PLAINVIEW, TEXAS, THURSDAY, MAY 29, 1913

NUMBER TWENTY-TWO

DR. SCOTT'S WELL PUMPS 3,000 GALS.

Flow of Sand Indicates Further Development; Water Level is Undisturbed.

MAKING MODEL FARM

Is Dividing Quarter-Section into Eight Pastures for Hog Grazing; Alfalfa, Too.

Dr. A. C. Scott, of Temple, Texas, has been in Plainview this week, helping "bring in" the largest well yet pumped on the South Plains. A reasonably thorough test was given the well Tuesday, and it produced 3,000 gallons. Sand was still muddying the water, indicating that the well is not yet fully developed.

This well is the largest yet dug. It has a 12-inch pipe, whereas most of the other wells have only about a 9 1/2-inch discharge. Dr. Scott's well is 238 feet deep. He will use a 100-horsepower engine for pumping.

It is safe to venture that there is no man more enthusiastic about the possibilities of the South Plains than is Dr. Scott; he is investing his money in a permanent way.

Two years ago, in March, Dr. Scott purchased a section of land five miles northwest of Plainview. Fourteen months ago he put up four miles of hog-proof fence and built a silo. Last winter Dr. Scott fed 125 calves on his ranch. The United States inspector said, when the calves were sold, in March, that these were the finest calves in the entire Panhandle.

Believes in the Silo.

He is a believer in the silo, but is a little afraid that the wooden silo may not give the best satisfaction in this climate. He contemplates building a second silo this fall, and will use an indestructible tile.

Last fall Dr. Scott bought the Tom Frasier stock of Duroc-Jersey hogs—the finest herd of hogs in Texas—and shipped them to his ranch. He expects to keep this herd up to its former standard of excellence.

These hogs will be given eight pastures of twenty acres each. Four of the pastures will be used for spring and summer grazing and four for feeding during fall and winter. There will be two twenty-acre tracts in alfalfa; two in sorghum, and one each in rape, barley, maize or Kaffir, and Spanish peanuts.

This tract is laid out 440 yards wide and one mile long, with brooding pens conveniently arranged along the run. A second well furnishes fresh water for the hogs. This well also supplies a quarter of a million gallon reservoir, which Dr. Scott will stock with fish.

Another quarter-section is to be left in native grass, and shade trees are being put out. On this tract will be the dwelling and barns. A third quarter-section will be planted to Kaffir and maize for feeding and to fill the silos; while the quarter-section on which the big well stands will be planted to alfalfa for haying.

Water Level Stationary.

D. L. McDonald, the irrigation expert from Hereford, visited Dr. Scott's well. The visitor ventured the statement that the water level would be considerably reduced by the immense stream of water; ten feet, he said, to be exact. After the pump had stopped a measurement showed that the water level stood just where it had stood before pumping started.

In the productivity of the soil and its uniformity, nearness to markets and variety of crops that may be grown, Dr. Scott thinks that Hale County has the wonderful California irrigated districts beaten badly. Except for growing tropical fruits, California lands are not so valuable as South Plains property, he thinks.

MISSING-WORD CONTEST ATTRACTS ALL CLASSES.

Henry Ansley, of Plainview, won the \$2 prize offered in last week's Herald for finding a word which had been purposely omitted from a Herald advertisement. Inside of an hour after the paper was sent to the Post Office Henry had claimed his prize. Telephone calls at various stores and at the Herald office for two or three days indicated how widely spread an interest the missing word created. The word was omitted from Carter-Houston's advertisement.

It pays to read Herald advertisements.

WILL ARRANGE HOME-COMING AND PICNIC JULY 3, 4 AND 5.

Fire Boys Plan Three Days' Entertainment to Celebrate National Birthday.

An old-fashioned picnic and home-coming is being planned by the local fire department and band for July 3, 4 and 5. A band concert is planned for each evening, and some free act for each afternoon and night. A ball game is also planned for each day. It is hoped that the local Elks may have their team in condition so that a visiting team of Elks may be entertained.

July 4 will be "home-coming" day. The boys want all citizens to ask former residents to return for that day. The fire department will put on a water fight and display. Trips to the big wells will probably be arranged. It is planned to have public speaking every day.

The following committees have been appointed: Amusement and concessions—E. B. Burchett, James Pipkin and George Hutchings; Ground Committee—James Peret, Charles Davis and W. J. Smith; Finance Committee—R. C. Ware, Lipscomb Harlan and W. J. Klinger; Advertising Committee—Fred Cousineau, Caswell Franklin and Will Spears.

ARE ANXIOUS TO KNOW ABOUT SHALLOW WATER.

Joe Hess Finds Colorado People Interested in Irrigation on the South Plains.

"They wouldn't let me rest a minute," was Joe Hess' statement to a Herald reporter yesterday when he was asked about his recent trip to Colorado. Mr. Hess is sales manager for the Texas Land and Development Company.

Mr. Hess registered at the hotel in Denver one evening. Early next morning he found two calls. All that day and until he left the day following Mr. Hess says there were callers to know about the Plainview country.

John B. Sweet, of Denver, the "Potato King of America," said to Mr. Hess that the South Plains is the greatest irrigation proposition in America. Mr. Sweet is an irrigation expert. He has visited the South Plains Shallow Water Belt, and has also investigated all of the other irrigation districts in the United States.

At Fort Collins, Boulder, Walsenburg—everywhere he went—Mr. Hess found the people anxious to know about the Plainview country.

MRS. BARNES' MUSIC CLASS CLOSES 3 NIGHTS' PROGRAM.

Standing Room at a Premium When Popular Young People Entertain at Schiek.

The music pupils of Mrs. Eva L. Barnes entertained at the Opera House three evenings last week, to the delight of all Plainview.

The little people entertained Wednesday evening, the juniors Thursday evening and the advanced pupils Friday evening. The program for each evening was composed of choice selections, and their rendition was splendidly executed.

Medals were awarded for general excellence during the school term. Miss Ruby Hatcher won first medal and Miss Laura Kupp the second in the advanced grades. The medal for excellence in scale work was won by Miss Thelma Reeves. The medal for the first, second and third grades was given to little Miss Margarite Willis. Ottilia Graham was the winner of the medal for high third, fourth and fifth grades. The announcement of the winners of the medals was made by B. O. Brown at the close of Friday evening's entertainment.

HONORING OLBERN J. RUSSELL.

Olbern J. Russell, recent student of the State University, at Austin, was honor guest Friday evening at a pretty lawn fete given by Miss Pattie Dalton, at her home, 401 South Pacific Street.

The lawn was made gay with the soft shades from Japanese lanterns, potted plants and comfortable lawn seats. Under the boughs of a big, shady tree, Misses Lacey Dalton and Mary Wayland served punch throughout the evening to twenty couples of happy young people.

Music and conversation furnished entertainment for the jovial crowd. Late in the evening an ice course was served.

WILL ADVERTISE BONDS FOR SALE

Council Refuses All Bids on Street and Sewer Bonds; but Street Crossings Will Go In.

SANITARY CLOSETS ORDERED

All Who Cannot Connect with City Sewer Must Conform to Sanitary Code.

All bids for the street bonds were refused at a special meeting of the City Council last Monday night. The best bid was 98c, and the purchaser wanted accrued interest. The Council will advertise the bonds in Eastern markets, receiving sealed bids from would-be purchasers. These bids will be opened the first Tuesday in July.

"This does not mean that work on street crossings will stop," Mayor Dorsett said. "We can secure money from the local banks to go ahead with the work, and we expect crossings put in just as soon as the work of the surveyor is completed."

The Council ordered an ordinance drawn providing that all persons who cannot connect with the city sewer must build sanitary closets. A model closet will be built in the City Hall, according to specifications furnished by the United States Department of Health. Privies now in use can be remodeled into a sanitary closet at very little cost, Mayor Dorsett says.

KILLED 46 JACK RABBITS.

M. D. Henderson, accompanied by H. I. Miller, American Manager for the Pearson Interests, and Mrs. Miller, drove over Pioneer Park yesterday in the big Alto car. Mr. Henderson shot forty-six jack rabbits during the afternoon.

MRS. MUNSEY IS REMAINED TO JAIL

Lockney Woman Brought to Plainview and Peter Taken to Floydada After Inquest.

EXCITEMENT RUNS HIGH

Testimony in Munsey Killing Is Transmitted to Grand Jury Under Seal.

Mrs. Birdie Munsey and Horace Peter, both of Lockney, were remanded to jail without bail after inquest held Saturday to determine causes leading up to the killing of J. M. Munsey Saturday morning at his home in Lockney. Mrs. Munsey was transferred to the Hale County jail Monday, on account of insufficient accommodations for both prisoners at Floydada, the county seat of Floyd County, in which Lockney is situated.

Testimony deduced at the inquest was transmitted to the grand jury under seal. Mrs. Munsey and her two children are reported to have been contradictory in their testimony. The first statements of the twelve-year-old boy were substantially changed, incriminating his mother.

Suspicion was at first directed to the boy, owing to his own statement; but on further statements by the children the mother and Peter were arrested.

Arrangements have been made by attorneys for State and defense for keeping the children by disinterested and impartial parties pending further investigation. It is thought that writs of habeas corpus will be applied for soon on behalf of both defendants; which writs will, in all probability, be held at Plainview.

Parries Frontment.

The prominence of the parties involved in the killing has caused much

SOUTH PLAINS IS BEST COUNTRY HE HAS SEEN.

California Says in "Golden West" Dr. Scott's Well Would Be Valued at \$300,000.

Ben F. Thorpe, representing the Arthur S. Bent Construction Company, of Los Angeles, California, is a visitor in Plainview this week. Mr. Thorpe has visited all of the irrigation projects in America, and he says that the Shallow Water Belt of the South Plains is the best he has seen.

"You are particularly fortunate," Mr. Thorpe said, "in having no gyp or alkali. In the famous Roswell district they lose 75 to 80 per cent of their water through seepage into the gyp. You have none of that here. Your land costs you from \$35 to \$50 an acre, without improvements; then suppose a well costs as much as first cost on the land—that would make an irrigated farm cost you perhaps \$100 an acre. In the Roswell district lands not so good as yours, with water right, costs from \$150 to \$200 an acre."

"In California we value water at \$1,000 an inch. Dr. Scott's well pumped 3,000 gallons yesterday; that is 300 inches; so that his well, without an acre of land, would be valued at \$300,000."

Mr. Thorpe thinks it would be a splendid advertising proposition if the Chamber of Commerce could persuade the farmers within a mile or two of Plainview to put in show farms. He also thinks it would prove profitable to the owners.

The Arthur S. Bent Construction Co. are large manufacturers of cement conduits for carrying water in large quantities. These conduits prevent loss from seepage. Mr. Thorpe says that his company will open headquarters in Plainview, provided he finds demand for conduits.

FOUNTAIN PEN OFFERED FOR TEN BEST REASONS.

Herald Prize Offer Should Arouse Discussion Which Will Benefit Plainview.

Wouldn't you like a \$4 Conklin Fountain Pen, or a straw hat or The Semi-Weekly Herald for one year? It isn't hard, and you will be doing Plainview and the South Plains a large service.

Why did you come to Plainview? Why do you think other people ought to come? Isn't that a question worth thinking about? A gentleman from the great irrigated district of California came into Plainview this week. "Get busy," he said; "get busy. You have the greatest possibilities for irrigation here that I know of anywhere." "If Plainview doesn't build into the metropolis of the entire Panhandle it is your own fault," said a visitor last Friday—and he was a man who knows the Panhandle.

Doesn't it seem, then, that we should get very busy? Better tell the 2,000 readers of The Herald why people should come to Plainview; and, incidentally, win a \$4 fountain pen.

FOX VISITS PLAINVIEW.

Santa Fe Vice President Enthusiastic Over South Plains.

F. C. Fox, vice president and general manager of the Pecos System of the Santa Fe Railroad, with headquarters at Amarillo, came into Plainview Saturday on his private car. Mr. Fox went over to Floydada Saturday afternoon.

"This is the greatest irrigation proposition I have ever seen," Mr. Fox said, "and I have seen the irrigated districts of nearly every section of America." Mr. Fox did not discuss any plans of his company for development.

County, brothers of the dead man; F. L. Moore, of Lockney, and R. E. Stoker, of Estilline, brothers-in-law of the dead man, attended the funeral and investigation of the killing.

Deceased moved to New Mexico six years ago, and returned to Floyd County after an absence of two years.

Mrs. Munsey's maiden name was Miss Betty Baker. She is a daughter of John Baker, of Floydada. The first nourishment Mrs. Munsey has taken since coming to Plainview was some soup at noon today, according to her attendants. Dr. W. H. Flamm is her physician.

Mrs. Munsey's attorneys are Martin and Zimmerman, of Tullia; Peter's attorney is T. H. Houghton, of Floydada. Judge F. P. Works, of Amarillo, is assisting District Attorney Geo. L. Mayfield with the prosecution.

MILLER PLEASED WITH PROGRESS

American Manager for Pearson Interests Inspects South Plains Properties.

PUMPING DAY AND NIGHT

Will Place Power and Row Boats on Lakes; Bathing at Pioneer Park.

H. I. Miller, of New York, American manager for the Pearson interests, has spent this week inspecting the company's 60,000-acre development proposition around Plainview. Mr. Miller leaves tomorrow for El Paso. He will go from there to New York City, completing an inspection tour of nearly 9,000 miles during the last thirty days. Mr. Miller's associates own vast interests in Mexico; they are spending \$6,000,000 on the Medina irrigation project in South Texas, and operate the largest lumber mill in the world in Louisiana.

Mrs. Miller accompanied her husband.

When seen at his private car last night, Mr. Miller thought that he had nothing of particular interest for the press. He is pleased with the development which has been made, and hopes to push the work even more rapidly, since the start has been made. The Texas Land and Development Company will put down approximately 400 wells on their 60,000 acres of land. Their property will be sold in small tracts for intensive farming.

Will Grow Broom Corn.

"We will plant a considerable acreage of broom corn," Mr. Miller said. "It is exceedingly profitable. I believe that if the individuals who are equipped to irrigate would each plant a small acreage we might be able to persuade somebody to locate a broom factory in Plainview. A little later your Commercial Club ought to have little trouble in getting a cannery which could handle both fruits and vegetables. This would stimulate production and increase population."

The Company has ordered both power and row boats for Lake Park and Pioneer Park Lake. It is planned to install bathing facilities at Pioneer Park. Bathing suits will perhaps be furnished at small cost. Pioneer Park Lake will be 8,000 feet long.

The two wells in Pioneer Park and the well at Lake Park are being pumped day and night. During the day water at Pioneer Park is used for irrigation; at night it is turned into the lake. In town the well pumps night and day into the lake. A Herr engine has replaced the tractor which has been used at Lake Park. This will be replaced by a 45-horsepower motor as soon as a motor can be received from the factory and installed.

1,900 Acres in Experiment Farms.

The Company is putting nearly 1,900 acres into experiment farms. Mr. Miller said, all within three miles of Plainview. This land will be intensively cultivated under the direction of experts. Six hundred acres will be planted to fruits and berries; much of the work has already been done. Already six big wells have been installed on the experiment farms.

J. W. Longstreth, agricultural expert, has 100 acres of land divided into twenty tracts; each of these twenty tracts is subdivided into twenty smaller tracts—the later subdivisions being used for different crops and for comparing different methods of handling the same crop. A. M. Kruger is in charge of work in horticulture and orcharding.

Mr. Miller was pleased that sidewalks are being built on North Pacific Street. Lack of sidewalks always creates an unfavorable impression, he thinks. He believes that paving the public square and the street leading from the square to the Santa Fe depot would be a wise investment.

One of the most important things our Chamber of Commerce might do, Mr. Miller suggested, in answer to the reporter's question, would be to see, if possible, that all streets (particularly in the business section) are thoroughly sprinkled. This would do much to allay the dust; it would tend to keep down sickness; and would add to general comfort and cleanliness. Plainview has a staunch friend in Mr. Miller.

Dr. Milton Longmire came in Monday from Louisville, Ky., where he has been studying at the University of Medicine. Dr. Longmire has just closed his third year of study in this institution.

ANNOUNCEMENT

Beginning June 3, 1913, The Hale County Herald will be issued semi-weekly; Tuesday and Friday of each week.

The subscription price of the new twice-a-week Herald will be \$1.50 a year. All renewals, extensions or new subscriptions received before June 1st will be accepted at \$1.00 a year. Existing subscriptions will be carried at the old rate until date of expiration.

News items and advertising copy should be in The Herald office not later than six o'clock Monday and Thursday to insure publication.

Herald Publishing Co.

QUARTER OF MILLION FLIES TRAPPED IN PLAINVIEW.

Harold Baker Brings in 18 Pints This Week and Wins Special Prize of 50c.

The boys and girls of Plainview have trapped 283,500 flies since April 1; by measurement, 94 1/2 pints. Harold Baker delivered 18 pints, or 54,000 flies to the Civic League Tuesday, and was awarded the prize of 50c offered by Blasengame & Klinger each week to the boy or girl trapping the largest number of flies during the week just ending.

Other contestants are as follows:

Name	No. Pints	No. Flies
Edward Kerr	20	60,000
Herwin Gallaway	16	48,000
Almina Strange	12 1/2	37,500
James Otis Trulove	12	36,000
Tom Morrison	2	6,000
Vincent Tudor	2	6,000

MUSIC AND PUNCH FOR LIBRARY OPENING.

There will be no set program nor speeches at the Library Social to be given at the City Hall Friday evening. Good music will be furnished all the time and punch will be served throughout the evening.

The house party will be composed of the graduating classes from the three schools, the program committee, the social committee and the library committee.

interest. A large crowd of people were in Lockney all day Saturday, anxiously awaiting the result of the inquest, but dispersed later without disorder.

Substantially, the facts gleaned seem to be that about sun up Saturday morning neighbors of the Munseys were attracted to the Munsey home in Lockney by the screams of Mrs. Munsey and her two children, a boy about twelve years old and a girl about nine years old. Several parties reached the house immediately, and found the body of Mr. Munsey in bed, lying in a position indicating that he had been asleep when shot.

A .38 caliber bullet was found to have passed entirely through his head from a little to the left of the center of the back toward the top, coming out in his right temple, his right temple resting on his pillow. A .45 frame, .38 caliber ball Colt's pistol was found on the floor near the bed and a Winchester rifle leaned against the wall near the head of the bed. Two other pistols were found in the house.

It is said that family trouble had existed for some time, and the visits of the man Peter to the Munsey home had caused the neighbors to be giving attention to the situation just prior to the killing.

A Family of Pioneers.

Mr. Munsey was 38 years old the day before the killing; Mrs. Munsey is 32 years old. Mr. Munsey's father, John Munsey, was a pioneer in Floyd County, coming there in 1890. W. D. Munsey, of Amarillo; D. J. Munsey, C. M. Munsey and D. G. Munsey, all of Floyd

HUB ELLIS

ADVANCE OF THE SILO IN THE SOUTHWEST.

E. H. KEMP, in Farm and Ranch.

Have you cows? Are you feeding live stock? Are you not in need of a silo? Everyone owes it to himself to make the most of every opportunity offered, and these questions should be worthy of the most careful thought and consideration.

One of the great values of the silo is that, as an innovation in a way, in the Southwest, it becomes a help toward better methods in general and spurs on the owner towards obtaining far-reaching results from a revised system of management. The silo itself enables him to overcome many of the shortcomings of nature, and when is it that we have a thoroughly faultless season over the whole of the Southwest? Crops that would dry out and burn up in the field may easily be saved by converting them into silage. This green stuff when cut up and packed down into a silo begins immediately to ferment, and generates a heat which rises about as high as 150 degrees. This high temperature liberates the acid in the mass and this, together with the lack of air, serves to soften the woody substances and make available food materials that otherwise would be lost. Silaging might be termed a system of predigestion.

Silage for Beef Cattle.

The feeding of silage is practically the same as the feeding of root crops. It makes the flesh watery and soft to the touch. This has been considered an undesirable condition by some, which would no doubt be true should a straight silage ration be fed for any length of time. The digestive tracts of such animals would be much enlarged and the flesh flabby and of an inferior flavor. On the other hand, corn and roughage produces a hard, dry carcass, and burns the digestive tract in a short time. These are two extremes, however, and the course to pursue is to strike the proper medium, which is a mixture of succulent and protein-furnishing feeds. One of the most satisfactory rations for this purpose is one composed of silage for bulk and succulency and cotton seed meal for protein. Young stock may be fed half as much silage as grown animals by the same methods. Those desiring a cheap feed, available at a season of the year when there is little or no pasturage, and which is fully equal to the best grazing, if not superior in succulency, will find it in silage—corn or cane or whatever crop will afford the heaviest yields in their particular locality.

There has been considerable prejudice against the feeding of silage, but the very success of many of these doubters who have experimented for themselves in feeding it is serving as a weapon against such ideas. At one time it was necessary to conceal the identity of silage-fed cattle in order to avoid discrimination, but this is past, and during the year 1912 silage-fed cattle repeatedly topped the market at record prices.

Methods of Feeding.

When starting out a bunch of stock on this feed as much as 40 or 50 pounds per day may be given to each animal if only a straight silage ration is to be fed, but when the time arrives to put on a feed supplying protein, then the amount of silage should be cut to 25 or 30 pounds per day and the grain or meal ration built up gradually. Use of the silage keep the system cool and the appetite vigorous. Another method quite extensively practiced is to start the feeders in on a comparatively light ration of silage and meal, gradually increasing it until it is from 50 to 60 pounds of silage and from three to five pounds of cotton seed meal per head per day. While this is a good

ration in itself, it is possible to make it a great deal better by feeding a little milo maize, corn or Kaffir corn in connection, which cheapens it and makes a much better class of beef.

Silage for Milk Cows.

Silage, besides being succulent, has a fine flavor, which makes the cow consume heavily and the milk flow high. Of course other feeds must be mixed with it to balance the ration. Practically since the introduction of silos into the country dairymen have been their most enthusiastic supporters, and up to the present time more silos are to be found in the dairying section than in any other region where cattle raising is carried on. As in other types of animals, dairy cows should be fed more than 40 or possibly 50 pound of silage daily per head, and should receive other roughage in the shape of fodder, hay, etc. Possibly it would be better to allow these animals only 25 or 30 pounds of silage a day if it is desired to keep up the quality of the milk. When feeding milking cows the silage should always be given after the milking is done, and not before or during the operation, as the peculiar odor of the silage may reappear in the milk. Some objections have been raised to milk from silage-fed cows on account of the taint, it is claimed; but authorities tell us that when handled right, there is not the slightest objection to this feed. In fact, tests have been made in which many could not tell the difference between milk from silage-fed animals and those on ordinary feed.

A recent test as to the effect of silage on milk was made at the Illinois experiment station. A herd of 40 cows was divided, one being fed a silage ration while the other was given a ration of grain and clover hay. Samples of milk from these cows were sent to several hundred people. Of this number 60 preferred silage-fed milk, 29 chose the non-silage-fed milk and 11 were unable to distinguish any difference.

The rations in which silage is to be used for feeding milk cows is dependent largely upon the locality and the conditions, but generally good results should be had from a proportion of the nitrogenous feeds, as clover hay, ground oats, wheat, bran, cotton seed meal, etc.

Silage as a Horse Feed.

There are some things to keep in mind in feeding silage, and beyond these wonderful results may be had. Sour and mouldy silage should be carefully avoided, as it is poisonous.

Horses should be started in with a comparatively light feed, gradually increasing the ration till they become accustomed to it. On account of its peculiar odor some horses object to it at first, but soon come to eat it with great relish, while others take kindly to it from the start. Any objections they may have can be overcome by scattering some bran or oats over the silage. Some advise feeding a mixture of two-thirds cut straw and one-third silage, supplying a mixture that the horses will clean up. On account of the succulence of the silage, horses do fully as well through the winter months as they would on the pastures in spring.

Forms of Silos.

As is probably familiar history now to many, the first silos to be constructed in this country or anywhere else were nothing more than holes in the ground into which the forage crops were dumped, and covered over, sometimes with a layer of dirt, to exclude the air, and weighted down. Crude methods of this kind did not prevail for long, on account of the large proportion of the silage lost. The next step in silo construction was in stone, which gave way to wood, brick and cement. The first of these were rectangular and shallow, with a door in one end. One French silo, built something like 50 years ago, measured 206 x 21 1/2 feet and was about 15 feet deep, holding in the neighborhood of 1,500 tons of silage. Boards were placed on the top of the silage and the mass was weighted at the rate of 100 pounds to the square foot. Then it was found that the silage would furnish sufficient pressure to keep itself air-tight if the silos were built deep enough, and deep silos came more and more into use. From the rectangular and octagonal, they have assumed a cylindrical shape.

There are several different forms of construction, and modifications of each. Stave, brick, concrete block and solid concrete construction are all desirable. In the extreme North the hollow-walled silo should be chosen, to prevent freezing, and it would seem that this is the ideal type for the South and Southwest, on account of the long, hot, dry seasons. About the only objections raised to concrete silos is that they allow the silage to dry out in the summer, and most of these have arisen from improperly built silos. The air chamber of the hollow-walled type should prevent this. Where silos are properly built of concrete there are many advantages claimed for them, chief among

KANSAS TO RAISE BEEF FOR STATE INSTITUTIONS.

Island Near Prison to Be Used; Convicts Will Be the Cowboys.

Leavenworth, Kans., May 24.—The State of Kansas is going into the beef-raising and packing business to supply its own public institutions. Spahr Island, in the Missouri River, opposite the State Penitentiary at Lansing, is to be the ranch and it is believed that on the succulent grasses that grow on the island the State will raise cattle that, when topped with corn, will be as fine as any raised in the State.

The island contains more than a thousand acres and, being entirely surrounded by deep water, the cattle will need very little watching. Trustees from the prison will be the cowboys, and they will have quarters on the island.

Feeder cattle will be bought from the Kansas City stockyards as needed and turned loose on the island. A large area of the island is covered with willows, and to clear these out the penitentiary also has bought a herd of Angora goats. No attempt will be made to raise the goats for food or for their wool, the intention being to sell the herd again after the island is cleared.

There is a good cold-storage plant at the penitentiary. A slaughter house now is being built, and when it is finished the convicts will become butchers. The meat will be held in cold storage as needed, regular shipments being made to the other institutions.

ALFALFA'S GREAT VALUE IN FATTENING HOGS.

Its Use Doubles Value of Corn, Declares Railroad Agricultural Expert.

In a special edition of the Southwest Trail devoted to "Alfalfa in Iowa," H. M. Cottrell, Agricultural Commissioner, writes:

"An acre of alfalfa in Iowa pastured by growing hogs will make them gain as many pounds as will 40 to 80 bushels of corn, and the hogs gather the alfalfa themselves.

"Eight pounds of leafy, green-cured alfalfa hay fed with each bushel of corn given fattening hogs will increase the daily gains one-third to one-half and the alfalfa hay will put a finish on the hogs that will add to their selling value. The best results are secured by feeding one ton of leafy alfalfa hay with 250 bushels of corn. A ton of hay fed in this way will produce 350 to 700 pounds increase in gain on hogs over the same amount of corn fed alone. The hay helps the hogs digest a greater proportion of the corn which they eat.

"Alfalfa, either green or as hay, furnishes pregnant sows the protein and mineral matter necessary for the best development of the unborn pigs. It is a mild laxative, and keeps the digestion good and the body, skin and hair in a thrifty condition. Alfalfa forces suckling sows to give a large yield of milk, making heavy, vigorous pigs at weaning time and less pigs die dur-

ing the suckling period.

"Alfalfa pasture reduces by one-half the cost of feeding pigs from weaning time to the time of fattening. Growing shoats on alfalfa pasture need two pounds of corn a day for each 100 pounds live weight. Besides the gains that the corn alone will make, each acre of alfalfa will, during the summer, add 500 to 1,000 pounds to the weight of the pigs. The alfalfa pasture develops, in the growing pigs, size, frame, flesh, vigor and a large capacity for feed."

BARACAS MOVE TO CHURCH.

Young Men Decide to Change Meeting Place from City Hall.

The Wesley Baraca Class will move its meeting place to the Methodist Church. A room in the northeast corner of the church, upstairs, has been given the young men. Meetings have heretofore been held in the City Hall. The Wesley Baraca Class has a membership of forty-seven young men. The young men have adopted as their class motto "Every young man in Plainview a member of some Sunday School."

COBB & ELLIOTT buy Grain six days in the week, and talk about it on Sunday. Adv. 12

COMPLIMENTARY MOTION PICTURE MATINEES.

Below is a list of the prominent business men of Plainview who are furnishing a free matinee at the Majestic every Saturday afternoon to their out-of-town customers, and will be given for those people only who live outside of the city limits of Plainview.

The merchants and business men of the town want the country people to take advantage of this free entertainment, and want them to feel that it is a slight token of their appreciation to the people in Hale County who do their trading in Plainview. Complimentary tickets to the entertainment can be secured at any of the business houses listed below. Ask for them:

R. C. Ware Hardware Co., J. W. Willis Drug Co., R. A. Long Drug Co., Carter-Houston Dry Goods Co., Vickery-Hancock Grocery Co., Duncan's Pharmacy, J. C. Wooldridge Lumber Co., Donohoo-Ware Hardware Co., Fulton Lumber Co., Elk Barber Shop, Elk News Stand, E. T. Coleman, Coal and Grain Dealer; Boyd Grocery Co., City Bakery, Shelton Bros., Dry Goods and Furnishing Store; Sewell Grocery Co., Busy Bee Cafe; Jo W. Wayland, Men's and Boys' Furnishings; G. W. Graves Saddlery Co., The Necessity Store, Scudder Grocery Co., Hatchell & Johnson Grocery Co., G. S. Fairris' Grocery Store, Hartley-Mize Hardware Co., Plainview Lumber Co., Alfalfa Lumber Co., Cochran's Studio, Plainview News, Hale County Herald, Warren & Sansom's Grocery Store, Blasingame & Klinger, W. E. Winfield.

Any merchant not on this list who wishes to appear thereon may do so by notifying the Manager of the Majestic Theater.—Adv. 12

DON'T YOU OWE YOURSELF SOMETHING!

For beautifully illustrated literature descriptive of the numerous splendid, home-like and not unreasonably expensive resorts throughout Wonderful Colorado and along the Pacific Coast, including the Great Colorado Chautauqua at "Boulder the Beautiful," address A. A. GLISSON, General Passenger Agent, "The Denver Road," Fort Worth, Texas.

Little vacations in those directions are always worth more than they cost! —Adv. 12

FIFTY CENTS A WEEK FOR FLIES.

Blasingame & Klinger will give 50 cents each Saturday to the boy or girl who kills the most flies during the week. Do not bring the flies, but bring an order from the Fly Committee of the Civic League—Mrs. R. S. Charles, Mrs. L. D. Rucker and Mrs. A. W. McKee. This offer begins at once. —Adv. 12

We can supply your wants with the best Coal all the time. COBB & ELLIOTT. Adv. 12

Another Carload of OVERLANDS

Will be here in a few days. Have you spoken for yours? Let us demonstrate the merits of these sturdy cars to you. We want you to know the Overland. Except to Overland makers, the reason for the wonderful popularity of the Overland is best known to the eighty-six thousand who have become owners of Overland cars. Ask an Overland owner and you will see that our pride and faith are justifiable.

No other car made is so ready and willing, and so able, to go wherever you want it to go.

CATTLE CONDITIONS IMPROVE.

Kansas City Market Receives Light Run of Live Stock.

Kansas City Stock Yards, May 26.—Conditions in the cattle trade improved after Tuesday of last week except in the case of cows, which class failed to respond to the tonic of reduced supplies. The run here today is light, 7,000 head, and prices are strong on everything with the single exception of heavy steers. The approach of hot weather reduces the call for weight in killing material, though a certain number of heavy animals are wanted all summer.

Best medium weight steers are quotable up to \$8.65, heavy steers slightly under that, and bulk of fed steers \$7.50 to \$8.25, about half a dollar under a year ago. Stock cattle prices are holding up strong, sales largely at \$7.25 to \$7.90, tops \$8.15. A year ago best stock steers brought \$6.85. Feeders have followed fat cattle prices more consistently, sales at \$7.40 to \$7.75, top \$7.85.

A year ago top feeders brought \$8.40. The anomalous condition, apparently, thus exists that fat cattle are half a dollar lower than a year ago,

while stock cattle and feeders are fifty cents to a dollar higher than then. The reason for the change must be in possibility of outcome, in deciding which feed conditions, cattle shortage and some other things figure.

Twenty-seven loads of Southern came in today and sold at \$6.00 to \$7.50, strong prices, and there is a fair supply of pulp cattle here, at \$7.50 to \$8.25. Native cows bring \$5.75 to \$7.25, heifers \$6.50 to \$8.40, bulls \$6.25 to \$7.25, veal calves, which are due for a rise according to experts, \$8.50 to \$10.25.

Hogs here today, 8,000; market 10 cents higher, bulk \$8.50 to \$8.65, top \$8.65. A feature each day is the large number of droves that bring top price, six to twelve loads doing it regularly. Advancing prices are largely due to subsidence of hog runs to Eastern markets, and prices here are now close to Chicago.

Sheep and lambs are selling stronger, account of reduced supplies. Texas offerings are falling off, and native territory is comparatively bare this season. Colorado is about all out, and it will be slim picking here for packers for the next two months, and good prices should rule. Spring lambs are worth up to \$8.75,

yearling lambs, woolled, \$8.15 today, clipped lambs \$7.55, Texas muttons, \$5.00 to \$5.75, goats scarce, \$3.50 to \$4.00.
J. A. RICKART,
Market Correspondent.

CALIFORNIA TAKES LARGEST ORDER FOR AUTOMOBILES.

San Francisco Distributor Contracts for 4,000 Overlands; 2,648 Cars Sold During January.

California, with more automobiles than any other State in the Union, seems determined to maintain its place at the head of the motor car list, as recently pointed out by G. W. Bennett, vice president of the Willys-Overland Co., of Toledo, Ohio. During the month of January, 1913, according to Mr. Bennett, 2,684 new gasoline automobiles were purchased and registered in the State, more than the entire yearly output of many of the factories of the country.

"Of the total of gasoline cars purchased by Californians during January, 247 were Overlands, an excellent illustration of how the American people appreciate the medium-priced but high-grade car," said Mr. Bennett. "Every day our sales department reports that more Overlands are being sold in the West, California being by no means the only Western State that is getting new marks for Overland sales. While California this season received the largest order of motor cars ever sold, when J. W. Leavitt & Co., San Francisco distributors of the Overland, contracted for 4,000 cars at our factory recently, the other coast and mountain states are also increasing their demands steadily. The business the Overland Company now does west of the Mississippi is practically as great and fully as important as that enjoyed in the more thickly populated East."

CITATION BY PUBLICATION.

THE STATE OF TEXAS,
To the SHERIFF or any Constable of Hale County—GREETING:
You are hereby COMMANDED to SUMMON the heirs of W. H. H. Kilty, by making publication of this citation in some newspaper of Hale County, Texas, if there be a newspaper published therein, but if not, then in the nearest county where a newspaper is published, once in each week for eight successive weeks previous to the return day hereof, to be and appear before the Honorable District Court of Hale County, Texas, at the next Regular Term thereof to be holden in the

County of Hale, at the Court House thereof, in the City of Plainview, Texas, on the 4th day of August, 1913, then and there to answer a petition filed in said Court on the 23rd day of May, 1913, in a suit numbered on the docket of said Court, No. 960, wherein B. E. Crego is plaintiff and the heirs of W. H. H. Kilty, deceased, are defendants; the nature of the Plaintiff's demand as stated in said Petition being as follows:

STATE OF TEXAS,
County of Hale.)
IN THE DISTRICT COURT,
August Term, 1913.
To the Honorable District Court of Said County:

Now comes B. E. Crego, of Aurora, State of Illinois, hereinafter styled Plaintiff, and, complaining of the Heirs of W. H. H. Kilty, deceased, whose names and places of residence are to Plaintiff unknown, hereinafter styled Defendants, shows and represents to the Court:

That heretofore, on the 1st day of August, 1912, Plaintiff was lawfully possessed of the following described tract of land lying and being situate in Hale County, Texas, holding, owning and claiming the same in fee simple, to-wit: The J. L. King Homestead Pre-emption Survey, described by metes and bounds as beginning at the Northeast corner of the W. F. Addison Survey; thence east 950 varas; thence south 950 varas; thence west 950 varas, to the northeast corner of the J. McClinton Homestead Pre-emption Survey; thence north to the place of beginning, and containing one hundred and sixty acres of land; and that on the day and year aforesaid the Defendants unlawfully entered upon said premises and ejected the Plaintiff therefrom and unlawfully withhold from him the possession thereof to his damage in the sum of Three Thousand Dollars.

Plaintiff further shows to the Court that he claims and owns said land by chain of title as follows: 1st, Patent from the State of Texas granting said land to J. L. King; 2nd, Deed of General Warranty from said J. L. King and wife conveying said land to Herman Schulz, dated October 1st, 1908, and of record in the Deed Records of Hale County, Texas, Vol. 17, pages 203-4; 3rd, Deed from said Herman Schulz conveying said land to W. H. H. Kilty, dated May 27th, 1910, and of record in the Deed Records of said Hale County, Texas, Vol. 24, pages 623-4, in which deed of conveyance the Vendor's Lien was expressly retained

to secure the payment of four notes of even date with said deed, each for the sum of \$425.00, and due respectively July 1st, 1912, 1913, 1914 and 1915, and each note providing that failure to pay any note or any installment of interest when due shall at the option of the holder mature all said notes; 4th, Transfer and assignment from said Herman Schulz of said notes to this Plaintiff, which transfer and assignment also conveyed to this Plaintiff all the right, title and interest owned or held by said Herman Schulz in or to said land, and which transfer and assignment was in writing, dated July 1st, 1910, and recorded in the Deed Records of Hale County, Texas, Vol. 25, page 357, and conveyed to this Plaintiff the superior legal title to said lands;

That the only title or interest in or to said lands or any part thereof held or claimed by Defendants, so far as known to this Plaintiff, is under said deed from Herman Schulz to said W. H. H. Kilty, above described. And Plaintiff says that said notes in said deed mentioned are long since past due and have never been paid, and are and remain wholly unpaid, and

Plaintiff has rescinded said contract of sale, because of the failure on the part of Defendants and said W. H. H. Kilty to pay said notes. And Plaintiff further shows that said W. H. H. Kilty is dead.

Wherefore Plaintiff prays that Defendants be cited by publication as provided by law in such cases, and that upon a hearing he have judgment for the title, restitution and possession of said above described tract of land, and for all relief to which under the law and the evidence he may be entitled.

MATHES & WILLIAMS,
Attorneys for the Plaintiff.

HEREIN FAIL NOT, and have you before said Court on the first day of the next term thereof, this WRIT, with your return endorsed thereon, showing how you have executed the same.

Given under my hand and seal of said Court, at my office in Plainview, this the 23rd day of May, 1913.

Wonderful!

The New 1913 Saginaw With the Patented Angle Steel Rib

Last season's Saginaw Silo was pronounced utterly perfect by dairymen and stockmen all over the country. For 1913 it was wholly unnecessary to attempt improvement. Yet, despite this, we came out with this 1913 Model. The big feature of the 1913 is the **ANGLE STEEL RIB**. This ingenious invention adds about 50% to the life of a silo. And that's wonderful, when you consider the Saginaw is already known to be the strongest and most durable silo ever built.

Doing the "Impossible"

The Angle Steel Rib has done what other silo makers only a year ago considered impossible. It has given you **Durability and Stockmen's Praise** which the best silo ever made can't give. **SAFETY OF LIFE**. All because the Angle Steel Rib absolutely prevents any upward-slipping of the staves. Moreover, this marvelous invention forever ends the remote possibility of your silo caving in when empty.

Other Noted Features

The Saginaw was famous first as "The Silo With the All-Steel Door Frame." Then followed the Saginaw **Inner Anchoring Hoop**. Next came the celebrated Saginaw **Blank Anchor**. And now comes the Angle Steel Rib—the most astounding feature of all.

The McCLURE COMPANY

Formerly Farmers' Handy Wagon Co.

T. H. BROWN, Agent, Plainview, Texas

5 Big Features

The Saginaw is far the most popular silo on the market. Five mammoth silo factories have had to be built. Last season we received orders for 547 silos in a single day.

Strong as a Skyscraper

The Saginaw silo, with its steel frame stands as solid as a modern city skyscraper. It cannot blow down; it cannot twist; it doesn't warp; it cannot collapse. It is erected on its foundation. Like a Giant Oak, it is rooted to the ground by the Saginaw Anchoring System.

Bright, Clean Silage

No rank, sour silage ever comes out of a Saginaw. It is sweet and pure clear to the edge, right next to the wall. Animals love the silage better and thrive wonderfully on the rich, succulent food. Don't get a silo that spoils silage.

Get Latest Silo Book

Our latest Book on Silos is about ready for mailing. It not only fully describes the 1913 Saginaw, but also contains a wealth of information on Silo Building and Silage. Don't miss getting it. Write for it—or better, come to and see your book and we'll talk it over.

SUMMARY OF WORLD NEWS OF THE WEEK.

Henry M. Flagler, "King of Florida," capitalist and railroad magnate, who spent \$100,000,000 in the construction of the Florida East Coast Railway and the famous "Oversea Railroad" and the erection of sumptuous hotels, died at his home at Palm Beach, aged 83. His fatal illness dated from a fall downstairs at his home several weeks ago. He was the son of a poor Presbyterian minister. His great fortune was founded on his early association with the Rockefellers. His first wife aided him greatly in building up his fortune. She became insane in the '90s. In 1900 the Florida Legislature, at Flagler's behest, made insanity a ground for divorce. Flagler obtained a divorce and ten days later was married to Miss Mary Lily Kenan, 36, a North Carolina woman. The funeral took place from Memorial Presbyterian Church at St. Augustine. Interment was in the Flagler mausoleum in the church yard.

Secretary of the Navy Daniels has announced his belief that a Government owned steel plant is the best way to escape the "hold-up" prices which the American steelmakers demand, in furtherance of an agreement among them. Secretary Daniels declares that there is no competition between the armor plate makers, and that the Government is therefore compelled to pay extortionate prices.

William Lorimer, of Illinois, has notified close friends that he will be a candidate for United States Senator at the Republican primaries next April. A preliminary organization has been started with that end in view.

The Kansas City Court of Appeals decided, in the case of James Collet against Mary Collet, in which divorce was sought on the ground that Mrs. Collet refused to follow her husband to a farm, that a wife is not bound to follow her husband wherever he goes, and that refusal to do so does not constitute desertion.

The Cincinnati street car strike, after continuing ten days, was settled by the company agreeing to recognize the union, agreeing to increase wages of union and nonunion men without discrimination, and agreeing to reinstate all men who were discharged after the union was formed and before the strike was declared. The men concede the open-shop principle. The amount of wage increase is subject to arbitration.

The torpedo boat Vesuvius, at practice in Narragansett Bay, was pierced in the starboard side of her stern, below the water line, by a torpedo, which, because of a derangement of its steering gear, traveled in a circuit, and struck the boat by which it had been discharged. The boat was beached on the east side of Hope Island.

California's alien land bill was signed by Governor Johnson over the protests of Japan and the representations of President Wilson and his personal envoy, Secretary of State Bryan. It will become operative August 10, unless held in abeyance by a petition to submit the question to a referendum vote.

James L. Bacon, member of the Eighteenth General Assembly from Teller County, Colorado, was arrested at Cripple Creek, Colo., on a warrant charging him with the murder of his wife and his stepdaughter, Josephine Davidson. The women were killed in an explosion that wrecked the Bacon home, April 28. Bacon himself was severely injured.

The coroner's jury held Editor Fay B. Slate, of the Mount Auburn (Ill.) Tribune, for the death of Mayor D. P. Windsor, of Mount Auburn. Slate shot Windsor in a fight in a railroad station at Mount Auburn, and he died in a hospital at Springfield. Slate is in jail at Taylorville.

Governor Major, of Missouri, who announced recently that he never read newspapers, because he wanted to be uninfluenced in his decisions on public questions, has subscribed to a clipping bureau and his stenographer is filing away in scrap books for the Governor's perusal all the contents of newspapers and magazines on his administration.

Stephen Dudley Field, inventor of the electric trolley car, the stock ticker, the quadruplex telegraph system and many other mechanical appliances which have revolutionized modern conditions, died at his home, in Stockbridge, Mass., in the house in which he was born, aged 67.

In the four months that the parcel post has been in operation, more than 150,000,000 packages have been carried and the increase has been about 10,000,000 packages monthly.

The \$10,000 libel suit of Col. Theodore Roosevelt against George A. Newett, of Ishpeming, Mich., publisher of the Iron Ore, will be tried at the term of the Marquette County Circuit Court beginning Monday. The alleged libel was contained in an editorial printed October 12, 1912, when Roosevelt was in the midst of his campaign. In an affidavit filed by Attorney James H. Pound, of Detroit, representing Roosevelt, it is stated that the claim for damages rests on the words, "Roosevelt lies and curses in a most disgusting way. He gets drunk, too, and that not infrequently, and all his intimates know about it."

The Asiatic Exclusion League of California instructed its Executive Committee to draft a petition for a referendum vote on the alien land bill, to be circulated immediately after Governor Johnson signs it. The league objects to the clause permitting the Japanese to have year leases. It wants the Japanese and Chinese excluded from both ownership and leaseholds under all conditions. Olaf Tveitmo, one of the convicted dynamiters of the Los Angeles Times Building, was re-elected president of the league and presided over the meeting.

Vilhjalmur Stefansson, who will head in June the largest body of scientific men ever assembled for Arctic research on an Arctic voyage, has announced that Capt. Robert Bartlett, who was sailing master and ice navigator on the Roosevelt with Peary when the pole was discovered, will hold the same position, practically hold the same position, practically second in command, on the Stefansson expedition.

In the trial of President William M. Wood, of the American Woolen Co., Frederick E. Atteaux and Dennis J. Collins, at Boston, on the charge of conspiracy to "plant" dynamite at Lawrence during the textile strike in 1912, Collins testified for the prosecution and confessed a part in the alleged plot, although insisting that he was unaware at the time that he was handling dynamite. He did not definitely connect Wood or Atteaux with the conspiracy, though he admitted he had told the prosecutor that Wood was back of him.

Former County Judge R. E. Bratton, of Fort Worth, Texas, who resigned recently, following a grand jury investigation of construction contracts, was arrested on an indictment charging him with accepting a bribe of \$300 from W. M. Robinson for acquitting him on a charge of gambling.

B. Sanders Walker, Macon, Ga., banker, died early Thursday morning from the effects of bichloride of mercury poison, taken by mistake a week ago. The doctors told him then death was certain, as there was no antidote for the poison. The game, cheerful fight that he made for life attracted the attention of the country. Just before becoming unconscious he said: "If I am dying, then the sensation is not as it is generally pictured. If this be dying, then none need fear its terrors."

Preston T. Akers, cashier of the Farmers' Bank, Smithville, Mo., has confessed that he forged the names of a number of prominent men to notes aggregating \$52,000 to cover up the bank's losses on bad loans that he had made to old friends and neighbors.

Lieutenant-Governor O'Hara, of Springfield, Ill., was exonerated by a special senatorial committee of charges contained in an affidavit of Miss Maude Robinson that was designed to convey the impression that O'Hara had been guilty of improper conduct with her. The committee found that Sam Davis had procured the affidavit to embarrass the work of the Senate Vice Commission.

Senator Juul introduced in the Illinois Legislature a bill to create a minimum wage commission of three members, and fixing the minimum wage for women workers at \$7.50 a week until the commission shall determine upon another figure. The members of the commission are to receive \$2,000 each per year.

Thaddeus Schwallbog, for 15 years confidential banker and steamship agent for East St. Louis, Ill., Poles, departed for Poland without settling up with clients, who caused his wife's arrest when she tried to leave the city. About 60 clients are said to have had \$17,000 deposited with him. Two of them have brought suit. Mrs. Schwallbog says she will turn over 10 lots and three houses in St. Louis for the benefit of creditors. After this is done she will probably be released.

Grocers gathered in St. Louis from all over the United States for the convention of the National Association of Retail Grocers are undecided whether the manufacturer, the farmer or the consumer is most to blame for the

You Can Prevent Hog Cholera— Kill Hog Worms and Have Fat Hogs.

Don't let Hog Cholera and Worms scare you—it's an easy matter to prevent them. This positive fact is vouched for by thousands of Farmers and Hog Raisers in nearly every state in the Union. Just feed with the daily hog ration a small quantity of

MERRY WAR POWDERED LYE

It renders hogs immune to Cholera—tones them up; keeps them on their feet; makes them fat and sleek; destroys Worms, increases your pork profits.

MERRY WAR POWDERED LYE has proved itself to be the surest preventive of Hog Cholera, exterminator of Worms and the best hog conditioner and fattener in the world. Here is evidence that will convince you. Mr. H. H. Unterkircher of Wever, Iowa, writes: "I am recommending MERRY WAR POWDERED LYE to everyone I see, as it is a great hog conditioner and worm destroyer."

sons, who are now in college. Edward S. Lewis has been made president and manager. A prominent Democrat credits Roberts with a desire to project himself into National politics as the backer of former Governor Joseph W. Folk for the Presidency in 1916. It is understood that the purchase price was about \$450,000, of which approximately \$50,000 was in cash and the rest of the obligations guaranteed by Roberts. Roberts started in the shoe business as a clerk and has accumulated a fortune of more than \$3,000,000.

While joking with members of his family, John A. Scudder, 83 years old, wealthy retired capitalist, died suddenly at his home, 17 Vandeventer Place, St. Louis, from a stroke of apoplexy. He was one of the group of wealthy St. Louisans who laid out Vandeventer Place and made it the most beautiful residence district in St. Louis. He was born in Maysville, Ky., was for many years a steamboat captain, was one of the organizers of the Anchor Line and was for many years its president.

Dr. E. W. Saunders, of St. Louis, has obtained a "limberneck chicken," in response to his request, made through the Sunday Post-Dispatch, and will use it in experiments to determine the connection which he believes exists between limberneck and infantile paralysis. A monkey and other small animals are to be infected and if paralysis ensues the connection of the two diseases and the danger of communication by flies will be established.

Mrs. Featherbloom, the lady ostrich at the Zoo in St. Louis, caused considerable excitement by laying a four-pound egg, which is expected, in due time, to evolve into an ostrich chick. The egg has been placed in an incubator, and 42 days must pass before it will hatch.

Miss Mary Bulkley, Chairman of the Industrial Relations Committee of the Central Council of Social Agencies, testifying before the Women's Wage Senatorial Investigating Committee at the Planters Hotel, said that the minimum wage on which working girls can live in St. Louis is \$8.75 a week. They said that many cash and register girls work in St. Louis stores for \$2.50 to \$3.50 a week, and that office building scrub women are paid from \$20 to \$30 a month. They declared that nut pickers are the poorest-paid workers in St. Louis.

Mayor Kiel, of St. Louis, discussing proposals for the new charter at a meeting of the Board of Freeholders, declared political bosses were a necessity, said he was one, and that he was formerly a ward boss. He defended the House of Delegates, and said he hoped no effort would be made to abolish it.

Five thousand city employees, including judges of the Circuit Court, the Circuit Attorney and his assistants and the forces of all eleemosynary and penal institutions in St. Louis have not received any salary since April 1, and are anxiously awaiting an end of the deadlock between the Mayor and the House of Delegates on the tax increase bill. The Republican Delegates refuse to support the tax measure, which carries a 10 per cent increase to complete the wagon approaches and the upper deck of the free bridge. The Mayor is also against it, and, though the House is Democratic, it is not sufficiently so to pass the bill over the Mayor's veto.

Revenue officers, in a night raid, captured six moonshiners in the Ozarks near Bartley, Mo., destroyed their still and confiscated a barrel of whiskey. The men arrested were Bill Anderson, George Conor, James Connor, George Baker, John Davis and Jack Kellem. They were captured as they slept, and had no chance to use the shotguns and revolvers under their pillows. The moonshiners had defied local authorities by moving back and forth across the line between Oregon and Ripley Counties.

The directors of the Schurz-Pretorius-Daenzer Memorial Association overruled the action of the committee of the association in selecting the design submitted by W. Wilhelm Wandschneider, of Berlin, for the \$27,000 monument to the three St. Louis German-American journalists. A new award will have to be made. Wandschneider had sailed for America to begin work on the memorial before the committee's decision was overruled. Dr. Frederick Kolbenheyer told the directors they were "damned fools" and resigned as chairman of the committee, after which he said "Let us have peace," and shook hands all around.

R. J. Menns, an Illinois Terminal brakeman, died at St. Joseph's Hospital in Alton, Ill., six hours after a man who has not been identified struck him with his open hand and knocked him down. Menn's head

struck a curbstone. The unidentified man struck him because he was jeering at a countryman in overalls.

At the forty-seventh annual encampment of the Illinois G. A. R. at Alton, Ill., J. H. Crowder, of Bethany, Ill., was elected Department Commander. He received 250 votes. John M. Snyder, of Canton, received 72 votes. Mattoon was chosen for next year's encampment. The Daughters of Veterans elected Mrs. Drucilla Ingalls Thayer, of Chicago, president. The ladies of the G. A. R. elected Mrs. Ida E. Wright, of Chicago, president, over Mrs. Alice Wilson, of Chicago. The Woman's Relief Corps elected Mrs. Edna Walker, of Chicago, president. Nine hundred veterans were in the parade. Governor Dunne and members of his staff rode with them. Old soldiers who could not march were carried in a double line of automobiles.—St. Louis Post-Dispatch.

CONCRETE FLOOR IS BEST FOR THE HOGS.

Only Slight Amount of Bedding Necessary to Keep Them from Taking Cold, Says Breeder.

"I am using concrete floors in our hog houses and have found that I need very little bedding—just enough to keep the body of the pig from coming in contact with the concrete. It is easy to keep a concrete floor warm if the cold air cannot get under it," says a successful hog raiser, writing in the St. Louis Post-Dispatch.

"With 100 pigs in the house, during zero weather, I had to keep some of the windows and the upper end doors open for ventilation. I have never had pigs get stiff from lying on concrete floors. Good, dry bedding, straw or shredded fodder, is used, and is removed as soon as it becomes damp and replaced with a fresh supply. Ventilation is such that cold winds cannot blow in on the pigs. I disinfect the houses often with air-slaked lime.

"A dipping tank is essential, not only for destroying lice, but for promoting health conditions in general. I dip my pigs once in two months, more often if the animals are bothered with lice, and use any of the dip on the market that have crude oil as a basis. I do not dip in winter, but crowd the hogs into the house and spray them, leaving them until dry. I spray hogs, walls, bedding and all.

"I keep wood ashes and a little lime in a self-feeder before the pigs all the time. Hogs need more mineral matter than they usually get. During the summer the hogs should be provided with ample shade."

UNIVERSITY HELPS ALL CLASSES.

Extension Department Attracts Many; Country Schools Becoming Social Centers.

Besides giving instruction by correspondence to more than 1,000 students and furnishing lectures to many communities in Texas this year, the Department of Extension of the University of Texas has given valuable help to the farmers of the State in furnishing suggestions regarding the marketing of crops so that a fair return for labor can be secured, says the latest University Bulletin.

In addition, many country schools have been uplifted by the visits of Misses Stoltzfus and Rich. Miss Stoltzfus has succeeded marvelously at Tuleta, Texas, in making the country school the social center of the community. She is now extending this work throughout Texas. Miss Rich is primarily interested in doing good cooking, and farmers' wives have been eagerly interested in her demonstrations in cookery wherever she has been. Communities wishing the visits of these ladies should write to the University, at Austin.

MADE FIRST HAM AND SANDWICH

Mrs. Mary Ann Inginn, Known to Chicago University Students, Dead.

Chicago, Ill., April 30.—Mrs. Mary Ann Inginn, said to have been the creator of the ham and egg sandwich, and known to students at the University of Chicago merely as "Mary Ann," died yesterday. Twenty years ago she established a small restaurant in one corner of the university field, and soon acquired a large patronage among the students.

She knew every athlete who was in training, and always refused to sell pies to those who were trying to make the teams.—Kansas City Star.

DR. SCOTT'S WELL A WONDER.

F. B. Reed, of Rogers, Texas, was a visitor in Plainview yesterday and Tuesday. Mr. Reed went out Tuesday afternoon to see Dr. Scott's new well. "It is a wonderful well," Mr. Reed said. "I had never dreamed it possible to pump such a river of water out of the ground." Mr. Reed owns land in Crosby County.

COLORADO AUTO HIGHWAY MEETING HELD AT CHILDRESS.

Denver Towns Organize Panhandle Division of Colorado-to-Gulf Highway.

About 250 delegates from various towns along the Fort Worth & Denver Railroad met in Childress Thursday of last week for the purpose of forming a permanent organization of the Panhandle Division of the Colorado-Gulf Automobile Highway. The call for meeting was issued by Seth B. Holman, secretary of the Amarillo Chamber of Commerce.

O. L. Williams, of Bowie, was elected President; W. A. Bennett, of Memphis and W. D. Talley, of Wichita Falls, vice presidents, and A. W. Read, of Memphis, was chosen secretary-treasurer.

The purpose of the meeting, as stated by the articles of organization, is, among other road improvements, "to build and maintain a permanent highway between Amarillo and Fort Worth, Texas, and to deliver same as a part of the Colorado-Gulf Highway. The organization recommends that a general road supervisor be engaged, whose duty it shall be to furnish

Look at Them!!

Every bean whole—not a skin broken, yet every one cooked to that state of palatable meelness that in beans means perfection. Appetizingly blended with spicy tomato sauce, with just enough fine, juicy pork added to delicately flavor the whole.

White Swan
Pork and Beans
With Tomato Sauce

"Better than the law requires"

The tomato sauce is cooked with the beans—not just poured on afterward. Cooked in the can. Every bit of wholesome richness and appetizing flavor is retained. The beans are thoroughly washed and soaked in pure water for twenty-four hours before cooking. They could not be cleaner if prepared and cooked in your own kitchen. Ready to serve—a dish delightfully wholesome and tempting—hot or cold.

Your grocer will be glad to recommend them because he knows that you'll come back for more

Waples-Platter Grocer Co.

TEXAS INDUSTRIAL NOTES.

Sulphur Springs.—The packing and canning factory here is being put upon a solid financial basis. The full amount of the capital stock of \$18,000 has been subscribed. W. I. Irwin was made general manager. The stock is largely owned by truck-growers, and the plant is being overhauled and new equipment installed in time for this season's pack.

Austin.—A definite program has been arranged by the various committees in charge of the entertainment for the Thirtieth Anniversary Reunion of the University of Texas, on June 8, 9 and 10. Features will be a barbecue, addresses by prominent speakers, business meeting of the Alumni, Commencement Exercises, Parades and a Grand Ball. Fifteen thousand invitations have been sent out.

Hamilton.—An especially attractive program was rendered here at the annual celebration and summer carnival, May 22 and 23. There was an abundance of music, sports, parades and speeches. J. C. Travilla, the good roads expert, delivered an address on road construction.

Pilot Point.—The voters of Pilot Point, Justice Precinct No. 2, will vote June 21 on the question of issuing \$125,000 worth of road improvement bonds. This will be the second precinct in Denton County to vote on a road bond issue.

Houston.—The Chamber of Commerce recently voted to create and maintain a fund of \$30,000 with which to work for conventions and gatherings of a similar nature.

Crosbyton.—The architect's plans for the new \$40,000 brick court house to be erected here have been accepted by the Commissioners' Court. The architect has advertised for bids for the construction of the building.

Beeville.—A petition requesting the Commissioners' Court of Bee County to call a good roads bond election to vote upon the issuance of \$100,000 in road improvement bonds is being freely signed.

Alvin.—At a recent meeting of the Texas fig growers at Houston, for the purpose of organizing for a better marketing system, W. A. Stockwell, of this place, was elected president, and Dr. Elva Wright, of Houston, secretary and treasurer. The standing committees will meet again before the marketing season opens.

San Angelo. The new \$10,000 automobile fire engine, to be used by the local fire department, has arrived and has been given an official test. The machine was accepted by the city authorities. It is said to be one of the finest in the State, and was manufactured by a Texas company.

Arlene.—The Commissioners' Court of Taylor County has selected the architect for the new court house. The building will cost \$150,000, and work is scheduled to begin at once.

Big Springs.—The West Texas Fair Association was recently organized here. Big Springs, Midland, Pecos and Pascal compose the circuit.

Childress.—The live wires and business men of this place have organized a Commercial Club, which was recently launched at an enthusiastic meeting comprising almost the entire citizenship of the community.

Mount Pleasant.—Preparations have been made by the Commercial Club for an elaborate entertainment for the excursionists who will come here on Thursday, May 29, to celebrate the inauguration of regular passenger service from Paris to Mount Pleasant on the Paris & Mount Pleasant Railroad. On May 30 an excursion from Mount Pleasant to Paris will be run.

Dallas.—The architect's plans for the new eight-story county jail have been formally accepted by the Dallas County Commissioners. It will cost \$300,000, and will rank among the finest in the United States.

Wichita Falls.—The contract for

SPECIAL-TRAIN EXCURSION TO YELLOWSTONE NATIONAL PARK.

Join the Southern Methodist University's Second Annual Personally-Conducted Special-Train Excursion to Yellowstone National Park. It is easily America's Greatest Scenic and Health-Getting Trip, and will leave Fort Worth July 4th. Total expense, \$110 to \$140.

For particulars, including literature illustrative of the numerous interesting sights and unusual experiences to be enjoyed, write FRANK REEDY, care Southern Methodist University, Dallas, Texas. —Adv. tf.

the new \$30,000 ward school building has been let and work will begin at once, in order to have the structure completed in time for the reopening of school next fall.

Gainesville.—Plans for the new \$15,000 Carnegie Library have been completed, and construction will commence as soon as the contracts can be placed.

Rogers.—The Farmers' Cotton Oil Company has been organized here and will erect a \$50,000 cotton oil mill. A site of four acres lying adjacent to the town has been purchased and the contract for the construction of the necessary buildings will be awarded as soon as possible.

Longview.—The fruit growers of the adjacent territory to Longview met recently in the Longview Chamber of Commerce and perfected organization for marketing this season's fruit crop. The crop is very promising at this time, and it is estimated that over a hundred cars will be shipped out of this city, and many more from Willow Springs, Kilgore, Foots and Gladewater.

Brownwood.—A new gas well thought to have a stronger capacity than 3,000,000 cubic feet a day was recently brought in near Bangs, twelve miles from Brownwood. The gas was found at a depth of 1,120 feet.

Childress.—Orders have been placed by farmers and feeders of live stock for approximately 100 silos to be erected in this vicinity before September 1. The stave and wooden silos are proving the favorites, and Fort Worth concerns are getting most of the orders.

Fairbanks.—The organization of the Fairbanks Truck and Fruit Growers' Association here recently has resulted in improved shipping and marketing methods being put into effect by the members in this vicinity of the Gulf Coast county.

Yoakum.—Plans have been completed for the erection of six more brick store buildings in Yoakum, two of the structures to be two-story buildings and the other four to be one-story.

Fort Worth.—The largest single order of binding twine ever sold to a Tarrant County farmer was purchased by William H. Eddleman, president of the Western National Bank of this city, who, besides directing the affairs of his financial institution, conducts a big farm in Tarrant and Parker Counties. He will begin to harvest his wheat crop of 2,000 acres, which was planted early in September, at once, and recently bought 4,200 pound of binder twine.

San Angelo.—Secretary Owen, of the Chamber of Commerce, has mailed out letters to all of the old-time cowmen inviting them to attend the cowboys' reunion which will be one of the features of the San Angelo fall fair this year. Fair week will be homecoming week, and everybody who ever lived in Concho County will be invited to return for a visit.

Galveston.—The total exports from the port of Galveston during April amounted to a total value of \$13,775,970. These exports went to twenty foreign countries, Great Britain, Germany and Spain receiving the heaviest shipments, as usual.

Corsicana.—Qat harvest is in progress in all sections of Navarro County, and the yield is generally heavy.

Holland.—A new brick cotton gin plant is being erected here by the Barton Gin Company. It will be one of the finest gins in the State, and was inspected recently by the officers of the gin company at Plano, who have decided to erect a plant similar to the one at this point.

Spur.—The public roads in Dickens County will be worked by a small outfit, under the direction of the County Commissioners. A contract has been let for the purpose and work has already started.

Denison.—Twenty-eight building permits issued by the city during April amounted to \$51,950. There has been a total of ninety-one building permits, aggregating \$122,030, in this city since January 1.

Beaumont.—Local boat builders have under way a novelty in boat construction. It is a mower for cutting grass in the beds of rice canals. It is the second of its type to be made here, the first one performing its work successfully.

Marshall.—The carnival which has just closed here is regarded as one of the most successful of its kind ever held in this city. The carnival was conducted under the auspices of the firemen's club, and a large sum was realized for the fire boys.

A Very Fine Smoke
A Very Small Price

Surprise yourself—right now. Step up to the nearest cigar case and exchange a nickel for one J. M. M. SMOKER. Smell it, taste, light it, smoke it. Delight yourself with a taste, a fragrance and aroma just as delicious as you have been accustomed to in cigars costing from twice to five times as much.

If you'd rather pay a nickel for a cigar than a quarter you can't do better than get the J. M. M. SMOKER. You'll get your money's worth, and then some. You'll get a genuine Cuban, hand made, clear Havana—*and all the pleasure and satisfaction that only a genuine Havana cigar can give. It's a fact. One smoke will prove it.*

LONG DISTANCE SERVICE

is of distinct value to the farmer and to all dwellers in rural districts—Communication between members of the family widely separated from each other can be quickly and satisfactorily established by telephone and anxiety and worry dispelled in times of sickness or trouble.

Rural service is supplied at very low cost. Our nearest manager will furnish information, or write to

The Southwestern Telegraph and Telephone Company
DALLAS, TEXAS

Salves Can't Cure Eczema

In regard to skin diseases, medical authorities are now agreed on this: Don't imprison the disease germs in your skin by the use of greasy salves, and thus encourage them to multiply. A true cure of all eczematous diseases can be brought about only by using the healing agents in the form of a liquid.

WASH THE GERMS OUT.
A simple wash: A compound of Oil of Wintergreen, Thymol, and other ingredients as combined in the D.D.D. Prescription. This penetrates to the disease germs and destroys them, then soothes and heals the skin as nothing else has ever done.

A 50 cent bottle will start the cure and give you instant relief.

We have made fast friends of more than one family by recommending this D.D.D. Prescription to a skin sufferer here and there, and we want you to try it now on our positive pay guarantee. D.D.D. Soap keeps the pores clean; ask us.

R. A. LONG DRUG CO.

Success depends largely upon Good Health

In your race for success don't lose sight of the fact that only through good health can you attain success.

The tension you must necessarily place upon your nerves, and the sacrifice of proper exercise you have to make at times must be balanced in some way.

Dr. Pierce's Golden Medical Discovery

is the balancing power—a vitalizing power. It acts on the stomach and organs of digestion and nutrition, thus purifying the blood and giving strength to the nerves, indirectly aiding the liver to perform its very important work. Dr. Pierce's Golden Medical Discovery has been successful for a generation as a tonic and body builder. Sold by medicine dealers in liquid or tablet form—trial box of "Tablets" mailed on receipt of 50 one-cent stamps.

If in failing health write Dr. R. V. Pierce's faculty at Invalids' Hotel, Buffalo, New York.

DR. PIERCE'S GREAT FAMILY DOCTOR BOOK.
The People's Common Sense Medical Advisor—newly revised up-to-date edition—of 1008 pages, answers hosts of delicate questions which every woman, single or married, ought to know. Sent FREE in cloth binding to any address on receipt of 31 one-cent stamps to cover cost of wrapping and mailing only.

My Doctor Said

"Try Cardui," writes Mrs. Z. V. Spill, of Hayne, N. C. "I was in a very low state of health, and was not able to be up and tend to my duties. I did try Cardui, and soon began to feel better. I got able to be up and help do my housework. I continued to take the medicine, and now I am able to do my housework and to care for my children, and I feel as though I could never praise Cardui enough for the benefits I have received."

TAKE CARDUI The Woman's Tonic

Cardui is successful, because it is made especially for women, and acts specifically on the womanly constitution. Cardui does one thing, and does it well. That explains the great success which it has had, during the past 50 years, in helping thousands of weak and ailing women back to health and happiness.

If you are a woman, feel tired, dull, and are nervous, cross and irritable, it's because you need a tonic. Why not try Cardui? Cardui builds, strengthens, restores, and acts in every way as a special, tonic remedy for women. Test it for yourself. Your druggist sells Cardui. Ask him.

Write to: Ladies' Advisory Dept., Chattanooga Medicine Co., Chattanooga, Tenn. for Special Instructions, and 64-page book, "Home Treatment for Women," sent free. 1/3

QUININE AND IRON—THE MOST EFFECTUAL GENERAL TONIC

Grove's Tasteless chill Tonic Combines both in Tasteless form. The Quinine drives out Malaria and the Iron builds up the System. For Adults and Children.

You know what you are taking when you take GROVE'S TASTELESS chill TONIC, recognized for 30 years throughout the South as the standard Malaria, Chill and Fever Remedy and General Strengthening Tonic. It is as strong as the strongest bitter tonic, but you do not taste the bitter because the ingredients do not dissolve in the mouth but do dissolve readily in the acids of the stomach. Guaranteed by your Druggist. We mean it. 50c.

There is Only One "BROMO QUININE" That is LAXATIVE BROMO QUININE. Look for signature of R. W. GROVE on every box. Cures a Cold in One Day.

RELIEVES PAIN AND HEALS AT THE SAME TIME

IRRIGATION VS. NON-IRRIGATION.

"We are not opposed to irrigation, but we do believe that irrigation is doing this country harm, in that it may lead people to believe that crops cannot be grown here without irrigation." That is the suggestion of a contemporary.

Oh, no; irrigation is merely an insurance policy for your crop. It guarantees maximum yield. It makes certain your income, and fixes the value of your land from \$150 to \$500 an acre, as against a maximum valuation (under most favorable conditions) of \$100 an acre when rainfall must be depended upon.

Under irrigation 40 acres will support a family in comfort—more comfortably than a quarter of a section will do in Missouri, Iowa or Illinois—where we "farm as nature intended that we should." That means four families living where one might live before, and living immensely better than the one family did live.

Isn't all this worth while? Won't the South Plains "come into its own" when every farmer is irrigating his 40-acre tract? And is it quite fair to the people who own the land or to those who are seeking homes to let such wealth go undeveloped?

Isn't a question of whether or not vegetation will grow without irrigation. It is a demonstration in dollars and cents of how much wealth lies underneath our feet.

We are for irrigation!

COMING TO PLAINVIEW.

It has always been necessary for persons coming to Plainview from points via the F. W. & D. C. R'y and Amarillo to spend the night in Amarillo. Until recently connections at Sweetwater made it possible to leave Dallas or Fort Worth this evening and reach Plainview tomorrow noon.

The interest of the Santa Fe and Texas & Pacific Railroads seem to have made a change necessary in the schedules—just enough change that the train west on the Texas & Pacific misses the Santa Fe coming north from Sweetwater by about half an hour. So that it is necessary to lay over practically twenty-four hours in Sweetwater and nearly half that long in Amarillo.

Perhaps the only remedy for this situation is another railroad. Undoubtedly that would relieve it. We believe that it might be remedied in some other way. If it were sufficiently impressed upon our State Railroad Commission that august body might take action. It is not at all impossible that sufficient influence might be

brought to bear upon the railroads to show them how flagrant is the injustice—not alone to Plainview, but to every citizen living along the Santa Fe Railroad from Amarillo to Sweetwater and on the Floydada branch.

Wouldn't this relief be an accomplishment worthy the best efforts of Plainview's Chamber of Commerce; even the combined efforts of every organization along the Santa Fe?

Wouldn't it be entirely fair to the people of the South Plains to have another train on the Santa Fe, any how? The trains now running are crowded every day.

SPRING LAKE.

James Reddington attended the graduating exercises at Dimmitt Saturday night.

H. M. Packard had the misfortune to cut off the end of his thumb this week.

Ivan Stuck, of near Hereford, was visiting old friends here this week.

Mrs. Cleavenger gave a social in honor of the Misses Vore Monday night.

Lloyd Baker was riding a horse Friday when the animal became unmanageable and shoved him into the wire fence, cutting him and the horse very severely.

The Lamb County Sunday School Association held their semi-yearly meeting at Spring Lake. A fine program was rendered to a large audience. The following officers were elected for the ensuing year: President, Rev. Pilley, of Olton; Secretary and Treasurer, D. B. Shifflet; Vice Presidents, Mrs. M. E. Cleavenger, Spring Lake; Mrs. William Wire, Big Square; W. W. Pugh, Olton.

PLAINVIEW.

May 26.—The singing here last Sunday was well attended by most everybody.

There was a little hot wind here Sunday.

Mr. and Mrs. Joe Barrett entertained company from East Mound Sunday.

Lem Puckett was on the sick list last week.

Mr. Zollicoffer was in our midst Saturday.

Mr. and Mrs. Hill are rejoicing over a ten-pound boy, born last week.

Bill Reese and Irma King, of Plainview, were the guests of Mr. and Mrs. Joe Harrison Saturday night.

Miss Maud Formway came in from Plainview last week.

Geo. Saunders was in this locality Sunday.

Mrs. James Pullen was a caller in Plainview Saturday.

Mrs. Puckett is visiting her son, Lem, and wife this week.

Miss Alma Williams, of East Texas, is here visiting at the home of W. G. Williams.

MISS GOODE ENTERTAINS.

Miss Burr Goode entertained Tuesday evening from 8 to 11 o'clock, honoring E. T. Adams, recently from Oxford, England, who is this week a guest at the home of Dr. J. H. Wayland.

The porch at the Goode home was prettily lighted with Japanese lanterns, and a dainty five-course evening repast was served under the clinging vines to the honor guest, Mr. E. T. Adams, Miss Mabel Wayland, Mr. B. O. Brown and Miss Katherine Duckworth.

CROSBYTON WILL CELEBRATE.

Picnic and Barbecue Planned for June 7 and 8.

Crosbyton, Texas, May 29.—Crosbyton is going to pull off the biggest picnic and barbecue ever had in that town. The following is the program as mapped out by the Commercial Club, and will be strictly adhered to,

according to advices we have received from its Secretary:

Friday, June 6th.

8 p. m.—Band Concert—by Plainview Band.

9 to 11 p. m.—Moving Picture Show.

Saturday, June 7th.

(Forenoon, at Baseball Park.)

9 a. m.—Tournament Race. Grand prize for the winner. Each rider must pay \$1.00 for privilege of riding.

10 a. m.—Bronco Busting. Three \$5.00 prizes for the three best riders.

10:30 a. m.—Ball Game between Rails and Lorenzo. Ten dollar prize for the winner.

(Noon—At Grand Pavilion.)

Barbecue Dinner, free for everybody.

Band Concert—By Plainview Band.

2 p. m.—Addresses by prominent men.

3:30 p. m. (At Baseball Park)—

Ball Game between Crosbyton and the winner of the morning game. Grand prize of \$25.00 to winning club.

7 p. m.—Band Concert—By Plainview Band.

8 p. m.—Moving Picture Show.

10 p. m.—Grand Ball.

The band will play at the moving picture show, grand ball and during the games.

Special train service between Lubbock and Crosbyton.

Specialties.

Merry-go-round; side shows; cold drink stands; exhibitions of animals and reptiles; high strikers; fireworks, etc.

Visitors will be welcome.

CROSBYTON IS WET.

J. W. Burton Says Plenty of Rain Has Fallen.

J. W. Burton and Mrs. Burton and S. F. Sullenberger, Assistant Manager of the C. B. Live Stock Company and President of the First National Bank of Crosbyton, were in Plainview today. Mr. Burton is spreading the news of Crosbyton's barbecue and picnic Friday and Saturday of next week.

Mr. Burton says that the Crosbyton country has had plenty of rain and that crops are in fine condition.

REV. BARNES WILL PREACH.

Revival Services at Methodist Church Begin Sunday.

Rev. S. A. Barnes, pastor of the Methodist Church, will begin a series of revival services at his church Sunday. Professor C. H. Hendry, late of Seth Ward College, will direct singing.

"We will begin the meeting with the Lord's supper, the baptism of infants and a collection," Brother Barnes said Sunday morning. "The greatest meeting I ever held was started in just that way."

Services will be held at 10 o'clock in the morning and at 8:30 o'clock p. m. every day. Brother Barnes asks the co-operation of all Christian people.

MISS FAULKNER'S CLASS BREAKFASTS IN THE WOODS.

Miss Amy Faulkner gave her music class and a number of friends a jolly good time Saturday morning. Thirty-eight left town before 5 o'clock in a big float for the grove three miles east of town, with their breakfast to be cooked on the picnic grounds.

After breakfast, cooked and served in regular camping style, the merry picnickers enjoyed the morning strolls until eleven o'clock, when they returned to town and were served ices at Willis' Drug Store.

ELKS RECEIVE BASEBALL SUITS.

Ryan Wants to Make Trip to Amarillo, Pecos Valley and San Angelo.

"Play ball" is the Elks' slogan now-a-days. The boys are practicing every afternoon. New suits have come. These suits are white and trimmed with purple, having an Elk head on cap and sleeve.

Joe Ryan is trying to plan a trip to Amarillo, Roswell, Artesia and San Angelo. Mr. Ryan is also trying to figure out a way to secure a baseball park for the boys.

MISS CLEMENTS' CLASS PICNICS.

The pupils of Miss Bettie Clements' music class gave a picnic to their fathers and mothers and a few friends at the Wayland Grove yesterday. The young people enjoyed themselves from 4 o'clock until 7, and lunch was served. Miss Clements and her pupils, as well as their fortunate visitors, report a delightful picnic.

Mrs. G. F. J. Stephens and Miss Mildred Buchheimer, who have been in Dallas some weeks visiting, returned home Monday. Mrs. Logan H. Bagby, daughter of Mrs. Stephens, returned with them, and will spend the summer with her mother.

INSTRUCTIVE ENTERTAINING

Lloyd McBride went to Crosbyton Tuesday to visit his sister.

Otis Trulove went to Amarillo, on legal business, Wednesday.

I. Z. Smith, of Petersburg, was a visitor in Plainview this week.

Carl Sopher will return this week from Trinity College, at Waxahachie.

J. I. Cole and wife, of San Angelo, Texas, are in Plainview this week, prospecting.

Miss Letha Blackwell returned home, to Lockney, Wednesday from Gunter, Texas.

Ben Young, of Ryan, Okla., is in Plainview visiting his uncle, E. A. Young, and family.

W. E. Winfield left Sunday for San Angelo, where he was summoned as a character witness.

A. T. Cole, of Clarendon, visited his brother-in-law, J. M. Boswell, in Plainview, this week.

Walter Crossett and W. J. Stinson, of Amarillo, drove to Plainview yesterday in a Cadillac.

Miss Lucile Kinder will return home tomorrow for her vacation from St. Mary's School, at Dallas.

Mrs. J. R. Kerley returned Wednesday from Lubbock, where she has been visiting friends for some days.

F. E. Harvey and family left Wednesday for Minneapolis, Minn., where they will make their home in the future.

Miss Christine Swan, who has been visiting in Plainview, at the residence of B. L. Shook, returned today to her home, at Tahoka.

W. B. Reed and wife, of Paducah, Ky., are in Plainview, prospecting, this week. Mr. and Mrs. Reed went to Hale Center today.

J. C. Homan and Oscar Rocklage, of Olton, passed through Plainview Tuesday en route to Wichita, Kansas, to work in the harvest fields.

Miss May Loise Looney, of Dallas, left for home Sunday, after spending several weeks visiting her cousins, the Misses Looney, in North Plainview.

B. Roggenbucke came in from Amarillo Tuesday to make his home in Plainview. He will be with Reeves & Penick in cement construction work.

E. N. Egge and J. H. Clark and wife motored to Amarillo Wednesday. Mr. Corlett, partner with Mr. Egge in the automobile business, who has been in Amarillo some days, will return with Mr. Egge.

W. E. Shelton, of Abernathy, was a visitor in Plainview today.

Tom Shafer was a visitor in Tulla Saturday afternoon and Sunday.

Mrs. L. A. Webb, of Kress, was in Plainview Wednesday, shopping.

Cameron Shropshire left Tuesday for Vernon, on a few weeks' visit.

Mrs. J. P. Howard and family arrived here this week from Big Springs, Texas, to meet her husband.

Mrs. R. B. Redfearn and Mrs. Worth Jennings came in today from Canyon to visit Mrs. W. R. Jennings.

Miss Mattie Johnson, of Matador, who has been attending school at Canyon, returned home today.

Barker & Winn sold a Ford car to W. J. Whitworth, of Matador, this week, and one to R. M. Hardester, of Abernathy.

Hub Ellis, of Spur, Texas, will open a new skating rink in the old K. P. Hall, on North Covington Street, Tuesday evening.

C. Heer, of Portsmouth, Ohio, manufacturer of the Heer Engine, left Plainview Monday night for a trip through the West.

Horace Lindsay returns tomorrow from the White's Preparatory School, at Austin, where he graduated at the close of this term.

Hubbard Bros. received a carload of Hupmobiles yesterday. These cars formed a parade up North Pacific Street and around the square.

Bob Fields, Moline Demonstrator, will be in Plainview Monday to demonstrate Henney and Freeport buggies for the Plainview Buggy Co.

Miss Elaine Wood and Lamise Casey, of Dallas, will come in Friday to spend the summer with her aunts, Mrs. E. B. Hughes and Miss Effie Casey.

R. O. Bell returned to Dallas Tuesday, after a four months' visit to his father, John A. Bell, in Plainview. Mr. Bell is in the automobile business in Dallas.

Dun Powell, of the Plains Electric Company, returned Tuesday from Amarillo. Dun says his firm has been awarded the contract for lighting the new Grant Building.

Rev. W. A. Nicholas, Superintendent of the Western District of the "Texas Children's Home and Aid Society," passed through Plainview today, en route from Amarillo to Lubbock, where he is going to take little Mary Lou Arthur and will place her in a Christian home. While in Amarillo Rev. Nicholas placed five homeless children in good homes.

HOW TO RESIST

Chronic Coughs and Colds.

Strong, vigorous men and women hardly ever catch cold; it's only when the system is run down and vitality low that colds and coughs get a foothold.

Now isn't it reasonable that the right way to cure a cough is to build up your strength again?

Mrs. Olivia Parham, of East Durham, N. C., says: "I took Vinol for a chronic cough which had lasted two years, and the cough not only disappeared, but it built up my strength as well."

The reason Vinol is so efficacious in such cases is because it contains in a delicious concentrated form all the medicinal curative elements of cod liver oil, with tonic, blood-building iron added.

Chronic coughs and colds yield to Vinol because it builds up the weakened, run-down system.

You can get your money back any time if Vinol does not do all we say. J. W. WILLIS DRUG CO., (Adv.) Plainview, Texas

Mrs. J. B. Lewis, after a visit to her parents, Mr. and Mrs. W. D. Maybe, at Lockney, returned to her home, at Midway, New Mexico, Wednesday.

Judge J. E. Lancaster went to Amarillo Tuesday to assist in arranging the program for the Panhandle Bankers' Association, which meets in Amarillo July 22 and 23.

H. O. King, Traffic Manager for the Southwestern Telephone Co., of this district, was a Plainview visitor for a couple of days the first of this week, looking after the interests of his company at this place.

Baxter Hairfield left today for Snyder, Texas, where he will visit his aunts, Mrs. J. P. Morgan and Miss Sula Scoggins, for a few days, and then go out to his uncle's, I. D. Scoggins', at the "24" Ranch.

Rev. J. F. Saffle and family came in Wednesday from Merkel, Texas. Rev. Saffle has recently been appointed financial agent for Wayland College. Judge T. D. Webb and family are moving this week to their farm three miles northeast of Kress. The Saffles will occupy the Webb residence on Restriction Street.

J. J. CLARK**DAY IS LOWERING PUMP.**

Walter Day has been working night and day recently lowering his pump on his ranch near Hale Center. Mr. Day thinks that by lowering his pump some twelve feet he can largely increase its capacity. It was set 57 feet below the surface.

"I pumped my well fifteen hours a day for thirty-five consecutive days, and got 100 gallons more a minute at the close than when I started," said Mr. Day. The well has been producing about 1,100 gallons a minute, according to Mr. Day, and he has pumped as much as 1,400 gallons a minute. Mr. Day expects to be able to lift 2,000 gallons when he starts pumping again.

ADVANCE OF THE SILO IN THE SOUTHWEST.

(Continued from Page Two.) which are that they do not dry out readily, are absolutely air- and water-tight, and therefore do not shrink in dry, hot weather nor swell up in damp weather, and maintain a more even temperature, as concrete is a conductor of neither heat nor cold to any extent. Then, too, they are proof against the acids of the silage, which tend to affect metal or wood, and being fire- and vermin-proof, will last practically forever, as concrete, when properly mixed and hardened, grows tougher and tougher with age. Some essentials which must not be overlooked are a good foundation, first-class material and proper reinforcing.

Crops to Silo.

In certain portions of the Southwest sorghum takes the place of Indian corn in the North as the principal silage crop, yielding the greatest tonnage per acre, while in other sections Kaffir corn, milo maize, in some cases broom corn, alfalfa, soy beans, etc. Corn, too, may be siloed with a degree of success in the Southwest, but it is not as suitable as other crops on account of the climatic conditions, which give such a short period in which to cut the crop and convert it into silage.

Depending upon the fertility of the soil, sorghum is sown from three to four inches in rows which are from three to three and one-half feet apart, and the crop is well cultivated. Should this crop be sown broadcast, cultivation would be impossible, with the result that the crop would be spindling and never reach the proper maturity for good silage. Such a crop is possibly suitable only for hay, and if it is converted into silage the small stalks

become withered and too hard for use.

Sorghum is much less liable to injury from insects and drouth, and remains green well up into the fall, allowing the work of filling the silo to go on long after corn has died up. Then, too, under favorable conditions this crop will often yield as much as 18 or 20 tons to the acre, which is considerably more than any other crop. Like corn, sorghum contains a low per cent of protein, but is high in carbohydrates, and its feeding value may therefore be increased by siloing cowpeas or some other leguminous crop with it.

Care of Silage.

It may be said that silage keeps indefinitely, and it is a fact that in certain instances where silos were properly constructed and in good order silage was kept for as long a period as seven years. If left to the air, however, any kind of silage will begin to spoil in a very short time; therefore the necessity arises of considering the amount of surface exposure while feeding. In deep silos there is much less feed exposed in proportion than in shallower ones. In winter at least two inches must be fed off all around the top each day to prevent moulding, and in summer three inches. The deeper the layer fed off the less waste in feeding value. Therefore the capacity of the silo must be commensurate with the herd to be fed from it. It is estimated that for every cow in the herd there should be about five square feet of silage, a herd of 50 animals requiring about 250 square feet of feeding surface.

As the feeding of silage is a regular twice-a-day job, and for a considerable period at that, care should be exercised as to the location of the silo. A dry spot of ground suitable for foundation, as near as possible to where the cattle are to be fed, should be chosen. If the silage is to be fed to dairy cows, then, if possible, the silo should be built as near the barn as possible, if not in connection with it; if this can be done, it is a good idea to have a door opening directly into the barn. However, precaution should be taken that the odor of the silage does not permeate the entire barn, as milk is very sensitive and readily takes up foreign odors.

Encouragement Offered.

Recently the directors of the Chamber of Commerce of Dallas, Texas, announced that they would present 24 scholarships for the study of erection and care of silos to 24 Dallas County farmers. This movement is in co-operation with the Texas A & M. College, in order to make possible a more

perfect understanding of the value of silos and silage on the farm.

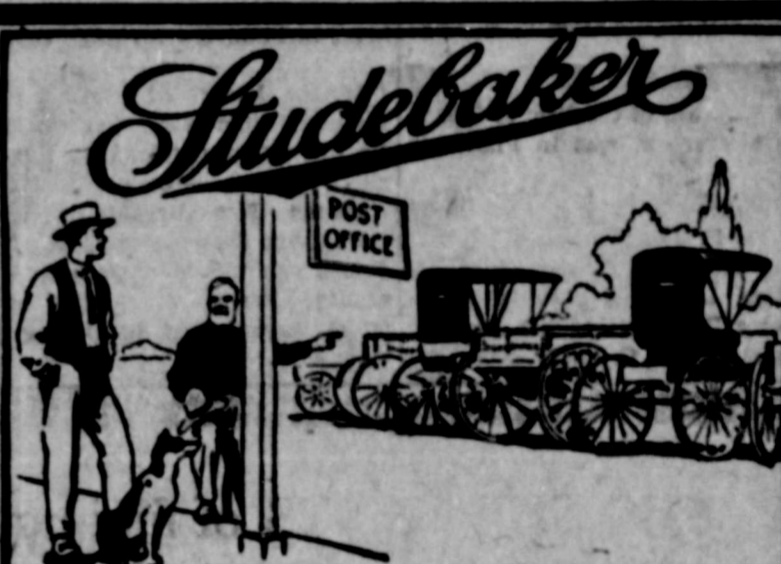

At the recent Feeders' and Breeders' Show held in Fort Worth the McClure Company of that city placed on exhibition one of their Saginaw silos, to be awarded to the winner in the Boys' Baby Beef Club. This was won by 14-year-old Lloyd Webb, of Bellevue, Texas.

His animal, the grand champion bull, was 21 months old and weighed 1,330 pounds at Bellevue before shipping. Upon arriving at Fort Worth it weighed 1,230 pounds. This calf was grass-fed until four months previous to the show, when it was put into the feed lot and put upon a ration known only to its owner.

Had this young man been feeding a silage ration, as he now is prepared to do, this animal might have been finished off and gotten into show shape in at least 90 days. Also had the ration been properly balanced the 100 pounds lost in shipping would have been considerably less.

The voices of hundreds upon hundreds of the best farmers, stockmen and dairymen of the country are singing the praises of the silo, because it not only has brought them money, but increased their pleasure in their work and in their homes.

For Weakness and Loss of Appetite
The Old Standard general strengthening tonic, GROVE'S TASTELESS CHILI TONIC, drives out Malaria and builds up the system. A true tonic and sure Appetizer. For adults and children. 60c.

**"Nearly all those Wagons and Buggies are Studebakers"**

Every year over one hundred thousand Studebaker vehicles are sold.

This tells you what the farmers of the country think of the Studebaker wagons.

This appreciation has been constantly growing for sixty years.

This appreciation has been earned by the determination of Studebaker to produce an honestly built wagon that will do a full day's work and keep on doing it, and not to build a cheap one.

The man who buys the Studebaker gets all the improvements gained by the experience of two generations of wagon builders.

VERIFY IT.

The Proof Is in Plainview, Almost at Your Door.

The public statement of a Plainview citizen is in itself strong proof for Plainview people, but confirmation strengthens the evidence.

Here is a Plainview citizen who testified years ago that Doan's Kidney Pills relieved weak kidneys, and now states the result was permanent. Can any sufferer from kidney ills ask better proof? You can investigate. The case is right at home:

P. C. Russell, Moreland St., Plainview, Texas, says: "I have used Doan's Kidney Pills, procured from the Long Drug Company, for acute lameness in my back and sluggish kidneys. They have certainly helped me, and are the only remedy that ever gave me lasting relief. I still use Doan's Kidney Pills when I need a kidney remedy, and always get benefit. You are at liberty to continue using my testimonials as heretofore."

For sale by all dealers. Price, 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other. —Adv. 22

160 acres Patented Land, fenced with new posts and wire, 12 miles N. E. of Plainview, two miles from new German Church, for sale at a bargain. Address BOX 454, Plainview, Texas. —Adv. 22

**CARELESS SEED SELECTION
REDUCING CROP YIELDS.**

Agricultural Commissioner Finds That Growers Are Producing Less Yield Than Formerly.

"What is the matter with our kaffir?" asks H. M. Cottrell, agricultural commissioner of the Rock Island System, in the Southwest Trail. "It does not yield as it used to. The Kaffir growers all through those districts in Kansas and Oklahoma where Kaffir has been grown for eight years or more are asking this question. They say that the heads are not as solid and heavy as they were when this crop was first grown. In large districts, sometimes including several counties, in both States the yield in 1912 was only fifteen to twenty-five bushels an acre, although there was a fair season."

"The farmers have, year after year, been going to the bin at planting time and taking out enough Kaffir for seed. This method has given them seed from weak heads, sprangly heads, small heads and all kinds of heads, and from good and bad heads with weak stalks."

"Kaffir crosses with the sweet sorghums, with broom corn, milo, feterita and the so-called Egyptian corn or desert wheat. These crosses produce a mongrel strain of Kaffir that can not be made to yield a heavy crop. Kaffir with sprangly and loose, open or fluffly heads is the result of such crosses."

"The character of stalk has a great strong influence on yield. Seed from good heads, grown on plants of medium height with thick, short-jointed stalks, will produce one-third higher yield than seed from good heads grown on tall stalks, with long joints. Yet not one Kaffir grower out of 500 considers the stalk when he selects seed."

"The result of the careless method of getting seed is that in a large part of the country where Kaffir has been grown for some years the crop has 'run down,' and can not be made to produce over half a crop."

Little Pure Seed.

"George Bishop, who has been district agent for the United States farm demonstration work in twenty-six counties in Western Oklahoma, states that in these counties not over 2 per cent of the Kaffir is pure. At a stop of the Kaffir Corn Special train in Oklahoma a Canadian county banker reported a yield of only eleven bushels an acre, and he was trying to keep his patrons from planting Kaffir. One of the best farming districts in Grady

County reported an average of only fifteen to twenty-five bushels, and many of the farmers in Kingfisher and Garfield Counties reported like yields. In many sections of Kansas the yield is too low because degenerate seed is planted. In Greer, Carter and Johnson Counties there are districts where Kaffir was grown in 1912 for the first time and, the seed having been purchased and shipped in, choice yielding strains were procured. In these districts there were many yields of sixty-five to eighty-five bushels an acre. Neither soil nor climatic conditions were more favorable than in the districts where eleven to twenty-five bushels an acre were grown."

"The farmers in Central Kansas or Central Oklahoma who raised less than forty bushels of Kaffir an acre in 1912, with good conditions and methods of tillage, should get new seed or use great care in selecting heads for seed from their own crop."

John Fields, George Bishop and H. M. Cottrell have for years been studying carefully this problem of what ails Kaffir. Each has been a close observer of the growing and feeding of Kaffir since its introduction in the early '90s. The business of each has required the traveling of thousands of miles annually in Kaffir-growing districts and the inspection of hundreds of Kaffir fields. In this special investigation the grain heads and stalks were examined in hundreds of fields. Particular attention was given to the character of head and stalk in fields producing high yields and in fields producing low and medium yields.

AN APPRECIATION.

In leaving Plainview and Wayland Baptist College for my new work as President of Canadian Academy, I feel like expressing my appreciation to the patrons, pupils, teachers and trustees who have in any way contributed to the work of the past session of the College. As Dean I have tried to serve the cause of Christian education and the school. At no time have I shunned what I felt was my duty. I have had a hard pull of it, owing to conditions under which I had to labor, yet, by the help of teachers who were loyal in times of stress and laborious in the effort to promote the College, much good and lasting work has been accomplished.

It has been most gratifying to me to be able, as Dean, to raise money and direct the plastering of eighteen rooms in the College Building, to graduate eleven worthy and strong

young people, to close out the year with a deficit of less than \$1,000.00 and to collect about ninety-nine per cent of all monies due the College for the current year, amounting to more than ten thousand dollars. This certainly speaks well for the class of patrons Wayland College has.

In going from Plainview, I and my family do so with many regrets. We have never lived among a people for whom we have a higher regard. Plainview is as near the center of the earth as it can well get. Her citizens are a choice lot. The outlook for this section of the State is hopeful, and Plainview has a great future. As for Wayland Baptist College, it seems to be on the up-grade. Recent developments seem to bespeak a safer business policy and a larger patronage. If policies projected can materialize, I feel sure the school will get out of the eddying waters into the wider streams of denominational usefulness.

It should, by all means, be the main school for the Baptists in this territory for all time to come.

I wish I might express my heartfelt thanks to all who have helped me in my work. I shall remember them as I go to my new field. If I have made mistakes, which I am sure I have, I trust my friends will forgive and forget them. If I have helped any one in any way, I am glad of the opportunity of doing it. In the meantime, I am

Yours cordially,
J. P. REYNOLDS.

**Cottolene
Pie Crust**

Cottolene makes a rich, crisp crust, without the suggestion of greasiness. Cottolene-made pie is digestible too. And—Cottolene is more economical than butter or lard, because you use one-third less. Moreover, Cottolene costs no more than lard.

Cottolene

Here is a recipe for one of the most delicious pastry dishes you ever ate—Grape Fruit Pie—made with Cottolene:

CRUST
1 cupful of sifted flour ¼ cupful Cottolene
3 teaspoonfuls ice water A pinch of salt

FILLING
¾ cupful of sugar Juice of ½ medium-sized grape fruit
2 rounding teaspoonfuls of corn starch 2 even teaspoonfuls Cottolene
Juice of ½ lemon Grated rind of ½
Yolks of 2 eggs
1 cupful boiling water lemon

Made only by
THE N. K. FAIRBANK COMPANY

damaged it is a complete loss. The loss on the stock is estimated at about \$3,000, with \$2,000 insurance. Damage to building will amount to several hundred dollars, but probably covered by insurance.—Post City Post.

Miss Minerva and William Green Hill
By **FRANCES BOYD CALHOUN**
(Copyright by Rellly & Briston Co.)
(Continued from last week.)

CHAPTER XXIII.
The Infant Mind Shoots.
Miss Minerva had bought a book for Billy entitled "Stories of Great and Good Men," which she frequently read to him for his education and improvement. These stories related the principal events in the lives of the heroes but never mentioned any names, always asking at the end, "Can you tell me who this man was?"
Her nephew heard the stories so often that he had some expression or incident by which he could identify each, without paying much attention while she was reading.
He and his aunt had just settled themselves on the porch for a reading. Jimmy was on his own porch cutting up funny capers, and making faces for the other child's amusement.
"Lemme go over to Jimmy's, Aunt Minerva," pleaded her nephew, "an' you can read to me tonight. I'd a heap ruther not hear you read right now. It'll make my belly ache."
Miss Minerva looked at him severely.
"William," she enjoined, "don't you want to be a smart man when you grow up?"
"Yes, m," he replied, without much have time to use his ears at all and so did not hear one word.
"Leaving his camp fires burning to deceive the enemy, he stole around by a circuitous route, fell upon the British and captured—"
Billy held up his hands to catch a ball which Jimmy made believe to throw.
Miss Minerva still read on, unconscious of her nephew's inattention:
"The suffering at Valley Forge had been intense during the winter—"
Billy made a pretense behind his aunt's upright back of throwing a ball while the other child held up two fat

little hands to receive it. Again he laughed aloud as Jimmy spat on his hands and ground the imaginary ball into his hip.
enthusiasm. "Well, jes' lemme ask Jimmy to come over here an' set on the other sider you whils' you read. He ain't never hear 'bout them tales, an' I s'pec' he'd like to come."
"Very well," replied his flattered and gratified relative, "call him over."
Billy went to the fence, where he signaled Jimmy to meet him.
"Aunt Minerva say you come over an' listen to her read some er the pretties' tales you ever hear," he said, as if conferring a great favor.
"Naw, sirree-bob!" was the impolite response across the fence, "them 'bout the meastliest tales they is. I'll come if she'll read my Uncle Remus book."
"Please come on," begged Billy, dropping the patronizing manner that he had assumed, in hope of inducing his chum to share his martyrdom. "You know Aunt Minerva'd die in her tracks 'fore she'd read Uncle Remus. You'll like these-her tales 'nother sight better anyway. I'll give you my stoney if you'll come."
"Naw; you ain't going to get me in no such box as that. If she'd just read seven or eight hours I would n't mind; but she'll get you where she wants you and read 'bout a million hours. I know Miss Minerva."
Billy's aunt was growing impatient. "Come, William," she called. "I am waiting for you."
Jimmy went back to his own porch and the other boy joined his kinswoman.
"Why wouldn't Jimmy come?" she asked.
"He—he ain't feeling very well," was the considerate rejoinder.
"Once there was a little boy who was born in Virginia—" began Miss Minerva.
"Born in a manger," repeated the inattentive little boy to himself. "I knows who that was." So, this important question settled in his mind, he gave himself up to the full enjoyment of his chum and to the giving and receiving secret signals, the pleasure of which was decidedly enhanced by the fear of imminent detection.
"Father, I cannot tell a lie, I did it with my little hatchet—" read the thin, monotonous voice at his elbow.
Billy laughed aloud—at that minute Jimmy was standing on his head waying two chubby feet in the air.
"William," said his aunt reprovingly, peering at him over her spectacles, "I don't see anything to laugh at,—and she did not, but then she was in ignorance of the little conspiracy.
"He was a good and dutiful son and he studied his lessons so well that when he was only seventeen years old he was employed to survey vast tracts of land in Virginia—"
Miss Minerva emphasized every word, hoping thus to impress her

nephew. But he was so busy keeping one eye on her and one on the little boy on the other porch, that he did not
She looked at him sternly over her glasses:
"What makes you so silly?" she inquired, and without waiting for a reply went on with her reading; she was nearing the close now and she read carefully and deliberately.
"And he was chosen the first president of the United States—"
Billy put his hands to his ears and wriggled his fingers at Jimmy, who promptly returned the compliment.
"He had no children of his own, so he is called the Father of his Country."
Miss Minerva closed the book, turned to the little boy at her side, and asked:
"Who was this great and good man, William?"
"Jesus," was his ready answer, in an appropriately solemn little voice.
"Why, William Green Hill!" she exclaimed in disgust. "What are you thinking of? I don't believe you heard one word that I read."
Billy was puzzled; he was sure she had said "Born in a manger." "I didn't hear her say nothin' 'bout burrshuses," he thought, "so 't ain't Moses; she didn't say 'log cabin,' so 't ain't Abraham Lincoln; she didn't say 'Thirty cents look down upon you,' so 't ain't Napolyon. I sho' wish I'd paid 'tention."
"Jesus!" his aunt was saying, "born in Virginia and first president of the United States!"
"George Washin'ton, I aimed to say," triumphantly screamed the little boy, who had received his cue.

(To be continued.)
POULTRY CARS WILL TOUR MISSOURI THIS SUMMER.
U. S. Department of Agriculture Will Co-operate with State Board in Educational Work.
Mountain Grove, Mo., May 24.—In a campaign of education for the benefit of poultry-raisers of Missouri, the United States Department of Agriculture will run two special coaches over every railroad in the State this summer, according to Prof. H. C. Pierce, a representative of the department who is now stationed at Sedalia.
The cars, carrying special lecturers on poultry subjects and models of poultry houses and equipment, will start on the tour about June 1.
The State Board, at its meeting here, decided to inaugurate a campaign for promoting interest in the poultry-raising industry over the State through the Missouri State Poultry Experiment Station at Mountain Grove.
Director T. E. Quisenberry was re-

quested to prepare a correspondence course in poultry husbandry. Hundreds of persons write here from all parts of this and other States for instruction in poultry farming. The plan is to prepare these books and let the students get the benefit of all the information possible by correspondence. After they have finished the course they will be invited to come here for a month or more for final instruction at the State station. The course will be begun early in the fall.
JERSEY COW MAKES 80 POUNDS BUTTER IN MONTH.
Illinois Dairyman Keeps Careful Tab on Animals to Learn Which Are Profitable.
Atlanta, Ill., May 24.—A. E. Barnes, known hereabouts as a scientific farmer, boasts of the best cow in Central Illinois. This cow, a 4-year-old Jersey, is now producing 37 pounds of milk daily, which contained, during the last 20 days, 64 pounds of butter-fat, which is equivalent to 80 pounds of commercial butter.
This cow was fed seven pounds of grain, 25 pounds of silage and three pounds of cow pea hay daily. Barnes has a herd of 18 Jersey cows and the total production for the month of butter-fat was 661 pounds. He received 38 cents per pound, or \$251 for the month, an average yield of \$14 a cow a month.
Barnes has devoted several years to a study of dairy farming and is very successful. Especial attention is paid to cleanliness. He does not allow calves in the same barn with the cows, the presence of the calves being very undesirable. Great care was taken in the arrangement of the interior of the barns. Two rows of stanchions face a feedway in the center. The feed bins are in the hay-mow, and the feed comes to the ground floor through chutes.
At one of the barns is a concrete block silo. Barnes is a strong supporter of silos and holds that the dairy farmer cannot do without them. He has 15 acres of pasture for 20 cows and silage is fed for the remainder of the summer feed. No falling off in milk is noticed when the pasture is short and silage is fed.
Barnes belongs to the McLean County Testing Association, and finds the results valuable. When the milk is weighed and tested, positive information is obtained concerning the earning power of each cow. He sells cows that fail to show a profit, and has gotten rid of three this year because they did not reach his standard. He found last year that one cow produced \$1.49

worth of milk for each \$1 worth of feed, while another produced but 75 cents' worth of milk for \$1 worth of feed. He finds in dairying and also in cattle feeding that the best cows make the money.
He is a firm believer in cow peas for hay. The principal objection is that they are dusty to feed. The cattle eat the hay greedily and do well. About 70 tons of hay were cut from the 25 acres planted in cow peas.—St. Louis Post-Dispatch.
To Cure a Cold in One Day
Take LAXATIVE BROMO Quinine. It stops the Cough and Headache and works off the Cold. Druggists refund money if it fails to cure. E. W. GRUYER'S signature on each box. 25c.

DEPENDABLE MKT TRAINS

THREE SPECIAL DAYS

Every first Saturday will be TRADES DAY for Petersburg, bring anything you have to sell or trade—anything you wish to sell to the highest bidder. There will be a part of the day set apart for auction work.

The Business Men of the town have been asked to assist in publishing and pushing TRADES DAY and as we always work to the best interests of the town and communities surrounding the town and especially to the best interest of those who spend their money with us, we have decided to put on something quite out of the ordinary for this time of the year. It is three special days of BARGAINS, beginning Thursday, June 5th and closing Saturday, June 7th, TRADES DAY.

This is exceptionally early in the season for reduced prices on good seasonable goods, but perhaps to get TRADES DAY before more people we are offering the following:

- 25 percent discount on Men's and Boy's Suits--Hex Clothes.
- 15 percent discount on Men's and Boy's Hats--Worth
- 10 percent discount on Men's, Ladies', Boy's, and Girl's Oxfords--Peters, R. P. Smith
- 15 percent discount on Men's and Boy's Trousers--Jack Rabbit
- 15 percent on Men's, Ladies', Boy's, Girl's Shoes--Peters, R. P. Smith

There will be no discount on groceries and some other things that we are short on, but there will be plenty of Bargains to interest you. Come and see for yourself. We can not mention everything that will be included in this sale, but invite you to come. We will add still another feature to this affair that is entirely out of the ordinary for the benefit of those who are not in a position to pay cash. Here are the terms of the sale:

All purchases to \$15.00 and under cash in hand, all purchases above this amount, Bankable notes, 10 per cent interest, due Nov. 1, 1913. All goods must be settled for before leaving the store, anything bought during this sale that is not entirely satisfactory can be returned in three days or not later than the 10th, and exchanged for something in stock.

Be sure that you attend this sale and avail yourself of this rare opportunity. It is absolutely the best thing that we have offered the buying public. We are going to expect you at our store one of the three days and also to see you TRADES DAY. Bring something to sell or trade.

Remember the Date of the Sale and Come

FARM LIFE COMMISSION AT WORK IN EUROPE.

Americans Have Divided into Four Subcommittees; Scope of Work Is Broadened.

The American Commission which has undertaken the study of Agricultural Organization, Co-operation and Rural Credits has undertaken a somewhat broader scope of work than was at first contemplated. The original intention of merely investigating the systems of European rural credits it seemed would limit the usefulness of the commission. The scope of the work, therefore, was enlarged to embrace the whole subject of co-operative effort as it touches agriculture and rural life.

The members are divided into four sub-committees, dealing with the subjects of finance, production, distribution and organization of agriculture and country life.

The first subcommittee has started an investigation into all forms of banking and credit affecting the agriculturist, whether co-operative or non-co-operative, but is paying especial at-

tion to the former, as it is desired to disseminate in the North American continent some practical principle of self-help. All the bankers and financiers accompanying the commission are on this subcommittee.

Practical Farming.

Practical farming is being investigated by the second subcommittee, and it is inquiring into the European associations formed for the purpose of increasing the fertility of the soil or the quality of grain crops and live stock. The members are devoting attention to the successful cow-testing associations of Denmark and other countries.

The third subcommittee is gathering information as to organizations handling farmers' implements, with the object of eliminating undue profits by the middlemen or large combinations of dealers.

Work of a more theoretical nature has been undertaken by the fourth subcommittee, as it deals with the objects and rules of organizations aimed at benefit of the rural population, but conditions of family life and methods employed in organizing and managing farmers' unions. It is studying in the first place traveling Government com-

missions in Italy which work for the benefit of the rural population, but is also investigating semi-official and voluntary organizations.

Work in Three Main Channels.

The work of the commission really falls into three main channels. First, observation in Europe of what has been done; second, observation in the British Isles (chiefly in Ireland) of the way in which it is being done, and, third, and perhaps most important, the working out of a scheme by which the results of this observation may be made applicable to the widely differing conditions of the various American States and of the provinces of Canada.

Dr. Butterfield, of Massachusetts, has been nominated president of the commission, Col. Harvey Jordan, of Georgia, secretary, and Dr. Owens, of Washington, D. C., managing director. All of them are members of the Federal commission appointed by President Wilson which is accompanying and co-operating with the American commission.

For the best Rockvale Coal, see the ALFALFA LUMBER CO. Adv. tf.

COWS ARE WEALTH PRODUCERS.

Farm and Ranch Says "Bossy" Slimplifies Marketing and Increases Farm Profits.

"The dairy cow is a wealth producer and she is the hope of the country," says Farm and Ranch. "Her influence builds the town, causes railroads to extend their lines, makes demand for more manufacturing plants, gives the people, both urban and rural, cheaper and better food.

"The dairy cow causes the farm house to be remodeled, the barn to be painted; she encourages the building of more room, better furnishings for the home, conveniences for farm homes and more contented and happy people.

"It is hard to understand how any farm can be economically managed without a number of milk producers. Cows save the expense of marketing by consuming the crops of the farm without the expense of hauling bulky products such as hay, grain, etc., to market. And the most important part of the cow's service is that only a small part of the fertility elements

are wasted when the feed is fed to cows, most of it being voided by the animals in manure. The manure may then be returned to the soil, and it not only returns the plant food, but it increases the productivity of the soil as humus.

"Cows make swine raising easy, and are therefore responsible in a measure for cheap pork. The skimmed milk as it comes from the separator is one of the best foods for young pigs known. With a little grain it makes faster and cheaper gains than any other food. Yet it must be remembered that the butterfat, by using the separator, is removed with the least possible loss and the skimmed milk is a by-product only, and in feeding it one is saving and conserving, not using a salable product. The pork produced by using the skimmed milk is almost clear profit."

ASSIGNEE'S NOTICE.

THE STATE OF TEXAS,
County of Hale.
To the Creditors of Vickery-Hancock Grocery Company:
You are hereby notified that Vick-

ery-Hancock Grocery Company, a firm composed of F. C. Vickery and W. M. Hancock, of the County of Hale, on the 23rd day of May, 1913, executed a deed of assignment conveying to the undersigned all his property for the benefit of such of his creditors as will consent to accept their proportional share of his estate and discharge him from their respective claims, and that the undersigned accepted said trust, and has duly qualified as required by law.

All creditors consenting to said assignment must, within four months after the publication of this notice, make known to the assignee their consent in writing, and within six months from the date of this notice file their claim, prescribed by law, with the undersigned, who resides at Plainview, Texas, which is also his post office address.

WITNESS my hand this 26th day of May, A. D. 1913.

JOSEPH FOWLER,
Assignee.

\$10.00 GIVEN AWAY SATURDAY

Seven Plainview citizens have the money ready and are holding it for the party that comes after it. It is easy to get—one three dollar check, one two dollar check, and five one dollar checks. You may get it before breakfast Saturday. But you must find the right party. You may have one check or more. Say to the party who has the money

THIS IS THE FIRST DAY OF THE BIG SALE AT RICHARDS BROS. & COLLIER'S STORE.

Don't Forget the Words—If you want the money repeat them to everyone you meet. When you have gotten one of the checks, keep telling the good news, you may find other checks.

It is nerve to cut like we are doing—but we've shut eyes to cost and real value and driving the price knife to the hilt. You are bound to recognize the saving.

While labor and material prices are soaring high. May June Turner—Ben Franklin like—brings the product down within easy reach. Our 13 is the Key—use it.
