

COLP WANTS TEXAS TO HAVE FEDERAL GOOD-ROADS MONEY.

Days During Next Few Months There Will Be Greatest Activity in Highway Construction State Has Ever Seen.

SAN ANTONIO, Texas, Oct. 4.—"The world do move" might pertinently be transformed to "Texas do progress." The second week in September one of the biggest, most significant and successful good roads projects ever launched in Texas and carried to a satisfactory conclusion was consummated in the territory between Houston and San Antonio.

It was desired to arouse enthusiasm for a hard-surfaced road between Houston and San Antonio. Roads advocates of the two cities resolved on a series of meetings, one to be held at every town and village in the territory. The delegations from each of the cities which went out in the work were known as "flying squadrons." They met at Schulenburg, a town half way between the cities, and held the initial meeting. The parties worked through the district, and such enthusiasm for good roads as never before was seen, it is asserted, was aroused. Now a road is assured within a few months.

Officers of the Texas Good Roads Association, including Secretary D. E. Colp, say just such a plan as this is to be carried out in every part of the State within the next few months. Texas is to see such a good-roads-boosting campaign as never has been thought of before. No section is to be missed. Scores of communities have written to Mr. Colp for information as to how meetings may be obtained.

If Texas obtains a State Highway Department at the next session of the Legislature the State will get \$900,000 from the Federal Government for rural post road building and maintenance, conditional that the bill which the Secretary of Agriculture has endorsed is passed by Congress. This money will be distributed in the State to those communities showing the most energy in road building within the next few months, it is asserted.

KANSAS CITY STOCK MARKET IN DETAIL.

KANSAS CITY STOCK YARDS, Oct. 1.—A good run and a good market describes the cattle situation here this week. Heavy purchases on orders from Eastern killers, who have been shut out of the Chicago market by various state quarantines established this week, stimulated the market on all killing cattle, grass beef steers 15 to 30 cents higher, corn-fed steers 35 to 60 cents higher than close of last week. It is not known how long the present embargo against Chicago live stock will last, but in the meantime the presence of new buyers here is making a very good market.

Both order buyers and packers paid \$10 for prime beef steers this week, showing that the competition extends all along the line. Yearlings sold up to \$9.90, choice heifers up to \$9.50, heavy fat cows worth \$6.00 to \$6.75. Grass steers sold up to \$9.00, one lot from Chase County at \$9.65, having had a little feed on the grass, middle grades at \$7.50 to \$8.50, cattle above \$8.00 getting the full advance.

Feeders have found a fair outlet at steady prices, good feeders \$7.25 to \$7.85, and choice stock cattle are about steady, but lower grades are off 25 to 40 cents, plain off-color stockers selling down to \$5.50. Yearlings and two direct from the range sold strong. Panhandles up to \$8.05, Colorados and Utahs largely at \$7.00 to \$7.65, and

Good Western feeders brought \$7.00 to \$7.50, a string of common Utah stockers at \$6.15.

Corn, Idaho, Montana and South Dakota were well represented this week, beef steers selling largely at 6.50 to \$7.75.

Quarantine supply has lacked both volume and quality, steers largely at \$5.60 to \$6.50.

Hogs have had a lower tendency last two days, although the top price remained at \$8.25 each day this week week till today, when it dropped to \$8.10, receipts 2,500. Heavy order buying has been the feature, Eastern killers getting more than 50 per cent of the supply of 36,000 head. Heavy purchases by order buyers here will continue, of course, till the quarantine against Illinois and Chicago is raised. Apparently, light hogs are about to lose some of their prestige, middle eights and heavies gaining on them this week, bulk of sales today \$7.50 to \$8.00.

Sheep and lamb receipts are lighter this week, and prices are firm, 3,000 are today. An attempt to bump the market yesterday had little success. Prices are strong today, good Western wethers at \$8.75, and feeders at \$8.00 to \$8.35, fat ewes around \$5.50, breeding ewes \$6.00 to \$7.00, feeding ewes \$5.00 to \$5.65. Demand is ample for fat lambs and also for feeders, and the market should remain firm.

J. A. RICKART,
Market Correspondent.

INFLAMED HOOFES AND CANDY.

Bentonite is a kind of clay which has a variety of uses. It is employed to give body and weight to paper, in the preparation of a dressing for inflamed hoofs of horses, as a constituent of antiphlogistine, a proprietary remedial dressing, and as an adulterant of candies and drugs. It has notable powers of absorption, taking up about seven times its own volume of water. It absorbs twice as much glycerine as can be absorbed by diatomaceous earth, and for this reason has been suggested as a substitute for that material in the manufacture of dynamite.

An automobile radiator has been placed within the flywheel by a Roumanian inventor, the water being cooled as it is whirled around inside the wheel.

A recent development of the electric sewing machine is one in which the motor is built in and its speed is controlled by a brake operated by a pedal.

WHEATON SAYS WHOLESALERS FIND ALFALFA SEED SCARCE.

Importation From Europe Has Been Slight, Price Is Good, and Growing Should Be Profitable.

Horace G. Wheaton, formerly with the Layne & Bowler Company at their Plainview office, but now at Kansas City, is keeping the Shallow Water well in mind. A letter to The Herald encloses a clipping from one of the Kansas papers on the alfalfa seed famine. Mr. Wheaton believes alfalfa seed offers the growers in this section a splendid opportunity.

In part, he says: "I do not know what any of the farmers on the Plainview District have given the thought of growing alfalfa seed serious consideration. It is a fact, however, that alfalfa seed, under normal conditions, grows well, and if this country has been in the habit of importing large quantities of seed from Germany, as stated

in the item enclosed, there certainly will be a shortage for the next few years, and the farmer will find its growth very profitable indeed."

The Kansas exchange says: "War Causes Alfalfa-Seed Famine."

"An Atchison wholesale seed dealer says an unusual amount of alfalfa will be allowed to go to seed in Kansas this year, and that there is sure to be an excellent demand, owing to the difficulty of procuring it from Europe."

"Before the war began this seed house used to import large quantities of the seed from Germany, but now the German output is practically shut off from the world. Russia, another source of supply, can no longer use the shorter and more feasible routes by the Baltic or the Dardanelles, but must send its seed via Vladivostok, which makes it too expensive."

Mr. and Mrs. L. W. Proctor, of Florence, S. C., are the guests of Mr. and Mrs. C. S. Woodrow.

Economy-Efficiency

Most stoves are expensive and still more expensive to operate, but they are necessary to the comfort and health of the family these nipping fall days.

It's a matter of economy to make your stove purchase a **Charter Oak** purchase because of the low first cost and the efficiency and low cost of operation.

The **Charter Oak** trade mark stands for years of perfection in the making of better stoves. It assures you of the best buy for your money.

We are ready to show you our assortment and to place the stoves in your home.

Remember "If it isn't good we make it good."

MEMBERSHIP AND ENLISTMENTS OF THE GERMAN CENTRAL UNION.

WASHINGTON, D. C., Oct. 1.—An indication of the effects of war upon trade and industry is afforded by figures received by the Bureau of Foreign and Domestic Commerce, Department of Commerce, which show the number of enlistments of male members of the German Central Union during the period ending April 30, 1915.

That organization, according to "Correspondenzblatt der General Kommission der Gewerkschaften," Berlin, had on April 1, 1914, 2,300,298 members, representing about 50 different trades. Taking account of all of the trades, the number registered represented about 64 per cent of the corresponding population of Germany. Naturally, in many single lines the percentage of members of the Central Union differs widely from this average.

Of these 2,300,298 members, 958,247, or 41.7 per cent, had enlisted in the war up to April 30, 1915. The trades furnishing the largest number of enlistments were, in order of numerical importance, metal workers, builders, men, transportation employees, wood workers, factory workers, miners, textile workers, book printers, carpenters, municipal employees, and brewery and mill workers. Butchers, with 84.2 per cent of the members enlisted, stood at one end of the scale, and tobacco workers, with 21.6 per cent, at the other.

CENSUS BUREAU'S EXHIBIT AT THE BIG EXPOSITION.

Business Men and Manufacturers Are Finding Statistics Compiled of Much Service to Them.

WASHINGTON, D. C., Oct. 3.—One of the interesting exhibits at the Panama-Pacific Exposition is that of the Federal Census Bureau. Its most prominent feature is the display of automatic tabulating machinery, but statistical publications, some of which are of great historical value, together with maps, charts, diagrams, etc., are also attracting much attention. Commenting on this exhibit, the San Francisco Daily Journal of Commerce says, in a recent issue:

"Aside from the general interest which the exhibit of the United States Census Bureau, in the Palace of Liberal Arts, is arousing, is the particular interest it has for business men and manufacturers. Complete statistics on population, agriculture, manufactures, forests, mines and quarries, mortality, and finance are shown in the various publications of the bureau, together with reports by states and counties and an analysis of the figures secured. One feature of the exhibit is attracting the attention of foreign governments. This is the automatic tabulating machine (of which there are three on exhibition) used in the compiling of vital statistics. These machines tabulate and print results at the rate of 150,000 cards per day. They are owned and manufactured by the Government. Maps and charts showing the census

figures for California are displayed, and also a series of charts illustrating the registration areas for death throughout the country. To become a registration area a state must prove that it reports at least ninety per cent of its deaths. The present registration area comprises about seventy per cent of the United States.

"The genealogical value of the census records is not generally appreciated. They contain a return of the whole number of persons within the several districts of the United States in 1790, and the first census, taken in the same year, contains the heads of families of twelve of the eastern and southern states, together with the members of the families, free or slave. Some of these original records for that period are shown in cases. William Lane Austin, of the Washington office, is in charge of the exhibit."

WHY FISH ARE NEAR SIGHTED.

From The Dallas News Magazine.

In an effort to discover why fishes are so near-sighted, scientists have been making some remarkable experimental studies of their eyes. One of the many interesting facts which these studies revealed was that fishes' eyes compared with human eyes are relatively large. The length of the eye of a fish is ordinarily about one-twentieth of its length, while the length of the eyeball of a man is from a sixtieth to a seventieth of his height.

The eyes of fishes are in constant use except when they are asleep. Most fishes have no eyelids, their eyes being protected from injury by a shiny material, or by a thick, transparent skin. The puffer, or swell-fish, which habitually burrows in sand at the bottom of water, has eyelids which cover the eyeballs when closed, the lower eyelid being larger than the upper.

In the experimental work the eyes of normal fishes were first examined with the retinoscope, then by electrical stimulation the focus was changed from distant to near objects.

It was found that, contrary to statements sometimes made, the eyes of fishes when swimming are focused for distant vision. Fishes are able to focus their eyes on near objects—as close as four inches—by the action of the superior and inferior oblique muscles; they have no ciliary muscles. It was found possible by operation on the oblique muscles to make the fish near-sighted, far-sighted or astigmatic.

TEXAS' INTEREST IN HIGHER EDUCATION IS ON INCREASE.

Springing Up of New Institutions Only Tends to Stimulate Growth of Older Ones, Say Experts.

AUSTIN, Texas, Oct. 4.—The colleges and universities of Texas are all opening, according to reports received here, with larger attendance than ever before, and this in spite of the entrance of a new university, the S. M. U. of Dallas, into the field. The enrollment at the A. & M., notwithstanding the more strict entrance requirements, will most likely enroll over 1,000 students. The normals are all showing an increased registration over last year, while the University of Texas will show a total of over 2,500 students at the Main University, in Austin, before the session is a month old.

The fact that new institutions of higher education are springing up every year or two and drawing immediately splendid patronage, while the old-established institutions are nevertheless increasing in enrollment, is taken by authorities at the University to mean that there is a steadily increasing demand for higher education in Texas.

Dr. A. C. Ellis, of the Extension Department, commenting upon this situation, said that Texas is simply repeating the experience of other states in this matter.

"Higher education," he said, "creates its own demand. Who had ever heard of the University of Illinois until the great University of Chicago was established? Both institutions grew up together much faster than either one would have grown alone.

"Millions upon millions of dollars have been invested in the University of Chicago, and it has flourished and is doing a great work, and yet the Legislature of Illinois last year appropriated \$5,000,000 for the University of Illinois, a record appropriation so far as state universities are concerned.

"California furnishes another example of a state university which began an era of splendid development with the establishment of another great university within the state's borders."

BARBED WIRE.

English Soldier Fears Wire Traps More Than Howitzer Shells or Rows of Machine Guns.

From The Dallas News Magazine. How often we hear of a superbly attack held up by barbed wire! Nothing

else stops men in the charge—no howitzer shells or rows of machine guns spitting death at 600 shots a minute, no rain of grenades and bombs, no walls of men in the German field gray. But storming parties do get trapped in that wire, which of all war's devices is the one that the English soldier fears.

Look at Neuve Chapelle—that awesome artillery battle in which living tombs were made of the enemy's trenches, blowing in his parapets, riving and rending the earth with truly volcanic shocks. Well, through a roll in the ground the British guns overlooked 200 yards of wire, and in the trench it screened was a desperate foe.

When the English Cameronians, heroes of Lucknow and Spion Kop, swept on, Colonel Bliss was aghast to come up against a perfect jungle of galvanized iron filaments; endless rows and strands, criss-crossed and savagely barbed; horizontal lines, perpendicular and oblique, the entire "trap" stiffened and stayed with side supports. There followed a tragedy in two dreadful acts.

There was no rushing this stuff, fence after fence of it, with men's bodies already asway like giant insects in a fabulous spider's web. The Cameronians stopped. Colonel and Adjutant dropped dead. The men behind them tore madly at the wire, snapped at it with their pliers, struck at it blindly with the butts of their guns, stamped on it until boots were slashed to ribbons and feet and legs wet with blood.

Value of Shells.

Meanwhile they were slaughtered. To tackle these horrible swinging wires they had to expose themselves completely. They went down in silent swaths. Only 150 of the Scots survived.

The second act of the tragedy was the advance of the Middlesex—the famous "Die-Hards," who were now to die indeed as the brave Cameronians had done. They, too, were held up. They also hacked at the wire, and hacked in vain.

They lay down at last with a deep lane of their own dead and dying behind them. "A sight so poignant," says one who was there, "that regiments following on broke down and cried before the bloody trail." But the Middlesex men managed to send back word to the guns, and lo! the earth shook with high-explosive salvoes; the horrible man-trap vanished like fog before a gale. You see what shells mean!

Barbed wire was first used on the big cattle ranches of Western America. Some of it was wolf-proof, and so protected the stock. From the United States it passed to South Africa, and enabled the Boers to fence vast grazing areas in a way never possible before. And when war broke out those slim guerrillas showed the British a new trick in military obstacles.

They laid trip wires in the long grass. These brought down the unsuspecting cavalry, and the cruel barbs tore the floundering horses, driving them to madness with pitiless laceration. The poor animals lashed out in frenzy, throwing other squadrons into hopeless confusion, and amid the welter Boer marksmen picked off the English with murderous ease.

Forest of Death.

In the Russo-Japanese and Balkan Wars barbed wire played a big part, although it was heavy to carry about. But the stuff has attained its full and frightful significance in the present upheaval. It is often electrified, as at Liege, where the heroic General Leman passed a current of 1,500 volts through his maize of strands—a perfect net of

shock and electrocution—which distant gunners sprayed with shrapnel till the trap was a shambles from which the stoutest-hearted turned away.

All manner of devices are now employed to deal with barbed wire. Pliers and cutters are not much use. Eighty per cent of the volunteers for this work never come back. Hooked javelins are thrown, with cables at the end, enabling the assailants to drag the wire away—a real "tug of war." Rockets, too, are used, with lines at-

ached for hauling.

But high-explosive shells, are, after all the best means of tearing wire away where it exists along a wide front and is deep and high—a forest of death which defies all valor, by reason of the hurricane of fire behind it, and the impossibility of tearing it down by hand and passing through.

An English physician has advanced the theory that the juices of the mouth are intended to keep the teeth clean,

not to prepare food for digestion, as generally believed.

Meat inspectors in Berlin are employing the motion picture camera in their work, enlarged photographs showing micro-organisms in motion if the meat be diseased.

A weighted sketching board, with which information can be dropped from an aeroplane without forcing it to alight, has been invented by a United States army private.

 The Library Committee suggests that the patrons of the library clip the lists of books that are published from time to time, so that when going or sending for a book they will know what books are on the shelves and can call by title or author as the books are catalogued.

The Health and Accident Policy is a peach. HOUSTON & WATSON. 2t.

The Presbyterian ladies most cordially invite all their friends to visit them at LONG'S DRUG STORE every day this week. They will be treated to something nice. 1t.

KERRIGAN'S AUTOBIOGRAPHY DONATED BY HIM TO LIBRARY.

Letter to Library Worker Tells of Summer's Work in Mountains of California for Universal Films.

J. Warren Kerrigan, the Universal star, has proved to be very popular with Plainview people on the screen. He has written a book, "How I Became a Successful Moving Picture Star." A copy of this book has been donated to the Plainview Public Library. Mrs. F. P. Powell has a letter from Mr. Kerrigan stating that he is sending the book to the library. In the letter he says:

"We are up here (Kamp Kerrigan, Tahoe City, Calif.) for the summer, doing a series of three-reel features and Western dramas, which I am in hopes will please and interest all my good friends in the great State of Texas. Since coming up here, we have finished 'Payment Received,' a two-reel Western drama, in which I am a rancher; 'A Night in the Pines,' a two-reel story, in which the main action takes place at and near a summer resort in the mountains, and 'The Code of the Mounted,' a three-reel feature, dealing with red-blooded men and women of the Far North and members of the Royal Northwest Mounted Police of Canada."

BAPTISTS TO HOLD "GET-TOGETHER" MEETING THURSDAY

The "Get-Together" social to be given at the Plainview Baptist Church Thursday night promises to be a very pleasant affair. It is arranged for the one hundred and thirty new members who have been taken into the church during the last few months.

There will be a good musical program offered. Different-colored ribbons will designate the old members, the new, the visitors, and those connected with Wayland Baptist College.

PUBLIC SCHOOL BOARD MEETS.

The Board of Trustees of the Plainview Independent School District met in regular session Monday night. Current bills were allowed and further transfers of students to relieve crowded conditions in some of the rooms were made.

ALL TRAINS INTO NEW ORLEANS ON SCHEDULE.

George D. Hunter, general passenger agent of the Texas and Pacific Lines, issued a statement Friday evening to the effect that the regular schedule of trains has again been resumed into New Orleans and that all trains are now reaching the Louisiana metropolis.

Dudley Kennedy, representing the West-Cullum Paper Co., of Dallas, was in Plainview yesterday on business.

Rev. B. H. Oxford and Mrs. Oxford and Irma were here from Hale Center today visiting relatives.

GRITTY GIRL SHOWS PLUCK IN ATTENDING TEXAS UNIVERSITY.

Says Fifteen Dollars a Month Is Enough to Keep Her in School.

UNIVERSITY OF TEXAS, Oct. 2.—"I shall stay in the University if I can make fifteen dollars a month. A girl can go to school and live on that amount if she is not extravagant." The statement was made this morning by a girl of nineteen who has come to "Texas" to take work in the School of Journalism.

"I have no home. I am from—just anywhere. I have worked first in one place, then in another, doing society stuff or whatever else the editors of small papers would give me. I had a job as cub reporter in San Antonio. That was the hardest work—eight in the morning till ten at night—but I love it."

The girl earns her board by doing housework for the family in which she stays. Her face and manner betray unusual refinement. She has taught school for a year, but is anxious to learn more about journalism.

"I use to think I could write, but I realize now that I don't know much. I have come to learn."

Although she has no money, the young "journalist" shows little anxiety about the future. She intends to do what typewriting she can get, and she hopes that the local papers may accept some of her work.

HEARIN PLEADS NOT GUILTY OF MURDER.

James E. Hearin pleaded not guilty when arraigned yesterday in the District Court for the murder of Elton W. McCaslin, a gate guard at the Panhandle State Fair. Henry Bishop, district attorney, read the indictment for murder.

A venire of 300 was ordered for the Hearin case, which will be tried October 28.

In the case of Frank Haggart, who was indicted for rape, a venire of 200 men was ordered. The case will be tried October 21.—Amarillo News.

COX HAS HOGS ON MARKET.

Jas. Cox shipped today a car load of South Plains hogs. They will be on the Fort Worth market tomorrow.

COPYRIGHT 1915 THE HOUSE OF KUPPENHEIMER

Get in the Game

Don't lag and drag behind the new fall procession—get right up in the forefront—dress the part of propriety, so that good fortune won't pass you by fearful lest she waste her time on someone who wont last long enough to enjoy her favor.

Just drop in boys, look over our fall stocks, ask us to show you the *Beaufort* or *Blake* models with a soft roll collar in a soft shade of brown or any other color to your liking. Pay anywhere between \$15 and \$35 and rest assured you have the correct thing, backed by our word to give you satisfaction or your money refunded.

Stadium Suits at \$15

Kuppenheimer Suits \$20 to \$35

Overcoats \$15 to \$40

A variety of clever styles in new fall hats, \$3 and \$4

Most shapes in new fall shoes and sizes to fit, \$4.50 to \$6

Tasty shirts, clever neckwear, winter underwear, sweater coats, and every other wearable that goes to make up a gentleman's wardrobe, now on display.
