

DAVIS MOUNTAIN COMMITTEE AT WORK

The appointment of committees from the Senate and the House of the Texas Legislature to visit the Davis Mountains, and a meeting of the committee in charge at Fort Davis to perfect plans for the trip were the important events in the State Park and game preserve plan during the past week.

The visit has been indefinitely postponed by the action of Governor Neff in calling a another session of the legislature. Reports from Austin are to the effect that ten days or more will be required to complete the work at hand, and this will keep the legislators at Austin until August 27, or later. As it is anticipated that the legislators will desire to visit their homes before coming to the mountains, it is probable that the trip cannot be until some time in September. A wire from Representative Stewart of this district received Friday stated that the extra session may delay the trip for thirty days.

Speaker Thomas, Lieutenant Governor Lynch Davison and Land Commissioner John T. Robinson will head the committee. The senators named are R. M. Dudley of El Paso, A. O. Wood of Williamson, and John A. Bailey of Dewitt. Those from the house are Representatives Hall of Harris, Shearer of Galveston, Seagler of Palestine and Newt H. Williams of Waco.

A meeting of the special committee in charge of arrangements for the trip was held at Fort Davis on Wednesday when additional details for the trip were planned. It has been definitely decided that the party will gather at Pecos, and will have breakfast here. They will then go to Balmorhea on a special train over the Pecos Valley Southern, where dinner will be served, and after which the party will go to Madera Canyon on the Kingston ranch where they will spend the night. Cherry Canyon and Madera Canyon will be explored the first day and the second day will be spent in the Big and Little Ajuga canyons. The party will go through Limpia canyon to Fort Davis the third day, and will camp that night at the foot of the mesa north and west of Fort Davis and will spend the fourth day exploring that point. From this mesa the panorama of all the canyons visited previously can be obtained.

The fifth day is to be spent in exploring other points of interest in that vicinity and in visiting Marfa. On the sixth day the party will be taken through Mequiza Canyon to Alpine, where they will board the trains for home.

The committee has requested that Reeves county furnish four automobiles for the trip. These automobiles will be used only on the trip from the camps, as much of the sightseeing must be done from horseback or on foot. The cars will not be asked to go into inaccessible places. The committee proposes to furnish gasoline and oil for the trip from funds raised to defray the expenses of the trip, and also food for those furnishing automobiles.

The counties of Davis, Presidio and Brewster will furnish similar quotas. Efforts are being made to secure army camping equipment from the station at Marfa.

It is expected that the party will be composed of close to fifty people. There will be eleven members of the legislative party, and it is expected that about ten newspapers will be represented by staff writers. In addition the local committee and car drivers will go with the party, and the railroad representatives are expected to swell the number.

The expense of the trip has been estimated at about \$450 and this is to be prorated among the four counties interested. Some additional expenses have been incurred, which may make the total sum to be raised exceed that mark.

Food is to be dispensed from a chuck wagon, which wagon will precede the party to the camping place and have the meal prepared by the arrival of the party. Lee Kingston is to be in charge of the arrangements for the meals and camp.

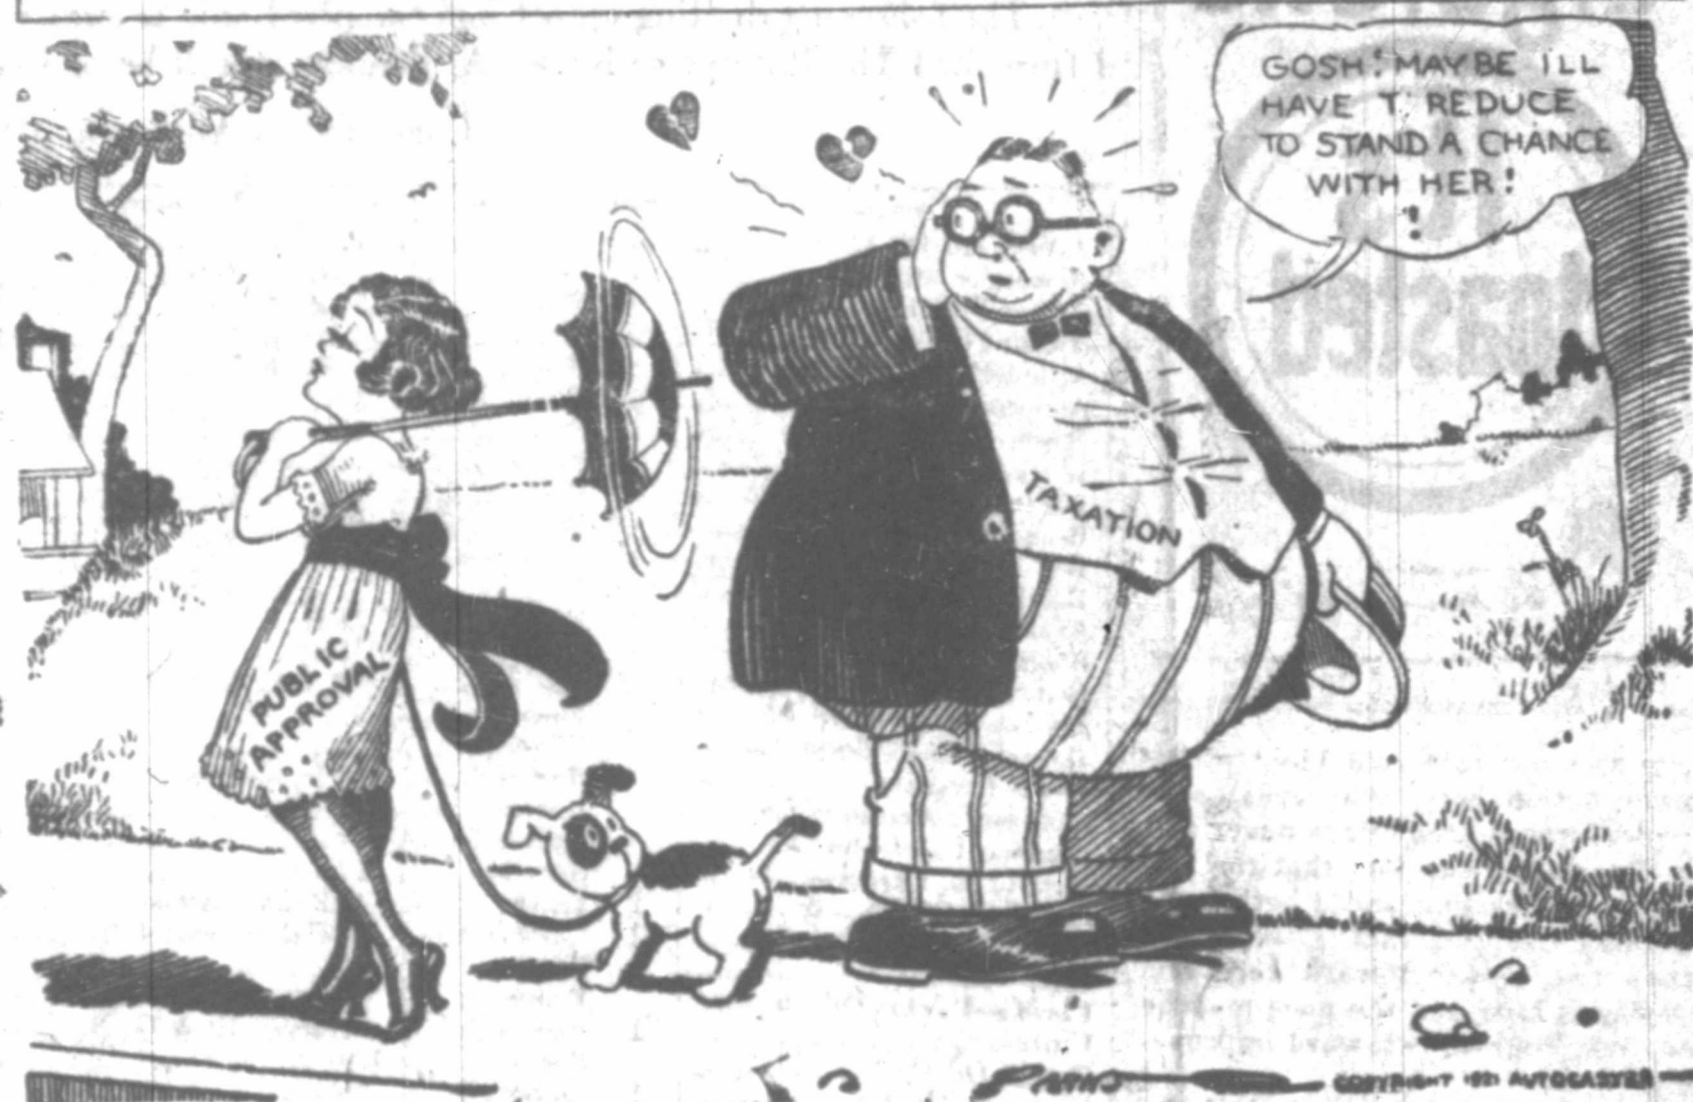

E. L. COLLINGS RAISING FINE FIGS

E. L. Collings this week brought to The Enterprise office two figs of mammoth size grown on his trees at his home. They were of a large variety, perfectly developed and finely flavored. Mr. Collings has two of these trees, which are now, and have been for two weeks, furnishing the family with all they can use.

On Wednesday morning he picked more than a half gallon of ripe figs from these two trees and expects to perform this operation every morning from now until frost, except that luscious fruit get out the cost of living.

With a little care every family in Pecos could raise their own figs and not only have plenty of this most desirable supply will increase as the weeks go by.

"NOBODY LOVES A FAT MAN"

SARAGOSA WELL UNDERREAMING

The Toyah Shallow Oil Company is underreaming from the ground down on its Saragosa well, in order to set casing at 330 feet. Considerable trouble with the machinery has taken much of the drilling time. This company is seeking production from a shallow sand found by the El Paso-Saragosa at 438 feet but which that company was unable to develop. Toyah Bell Finds Gas At 3700 Feet.

TOYAH BELL FINDS GAS AT 3700 FEET

Considerable headway has been made in the Toyah Bell No. 2, during the past week, and the drill was rapidly approaching the 3800 feet mark late this week. A pocket of gas found at about 3700 feet created considerable excitement, as this flow was strong enough to be felt above the casing, and was accepted as another of the many indications that the well was on a favorable structure for oil production.

An eighteen foot stratum of salt was also encountered near the gas and this was accepted as an indication that the expected break into the Pennsylvanian formation was near. This belief is in accordance with the reports of geologists on this well. The drill has been working in oil saturated formation practically all this week, and at the last reports was in an exceedingly hard formation. This well is the deepest in the field.

MARRIED

On Tuesday of this week in Dallas Macy Haygood and Mrs. Will Ligon were married and will make Dallas their home. Macy is a son of Mrs. A. L. Haygood, was a veteran in the recent world's war having served with the American force over seas and recently went to Dallas to accept a position. Mrs. Ligon is a daughter-in-law of Mr. and Mrs. Lee Ligon, with whom she and her little son, Kellough made their home during their stay of the past few years in Pecos. She has held a position with the Pecos Dry Goods Company for some time and recently went to Fort Worth to visit a sister. The Enterprise joins the many other friends of this happy couple in wishing for them much joy and prosperity.

SAMUEL BRAZEAL DEAD

Samuel Walter, the little five months old son of Mr. and Mrs. Walter Brazeal passed away Saturday afternoon at two o'clock. Funeral services were held Sunday afternoon at four o'clock at the Christian church, after which burial was made at Fairview cemetery. Rev. H. L. Magee conducted the services. An unusual and interesting feature was that the pall bearers and flower bearers were little girls, prettily dressed in white, and were as follows: Gladys Lawson, Ruby Stephens, Vela and Vesta Day, Auline Stephens, Hettie Lois Randala, Elsie Lou Hamilton and Mildred Porter. The pretty little white casket was tenderly born by these little sympathizing friends, and the mound was piled high with floral offerings, mute testimony of sorrowing friends. Mr. and Mrs. Brazeal have only been in Pecos a few months, coming here from Big Spring and Mr. Brazeal has been confined to his home for several weeks with fever. They are good people and have made many friends in Pecos during this short residence here with whom The Enterprise joins in sympathy in this their bereavement. There are surviving in the home three other children, a small son and two little daughters.

HELEN S. TO STANDARDIZE

The Texas Drilling & Development Company is planning to erect a standard rig over the Helen S. located just Southeast of the Bell No. 1, and E. L. Anderson, their representative in this territory is now seeking to make arrangements for moving a string of standard tools to the location.

The hole has been put down to 1030 feet, but difficulty in handling the casing with the small machinery available due to the many water strata found, had made progress in recent weeks very slow.

A similar experience has been encountered by the Los-Pecos Syndicate, and it is understood that Arch Bell, the field manager, is to return from Los Angeles in the near future to erect a standard rig over that hole and resume operations from 920 feet.

JUDGE HUBBARD'S BEAUTIFUL FARM

On Wednesday afternoon the editor had the pleasure of a visit with Judge Hubbard to his splendid 120 acre farm just above Barstow in Ward county. A good deal of the acreage on this splendid and beautiful farm is in long staple cotton which is heavily laden with fruit and which, it is estimated, will yield at least a bale to the acre. The hall played havoc with a perfectly good stand of cotton on this land, which otherwise would more than likely have produced two bales per acre. Besides the cotton there is a splendid alfalfa crop which has yielded bountiful crops and some of it is now maturing a splendid seed crop. This farm lays on either side of the main canal and a beautiful home is located among a grove of stalwart cottonwoods with lovely driveway and plenty of water running everywhere. To be sure, the Judge raises plenty of other feed stuffs and has a very valuable as well as beautiful farm which almost, if not quite, make one envious to behold.

E. Guzman is in charge and has all crops as clean as a garden and the place as a whole shows most excellent care and that it is in charge of a most faithful caretaker who was not born tired and has not up to this time become too tired to keep the weeds down. Mr. Guzman was kind enough to supply the party, which consisted of Andy Anderson, A. B. Clair, Judge Hubbard and the editor with a bountiful supply of fine water-melons and cantaloupes which were large and very finely flavored.

LAURA HALTED FOR DRILL STEM

The Laura well has made good headway the past week but before they can do much more will be forced to have another drill stem to take the place of the one they are now using which has become disabled. The well is in fine shape and the oil showings as fine as could be desired.

MRS. MILLER SUFFERS PARALYTIC STROKE

The many friends of the family will be grieved to learn that on Monday afternoon Mrs. R. E. Miller suffered another paralytic stroke, the principal trouble being in her throat. She is in a critical condition.

It will be remembered Mrs. Miller spent some time in California last year for her health and was improved, but she has not been well for sometime. The many friends of the family will join The Enterprise in extending deepest sympathy.

C. H. WILLOUGHBY GETTING READY

C. H. Willoughby reports that all the geological work, surveying and title work is fully completed on the lands in Northern Loving county and that he will very soon be moving machinery onto his location. A well is to be drilled to commercial production or to at least 3500 feet if necessary to go to this depth but both the geologist and Mr. Willoughby feel confident that a big production will be had around twenty-one to twenty-five hundred feet. The structure is clearly outlined and no mistake can be made as to a correct geological location and for the first time Mr. Willoughby ever allowed us to quote him on his opinion of production as registered by the magnet he uses in location oil, he says that over quite an extensive area the magnet registers fully as strong as the very best in Ranger or any of the many large wells over which he has worked in Oklahoma and believes that a production of from ten to fifteen thousand barrels will be secured. As yet the exact location is not to be known but with a few minor details taken care of Mr. Willoughby promises to invite Pecos and the good people of the Pecos country to go with him to the location, see the structure and a demonstration of the magnet over really big production.

INSTITUTE ON 12TH PUBLIC SCHOOL 19TH

Prof. P. J. Rutledge informs The Enterprise that the Teachers' Institute will open in Pecos September 12th and a week later or the 19th of September, the Public school will open their 1921-22 session.

The Enterprise understands that all schools in Pecos will open with the opening of the public schools on September 19th. This includes Mrs. H. H. Johnson's kindergarten class as well as the music classes of Mrs. Lillian Butler and Miss Marjorie Smith.

Teachers for the Pecos Public school year 1921-22, are as follows:

- P. J. Rutledge, Pecos, Texas.
- R. N. Normap, Pecos, Texas.
- Mrs. J. W. Brooks, Pecos, Texas.
- Miss Mary Nelson, Pecos, Texas.
- Joe B. Humphries, Point, Texas.
- Miss Myra Hilliard, Marshall, Texas.
- Mrs. Lillie Cole, Pecos, Texas.
- Miss Annie Hope, Sweetwater, Texas.
- Miss Minnie Blackmon, Waco, Baylor University, Texas.
- Miss Lula Womack, Eldorado, Texas.
- Miss M. Belle Groves, Fort Worth, Texas.
- Miss Clara Rutledge, Weatherford, Texas.
- Miss Ora Wilson, Llano, Texas.
- Miss Velma Womack, Eldorado, Texas.

TO RIDE BUFFALO AT PECOS RODEO

An opportunity to ride a wild buffalo bull caught on the Cooksey Ranch will be given all broncho busters who attend the Pecos Rodeo to be held next Thursday and Friday on the aviation field grounds under the management of Albert Cooksey. Forty entries in the Rodeo are expected.

In addition to the rodeo event Carlsbad and Pecos are to play three games of base ball, the first on Wednesday afternoon. These games will start at 5:30 o'clock at the ball park.

MORE POTASH FOUND IN LOVING COUNTY

Continued potash showings in the Pinal Dome Oil Company's Loving county well have proven sufficiently interesting to keep Drue D. Christner, field representative of the U. S. Geological Survey at the well most of the past week, and gives rise to the belief that at somewhere near this point the heaviest bed of potash in West Texas will be located.

Potash in the form of polyhalite has been found in this well in layers of various thicknesses from 925 to 1700 feet, and these formations were still being uncovered by the drill. The potash is found in the salt beds in alternate layers of white rock salt and the red potash salts, and in such quantities that it is an accepted fact that it can be mined profitably.

No government reports as to the quality of this potash have been received, although the samples are being sent in, and the report will probably not be made until after the formations have been entirely passed through, and the full extent of the bed determined. However the samples appear to be much heavier in potash than those of other wells in this vicinity, and it is understood that they show an astonishing percent of potash.

As the thickest and most shallow beds of potash discovered in West Texas wells have been found in the River well of the Arthur-Pitts Company in Ward county, twelve miles east of Pecos, and in the Pinal Dome well, about twenty miles east of the Pecos River, it is the general belief that the heaviest beds of this formation will be found along the western edge of the Panhandle plains salt beds, which logs of drilling wells showed at points near the east bank of the Pecos River.

The discoveries in this section have proven so much greater than the first discoveries in the territory around Odessa and Big Spring, that the greater interest in the new discovery has been transferred to the western edge of the district.

A. W. C. Phalen, representing large eastern interests who manufacture soda and allied products, has been in the field inspecting the discoveries and has returned to his headquarters in Syracuse, N. Y., to report.

Mining men have also expressed an interest in the matter, have inspected samples and are watching developments with a view to entering the development game as soon as a definite conclusion can be reached.

The general opinion of these mining men is that the best method of mining the product would be to sink a shaft. When the discoveries were first made at around 1800 and 2400 feet east of Odessa and Midland, the great depth and the thin formations caused predictions that the best method would be to mine the product by means of steam, much as salt and sulphur are mined in other districts. However, the conditions in the western end of the field make a shaft desirable.

It is estimated that a shaft can be sunk for \$100 per foot sufficient to enable mining operations to be carried on, but before this is resorted to diamond drill operations would explore the territory and determine the best point to sink the shaft. Thus an expenditure of at least \$200,000 would probably be necessary before actual production could be started, while machinery would have to be devised to separate the potash from the other salts. The common rock or table salts could be utilized as a by product.

Many estimates as to the market for this product in the United States have been made, and the Chamber of Commerce has written to the government bureau and the United States Chamber of Commerce for statistics regarding the market.

Potash is used in the manufacture of explosives, and for fertilizers. Big acreage will be necessary for a company to properly finance itself for the production, and the general opinion is that the land grants could be obtained under terms similar to those given in other mining communities. The state of Texas offers state land for prospectors for potash with the stipulation that five percent of the gross sales revert to the state and that the state bear none of the expense of production. As the greater number of the oil and gas leases do not carry mineral rights, a great area is open to prospectors.

C. W. GIFFIN DEAD

A message was received Thursday morning from Sabinol from Willie C. Giffin by R. S. Johnson announcing the death at 9:03 o'clock Thursday morning, August 18, of his father, C. W. Giffin. Thus passes a man who had helped to build up Reeves county and in doing so made friends of all with whom he had dealing.

The many Reeves county friends of this most estimable family extend to the bereaved wife and children sincere sympathy.

TRANS-PECOS HAS FINE OIL SHOWING

The Enterprise editor had an invitation to accompany Attorney W. W. Hubbard, to the Trans-Pecos well over in Ward county Wednesday. He was delighted to go and the trip was well worth the time. This was the writer's first visit to the "Melita" well of the Trans-Pecos Oil Co.

There Mr. O'Reilly showed us one among the finest rigs in the entire Pecos field. The yard was clean, the posts enclosing the drilling site were painted, the derrick of the Standard build, strong and durable and in splendid repair, as was all the machinery. The engine which drives this machinery is one of the first gas engines to be installed in the field to propel the machinery of a well drilling outfit and is 125 horse power and works as perfectly as a clock and according to Mr. O'Reilly has paid for itself several times over already in a saving of time and money.

The Trans-Pecos people have had many handicaps since starting this well in the way of failure to get prompt shipment of casing and tools and in handling the water and quick sands encountered therein but in B. J. O'Reilly the company has a real red blooded man, capable of taking care of any trouble which may come up. He is a tireless worker and many has been the time when he was busy hauling supplies, repairs and casing to the well until the wee sma' hours in order that work of boring might not be stopped, and he is still working in the same manner. Is it any wonder that such an one should at last be forced to believe that his labor has not been in vain?

At approximately 1000 feet another strata of oil bearing sand with a heavy gas pressure was struck on Tuesday afternoon of this week and the showings were so excellent that the manager invited the editor and a few of the friends of the Trans-Pecos to come out and see. They went and to say the least were not disappointed. They were drilling in a shale and sand when the oil was struck and the showings were unmistakable—plenty of pure oil covering the entire shaft as it was run into the pit. Although during the night the casing had dropped of its own volition, some six to ten feet and practically cut off the sands which were making such a beautiful showing Tuesday night, there was still enough oil and gas showing to convince the editor and others that the Trans-Pecos Oil Company have good reason to keep on until they reach the mother pool which undoubtedly is not far distant and beneath the present depth. It was a fine showing of both oil and gas, which did not detract in the least from the faith of those present that they have real oil property.

Judging from the showing of oil already encountered and comparing with the surrounding wells, the owners believe that they will get a real oil well something like a thousand feet shallower than other wells in the same vicinity. It is the belief of oil men who visited the "Melita" while the editor was there that could the water be cased off and the sands tested they now have a fairly good oil well. While The Enterprise will not quote Mr. O'Reilly as saying so he understood that it is the belief of Mr. O'Reilly and his associate, Mr. McCoy that they will get still another sand only a short distance deeper in which it is believed they will be able to produce a gusher.

The Enterprise has found Mr. O'Reilly to be very conservative and at no time has he ever tried to "load" the editor as regards his well, but on the other hand, so far as the editor knows, has always put his estimate of the showings below those of other oil men who inspected each showing they have had.

BELL TO RESUME DRILLING MONDAY

For the third time water has broken through the mud shut-off in the Bell No. 1, and an exceptionally heavy mixture of mud laden fluid was pumped into the well late this week and was to be allowed to set until Monday before being disturbed.

A heavy gas pressure had at the bottom of the well is the only reason advanced for the difficulty in obtaining a shut off, as the casing is resting on a good lime formation, and it is believed that the gas keeps the mud disturbed so that it does not settle sufficiently to be impervious to the water coming from above in the well.

The hole is still at 1995 feet in depth, and the drill was stopped in a formation that gave off considerable gas, and which had such favorable signs for early production that it was deemed advisable to shut out the water at all costs before drilling on in order to be in position to handle the production when it is found.

GENUINE "BULL" DURHAM tobacco makes 50 good cigarettes for 10c

OH, WHERE IS MY (GIRL) BOY TONIGHT?

Parked on Polk Street Saturday evening was a coupe car in which were two young men and two young women the latter seated upon the laps of the former.

No, they were not married, nor were they brothers and sisters. They were sons and daughters of some fathers and mothers, and therefore entitled to care they were not receiving, society as a whole, as well as from their parents or guardians!

Did you see them? They were not difficult to see nor were they seemingly embarrassed by reason of their attitude there on the city's most prominent street!

If these girls had been your girls instead of the girls of some other parents, what would be your attitude about it?

While Amarillo has no monopoly on it, there is a polite laxity of moral attitude and standards here that is detrimental to the best interests of society. This is largely a result of the prevalence of a fact: "What's everybody's business is nobody's business."

It is not necessary that reference should be made to the undesirable physiological effect of such action as young people sitting in each other's laps, when both sexes are involved. Men and women know the evils of this character of conduct, and they likewise know that it should be stopped in the interest of society at large.

When reference is made to an incident on Polk Street, let it be known that while this is a fact, and not a fanciful sketch, it is by no means an isolated case. On the other streets, on the country roads, on the inside of fenced enclosures in close proximity too, and in points more remote from the city, these things are witnessed, and always to the detriment of the community.

Girls of tender years, mere children who are not out of the grades in the schools in some instances, it is reported dress and deport themselves in a manner formerly attributed to hardened brazen women of the streets. With carmine lips, rouged cheeks, with betwizzered eyebrows, with frowned hair, with the swagger of daring attributes of the public characters, invite attention to the coarse, grosser members of the opposite sex.

In view of these facts, and they are facts, and only part of the more repellent facts at that, what are the parents, the teachers, the ministers, the publicists going to do about it?

Yes, we must admit that this is not very polite, not an over aesthetic matter to place in print, and yet The News feels that it has a duty in connection with the public morals, and particularly as to those dangerous attitudes affecting the young life of both sexes. It is for this reason that this newspaper dares to bring the existing undesirable state of affairs in this manner, to the minds of those who are concerned for the welfare of the community.

Amarillo has a duty to perform in the interest of public morals—duty that is not being discharged at present. Question: What are we going to do about it?—Amarillo Daily News.

Yes, it is an awful condition! The statements made in the article above regarding Amarillo can be duplicated

in Lubbock, and it is only a matter of time till some dire calamity will befall some of Lubbock's young people, in fact it has already befallen some of them, but others will be in the same awful predicament if the parents of the young folks of this community do not show more concern regarding their boys and girls.

The same capers are pulled in Lubbock as in Amarillo. The parents seem unconcerned. They allow their girls to frolic till a late hour with young men, and auto ride till late in the night, and they seem to care nothing about them further than to turn them "hog wild" and let them ramble.

They seem to think it nothing wrong for their girls to go to the dance halls, auto ride and attend base ball games, races or what not. They let them go when they want to and where they want to, and what they are sowing now will reap a harvest of heartaches or we will be badly fooled.

The days of restrictions are no more! Many parents know nothing about where their children are, or where they are going when they leave, they guard not their characters, because they are not careful who they go with or how they go. Never in the history of our lives have we seen conditions just as they are at present, and we offer this as a warning that many hearts will be broken as a result of the seed that is being sown now.

Take this for what it is worth, but parents you should think! Think deep and long! Think far into the night, and concern yourself now as to where your girl is, and call a halt. It is time!

This bit of prophecy: If something is not done you will regret it. Trouble is sure to come. Will your home be undisturbed? Will your good name be blighted? Will it? It will if the breaks are not applied and that immediately on some of the girls of this town. They are going entirely too fast! Slow down! Ladies! Be nice! Be modest! Be refined!—Lubbock Avalanche.

THE BUSINESS SITUATION

The Wall Street Journal makes the following observations on the business situation at the opening of August, which are worth passing on:

"Business, at present, is like a great river whose surface is exposed to opposing winds and cross-currents, making the waters to appear as if standing still, or perhaps going backward. Yet, underneath the surface the main body is slowly moving onward."

"Complete business recovery must be preceded by an equalization of prices for commodities and services. The workings of economic law must be depended upon to bring this to pass. Its processes are always slow, and in the present readjustment many hindrances have been put in its way. The tenacity with which labor unions have clung to their inflated schedules and retailers to prices out of all proportion to a fair profit, are illustrations. However, all hindrances are gradually weakening in their resistance."

"The price index is steadily moving toward an equality in the different groups and of different members of a particular group. The lists of commodities that for so long time resisted deflation is becoming less and less. With the gradual passing away of the period of price uncertainty a great obstacle to the making of forward commitments is being removed."

"Production of goods does not equal consumption and we are eating into the stocks that a year ago seemed so burdensome and gave rise to the term of 'frozen credit.' Fundamental to this is the increase purchasing power of the farming communities. Last season the farmers listened to the agitators preaching the doctrines of discontent, and lost thereby. Now they are marketing products as rapidly as they can, paying debts and creating a better mercantile and banking situation. Increase of consumption over production brings us nearer to the time when there must be a larger resumption of industry to satisfy domestic needs."

"In due time the saving in railway wages must be reflected in increased buying by the roads which, in the last analysis, means the employment of more labor and the use of more raw materials. There is countrywide hope that Congress will not delay the President's railway plan, for its speedy adoption would be another forward movement toward recovery."

"European demand is the balance wheel to American industry, and for a time it functioned unsteadily. But compare present conditions with those of a year ago and see what a change for the better. Even Bolshevism, Communism and German reparations no longer hang like a black shadow over the world. The contrast is wonderful in every way."

"When the Bank of England reduc-

LUCKY STRIKE cigarette

The Famous Gherkin

ed its discount rate coincident with a similar action here, that great seed, Finance, whose predictions never fail, was chronicling the fact that the former era was closing and a better one beginning. It told that Europe had turned the corner toward recovery. The way is long and the pace may be slow, but progress is toward improvement."

All of which is justified by the facts. It may not be much consolation to say that the worst is past. But it is the plain truth, and the strong man who faces conditions as they arise and makes the best of every situation will be gratified over the fact.—Fort Worth Star-Telegram.

During the first five months of 1921 there were 7,716 business failures in the United States as compared with 2,678 for the corresponding period of 1920. An expert statistician estimates that at present there are about three million persons ordinarily employed in industries in the United States out of employment. It has been demonstrated that the family of a man who has employment consumes three times as much of the things people eat, wear and use, as it does when the head of the family is out of employment. Latest information indicates that the number of unemployed has probably reached the maximum and that unemployment is now on the decline.—Shattuck (Okla.) Monitor.

GOVERNOR BROUGH ON LECTURE TOUR

Special to The Enterprise. Birmingham, Ala. Aug. 15, 1921.—Gov. Chas. H. Brough, of Arkansas, President of the United States Good Roads Association, who has been critically ill for the past five months, has fully recovered from his illness, and is now on a six week's Chautauque engagement through Missouri and Iowa, and will deliver more than forty addresses.

Governor Brough is one of the most eloquent public speakers in the country. He is an enthusiastic good roads advocate. On his tour through the West he will deliver a number of addresses on good roads, and will urge representation at the tenth annual convention of the United States Good Roads Association which will meet in Phoenix, Arizona, April 24th to 29th, 1922.

Governor Brough has written to Director General Rountree, expressing his regrets at not being able to attend the Greensboro meeting, and also telling his plans. Governor Brough's letter is dated from Franklin, Kentucky, where he is now visiting relatives. He writes as follows: Hon. J. A. Rountree, Director General, U. S. Good Roads Association, Birmingham, Alabama. My dear Mr. Rountree—

Will you kindly express to the members of the Chamber of Commerce of Greensboro, North Carolina, and to the citizenship of that Convention my sincere regrets that a very critical illness of five months' duration prevented me from attending the meeting of our Association there last April. This is the first opportunity I have had, other than by telegram, to express my regrets to the progressive citizenship of Greensboro, because my illness was so critical, and the period of convalescence necessarily long.

I am delighted to tell you, and through you, other friends in the good roads movement, that I feel like my old self again, and, beginning next Monday, at Canton, Missouri,

will undertake to fill a six week's engagement through Missouri and Iowa, delivering forty-three addresses during the tour on the theme, "America's World Leadership." On my tour, I shall be glad to invite the public to attend the tenth annual Convention of the United States Good Roads As-

sociation at Phoenix, Arizona, April 24th to 29th, 1922. In my lectures, I shall also refer to the all absorbing question of good roads, which is so important to the nation.

Your good letter was received this morning and I was delighted to hear from you again. You have done a

wonderful work in behalf of good roads in the South, and I believe the next few years will emphasize the value of the good roads movement more than ever before.

With kindest personal regards, I am your friend, CHARLES H. BROUGH.

DRILLING REPORT

The following drilling report was compiled and is accurate, according to best information, and was furnished The Enterprise by W. A. Bennett, and will be of much interest to the public. Corrected to August 5, 1921.

Table with columns: Company, Well, County, Sec., Township, Block, Depth, Remarks. Lists various drilling operations across different counties and townships.

The above list does not include many shallow wells in the Toyah field, and only those in actual operation in the Pecos Valley field. I know of no oil field that at the same stage of development (20 months) that had so many active operations, and the fact is certain that some of these operations will go into them when they get deep enough, which may be anywhere from 2500 to 4000 ft. Great Oil Company, Pecos County, putting on power to pump 29 wells on one line.

To Cure a Cold in One Day Take LAXATIVE BROMO QUININE (Tablets). It stops the Cough and Headache and works off the Cold. E. W. GROVE'S signature on each box. 25c. (Advertisement)

CONDITION OF TEXAS CROPS TO AUGUST 1

The following figures are representative of conditions as of August 1, 1921. By E. M. Johnson, Agricultural Statistician.

Corn.

Present prospect show a condition of 86 percent of normal for corn which is indicative of a yield of 22.79 bushels per acre and a production of 174,070,000 bushels for the state.

With the exception of the Panhandle and the Coastal belt the two last weeks of July were dry and clear and though very late corn and June corn has suffered a little on this account on the whole it has been beneficial by allowing for the proper maturity of the bulk of the crop and in the storm sections where some fields were prostrate it has been very beneficial.

Wheat.

The average yield of winter wheat is set at 10 bushels per acre making the state's production 17,610,000 bushels. Some storm damage has affected the grade and rains during and after harvest have caused some losses. The average quality is 86 percent where 100 represents a high medium grade.

Oats.

The condition of this spring crop is set at 56 percent of normal this condition figure including abandonment. The percent of the 1920 crop remaining upon farms is 4 percent of the crop of that year or 1,764,000 bushels.

Barley.

Based on a 68 percent condition, barley production will total 211,000 bushels. The percent of last year's crop remaining on farms August 1st, is estimated to be 2 percent of the crop of that year or 5,060 bushels.

Rye.

The average yield per acre is 12 bushels per acre making a total state production of 36,000 bushels. The quality is high being rated at 95 percent where 100 percent represents a high medium grade.

Hay.

The acreage of all tame and cultivated varieties of hay for harvest is 688,000 or 104 percent of that of last year; and wild hay acreage is practically the same as last year's acreage or 203,000 acres. The condition of all hays is 93 percent of normal which is equivalent to an average yield of 1.55 tons per acre for tame and 1.16 tons per acre for wild hays which gives a prospective production of 1,066,000 tons of tame and 235,000 tons of wild hays for the state. Generally it has been an excellent

year for hay with abundant rain during the growing season and comparatively dry near harvest. For wild hays on the coastal plains showers have interfered with harvest somewhat.

Rice.

Throughout most of the belt the rice crop is in a promising condition with an average condition figure of 87 percent of normal equivalent to an average yield of 33.93 bushels of 45 pounds per acre. Some slight maggot damage has been reported from the Beaumont section but this is the only section reporting damage from any cause. Much of the crop is on new land and harvest already started for the early plantings. Present forecasts a 5,246,000 bushel crop.

Peanuts.

Peanuts have improved two points since the last report and are estimated at 85 percent of normal, indicating an average yield of 26.78 bushels per acre average and a production of 5,222,000 bushels from the 195,000 acres under this crop.

Peaches.

The condition of peaches remains the same as last month which is 55 percent normal condition and forecasts a production of 1,681,000 bushels for the state as a whole.

Apples.

The condition is 47 percent of normal and indicates a production of 341,000 bushels for the state.

Grain Sorghums.

Conditions have been generally well suited to the full maturity of this crop. The Panhandle has had sufficient moisture throughout the growing period. The crop is now matured and its condition indicates an average yield of 28.71 bushels per acre and a total production of 59,085,000 bushels for the state. Market movement has been sluggish.

Other Crops.

For other minor crops the average condition is as follows: Sweet potatoes 85; alfalfa 87; millet 87; pasture and ranges 91; field peas 85; field beans 86; tomatoes 82; muskmelons 82; watermelons 80; sorghum cane for syrup 82; pears 59.

IN TIMES LIKE THESE

In a half dozen different instances lately we have seen expressions from business leaders, financiers and others in magazines and newspapers to this general effect:

The foundations of fortunes are laid in times like these.

And it is the truth.

Innumerable cases from the past can be cited to prove it.

Many a young man who has not a dollar today, but who within the next

ten or twenty years will become independent financially, will look back to the times through which we have been passing as the beginnings of success.

For it is not in boom times that men usually make a real start. In such cases the reaction is too near in the future and the progress they make during a boom too frequently is undone when the reaction comes. There are exceptions to this, to be sure. But we are not talking of exceptions. As a rule it is true that in times like these, immediately after the reaction, and when things begin to look again that most men lay the solid foundations of their success. But more than that, many a man who gains only a moderate competence in life but does not become rich in a material sense, dates his start from such times as these.

If you are holding a job now, even though your salary has been cut, you may be sure that you possess one of the essentials of success. If you are out of a job, but not discouraged; if, on the contrary you are determined to grab a job and make good as soon as things get a little better and are doing your best in the meantime you possess one of the essentials. With such material you can lay the foundations of your future success.

It is the fellow who cannot stand the gaff, who says that the game is all wrong simply because it is not all going his way, who takes a long step toward failure in such times as these.

Whether you are a young man in a more or less humble position, or a business man who has been hit by the recent depression, your future success will be determined by how you are acting now and what use you are making of your opportunity.—Fort Worth Star-Telegram.

A BOTHERSOME DISEASE.

Film: "Are you ever bothered with rheumatism?"

Flam: "Yes, continually. My friends are forever telling me about theirs."—Life.

A TONIC

Grove's Tasteless chill Tonic restores Energy and Vitality by Purifying and Enriching the Blood. When you feel its strengthening, invigorating effect, see how it brings color to the cheeks and how it improves the appetite, you will then appreciate its true tonic value.

Grove's Tasteless chill Tonic is simply Iron and Quinine suspended in syrup. So pleasant even children like it. The blood needs QUININE to Purify it and IRON to Enrich it. Destroys Malarial germs and Grip germs by its Strengthening, Invigorating Effect. 60c.

Everything for QUALITY —nothing for show

THAT'S OUR IDEA in making
CAMELS—the Quality Cigarette.

Why, just buy Camels and look at the package! It's the best packing science has devised to keep cigarettes fresh and full flavored for your taste. Heavy paper outside—secure foil wrapping inside and the revenue stamp over the end to seal the package and keep it air-tight.

And note this! There's nothing flashy about the Camel package. No extra wrappings that do not improve the smoke. Not a cent of needless expense that must come out of the quality of the tobacco.

Camels wonderful and exclusive Quality wins on merit alone.

Because, men smoke Camels who want the taste and fragrance of the finest tobaccos, expertly blended. Men smoke Camels for Camels smooth, refreshing mildness and their freedom from cigarette aftertaste.

Camels are made for men who think for themselves.

THE AMERICAN PRESS ASSOCIATION

BEGINS NEW YEAR

With this issue The Enterprise enters upon another year. For eight or more years the writer has guided the destinies of The Enterprise and starting in with a very modest country print shop has built it up until now it is modern in every way and those away from home who view the plant are most agreeably surprised to find a printing plant which is really outgrown the town. Few, if any Texas town the size of Pecos can boast of as good a printshop.

All this has been accomplished not alone by the writer but by the hearty cooperation of the very best business men of Reeves county who were and are alive to the value of one real newspaper and printshop which is a credit to the town and is admired and praised by all outsiders who see it, rather than two or three junk shops and papers which would hardly do credit to a country cross road town with half a dozen stores. To its patrons is due the success of The Enterprise—to those who patronize it with their advertising as well as their job printing. They are the ones who are responsible for having one among the best weekly papers in the entire State right here in Pecos.

Just now, however, there is not enough business in Pecos, if The Enterprise got every nickle's worth of it, to justify the publication of such a paper as The Enterprise but the high standard of journalism is being maintained and the size of the paper has not been cut as has many of the weeklies over the state. At this the editor has not been able to collect enough to meet current obligations due to the fact that some few have failed to pay bills where large sums were paid for stock and ink and not half enough has been paid on these jobs to compensate for the paper much less the work. To those are due the fact that all bills are not paid promptly and these are the ones who are going to be forced to pay.

While the above is the status just now the future prospects for Pecos and The Enterprise are anything but discouraging. The town has improved greatly during the past year and but for the money panic everything would have been lovely.

Taking everything into consideration everything looks very bright for the future of Pecos and the people of Reeves county.

ANGER, THE DESTROYER.

According to The Enterprise's way of thinking the Cisco Round-Up has solved the problem of why men fight like brutes and murder people who have done them no wrong. It is that self-importance which makes one think that when he or she passes the wheels of progress will stop and the whole universe come to a standstill. The Round-Up puts it this way:

Not very long ago a young fellow shot his sister, fired five shots at her husband, and then killed himself with the remaining cartridge. Men might assume that some profound cause was behind this tragedy of passion and murder. It wasn't. The boy killed himself and his sister as the climax of a quarrel over a dog. He had given the dog to her some months before, and when he wanted to go hunting, he asked for it again. She refused, and he shot her. He didn't do this because he loved the dog so dearly that he couldn't live without it. He had probably beaten and kicked the animal many times in his life. And he didn't kill his sister because he hated her. He probably loved her, and in a gentler mood would have given a thousand dogs—all the dogs in the world—to save her life if necessary. He killed her because in that moment there was nothing so important in the world as having his own way.

Almost every quarrel among men is like this—because one of the combatants wants nothing so much as his own way. Men rarely quarrel for possessions, or for "the principle of the thing." These are merely excuses for passion. What they want is self-indulgence—and they mean to have it at whatever cost. They quarrel over things that were of no importance a little while before and that will shrink to their proper insignificance after the fighters' passions cool. Men see "red," lose all

possession of reason, and do things for which a life-time of remorse and penitence can never make up, when they are angry.

It follows that we should, at all times, endeavor to hold ourselves from becoming angry. Anger has no reason, no soul, and oftentimes makes a monster out of an otherwise good man or woman. Self importance is really at the root of anger, and if we can only grasp the truth that no one of us is so important that the world needs us, or will miss us, there is little danger that we shall ever permit ourselves to become angry.

WE'RE A CROWD.

The total population of the world—according to the Gotha, Kofkalendar, a publication that specializes in statistics, is approximately 1,699,000,000. This is an increase of about fifty millions in the last two years.

The statisticians estimate that 1,494,000,000 live in the Eastern Hemisphere, while only 205,000,000 are accredited to the two American continents.

The human race constitutes quite a crowd. But the significant fact is that this crowd is massed upon one side of the earth, only the merest overflow having escaped to the other side. Despite the war-makers, the population increases at the rate of twenty-five million a year. The ancient lands are crowded. They were crowded three centuries ago. The Americas are almost unpopulated as compared with Europe and Asia. Vast expanses of the Americas are, in fact, practically uninhabited.

The natural conclusion is that the tide of immigration to the West is sure to grow stronger constantly. South America must receive many millions of inhabitants from the Old World within the next few years. There's getting to be such a crowd of us on the earth that we cannot leave any great areas unpeopled much longer.—Wichita Eagle.

TEXAS A GREAT OIL STATE.

The great State of Texas covers some territory, and while it is known for its diversification, the oil business there is attracting world-wide attention. It seems as soon as the operators begin to get one field of the vast empire pretty well defined, and the cry goes up, "now the oil will run out," that a new field is "discovered."

Quite a number of the fields in Texas are receiving a splendid play at the present time, and wildcatting over a vast area is being pushed. It is predicted that within a very short time now crude will advance, and that the advances will be regular and rapid. So, while the oil business of the Lone Star State is very active indeed at the present, it is predicted on all sides that by this fall all fields will show a wonderful speeding up, and that numbers of the wildcats will be richly rewarded.—Oil World.

THE CITIZEN AND JURY DUTY

Slackers from jury duty are far more numerous than slackers from military duty. Yet the service which they dodge is equally important to the safety and welfare of the nation. In fact the American habit of deserting the jury box is one of the elements contributing to the increase of lawlessness and the growing disrespect of the judicial system.

Of course business is important and the almighty dollar is valuable, more so today than for many years. But the administration of exact justice, the maintenance of law and order and of public safety are vastly more important. They affect the very safety and life of every man and woman and child in the nation.

When the so-called "good citizen" avoids his reasonable jury service he does not think his action matters much. But when he and many others of the more experienced and more educated citizens dodge the jury box they rob the system of just so much wisdom and understanding, and in the end bring the courts to a pass where many juries are made up of ignorant men, many of them professional hangers-on who have little conception of the importance of the task before them.

The problems decided by American juries are vital ones, large properties, great principles even life itself are in the scales of justice which the jury may move up or down. Can anyone claim that such causes are entitled to anything less than the very best jurymen who can be found?

Those who are alarmed at the prevalence of crime, those who believe that the law should be more strictly enforced, those who say that justice must be impartially, wisely, and relentlessly done can attain those ideals much more quickly by bringing about a sense of responsibility for honest jury service than by all the extra-legal methods that have been proposed.—Ft. Worth Record.

PUBLICITY

Fear of publicity is the greatest preventive of wrongdoing the world has ever known. It is the greatest agency for the protection of the public that has ever been invented. It is worth more than all the courts and juries that exist in the world today.

Many a man has been kept in the straight and narrow path through fear that his wrongdoings might become known.

This is particularly true as to public affairs. There should be the fullest and freest publicity as to all public offices and those who fill them. Whenever you find a public official

trying to keep anything pertaining to public affairs from becoming known there can be but one of two motives—

The desire to hide something crooked or something incompetent.
Just as sure as you are born—Merkel Mail.

CREDIT MEN GET LINE ON PERSONAL LIFE

The credit man of one of the largest business houses in every city and town in every State, was asked the other day what was his main rule in granting credit. "I try to get a line on the personal life of my customers," he replied. "I want to know whether he leads a clean life or a dissipated one; I want to know if he is economical and prudent in his business affairs. My information on that line has more to do with granting credit than almost anything else."

A banker in a neighboring city has the same views. Not long ago a man came to him for a loan. He had securities worth eight or ten times the amount of money he wanted to borrow, but the loan was refused. One of the bank directors heard about the incident and asked about it. "Yes," returned the old banker, "the man had ample security, and the loan no doubt would be safe. But I happened to know that he is leading a

very wicked life; he is doing things which will involve him in disgrace sooner or later and I would much prefer that some other bank handle his business."

A man's good character is his best asset. Reputation is based upon character, and business men judge a man by his reputation. This has always been the case, but never more so than now. A man's good character tried and proven, is his best asset and his best friend.—Ex.

PERFECT.

"And did you have a good time on your vacation?" asked the homebody.

"The best ever," exclaimed the gadabout with enthusiasm. "I didn't leave a single speck of lint intact, I broke three ribs and a finger, and my engagement, and almost got enough for the wreck of my car to pay my fare home."

To Stop a Cough Quick

take HAYES' HEALING HONEY, a cough medicine which stops the cough by healing the inflamed and irritated tissues.

A box of GROVE'S O-PEN-TRATE SALVE for Chest Colds, Head Colds and Croup is enclosed with every bottle of HAYES' HEALING HONEY. The salve should be rubbed on the chest and throat of children suffering from a Cold or Croup.

The healing effect of Hayes' Healing Honey inside the throat combined with the healing effect of Grove's O-Pen-Trate Salve through the pores of the skin soon stops a cough.

Both remedies are packed in one carton and the cost of the combined treatment is 50c.

Just ask your druggist for HAYES' HEALING HONEY.

MARY'S LAM'.

Our Mary Ann's a-takin' "Voice," whatever that implies— She takes it in the city, whar everybody's wise. . . . I don't regret her takin' it, nor wish to raise a fuss, but I have grown suspicious of the stuff she hands to us.

She used to sing the good, old songs—an' tackled new ones, too an' everybody listened till she'd sang the last one through. We understood the words she said, which made our hearts rejoice,—but that's before our Mary Ann had went to takin' Voice.

I reckon that the screech-owl is a song-bird in his way, and puts that doggone tremulo in all he has to say. . . . There's nothin' to it but the tune, and even that is raw,—jes' "yah-yah-yah-yah-yah-ee! O, yah-yah-yah-yah-w-w-w-ll!"

A wiggle may be handy, or be the proper thing to exercise a puppy's tail, or e'en a flyer's wing. But when they wiggle harmony, until it goes to rack, I wouldn't mind 'em takin' voice, but I wisht they'd send it back!

Your own Uncle John.

THE SAFE PILOT ON THE UNCHARTED SEA

For though from out our bourns of time and place

The tide may bear me far, I hope to meet my Pilot face to face When I have crossed the bar. —Alfred Tennyson.

Unlike the material sea of water, the sea of life is charted, and every rock and whirlpool, all the shallows and sandbars, are pointed out to the mariner, while the beacon light of God's infinite love shines always upon his course.

Indeed, it so shines whether on land or sea, for "Thy word is a lamp unto my feet and a light unto my path." He who heeds not this light and disregards the warnings against the certain destruction of those who willfully turn aside into courses where millions who have gone before have met their doom, has only himself to blame for his fate.

Mind is the power which moves the rudder of reason and sets the sails of thought which take the human ship into the harbor of safety, or dashes it to pieces upon the rocks of sin and error. This is beautifully implied in these lines:

"Ships sail east, and ships sail west, As the self-same breezes blow It is the set of the sails, and not the gales, That determine where they go."

It is necessary that as soon as one begins the voyage from the land of youth across the sea of life to the port where old age finds him, he make full decision that he will not drift with the current, nor ignore the well-marked course of those who have preceded him. Such a one is sure to reach this haven in safety, and upon arriving on the other side shall find his Pilot who has, unseen, been guiding his frail craft all the way. He has this assurance during the entire journey, "Fear not, for I am with thee," and he knows that unless he is earnestly trying to set his sails in the right direction, trying to follow in the course of the "old ship of Zion," his Pilot, who stands ready and willing to help and guide him, can not do so. He can not keep a straight course while wavering between Scylla and Charibdis of doubt and fear, for as the Apostle says, "A double minded man is unstable in all his ways."

Pathetic, indeed, is the plight of one who one day is contemplating with joy the leading of a spiritual life the next day becomes mesmerized with the frivolous pleasures and indulgences of material existence! And this condition is most often brought about by those supposed to be one's friends who insist and plead with such a one to take part in the very things which the day before he had determined to eschew the rest of his days. So he goes on from day to day halting "between two opinions," as Elijah phrased it, first rejoicing in moments of spiritual impulsion, then relapsing again into a condition of material hypnotism, until at last the time comes when he must get into the boat which takes him across the dark river, and he looks back with inexpressible sorrow that he has not been true to the best impulses which were his in the past; that he has allowed material and sensuous things to overcome his good resolutions and the very moment which if it be peaceful is the most satisfying in our lives, becomes the most awful and terrifying because of a realization that he has not been faithful to what he knew to be right, or that he had taken the doubtful view of questions where good and evil, right and wrong, were involved. It is then he wishes with all his heart he had given God the benefit of the doubt. The most pathetic thing possible to behold is one who is vacillating between right and wrong, good and evil—trying to hold on to God with one hand and Mammon with the other; trying to experience the joys of spirit and the pleasures of sin at the same time. He had as well undertake to go up and down, east and west simultaneously.

It is often that just one little voyage into unknown waters cripples the ship upon the rocks, runs it upon a sandbar from which it cannot be floated, or causes it to lose the way back to the well known route of safety. But the glorious thought is that there is always One who can save from all perils if His aid be asked with sincerity and trustfulness. "Yea, though I take the wings of the morning, and dwell in the uttermost parts of the sea; even there shall thy hand lead me, and thy right hand shall hold me." How beautiful William Cullen Bryant expresses this thought in that wonderful poem, "Ode to a Water Fowl!":

He, who from zone to zone Guides through the boundless sky thy certain flight, In the long way that I must tread alone Will guide my steps aright. He will guide them aright only so long as the traveler seeks to have him do so. Although one may not have a full appreciation of God's loving kindness and mercy until he has lost his way and realize for the first time his utter helplessness, even then "the Lord's hand is not shortened, that it

can not save; neither his ear heavy, that it can not hear." Unlike the hopelessness that attends a shipwreck upon the material sea of water, there can be no disaster from which Omnipotence can not save, no depths from which He can not deliver, no darkness in which the light of His love can not shine.

We must listen to the words of love; we must look up and see with the eye of faith the King in His beauty, and in this way rest "in the secret place of the Most High," keep "under the shadow of his wing," be held "in the hollow of his hand," while "underneath are the everlasting arms." It is then we can say with sincerity and truth— "Sometimes 'mid scenes of deepest gloom, Sometimes where Eden's bowers bloom, By waters calm or troubled sea, Still 'tis God's hand that leadeth me. —Dallas News.

HOME BREW

A Missouri friend sends us this recipe for making home-brew, thinking because we are in Texas it can be used:

Chase a wild bull frog three miles and gather up the hops. To them add ten gallons of tan-bark, half pint of shellac, bar of home made soap, boil thirty-six hours, then strain them through an I. W. W. sack to keep them from working. Then bottle and add one grass hopper to each pint to give it the kick.—Author Still at large.

The Quinine That Does Not Affect the Head

Because of its tonic and laxative effect, LAXATIVE BROMO QUININE is better than ordinary Quinine and does not cause nervousness nor ringing in head. Remember the full name and look for the signature of E. W. GROVE, Inc. (Advertisement)

WHY THAT LAME BACK?

That morning lameness—those sharp pains when bending or lifting, make work a burden and rest impossible. Don't be handicapped by a bad back—look to your kidneys. You will make no mistake by following this Pecos resident's example. Ask your neighbor.

Mrs. R. E. Miller says: "Several years ago my back was weak and lame and ached constantly. My kidneys acted too often and that annoyed me very much. It didn't take many boxes of Doan's Kidney Pills to cure me."

Mrs. Miller gave the above statement October 27, 1913, and OVER THREE YEARS LATER on April 7, 1919, she added: "I still recommend Doan's Kidney Pills highly. They are fine. I use a few of Doan's occasionally and they keep my kidneys in good condition."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Miller had. Foster-Milburn Co., Mfrs., Buffalo, N. Y. (Advertisement)

THE CHURCHES

CATHOLIC CHURCH

Mass celebrated every second and fourth Sundays as follows: 8:00 a. m. for Spanish speaking population and ten a. m. for English speaking people of Pecos.

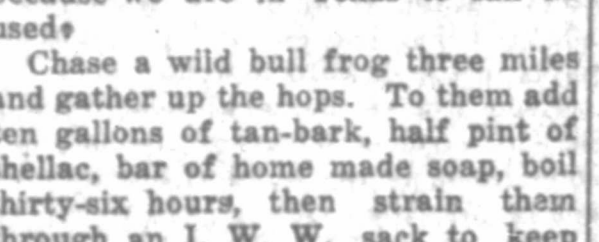

D. J. O'DONOVAN.

EPISCOPAL CHURCH

Hereafter every two weeks on Thursday night at 8:30 and the same afternoon at 5 p. m., there will be a study class at the St. Marks Episcopal church. An invitation is extended to all. Next service will be held July 21st.

Milk will conquer terrible pellagra; thus North can help the South

Washington, D. C.—Some of the large interests in the cities of the South are inclined to resent the United States Public Health Service's call for help for the 100,000 pellagra victims of the South, thinking quite likely that it may tend to hurt that section commercially.

With its agents everywhere, there is no reason to doubt the statement of the U. S. Public Health Service that there are more than 100,000 sufferers from pellagra in the long and wide country stretches of the South, and that of these 100,000 most die.

The Public Health authorities say that the remedy for pellagra is milk—that great quantities of milk shipped from the North this summer and the coming fall and winter would put an end to pellagra.

Surgeon General Cumming, of the Public Health Service, has received from the Borden Company, through its president, Mr. A. W. Milburn, an offer to furnish all the condensed milk that may be required to meet the immediate and urgent needs of the situation, so that the work of the department in combating pellagra need not be delayed.

The population of the Southern States is largely rural or localized in small or moderate-sized communities where the problem of the fresh milk supply is a serious matter. There are towns of a population of 5,000 in which the daily milk consumption is less than 500 quarts.

The reasons for this situation are easily explainable. First, the agricultural conditions have not fostered the development of large dairy herds; second, the methods of milk distribution are inadequate; and, finally, climatic circumstances hamper the keeping of fresh milk.

Refrigerating facilities, except in the larger cities, are generally lacking. The South needs milk not only for its present sufferers, but it needs more milk for its entire population, and the great dairy farms of the North are able to supply it.

U. S. PUBLIC HEALTH SERVICE EXPERIMENTS WITH BALANCED AND UNBALANCED DIETS ON WHITE RATS

Normal Rat: This shows the appearance of a well-fed rat. Diets which consist of seed products such as wheat, flour, cornmeal, oatmeal, rice, peas and beans, together with potatoes and sweet potatoes, never produce animals with such fine appearance. The use of liberal amounts of milk, eggs and leafy vegetables in the diet is necessary to induce good nutrition.

Abnormal Rat: This rat was fed liberally on a diet consisting of polished rice, bolted wheat flour, degenerated cornmeal, starch, sugar, molasses, pork, fat and sweet potatoes, together with small amounts of cabbage, collards and turnip greens. The leafy vegetables altogether make only about four per cent of the total dry matter of the diet. This is not enough to correct the dietary deficiencies of the seed and tuber diet. This is the type of diet common in the South among people who suffer from pellagra.

The U. S. Public Health Service officials, knowing that the suffering in the South is caused not so much by the lack of stomach-filling food as the need of well-balanced food, are now urging that condensed milk be shipped into the South in great quantities for relief and for general consumption as well. Dr. E. B. Hart, of the Wisconsin Experiment Station, recently told the Wisconsin State Legislature that "filled" milk is a menace to health.

HOW DALLAS CATCHES CRIMINALS

By P. V. Keating, in Dallas News. Once again has the legion of annihilators of time and space created into reality the dream of centuries old. Again does the criminal find a mighty barrier thrown across his pathway to freedom.

Striding forth boldly and without hesitation, Dallas, the city of the instant, takes cadence with New York, Washington, Chicago, Savannah, St. Louis, San Francisco and other large cities of the country, never faltering in the march of accomplishment of big things. Even timid, listless Hartford, Conn., is convinced when confronted with clippings from The Dallas Morning News, graphically describing the daring hold-up of the postoffice here last January and telling how word of that frightful deed of death and robbery was flashed across land and sea, to be sensationally plucked from the skies by a naval radio station in far distant Honolulu.

She, too, has learned and joined the ranks in the onward march. Even that sensational demonstration of wireless telegraphy seems, in comparison to the wonderful achievements of the system of wireless telephony, as the building of a dollhouse alongside the gigantic Magnolia monument to the oil industry of Texas, now in course of construction.

Dallas Enters the Ranks.

The history of the entry of Dallas into the ranks of radio greatness would be incomplete without a short resume of the real pioneers of radiography in the Southwest. Starting with the ambitious amateur, the Dallas Radio Club, with a membership composed almost entirely of amateurs, developed a system of local "exchange," gradually drawing within its sphere of "flashes," amateurs from surrounding towns. "Radio bugs" have increased and multiplied rapidly, even building, always striving for "increase of distance," sureness and reliability. Indomitable of will and purpose, they refused to cease offering their service and apparatus to the police and fire departments, finally winning consent to send out "broadcasts" of stolen automobiles and minor criminals. The Jackson street postoffice robbery was their big opportunity. Frantically the police worked upon that case, Chief of Detectives J. C. Gunning, telephoned the larger sending stations in Dallas, a message to the world, urging and imploring all to make desperate efforts to apprehend the criminals.

Away flashed the word—dot, dash, dot, dash—picked up in Phoenix, Ariz., flashed on to San Francisco, thence to the Catalina Islands and from there it flew across the Pacific Ocean to Honolulu. And thus the Dallas Radio Club demonstrated beyond a doubt that wireless telegraphy was practical and possible. But a more sensational accomplishment by the club is shown in the accompanying group of photographs.

"Daddy Garrett." Building first a small wireless receiving set, Henry Garrett, better known as "Daddy Garrett," superintendent of police and five signal systems, and an active member of the Dallas Radio Club, with other energetic members, included the wireless telephone as part of the police system. Erecting a tall slender steel sending and receiving radio tower on top of the City Hall, wires were connected to the top floor of the Central Fire Station adjoining, thence to the Gamewell board at police headquarters, where it could be connected to any interested bureau or office.

These photographs show a telephone conversation being carried on between the Chiefs of Detectives of Dallas and Houston recently. "Daddy" Garrett, director of police radiography, with his principal aid, Hansen, is seen at the receiving and relaying apparatus in the big instrument room, with an alert newspaper reporter standing at his elbow snatching the message hot off the wire for The Dallas Morning News. Through the Gamewell board the offices of Mayor Aldredge, Commissioner of Fire and Police Turley, Chief of Police Elmo Strait have been connected to "listen in." Chief Gunning, with his first assistant, Captain W. R. Moffett, is shown talking to Houston.

Had One for Dallas. One can almost hear Chief Gunning saying to Chief Kessler of Houston: "Yes, this is Gunning. Yes, we did. Billie Moffett just nabbed him at the Union Terminal. He's here all right. A big swindler you say? All right, Moffett grabbed him as he was sneaking through the crowd. Are you sending for him? No, he says he will return without

DODSON WARNS CALOMEL USERS

Calomel is quicksilver. It attacks the bones and paralyzes the liver. Your dealer sells each bottle of pleasant, harmless "Dodson's Liver Tonic" under an ironclad, money-back guarantee that it will regulate the liver, stomach and bowels better than calomel, without sickening or salivating you—15 million bottles sold.

papers: Oh, that's all right, glad to help. What! Got one for us. Who is it? Ray Blank? Well, I'll be hanged. That's good work. Yes, he has a string of aliases as long as your arm. In jail at Mobile, Ala. Sure, we'll send Moffett for him tonight. But, say, how the dickens did you know he was in Mobile? Wireless telephone. Ah, no wonder. Say, Kessler, guess we have these crooks thinking a little, eh? They found a way to "interfere" on our wireless telegraphy, but this telephone gets them. Yep. Good-bye, and many thanks. Good night."

A wireless message had been received in Dallas from Houston to be on the lookout for a notorious swindler. Captain Moffett saw him hedging through the crowds at the station, mingling with a party of women in an effort to elude the police. In notifying Chief Kessler of the capturing of his man, Chief Gunning, was surprised to learn that authorities in Mobile, Ala., had in custody a well-known burglar wanted in Dallas for several jobs pulled off during the recent crime wave. He was also wanted by Fort Worth police for similar crimes. Mobile, not being in touch with Dallas, relayed her message to Houston and from there here.

Time, space nor distance bring no fear to the Dallas police, for with her wonderful system of wireless telegraphy and telephony, the Dallas is in reality a City of the Instant.

LIFT CORNS OR CALLUSES OFF

Doesn't hurt! Lift any corn or callus off with fingers

Don't suffer! A tiny bottle of Frezzone costs but a few cents at any drug store. Apply a few drops on the corn, callus and "hard skin" on bottom of feet, then lift them off.

When Frezzone removes corns from the toes or calluses from the bottom of feet, the skin beneath is left pink and healthy and never sore, tender or irritated.

NOTICE

All Land Lease, Permit Holders and Royalty Owners

who are interested in development of the field in the vicinity of Section 8, Block C-20, public school lands, Reeves County, communicate with ARROHEAD OIL COMPANY, Pecos, Texas.

Permit Holders

If you want to block in your acreage and prove it up thru a well to be drilled in above vicinity advise us fully in your first letter what you have, give full description first letter.

ARROHEAD OIL COMPANY

H. & G. N. RY. LANDS FOR SALE IN REEVES COUNTY

Surveys Nos. 45, 47, 55, 56, E. half of 61, and 63, in Block 4; and Nos. 42, 43, 47 and W. half of 48, in Block 5. The surveys in these blocks are situated from 5 to 8 miles from Pecos City, in the northern half of the Pecos River country and will be sold only in whole sections. Also, surveys No. 49 in block 4 and Nos. 9, 13 and 15 in block 7. Also, surveys Nos. 1, 2, 3, and 5, fronting on the Pecos River, in Reeves County, and Nos. 12 (a street survey) Pecos county. Also 12 surveys in block 11 and 3 surveys in block 12. None of these are river lands. All are in Pecos county. All these lands are under lease for oil, gas and mineral purposes and any sale of same will be made subject to encumbrance. J. G. LOVE of Pecos is agent for the sale of all these lands situated in Reeves County and application should be made to him for the purchase of same. There is no local agent for the sale of the lands in Pecos County, and parties desiring to purchase any of same should apply to the undersigned. EUGENE CARTLEDGE, Agent and Attorney in Fact. AUSTIN, TEXAS

5 ACRES FOR \$50

Section 4, Block B-20, one mile from drilling contract; has been cut into 5-acre tracts, which will be sold at \$50 each.

LOOSE TALK ABOUT CHEAP OIL

There has been so much talk of late pro and con in regard to the oil situation, that the following taken from the Oil and Gas Journal, will prove interesting to the readers of The Enterprise.

"Those eloquent oil agitators who are suggesting the possibility of firing oil tanks because of the present low prices, have some followers, but the majority of oil men refuse to sanction such talk. It has a Bolshevik sound to them and they regard it as absurd propaganda.

"During the period of the Cushing oil flood, some years ago, similar talk

was heard, but it did not proceed further than the oral stage. A like outcome will characterize the present agitation.

"The oil producers of the country are in favor of an oil tariff, but they do not uphold any policy that includes sabotage. The I. W. W., in the United States, resorted to tactics of that sort during the war period and brought down upon their heads a storm of popular indignation, followed by a demand for drastic punishment. The I. W. W. program did not work out as planned. In Russia incendiarism has been made a part of the Bolshevik campaign against capital.

It has laid waste a great empire and nobody has been benefited by it, while millions have been deprived of their belongings; millions have suffered from starvation and contagions, and the harvest of death has been appalling. The property losses in Russia have impoverished the nation. That sort of "reform" is not needed in America.

"Men may differ on various matters, but that does not mean they should adopt the methods of anarchists."

We want your business. A trial is all we ask.—O. J. Green Merc. Co.

Or words to that effect

IT BEATS the hand. THE WAY this thing. KEEPS POPPING up. THE OTHER night. I BROKE all rules. AND READ a high-brow book. AND HERE'S a hot one. THAT IT handed me. "MANY OF us find. THAT TASTE affords. ONE OF the fairly. DEPENDABLE SATISFACTIONS. OF EVERYDAY living. AND IT seems. UPON LONG reflection. THAT SATISFACTION. COMES CLOSE to being. THE LONG sought. "HIGHEST GOOD." OF COURSE that isn't. WRITTEN WITH the ease. AND POLISH to which.

WE ARE accustomed. BUT IT'S a mouthful. AS YOU'LL agree if you. JUST PUT it into good. UNITED STATES, like this. "SON, YOU'LL be running. ON FOUR flat tires. IF YOU don't hurry. AND WRAP yourself around. THE ONLY cigarette. THAT SATISFIES."

"THEY Satisfy"—nothing else so well describes Chesterfields' mildness, their mellowness, their delicacy of aroma and smooth, even "body." It took the finest varieties of Turkish and Domestic tobaccos to do it—and the highest order of skill in blending them. Yes, the Chesterfield blend is a secret. It can't be copied.

Have you seen the new AIR-TIGHT tins of 50?

They Satisfy Chesterfield CIGARETTES

PERSONAL

W. R. Rhodes and family this week moved into the Kite home, recently vacated by the Kites.

Mrs. F. W. Johnson and her niece, Miss Buena Payne have returned from a two weeks visit to relatives at Fort Worth and Dallas.

Mr. Brown and daughter, father and sister, of Mrs. Brazeal arrived last week from their home in Nebraska, for a visit to the Brazeal family.

Mrs. R. E. L. Kite and daughter, Miss Katherine, left this week to join her husband who with his son, Venazy, have been in El Paso for sometime carpentering.

Mr. and Mrs. E. D. Evans are this week in attendance upon the Bloys campmeeting at Skillman Grove in the Davis Mountains.

John Baker and family are at home again after a vacation of three or four weeks, part of which time was spent with his brother near Saragosa.

Mrs. Roy Holloway and son, left Thursday for their home at Andrews after a visit to her parents, Mr. and Mrs. W. R. Rhodes. They were accompanied home by her sisters, Olenn and Viena Rhodes and brother, Loyd Rhodes.

A. M. Dick and three sons arrived this week from Birmingham, Alabama, coming through in a Ford car, making the trip in six and one-half days, to join Mrs. Dick and the other children who have been here three weeks visiting her sister, Mrs. W. P. Howard and family.

Lee Ligon and his daughters, Misses Cornelia and Lucy, and Miss Caroline Sullivan are spending this week at the Ligon ranch. They will also visit at Carlsbad, N. M., before returning.

Miles Day and family left Monday for their home at Artesia, New Mexico. Mr. Day is a barber and held a chair at the Stephens shop for the past few months. They are splendid people and made many friends while here. They will visit at other places before reaching home.

Mrs. Harry Anderson left Sunday for Oklahoma City, where she will visit relatives for the next month.

Mrs. Arthur E. Hayes and children left Sunday for Los Angeles, California, in answer to a message notifying her of the serious illness of her mother. Mrs. Hayes' many friends hope she will find her mother improving and that she will soon completely recover.

Charles Owen and his mother, Mrs. Mary Owen got in Wednesday from an overland trip of a month spent in traveling over the mountains and hills and through the valleys and dales of New Mexico and Arizona. They visited Mrs. Owen's oldest brother at Prescott, Arizona, and visited at other points. They report much rain in that country on the trip, had a good time, but are glad to get back home. Add and his family will not return for several days longer.

Mrs. B. R. Stine and children returned Tuesday from a visit to relatives at Amarillo and the Panhandle.

Mrs. Jennie Johnson of Corsicana is here for a two week's visit to her son, H. H. Johnson and family.

Mrs. A. E. Bryant left Wednesday for a two weeks visit to the family of Judge J. Weatherby of Fort Davis.

President Alfred Tinnally of the Sunshine Oil Corporation left this morning for the East on business for his company.

Mrs. Garnet will leave Saturday for her home at Comanche, having made a three weeks visit to her daughter, Mrs. Wm. Meyers and family.

Mrs. Alfred Tinnally left this morning for her home in Los Angeles, Cal., where she will spend the next two or three weeks with her daughter, Miss Laura, before returning.

Mrs. Roy Holloway of Andrews, is here on a visit to her parents, W. R. Rhodes, and will remain for a couple of weeks. Mrs. Holloway says there is plenty of grass in Andrews county but it is needing rain now.

Ed J. Leeman and sons, Terry and Edwin, arrived from Duncan, Oklahoma, this week and are guests at the home of his parents, Dr. and Mrs. J. A. Leeman, making the trip in their auto. Mr. Leeman is a newspaper man of Duncan.

Mr. and Mrs. A. E. Wilcox and little grandson, Joe Roy Smith, returned Sunday from El Dorado, Kansas, where they spent the past month visiting Mr. Wilcox's father and other relatives. They had a very pleasant time, but were glad to get back home.

Mr. and Mrs. Clem Calhoun and Mr. and Mrs. C. W. Parker, the latter parents of Mrs. Calhoun, left the early part of the week for Fort Davis and expected to attend the Bloys campmeeting before their return.

Mr. and Mrs. C. W. Parker of Sherman, parents of Mrs. Clem Calhoun, came in this week for a visit with their daughter. Mr. Parker is engaged in the printing and supply business in Sherman and likes to stick around where he can "smell printer's ink." He was agreeably surprised to find such a well equipped office in a town no larger than Pecos.

Superintendent J. Rutledge of the Pecos public schools, came in the early part of the week from his summer vacation in Fort Worth, Dallas, Spreveport and Ranger. Prof. Rutledge reports a most delightful summer and is feeling really "fit" for the work he has planned to do the coming school year. Mrs. Rutledge and the children are expected home from Ranger some time this week.

Mrs. J. O. Tolver who spent the summer with friends in Stephenville, is here now with her son, Braxton A. Tolver, and daughter, Mrs. O. J. Norwood.

Major Thos. H. Bomar was down town Thursday for the first time in several weeks. The Major is still suffering from his throat and is anything but robust.

Richard Lynn was a visitor in Toyah the early part of the week.

Miss Lillie Poe returned last week from the markets and trimming rooms and is preparing to satisfy the ladies with the latest fashions.

Judge J. E. Starley and family returned Thursday from Austin and other east Texas points where they have spent the past month.

Harry Hinkle came in this morning from the East where he had been purchasing the fall and winter stocks for the Pecos Mercantile company. Attention is called to some of the new purchases in their regular ad on the last page. Mr. Hinkle's father and sister came with him and will visit here for a time.

BUNK PARTY

Little Miss Norabel Ruth Hollebeke entertained her little friends with a bunk party Tuesday night. The tiny tots arrived at seven o'clock. After they had played for about an hour, refreshments of home made ice cream was served. Mrs. Hollebeke then took them to the show. After their return home, games were played until their little eyelids got so heavy they had to fall into dream land.

This their first bunk party is an occasion long to be remembered.

The next morning at nine o'clock breakfast was served on the lawn.

Kodak pictures were then taken. At ten o'clock they began to go home, each one came in and thanked their little hostess for the grand time they had. Those present were:

Little Misses Josephine Bryan, Dorris Haygood, Nancy Camp, Baby Ruhlin, Christin Browning, Florence Johnson, Clara Lou Beauchamp, Nora Slack, Nell Anderson and Helen McKellar.

EPWORTH LEAGUE PROGRAM

Leader—Miss Edna Boles. Subject—The Bible. Scriptures—St. John 1-1 and 1-14, Colossians 3-16.

Song Prayer Purpose of the Bible—Mr. Rhodes. Historical books, how many, name them—Donald Runyon.

Poetical books, how many, name them—Mrs. Waugh. Prophetic books, how many, name them—Raymond Norwood.

Solo—Miss Mable Smith. Who were the most prominent characters in the Acts of the Apostles—Similarity in what?—Miss Poe.

Epistles, how many witness, name them—John Hibdon. Revelations. Who wrote Revelations and where—Miss Virginia Runnels.

Recitation—Jno. Mann. Song Benediction.

SPECIAL PLUGGING NOTICE TO DRILLERS

The Railroad Commission is experiencing some difficulty in the supervision of the plugging of wells for the reason that operators are not always ready to plug their wells on the date set out in their notices of intention to plug. For the better protection of the industry, the commission is making a strenuous effort to have a deputy supervisor present on every plugging job in this State, and more especially in the producing areas.

It often happens that an operator will give to the commission its notice of intention to plug on a certain date, and the deputy supervisor will drive several miles over oil fields roads, only to find that no one is at the well, and no preparation is made to do the plugging. For this reason, it is not unusual for a deputy supervisor to make two or more trips to a well, when one is all that should be necessary.

The commission urges all operators to file their notice of intention to plug in ample time for the deputy in their district to be notified of the date, and then be ready to plug their wells on the date set out in their notice, so as to save the deputy supervisor this unnecessary travel and useless waste of time. Every deputy supervisor has a large territory to cover and many wells to look after, and in order that he may properly perform the work that has been assigned to him, it is of prime importance that the operators make their preparation and be ready to plug their wells on the date stated in their notice to the commission, and that notice of intention to plug be filed on every well far enough ahead for the deputy to arrange to be present and witness the plugging of the well.

JOHN HOFFER, Deputy Supervisor.

SEEING THE EDITOR

"Is this the editor?" inquired Mr. Titmouse at the office of the Western Breeze.

"It is," responded that dignitary. "Didn't this paper say I was a liar?"

"It did not." "Didn't it say I was a scoundrel?" "It did not."

"Well, some paper said it." "Possibly it was our contemporary down the street," suggested the editor, as he picked up a paper weight. "This paper never prints stale news."

Habitual Constipation Cured in 14 to 21 Days

"LAX-FOS WITH PEPSIN" is a specially-prepared Syrup Tonic-Laxative for Habitual Constipation. It relieves promptly but should be taken regularly for 14 to 21 days to induce regular action. It Stimulates and Regulates. Very Pleasant to Take. 60c per bottle.

FINANCIAL REVIEW

Prepared For The Enterprise By The First National Bank in St. Louis.

The foreign trade of the United States continues to show a declining tendency. The figures for June, announced by the United States Department of Commerce show that exports to Europe declined 40 percent when compared with the same month of 1920; to North America 48 percent; to South America 63 percent; to Asia 48 percent; to Oceania, 65 percent and to Africa 73 percent. If June is compared with May there is recorded a small increase in the value of shipments to Europe, South America and Asia, but declines in all other cases.

Imports are also showing a declining tendency. Our receipts of goods from Europe for the month of June show a decline of 54 percent when compared with June of last year. Receipts from North America, show a decline of 74 percent; from South America 75 percent; from Asia 59 percent; from Oceania 64 percent; from Africa, 50 percent. While our trade with Europe, taken as a whole, is declining, trade with certain countries is showing an increase. Our exports to Denmark, Germany, Greece and Italy show increases during June as compared with the same month a year ago. While our imports from Germany dropped from \$8.5 millions to \$7.0 millions, exports rose from \$19.7 millions to \$30.8 millions. Our total imports for the past fiscal year from Germany were valued at \$91.0, this compared with \$45.0 millions in the preceding fiscal year. Exports were valued at \$382 millions as compared with \$202 millions in the previous year. Our imports from the United Kingdom show a decrease of 40 percent for the last fiscal year as compared with the one previous and exports show a decline of 37 percent.
