother's to stay there for the remaining time.

At the end of her vacation Joy came home, her head completely enveloped in clouds. She did not notice Roy's absence until her mother, who had waited for her to ask where he was, volunteered the information that he was away on business.

One day after her return King called. He decorously acknowledged Joy's introduction to her mother, and after the latter left he talked pleasantly for 10 or 15 minutes.

"I came to tell you something," Miss Joy, he said.

Joy's heart fluttered. She felt that she could guess what he wanted to say. He went on.

"You know," he said, "it has been inevitable that I marry some day, and my mother promised that she would help me in the search for a suitable wife. I may tell you now that she has succeeded."

"Oh, I'm all right," Joy managed to answer. Although her eyes were irrevocably opened to the kind of creature her former idol was, she pulled herself together and remained calm until the end of his visit.

Meanwhile Roy hastened upstairs and burst into the room where Joy was. To his surprise she was lying face downward on the sofa.

"Which one, Joy?" she asked. "Have you found your ideal in Mr. W.?"

"Pooh!" Joy answered, smiling radiantly. "Whom do you suppose? At present I am engaged to a poor but deserving young man with good prospects, and some time in the near future he and I are to be married. Mr. W., well, he was a fleeting delusion, that's all."

TEXAS CROP CONDITIONS SHOW MARKED IMPROVEMENT

Bounteous Rains Last Three Weeks Has Made the Crop Outlook One of the Best in Years

Dallas, Texas, June 22.—Crop conditions and prospects in Texas have materially improved within the past three weeks, according to reports from correspondents of the Texas Industrial Congress in 129 counties.

The total cultivated acreage of the state this year according to reports, is 8 percent less than in 1919. Labor conditions on the farms have not improved, but show a further decrease of 17 percent since April 1, when the available supply was estimated at 87 percent.

114 counties report a probable acreage of 10,139,000 acres, or 98 percent of last year's acreage. Condition, compared with 1919, 75.8 percent; compared with the ten year average, the condition is 60.04 percent.

A number of counties report much replanting is necessary because of poor stands and overflows. From twenty to twenty-five percent of the crop remained to be planted on June 1.

114 counties report an acreage of 98.5 percent compared with 1919. This indicates 6,628,180 acres.

Wheat Acreage reports from 68 counties estimate a total of 925,800 acres.

61 counties estimate the yield at 12.5 bushels per acre. This forecasts a crop of 11,566,250 bushels.

Estimated acreage in 88 counties, 71.1 percent of last year's crop, or 1,599,750 acres. Condition, compared with 1919, 68.3 percent.

83 counties report an acreage planted and to be planted of 87.3 percent compared with 1919. 95 counties report an average condition of 84 percent.

Planting is in progress and 74 counties state the acreage as 85.2 percent of last year's. This indicates 189,144 acres.

Rapid progress in planting is reported. Orange county indicates a 50 percent increase in acreage, with 85 percent of the crop planted and prospects good for a normal crop.

71 counties report an acreage of 78.3 of last year, with poor crop prospects. Late planted potatoes, however, are doing well.

Planting is now in progress and a number of counties report an increased acreage. The average acreage compared with 1919 in 77 counties is 94.7 percent, condition 85.9 percent.

The late spring freeze and subsequent hail has reduced the state's

prospects to a probable yield of 34.3 percent compared with last year. East Texas indicates that there will be no carload shipment of peaches.

114 counties report 8.5 decrease in the number of home gardens. The condition is reported as 76.1 percent of that of 1919.

66 counties indicate a total acreage of 92.1 percent compared with last year. 67 counties report a condition of 79.9 percent.

LAXATIVE BROMO QUININE TABLETS remove the cause. There is only one "Bromo Quinine." E. W. GROVE'S signature on box. 50c.

LOST—Forty Sinners

The old sanctified methods of luring people unto the church are fast dying out. The modern church, so it is termed, has adopted a systematic business method for its conduct.

The movie screen can be found overhauling the altar; the basement often conceals a gymnasium; the pastor is attired in a business suit and the frock-tail coat is gone.

with church features for the week.

It is not uncommon anymore to pick up the weekly paper of some town and see a scientific advertisement that reads like this: "STRAYED—Forty sinners have strayed from my flock, will the people of Waco help me get them back into the fold—Rev. So and So." The day has come when the churches have found the value of the business way of getting their church on the map.

own game, the churches are now adopting every modern attraction that will keep churchgoers headed down the "straight and narrow path."

It is the broadminded version, and steps aside from something the church has never attempted before, but even the Waco men tell us that to keep abreast of the times is the only way of meeting world problems. This innovation of the church is being accepted with enthusiasm and churches all over the country are falling into line.

TREMENDOUS PRICE SLASHING

Still Going On at the Pecos Bargain House

LIFT OFF CORNS!

Apply few drops then lift sore, touchy corns off with fingers

Doesn't hurt a bit! Drop a little Freezone on an itching corn, instantly that corn stops hurting, then you lift it right out. Yes, magic!
A tiny bottle of Freezone costs but a few cents at any drug store, but is sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.
Freezone is the sensational discovery of a Cincinnati genius. It is wonderful.

WHY THAT LAME BACK?

That morning lameness—those sharp pains when bending or lifting, make work a burden and rest impossible. Don't be handicapped by a bad back—look to your kidneys. You will make no mistake by following this Pecos resident's example. Ask your neighbor.
Mrs. R. E. Miller says: "Several years ago my back was weak and lame and ached constantly. My kidneys acted too often and that annoyed me very much. It didn't take many boxes of Doan's Kidney Pills to cure me."
Mrs. Miller gave the above statement October 27, 1913, and OVER THREE YEARS LATER on April 7, 1919, she added: "I still recommend Doan's Kidney Pills highly. They are fine. I use a few of Doan's occasionally and they keep my kidneys in good condition."
Price 60c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Miller had. Foster-Milburn Co., Mrs. Buffalo, N. Y.

OIL BRIEFS

E. R. Lovewell, geologist for the Dominion Oil company will speak to the Barstow Chamber of Commerce this evening on the geological layout of the local oil fields.

R. C. Lomax, who has maintained a suite of office rooms over the post-office for the past several months, will close them and leave today for his home at Austin, Texas. He expects to return however as soon as development gets a little farther along. He has a number of holdings in the various fields.

L. E. Cash, employee of the Dominion oil company went to Oklahoma yesterday morning on a short business trip.

C. F. Shearer and Fred C. King of Los Angeles are here arranging for a well to be drilled on the triangular scrap section, three miles south of the Bell well. They are planning to change their original plans for a shallow well to a deep test and this will delay the start of operations. They are now seeking more acreage to justify the larger expenditure.

J. J. Carter of Dallas is here to take charge of the offices of the Toyah Valley oil company as general manager. Mr. Carter has been treasurer of the organization. E. L. Stratton who has been in charge of the sales work, resigned as general manager at a meeting of the directors in order to be relieved of details of operation and will devote his full time to field work.

It is reported that Abner Davis is back on the job again in Pecos to plan the future development of his numerous holdings in this territory. It is expected that he will have a standard rig erected for a deep test.

B. C. Couchman of Dallas and F. M. Dudgeon of Port Lavaca, Texas, have let a contract for a well on sec. 48 P. S. L., block 59, Reeves county. The drilling operations will be in charge of Mr. Dudgeon. The casing arrived from El Paso this week and everything is set for immediate work.

N. E. Canfield, who has been here for the past two weeks making a geological study of the oil fields, left for San Francisco, Monday afternoon. He expects to return later to enter the field with capital behind him.
L. M. White of the Toyah Bell Oil company is here arranging for the supplies for the first well of his company, which will be drilled on Section 2, Block 55, Twp. 3.

No Worms in a Healthy Child

All children troubled with worms have an unhealthy color, which indicates poor blood, and as a rule, there is more or less stomach disturbance. GROVE'S TASTELESS CHLORFORM given regularly for two or three weeks will enrich the blood, improve the digestion, and act as a General Strengthening Tonic to the whole system. Nature will then throw off or digest the worms, and the child will be in perfect health. Pleasant to take. 6c per bottle.

J. B. Forsyth, who has been in the Toyah field with N. E. Canfield, for the past few days is now making a survey of the Delaware mountains and the Rustler Hills in Custer county.

Allen B. Bowen of Denver, one of the trustees of the Martin Syndicate which is drilling a deep well on section 17, block 59, PSL, Reeves county, passed thru Pecos the last of last week enroute to the company's camp near Toyah for an inspection of the property.

B. L. Heath, an independent operator from Indiana spent few days the first of the week traveling thru the Pecos-Toyah fields, in the hopes of picking up some good leases for development. He believes there will be some producers here when the drill gets down deep enough. He went from here to Roswell, N. M. where the National Exploitation company, a branch of the Standard Oil corporation, is getting ready to put down some drills.

Roy W. Johnson stopped off in Pecos for a few days the first of the week to look over the local fields. He is with an oil company with headquarters at Little Rock, Arkansas, and went up to Carlsbad Wednesday to look over the operations of the new companies getting ready to drill there.

W. A. Sante of Denver and Los Angeles has been in Pecos for the past several days arranging for a deep test which he is to drill on the Splitjarber ranch, about thirty miles southwest of Pecos and west of Balmorea.

Willis Wright of Los Angeles is here to make preliminary arrangements for a deep test, which he says his company, the New Mexico Oil Corporation, is to drill on sections 5 and 6 of range 29 east and 26 south just over the Texas line in New Mex.

When you buy at Pecos Bargain House for cash you don't help to pay the bad bills. 35c

Quips and Quibbles

A court often fails to convict a man on circumstantial evidence but the neighbors never do.

Often the finest thing about some homes is that sign in the parlor "God Bless Our Happy Home."

We have our doubts about some people ever being happy in heaven—they will always be looking for a chance to trade their harp for a trombone.

Speaking of bitter pills, the navy bean holds some horror for a Gob.

A small town never forgets a scandal. They still refer to the fact that Adam and Eve were never married.

At the present high price of paper it is doubtful if the butcher makes anything by weighing it in.

Kicking up the furrows behind a gang plow often gets a man to the end of the rainbow and the proverbial pot of gold quicker than will the boy with the nobby suit sitting behind the steering gear of a twin six riding up and down the main thoroughfare—but you can't convince a girl of it.

The old flag is all right of course, but too many politicians are wrapping it around them right now in the hope of getting the soldier vote.

I am prepared to do hemstitching and picotting at reasonable prices, at my home in Pecos and will appreciate the patronage of the Pecos and out-of-town people. Mrs. Tom Harrison. 43-4t

Catarra! Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarra! Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the Blood on the Mucous Surfaces of the System. Catarra! Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces.
ONE HUNDRED DOLLARS for any case of Catarra! Deafness that cannot be cured by HALL'S CATARRH MEDICINE.
All Druggists & Co. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Be Rid of Painful Corns

"Get-It" Makes Them Loosen Up So They Lift Off Painlessly.

There's no more pain after a few drops of "Get-It" lands upon corn or callus and instantly dries.

In a day or two you lift the old misery-maker right off without even feeling it. That's the best of Mr. Corn and the last of your misery. Millions who have lost their corns the "Get-It" way say it is the only common-sense way to get rid of the pest.
"Get-It" is the never-failing, guaranteed money-back corn remedy costs but a trifle at any drug store. Mfg. by E. Lawrence & Co., Chicago.

Sold in Pecos and recommended as the World's best Corn Remedy by Pecos Drug Company.

When your eyes need attention, don't get impatient. I am permanently located in Pecos. Ask any of my hundreds of customers about me. Office in Slack's Furniture Store. S. C. Muck, optometrist. 45-

LEASES

On Ten Big Structures in West Texas

IRA J. BELL & Co.

PECOS, TEXAS

SIoux OIL CO. WILL PUT DOWN DEEP TEST

Theo. W. Carter, representative of the Sioux Oil & Refining Co. of Wichita Falls, Texas, was in Pecos the first of this week looking over the records of land in blocks 56 and 57 in the Toyah shallow field. He left for Wichita Falls Monday where he will meet with the directors of the company and file his report of the situation here.

According to Mr. Carter the company will put down a deep test well on their holdings in these two blocks. The exact location for their first well will be decided on when he returns from the Wichita meeting. Mr. Carter is a firm believer in the possibilities of the Toyah field but differs with most of the operators of that district in that he says it will take a deep test to get the greatest returns. The entrance of the Sioux company will mark up a new firm in the field and one that can't be depended on to stay with their operations until the finish.

GOOD RAINS IN PECOS VALLEY.

Preceded by several light showers earlier in the week, a heavy rain that started falling early Sunday morning and continued until afternoon, put the crops in the Pecos valley in fine condition and filled the earth with moisture. The rainfall for the week was somewhere around three inches.

The valley has been well supplied with moisture the last four weeks, with light showers falling regularly. The farming districts are looking forward to a record cotton crop, while the alfalfa crop for the first cutting has been a "boomer." Up to date we have had one of the best rainfalls in years in the Pecos valley.

PECOS BARGAIN HOUSE HAS BIGGEST DAY IN HISTORY

"We had the biggest day in the history of our store," said Mr. Norwood, partner in the Pecos Bargain House. "When we came down for business at 8 o'clock Saturday morning we found people waiting outside. The day opened with a boom and business increased until the lights went out Saturday night, when we closed the doors and let the customers out as fast as their purchases were made."

The store has been swamped with people all during the week, ever since the twenty-five hundred readers of the Enterprise saw the big ad in the paper.

The sale will continue another week and a prize of fifteen dollars worth of merchandise will be given away the last day to the customer who holds the lucky number, providing he is at the store at the time his name is called off. In case he or she is not, the drawing will proceed until some one answers to their name.

THE PECOS EPIDEMIC.

"Hey, Doc?" yelled a farmer to the family physician the other day, "what's this I hear about that new epidemic going the rounds in Pecos?"

"I don't know of any," said the physician, "Pecos people are well and happy and I haven't had a call for a week."

"Huh!" replied the sod-buster, "that's funny, I read in the paper the other day that there were 920 cases of Bevo in the city last week."

LEAP YEAR TO BE WITHOUT RESULTS

Designers of the doughnut, flour mixers and biscuit twisters remember that during this Leap Year of 1920, in your efforts to bring some love sick swain unto the altar, that even yet domestic science teachers casually admit that "good bread making is a fundamental household art."

In your efforts to reach the business eye of prospective husbands; it is known that a well made biscuit is good fish bait.

In this age of silver-tipped finger nails, dainty hands and painted cheeks, the art of turning out an apple dumpling with a batting average of 300 is rare indeed.

Many a young husband has turned a doubtful deal to a hundred dollar profit on no less a crust than that beneath an apple pie. While on the other hand a husband filled with a belly of doughy, poorly-made biscuits has lost as many as ten business friends in one afternoon as a result of a sour disposition.

But the amazing fact of all this is that doctor's tell us the race isn't healthy like it use to be and they now have many new diseases in their repertoire that were unknown ten to fifteen years ago. And practically all of these are stomach troubles and indigestion. Appendicitis was an unknown malady only a few spans back, since the days that Old Fashioned Mothers went out of date, and now that it is almost an epidemic we wonder if it can be due to the fact that fireless cookers, foreign domestic science courses, late hours and pink tea dancing parties have taught the young-would-be-married ladies everything but the good art of knowing how to mix a biscuit batter that will keep a sweet disposition in the mind of a husband. Rustic mothers tell us that it is a fact that the girls of today do not like to chase the dough around the bread pans like they used to in her day and age.

Those who anticipate taking advantage of this Leap Year, will bear in mind that the old axiom "the way to a man's heart is through his stomach" is just as true today as it ever was and a few hours spent in the kitchen each month may mean their own salvation when marriageable men get scarce.

Habitual Constipation Cured in 14 to 21 Days

"LAX-FOS WITH PEPSIN" is a specially-prepared Syrup Tonic-Laxative for Habitual Constipation. It relieves promptly, but should be taken regularly for 14 to 21 days to induce regular action. It Stimulates and Regulates. Very Pleasant to Take. 50c per bottle.

IRRIGATION FIGURES COMPILED FOR WARD

The director of the census announces, subject to correction, the following preliminary figures for irrigation in Ward county, Texas:

Acres to be irrigated by works either completed or under construction, 1910, 105,012 acres; 1920, 71,500 acres—a decrease of 31.9 percent.

Acres to which existing works are capable of supplying water: 1910, 28,712 acres; 1920, 37,000 acres—decrease 28.9 percent.

Acres irrigated: 1910, 16,406; 1920, 20,000 acres—an increase of 21.9 percent.

Acres available for settlement, to be supplied with water by works either completed or under construction: 1920, 49,600 acres

The figures given show a normal increase in the development of irrigated lands, with a considerable acreage still available for settlement. The decrease shown in the acreage to be irrigated by works either completed or under construction represents a shrinkage in exaggerated estimates of acreage to be irrigated rather than in development.

WEEKLY FINANCIAL REVIEW

Prepared for The Pecos Enterprise by the First National Bank in St. Louis.

The June crop report of the Department of Agriculture estimates the condition of winter wheat on June 1st at 78.2 percent of "normal" as compared with 79.1 percent on May 1st of 1920 and 94.9 percent on June 1st, 1919. The yield of winter wheat at present is estimated at 504,000,000 bushels or about 223,000,000 less than last year and about 60,000,000 bushels less than the average for the five years ended with 1918.

The spring wheat crop is estimated at 89.1 percent on June 1st as compared with 91.2 percent on the same date last year. The area covered by the spring wheat crop this year is put at 19,487,000 acres, a decrease of more than 16 percent from the acreage of last year for this crop. The indications on June 1st point to a yield of about 277,000,000 bushels. Taking both the winter wheat and the spring wheat crop together the indicated production for 1920 is 781,000,000 bushels or about 160,000,000 bushels less than last year. Should there occur any improvement in the wheat condition between June 1st and the time when the crop is ready for harvest the yield would probably be over 800,000,000 bushels which would make it better than "normal". While our wheat crop has been reported at a low condition all spring and with a reduced acreage there is nothing to indicate in the latest reports that the United States will experience any real shortage.

The present crop estimates, if materialized, would easily care for all domestic needs and leave a considerable amount available for export. In addition to this there is a considerable falling off in the export demand for wheat. This falling off is estimated at about 50,000,000 bushels from that of the previous year.

COUNTRY BOY IS NOT SO HEALTHY

Another worm has turned. For years our fathers have told us of the wonderful strength and perfect physique of the boys raised in the country. The trouble with these stories was that only the exceptional giants of the rural community were taken into consideration. The best records of recent years have been collected by the United States army in the physical examinations of service men. The records show that the number of young men, either defective or in need of medical attention, is from seven to twenty percent higher in the rural districts than in the cities. While there was an alarming number of men suffering from defective eyesight, under-weight and bad teeth, flat feet and other defects from the cities; the records were so much worse for the country men that the U. S. public health service instituted a commission to investigate.

The principal cause contributing to the physical unfitness of the country boy was due to not having any training in physical culture. They had simply rounded out according to nature without an effort to develop all parts of the body.

THIRD PARTY WILL FIGHT REPUBLICANS IT IS SAID

Dallas, June 23—The declaration by Amos Pinchot, member of the committee of forty-eight, that there positively would be a new party presidential candidate in the field, rumors that LaFollette would head the ticket and announcement that the Harding campaign will be started promptly were the outstanding developments following the Republican convention.

Pinchot in a statement declared "the Republican party has driven out of representation in its political councils millions of voters who followed Roosevelt, Johnson and LaFollette," and the new party will represent these voters, and "promise a genuine constructive program." LaFollette's reports, in some instances, linked with the committee of forty-eight.

SIPE SPRINGS REPORTS ON FOUR PRODUCING WELLS
Sipe Springs, June 22—It is with much interest that we learn that the C. H. Oil & Development company recently acquired through purchase, some 500 additional acreage of oil lands in Comanche county, known as the Sipe Springs field. In this acreage there is one tract with four producing wells, and the production from these four wells will within a short time enable the company to pay dividends on their capital stock.

The Time to Buy

is on a depressed market, and the time to sell is on a boom. The oil and gas market is at a low tide now, but will not be so much longer. If you are in the market for oil and gas leases now is the time to buy.

I have a few well-located leases on patented land with good title at a price that will double in value in the next sixty days.

Pecos property is a good buy at this time. I have some well-located business and resident lots at a bargain.

I have been in the land business in Pecos for about fourteen years and know the value of every section of land in Reeves County.

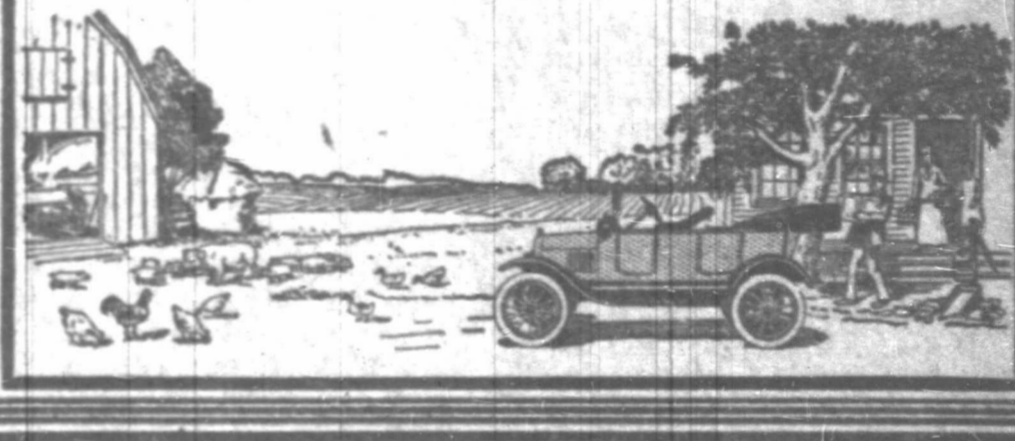

J. W. MOORE

THE UNIVERSAL CAR

Out of the more than 3,000,000 Ford cars now in use, about sixty percent have been sold to farmers. Probably no other one thing has brought to the farm so much of comfort and profit as has the Ford car. It has enlarged the social life, doubled the facilities for marketing, brought the town next door to the farm, multiplied for the farmer the pleasures of living. A family car without an equal in low cost of operation and maintenance. We solicit your order for one now because the demand is large and continually increasing.
