

THE PLAINVIEW EVENING HERALD

TWICE-A-WEEK

VOLUME 26, NUMBER 34

PLAINVIEW, TEXAS, FRIDAY, APRIL 30, 1915

PRICE FIVE CENTS

ARE ASKING FOR BETTER PASSENGER TRAIN SERVICE

Want Panhandle and Santa Fe to Put on Schedule Which Will Give Afternoon Trains, Too.

Mayor J. L. Dorsett has taken up the matter of securing better passenger train service for Plainview. A petition signed by the prominent shippers of Plainview and commercial organizations has been sent to the general manager, F. C. Fox, at Amarillo, asking that if feasible he attach a passenger coach to each of the local freight trains and operate same as nearly on schedule time as possible.

It is pointed out in the petition that since the schedule has been changed the train service is equal to only one train out of Plainview every twenty-four hours, in that the trains arrive at so nearly the same hour.

The request is considered reasonable, and it is expected that some action will be taken in the matter in the near future.

POST OFFICE INSPECTOR HERE.

J. R. Kerley, of Amarillo, inspector for the Post Office Department, is in Plainview today making an inspection of the post office. He is the guest of his father-in-law, G. C. Kock, while in the city.

PRESBYTERIAN CHURCH HOLDS "GET-ACQUAINTED" BANQUET.

New Pastor, Rev. T. B. Haynie, is Guest of Honor; Ninety Attend.

Last night at the Presbyterian Church the congregation tendered a "get acquainted" banquet to the new pastor, Rev. T. B. Haynie. Owing to the heavy rain and storm, the attendance was only ninety.

An elegant supper was served by the ladies. H. V. Tull was master of ceremonies. Dan Morgan spoke on the financial questions involved in the church. Judge Y. W. Holmes' subject was the prayer meeting. W. I. Scudder spoke on the Sunday School work of the church.

Miss Olive Wheeler, accompanied by Kirby Scudder and Claude Nobles on the violin, gave a vocal selection. The feature of the evening, was the talk by the new pastor, Rev. T. B. Haynie.

LIGHT PLANT BUILDING NEWLY PEBBLE-DASHED.

The Malone Light and Power Company have just completed pebble-dashing the building housing their plant. The effect is unusually attractive.

MANUFACTURERS INSPECT THE PLAINVIEW COUNTRY.

Pumping Machinery Officials From Aurora, Ill., Visit the Shallow Water Belt.

Yesterday officials of the American Well Works, Aurora, Ill., made an inspection of the Plainview shallow-water district. In the party were M. C. Chapman, president; M. J. Mahaffy, treasurer, and C. C. McLean, western representative.

WHARF RATS ARE PEST.

Citizen Suggests Bounty for Rat Scalps, to Be Paid by City or County.

A reader of The Herald has suggested that it would be well for the City Council or the County Commissioners' Court to pay a bounty for rat scalps or pelts. The rat is a nuisance, and a costly one. The United States government experts estimate that each rat wastes \$5.00 during its life time. It is thought that a five-cent bounty for rat pelts would be a splendid investment.

The county and state now pay bounties for rabbit scalps. The money is well spent, too. Yet the rabbit does not do as much damage as a rat. It feeds on any kind of grass or green forage, and its attacks in fields are not so costly as the attack of rats about the barns and warehouses. The rat's favorite place of shelter is the storehouse, warehouse and barn where harvested crops have been stored.

"Swat the rat" is a slogan equally as good as "Swat the fly."

ALLEY BUYS CHOICEST HERD OF PANHANDLE HEREFORDS.

Will Bring Three Hundred Head Thoroughbred Cows to Hale County Property May 15.

Nick Alley has just closed, through the Ansley Land and Cattle Company, a deal whereby he becomes owner of one of the best herds of thoroughbred Herefords in the entire Panhandle. A. R. Letts, of Clarendon, has sold to him the Dr. Cook three hundred fancy cows, to be delivered about May 15.

Mr. Alley already has on his place one of the finest bunches of two-year-old steers in the country. This stuff has been fed ensilage, alfalfa and maize. It is generally conceded that Mr. Alley is one of the best judges of fancy cattle on the Plains. It will be remembered that the two-year-old heifers he sold a few months ago brought seventy-five dollars around.

The Ansley Company also report the sale of five hundred yearlings to Hereford parties and one hundred head of cows to Kansas parties.

EAST-SIDE BOYS DEFEAT PLAINVIEW BOY SCOUTS.

Yesterday afternoon the Plainview Boy Scouts were defeated at the Eastside Public School grounds by the Eastside team. The score was 19-16.

Batteries: Scouts—Burton, Quisenberry and Frye; Eastside—Hudgins and Smith.

Another game will probably be played next week.

REDISTRICTING BILL AMONG THINGS LEGISLATURE TAKES UP.

Captain T. J. Tilson, representative of this district in the State Legislature, left yesterday morning for Austin, to attend a special session of the Legislature.

Captain Tilson stated that he believes the appropriation bill and the Gibson bill would be considered, and thinks that the redistricting bill may be submitted.

TO ATTEND STATE MEET OF FIREMEN AT WACO.

Miller, Smith, Brashears and Wescoat Are Delegates Powell and Wells Alternates.

Sunday morning O. C. Miller, chief of the Plainview Volunteer Fire Department; Geo. C. Wescoat, foreman of hose company No. 1; W. J. Smith, foreman of hook and ladder company No. 1, and C. Dunn Powell, delegate from the Panhandle Fireman's Association to the State Convention, will leave for Waco, where they will attend the State Convention.

The Plainview boys are going with the intention of bringing a large number of firemen to Plainview for the Panhandle Fireman's Convention, which will be held here September 21, 22 and 23, 1915. "Meet us in Plainview, September 21, 22, 23, '15; Panhandle Firemen's Convention," is their slogan on the Waco trip.

THEERON SAWYER IMPROVED.

W. L. Sawyer, of Floydada, was here this morning to meet Mrs. Sawyer and their son, Theeron, who was operated on two weeks ago, at Amarillo, for appendicitis. The boy is improving rapidly.

Mr. Sawyer is a brother of T. W. Sawyer, of Plainview.

APRIL RAINFALL 6.46 INCHES.

The rainfall at Plainview for the month of April, according to the U. S. Observatory, was 6.46 inches. Last night's rain was .74 of an inch, and the rain of Saturday night was 2.10.

LOOK OUT, KIDDIES!

Switches on Apple Trees This Season Are Nearly Seven Feet Long.

E. W. Byars brought into The Herald office yesterday a shoot from an apple tree on his place, which he says is this spring's growth. The shoot measured six feet nine inches.

LAYNE & BOWLER PRESIDENT VISITING IN PLAINVIEW.

M. F. Layne, president of the Layne & Bowler Company, is in Plainview on business connected with the company's interests here.

TROLLEY COMPANIES FEAR "JITNEY" BUS

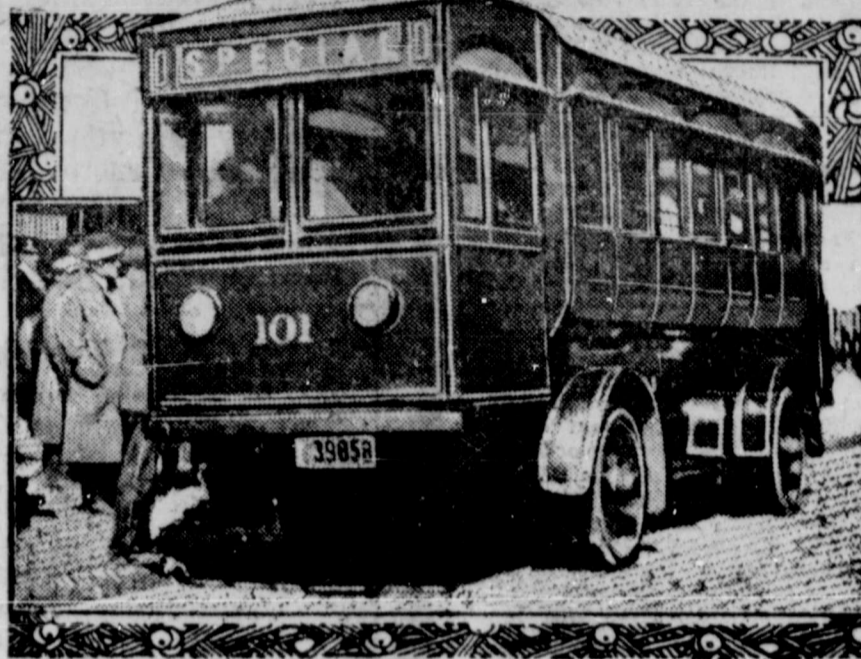

Photo by American Press Association.

The "Jitney," or five cent cab, is gaining in popularity, especially in the middle west. "Anywhere for a nickel" is the slogan. A national convention of "Jitney" men will be held in Kansas City, Mo., May 4, 5 and 6. The picture shows a type of "Jitney" in New York which has women conductors.

POTASH SYNDICATE HEAD TOURING THE PANHANDLE

Dr. Zerban Hinds the commercial editor of the "Panhandle News" is touring the Panhandle.

Wednesday Dr. F. W. Zerban, manager of the great potash syndicate in the United States. It is stated that New Orleans known as the German Kall Works, was in Plainview. This gentleman is touring the Panhandle country largely in response to statements of the Bureau of Economic Geology that Texas possesses the best potash prospects to be found anywhere in the United States. It is stated that the United States imports from Germany, from the famous Strassfurt potash mines, potassium chloride, potassium sulphate and double manure salts in quantities amounting to ten millions annually. Hence the live interest throughout the United States in the prospect of finding potash beds in the Panhandle. Already encouraging indications have been found in borings in Potter and Randall counties, and the belief is expressed that the whole Panhandle area is underlaid with heavy deposits of the mineral sought.

HAVE JUICE AT LOCKNEY WITHIN NEXT TWO WEEKS.

Yesterday ten men started to raise the poles on the Lockney line of the Malone Light and Power Company. They are putting up poles at the rate of three miles a day, and will have the work completed by Saturday night. The wires will be strung and lights burning in Lockney within two weeks, according to the statements of Chas. A. Malone, president of the company.

HALE COUNTY HOGS BRING TOP ON FORT WORTH MARKET.

Two Lots of South Plains Porkers Disposed of at 17 1/2c Higher Than Kansas City's Bid.

Concerning a shipment of Hale County Hogs on the Fort Worth market, The Dallas Morning News of April 27 says:

"Prices paid on the Fort Worth live stock market today for two lots of hogs were 17 1/2 cents higher than the top paid at Kansas City and 2 1/2 cents higher than the Chicago top. Both lots were shipped from Plainview, Texas, and purchased by the Daggett-Keen Commission Company.

"One consignment, consisting of sixty-one hogs, aggregating 18,580 pounds, was shipped by T. W. Morrison. A bunch of seventy-six hogs, weighing 18,630 pounds, was shipped by W. A. Watson. The price paid was \$7.62 1/2 per 100 pounds.

REV. KIKER PREACHES CROSBYTON HIGH'S SERMON.

Rev. O. P. Kiker, presiding elder of the Plainview district, left this morning for Crosbyton, where he will preach the commencement sermon for the Crosbyton High School.

BIRTHS.

Born to Mr. and Mrs. Dick Bryan, April 22, a ten-pound boy.

BUSINESS MEN TENDER SYNDICATE MEN BANQUET

S. Charles, Retiring General Manager for T. L. & D. Co., and J. W. Longstreth, New Manager, Honored.

Honoring R. S. Charles, who retires as general manager of the Texas Land and Development Company May 1, and J. W. Longstreth, who assumes his new duties as general manager, the business men of Plainview held an informal banquet at the Ware Hotel Wednesday evening.

J. M. Adams was toastmaster, and invited on many of the guests for expression on subjects which he outlined. Col. R. P. Smyth spoke first, on irrigation in the Plainview country, with special reference to the work of the Texas Land and Development Company, with whom the honorees are connected. He told how many years ago he made surveys of this section, and how he had believed and talked the possibilities of pumped irrigation.

J. F. Garrison told of the benefit to the general community and country the development of the Syndicate had been, and emphasized the point that anything that is done to improve general conditions in this section is of advantage to every property holder and every citizen.

Dr. J. C. Anderson, retired president of the Chamber of Commerce, spoke of the need of concerted action. He believes that an organization with an empowered head, is needed to extol the virtues of the Plainview country and the South Plains to those who are seeking information concerning it. By him the suggestion is made that a meeting be soon called for the purpose of organizing the citizens into an aggressive body. He also discussed the need of connecting roads as feeders to Plainview's splendid stores. In good roads he sees advantages not only for Plainview, but for the people who live in the surrounding country.

Mayor J. L. Dorsett mentioned some of the needs of Plainview, among them more passenger trains, and suggested means for securing better and more frequent passenger service through the Santa Fe, which he says has always shown a willingness to cooperate with Plainview in every good move.

A eulogy to Messrs. Charles and Longstreth on their willingness to cooperate with Plainview, and especially with the press, for the good of the entire community, was expressed by E. B. Miller.

Messrs. Jacob, Underwood, Oakes and Collier responded to impromptu speeches, also.

Throughout the meeting was an expression of good will and friendship for Mr. Charles and Mr. Longstreth and a proffer of whatever co-operation Plainview's business men can lend in the development of the Plainview country by the potent factor, the Pearson Syndicate.

FLOYDADA MAN HAS OPERATION.

Henry Haynes, of Floydada, was in Plainview Tuesday en route to Amarillo for an operation for appendicitis. Reports today are that the operation was successful and that he is doing nicely.

F. F. HARDIN HEAD OF NEW BOOSTER ORGANIZATION

Young Men's Business League Will Foster Development of Plainview and Hale County.

At a luncheon at the Waller Tailoring Company's place of business last night definite organization of the Young Men's Business League of Plainview was made. A constitution and by-laws were adopted. Officers elected for the year ending January 1, 1916, are F. F. Hardin, president; E. L. Doland, secretary; H. S. Hilburn, assistant secretary; R. A. Underwood, treasurer.

It is the purpose of this body to further the development of Plainview and Hale County, with especial reference to civic conditions affecting Plainview's immediate neighborhood. Trade extension and industrial interests will be fostered.

There is nothing in the nature or in the constitution of the league which is intended to conflict with any organizations of public character now existing. The young blood of the town feels that much can be accomplished through diffusion of young blood with the old.

No man over forty years of age is eligible to membership in the league. It is primarily what the name implies, a league of the young business men of Plainview.

The league meets the second and fourth Thursday evenings of each month.

Want a Slogan.

No slogan has yet been adopted for the organization. Suggestions for same will be welcomed, and should be addressed to the secretary, E. L. Doland.

BURLESON SELLS CRYSTAL TO BRISCOE COUNTY MAN.

J. C. Burleson has sold the Crystal Cafe to C. C. Blackwell, from Briscoe County. "Doc" will go to the Burleson ranch in Briscoe County. Lee Kemble will manage the restaurant for Mr. Blackwell.

SETH WARD WINS THIRD GAME FROM WAYLAND.

Yesterday's Game Practically Gives City Championship to Northsiders.

Yesterday afternoon Seth Ward College defeated Wayland College, on the latter's grounds. The score was 7 to 1. This is the third game Seth Ward has won from the westside school. Three out of five was to decide the championship. The High School has been defeated by Seth Ward, and they are not considered likely contenders for the city championship.

Perkins and Blakemore were Wayland's battery. Blakemore replacing Perkins in the pitcher's box in the eighth inning. Tilson and Whitworth were Seth Ward's battery. Perkins has five strikeouts to his credit, and Tilson two. The Baptist team made twelve errors, while the Methodists were marked three. Seth Ward secured eight hits and Wayland four.

Miller and Garrison unpaired.

The line-ups were:

Seth Ward.
Bishop, ss; Whitworth, c; Glenn, 2b; Earp, rf; Randolph, 3b; Kiker, cf; Perdue, lb; Wilson, if; T. Tilson, p.

Wayland Baptist College.
Blakemore, R. 3b; Linn, 2b; Wayland, cf; Perkins, p; Hay, ss; Wallon, lb; Bolton, if; Blakemore, H. c; Davis, rf.

IGNITED WASHING FLUID INJURES MRS. DAUGHERTY.

Tuesday afternoon Mrs. J. G. Daugherty was severely burned on the arms while washing. She poured a washing fluid into a boiler on the stove and it ignited.

Reports today are that she is doing nicely.

DAVENPORT OPENS NEW STORE.

G. W. Davenport has opened a new exclusive confectionery store in the building with the City Bakery. He has a special machine for manufacturing "Crispette," a popcorn confection. He will treat the kiddies visiting Saturday.

TURKS REPULSE ALLIES APPROACHING KABA TEPEH

LANDINGS HAMPERED BY UNDERSEA WIRE ENTANGLEMENTS; PITS ON LAND.

FRENCH CRUISER DESTROYED

Austrian Submarine Demolishes Leon Gambetta in Strait of Otranto.

LONDON, April 29, 12:39 a. m.—The British War Office issued the following announcement last night on the Dardanelles operations:

"In the face of continual opposition, the allied troops have now established themselves across the end of the Gallipoli Peninsula, from a point north-east of Eskigisarlik to the south of a stream on the opposite side.

"They have also beaten off all attacks at Saribair and are steadily advancing.

"The Turks have made considerable preparation to hamper any landings. Wire entanglements under the sea, as well as on land, and deep pits with spikes at the bottom were among the obstacles overcome by the troops."

One Wing of Allies Defeated.

BERLIN, April 28, via London, April 29, 1:45 a. m.—A wireless received from Constantinople says:

"At the celebration of the Sultan's jubilee yesterday the Minister of War announced the receipt of a telegram from the commander of the Fifth Army Corps, General Liman von Sanders Pasha, stating that the center and right wing of the enemy has been completely defeated, and that there was hope that the left wing was also beaten."

Hall Bey, former president of the Turkish Parliament, who now is in Berlin, received a telegram from Constantinople last night stating that 8,000 French and British soldiers had been driven to the sea and that 12,000 had been captured by the Turks as a result of the attempt of the allies to land forces to attack the Dardanelles fortifications.

Turks Declare Allies Repulsed. CONSTANTINOPLE, via Amsterdam to London, April 29, 12:48 a. m.—The following official communication regarding the Dardanelles operations has been issued:

"The enemy has renewed his attempts against Kaba Tepeh and the south coast of Gallipoli, but was successfully repulsed.

"Fresh forces of the enemy yesterday attacked near the coast at Kum Kaleh, but were obliged to retreat, abandoning three machine guns."

French Cruiser Destroyed. BRINDISI, Italy, Tuesday, April 27, 9:45 p. m., via Paris, April 28, 2:53 p. m. (delayed in transmission).—The French cruiser Leon Gambetta has been torpedoed and sunk by the Austrian submarine U-6 in the Strait of Otranto, the waterway leading to the Adriatic Sea. The ship sank quickly, and only part of the crew of about 700 were saved.

The first report of the destruction of this cruiser came from the men on duty at the semaphore station of Santa Maria Leuca. Vessels were sent out at once to the aid of the Leon Gambetta from Brindisi, Taranto, Otranto and Bari. The men at the station also went out in their own boat, and were the first to reach the scene.

It has not been ascertained yet if the attack on the French cruiser occurred within the territorial waters of Italy.

The Austrian submarine U-6 is the same craft that a few days ago boarded the Italian steamer Jolanda.

Was Patrolling Strait. Since the beginning of the Anglo-French operations against the Dardanelles French warships in the Adriatic have limited their activities to watching in the Strait of Otranto with the idea of preventing any Austrian submarine escaping from the Adriatic, at the head of which is Pola, the Austrian naval base, and reaching the coast of Turkey. This patrol duty was particularly to protect the vessels of the allies operating against the Dardanelles. It is well known that Austria possesses several submarines

(Continued on Page Eight.)

Pretty Plainview Pleases Press People

Panhandle Association Has Successful Meet; Guests See Sights and Are Royally Entertained

J. M. WARREN, in The Clarendon News. It was this editor's good fortune to be "one of the boys" and "girls" who attended the meeting of the Panhandle Press Association which convened at Plainview on the 9th and 10th of this month. There were about fifty of the gull experts there, all in good humor, all ready to do his or her part in the business of the association.

Routine and special business was transacted with dispatch and intelligence.

President Homer Steen presided like an old-timer, and Miss Ida Farrell has no peer as a secretary. The program was interesting and instructive, and the publishers who miss these occasions are not doing themselves justice. This editor has had some years' experience as a country publisher, but we found out long ago that we didn't know it all; we are still getting new ideas, new thoughts, which help us to improve our business, service and efficiency in many ways.

J. M. Adams, the genial and affable editor of The Plainview News, was elected president by unanimous vote; L. G. Waggoner, of the good Chief, at Miami, was a splendid selection for vice president, and, of course, Miss Farrell, of The Glazier Review, was re-elected secretary.

The next meeting will be held in Amarillo, which we think is most practical, on account of its central location.

Many resolutions, etc., were adopted, but we have not the space to give them.

Every courtesy and consideration for the comfort and pleasure of the guests were thoughtfully planned and carefully arranged, every man, woman and child of the city and community seeming to vie with each other in trying to make the editors' visit one continual round of genuine enjoyment.

This editor was delighted to meet many of his old-time friends and acquaintances, some of whom we have known for twenty-five years. Among them were J. N. (Nick) Jordan and his excellent family, Henry Spott and family, Jess Cole, W. A. Shofer, Ed and Gae Daugherty, Judge Joe E. Lancaster, Rev. O. P. Kiker, Rev. J. W. Story, Rev. C. L. McDonald, president of Seth Ward College. J. M. Shafer ("Uncle Shafe"), co-publisher of the Herald, we knew before he ever came to the Panhandle, and, by the way, he is one of God's noblemen. J. R. Ramsey, formerly of Clarendon, is there and has a position with one of the leading drug firms of the city, is doing nicely, and is popular with the people. Our kinsman, L. J. Warren,

with whom we had not visited for many years, is there in the grocery business, and from appearances is doing well. We enjoyed the hospitality of his home for a short visit.

Adams, of The News, and Miller and Hilburn, of The Herald, are strictly on the job when it comes to entertaining. We don't see how they ever got their papers out, because they were as "busy as cranberry merchants" looking after their guests.

Why Plainview Is a Modern Little City.

There is a reason for everything so there is a reason why Plainview is and will continue to be, the "Queen City of the South Plains." This editor is probably as conservative in his opinions and statements about "boosting things; there's nothing to" as any writer in the country. We are often criticised by our own people for not boosting this or that, but we have tried to adopt the course of being reliable in our publication, rather than sensational, and so far have found that it is best.

No community will grow and prosper where factions, non-progression and indifference hold sway, no matter how fertile the soil surrounding, no matter how lavish nature may have been in providing natural advantages. But when you find a community surrounded by the very best soil on earth, and packed by a progressive, energetic, co-operative citizenship, you may count on having a city builded to which you can point with pride as your home.

Think of it, if you please! Just about eight years ago Plainview was a small village; then look at her today—a city of 6,000 inhabitants, elegant and expensive homes, substantial and ornamental brick business houses and office buildings, church edifices that would do credit to the city of Dallas, colleges (two of them) full of boys and girls who are preparing themselves for useful manhood and womanhood—young people who will go out into the world to be a blessing to mankind and an honor to their country.

Why this rapid and substantial development? The reason: Plainview has the very best class of citizenship—not narrow gauged, but liberal in their opinions; progressive and industrious; optimistic and courteous. They make the stranger feel at home in their midst, not only on special occasions; they do it every day in the week.

Again, the atmosphere is strictly normal, consequently not vicious. The sluggard, the non-progressive, will not abide in that city. He knows at a

glance that the "band wagon" will run over him; hence he carries very shortly. It can hardly be termed a "tarry"—probably a "hesitation" would be nearer correct.

This is one reason. There is another. The soil around this beautiful little city is as good as there is in Texas, as good as that in the most productive centers of the Northern and Eastern States. People in many portions of the Panhandle and West Texas will say: "Well, the soil is all right, if we could just get the rain; we need more water." Well, now, there is where Plainview comes in, and comes in strong. If you are a "Doubting Thomas," just go over there and be convinced. We admit we were a little skeptical; but not now. When we see a thing with our own optics, we know what we have seen.

In the auto ride provided for the press people, in which we were driven over about seventy miles of country and shown wells pumping from 1,500 to 2,000 gallons of water every minute of the twenty-four hours, our doubts as to the water supply vanished into thin air. And such water! We are willing to be placed on record as saying that no better flows on this earth. Broad acres of wheat, oats, alfalfa, and thousands of cattle and hogs, will convince the most hardened skeptic that Plainview is destined to be a city, and the Plainview country one of the richest and most productive in the United States.

The man who wants to locate in a country where crops are sure, where he can raise a family in a moral atmosphere and educate his children right at home, can do no better than locate in the Plainview community. One of the greatest surprises you'll encounter will be the large number of fine rural homes, big barns, etc., which is unimpeachable evidence of prosperity, progressiveness and fertility of the soil. If there is a country in Texas where a man can make a living, and some money, on ten acres of land, it's right in the Plainview vicinity.

We could continue to enlarge on what we have briefly and plainly stated, but we believe in "telling the truth and quitting when you get through." And we believe that when the truth is actually known about this wonderful little city and still more wonderful country, Plainview will be a modern municipality and there will be a home on every ten acres of land. With a citizenship full of the spirit of living and doing, with the soil, the climate, the water—and, true to their slogan, the latter is the only "shallow" member of the quartette—there can be no other solution.

COULD FLOAT U. S. NAVY SAYS MIAMI EDITOR.

The Panhandle Press Association met at Plainview Friday and Saturday of last week, and to say we had a royal time is not exaggerating.

Plainview is a model city of 5,000 people, located on the South Plains in Hale County, in the Shallow Water Belt. It is on the Santa Fe Railroad, and is also the starting point of the Lockney-Floydada branch.

An English syndicate has been spending millions of dollars at Plainview the last few years, improving a great tract of land by building good houses, breaking land and putting down big irrigation wells, that pump up to 2,500 gallons of water per minute, which is used to irrigate when the rainfall is insufficient to make a bounteous crop. The Plainview country has a very deep, rich soil and they raise practically everything that can be grown in this climate. With all of Plainview's irrigation wells running at one time, they could pump almost enough water in 48 hours' time to float the United States navy.

The members of the press arrived there Friday morning, and were entertained every minute of the stay. Besides the business session Friday, a nice photo-drama was given for their entertainment, a smoker was had, and in the evening a grand opera was rendered by the Plainview Choral Club, complimentary to the press. This was rendered very finely, and Plainview can boast of her Choral Club, which will compare favorably with any in the State.

Saturday the members of the Association were taken for a 60-mile spin over the splendid country around Plainview, where we saw more water

than we had ever seen before coming from wells, and viewed many fine alfalfa and wheat fields.

Saturday night a big banquet was given at the Ware Hotel, which was very fine, and we commend Plainview highly on their great way of entertaining. They know how to entertain, and every citizen in the town is willing to help, and especially EdKors Miller, Adams and Hilburn, who never miss an opportunity to do something to entertain the press gang.

The next meeting of the Association will be held at Amarillo, next year. The following officers were elected: J. M. Adams, of Plainview, president; L. G. Waggoner, of Miami, vice president; Miss Ida Farrell, of Glazier, secretary.—Miami Chief.

A SIMPLE TRAP FOR THE HOUSE-FLY.

WASHINGTON, D. C., April 20.—A maggot trap which will practically prevent the breeding of the house-fly is described in a new bulletin of the U. S. Department of Agriculture, No. 200, "A Maggot Trap in Practical Use; An Experiment in House-Fly Control." The investigators, who carried on this experiment at the Maryland Agricultural College, declare that during August and September at least 98 per cent of the larvae breeding in the manure were destroyed, and although the trap was not so efficient when the weather became colder, even then it greatly reduced the number of flies.

The principle of the trap is simple, it is easy to construct, and the expense is said to be probably less in the long run than the investment which many farmers now make in screens for their dwellings and sprays and fly-nets for the live stock. In its

roughest outlines, the trap consists of a concrete basin with a latticed wooden platform erected upon it to hold the manure. The basin is connected by a drain pipe with a small concrete cistern. The bottom of the basin is filled with water, into which the maggots breeding in the manure drop, as they are about to turn into the pupa or chrysalis stage, and are drowned. At frequent intervals the water is run off into the cistern and is then pumped back on the manure pile. In this way all the liquid manure is saved.

The successful operation of this trap rests upon several facts connected with the habits of the house-fly which have been thoroughly established by observation. The adult fly lays its eggs in fresh manure. There they remain until the larva stage is almost over and the insects are about to enter the pupa or chrysalis stage. At this time a pronounced tendency to migrate is evident. In consequence, if the manure is placed upon a platform with a latticework bottom, the larvae, while migrating, will fall through these openings into the water in the basin below. In the case of the experiments at the Maryland Agricultural College, a careful count showed that between July 25 and October 1 about 112,000 larvae were killed in this way. This, however, does not include the number that were picked up from the basin by sparrows or poultry. Altogether it is estimated that during the warm weather the efficiency of the trap was probably 99 per cent. Later, when the temperature was lower, the trap's success was not so marked. This was accounted for by the fact that when the air is much colder than the manure heap the larvae will not attempt to leave the heap, and therefore will not fall into the basin.

Another difficulty experienced arose from mosquitoes using the water in the basin and the cistern to breed in. This was overcome by cleaning out the basin at regular intervals and by sprinkling a little oil over the surface of the water in the cistern.

Properly constructed, such a trap offers no obstacles to the convenient and economical handling of manure. It is essential, however, that each day's addition to the heap should be sprinkled with sufficient water to keep the manure moist, but not enough to cause leaching. The details of the construction of the trap are contained in the bulletin already mentioned. This particular trap was designed to hold the manure produced by three horses for three months, but there is no reason why larger quantities should not be treated in the same way, by building larger traps or by building several of smaller size.

Principal Causes of Death

WASHINGTON, D. C., April 26.—The latest report on mortality in the "registration area" of the United States, relating to the calendar year 1913, recently issued by the Bureau of the Census, Department of Commerce, contains some interesting and significant figures with reference to the principal causes of death in this country. More than one-half of all the deaths in the registration area—which in 1913 contained about 65 per cent of the total population of the United States—were due to nine causes: Tuberculosis, heart diseases, pneumonia, Bright's disease and nephritis, diarrhoea and enteritis, cancer, apoplexy, diphtheria and croup and typhoid fever. The first three of these maladies alone were responsible for more than 30 per cent of the total mortality reported for that year.

The death rate from these nine causes combined in 1913 was 810.4 per 100,000 population. This is a material decrease from the corresponding rate in 1900—937.4 per 100,000—when the Census Bureau made its first annual collection of mortality statistics. The number of deaths resulting from these causes, however, formed a somewhat greater proportion of the total reported mortality in 1913 than in 1900—57 per cent in the later year as compared with 53 per cent in the earlier.

Tuberculosis.

Tuberculosis in its various forms claimed 93,421 victims in 1913, of which number 80,812 died from tuberculosis of the lungs (including acute military tuberculosis). With improved sanitation and with better understanding of the laws of health and the importance of pure air, however, the "white plague" is rapidly becoming a less serious menace to health and happiness. In only nine years—from 1904 to 1913—the mortality rate from tuberculosis in all its forms fell from 209.7 to 147.6 per 100,000, the decline being continuous from year to year. Prior to 1904 the rate had fluctuated, starting at 201.9 in 1900.

A satisfactory comparison of different sections of the country with respect to the prevalence of tuberculosis is impossible, since the only Southern States embraced in the registration area are Maryland, Virginia, and Kentucky, together with the North Carolina municipalities which had 1,000 or more inhabitants in 1900, and a number of Northern and Western States are not included. In general, however, it may be said that the mortality due to this disease is somewhat higher among the whites in the South than in the North, and is about three times as high among negroes as among whites. The far Northern States of Maine, New Hampshire, Vermont, Michigan, Wisconsin, Minnesota, Montana, and Washington all show white mortality rates from tuberculosis which were decidedly lower than the average for the entire registration area. Pennsylvania's rate was also low. On the other hand, the rate in Utah—whose southern boundary lies in nearly the same latitude as that of Virginia—is away below that of any other state, being only about one-third as high as the rate for the entire registration area. The mortality rate among the white population from tuberculosis of the lungs throughout the entire registration area in 1913 was 115.7 per 100,000. The corresponding rates for the states just named are as follows: Utah, 37; Washington, 70.6; Michigan, 75.1; Montana, 79.9; Wisconsin, 83.4; Minnesota, 84.6; Vermont, 88.5; Maine, 95.8; Pennsylvania, 97.3; New Hampshire, 98.8.

The death rates from tuberculosis of the lungs were abnormally high among the white population in both California and Colorado—167.5 and 167.2 per 100,000, respectively—because of the fact that many consumptives from other parts of the country are attracted to these states by reason of their exceptionally favorable climatic conditions.

A comparison of the mortality among whites from tuberculosis of the lungs in urban and rural districts brings out a very considerable difference in favor of the latter, the rates in 1913 being 128.5 for cities of 10,000 and over, taken as a whole, and 100.8 for places of less than 10,000.

Heart Diseases.

The deaths from heart diseases (organic diseases of the heart and endocarditis) in the registration area in 1913 numbered 93,142, or 147.1 per 100,000. While the mortality rate for tuberculosis has been declining from year to year, the rate for heart diseases has been rising. Starting in 1900 at 123.1 per 100,000, as compared with 201.9 for tuberculosis in all its forms, the death rate for organic heart diseases and endocarditis has fluctuated, reaching its highest point in recent years, 151.4 in 1907.

Pneumonia.

Pneumonia in its various forms was the cause of 83,778 deaths, or 132.4 per 100,000, in the registration area during 1913. The death rate from this dis-

ease, like that from tuberculosis, has shown a marked decline since 1900, when it was 180.5 per 100,000. Its fluctuations from year to year, however, have been much more violent. The mortality rate for pneumonia in 1913 was about 70 per cent greater among the colored population than among the whites.

The only states in which the death rates from pneumonia in all its forms exceeded the average for the entire registration area are the six New England States and New York, New Jersey, Pennsylvania, and Maryland. The rates in these 10 states—which constitute a continuous area, small in geographic extent but containing a large proportion of the total population of the country—ranged in 1913 from 149 per 100,000 in Vermont to 171.4 per 100,000 in New York. The lowest rate for any state in the registration area was that of Washington, 59 per 100,000.

Pneumonia, according to the statistics, is much more prevalent in urban than in rural communities. The death rate from this cause for all registration cities of 10,000 or over, taken together, was 158.4 per 100,000, while for smaller places it was only 101.6.

Bright's Disease and Nephritis.

The only remaining death rate higher than 100 per 100,000 in 1913 was that for Bright's disease and "acute nephritis," 102.9. The total number of deaths due to these causes in 1913 was 65,106, about nine-tenths of which were caused by Bright's disease, the remainder being charged to acute nephritis, a related kidney disorder. The mortality from these causes increased from 89 per 100,000 in 1900 to 103.4 in 1905, since which year it has fluctuated somewhat, ranging between 93.7 in 1908 and 103 in 1912.

Diarrhea and Enteritis.

Diarrhea and enteritis caused 57,080 deaths, or 90.2 per 100,000, in the registration area in 1913. Of these deaths, more than four-fifths were infants under 2 years of age, and over two-thirds were of infants under 1 year.

The mortality from these causes fluctuated greatly between 1900 and 1913, but on the whole shows a material decline, having dropped from 133.2 per 100,000 in the earlier year to 90.2 in the later.

Cancer.

Next in order of deadliness comes cancer, which filled nearly 50,000 graves in 1913. The exact number of deaths due to this dreaded malady was 49,928, of which about 40 per cent resulted from cancers of the stomach and liver. The mortality rate rose from 63 per 100,000 in 1900 to 78.9 in 1913. It is probable, however, that at least a part of this increase was apparent rather than real, being due to more accurate diagnoses and greater care on the part of physicians in making reports to the registration officials.

It is worthy of note that the colored population, for which the death rates from most causes are much higher than for the whites, shows a decidedly low rate for cancer—57.3 per 100,000 for the entire registration area in 1913, as compared with 89 for the whites.

Apoplexy.

Apoplexy was the cause of 47,220 deaths, or 74.6 per 100,000, in the registration area in 1913. This rate increased gradually, with occasional slight declines, from 67.5 per 100,000 in 1900 to 75.7 in 1912, but dropped slightly in 1913.

Diphtheria and Croup.

No epidemic disease produced a mortality rate as high as 20 per 100,000 in 1913. The fatal cases of diphtheria and croup numbered 11,920, or 18.8 per 100,000 in that year, the rate having fallen from 43.3 in 1900. This decline of nearly 57 per cent is relatively far greater than that shown by any other important cause of death. The mortality of the white population from diphtheria and croup is about 75 per cent greater, proportionately, than that of the colored. The death rate from these causes in cities of 10,000 and over is about 50 per cent greater than in smaller places.

Typhoid Fever.

Deaths from typhoid fever also showed a very gratifying decline between 1900 and 1913, decreasing from 35.9 per 100,000 in the earlier year to 17.9 in the later, or by almost exactly 50 per cent. This decline was relatively greater than that for any other principal cause of death except diphtheria and croup. The total number of deaths due to typhoid fever in 1913 was 11,323. The mortality rate from this disease among the colored population is more than twice as great as for the whites.

Although the death rates for most causes are higher in urban than in rural communities, the typhoid rate in 1913 was about 20 per cent higher in places of less than 10,000 than in cities of 10,000 and over, which fact may reasonably be construed as a further indictment against the open well, especially when equipped with the poetic but unsanitary "moss-covered bucket."

The great progress which has been made in the handling of typhoid cases is evidenced by the marked decrease in the mortality from this disease. And of equal potency perhaps has been the improvement in preventive methods—the betterment of water-supply and sewerage systems, the campaign against the fly, and other sanitary precautions. At any rate, Americans can congratulate themselves that in 13 years the death rate from this disease has been cut in two.

HOVE TELLS OF TRIP TO PANHANDLE PRESS MEET.

The convention of the editors held in Plainview last Friday and Saturday will have far-reaching results. The country press is the great agency to stimulate country building. In truth, the press and the railroads have made the great western empire possible.

All country building begins at home, and by people who have absolute faith in their country. The individual, necessarily occupied most with his own particular problems, has only one medium by which he can keep in touch with the affairs of the entire community in which he works. This medium is the newspaper that faithfully gathers the news of the community and gives the individual a perspective of the activities of the community.

The newspaper goes further, and suggests new things and brings new ideas of what may be further done to foster development. In other words, the newspaper is the real leader in everything connected with the progress and life of the community. It carries a remarkable influence.

When the editors come together they naturally talk shop, that is, discuss matters directly connected with the publishing and printing business, because the country editor is compelled to make his living by conducting a distinct business—job printing. They next compare notes on the conditions in their respective fields. The last thing on the program is to see what is being done at the place on pertaining the convention.

And the editors of Northwest Texas really saw some surprising things around Plainview, and went home full of new ideas on building their own section. On Saturday afternoon the editors were taken in automobiles through the farming district on a forty-eight-mile tour of inspection. The leading business men of Plainview left their business for the afternoon of the

Cures Old Sores, Other Remedies Won't Cure.
The worst cases, no matter of how long standing, are cured by the wonderful, old reliable Dr. Porter's Antiseptic Healing Oil. It relieves pain and heals at the same time. 25c, 50c, \$1.00.

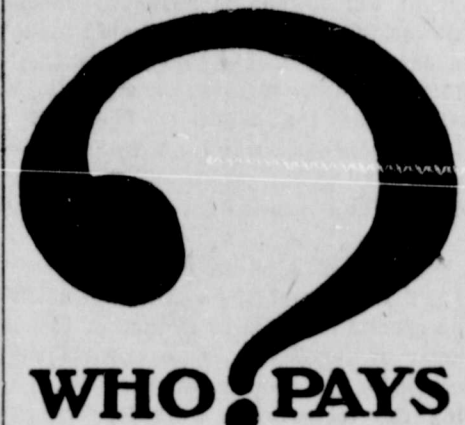

TRY IT! SUBSTITUTE FOR NASTY CALOMEL
Starts Your Liver Without Making You Sick and Can Not Salvate.
Every druggist in town—your druggist, and everybody's druggist—has noticed a great falling off in the sale of calomel. They all give the same reason. Dodson's Liver Tone is taking its place.

"Calomel is dangerous and people know it, while Dodson's Liver Tone is perfectly safe and gives better results," said a prominent local druggist. Dodson's Liver Tone is personally guaranteed by every druggist who sells it. A large bottle costs 50 cents, and if it fails to give easy relief in every case of liver sluggishness and constipation, you have only to ask for your money back.
Dodson's Liver Tone is a pleasant-tasting, purely vegetable remedy,

busiest day in the week to take the editors on this trip through the farms. What the editors saw in the way of big irrigating wells, large fields of alfalfa, new homes, multitudes of hogs grazing on alfalfa and more hogs in feed lots growing round on kaffir corn and other native grains, would fill many folios. They also saw prosperous farms depending on the natural rainfall. What really impressed the editors most was the enterprise that in two years' time has made 15,000 acres into finely developed irrigated farms.

So the editors of Northwest Texas came home with new ideas, not only on how to make a better newspaper, but with greater faith in the possibilities of this part of the State. What they saw of the development around Plainview will make every editor better able to lead in the efforts to build up his own community. He has seen great things actually accomplished in Plainview, and will set his mark for greater things at home.

Deafness Cannot Be Cured
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.
We will give One Hundred Dollars for any case of deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

TREE SURGERY A SCIENCE.

The study of plant life has been conducted on such a scale that tree surgery has become a science. There are men who devote their entire time to the attention of tree ailments. In this, as in other science, the field is often entered by amateurs, who ignorantly devastate when they think they are rendering a service.

The United States Department of Agriculture has issued a statement in one of their bulletins which is pointed: "If you don't know what you are pruning for, and why you are pruning, and how to prune, don't touch the tree with knife or shears."

Trees are sensitive. They are like human beings in many respects. Tree surgery has not reached that acute stage of development which characterizes modern surgery, but is approaching perfection.

The normal tree is far more beautiful than it can be made by man. If the tree has some ailment, have it treated scientifically. Get some one who knows the business to trim your trees, if they must be trimmed. Training is better than trimming, anyway.

The park improvement board of the city of Fort Worth has issued a few don'ts which might be followed by anyone wishing an artistic landscape. They are:

"Don't whitewash trees. It attracts insects and destroys the beauty of the trees and the peace of mind of the more esthetic neighbors.

"Don't permit anyone to remove unnecessarily one twig from a tree.

"Don't plant flowers on your sidewalks.

"Don't cut up your lawn with flower beds."

These don'ts are not ultimatums, but are worthy of consideration.

HALE COUNTY RECEIVING THE MACEDONIAN CRY.

Tuesday a Briscoe County man came to Plainview. He came a round-about way; for he had the time and wanted to come. He likes Plainview. He likes its stores. His home county cannot supply him with goods from the well assorted stocks which Plainview can.

He was interested enough in getting a good road opened into Briscoe County through Hale County that he took the trouble of looking up persons he thought would be interested in the matter. Now, the people, especially those in the lower part of Briscoe County, want a road to Plainview.

There have been a number of roads to Silvertown. That was before the sections were fenced in. Now there is no established open road. It's a great annoyance to travel, especially in a car, roads which are closed with gates every mile or two.

Briscoe has sent over the Macedonian cry. They want the road. Plainview wants their trade. There must be some feasible means of bringing the two counties together on this matter. We feel sure that the Commissioners of Hale County want to meet the Briscoe people half way, and that they will.

It's to our mutual advantage to have a good road into Briscoe. It will be a feeder to Plainview's trade and will give the good people of Silvertown and other parts of Briscoe County better markets both for selling and buying. The two counties are too closely allied in proximity and interests to allow communication to be hampered by lack of roads for travel and transportation.

Best Editorial of the Day

SALVATION IN WORK.

(Kansas City Star.)

A Kansas City man who had coddled a small mercantile business for a good many years without getting very far was advised to retire because of a threatened breakdown of his health. Instead, he went out and leased a downtown corner and put in the "big store" he had dreamed of for years. He was close to 50, and that was years ago. The business has prospered. "But, better than that," says the merchant, "my health is perfect. I found it here, working."

This man isn't the first man to find that work is salvation; that the way to live is to live. Such men as Lyman Abbott, Washington Gladden and Governor St. John are living that way. Gladstone and Leo XIII were active to a great age. Dickens, Thackeray and Robert Louis Stevenson defied the doctors. Stevenson wrote of invalidism:

"It is better to lose health like a spendthrift than to waste it like a miser. Even if the doctor does not give you a year, even if he hesitates about a month, make a brave push and see what can be accomplished in a week."

Take the case of Mme. Sarah Bernhardt. At 70, following the amputation of a leg, she declares she will go back to the stage. In her "Memoirs" she tells of being once near a breakdown in the midst of a trying season. Because of sharp criticism she was goaded to a supreme effort, and, to her surprise, found that instead of ruining her health, her strength improved and she finished that season stronger than she began it.

"Which is better," the old saying goes, "to wear out or rust out?" In the preface to "Man and Superman," George Bernard Shaw answers in this way:

"This is the true joy of life—the being used for a purpose recognized by yourself as a mighty one; the being thoroughly worn out before you are thrown on the scrap heap; the being a force of nature, instead of a feverish, selfish little clod of ailments and grievances, complaining that the world will not devote itself to making you happy."

And then there's the ancient saw, "Work never hurt nobody."

FAITH, THE BULWARK OF CIVILIZATION.

The following excerpt from The Plainview Evening Herald of April 12 was reproduced in The Dallas Evening Journal of April 26:

"Faith is the basis of our business relations. What is credit, one of the greatest factors in modern business, but faith—faith in the ability of the debtor to pay, faith in his intention of paying, and faith in the laws of society which will coerce payment? This is distinctly a day of faith. The things are done in business, political economy and in science through faith. The entrepreneur has faith in his ability to make his business or industrial enterprise a go. The laws of society are basically founded on a faith. The scientist has faith that through diligent study and research truth will be revealed to him."

THE LIBERTY BELL'S JOURNEY.

The Liberty Bell, the one whose iron tongue clanged out to the world in 1776 the news of American independence, is to cross the continent and be shown at the Panama-Pacific International Exposition, in San Francisco. The City Council of Philadelphia has consented by ordinance that the bell may go, and later will decide when it shall begin its cross-continent journey and by what route it shall go.

Many cities have sent petitions to the Philadelphia council asking that the bell be routed through them, and that it be exhibited there for a day or a few hours. Governor Samuel M. Ralston, of Indiana, has asked that the bell be shown in Indianapolis for a day, and gives assurance that thousands of people from all parts of the state will come to see it.

PRODUCERS MARKETING THEIR PERISHABLE STUFF BY MAIL.

Express, Too, Offers Quick Way for Turning Produce; Saving to Consumer, Also.

Uncle Sam's farm-to-the-table service by parcel post is now one year old. The farmers residing near the cities have reaped the greatest advantage from this service. However, the smaller towns offer markets which the wide-awake farmer can supply in the same manner.

When Charles B. Austin, of the Department of Extension of Texas University was doing some work at Carrizo Springs recently, he observed a system of direct marketing for perishable products which has worked well in other sections of the country, and which he thinks is worthy of consideration and encouragement in Texas.

"A certain farm lady near the above-mentioned town," says Professor Austin, "had on display a bushel hamper of mixed vegetables which were to be sold to a customer in a distant city. The hamper contained 6 sweet potatoes, 6 turnips, 5 large Bermuda onions, 10 carrots, 7 beets, 2 or 3 heads of cabbage, 10 to 24 radishes, one-half pound of asparagus, 3 heads of lettuce, some mustard, some spinach, 10 green onions and 3 heads of cauliflower. These vegetables would make about twenty meals for an ordinary family. The cost to the consumer was \$1.00 plus the express. The latter item would be thirty cents to San Antonio or Austin, thirty-five cents to Dallas and ninety-five cents to St. Louis.

"Last week I wrote a letter requesting that a hamper be sent me. I made no special requests as to kind or character of vegetables to be sent. I received in due time a hamper containing the following: 4 heads of cabbage, 11 beets, 14 Bermuda onions, 14 carrots, 12 radishes, 4 quarts of peas, 1 bunch (45 stalks) asparagus, 12 green onions, 14 heads of spinach and 5 boxes of strawberries. A conservative estimate of these products at Austin prices is \$2.75. The real cost was: Postage four cents, express thirty cents, and the producer \$1.00; total, \$1.34."

Mr. Austin, who is Director of the Public Welfare Division of the Extension Department and is particularly interested in problems of marketing agricultural products, will be pleased to discuss details with either producers or consumers.

SPRING LAKE.

SPRING LAKE, Texas, April 28.—The Spring Lake country is having an abundance of rain, which makes the prairies beautiful and green.

Our school closed Thursday. An excellent program was rendered Thursday night by the school. A number of excellent essays were read. The graduating class, which was Mabel Vore, Lovain Phipps, Eugene Cleavinger and Gladys Axtell, from Sunnyside, were granted diplomas. Mr. Hopper is a fine teacher, and he will be greatly missed in the community.

The Spring Lake school is installing a good library at the school house, with Mabel Vore as librarian.

Orville Axtell is attending court at Amarillo.

The community Literary Society will continue their meetings through the summer, with a good program at least once each month.

Dwight and Mamie Axtell and Mr. and Mrs. Leroy Harris took supper at M. E. Cleavinger's last Tuesday night.

We are sorry to hear that Mrs. J. J. Phipps is called back to Missouri by the serious illness of her father.

Rev. Swartz, of New York; Rev. Murphy, of Oklahoma City, and Rev. Foster, of Muleshoe, were Spring Lake visitors last Friday evening.

Those from this place who are attending the association at Friona are Mr. Vore, M. E. Cleavinger, Mr. Hopper, Dwight and Mamie Axtell, Mr. and Mrs. Cunningham, Mrs. Geist and Mrs. Leroy Harris.

Walter Singleton has purchased a Ford, and he and family were visiting in Spring Lake Friday. He also transacted business in Otton Friday evening.

The Christian Endeavor social and business meeting was held at Leroy Harris' last week.

Mr. and Mrs. Cunningham gave the young people a social last Monday night.

Miss Beatrice Vore's school will close next Friday night, and she will be home for the summer.

Rev. Harbut, of Friona, was a Spring Lake visitor a week ago Sunday, and was looking after the interests of the church.

WHAT SHALL BE DONE WITH THE ROOSTERS?

"It is quite a problem," reports Prof. F. W. Kazmeier, of the A. & M. College of Texas, "to determine just what to do with the cocks, cockerels and roosters after the breeding season is over,

Lines To Be Remembered

MEMORY OF MAY.

My mind lets go a thousand things,
 Like dates of wars and deaths of kings,
 And yet recalls the very hour—
 'Twas noon by yonder village tower,
 And on the last blue noon in May—
 The wind came brising up this way,
 Crisping the brook beside the road;
 Then, pausing here, set down its load
 Of pine scents, and shook listlessly
 Two petals from that wild rose tree.

—Thomas Bailey Aldrich.

and every individual farmer will have to work out the best solution for himself. Where there are a great number of male birds, it is a good plan to build them a coop in the orchard or wood lot and let them range about, clipping their wings to prevent them from flying over the fence.

"Where there are only a few male birds, the farmer can fatten them profitably, selling all except those which he expects to use next season. It is always wise to retain the best breeding stock. Never pen the birds in close, dirty and undesirable quarters."

TO THE CLUB WOMEN OF THE TEXAS PANHANDLE.

Next week, May 4 and 5, is our opportunity to prove our loyalty to the cause of women in the Panhandle. The First District Convention will convene at Quanah on those days. It is the first time in six years it has been brought so near to us. The only convention ever held in the Panhandle was held in Amarillo—six years ago. This is the last meeting of the First District as it is now, the district of which every member was so proud, that covered more than the states of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, Delaware, Maryland and New Jersey, is to be divided at this meeting. As Panhandle women, let us make a good representation at this last meeting of the old First District. MRS. W. A. WARNER, Chairman Education Extension, Texas Federation of Women's Clubs.

Try Buying for Cash

During May we invite you to test the saving in your grocery bills by paying cash. You don't have to worry about payment the first and it means less expenditure during the month.

Large Bucket Cottole, credit price	\$1.60; our price	\$1.40
Compound, credit price	1.25; our price	1.10
6 cans Tomatoes, best grade, credit price	.75; our price	.65

On a personal visit to Mr. Henry Ford a Ford agent broached the subject of a possible August 1st Rebate.

(The Ford Company announced last year—as you well remember—that if their total sales reached 300,000 cars between August 1st, 1914, and August 1st, 1915, each purchaser during that period would receive back a refund of \$40.00 to \$60.00.)

"Mr. Ford," he suggested, "Is there anything I can say to our people with regard to the Ford Motor Company's 300,000 car rebate plan?" "We shall sell the 300,000," was the quiet reply--"and in 11 months, a full month ahead of August 1st!"

"Then a refund is practically assured?"

"Yes--barring the totally unexpected. We are 50,000 to 75,000 cars behind orders today. Factory and branches are sending out 1800 daily."

He then said to Mr. Ford: "If I could make a definite refund statement we would increase our local sales 500 cars."

"You may say," was Mr. Ford's deliberate and significant reply to this—"You may say that we shall pay back to each purchaser of a Ford car between August 1, 1914, and August 1, 1915, barring the unforeseen, the sum of \$50. You may say that I authorized you to make this statement!"

What can we add to the above? \$15,000,000 cash coming back to Ford owners! And to prospective Ford owners up to August 1, 1915, it actually means—Ford Touring Cars for \$535—less the \$50 rebate! Ford Runabouts for \$485—less the \$50 rebate. What is there left for us to say!

W. M. S. WITH MRS. McDONALD.

The four Circles of the Woman's Missionary Society of the M. E. Church met with Mrs. C. L. McDonald, at Seth Ward College, Wednesday afternoon.

The ladies were requested to bring their needlework, and after an hour or so of work and conversation, we were favored with two readings by Miss Lena Williams, which were very greatly enjoyed.

Mrs. Anderson gave us several selections on the piano and Mrs. Cora Pritchett sang two solos, which were highly appreciated.

Mrs. McDonald served delicious refreshments, consisting of ice cream and cake, after which the ladies were shown over the buildings, and all went home feeling that the afternoon had been delightfully spent.

Quite a number of ladies were present, and we hope every one will be at the meeting next Monday, at the church, and as many more as can possibly go. PRESS REPORTER.

TRAVEL STUDY CLUB HONORS MEMBER WHO SOON WILL LEAVE.

The Travel Study Club members honored Mrs. R. S. Charles, one of the members, who will soon leave for her new home, in Indiana, with a theatre party at The Ruby yesterday.

After a five-reel show, the club repaired to the home of Mrs. J. W. Pipkin, where refreshments were served.

Every member of the club, except two who were out of the city, was in attendance.

EPWORTH LEAGUE.

The meeting of the Epworth League Sunday evening will be devoted to business and the election of officers.

TRAVEL STUDY CLUB HAS RUSSIAN PICTURES.

Friday evening the Travel Study Club had at The Ruby Theatre copyrighted pictures from Underwood & Underwood, New York, on Russia. A lecture on the pictures was read by Mesdames R. S. Charles and Jo Wayland.

The club had as guests one hundred fifty ladies from other clubs of the county.

The course of study of the Travel Study Club this year has included Russian history, manners and customs, and geography. The pictures were a part of their regular course of study.

HIGHLAND CLUB WITH MRS. J. O. WYCKOFF.

Yesterday afternoon the Highland Club met with Mrs. J. O. Wyckoff. "Forty-two," the regular game of the club, was played. The decorations were heliotropes, carrying out the club colors.

The hostess served a salad course and ice cream and cake.

TRAVEL STUDY CLUB YEAR BOOK TO BE READY IN MAY.

The 1916 year-book of the Travel Study Club will be published during the month of May.

STRAWBERRY SHORT CAKE - RECIPE IS THE BEST.

Mrs. J. J. Lash Selects Ladies' Home Journal as Prize.

The recipe for strawberry short cake by Mrs. J. J. Lash, recipe number three, has been selected by the committee on awards as the best in Tuesday's issue of The Plainview Evening Herald.

This timely recipe follows:
Strawberry Short Cake.
Pastry.

3 full cups flour.
1 teaspoon baking powder.
1 scant teaspoon salt.
1½ cups lard (or lard and butter, equal parts.)
Mix baking powder, flour and salt; rub in the lard and butter till fine and dry like meal. Mix to a stiff paste with cold water. Divide into three parts, roll, and place on inverted pie tins. Prick with fork to keep from blistering. Bake in quick oven. This makes three layers.

Filling.
Wash and drain together 1 full quart of strawberries or more if berries are plentiful. Cream together 2 full cups of sugar and butter. When nicely creamed, add berries. Chop and mash well. This is to be used between and on top of the pastry layers.
Let stand from 30 to 60 minutes before serving. Delicious; try one.

F. L. Moore and C. M. Muncy, of Tascosa, arrived in Plainview this morning for a visit with L. J. Warren. They will leave this afternoon for Lockney, where they will visit Mrs. S. A. Muncy.

R. J. Stout and Vaughn Gouldy left this morning for Wichita, Kansas, where they will look after the interests of the Layne & Bowler Company in some city well water development work.

Mrs. S. S. Stoner and mother, Mrs. G. J. Smith, left this morning for Amarillo for a visit with relatives.

Rev. C. S. Fields, of Fort Worth, is in Plainview on business and to visit relatives.

Misses Carrick and Jones, of Wayland Baptist College, left this morning for Hale Center for a short visit.

A. C. Moss, of Memphis, arrived in Plainview this morning for a visit with the family of S. P. Brown.

Mrs. H. C. Randolph and son, Leslie, who have been visiting in Brownwood, returned this morning.

W. C. Mathes left this morning for Woodward, Okla., on a short business trip.

George Meads, who has been demonstrating the new American-LaFrance fire truck, left this morning for Waco, where he will attend the State Fireman's Convention.

Will Watson returned yesterday morning from a business trip to Fort Worth.

Byron Brown had business in Amarillo yesterday.

Mrs. H. B. Wilson and little son have returned to Hooker, Okla., after a visit with Mrs. J. E. Willis, at Seth Ward.

Rev. and Mrs. J. T. Bloodworth were in Plainview yesterday morning en route to Panhandle, where they will conduct a revival meeting. At one time Rev. Bloodworth was pastor of the Methodist Church in Plainview. His eldest son, now twenty-one years old, was born here. They were the guests of Mr. and Mrs. J. N. Donohoo while in the city.

Dr. W. H. Flamm returned yesterday morning to Amarillo, after a visit with his mother, who is ill.

Thomas Gibbs, who has been ill for three weeks, is able to be on the streets.

Mrs. C. C. Gidney and son, William, left yesterday morning for Childress, where they will visit for a few days. Master William will remain with relatives there while Mrs. Gidney visits in Temple, Austin and other Central Texas points. Dr. Gidney will join her at Fort Worth next Monday, where he will attend the State Medical Association meeting and visit with their daughters, who are attending Our Lady of the Victory Academy.

District Manager T. J. Becker of the Southwestern Telegraph and Telephone Company was here yesterday from Amarillo, en route to Floydada several weeks.

J. B. Downs, of Lockney, was here yesterday on business.

Mr. and Mrs. J. J. Cole and Miss Lillie left yesterday morning for Galveston, where they will visit for several days.

H. L. King and Miss Irma left yesterday morning for San Angelo, in response to a message stating that Mr. King's son is very ill there.

E. C. Fain returned yesterday morning from Clovis, where he has been on business.

Dallas is having trouble with her supply of natural gas. It is probable that they will secure at least a part of their supply from the Mexia field.

W. A. Tolbert left yesterday morning for Lubbock, where he will attend to business.

REV. STERLING PARK TAKES UP NEW WORK AT MCKINNEY.

Former Pastor of Plainview Presbyterian Church Given Warm Reception by Congregation.

Fortunate indeed were those who attended the installation service Sunday afternoon at the Central Presbyterian Church, when Rev. Sterling Park was installed as pastor. A large congregation gathered, notwithstanding the threatening weather. The music rendered by the choir was uplifting, the sermon by Dr. Burma, of Dallas, on "The Lamb of God," was inspiring—eloquent and spiritual. The charge to the pastor was delivered by Rev. P. D. Tucker, of Plano, and was appropriate and impressive. The charge to the congregation was delivered by Rev. Glenn L. Sneed, pastor for eight years of Trinity Presbyterian Church, Dallas. His charge abounded in practical suggestions to the people in reference to their duty and loyalty to pastor and the church. His points were forcibly made, and would have been beneficial to every church member of every church in the city to have heard.

Rev. Park, who comes to the care of the Central Presbyterian flock, is a pastor with a successful career to his credit where he has previously served. He is in the prime of life—educated, consecrated to his whole work and possessing such a charming personality that folks of every denomination, as well as those of no particular church affiliation, are drawn to him in warm friendship and fellowship that is so desirable in pastors. The outlook is bright for his accomplishing much good to his church and our city in general. That he may render better service to his Lord and the church and secure hearty and efficient co-operation of every member, he has already organized his church into several departments, as published in this paper in Saturday's issue.

The Central Presbyterian Church seems to be truly entering upon a hopeful and prosperous era in its career.—McKinney Daily Gazette, March 15.

BELLEVIEW.

BELLEVIEW, Texas, April 28.—The excessive rainfall is turning wheat yellow.

Mrs. Jerome Buchanan resumed her school work Monday, after an absence of several days on account of sickness.

Charles McKinney delivered several loads of grain in Plainview last week.

W. W. Kurfee went to Plainview Tuesday.

Miss Evelyn Monts arrived Friday from Ore City, Texas, to visit her sister, Mrs. J. M. Tilson.

Miss Ida Jernigan shopped in Plainview Saturday.

Several of the neighbors met Tuesday and did a lot of fencing for Mrs. Dodson.

Mr. Cliff had business in Plainview Saturday.

Col. T. J. Tilson attended the County Judges' Convention at Amarillo Friday.

NOTICE.

Beg to announce that, effective May 3rd, I will assume charge of The Mae I Theatre, and that The Ruby will be closed until further notice.

Wish to express my appreciation for the patronage given me at The Ruby, and will try to merit a continuance of it in my new location.

Sincerely,
—Adv. It. ROSS D. ROGERS.

C. C. Beck left yesterday morning for a business visit in Lubbock and Sweetwater.

STATE BANKS SHOW INCREASE IN DEPOSITS OF \$8,000,000.

Statement of Commissioner of Insurance and Banking Reflects Texas' Prosperity.

A compilation of statements of condition of 762 State banks and 75 bank and trust companies at the close of business on March 4, 1915, completed by Commissioner of Insurance and Banking John S. Patterson, shows that the capital stock aggregated \$32,244,000, compared with \$32,514,000 reported on the previous call, on December 31, 1914, a decrease of \$270,000. The total individual deposits was \$67,689,950, compared with \$59,718,919, an increase of \$7,971,031. The surplus increased from \$7,071,711 to \$7,330,941, an increase of \$259,229.

Overdrafts decreased \$379,472, being reduced from \$923,464 to \$543,992. Loans and discounts aggregated \$70,594,975, against \$71,459,304, a decrease of \$864,329.

PRAIRIE AVENUE.

PRAIRIE AVENUE, Texas, April 26.—Sunday School is progressing nicely here.

About two inches of rain fell here Saturday night.

The literary at Providence Saturday night was a fizzle, on account of the big rain.

Mr. Johnson, of Plainview, was in this locality Monday tuning pianos.

Mrs. J. A. Pullen and Mrs. W. C. Ooley were in Plainview Friday.

Joe Barrett left last Friday for Lincoln, Nebraska.

Steve Williams was out on 9016 telephone line Monday, fixing it.

Miss Hall and Mrs. Hill returned to Plainview last Tuesday, after a pleasant visit with Mrs. J. A. Pullen.

Alfalfa Does and Don'ts

The visit of Joe E. Wing to the Plainview country last year will be remembered by many. Mr. Wing is an alfalfa specialist. He said of the alfalfa grown in the Plainview country that it was the best he had seen anywhere. The stalk is succulent and the leaves small and close together, giving it the maximum feeding value.

In Hoard's Dairyman of April 16 are quoted some "Does and Don'ts for Alfalfa Growers" by Mr. Wing. Here's the Hoard quotation in full: "In a recent address at Madison before the Alfalfa Order of Wisconsin, Joe E. Wing, the alfalfa man, gave his experience in raising alfalfa and what he considered the essentials in alfalfa culture. We give below a part of the notes taken as we heard this address, and if they appear somewhat disjointed we merely desire to offer in explanation that it is our desire to give the information in as short a space as possible.

"Argentine seed is now being offered on the market, and it is not suitable for our climate. The same holds true of Turkestan, which is not good for humid regions. True Grimm seed is valuable, but somewhat costly, and there is much that is sold as Grimm that is not Grimm. For northern conditions, Nebraska, Montana, and Dakota seed is best. He has not been able to produce good seed in Ohio, as the weather conditions do not as a rule permit the proper ripening and harvesting of the seed.

"In his experience he found unburned limestone best, and he had noted that when applied to a field it would prevent the alfalfa turning yellow. The Wisconsin Station reports that where soil is well drained and not acid, but the alfalfa turns yellow from leaf spot or other cause, they cut the field for hay on the appearance of this condition, and the second crop comes on with a strong, healthy growth.

"Manure should never be applied on an alfalfa field that is to be cut for hay, as it will kill out many plants and cut down the yield. When manure is applied it should be plowed under. Mr. Wing states that on his soil he has found by experience that acid phosphate at the rate of 400 pounds to the acre will give better results than phosphorus in the form of acid phosphate or basic slag gave his alfalfa such a vigorous growth that it overtopped the foxtail and pigeon grass, while the same field without the phosphorus showed these grasses of equal growth. Some farms don't need lime, and some don't need phosphorus, but

wondering whether they do or not is like speculating on whether a girl will let you kiss her. You can't tell till you try. Different soils need different treatment, and the way to tell what each field needs is to try the different fertilizers in check strips through the field and judge by results as to their value.

"The time to cut alfalfa is when the little shoots or new stems first appear and before they get long enough to be cut by the mower. Get down on your knees out in the alfalfa and study it. Pull up a few roots and note whether these shoots are not just below the surface. It hampers the alfalfa to cut it out on a part of your own field and note how it affects the next crop. Seeing is believing, as well as being the best educator. When the shoots do not all come at the same time, strike an average for the field, also cut when the alfalfa stops growing.

"For Ohio conditions the speaker said he used beardless barley for a nurse crop, using one bushel to the acre and sowing as early in April as possible. With early sowing frosts kill the weeds but do not injure the young plants. The time to make the first cutting is when the alfalfa has stopped growing and the new shoots commence to appear. Then cut the barley and alfalfa for hay. Don't try to raise a good barley crop, for in your anxiety for it you may injure your alfalfa. Sow the alfalfa with an alfalfa drill, covering the seed not over one-half to three-fourths inches. This is much preferable to broadcasting. The seed may be drilled into winter wheat or rye in the spring or sowed alone, but best results are with beardless barley. Drouth will not kill the young plants after they once get a good start.

"In harvesting the hay, cut in the morning and rake into windrows in late afternoon or next morning. Do not use a tedder. Make the second cutting at noon and rake the next morning at 10 o'clock. To avoid danger of spontaneous combustion put the hay in the mow in a uniform layer, failure to do this results in unequal settling, forming air pockets, and so permitting spontaneous combustion.

"Fair preparation of the land is not enough. Doing fairly well does not spell the best results. Do the best possible work, study your soil and your growing fields, keep an open mind, and grow with your crops. Seek to be above the average if you ever wish to get anywhere in alfalfa culture or in anything else."

TO GET GOOD RESULTS FROM COVER CROP.

WASHINGTON, D. C., April 20.—"See that the vegetable matter is thoroughly incorporated with the soil," says the United States Department of Agriculture's Office of Farmers' Co-operative Demonstration Work, to those who have green cover crops and wish to handle their land for the succeeding crop in the most desirable manner. If the farmer is to expect good results from his cover crop he must not act in a hurry and neglect this important part of the work. The disc and smoothing harrow should be used until the soil is well pulverized and the vegetable matter mixed throughout the soil. Those who wish suggestions about fertilizer ingredients to use on this soil may obtain them by writing the office, at Washington, D. C.

The state at which a cover crop should be turned under depends upon the soil, weather conditions and the crop that is to follow. Where corn is to be planted on crimson clover land, the clover should be turned under just when the bloom begins to appear. The crop at this stage will contain about the maximum amount of plant food. Besides, it will decay much more readily than if permitted to reach full maturity. It may be necessary to turn the clover under a little earlier in order to get the corn planted at the proper time.

It is sometimes advisable to turn under earlier on account of the soil being in good condition, whereas if put off for a few days or a week dry weather might prevent the work being done as it should be. When the land is to be planted to cotton it will be necessary to turn the cover crop under a few days earlier regardless of the stage of growth. This will allow a few days for the land to settle and to be gotten in proper condition for a good seed bed. The plow should be followed closely with the harrow, to pulverize the soil before the wind and sunshine dries it out. Unless the soil is full of moisture, or there are prospects of an early rain, it is best to run a roller over the land to firm it, which will aid in holding the moisture. The roller should always be followed with the weeder or light smoothing harrow, to mulch the top soil.

When the cover crop consists of rye or other small grain, it should be turned under when about knee high. If the condition of the soil prevents plowing at this time, double disc the crop a couple of times, and this will prevent the further drying out of the soil, and frequently the soil will be mellow enough in a few days to plow even if it does not rain. This, of course, is true when clover is to be followed by corn also.

Never turn the clover or other crop

GREAT HONEY HARVEST.

South Texas Will Produce Great Crop This Year.

J. B. King, president of the Texas Beekeepers' Association, who lives near Batesville, owns one of the largest apiaries in the State, and says that the prospects for a large honey yield this spring is very encouraging.

The Guajilla, from which the finest honey is made, has escaped the late frosts and will soon be in full bloom. A few days of warm sunshine is what it needs. He also says that the \$3,000 appropriated by the last Legislature for the prevention of the spread of foul brood, a fatal disease to bees, is now available. The larger part of this amount will be spent in those counties that have not paid a great deal of attention to the bee business, and as a consequence have allowed the disease to spread. He did not think it would be necessary to spend very much of the amount in Uvalde and Zavala counties, as the beemen in this section had taken precautions to eradicate the disease wherever it had appeared.

There is a movement among the beemen of the Uvalde section to standardize the honey business so as to be able to guarantee the grade. D. H. Crisp, a prominent shipper, says that there should be a central packing establishment where the honey could be put up under careful supervision and the grade placed on each package and guaranteed. It often happens that an inferior article is sold for choice honey, which gives all the honey a bad rating.—Fort Worth Live Stock Reporter.

COMMITTEE ON TEACHERS FILLS MANY VACANCIES.

UNIVERSITY STATION, Texas, April 26.—The largest teachers' employment bureau in the United States masquerades under the unpretentious title of "Committee on Teachers" in the University of Texas. The salary list of teachers placed through this committee for the present year aggregates \$300,000.00.

"If the usual 5 per cent were charged," says Professor Eby, chairman of the committee, "we would have a gross income of \$15,000 per year. Add to this the usual registration fee of \$3.00 for each applicant, and the total gross receipts would amount to \$16,500. However, this is merely one of the ways in which the University serves the schools of the State and its own students and alumni. We bring the position and the teacher together, charging nothing except the nominal registration fee of \$1.00, which barely defrays postage and expenses incident to keeping the records of the office. Last year we sent above 300 university-trained teachers into the schools and colleges of Texas and secured in all about 425 positions for our applicants.

"We have now on our applicant list the names of above 300 qualified teachers, and the season for applications is barely begun.

"During the first year (1909-10) of the work of our committee, we secured positions for 187; in 1910-11, 137 positions were filled through our committee; the next year 345; the next 231; in 1913-14, we placed 278, while, as stated above, we secured above 400 positions this session, making a total of positions filled during the six years of the committee's existence of 1,603 positions."

PEACH-LEAF CURL.

Within the past three weeks many cases of peach-leaf curl have been received at the office of Frederick H. Blodgett, Plant Pathologist and Physi-

ologist, Texas Agricultural Experiment Station, at the A. & M. College. This peach curl is a cool-weather trouble, and is more severe this season than usual, on account of the cool, wet March. But the spores of the fungus were present on the twigs, and about the buds, or even the unfavorable weather would not have had the effect seen. Only the oldest leaves, those which first unfold from the buds, are seriously damaged, the small and young leaves now unfolding from the center of the bud being clean and normal. No spray can reach the fungus, and the danger of leaf injury by spraying would make it unwise to apply any solution at this time.

The only treatment possible is to prune out and burn the twigs which are most badly infested, then during the coming winter to spray with fresh-

The Baking Powder Question Solved

—solved once for all by Calumet. For daily use in millions of kitchens has proved that Calumet is highest not only in quality but in *leavening power* as well—unfailing in results—pure to the extreme—and wonderfully economical in use. Ask your grocer. And try Calumet next bake day.

You don't save money when you buy cheap or big-size baking powder. Don't be misled. Buy Calumet. It's more economical—more wholesome—gives best results. Calumet is far superior to sour milk and soda.

ly made lime-sulphur solution or with good Bordeaux mixture to kill the spores, which will collect upon the surface of the twigs and about the buds ready for their opening next spring.

Whoever You Need a General Tonic Take Grove's
The Old Standard Grove's Tasteless chill Tonic is equally valuable as a General Tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.

No. 4 LITTLE TALKS BY THE DOCTOR

OSTEOPATHY

The Osteopath is by education a physician. He practices a new and complete system of treatment. He must know diseases in all their phases and manifestations.

The Osteopath brings a new viewpoint to interpret disease, and employs new measures to correct it. He does not merely count the pulse, take the temperature, examine the sputum to see if bacilli are present, and then await developments, in the old-time way, before he can tell the patient what he has "got" in the way of a malady.

This is the unfortunate weakness of traditional diagnosis. It is the historic way, but its vision is "hindsight" rather than "foresight." What the patient needs most is to have fundamental causes detected before they have developed, to the end that they may be corrected.

The sick person wants deliverance from what is going to happen. He needs to have his organism tuned up so it can resist microbes and function normally.

Osteopathy is a system of treatment which has proven successful in doing this. It gives the sick person what he most needs—it "corrects his lesions."

DR. N. B. MAYHUGH, Osteopath

Summer Cooking Shouldn't Cook the Cook

"The Turning Point in Oil Stove History"
FLORENCE Oil Cook Stoves
"Look for the Lever"

Getting dinner ready in July is just as comfortable as in November—if you use a FLORENCE OIL COOK STOVE.

The heat goes into the cooking, not into the kitchen. It does your work well and reliably, and keeps you comfortable. It requires less watching and regulating than a coal stove.

You can keep one or four burners at an intensely hot or merely simmering flame.

Come in and let us show you how these Florence Automatic Stoves work, how simple and reliable. No Wicks to burn out. No Valves to leak. Once started, each burner will keep going at the same power until you turn it out.

PERFECTLY SAFE

KANSAS CITY STOCK MARKET IN DETAIL.

KANSAS CITY STOCK YARDS, April 26.—The extraordinary advance on stockers and feeders last week held good today, in spite of predictions that a break might be expected, due to large receipts and a balk on the part of country buyers on paying the high prices. Total cattle receipts were 11,000 head today, consisting of a large proportion of thin grades, with a good many light killing steers, and few heavy weights. This distribution was in line with market requirements, the heavy steers selling slowly at barely steady prices, while light steers sold readily at stronger prices in some cases. Butcher grades were firm, and stockers and feeders went through the session kicking up their heels. Choice native yearlings sold at \$8.50 today, as baby beef, but there were no prime heavy steers here. Some big natives sold last week at \$8.35. Choice heavy cows bring around \$7.00, sometimes \$7.50, and odd heifers up to \$8.50.

Colorado sugar-mill offerings included some well finished steers at \$8.00, weighing 1,150 pounds, top price for this class this year. Heavier steers sold at \$7.75 to \$7.95, in some cases steady with a week ago, others 10 to 15 cents higher.

Oklahoma and Panhandle killers sold at \$7.40 to \$7.80, 10 to 15 cents above a week ago. Some Texas feeders brought \$7.60, as compared with a bid of \$7.00 for them in Fort Worth on the way, and some choice White Face heifer calves, 504 pounds average, sold to go to the country at \$7.75 to \$7.90, also bid a much lower price at Fort Worth. A big drove of heifers from Texoma sold to killers at \$8.25, 639 pounds average.

Quarantine receipts consisted of 8 cars of steers from San Angelo, 1,097 pounds average, at \$7.35, a strong price.

The general cattle market is advancing regularly, and is lined up about like it was a week ago, light steers selling best to killers, heavy steers slow, stockers and feeders booming.

Hogs sold irregularly today, several loads light hogs selling early at \$7.55, only 5 cents under Chicago, and 10 cents above St. Joseph and Omaha. Later the market eased off, closing 5 to 10 cents lower, bulk of sales \$7.25 to \$7.45. A big packer's drove cost \$7.38 here today, and his drove at Chicago today cost \$7.40. Receipts here were estimated at 9,000 head early, but 10,000 came in, counting two small trains of hogs from Sioux City and Omaha, bought by Kansas City packers on those markets for slaughter here.

Sheep and lambs have made new records today, lambs bringing \$10.85, highest price ever paid here. The market closed strong, and eleven-dollar lambs are expected this week, probably tomorrow. Receipts were 8,000, including about a thousand Texas goats, which sold higher, killing goats at \$5.25 to \$5.50. There was a strong demand for brushers, but none were offered; they are worth around \$4.50. Advices from Texas shipping points received here today say the main movement will not start before May 15th.

J. A. RICKART,
Market Co. respondent.

SPRING LAKE.

SPRING LAKE, Texas, April 29.—Spring Lake enjoyed a 6-inch rain last week, followed by sunshine, which is making everything look green.

W. A. Singleton is sporting a new Ford.

W. A. McCluskey, of Spring Lake Ranch, is in Kansas City.

Mr. and Mrs. Cunningham gave the young people a party Monday night. A splendid good time is reported.

Russell White went to Bovina with cattle for the Sullivan Ranch this week.

Sunny Side School will give their closing exercises Wednesday night.

Messdames I. F. Harris and E. R. Geist, Miss Mae Axtell and Messrs. D. G. Axtell, P. D. Vore, M. E. Cleavinger and Professor Hopper attended the Panhandle Association of the Congregational Churches at Friona Saturday and Sunday.

Miss Etta Vore is very ill at this writing.

Mrs. J. I. Phipps left Saturday for Missouri, where she was called to the bedside of her father, who is dangerously ill.

O. C. Axtell is attending Federal Court at Amarillo this week.

A splendid program was rendered by the Literary Society Thursday night. On the same night Spring Lake held her closing exercises of the term. The pupils rendered their part in a very interesting and pleasing manner. Those who passed from the intermediate into the high school were: Lorane Phipps, Mabel Vore and Eugene Cleavinger, from the Spring Lake School, and Gladys Axtell, from Sunny Side School.

Dick Bryan had business in Amarillo Monday.

TURKS REPULSE ALLIES APPROACHING KABA TEPEH.

(Continued from Page One.)

whose cruising range is sufficient to permit them to travel from Pola to the Dardanelles without replenishing their fuel supply.

The submarine which attacked the Leon Gambetta came from Cattaro, on the eastern coast of the Adriatic, an Austrian port about 300 miles from Santa Maria Leuca point. This distance could have been traveled in about twenty hours. It was learned here today that the U-6 was sighted by fishing boats Monday afternoon.

Three French cruisers were last night watching the strait between the island of Corfu and the Italian coast. This strait, when the various islands are taken into consideration, does not measure more than 40 to 50 miles wide.

Waited for Its Prey.

It appears that the U-6 took up a position about half way between Santa Maria Leuca and the Greek island of Othoni. There the craft waited for its prey, and when the opportunity offered discharged its torpedo against the Gambetta, which was doing patrol duty.

Ships which went out to succor the Gambetta still are cruising in the vicinity in which she was struck, looking for possible survivors. Those of her crew who have been brought ashore are receiving medical care, and supplies for the survivors are being sent to Taranto.

It is believed the Gambetta had on board a crew numbering 714 men, including 22 officers. A majority of the men were asleep when the cruiser was struck. Those saved virtually are without clothing.

Allied Lines Check German Attack.

LONDON, April 28, 9:10 p. m.—Our operations in conjunction with the French have definitely stopped the German attack.

In these words Field Marshal Sir John French, Commander-in-Chief of the British forces in the continent, announces the conclusion of another German attempt to break through the allied lines around Ypres and along the Yser Canal, which brought about one of the most sanguinary battles of the war. This, however, only brings to an end the first phase of the battle, for the allies have yet to win back the ground which they lost in the great German sweep. For this purpose they are now delivering counter attacks against the German line. Only at one place, Steenstraete, have the Germans managed to keep their footing on the western bank of the canal, while to the north of Ypres the positions remain much as they were, the allies making no claims to an advance there and the Germans reporting that all the British attacks have been repulsed.

Belgium Denied of Troops.

To hold these lines the Germans have brought up further reinforcements, and Belgium behind them has been denied of troops. The towns and villages in Belgium are being guarded by only a handful of sentries.

Fighting also continues in Champagne, where the Germans make claim to the capture of a strong French position in the Argonne, and the Woivre, where the French say they are progressing, and in the Vosges, where both sides claim to be in possession of Hartmanns Weilerkopf. It is probable that this mountain, which commands the plains of Alsace, has changed hands several times; this would account for the contradictory reports.

The Russians and Austro-Germans are heavily engaged in the region of Uzok Pass, in the Carpathians, and in the direction of Stry, where an attempt is being made to strike at the Russian communications.

Reports From Bukowina Conflict.

Berlin correspondents give the Austrians credit for the capture of a num-

ber of important heights near Uggok Pass, and also assert that they have driven the Russians completely out of Bukowina. But this is not backed up by the Austrian official report, which says that in Bukowina an important event has occurred, and simply speaks the Carpathians. There also has been a renewal of activity on the East Prussian front, where the Germans report minor successes for their troops.

The sensational report that 8,000 of the allies' troops have been driven to the sea on the Gallipoli Peninsula and that 12,000 were captured also comes from Berlin, but has no confirmation from other sources. It is expected that the operations against the Dardanelles will proceed slowly, as the Turks are strongly entrenched and their wire entanglements and trenches

will have to be shelled heavily before the troops can make any serious attempt to advance.

Italian Policy Unchanged.

The reports as to the intention of Italy are as varied as they are numerous, but the Italian Embassy at London has authorized the statement that nothing is known there of any impending change in the Italian policy.

Nothing further has been heard of the German fleet in the North Sea, and it is contended in official quarters here that it never left the mine fields off Heligoland. In the Baltic, however, German warships are busy, and have stopped a number of Swedish steamers carrying coal from English ports to Sweden.

We have no fences to mend

before asking you for Diamond Squeegee Tire preference.

This tire's record in 1914 was so clean—so thoroughly satisfying to 99 out of every 100 users that it stands out as the bright spot in the haze of tire argument.

And bear in mind the above mentioned figures are not ours, but represent the testimony of hundreds of tire dealers covering the sale of over 500,000 Diamond Squeegee Tread Tires.

What is more, this volume of undeniable tire evidence will be placed in every tire user's hands free for the asking.

Diamond Squeegee Tires are sold at these

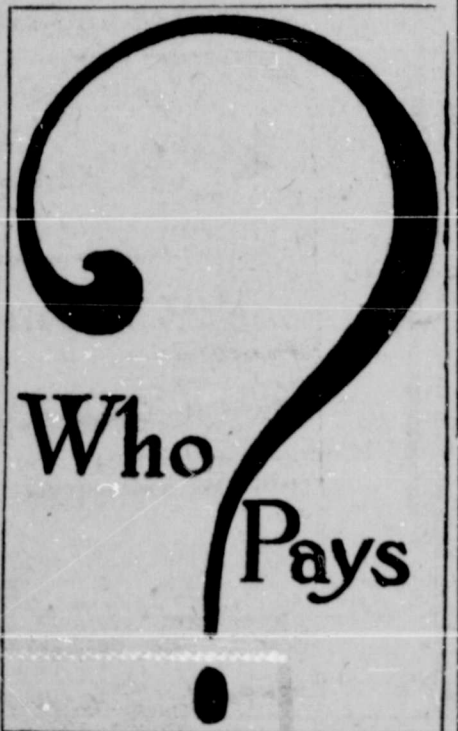

"FAIR-LISTED" PRICES:
