

## NO MOVE NOW SAYS ENGLAND

### But Britain Reserves Right To Demand Full Rep- aration

## WON'T DROP AFFAIR

### Washington Seeks Co-Operation Of Foreign Governments to Fore- stall Recognition of Carranza

LONDON, England, March 3.—England reserves the right to obtain full reparation for the death of William Benton. This announcement was made in the House of Commons to-day by Lord Gray.

Lord Gray says that England has no intention of sending an armed force into Mexico. For the present Great Britain is content to let the United States handle the case of Villa's making away with the English ranchman.

But England does not intend, under any circumstances, to drop the Benton affair, the Foreign Secretary says. He also explained that Mexico seems very desirous of covering up the truth in this matter.

Lord Gray repeated his former declaration that England does not hold the United States responsible for the killing. Washington, he says, is as much interested in the Benton outrage as if it were one of America's own citizens.

### Carothers to Meet Carranza.

EL PASO, Texas, March 3.—William Carothers, representative of the State Department, is scheduled to meet Carranza to-day to confer about the Mexican's refusal to negotiate with the United States regarding the execution of Benton.

It is reported that an attempt will be made to induce Carranza to come from Juarez onto American territory, in order to hasten the solution of this matter. He will be assured a safe return.

### Seeking Foreign Aid.

WASHINGTON, D. C., March 3.—It became apparent to-day that the administration is seeking to enlist the aid of foreign governments in its policy of passively forestalling anything Carranza may do to attempt to force recognition of him by other powers.

The British Ambassador to Mexico, General Carden, and other foreign diplomats are conferring to-day with Chairman Shiveley, chairman of the Senate Committee on Foreign Relations, and Secretary Bryan on this matter.

### Means Recognition.

NOGALES, Ariz., March 3.—The action of the United States in sending Carothers here is taken by Constitutionalists to mean that the Government recognizes General Carranza.

### COLQUITT ENTERTAINS BRITISH ADMIRAL.

AUSTIN, Texas, March 3.—Sir Christopher Craddock, commander of the British fleet in Mexican water, met Governor Colquitt here to-day. The Admiral and party went to San Antonio from Austin following the State reception.

### MRS. McCORMICK PLEADS FOR NATIONAL SUFFRAGE.

WASHINGTON, D. C., March 3.—Mrs. Modill McCormick and Mrs. Antonia Funk appeared before the House Judiciary Committee to-day and urged the granting of woman the privilege of voting. Representative Mondell, Republican, from Wyoming, urged the extension of woman suffrage. Anti-suffragists made their opposition later.

### KING'S DAUGHTERS WAITRESS

CLEVELAND, O., Mar. 3.—Prominent women here, members of the Kings' Daughters' society today worked as serving maids at a feature of the second annual American Woman's Exposition to raise funds for working girls vacations. The working girls, many of them employed by today's waitresses will be taken on their annual vacation camping trip, to Rock Lodge, under the protecting wing of the Kings' Daughters' Society.

## CO. COURT BEGINS WITH HEAVY DOCKET

### Unusual Number of Criminal Cases Are Scheduled For Term

The case of John S. Haydon against J. D. McClain has taken up the time of County Court since yesterday. It is a claim for goods alleged to have been purchased and not paid for.

An unusual number of criminal cases makes this term's docket heavy. About forty offenses are charged. Most of them are for theft. Court will probably continue 3 weeks.

## CARRANZA SUPREME CHIEF SAYS VILLA

### Rebel Chief Announces Arrival of Bomb-Dropping Aeroplane

CHIHUAHUA, Mexico, March 3.—General Villa said to-day that the order holding up the investigation of Benton's death by the United States Commission was issued by General Carranza. The Benton case and all other foreign relations are in the hands of his "supreme chief," he said.

Villa also announced the arrival of an aeroplane fitted out for dropping bombs and 3,000 shrapnel shells. This is taken to mean that Villa will move on Torreon at an early date.

## Louisiana Jurors Barred Forever

SHREVEPORT, La., March 3.—Members of the jury here acquitting Mr. and Mrs. H. S. Lioit for killing J. J. Van Cleave were forever barred from serving as jurors in this parish. Judge John R. Land, of the Criminal Section of the District Court, signed the order.

The action barring the jurors was taken following a mass meeting of 3,000 indignant citizens. Intense excitement prevailed.

## Assn. Cattlemen Sell 1,000,000 Cattle Year

OKLAHOMA CITY, Okla., Mar. 3.—Hundreds of cattlemen are here from all sections of the West attending the convention of the Panhandle-Southwestern Stockmen's Association. It is estimated that members of the association handle 1,000,000 cattle a year.

## BAY STATE MAY PROHIBIT TANGO AND OTHER DANCES.

BOSTON, Mass., March 3.—Modern dances are too much for the old Bay State. The tango, lame duck, chicken flip, bunny hug, grizzly dip and other such dances were denounced by the Massachusetts Legislature to-day. The legislative committee is considering a bill to prohibit these dances.

## SUPREME COURT SAYS CAN'T FORCE DELIVERY OF C. O. D.

JEFFERSON CITY, Mo., March 3.—The right of express companies to refuse to deliver C. O. D. shipments of whisky into Texas was upheld to-day by the Missouri Supreme Court. The decision is based on the Texas anti-liquor law.

## JURY FREES WOMAN WHO ACCUSED FUNK.

CHICAGO, Ill., March 3.—Miss Aileen Hapner was acquitted to-day of the charge of perjury in connection with the alienation suit filed against Clarence Funk, former manager of the International Harvester Co. The suit was brought against Funk after he had testified in the Lorimer investigation.

The jury was out all night.

## PARTY POSTPONED.

The progressive "youth-to-old-age" party that was scheduled for this afternoon at the Methodist parsonage is postponed indefinitely on account of the disagreeable weather.

## PUZZLING IT OUT.

## THIRD PICTURE SHOW OPENS

### Olympic Entertains All Plain- view with Matinee and Night Performance

## DONOHOO, OWNER

### Pioneer Plainview Business Man Adds Elegant Structure to Town's Playhouses; R. N. Smith, Mgr.

The opening of the Olympic last night marks another era in the motion picture history of Plainview.

One of the largest crowds seen in Plainview for a long time attended the opening reception.

The matinee and evening performances were free and with few exceptions the entire population of the city took advantage of the opportunity to receive a copy of the photoplay magazine and see as fine a presentation of films as ever given in the city.

### Feature Program

The feature of the evening was a three-reel Gold Seal Drama, "The Buccaneers" with its vivid pictures of piracy and its attendant crimes.

As the audience watched the thrilling picture they were transported to the days when the black flag with its grinning skull and cross bones floated over the seas, a menace to trade and development of the vast territory being opened up to the world.

### Walking the Plank.

Even the terrible 'walking the plank' was depicted last night with a vividness which made the audience shudder as the unfortunate prisoners were forced into the pitiless waves.

The Olympic is well named. It is classic in its beautiful simplicity.

The Olympic has a seating capacity of 425.

It is finished in harmonious colorings of green, old rose and ivory. It is furnished with mahogany opera chairs of unusual size and comfort.

A special feature of the Olympic is the twelve-piece Wurlitzer orchestra run by electricity. The lighting system is indirect with six clusters of lights.

It realized all the expectations of the music loving public last night in music, seating capacity, ventilation and first class pictures.

Plainview is to be complimented on having three high grade moving picture houses and the owner of the Olympic, J. N. Donohoo, is to be congratulated upon his addition to the modern business houses of the city.

The Olympic will be managed by R. N. Smith of Tulla.

Prof. J. E. Willis, late of the Polytechnic College of Ft. Worth, is in Plainview today.

## 14,000 DIGGING OUT NEW YORK

### American Metropolis Restores Partial Communication With Outside World

## CAN'T GET WORKERS

### Vice President Snow Bound Is Away From Mrs. Marshall First Time in 14 Years

NEW YORK CITY, March 3.—It is known that at least 25 are dead as a result of the blizzard which swept New England yesterday. Damages are yet unestimated, but will run high into the tens of millions.

New York City began to-day to dig itself out of the snow and debris. Fourteen thousand men are cleaning the streets.

Telegraphic communications have been partially restored. Railroads have resumed operation, but traffic is still hampered and uncertain. Street cars are running irregularly.

Storm conditions throughout the East are better. The partial operation of railroad trains and street cars has relieved the threatened milk and meat famine.

Vice President Marshall was snow-bound at New Brunswick Sunday night. That is the first time he has been absent from Mrs. Marshall over night for 18 years.

An express train with 100 passengers is stalled in the snow at Red Bank, N. J.

Dearth of workmen is hindering the work of clearing away snow and debris. City governments, municipalities and private employers are seeking working, while the unemployed are holding night meetings and abusing their condition. The men demand 30c an hour for their efforts, while employers feel that 20c an hour is all they can afford to pay.

## WIFE MURDERER COLLAPSES.

### William Ellis Has Epileptic Fit When Telegram Is Read.

CHICAGO, Ill., March 3.—William Ellis, on trial for the murder of his wife, fell unconscious on the witness stand to-day. It was pronounced an epileptic fit.

The accused man collapsed when his attorney read into the record a copy of a telegram sent by his wife to Fred Caldwell, at Brantford, Canada, asking him to meet her in Chicago, a few days before the murder.

Miss Able Brown has accepted a position with the Plainview Mercantile Company.

## MRS. WAKEFIELD MAY NOT HANG

### Connecticut Court Considers New Trial; Companion to Death Cell

HARTFORD, Conn., March 3.—Whether or not Mrs. Bessie Wakefield will have a new trial on the charge of complicity in the murder of her husband will be decided by the Supreme Court of Connecticut, assembled to-day. The court was called to hear arguments of the woman's counsel. It will probably be some time before the decision is announced.

Mrs. Wakefield was sentenced to hang, but determined effort has been made to prevent this. No woman has ever "swung from hemp" in Connecticut, and the women of the Nutmeg State are trying to avoid a hanging in this case.

James Plow, convicted with Mrs. Wakefield, was to-day transferred to the death cell. He will hang soon after midnight to-night.

## STEEL COACHES' ACT AS LIFE PROTECTORS

### One is Killed When Grand Trunk Limited Crashes Into Wabash Freight

CHICAGO, Ill., March 3.—Again the steel passenger coach has shown its superiority as a life preserver. Four persons were injured and one fatally hurt this morning when an inbound Grand Trunk Limited passenger plowed through the middle of a Wabash freight train.

Steel coaches prevented terrible loss of life. Both trains were derailed, and if coaches had been old wooden ones only a mass of wreckage and the probable number of dead would mark the spot.

The Grand Trunk train was late. The engineer thought he had a clear track, and was speeding through the outskirts of Chicago at 50 miles an hour.

## February Customs Re- ceipts \$1,000,000 Short

WASHINGTON, D. C., March 3.—Customs receipts for February fell off more than \$10,000, as compared with the same month of 1913. This is the largest discrepancy since the new tariff law became effective.

It is estimated that the income tax will make up nearly \$200,000,000 of the shortage in customs receipts.

## THE WEATHER.

### Yesterday's Weather.

(By Western Union Tel. Co.)

Dallas, clear and warm, windy; Galveston, clear and cool, 60; Sherman, part cloudy, 48; Muskogee, cloudy and cool; Texarkana, cloudy and cool; Sulphur Springs, cloudy, 59; Houston, clear and cool; Memphis, Tenn., clear and warm, 45; New Orleans, clear and cool; Fort Worth, clear and warm; Beaumont, clear and cool; San Angelo, clear and cool.

### Washington Forecast.

WASHINGTON, D. C., March 3.—Wets Texas—Fair and colder Tuesday, except probably snow in Panhandle; Wednesday fair.

## 7 DROWNED WHEN MINERS TAP UNDERGROUND RIVER.

BRUSSELS, Belgium, March 3.—Seven coal miners were drowned at Baerquelesby to-day when a subterranean river burst into one of the galleries. Many other miners had narrow escapes. The water rose so rapidly that there was no time to escape.

## WILL INCREASE U. S. ARMY IN HAWAII.

SAN FRANCISCO, Calif., March 3.—The United States army forces in Hawaii will be increased from 8,000 to 15,000 men soon, according to advices from the War Department. Troops will be transferred from the Texas border to the Pacific island.

## TO RESTRAIN CUBAN SUGAR

### Louisiana Asks Injunction Against Admission of Product

## BAILEY FILES SUIT

### Claim Is Made That Reciprocity Treaty Renders Tariff Void As Regards This Section

WASHINGTON, D. C., March 3.—Louisiana has decided to "buck" the tariff. An original suit was begun to-day before the United States Supreme Court in the name of the State of Louisiana on behalf of sugar cane growers. It is the purpose of the suit to have declared void that section of the tariff which removes the preferential duty of 20 per-cent from Cuban sugar.

This preferential duty was provided for in the reciprocity treaty with that island.

A temporary injunction has been asked to enjoin the Treasury Department from admitting Cuban sugar at reduced rates. The petition alleges that Cuban sugar is admitted at a lower rate than provided for in the treaty. This is "arbitrary, illegal and unjust," the suit alleges.

Ex-Senator Joseph W. Bailey, formerly of Texas, gave notice yesterday that the suit would be filed.

## Rumor Says Will Re- Cognize Huerta--False

MEXICO CITY, March 3.—Rumors to the effect that the United States government would recognize President Huerta within 48 hours have been circulated here to-day. They were finally traced to an attempt by unknown persons to manipulate the money market, and are groundless.

A large number of American bank drafts have been circulated here simultaneously with this report.

## 42 Enlist For U. S. Aeronautic Reserve

NEW YORK CITY, N. Y., March 3.—Forty-two expert aviators and balloon pilots have enlisted in the United States Aeronautic Reserve. These men will serve in case of war. The organization of an aviators' corps has the endorsement of Secretary of War Daniels and Major General Leonard Wood.

## ELLEN MAN SHOWS FINE FERCHERON 2-YEAR-OLD

### E. Callaway brings Registered Stallion to Town which Weighs 1,600 Pounds

E. Callaway is a farmer who believes that the Plains country will grow as fine stock as can be produced anywhere. And Mr. Callaway proved his belief today when he exhibited a fine Fercheron stallion, two years old, weighing 1,600 pounds.

The horse is perfect. Men from Illinois, Pennsylvania and other North ern states have looked him over. Their opinion was that he is good enough for any place.

Mr. Callaway paid \$600 for the horse's mother in Kansas. W. R. Simmons owns the sire.

## PRESIDENT COUSINS TO SPEAK AT RALLY

### Professor Teague Plans Unusual Pro- gram for Happy Union School March 14.

President Cousins of the Normal School at Canyon will speak at Happy Union School Saturday night March 14. This is good news to all school people in Hale county. Mr. Cousins knows the school situation and he is an interesting talker.

Professor Teague has arranged an interesting program for the morning and afternoon. There will be dinner on the ground.

A spelling contest will be held at the night meeting. Professor Teague has one of the most enterprising schools in Hale county.

# SOCIETY

## ARIZONA PLEASES BIG CROWD AT THE MAE I

August Thomas' great play, "Arizona," was presented at the Mae I Saturday night to a packed house.

It is emphatically an American play and a Western one. It is one of the wonders of the photo play world.

During the entire six reels the interest of the audience never flagged. The scenes were fine and the acting dramatic throughout.

It is a story of villainy on the part of one of the characters and loyalty and devotion to principle on the part of the hero. The orchestra kept in touch with the scenes, now soft and low, then martial and inspiring.

The presentation of Arizona Saturday night was in keeping with the reputation of the play and of the Mae I.

There was complaint that the ventilation was not sufficient. The immense crowd soon made the air noisome and heavy. The Mae I has a modern system of ventilation. It did not seem to be working Saturday night.

## MISSIONARY LADIES TO GIVE YOUTH-TO-OLD-AGE PARTY.

The Methodist ladies are planning a "Youth-to-Old-Age" party at the Methodist parsonage to-morrow night. It will be progressive. The women promise "heaps of fun." They say that all women who can bring their husbands or whose sweethearts will bring them should come after supper. Ladies who must come alone had better come before dark. —Adv.

## CIVIC LEAGUE DUES ARE DUE.

Mrs. L. Lee Dye Urges Members Who Are Delinquent to Pay Up.

Mrs. L. Lee Dye, President of the Civic League, asks all those who are behind with their dues to pay them as soon as possible, as the money is needed in the work that is being done by the League.

There is a membership due of 50c a year charged by the Civic League.

## NEEDLECRAFT CLUB WITH MRS. KNIGHT.

The gentle art of needlework was in vogue yesterday afternoon at the home of Mrs. L. A. Knight, 1600 Wayland Boulevard.

Those invited to share the pleasure of the affair were Mrs. W. J. Dunaway, Mrs. Hickman Price, Mrs. J. M. Oakes, and Mrs. D. F. Garrison.

Light refreshments were served.

## REV. ROBERTS SPENDS BUSY DAY SUNDAY.

Rev. A. B. Roberts spent a busy day yesterday. He left for Runningwater at an early hour, preached the first sermon in the church recently moved there from Plainview, married a couple after church, enjoyed the wedding dinner, officiated at a funeral in the afternoon, and returned home in time to attend services last night at the Methodist church.

## Tuesday.

Five Hundred Club—Three o'clock, with Mrs. Theo. Shepard.

Progressive Luncheon—From four to ten p. m., at the Methodist parsonage.

## Wednesday.

Civic League—Three o'clock, at Woman's Club Room.

## Thursday.

Highland Club—Mrs. J. M. Malone.

## Saturday.

Mystic Club—Three p. m., Woman's Club Room.

## FRIDAY SPECIAL MAKES BIG HIT AT THE RUBY.

The crowd of people who stood for half an hour waiting for a chance to

see "In the Bishop's Carriage" at the Ruby Friday afternoon and night were amply repaid for their wait.

"In the Bishop's Carriage" is the story of a scrub girl who ran away from the foundling home when she was abused. In her flight she ran into what proved to be the room of a pickpocket. The man did not turn her over to the police when they searched his place, and she became his aid.

Later the girl has a chance to "go straight," and she becomes an operatic star.

The presentation under the personal direction of Daniel Frohman, with Mary Pickford in the lead. Until about a year ago Miss Pickford was the leading "ingenue" on the motion picture stage. After that time she starred in a Broadway hit on the dramatic stage.

It was a magnificent 6-reel feature production, followed by a comic. Mr. Rogers is making a big hit with his special Friday programs.

Mr. and Mrs. Peyton Randolph are in Dallas attending the grand opera which is being given there this week.

Mr. and Mrs. E. E. Roos left yesterday to attend the Cattlemen's Convention, at Oklahoma City.

Joe Hess and E. Dowden are in Oklahoma City attending the Cattlemen's Convention, now in session at that place.

## WHARTON MERCHANT SHOT; WIFE CLAIMS SELF DEFENSE.

WHARTON, Texas, March 2.—Ed Ed Bayer, merchant, was shot three times last night. He is seriously injured. Bayer's wife is under arrest for the shooting. She claims the act was one of self defense.

## AS YOU LIKE IT CLUB ELECTS TWO NEW MEMBERS

Miss Grady Pipkin was Hostess and Miss Rountree leader in Study of Shakespeare

The regular meeting of the As You Like It Club was held yesterday afternoon with Mrs. Grady Pipkin as Hostess and Miss Cora Rountree as leader.

Responses were from the lesson which was Antony and Cleopatra, Act 3.

Mrs. Peyton as pianist and Mrs. Pipkin as violinist furnished the musical program for the afternoon.

A delightful salad course was served.

The club voted to pay its prorata of installation at the West side school by voluntary contributions. The question of study some historical course next year instead of Shakespeare was referred to a committee.

Mrs. Charles White and Mrs. Ferris Frye were elected to membership in the club.

## MOTHER'S CLUB DISCUSSES MUSIC IN SCHOOL ROOM

Despite the snow and rain an enthusiastic meeting of the Mothers' Club was held yesterday afternoon in the Central School Building. The invocation was made by Mrs. A. D. McComas. A fine reading by Miss Mary Braselton and a paper by Miss Grace Bobo on Music in the school room gave variety to the program.

It was voted to join the City Federation and to adopt the Magazine, American Motherhood, as the official organ of the club. Subjects of interest to teachers and parent were discussed by those in attendance.

## I. F. E. BRIDGE CLUB WITH MRS. ANDERSON.

Mrs. J. C. Anderson, Jr., was hostess yesterday afternoon for this most popular club. In the two-table game of Auction Bridge, Mrs. D. H. Collier was the recipient of the favor, a pot of blooming hyacinths.

A dainty salad course was served by the hostess.

The next meeting of the club will be with Mrs. Collier, 214 North Jones Street.

## "Is The Trust Form Really Efficient?"

WASHINGTON, Feb. 28.—Does the monopolistic system contain in itself the seeds of its own decay?

That question Commissioner Joseph E. Davies, of the Bureau of Corporations, declared, in his annual report made public recently, a federal investigation now under way hopes to answer.

In a review of the working program of the bureau Commissioner Davies points out that aside from the study of the economic trust question, retail price maintenance is one of the questions to be taken up. Trusts, their efficiency and reforms, however, are to comprise the principal work for the coming year. The need of some federal body for the purpose of investigation and publicity in trust affairs, whether it be the bureau of corporations as now organized, or a commission as proposed in the pending administration bills in Congress, Commissioner Davies emphasized.

In his report he discussed the monopoly question at length, saying in part:

"The question is whether the trust form of organization is really efficient. If it be found that smaller competitive units in industry can produce commodities more cheaply, or even as cheaply as monopolistic units, and that they have other and greater advantages than those claimed for the monopolistic or trust system, then the problem is finally settled in favor of the competitive system and the chief argument for the regulation of monopoly is destroyed. This is a scientific question of fact, and it is the plan of the bureau to investigate this question.

"While from the governmental point of view there are various aspects of the trust question which are of great importance, such as the relation of the trust to the popular government and the effect upon the social and economic conditions of labor, there are two aspects of it which are peculiarly within the domain of the bureau, namely, the effect upon the cost of production and distribution and the effect upon the price to the consumer. Enterprises there goes a reduction in the cost of extraction, manufacture, and distribution, and that such reduction in cost is accompanied by lower prices to the consumer and does not involve a reduction in wages or an impairment of the conditions of labor.

"Many large combinations have failed and demonstrated their economic inefficiency. Combinations which have obtained control of the market, and it is admitted have prospered, but this is alleged to be due to their monopolistic position, and not to superior efficiency. According to those who hold

this view there is a point beyond which the increase in the size of operations does not result in an increase in economy and efficiency, but rather in loss and waste, so that the maximum of efficiency is not attained by large combinations but instead by concerns of moderate size. If this latter contention be true, then it has been said, the monopolistic system contains in itself the seeds of its own decay."

"Again, those who dispute the superior efficiency of some of the large combinations contend that this claim is made merely as a blind and for the purpose of selling watered stock. They say that such organizations are established for the purpose of either getting control of the market and exacting excessive prices from the consumers or of issuing large amounts of watered stock for the purpose of selling such stock to the public. In the first case it is argued that such concerns are

"Even if these claims were true, of course, the question would still remain whether the evil resulting from the large combinations would be greater than the alleged advantages of cheaper production and distribution. It is contended on the other hand, that the source and origin of monopoly is found chiefly in the desire to exploit the general public by stock jobbing schemes for the immediate profit of the promoters, or for the purpose of obtaining control of the market and exacting unduly high prices from the consumer.

"It is contended by some that with the increase in the size of industrial not interested with the vital promotion of greater efficiency but merely with obtaining a monopoly. In the second case they are chiefly concerned with the selling of stock, and as they can not claim to the public that it has a great value due to monopoly, they are obliged to find another selling argument, namely, superior efficiency.

"Of almost equal importance with the determination of this question of comparative efficiency is that of the price policy of such large industrial combinations as have achieved a substantial control of the market. Those who allege that such industrial enterprises result in greater efficiency and economy in production often overlook the equally important question of whether or not they absorb all the benefits of such economies in increased profits without any share thereof to labor in higher prices or to the consumer in relatively low prices or improved quality of goods, etc. The determination of the facts in this respect might not be such as to establish a broad generalization or conclusion, but the importance of having the facts is none the less obvious."

## BROWNING CLUB GIRLS SELL ALL THEIR CANDY

The girls of the Browning Club sold out their supply of home made candy and pop corn balls at the Ruby last night. So that they cannot sell tonight at the Mae I. The young ladies were selling home made candy and pop corn balls to secure money to buy a fountain at the West Side School houses.

## MISS EUNICE WALLEN VISITS HALLE CENTER TODAY

Miss Eunice Wallen went to Halle Center today for a visit with her husband and to visit home folks for a few days.

Miss Jessie Tedford left today for a visit with friends in Abernathy.

Miss Dudl McIntyre went to Halle Center today for a visit with friends.

Mr. and Mrs. Edwin Bells left today for Dallas where they will make their future home.

Mrs. P. M. Scott of Lubbock who has been visiting friends in Plainview returned to her home today.

Mrs. J. M. Wilson of Steigler, Oklahoma, who has been visiting friends here returned home today.

Miss Mamie Williams who has been visiting in Amarillo returned to her home in Matador today.

Miss Pearle Jeffus, of Greenville, came in today for a visit with her sister, Miss Jimmie Jeffus, who is very ill.

Miss Margarette Burt who has been teaching school in Tulla came home today for a few days visit with her parents.

## LARGE CATTLE DEAL

FT. WORTH, Tex., Feb. 28.—The J. F. Hovenkamp & Son Cattle Company of this place closed a deal recently with the Brazil Land, Cattle and Packing company, whereby they deliver to them in San Paulo, It. the spring, 450 head of two year old Hereford bulls. The amount involved in the transaction is \$60,000 and is considered to be one of the largest cattle deals ever consummated in the state, considering the number of cattle involved in the deal. A steamer has been chartered to transport the stock to Brazil.

## JUDGE SAYS WAIT 1 YEAR; RECORDS DO NOT SHOW IT.

So Miss Juanita Matlock and T. A. Willbank Are Wed at Runningwater.

Yesterday at high noon T. A. Willbank and Miss Juanita Matlock were married by Rev. A. B. Roberts, of Plainview.

The marriage took place near Runningwater, at the home of Mrs. Matlock, the bride's mother. An elegant dinner was served after the ceremony.

The bride is the recent divorcee in the case of Espy vs. Espy. In the decree of divorce issued by Judge Kinder it was stipulated that the plaintiff should not marry again in less than a year, but by some oversight this was omitted from the records, and the marriage yesterday found no impediment.

## LUBBOCK, TEX., FEB. 28.—THE CATTLE INDUSTRY IN THIS SECTION IS THRIVING

and many large sales have been recorded during the last few weeks. W. G. Russell recently sold for spring delivery 14,000 steers at an average price of \$65 per head or approximately 900,000 for the entire lot.

Another sale of considerable magnitude was consummated when a firm of this place sold 900 cows for spring delivery. The purchase price was about \$60,000. Since the first of the year about \$1,500,000 worth of cattle has been sold by Lubbock stockmen.

## McKINNEY, TEX., FEB. 28.—THE INDUSTRIAL ACQUISITION OF THIS CITY IS AN OVERALL FACTORY

The deal is practically closed and it is expected that work on the structure to be occupied by the industry will begin shortly. When in full operation the plant will afford employment to about fifty people. Texas apital is behind the concern.

## ANGLETON WILL GET UNION DEPOT

ANGLETON, Tex., Feb. 28.—It has been learned here that the Houston & Brazos Valley Railroad which is operated by the Katy, has entered into an agreement with the St. Louis & Brownsville Railroad to erect a modern union depot at this place. Work will begin immediately.

O. B. Lindsay left today for Paris Texas for a few day's visit.

# JOHN D. ROCKEFELLER DON'T SHAKE HANDS

## Celebrated Psychologist Gets Interview With Oil King and Deduces Remarkable Facts; But No Hand Clasp is Given

By DR. MORRELL

Note the face of this great man; it is distinctively an out curved face. The middle zone is by far the strongest, indicating as it does, self control, self care and self direction. The vertical face line is a measure of evolution. When the central zone of the face is built outward and forward it shows unfinished evolution. The highest type of face is the vertical order. If by reason of the upper zone being strongly developed it shows to be slightly incurved, this shows a predominance of reason over passion, appetite and propensity. The snake has its face on its back. The cat, lion, bear, hyena, and all low types of man are always characterized by a projecting central face. The vertical line is the sign that man has arrived from the brute to manhood. It has taken 500,000 years of problem and ascent to place the face of man vertical and in front of the spine, to expand and develop the frontal mass of brain to Edison like proportion and quality. Figures explained:

1. Is the life sign. This type of chin indicates great muscular tenacity great heart power, love of life, physical endurance.
2. Anti-social nature. Cares little for the people, a born plutocrat, a great home lover.
3. Length of lip and thickness of the upper lip shows mighty concentration power; power to put oneself asleep, a sense of self value, personal persistence.
4. Thought and emotional control, self concealment, tact, cunning.
5. Defensiveness, quick response, power, self love, leadership, love of power.
6. Far seeing, shrewd, speculative and microscopic type of eyes.
7. Remarkable scientific talent, a wonderful power of observation and analysis, perception of details, insight to big problems.
8. Strong religious interests without ethical values. Aware of spirit, God consciousness.
9. Self direction, motor control, an ability to hold appetite and altruistic

motives in check, stability of character

10. Love of children, animals, grain growing flowers, birds, etc.
11. Money making genius. The oil well of values, commercial talent and trading propensity. A man with a light muscular body, wonderfully wrinkled face and specialized genius pursuit, commercial leadership and invention, a general in business and devotee to religion with a metallic soul.

Dr. Edward Morrell, of Cleveland, celebrated psychologist and vocational expert, met John D. Rockefeller for a snap-shot interview for the World, talked with him four minutes, asked him several questions, heard his voice saw him move and studied his movements. He studied the expression of his face, the build and massing of his brain for fifteen minutes, and then tried to get a shake of his hand but Mr. Rockefeller does not shake hands. He is too economic, too careful of his strength; he simply lays his hand cold and lifeless, like a dead fish for you to shake. He even puts his thumb in the middle of his hand so that you can't grip him or squeeze him or get anything from him. It was the most shakeless shake the doctor ever experienced. It was politic but by no means political, and yet the hand is the chief tool of the brain, the chief external medium by which we express our social feeling. Dr. Morrell's statement of the observator of his meeting are as follows:

Perhaps John D. Rockefeller is the best known and the least understood of any of America's great men and for that reason he never fully discloses himself. His life is hidden and deep; his wonderful self control and thought concealing power practically fence him off from everybody, except his most intimate friends or business associates for friendship with him is an unfixed quantity. His life is like a closed book, leather lined, gold clasped, only to be used for private circulation and then only to be referred to for business purposes. A man may escape his friends but not his own skull, his own face, his own walk, his own

looks.

The face of any man is a one-page biography to be read by those who can understand what Shakespeare calls its tell tale story. Morphology is as much a fact as revelation. The face tells the story of the life both in talent form and the emotional expression. All life of man is the life of the mind. The mind builds the organism through which it functions and reveals itself in terms of structure, action and expression.

His face shows this: His mouth and eyes in particular. His voice is light, rather high-pitched and not very strong. His speech is distinctly accurate, especially as to the use of his words. The manner of his speech is suave, business like and penetrating. His mind is alert, wide awake and keen to its analytic workings, and although seventy-four years of age he is unusually youthful above his chin.

**He is A Plus Man**

Men differ in quality, bulk and specialization of powers. Genius is an aggregation of power in one or more directions. John D. Rockefeller is a plus man in values. He stands 5 feet, 9½ inches, weight about 158, has probably weighed 200, with a head measurement of more than 23 inches in circumference, and with other measurements of the cranium equally large.

Blood tells in many ways. It tells of the banks through which it runs in the form of a stream of consciousness. It brings with it historical deposits full of ancestral content. The English Scotch and German are the main factors of organism easily detected in this remarkable man. Physically he is in many respects a facsimile of his mother. He has a feminine type of muscular organism as to the length of muscle and of flexibility of muscle and power of adjustment. His muscular response is as quiet and as accurate as a cat; is as strong in many respects and as certain as that of a tiger. He wastes no energy in motion—every movement is an efficiency movement.

There is no disputing the fact that Rockefeller is a man of superb genius, too big to be in business for himself. He should have hired forty years ago to the United States Government as a specialist in finance, and an inventor of new commercial enterprise and methods. He has an abounding genius in this direction.

He has a mixed personality in which is compounded the conservation of a mature life with the optimism of a boy of fourteen. He is like the eagle that ascends to the great heights and views all beneath. He is able to see and foresee big commercial values and at the same time to recognize minute details.

**OHIO WIFE MURDERER WILL PLEAD INSANITY.**

CHICAGO, Ill., March 3.—William Ellis, on trial here for the murder of his wife, declared, when called as a witness this morning, that his ancestors were mentally and physically unfit. In an effort to save his life, Ellis will plead insanity.

**STORY OF FED. LEAGUE BACKER'S CAREER READS LIKE FAIRY TALE**

CHICAGO, Mar. 2.—Charles Weegham, chief owner of the Chicago Federal league and one of the biggest backers of the new organization's one of the most popular men in Chicago today. All the prominence he has won through his connection with the new Federal League has only added to his popularity. The story of his business success reads like a romance.

Ten years ago Weegham was a new arrival in Chicago. He had little money but he had a wonderful faculty for making friends and a well developed determination to achieve whatever he set out to do. At that time he was working hard in a small restaurant, saving every cent he could. He was finally able to buy a part interest in the restaurant where he was working and later became the entire owner.

tors of organism easily detected in this remarkable man. Physically he is in many respects a facsimile of his mother. He has a feminine type of muscular organism as to the length of muscle and of flexibility of muscle and power of adjustment. His muscular response is as quiet and as accurate as a cat; is as strong in many respects and as certain as that of a tiger. He wastes no energy in motion—every movement is an efficiency movement.

There is no disputing the fact that Rockefeller is a man of superb genius, too big to be in business for himself. He should have hired forty years ago to the United States Government as a specialist in finance, and an inventor of new commercial enterprise and methods. He has an abounding genius in this direction.

He has a mixed personality in which is compounded the conservation of a mature life with the optimism of a boy of fourteen. He is like the eagle that ascends to the great heights and views all beneath. He is able to see and foresee big commercial values and at the same time to recognize minute details.

**OHIO WIFE MURDERER WILL PLEAD INSANITY.**

CHICAGO, Ill., March 3.—William Ellis, on trial here for the murder of his wife, declared, when called as a witness this morning, that his ancestors were mentally and physically unfit. In an effort to save his life, Ellis will plead insanity.

Today he has a great string of restaurants in Chicago, covering the greater part of the city and his weekly income is said to be nearly a quarter of a million dollars. He lives in a fashionable residence of Lake Shore drive but is still the pal of those who knew him in his early career.

Weegham is quite a young man and there is nothing about him that would suggest the purse proud money kind. To outward appearances he is merely an unusually well dressed young man in his 30's with a most cordial manner and a habit of making fast friends. He is decently proud of all he has done but it has not made him unapproachable. In Chicago they say that anything that "Charlie" Weegham undertakes is pretty apt to be a success. And Weegham and his Federals are found to be pretty popular in Chicago.

## FORD CARS BREAK MORE PRECEDENTS

### Last Month Produced More Machines Than Any Other Month In Its History

DETROIT, Mich., Mar. 2.—January is not supposed to show the high water mark of production in the automobile world, nevertheless, the first month of 1914 shows the largest output of any month in the entire history of the Ford Motor Company. During the month of January this year, the Ford Motor company built and shipped 23,936 cars. The largest month's output previous to this was June 1913, when the number of cars made and shipped reached the total of 22,049.

### Business Increases

These figures show that the Ford business is growing even beyond the extraordinary proportions it reached last season. To achieve such production figures of every department and every executive, in a sense, has to grow too. The Ford plant is constantly adding new machines and new devices, constantly testing new systems to diminish labor, speed up the operations, to save time, energy and the like. In this way only can production keep pace with business. These time and labor saving systems and some remarkably interesting ones have recently been adopted, form some of the best fascinating features for visitors to inspect.

L. Peters, civil suit, tried, title judgment in favor of the plaintiff.

There seems to be quite a scare of scarlet fever and mumps but it seems to be of a light form.

O. B. Burnett, of Memphis, Texas, is here in the interest of Burnett's early improved cotton seed.

There will be a large acreage of cotton planted in Lockney county this year.

C. H. Hoffman, a progressive farmer who lives five miles northwest of Lockney has 100 acres in wheat and expects to plant 320 acres to row crops. In 1912 Mr. Hoffman had twenty-three acres of wheat and threshed 678 bushels. He has been on this place fifteen years and says he has never made a failure. When asked in regard to the prospects for this year he said that he had never seen better for the time of year. He is confident that irrigation in this county will do much toward the development of the country and has refused to sell his holding in the shallow water belt. Mr. Hoffman is one of the old settlers of the county and is known from Amarillo to Lockney by all of the old timers.

### CREAMERY FOR HEREFORD

HEREFORD, Tex., Mar. 2.—The Alvin-Houston Creamery Co., of Houston, the second largest creamery in the state is arranging to put in a branch here. They expect to be ready for business May 1, and will start with an output of 2000 pounds of butter per week. John J. Clark, a former resident of Hereford, will manage the plant. In addition to buttermaking he will buy and ship produce, butter, eggs, etc. Five families will move here with Mr. Clark and will bring with them more than one hundred head of fine Jersey cows.

### WORK STARTS ON BRICK BLOCK AT HEREFORD, TEX.

HEREFORD, Tex., Mar. 2.—The ground has been cleared and work will start this week on the new Ray building which will be 50 x 100. This building will be modern in every respect, and when completed will be occupied by the Fox Mercantile Company with a full line of general merchandise. The will be entirely of plate glass and will be a regular city effect with exceptionally large and roomy show windows.

LOCKNEY, Tex., Mar. 2.—Unfortunately your correspondent, with a good part of the Lockney population had to be in Floydada giving patronage and evidence to the son of Billy Blackstone. The greater part of Lockney's population do not believe in law suits, however it is the misfortune of quite a number to have to be in attendance at court at Floydada this week. Up to this writing only two cases have been disposed of. The D. J. Muncy vs. R.

## ONE YELLOW PRESS

Gave Schmidt-Annueller Killing  
District Importance So Everyone  
knew of Sordid Murder

NEW YORK, Mar. 2.—Newlyweds,  
here's your chance. Any intrepid  
young pair, or old, for the matter of  
that,—not superstitious and without  
"nerves" can have use of a comfortable  
apartment free of rent for one year.  
All they have to do to obtain a domicile  
gratis is to live in the Eighth Avenue  
Flat; where father Hans Schmidt mur-  
dered Anna Annueller and dismembered  
her body.

### One Among Millions

That seems like a small order to fill  
to find a tenant among some five mil-  
lion people, for one little apartment,  
but it has stumped one of the best  
known firms of Manhattan realty  
agents. The explanation is simple.  
New York is one of the most provincial  
towns in America, a "rube town" to be  
brutal. New Yorkers are primitive and  
superstitious. In any domestic West-  
ern city of size, Chicago, Cleveland or  
St. Louis, for instance, the fact that a  
man had been murdered in a four room  
flat would soon be forgotten in the  
flat, and if otherwise desirable, would  
be as much in demand as if the trag-  
edy had never occurred.

But in New York it is different.  
New Yorker quickly lose the perspec-  
tive and it is not entirely their fault.  
The sensational newspapers with a  
dirt of more important news, played  
up the Schmidt murder mendaciously  
substituting quantity for quality. The  
dead girl and Schmidt were pictured  
form every possible pose and portra-  
ed over countless pages. The result  
was, that not a man, woman or child  
in New York, failed to learn every de-  
tail, real and imaginary, of the sordid  
murder. New Yorkers are heir to all  
the primitive superstitions that go to

DR. JAMES M. TAYLOR.

Resigned as President of Vas-  
sar After Long Incumbency.

make up the conglomeration of all the  
greater city and consequently not one  
New Yorker will have anything to do  
with a perfectly harmless and com-  
fortable little flat where Hans Schmidt  
slew and hacked to pieces his trusting  
sweetheart Anna Annueller.

But real estate agents are practical  
men. They have no sentiment and no  
superstition, but they know a stone  
wall of hard and prosaic facts when  
they see one. The agents who have  
charge of the particular apartment  
where Hans Schmidt held forth as a  
human butcher realize the necessity of  
getting rid of the stigma that popular  
opinion attaches to the place by reason  
of the gruesome tragedy. They know  
that to get the fickle New Yorkers  
forget that the apartment is a house  
of death and mystery all that is nec-  
essary is to get the place occupied  
for a short time. Despairing of per-  
suading any ordinary rent-paying ten-  
ant to take the place, they have offer-  
ed the apartment, rent free, for one  
year, to any family who will occupy  
it. The hoodoo must be exercised.

## WRIT IS SOUGHT

Two of Thirty Defendants Absent  
--One Ill, One Trav-  
elling

NEW YORK, Mar. 2.—For the first  
time in the history of the United States  
violators of the anti-trust saw the in-  
side of a prison when eleven members  
of the Poultry Trust were committed  
to the toms by Judge Wadhams, in  
general sessions, this morning. The  
action followed the decree of the ap-  
pellate division confirming the con-  
viction obtained two years ago.

And for the Tombs, he said, the  
prison never held so many millionaires  
at one time. There were thirteen de-  
fendants and there should have been  
thirteen commitments but serious ill-  
ness prevented the attendance of two.  
The sentence of the court was that  
they serve three months in the peni-  
tentiary and pay a fine of \$500.

The defendants committed this morn-  
ing were Erving V. Dwyer, Arthur G.  
Dwyer, Charles Westerberg, Charles  
R. Jewell, James N. Norris, William H.  
Norris, Charles T. Hawk, Charles  
Thatcher, Clendon Bishop, Samuel Wer-  
ner and Charles Werner.

Solomon Frank and William W.  
Smith were not present. Their coun-  
sel explained that Frank is very ill  
and that his attendance in court would  
make his recovery doubtful. Smith it

was stated is making his way East by  
easy stage from the State of Washing-  
ton. After the convictions before  
Judge Rosalsky two years ago and  
pending the appeals, Smith took his  
wife West for her health. They were  
in a railroad wreck and Smith was  
made a cripple for life. On last Fri-  
day when the Appellate Division con-  
firmed the conviction, Smith was not-  
ified to return. It is said he cannot  
travel longer than a few hours a day.

### All Surrendered

The defendants were all surrendered  
in court by their bondsmen today and  
the eleven men, lined up at the bar  
where prisoners are usually arraigned  
for sentence, made a unique spectacle.  
They looked more like a jury than a  
batch of prisoners. Several of them are  
millionaires and all of them are men  
of large business interests.

Assistant District Attorney Delehany  
informed the Court that Isaac Jacob-  
son of counsel for defendants and  
Assistant District Attorney De Ford  
were in Albany to argue before the  
court of appeals in the matter of the  
defendants' application for a certifi-  
cate of reasonable doubt. The decision  
of the court, it was thought, might be  
forthcoming today.

In the event of the granting of the  
certificates of reasonable doubt the de-  
fendants will be allowed their freedom  
upon bail. If they are not successful  
they will not see liberty until three  
months hence.

Lawyer Winslow, counsel for the de-  
fense, asked Judge Wadhams to in-  
struct the sheriff, in view of the pro-  
ceedings at Albany, to delay a reason-  
able time before taking the prisoners  
to Blackwell's Island.

"There is nothing before me except  
the commitment," said Judge Wadh-  
ams, "unless the sheriff asks my ad-  
vice I do not see the propriety of my  
telling him what to do. The defendants  
are therefore committed to the custody  
of the sheriff."

# B ABY-SAVIN C AMPAIS REDUCE INFANT MORTALITY

Effect of Child Labor Laws Upon Children's  
Mental Attainments and Physical  
Development

WASHINGTON, Mar. 2.—An appeal  
to American mothers, to women's clubs  
to all who may be interested in the  
nation's social welfare, for aid in the  
movement to safeguard the lives of  
babies, was made today by Miss Julia  
C. Lathrop, chief of the Federal Child-  
ren's Bureau, in her first annual re-  
port to Secretary Wilson, of the De-  
partment of Labor.

"Infant mortality is a subject now  
challenging the attention of the whole  
civilized world," said Miss Lathrop.  
"It is impossible to state with accuracy  
the infant death rate measures because  
the United States differs from other  
civilized countries and provides no ac-  
curate or general system of birth re-  
gistration. Estimates obtained by the  
Government statisticians, based upon  
census reports, however, show that  
the loss last year was about 300,000  
babies under one year of age. Of these  
at least half would be living if we, as  
individuals and communities applied  
those measures of sanitation and hy-  
giene which are known and available.  
This vast and unmeasured loss of in-  
fant life is due solely to individual and  
civic neglect."

Inadequacy of funds and the limited  
number of workers provided by the  
statutes creating the Children's Bureau  
the report said has greatly hampered  
the prosecution of the work.

"It is obvious," the report continued  
"that even the most superficial survey  
of the bureau's great field is impossi-  
ble with the present force, and that in  
order to accomplish anything at all it  
was necessary that the staff should be

composed of accomplished persons."  
Baby campaigns in numerous cities  
and the efforts being put forth by them  
to prevent infant mortality were highly  
commended by Miss Lathrop. The  
bureau proposes to cooperate where-  
ever possible with such movements.

A series of pamphlets dealing with  
the home care of children, beginning  
with one on parental care, are now be-  
ing distributed by the Bureau. In  
these it is shown that slightly more  
than 44 per cent of the infants dying  
under one year of age in the registra-  
tion area in 1911 did not live to com-  
plete the first month of life, and that  
of this 44 per cent almost seven tenths  
die as result of parental conditions or  
of injury or accident at time of birth."

An investigation has been started by  
one of the Bureau's field agents in an  
effort to ascertain whether the child  
labor laws are being properly enforced  
and whether the states grant the  
certificates with due reference to the  
children's mental attainments and phys-  
ical development.

Through communications received  
by the Bureau, Miss Lathrop said she  
had been informed "that no state in  
America is at present making provision  
for exceptional and needy children."

The Bureau has discovered a popu-  
lar conviction that it is a sound prin-  
ciple that no child should be separ-  
ated from the care of a good mother be-  
cause of poverty alone. "The matter  
of turning this popular conviction into  
a useful public function" Miss Lathrop  
says "is one demanding searching in-  
quiry."

## Do You Know?

Minnesota has a forested area of 28  
million acres, the largest of any state  
east of the Rock Mountains.

There are about four million acres  
timber land in New Hampshire of  
which nearly half is farmer's wood lots

Forest fires in the United States have  
caused an average annual loss of 70  
human lives and the destruction of 25

million dollars worth of timber.

Juniper from the Indian reservations  
of New Mexico and Arizona may prove  
an excellent source of material for the  
manufacture of lead pencils. Manu-  
facturers are searching the world over  
for pencil woods.

Canada has established a forest  
products laboratory in connection with  
the McGill University at Montreal, on  
the lines of the United States Institu-  
tion of the same sort at the Universi-

ty of Wisconsin.

Tree planting on national forests  
has to be confined to comparatively  
short intervals in the spring and fall.  
In spring it starts when the snow melts  
and stops with the drying out of the  
ground; and in the fall it comes be-  
tween the fall rains and the first snow

## "SHALLOW WATER BEST" -- IRRIGATOR

**Mr. Layne Shows Lubbock Parties Pumped Irrigation is Less Expensive**

By Staff Correspondent.

LUBBOCK, Tex., Mar. 2.—George W. Briggs, a prominent developer in this county in discussing irrigation said to-day:

Mr. M. E. Layne of the Layne & Bowler company of Plainview, has visited all of the irrigated districts of the United States. He states that well pumping propositions are a better home-builder and more satisfactory, as each man controls his own water supply, which can be applied at the time most needed.

### Low Cost

The water supply in the semi-arid districts as far as he has investigated can be put into commercial and usable shape by proper equipment of wells at a less cost per acre for installation than the average ditch or canal now in use in the states of Washington and Colorado and other Western states. Mr. Layne states that the operating expense including the interest on the cost of installation, will be far less in keeping with the results obtained, than the ditch or canal system.

The average cost of ditch or canal water along the Platte river in Colorado costs \$2,500 per second foot which is 450 gallons per minute. The water is delivered in the canal, that is when there is sufficient water in the river to supply the canal, and the farmer loses

the leakage and evaporation, which loss in many cases amounts to 50 per cent. before the water reaches the destination.

Thus it is clear that a well that will produce 1350 gallons per minute which is 3 second feet, or 150 miner inches, if paid for at the ditch or canal price, if delivered on the ground at the point of consumption, would cost the farmer \$15,000 allowing for a loss of fifty per cent in the delivery, to say nothing of the uncertainty of being unable to get the water in dry seasons and being forced to wait to use it until your time comes, whether your crop needs water just at that time or not.

### The Costs

The first cost is usually from \$40 to \$75 per acre for ditch water, with from \$.80 to \$1.75 per acre annual assessments for canal foremen, repairs, washouts and other expenses, besides the interest on the first cost of installation.

In many cases of irrigation from the Columbia river, the fruit growers are paying \$75 per acre for their water rights, then in order to deliver the water to their land which in many instances is much higher than the ditch or canal, often ranging from a slight to an elevation of as high as six hundred feet, they are forced to repump the water, besides being under a heavy expense of long lines of conducting pipe.

The well proposition can usually be installed for from \$15 to \$30 per acre, which is less than the average cost of the ditch water. Therefore the interest saved on the smaller investment called for in well irrigation, will more than pay for the fuel consumed in oper-

ating the pumps and the upkeep of the ditch canal will more than offset the deterioration on the well plant.

The greatest mistakes and the most failures in well irrigation comes from installing the well too small and impractical machinery which does not produce water in sufficient quantities to permit the properly spreading of the same.

### Measuring Water

A beginner is inexperienced and does not know how to measure the water and much less how to estimate it, but being enthused and excited, he imagines he can irrigate a township with his new 2,000-gallon well, when in fact the 2,000 well usually estimated will develop only about 600 gallons per minute and he fails in his first attempt. This discourages him and is the reason for so many failures in the new irrigation districts.

Now, in order to be conservative and be on the safe side, Mr. Layne urges all parties putting in irrigation plants to consult those who are experienced who can properly install irrigation plants, and superintend the setting of a well at some convenient place so they can at all times know the amount of water their wells are producing.

### Over Planting

Always remember that over-planting, which is excessive acreage, limited cultivation and improper application of water will lead to bankruptcy.

Mr. Layne has given the study of placing under-flows or ground water in commercial or usable shape, his entire time for the past thirty years and he is confident that the engineering world is just coming to know the wonderful possibilities to be developed in the very near future from this great

source of fresh, life-giving, energized force stored in God-given reservoirs, to be used for man's benefit, when he once understands how to best procure it and apply it as he should.

The well is your own private property to be used at your convenience or pleasure. There is no waiting or guessing as to when your "turn" is coming, as with the ditch or canal, and no litigation concerning priority rights which is common in a ditch or canal proposition.

Therefore a well installed, well-irrigating pumping plant is a home builder, a water getter and a mortgage lifter.

When we consider the fact that this section has the water underneath, at such short distance from the surface, the above statement is very encouraging. Experts tell us that the main strata of water from which the irrigation is done averages a less depth from the surface than any county on the Plains, and that practically the whole county can be irrigated.

When this fact once become known to the world land values will certainly soar. The soil is of the proper sort for irrigation, there is no alkali or other injurious qualities in the soil or the water. Thus everything indicates success in the future.

### ANOTHER BIG WELL FOR HALE CENTER

HALE CENTER, Tex., Mar. 2.—Dr. Sanders has just had his big well West of town completed and tried out. The doctor is an up to date farmer. He has extensive fields of wheat, oats and other products which he will irrigate. He is installing a Bessamer Engine to pump. He says he can easily

EVERIS A. HAYES.

Representative in Congress From Eighth District of California.

pump 1200 gallons per minute. Improvements like the above secure the quickest development for the country.

Mrs. Mary Simpson who has been visiting in Plainview for the past several weeks returned to her home in Lubbock today.

Mr. and Mrs. W. A. Shipley who have been visiting their son in Clovis returned home today.

Friday evening Mrs. Akerson entertained her Sunday school class. The games were much enjoyed. Mrs. Akerson has a tact of making everyone enjoy a visit in her beautiful home.

Mrs. H. L. Assiter and two little daughters, of Cone, Texas, passed through Plainview today en route to Elida, N. M., where they will visit for several months.

Mrs. M. C. McCord and children, who have been visiting in Lockney for the past two weeks, returned to their home in Amarillo today.

Miss Maude Cantrell, who has for some time been in the employ of the Southwestern Telephone company at this place, left today for her home in Slaton, Texas.

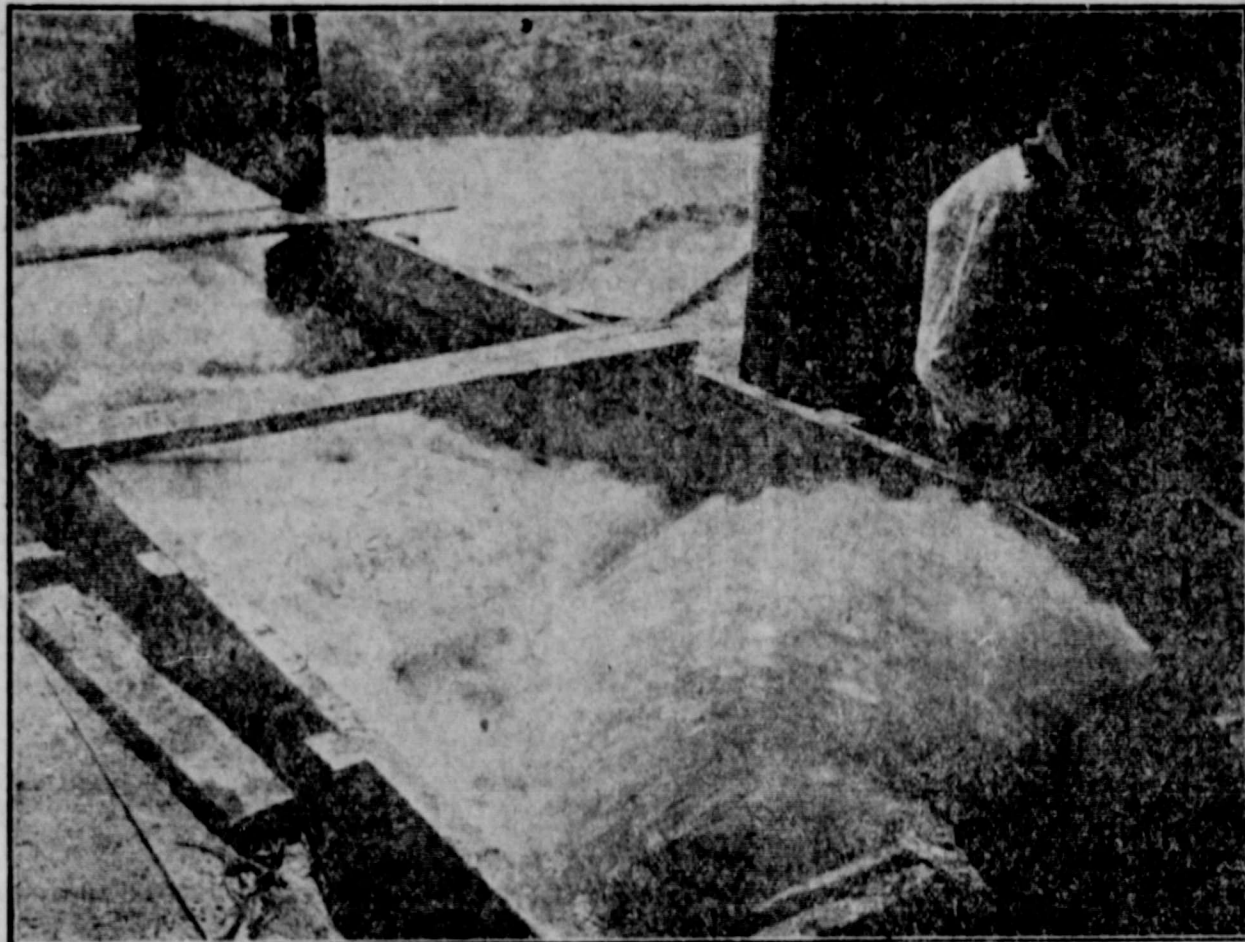

Charley Benson returned from Martin county today where he and his brother have driven their cattle for winter pasture. He says they have secured good grass and their cattle are doing well.

### STANFORD UNIVERSITY ADDS \$62,000 TO TEACHERS' PAY.

NEW YORK CITY, March 22.—Stanford University to-day authorized increases amounting to \$62,000 a year. This amount will be distributed among the teaching force of the University. Leland Stanford has 220 teachers, 1,750 pupils and an income of more than \$800,000 a year.

### OGG WILL CARRY MAIL PLAINVIEW TO ESTACADO.

A. T. Ogg will carry the mail from Plainview to Estacado. His route includes Ellen and Petersburg. Mr. Ogg will make the run in an automobile. The salary is \$1,500 a year.

## Experts Agree

That the greatest benefit which can come to Northwest Texas is to have an irrigation well on every 160 acres in the famous Shallow Water Belt. Will you be one of those men who will benefit? Or will you let your neighbors have the crops and the bank accounts while you are waiting to decide and your crops are thirsting.

We want to talk irrigation with you now before the thirsting days come.

The application at one time of sufficient water to cover the ground to a depth of three inches is the most dependable crop insurance. A pump delivering 1,500 gallons per minute will furnish this amount of water for one and three quarter acres in one hour and thirty and one-half seconds.

It is most important to have a good head of water so that it can be properly spread. This may be secured by a small well and a reservoir, but a better way is to have a large plant and take water direct from the wells.

It is money saved and many troubles eliminated by making the first installation a dependable plant even at what seems to the new irrigator to be more expensive than he at first contemplated. A good pumping plant furnishes the crop insurance or balance wheel between rain periods that puts the farmer on a banking basis.

It has been proven, and is acknowledged by experts employed by the Government, that this particular underflow water is the cheapest that is now obtainable, when economical machinery is used for lifting same.

Not only is this water found to be cheaper, but it is found to be sure.

The underflow of the northwestern part of the State of Texas is known to be one of the best for irrigation purposes in the world.

Therefore, an economical system for lifting this water is the best investment that can be offered to the farmer in this section of the country today.

The Herald's Open Forum  
and Public Service Depart-  
ments.

TUESDAY, MARCH 3

BROWN & MILLER, Publishers

**Boastful Haste.**

Governor Colquitt would extradite the murderers of Clemente Vergara. Not for murder, however. That crime was committed in Mexico. The charge is "horse theft." The Governor wants Rodriguez and his associates punished for the murder. Does he propose to secure them on the charge of horse theft and then wreak vengeance for their cowardly act of hanging the ranchman? Or does he propose to secure heavy penalty for the charge of "horse stealing," because they killed the man whom they robbed?

Just what is the purpose of Governor Colquitt's request that Washington advise him to whom he shall apply for these men?

What is the meaning of his boast to send the State militia to the Rio Grande?

Governor Colquitt must know that this action cannot affect any good. He is not so ignorant of diplomacy that he is not aware of the serious complications which rashness on his part would entail.

The Washington Government is investigating Vergara's death. The murder was dastardly. Our Governor proposes nothing statesmanlike; he would not effect retribution. His proposed action is calculated to embarrass the entire Nation.

But Governor Colquitt won't send the militia to the border. He knows Texas' place in the Union of 48 States. His one-time boast that he could settle the Mexican situation in 15 minutes is reflected in his present bravado.

Governor Colquitt does neither himself nor the Commonwealth honor when he proposes to meddle with any affair which the Federal Government is handling with admirable statesmanship.

**Better Than Corn.**

Illinois farmers complain because competition from Argentine lowers the price of corn. They blame the embarrassment on the removal of the tariff.

The men are wrong.

Perhaps they were benefited by a tariff on corn; it increased the price to them. The people paid more for corn—the consumer was forced to put up a bonus. Corn growing received artificial stimulus.

It is sound policy to stimulate an animal or a vegetable for a time, perhaps. Whenever stimulation becomes permanently necessary it cannot affect general benefit.

Illinois farmers have been growing corn for twenty-five years. They would have continued growing that cereal so long as a tariff enabled them to secure a constantly-increasing price. They were profiting. The dollars they coined were mined from the soil which another generation must use.

They murmur at the necessity for change. They will change, however, because profit lies that way.

The only system of farming which is permanently profitable is stock-raising. You can grow grain profitably if you feed it to hogs, horses or cattle, and return the manure to the soil. Stock farming yields the highest returns in present profits; it makes your land richer every year.

Of course, you must use improved methods of farming. You have to grow high-grade stock, use the silo and mix brains with your feed. English farmers have found dairying profitable on land which is valued at \$500 to \$600 an acre. Illinois farmers can do that, too.

Hale County farmers will have no call to complain about impoverished lands or lack of market or vanishing profits, if they mix high-grade live stock, silo, alfalfa and irrigation. Your profits will increase every year.

**The 78th Birthday.**

Texas is an empire.

The Commonwealth is imperial in domain. Its 269,000 square miles is an area equal to that of Germany, larger than France, larger than that little Island which bounds the world's greatest monarchy—England.

Texas farmers produced \$400,000,000 during 1913—more than that of any other Commonwealth. Manufactured products added \$449,732,608 to our wealth. Standing forests have the value of \$125,000,000. Minerals, petroleum, coal, gas and water power add another \$100,000,000 to our annual income.

This is the growth of 78 years. We celebrate to-day the birthday of the Commonwealth. Seventy-eight years ago Texas declared her independence from Mexico. We sing of the valor of Houston, Fannin, Crockett and Bonham. The pulse quickens when we speak of The Alamo, or of San Jacinto.

The men who fought for Texas' independence builded better than they knew. The imperial statute of the Commonwealth is evidence of their labors. We honor them. May the youth of Texas never grow so sordid that he will not feel hot blood surge in his veins when the story of Texas and her heroes is told.

These men laid a large responsibility upon us. Their heroism calls for public virtue—for private worth—on the part of men who enjoy the fruits of their sacrifices.

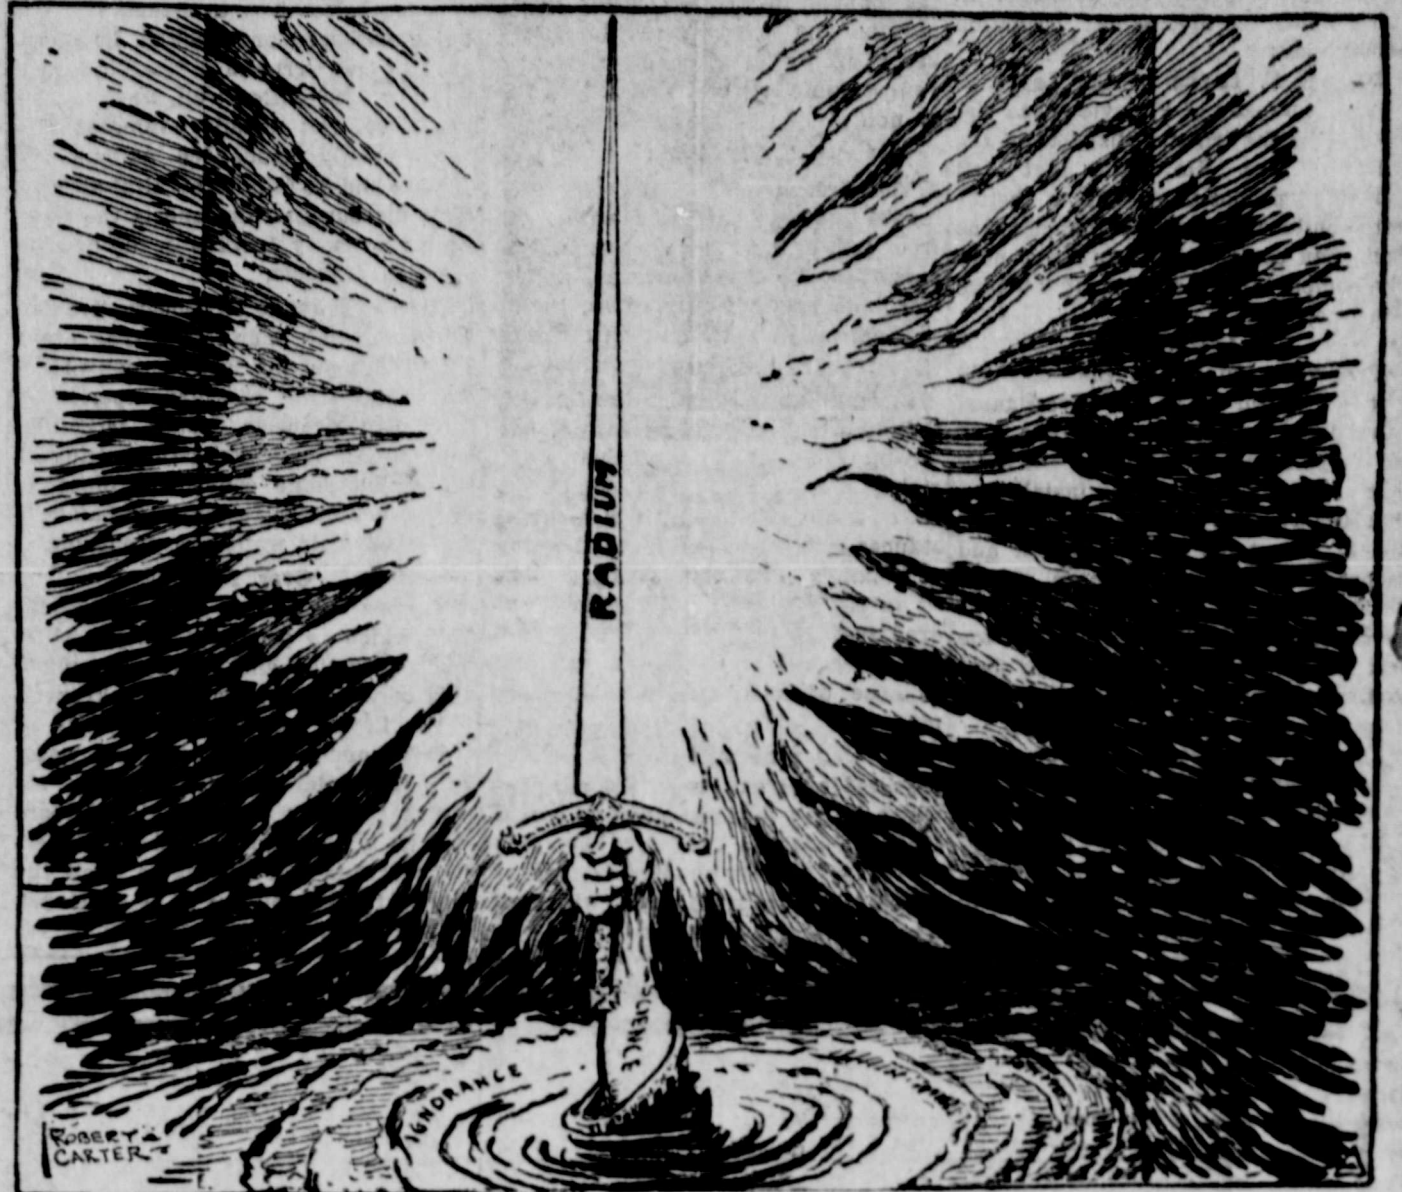

There are 50,000,000 acres of land in Texas which have not been touched by plow. An area larger than Iowa has not heard the whistle of the locomotive. The wealth of our mines, our forests, our streams has only just been touched.

On the other hand, lunatics languish in county jails; our prisoners are not adequately provided for.

Texas ranks lower than fortieth in the education of its boys and girls. Are we making adequate effort to remedy these evils? Is our effort to amass fortune for self robbing the Commonwealth of what it might expect of us?

Let us take an inventory on this 78th birthday of Texas. Texas is an empire in extent. It has imperial resources. Are we empire builders who need not be ashamed? Are we meeting the responsibilities like men?

THE NEW SWORD OF SCIENCE.

—Carter in New York Evening Sun.

**Fruit Industry of the Plains**

By L. N. DALMONT  
Proprietor of the Plainview Nursery

The following article by L. N. Dalmont was prepared by request for the World's Corn Show and Horticultural Meeting held in Dallas recently. Mr. Dalmont was awarded a medal and cash prize of \$50 for an exhibit of irrigated kafir corn grown at his nursery north of Plainview.

**Fruit Industry on the Plains**

As we understand, the Plains country is just now in its early but rapid development, and the fruit industry is in its infancy.

We believe the plains will become one of the greatest fruit growing sections of our great state.—Texas.

A glance backward, to twelve years ago when I came to the Plains will give you an idea of how the country has developed. Twelve years ago I made my first trip to the great staked Plains.

"I found ranch houses several miles apart. One could travel for miles and miles without seeing a house. There were a few villages of two or three hundred people. The farmers were scarce and the farming that was done was the crudest, but around most of these home I found fine gardens and a few fruit trees laden with the finest fruit which showed me the wonderful possibility of the country.

"I hastened back to my home, then near Abilene, where I had a small nursery, sold my home and came to the Plains. At that time I located nine miles south of Hale Center, a little place, perhaps with one hundred inhabitants and eighty or ninety miles from a railroad. I at once put out about 60 acres in orchard and nursery, which succeeded beyond my expectations; especially when I considered the fact that I knew so little about the varieties adapted to this climate.

"I find that our hardest American plums succeed as though they were in their native home. I see no reason why the grape industry will not be one of the grandest successes for neither disease nor climatic conditions interfere with the success of grapes.

"The high altitude makes it especially suitable to the growing of apples of good quality. Peaches also grow to perfection and some of the finest specimens of the best quality that I have ever seen were grown here. If it were

not that they are often killed by the late frost we would have one of the finest peach countries I know of. And since we have our smudge pots and wonderful water supply, with which we believe we can contrive an elevated water system to spray at the proper time and protect the fruit from frost and dry weather, we feel like anyone hunting a peach country need not go around the plains.

"Berries too, should be considered, for with our irrigation they can be grown to perfection. It is a common saying that everything that grows on a vine is a success. There are also many other varieties of fruit that are doing well here. There have been mistakes in the very commencement of the fruit industry. Varieties of fruit have been planted that were not adapted to the soil. These have been planted without preparing the soil properly and without cultivation after they were planted.

The pruning of the trees too high has greatly injured the fruit trees of the Plains because our West winds have a tendency to lean the trees North-east and consequently the hot sun in connection with the dry weather causes the bark to blister on the Southwest side of the tree, this greatly weakening if not killing the tree.

A few years ago insect pests and tree diseases were practically unknown in the Plains country, but now we find that some of the diseases detrimental to the fruit industry have established themselves here. Some have tried spraying but in many cases have failed on account of inexperience in handling the spray and using an inferior spraying material. In view of these facts all nurserymen should make a practice of dipping and fumigating all stock and scions coming from other localities.

As our people become more informed on the fruit industry it will be studied from more practical and scientific standpoints. These difficulties will be overcome. While we have seen the fruit industry in the twelve years that we have been here developed from a few small garden orchards to many orchards of extensive areas we believe the future will be better than that of the past."

**"POWER OF APPLIED THOUGHT"**  
By M. E. Layne

It is impossible to conceive the power of trained and applied thought in any useful line.

The Bible says that knowledge is more to be desired than silver and gold, yea, than much fine gold.

Men honor real knowledge. There is more power in applied thought than there is in much real labor.

Thought food does not lessen or diminish the supply, but continues to grow, and automatically develop the thinker.

Your face is the only part of your body not requiring clothing. It records your thoughts, and reflects the character, and the only time you want it covered is from shame.

The body consumes food and clothing and unless much thought is mixed with labor the body will consume all the benefit derived from such labor, therefore you are of little use and your efficiency low unless you continually exercise your will to drive your thinker into action along clean and practical lines that will continue to make your labor and the labor of others of value to mankind.

Do not use your head to hang your hat on only, and assume that dudish, wise, look.

The world is willing to pay, and is now paying more for practical, applied thought of one man than it will pay for the labor of many men who work their bodies and let their mind play and their faces rattle.

Therefore, Get the Thought Habit.

**A CHANCE FOR BACHELORS**

**Pennsylvania Girls Place Names in Shirt Boxes and Ask for a Reply**

Bachelors, here is your chance. It is a call for action! And it sort of seems like your patriotism, (maybe it's your manhood) is at stake. Women are suffering. Oh, they aren't in physical danger; there isn't a hunger strike you are asked to alleviate, but it is up to you, bachelors of Plainview.

Today C. C. Stubbs, of the Reinkin Satisfaction Store, was opening a shipment of shirts. He lifted a box and there fluttered to the floor a strip of white paper. Something about the paper suggested that it was more than a torn packing slip and Mr. Stubbs picked it up.

A name! Yessir, there was a name. We don't print that, but Mr. Stubbs has it. The young lady asked that anyone who chanced to get this name, write to her.

Well, Mr. Stubbs had found four of these slips before he had finished unpacking the shirts. All of them want to correspond with a view to matrimony. The young ladies live in Ashland, Penna.

Mr. Stubbs doesn't say whether or not he is going to comply with the request for the letter. He does say that he will give the names to anyone who is interested. The girls are waiting. It is up to the unmarried men of Plainview.

**Winter Irrigation**

By J. W. LONGSTRETH

An advantage that the pumping plant is to be planted to kafir, maize and alfalfa has been irrigated and it is for this purpose that water is being applied at present. It is the intention to irrigate all of the land before planting in order to insure a perfect stand and vigorous growth by the time other irrigation becomes necessary.

**Conserving Moisture**

Alfalfa is being cultivated and harrowed in order to conserve the moisture, and with this stored water available it is probable that irrigation will not be necessary until after the first of the crop is cut. The winter wheat is being harrowed and will have ample moisture until April or May and with one or two more applications will produce heavy.

Kafir and maize planted on this irrigated land will not need water before June, when the plant will have attained a height of from two to three feet and will be able to finish its growth with one or two additional irrigations.

Three hundred and fifty acres will be seeded to alfalfa on the demonstration farm this spring and two hundred and fifty acres will be sown to oats. This land of course, will need earlier and more frequent irrigation than the other crops, although with this stored

water available they will not need water until the oats and alfalfa have covered the ground.

No fear need be felt that water applied in this way cannot be recovered by the plant for none of it will be lost by seepage and if the proper methods are employed little need be lost by evaporation.

Some may think that this water is not necessary because there has not been necessary because the surface has been moist this winter but a careful investigation will show that there is little free moisture below the second foot while for maximum yields this moisture should exist for from five to seven feet. The opportunity of storing the water against the time of need is an advantage and should be more fully appreciated.

**SNYDER WOMAN'S BOND REDUCED**

SNYDER, Tex., Mar. 2.—Sheriff Boles has received notice that the Court to Criminal Appeals, at Austin, has reduced the required bond of Mrs. Minnie Latham, charged with the murder of John Stewart, from \$30,000 as set by District Judge Thomas to \$10,000. When the sheriff went to the jail to tell the woman of the court's order she seemed much relieved and said she could make the bond. She expects her people to come to her rescue but says she has assurances that she can get sufficient bondsmen in Snyder.

Sheriff Boles expects the bond to arrive here tomorrow and if it is approved the woman will be released from custody. She has not retained any of the local attorneys in her case.

**OVERALL FACTORY FOR HEREFORD**

HEREFORD, Tex., Mar. 2.—A party from Illinois is arranging to start an overall factory here. It is the intention to start with twenty machines, all to run by electricity. Thirty people will be employed and the machinery is of the latest pattern. The electric machine will cut thirty six garments at one operation. All button holes will be made and buttons sewed on by machines operated by electricity. Work shirts, jumpers, overalls, canvas gloves and children's clothing will be made.

**IDAHO MAN BUYS THE HEREFORD HOTEL**

HEREFORD, Tex., Mar. 2.—D. B. Hilbert, of Lewiston, Idaho, bought the Cordova Hotel this week from Judge Gough. Mr. Hilbert is here and with his wife and daughter will take charge of the hotel some time next month.

The Cordova is a thoroughly modern, brick hotel and it is the intention of Mr. Hilbert to build more room to it soon. The building and furniture goes with the purchase as well as the lot 50x140 feet.

**Irrigation Before Planting**

In fact, since the fifth of January not a day has passed without some land being irrigated. The water has been used on a variety of crops and for several reasons. All of the alfalfa and winter wheat and a part of the orchard has been irrigated.

Land that is to be sown in oats was irrigated in January and is now ready for planting. A part of the land that

# BLIZZARD MAY CAUSE FAMINE

## New York City Has Worst Storm Since 1888

### TOWNS PROSTRATED

#### Jersey City, Philadelphia and Brooklyn are Hard Hit, Storm Sweeping Southward

NEW YORK CITY, March 3.—The worst blizzard since 1888 prostrated New York City last night. Five deaths have been reported. Railroads are blocked; surface and elevated car lines have been forced to suspend operation. There has already been 91-2 inches of snow.

The city is facing a milk famine because of suspended train service into New Jersey. Hundreds of travelers are marooned in the railroad stations. These people are comfortable, but feeding them is a serious proposition unless the blizzard passes quickly. In fact, the question of food for all of New York will become desperate within 48 hours.

#### Wireless Out of Commission.

Telegraph wires are down. Wireless stations along the coast have been put out of commission. Their "aerials" are covered with ice, and it is practically impossible to communicate with any long-distance stations. Not since wireless became a factor in the commercial world has it been so thoroughly put out of commission before.

In New Jersey, Trenton, Newark, Jersey City and Hoboken were in darkness last night. Electric feed wires snapped under the double strain of intense cold and heavy snow. These towns are practically shut out from the outside world, and it is feared that many rural dwellers will suffer intensely.

#### To Trains to Philadelphia.

Philadelphia reports a heavy property loss because of the blizzard. Only fragmentary reports have been received, through inability to get satisfactory service over the wires. Two deaths have been reported in the Quaker City. Telegraph and telephone wires are down, and train service is demoralized.

Many barges have sunk in New York harbor. Ocean liners already due at the dock have been held up outside the harbor. So far as is known, however, no ocean-going vessel has suffered severely in or around New York City.

A terrific wind storm swept Baltimore. Roofs and signs were blown all over the city. Communication is almost impossible, and it cannot be estimated how much damage has been suffered by the Maryland metropolis. No loss of life is reported from Baltimore.

Undoubtedly Washington has suffered heavily, although it is impossible to get in touch with the Nation's capital at this hour. It would be practically impossible for a storm to prostrate Philadelphia and wreck Baltimore without taking heavy toll of the District of Columbia.

#### Fire Adds to Suffering.

Fire broke out in Baltimore while the storm was at its height. By heroic efforts it was confined within isolated limits. Three barrels of whiskey were burned and damage estimated at \$300,000 was suffered by the Canton distillery. Except for the fact that the blaze was in an isolated part of the city practically the whole town would have been burned.

Atlanta, Ga., reports the coldest weather of the winter, and incomplete advices from South Atlantic States indicate terrific storms. It is freezing at Chattanooga, Tenn., and Charleston, South Carolina.

Property losses will amount to tens of millions of dollars.

NEW YORK CITY, March 3.—The danger of fire is so great that firemen have been ordered to patrol the streets constantly, watching for the slightest blaze. Business streets are deserted and the metropolis is practically cut off from the outside world.

A coal famine is threatened, and people have been unable to secure milk.

Brooklyn is completely snow bound. No boats are leaving the piers, and reports indicate scores of vessels in distress all along the coast of New England.

The temperature is close to zero. All New England is prostrated.

### LAWYER, AUTHOR, ORATOR 77 PARALYZED IN BROOKLYN

NEW YORK, N. Y., Mar. 3.—General Horatio C. King, author, lawyer, orator, is seriously ill at his home in Brooklyn with paralysis. He is 77 years old.

### Mlle. de la Ruelle

Mlle. de la Ruelle, the French government's inspector of labor, who has been in America a year investigating labor conditions, went to Washington recently to see the president and other officials. She is the first woman to be sent by France on such a mission.

### "COALITION RUMOR FALSE" SAYS WILSON

#### Foreign Powers are not Uniting Against Mexico Policy; Investigating Vergara's Death.

WASHINGTON, D. C., March 3.—President Wilson said to-day that O'Shaughnessy wired to-day that progress is being made in the investigation which is being made in the death of Clemente Vergara, the Webb County ranchman. General Carranza informed Bryan that he is now investigating the disappearance of Bauch.

President Wilson said that reports of a coalition against the American policy in Mexico by foreign powers is unfounded. Secretary Bryan, Assistant Secretary Moore and British and Spanish ambassadors conferred to-day on Carranza's refusal to accept from the United States representations in the interest of subjects of other nations.

Villa says that Carranza will accept communications from the United States when he is recognized by the Washington Government. Bryan hopes that any difficulty over this matter may be avoided when he hears from Carranza direct.

### BAILEY WILL TEST NEW TARIFF LAW

#### Ex-Senator Says Will File Suit Against Admission of Sugar Duty Free

WICHITA, Kans., Mar. 3.—The new tariff law is to be tested in the courts. Former Senator Joseph W. Bailey of Texas, announced today that permission would be asked of the Supreme Court to file suit against the United States government to restrain the admission of sugar from Cuba without duty. The suit will be instituted in the name of the Commonwealth of Louisiana.

The suit will test the validity of the new tariff which removes the duty of 20 per cent on Cuban sugar. The tariff was imposed by the reciprocity treaty with Cuba.

### Villa Thinks Bauch Was Assassinated

EL PASO, Texas, March 3.—General Villa's expression to-day of the belief that Gustav Bauch was assassinated occasioned little surprise here. It is believed that Bauch was slain at Juarez a week ago last Friday. This is the day that Villa left for Chihuahua.

Villa says he thinks it likely that Bauch was assassinated. He says the German-American had many enemies. "Of course, if he was assassinated, I cannot be held responsible," Villa adds.

### Letcher Says Benton Made no Threats

EL PASO, Texas, March 3.—Marion Letcher, American Consul at Chihuahua, arrived to-day to conduct an investigation into the death of William Benton, the English ranchman killed by General Villa. Letcher will act as adviser to the commission. Letcher says that witnesses deny that Benton threatened Villa.

### REBELS WIN 2 LOSE 1 TOWN

#### Heavy Losses Are Reported From Rio Malino Today

### OFFICERS EXECUTED

#### Constitutionalists Capture Lampasas and Take 50 Prisoners at Rodriguez; Bridge Dynamited

EAGLE PASS, Texas, March 3.—Meager reports of a battle between 200 Federal and 100 Constitutional troops at Rio Molino have been received here. Rio Molino is near West Piedras Negras. Heavy losses are reported on both sides. Huerta's forces claim the victory. Field hospitals have been established at Zaragoza. That is taken to mean that further fighting will likely follow.

#### BROWNSVILLE, Texas, March 3.—

The Constitutionalists captured Lampasas to-day, after a bloody engagement. The rebels also took Rodriguez after a continued struggle. Fifty Federal prisoners were taken at Rodriguez. Three of their officers have been executed.

It is reported that the Federals fought from a railroad bridge over the Saldo River, and that the bridge was dynamited by the rebel troops. If this report is true, it will seriously interrupt traffic between Monterey, Mexico, and Laredo, Texas.

### 2000 STORM BOUND SCRANTON CHURCH

#### Two Dead, Others in Serious Condition as Attempt to Get Home.

SCRANTON, Pa., March 3.—Within one mile of the center of this city two thousand persons are to-day storm bound, as the result of a fearful blizzard which has raged here for nearly two days. Many had gathered in the Billy Sunday tabernacle for Sunday services when the storm overtook them.

Some attempted to reach their homes last night. As a result of the exposure, two men perished and several are in a serious condition.

Food was served to the multitude at midnight last night and again this morning. Snow is drifted high about the tabernacle and a gale is still blowing.

### MATHEWSON SIGNS WITH N.Y. GIANTS

#### "Big Six" Turns Down Offer From Federals of \$65,000 For Three Years.

MARLIN, Texas, March 3.—Christy Mathewson signed to-day with the New York Nationals. There is rejoicing in the camp of McGaw, "Big Six" as New York's greatest drawing card. Despite his thirteen years of service the intrepid collegian is yet one of the greatest pitchers of the National game.

CHICAGO, Ill., March 3.—An offer of \$65,000 was made Christy Mathewson to-day for three seasons' work as manager of the Brooklyn Federal League baseball team. The offer was wired the peerless giant by President Gilmore of the Federal League.

Sixty-five thousand dollars for three years means \$21,666.66 a year. This is one of the largest salaries ever offered a baseball player.

### O'Shaughnessy Says Take Away Guards

By United Press. MEXICO CITY, March 3.—Police guards about the American embassy and American Club were removed to-day. When Charge d'Affairs O'Shaughnessy learned that General Huerta was unusually intoxicated when he posted the guards, immediate demand was made for their removal. O'Shaughnessy said that the guards attracted attention and tended to precipitate trouble.

It is thought that Huerta posted these guards because of request which he claims to have received from Washington to permit them to march to the City of Mexico.

Mr. Cooley, one of Hale Center's live business men, made a trip to Plainview last Saturday.

### Additional Rangers Asked for Border

AUSTIN, Texas, March 3.—Governor Colquitt was requested to-day to send additional Rangers to points along the Mexican border. The additional guard is asked for to protect Texas property from Mexican bandits who are raiding along the Rio Grande.

### TEXAS PREDICTS HIGHER PRICES ON MEATS

CORPUS CHRISTI, Tex., Feb. 26.—Dollar a pound meat within the next quarter of a century unless the Southwest and especially Texas, raises a lot more pork and beef, is the prediction of Col. P. R. Simmonds, a former Texan, but for the past twenty-five years a resident of Bloomfield, N. J. Col. Simmonds recalled the first attempt to export beef from Texas which was made at Galveston about thirty years ago. The failure was due to the lack of refrigeration and the entire cargo spoiled and was thrown overboard when it reached the mouth of the Thames river, enroute to London.

### A MESSAGE TO WOMEN

Who Are "Just Ready to Drop." When you are "just ready to drop," when you feel so weak that you can hardly drag yourself about—and because you have not slept well, you get up as tired-out next morning as when you went to bed, you need help.

Miss Lea Dumas writes from Malone, N. Y., saying: "I was in a badly run-down condition for several weeks but two bottles of Vinol put me on my feet again and made me strong and well. Vinol has done me more good than all the other medicines I ever took."

If the careworn, run-down women, the pale, sickly children and feeble old folks around here would follow Miss Dumas' example, they, too, would soon be able to say that Vinol, our delicious cod liver and iron remedy, had built them up and made them strong.

It is a wonderful, strength creator and body-builder, and we sell it under a guarantee of satisfaction. You get your money back if Vinol does not help you.

P. S. For any skin trouble try our Sazo Salve. We guarantee it.

J. W. WILLIS DRUG CO. Plainview, Texas

### THE FARMER'S FIRST AID IN SICKNESS.

WHEN there is sickness or an accident on the farm, haste in calling the doctor is vital.

Life may rest on minutes—Don't wait until sickness occurs, and THEN wish you had a telephone. Order it NOW from our nearest manager, or write.

THE SOUTHWESTERN TELEGRAPH AND TELEPHONE CO.

DALLAS, TEXAS

Cures Old Sores, Other Remedies Won't Cure. The v... cases, no matter of how long standing, are cured by the wonderful, old reliable Dr. Porter's Antiseptic Healing Oil. It relieves Pain and Heals at the same time. 25c, 50c, \$1.00

### HEISKELL'S

One application soothes and heals a rough, pimply skin, and, when repeated, quickly effects a cure. Eczema, Erysipelas, Tetter, Ulcers and all skin diseases yield to its curative properties. 50c. a box. At all Druggists. Send for free sample and book, "Health and Beauty."

### OINTMENT

### Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; this causes out of ear deafness (caused by catarrh) which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free. P. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

## WANT BALLOT IN MISSOURI

Twenty-Three Thousand Signatures To Be Had

### "IT IS NOT A FAD"

St. Louis, Kansas City and Other Cities Have Strong Women's Organizations

COLUMBIA, Mo., Mar. 3.—Within a few days according to Mrs. Walter McNabb Miller president of the Missouri Equal Suffrage Association, the 23,000 signatures necessary for the vote on an equal suffrage amendment to the constitution will have been secured. Nearly half of that number had been secured on January 28 after several weeks of work throughout the state. Mrs. Miller explained today the "Missouri Reason," for woman suffrage, the desire of women to participate in and share the labors of the government, and not the mere seeking of more influence and power. She said Missouri will be the next suffrage state.

"We are not entering the work as a fad or a gain," said Mrs. Miller, "every worker from the state president to a ward captain is a volunteer officer. The members of the organization are students of social life. They see that modern conditions are leaving upon some women too much leisure while others have none. We cannot spend our time in bridge and parties and have lightened our housework we have gossip. Yet modern improvements have lightened our housework and other duties we have something to do. On the other hand, we see women who never know a moment's rest. We believe that much or all of this is due to social conditions, which we propose to help correct. We want to help make sweat shops impossible and child labor unknown."

#### Arguments Raised

"Ever yargument raised against equal suffrage has been raised against every step which has been made in woman's progress. We expect to show by all our conduct in attempting to secure the ballot that we can use it wisely when we get it. The number of college women in our association is example of the type of women in it."

The organization of the Woman Suffrage party is being made all over the state in anticipation of the initiative. The party will be non-political and non dues paying. There will be county and township chairmen, ward and precinct captains. In some places this organization has been perfected already and is securing signatures to the initiative petitions by a house to house canvass. Elsewhere they are planning whirlwind campaigns for one day in which they will concrete their efforts.

When the petition has been accepted by the Secretary of State and officially submitted to the people the real work will begin. Most of the planning is being directed toward the campaign because the women are sure they can get enough signatures to have the initiative submitted. They say they are having little trouble getting the men to sign, because the sign does not seem that the person is in favor of woman's suffrage but is in favor of having it brought to a vote.

#### Noted Speakers

National speakers will be brought to Missouri. Many Illinois and Kansas speakers will come across the borders to help their sister state. Exhibit booths will be placed at every county fair. There will be many automobile campaigns.

Organizations of all kinds will be asked to endorse the movement. The Progressive and Socialist parties, the Federation of Labor and the Farmer's Educational Alliance have done so already. The W. C. T. U. has long had a suffrage department. There are three organizations in St. Louis alone. The Business Woman's League, St. Louis Equal Suffrage League and the Junior Suffrage League. Kansas City has four similar leagues.

A college woman's league is being proposed on a state-wide scale. There are several unassociated leagues.

The Missouri Equal Suffrage Association which is a union of all these leagues has been organized. This was made necessary by the removal from

the state of some of the leading officers. Mrs. McNabb Miller, of Columbia is president.

#### Leading Officers

Other officers are: Vice President at Large, Mrs. Morrison-Fuller of Glasgow; Vice President, Dr. Dora Green Wilson, of Kansas City; recording secretary, Miss Mathilde Dallmeyer, of Jefferson City; Corresponding Secretary, Mrs. C. K. Burdick, of Columbia; Treasurer, Mrs. William D. Rusk, of St. Joseph; Auditor, Miss Mary E. Buckley, of St. Louis; Chairman of the press committee, Mrs. Emily Novel Blair, of Carthage.

Mrs. Blair is president of the Missouri Woman's Press Association. Miss Ruth White of Kansas City, whose exhibit at the Child's Welfare conference there several years ago attracted National notice, is chairman of the literature committee.

A "Traveling Library" is one of the important features of the association.

#### CONTRACT AWARDED FOR STATION AND TERMINALS

DALLAS, Tex., Mar. 3.—Contract has been let to an Eastern concern for the erection of a mammoth union station and terminals in this city. This will be the largest station in the Southwest and will cost when completed, \$6,000,000. It is expected that excavation work will begin shortly.

#### VIADUCT NEARS COMPLETION

FORT WORTH, Tex., Mar. 3.—The big viaduct under construction in this city is nearing completion and it is thought will be ready for travel in the next few weeks. The bridge spans the Trinity river on North Main street and is one of the costliest structures of its size in the United States. It is being erected at a cost of \$2,000 per foot.

LOST—Diamond set from wedding ring. Reward for return to JNO. M. GIST, 701 Restriction Street. Ad. tf.

## DO NOT WANT A SEPARATION

Ulster Women Assist One Hundred Thousand Armed Men

### DREAD CIVIL WAR

Practical Methods Adopted By Women "Who Back Up Their Folks"

LONDON, England, March 2.—"We women are doing all we can, in every possible way, to help the 100,000 men whom Ulster has armed and drilled in order to remain an integral part of the United Kingdom. Just as the American Civil War was fought to keep the States together, so we are striving against separation."

In a statement made to-day to the Belfast correspondent of the United Press, the Marchioness of Londonderry, President of the Ulster Women's Unionist Council, thus summed up the feminine attitude in the North of Ireland on the Home Rule question. Her husband, who, with Sir Edward Carson, was one of the organizers of the Ulster Provisional Government, is president of the men's Ulster Unionist Council.

"Such a change in the Constitution of these islands as is proposed in the Home Rule bill," said Lady Londonderry, "would not be allowed to be passed in other civilized countries unless by a two-thirds majority, or some other definite and unquestioned expression of the popular will had been shown in support of the alteration. Why, then, should this bill be smuggled through without an appeal to the people. It is a curious fact that the Radical party, which professes to believe in democracy, should decline to consult the democracy. The question of the separation of Ireland from Great Britain as much as it concerns Ireland. We owe allegiance to the same King, and we fly the same flag as Great Britain, and we will not allow this crime to be perpetrated. That his Majesty's army should be sent against the most loyal of loyal populations of Great Britain at the bidding of the Irish Nationalist party is unthinkable. Ulster is more determined than she has ever been that she will not consent to be dominated by, or even acknowledge in any way, a parliament and an executive in Dublin. The government seems to forget that it is up against not merely a political organization, but a whole population. If the Radical party holds to the belief that a country cannot be governed without the consent of the governed, the men of Ulster and we women backing them up, will show how steadfast is our resolve to continue to be governed as now, within the union, and to remain under the Imperial Parliament and nothing else."

#### Practical Methods.

The enthusiasm of the anti-Home Rule women of Ulster and the practical methods they have adopted for "backing up" their men folks constitute at present the most interesting development in the preparations that province is making to resist the authority of the proposed Dublin parliament. Of the 234,000 women who signed the feminine edition of the Ulster Covenant a year ago, 140,000 have become contributing members of the Ulster Women's Unionist Association, and in the past few months have raised \$20,000 for the Ulster defense fund. In every town and in almost every village sewing circles have been formed for the making of bandages, pajamas, sheets, pillow-slips and other articles that would be required in war hospitals; while members not engaged in needle-work are canvassing their communities for donations of still other articles of hospital equipment.

A large nursing and ambulance corps has been organized along the lines of the Red Cross, under the direction of the chief medical officer of the Ulster Volunteer Force, Colonel Davis, late of the Indian Medical Service. In Belfast alone 700 women have passed examinations in first aid and nursing, and 400 more are under instruction, while still others who have volunteered for this service have been unable as yet, owing to lack of teachers, to take the required lessons. Of these, a large number have enrolled as cooks, and

even laundry women, for fear they may not attain proficiency in nursing before hostilities begin. A special detachment of nurses has been organized by an Ulster woman of title among the students in Belfast University. A hospital ship has been offered by another Ulster woman, an English woman sympathizer has promised to bring over a complete field hospital in 48 hours' notice, and several wealthy women of the province have agreed to turn their residences into temporary hospitals or convalescent homes.

## TO-DAY'S MARKETS

STOCK YARDS, FORT WORTH, Texas, March —Five thousand cattle are offered to-day, including 400 calves. The market is steady.

Market is steady on 3,000 hogs. Top is \$8.75; light, \$8.10 to \$8.60; mixed, \$8.50 to \$8.70; heavy, \$8.60 to \$8.80. Price on pigs is \$6.50 to \$7.50. Market is steady on 600 sheep. Daggett & Keen.

STOCK YARDS, KANSAS CITY, Mo., March 1.—The market is strong to ten cents higher on 7,000 cattle. Natives bring \$9.00.

Fourteen thousands hogs have been received; price five cents higher. Top is \$8.65; bulk, \$8.30 to \$8.60. The estimate for Wednesday is 14,000 cattle and 10,000 hogs.

UNION STOCK YARDS, CHICAGO, Ill., March —The market on 25,000 cattle is steady. The price on sixteen thousand hogs is five cents higher. The estimate for Wednesday is 4,000 cattle and 10,000 hogs.

NEW PASTOR AT WASHINGTON WASHINGTON, Mar. 3.—The Rev. R. C. Gavan, chancellor of the Roman Catholic archdiocese of Baltimore, was scheduled to assume his duties today as pastor of the Shrine of the Sacred Heart Church here.

## Announcements

The following announcements are made subject to the action of the Democratic primary:

- For Representative. CAPT. T. J. TILSON.
- For District Judge. R. C. JOINER.
- For District Attorney. GEO. L. MAYFIELD.
- For District and County Clerk. B. H. TOWERY, W. H. BOX, J. W. FIPKIN, S. S. SLOANEKER, W. N. McDONALD.
- For Sheriff. J. C. HOOPER.
- For County Judge. W. B. LEWIS.
- For County Treasurer. JOHN G. HAMILTON.
- For Tax Assessor. J. N. JORDAN.
- For County Attorney. CHARLES CLEMENTS.
- For County Surveyor. T. P. WHITIS, O. HOLLAND, D. L. ALEXANDER.
- For City Secretary. B. L. SPENCER.
- For City Marshal and Tax Collector. J. F. WATSON, JOHN VAUGHN.
- For Public Weigher, Precinct No. 1. TOM THOMPSON.
- For City Attorney—LEE ROY PEARSON.

Plainview, Texas, March 3, 1914.

Mr. Customer:

The delivery question is a small one but it counts in the grocery business. Horse feed, wagon repairs, driver hire must be paid for on your grocery bill at the end of the month. Will you insist on paying this expense or pay our cash prices and save the difference?

We buy for cash and save wholesale cash discounts for the benefit of our customers.

Yours for March business, EAST SIDE GROCERY, Geo. S. Fairris, Prop.

### WE FILL ORDERS PROMPTLY

so as to be sure they are correctly supplied. Here you will find no mistakes made, so we never have to apologize for errors or delays in the delivery of goods. Busy households recognize the comfort and convenience of doing business with us, in consequence; and as we pride ourselves upon the high quality of all our Groceries, and price them with a view to small profit, there is little wonder that we lead all rivals in the amount of business transacted.

WRIGHT & DUNAWAY  
PHONES 35 and 355

## To The Homeseeker or Investor

We give below descriptions of a few of the many tracts of land we have for sale in the Irrigation Belt surrounding Plainview, which territory this firm has been identified with for the past 25 years. We know values and best opportunities for investments. These lands are first class, will bear inspection and our prices are attractive.

- NO. 1.—10,000 acres in a solid body, partially improved; all choice level land, ideal for irrigation, water 35 to 55 feet of the surface. Without question, this is one of the most desirable tracts of land offered for sale in the Plainview country. Can sell in tracts to suit the purchaser.
- NO. 2.—4 to 6 sections, unimproved, in a solid body; strictly choice, smooth and level; ideal for irrigation, water 35 to 55 feet of the surface. Can sub-divide into tracts of one to four sections.
- NO. 3.—4 sections unimproved land in a solid body; very choice, smooth and level; almost free of any lakes; perfect for irrigation; water 40 to 50 feet of the surface. Nothing better; fenced and watered. Absolutely the best four-section proposition now being offered. Must sell as a whole.
- NO. 4.—1,280 acres unimproved land in a solid body; 90 per cent first-class, level land; ideal for irrigation; water 30 to not over 40 feet of the surface; about one-half mile of living spring water. The best irrigation or stock-farming proposition yet offered.
- NO. 5.—440 acres improved land 4 miles of Plainview; well located, shallow water; ideal for irrigation, and the price is very reasonable.
- NO. 6.—307 acres 8 miles southeast of Plainview; very choice; 100 acres in cultivation; water about 35 feet of the surface.
- NO. 7.—160 acres unimproved land 9 miles southeast of Plainview; all smooth and level; water about 35 feet of the surface; fenced and 80 acres in cultivation.
- NO. 8.—160 acres unimproved land 8 miles of Plainview; on public road, well located and very desirable.
- NO. 9.—160 acres improved land 9 miles of Plainview; 100 per cent tillable; very choice; fine for irrigation; fair farm house, windmill, and a good farm.
- NO. 10.—Two 160-acre improved places 3 miles of Seth Ward College; 100 acres each in cultivation; 100 per cent tillable; perfect for irrigation; partly fenced with woven wire; only fair improvements; well located and very cheap.
- NO. 11.—80 acres unimproved land 3 1/2 miles of Baptist College; 100 per cent tillable; ideal for irrigation; well fenced and located on two public roads. Nothing around Plainview more desirable. Will sell in 20-, 30- or 40-acre tracts.
- NO. 12.—320 acres unimproved land 8 miles of Plainview; 100 per cent tillable; ideal for irrigation; nothing more desirable.
- NO. 13.—960 acres unimproved land in a solid body 9 miles of Plainview and 4 miles of small town and railroad. All choice, smooth land. This is one of the most desirable tracts of land around Plainview. Can't be equalled for irrigation; lay of the land is perfect.

We have other lands for sale, too numerous to mention. Will be glad to correspond with any one, and to furnish prices and descriptive literature.
