

THE PLAINVIEW EVENING HERALD

TWICE-A-WEEK

VOLUME 27. NUMBER 36

PLAINVIEW, TEXAS, TUESDAY, MAY 9, 1916

FOUR ARE DEAD AS RESULT OF DRINKING POISON SUNDAY

Funeral of Paul Wallen Held This Afternoon—"Mug" Brock and Joe Dingler to Be Buried Tomorrow.

As the result of drinking a mixture alleged to contain denatured alcohol four men are dead and several others in a serious condition. It seems that a company of young fellows had been drinking in the barber shop which was recently opened by Paul Wallen, and a banter went the rounds to drink a mixture containing "Columbia Spirits," a lotion used in the shop. Several of the young men took drinks from the mixture.

Paul Wallen, proprietor of the new barber shop on the north side of the square, was the first to succumb. After having lain unconscious for several hours, medical aid was finally summoned for him yesterday afternoon. He was in a comatose state when aid arrived, and was removed from the barber shop to the Plainview Sanitarium, where he died shortly after arrival. Young Wallen was a minor, his age disabilities having been removed at the February term of District Court.

The second to succumb was Joe Dingler, who worked in the shop. He is a man of some forty-two years. Prior to coming to Plainview he was employed at Lockney. For a number of years his place of residence was Austin, Texas. He leaves two girls, one fifteen and one ten, and a thirteen-year-old boy. His wife died five years ago. His father, who lives at Carbon, Eastland County, Texas, wired this morning to hold the body until his arrival. He expects to be here in the morning. Dingler will be buried in the Plainview Cemetery.

The funeral service of Paul Wallen was held at the First Baptist Church this afternoon at 2:15 o'clock. Rev. I. E. Gates conducted the service. The body was conveyed overland to Hale Center following the service, and interment will be made there.

Murvin W. (Mug) Brock was the third victim of the tragedy. He is the son of Mr. and Mrs. W. L. Brock. Funeral services will be held over his body tomorrow morning. Details of the funeral have not yet been arranged.

It is stated this afternoon that several other young men of the town who drank the lotion are much excited, fearing that the poison will slowly take effect on them.

Tom Earnest, who died at three o'clock this afternoon, is the fourth victim of the poison.

SETH WARD COMMENCEMENT SERMON TO BE SUNDAY NIGHT

Senior Fine Arts Recital Will Be Held Friday at the Methodist Church.

The first of the Commencement Exercises of Seth Ward College will be the Senior Fine Arts Recital on Friday evening, May 12th at 8:30, at the Methodist Church.

Saturday morning the declamation services will be held at 10 o'clock and Saturday evening will be the Fine Arts Recital of the Junior Class.

The Commencement Sermon will be delivered Sunday evening at 8:30 by Rev. O. L. Moore.

President B. M. Johnson will address the literary societies on Monday morning at 10 o'clock.

The Oratorical Contest will be held Monday evening.

Tuesday morning, Rev. T. B. Haynie will address the graduating class and present the diplomas.

OFFICERS DETAINED PEDDLERS WHO HAD NOT PAID LICENSE.

Saturday morning John Vaughn, city marshal, and Deputy Sheriff Farris Frye detained three Armenian peddlers who had made a house-to-house canvass of Plainview without paying the license which is required by law. The party was taking the north-bound train when stopped. They paid the license and decided to remain and continue their work here.

Hugh L. Taylor, of Cisco, is in Plainview in the interest of a book on the life of his brother, the late Bob Taylor, of Tennessee.

SEMI-MONTHLY CLEAN-UP BY CITY IS EXPERIMENTAL

Will Be Permanent Service if the Cost Is Not Prohibitive—May Ask Co-operation.

The city's wagons are just finishing hauling away the trash which was piled out by the people following clean-up day a week ago. Mayor W. E. Risser states that splendid co-operation in the movement was given by the people.

Monday, being the fifteenth, the city will haul trash away free of charge. Since the fifteenth falls on Monday, trash may be placed in the alleys, if in proper receptacles, on Saturday.

"This plan of the city's to haul away trash which cannot be burned is experimental," said Mr. Risser this afternoon to a representative of The Herald. "If the city finds that it can be done economically it will be continued. If it cannot do this, then it is probable that an ordinance will be enacted which will give the council power to have trash hauled away and assess the cost against the property. But the other method is to be preferred."

"We would suggest," he continued, "that a receptacle of a permanent nature be made by each citizen and trash which cannot be burned, such as bottles, old cans, iron, etc, be placed in it. This should be of such size that one man can empty it into a wagon. Then the day before the first and the day before the fifteenth of each month these receptacles should be set out in the alley, and they will be removed. It is urgent that trash be placed in the receptacles. Cans should not be placed in the alleys loose, for the man who gathers it up cannot spend the time to clean there. It must be remembered that the whole town must be served, and aiding in this manner will mean much in making the plan a success. If it consumes too much time the cost will be high, and the city will have to give the plan up. It is hoped the people will help hold down the cost of this service so that it can be made permanent."

"There is an ordinance, which I am giving for publication in this issue, referring to sweeping trash, or throwing it in the alleys, streets, gutters, sewers, etc. This applies to paper, rags, boxes, etc., which should all be burned on the premises. In the business districts it is required that all receptacles for burning paper, rags, etc., shall have a lid, so that there will be least danger from fire spreading from the containers. This, too, would be a good precautionary measure in the residence districts."

PLAINVIEW CREAMERY HAS MOST MODERN EQUIPMENT.

Cold Storage Plant Has Capacity of Eight Tons—Is Sanitary.

The new equipment of the Plainview Creamery includes an eight-ton refrigerating machine. There is a machine which freezes the cream directly, using no ice, but the ammonia temperature-reducing plan of the ice manufacturing machines. A sanitary bottle washer, which automatically cleans bottles in a strong lye solution, rinsing them perfectly, has also been installed.

EXTENSION DEPARTMENT HEAD IS EXPECTED HERE TOMORROW.

Clarence Ousley, director of the Extension Service in Texas, is expected to be in Plainview Wednesday. The inauguration of a farm demonstrator in Hale and Floyd counties has caused this section to be the Mecca of many officials of the service.

ATTENDING ELK CONVENTION.

E. H. Perry, Harold Y. Hughes, M. D. Henderson and Mr. and Mrs. T. C. Shepard and child left Sunday for Dallas, where they will attend the State Convention of the B. P. O. Elk Lodge. Five thousands of the twenty-five thousand members of the order in Texas are expected to be in attendance.

Y. M. B. L. MEETS THURSDAY.

A regular meeting of the Young Men's Business League will be held Thursday evening, in the County Court room. The matter of a secretary for the league and other propositions of interest will be considered. The meeting is called for eight o'clock.

COLQUITT ADVOCATES LOANS BY GOVERNMENT ON LAND

Would Create Fund Out of National Land Sales and Put It Out at Low Rate.

O. B. Colquitt, candidate for nomination for United States Senator from Texas, this afternoon at two-thirty addressed a large crowd on the Citizens National Bank corner in the interest of his candidacy. J. M. Adams introduced the speaker.

On the prohibition question there has been no change in Mr. Colquitt's views. The same will apply to the question of nation-wide woman suffrage. "If I thought," said he, "the enjoyment of woman suffrage would elevate womankind I would be glad to give it. If we should advocate suffrage, then let it be by state. A national suffrage law would carry with it the necessity of a national regulation of elections. Both these amendments would surrender to the Federal government the police powers of the state applying to these questions." He cited Oklahoma, Kansas, Maine and others on State prohibition.

"We might as well elect a Czar or Kaiser and be done with it," he said in regard to bestowing on the Federal government the power to regulate suffrage and prohibition. "Take away from the State courts jurisdiction over prohibition and suffrage and deprive the citizen of trial in his home county and give it to the Federal District Court. Instead of having the sheriff and other county officers there would be individuals appointed by the Federal government. Then, too, the added expense to an individual to attend court would be a great factor against the plan proposed."

Speaking of rural credits and land loan banks he said: "Every class except producers of the nation's wealth out of the soil has been benefitted by congressional legislation. There have been laws enacted to help the banks, the merchant, labor organizations, capitalists, but none for the farmer. The platforms of the Democratic, Republican and progressive parties of 1912 demanded a remedy for the credit of the farmers. As yet Congress has done nothing. There are several bills pending but all fall short, in this way: all provide for corporation of capital stock. This is the wrong idea. Capital will not invest for five per cent. I suggest this kind of a land loan bank: More than \$600,000,000.00 have been paid into the United States Treasury from the sale of lands to homesteaders. Let this fund be used, and whatever may in the future accrue from sale of public lands, for the land loan bank. Lend the farmer the purchase price on thirty years' time at four per cent interest and two per cent annuum sinking fund. Ninety per cent of the German farmers own homes. This is one reason that Germany is able to resist two-thirds of the civilized world in the present European struggle. Enable every farmer to own his own home and you will not have to resort to forcible measures of recruiting. Every farmer will be a volunteer. He will not be fighting for the government at Washington, but for his own home. This is the best form of preparedness." For Texas, he advocates a re-loan of the public school fund of Texas to farmers on long time at low rate of interest. He advocates the distribution of government funds to cotton farmers.

ORIGINATOR OF TEXAS BOYS' AND GIRLS' CLUB WORK HERE.

In the interest of the Extension Department of the Texas A. & M. College and the U. S. Government, C. C. French has been in Plainview for the past two days. Mr. French has charge of the baby beef and pig clubs in Texas. For twelve years he was connected with the Fort Worth Stockyards Company, and he is rather generally credited for being the original exponent of the baby beef club work. Last October he became engaged in the work of the Extension Service.

A moving-picture film from the Extension Service will be shown in Plainview Saturday, May 13, at the Mae I. Theatre. Activity of boys in pig-club work is the theme of the film. All pig club boys will be admitted free at the 2:15 show, which will carry the regular program and the special film in addition. School children under twelve years of age will also be admitted free.

O. B. Jackson has sold his meat market to J. E. Green.

GERMAN NOTE APPARENTLY MEETS DEMANDS OF U. S.

Diplomatic Break Postponed, if Not Averted, Between Wilson and Kaiser.

WASHINGTON, May 7.—Germany's note has postponed, if it actually has not averted, a diplomatic break with the United States.

President Wilson will make the decision after he has read the official text, which reached the State Department Friday night.

It was stated authoritatively after the Cabinet meeting Friday that if the official text bore out the unofficial version transmitted in Berlin news dispatches, Germany's assurance undoubtedly would be accepted and before taking another step the United States would await the fulfillment of her latest promises. In such case the United States might not reply to the note, and would await evidence of the actual abandonment of Germany's present practices of submarine warfare. President Wilson is described by those close about him as being in a position where he can not question the good faith of Germany's assurances, which must stand or fall by the future conduct of her submarine commanders.

German Embassy View.

The German Embassy view is that the note gives all President Wilson asked for; that it signals a return to "cruiser warfare"—the use of submarines as regular naval cruisers intercepting commerce with visit and search—and that inasmuch as it makes no mention of the armed ship question, that perplexing feature of the controversy is not involved.

Cabinet members went over the unofficial text carefully with the President, and while they uniformly refused to discuss it, they reflected the view that a break had been averted; that Germany's new assurances would be accorded the test of time, notwithstanding the reference to the action Germany expects the United States to take against Great Britain's restraints of neutral trade. They express this view with full realization of the differences of opinion on what constitutes a peaceful merchant ship entitled to the protection of international law and of the President's steadfast determination not to permit the interests of the United States with one of the belligerents to become entangled with those of another.

The United States only recently, declaring its views on the rights of merchant ships on the high seas, recognized and provided for the condition under which Germany charges British merchant ships by orders of the British Admiralty actually are acting as naval war vessels in attacking submarines.

Liberty of Decision Reserved.

Germany in her note reserves "complete liberty of decision" should the United States fail to prevail upon Great Britain to bring her practices into conformity with international law. The official view is that the United States for some time has been and now is conducting diplomatic correspondence with Great Britain on that subject and that the success or failure of the negotiations and Germany's subsequent action must necessarily remain for the future.

The United States does not know how Germany's new instructions to submarine commanders compare with previous instructions which were given at the behest of President Wilson. Secretary Lansing stated today that it was possible the State Department might ask for official copies of the old orders.

The newest orders, however, apparently are regarded as meeting the President's demand for a declaration of abandonment of the present practices of submarine warfare. Officials seem agreed that the President's demand that Germany also "effect" such an abandonment only could be answered by time.

FIREMEN OFF TO STATE MEET.

Plainview Volunteer Firemen's Association is represented in New Braunfels, at the State Firemen's Convention, by Wylie Brashears, chief; Fred Cousineau, driver; Fay Garrison, as representative of the Hook and Ladder Company, and Curtis Westcott, as representative of the Hose Company. They will be away until May 12, the convention being called for May 9, 10 and 11.

SHROPSHIRE HAS ORDERS TO MOBILIZE COMPANY L, AT PLAINVIEW STATION

CAPTAIN SHROPSHIRE AND OTHER OFFICERS NOW EN ROUTE TO PLAINVIEW FROM CAMP MABRY, WHERE THEY WENT TO ATTEND OFFICERS' SCHOOL.

TEXAS, ARIZONA AND NEW MEXICO TROOPS CALLED

Order Follows Second Border Raid by Bandits, in Which Nine U. S. Cavalrymen Hold Seventy Mexicans at Bay Four Hours; Four Americans Dead.

AUSTIN, TEXAS, MAY 9.—PRESIDENT WILSON HAS AUTHORIZED CALLING OUT THE NATIONAL GUARD OF TEXAS, NEW MEXICO AND ARIZONA. THIS ACTION FOLLOWED A CONFERENCE BY TELEGRAM BETWEEN GENERAL FUNSTON AND GENERAL SCOTT AND WASHINGTON. THERE IS MUCH EXCITEMENT IN EL PASO, THE NEWS DISPATCHES FROM THAT POINT INDICATING FOR THE FIRST TIME SERIOUSLY THAT THE PEOPLE BELIEVE THERE IS DANGER PENDING. THERE IS NO EFFORT TO CONCEAL THE EXCITEMENT. ALL BORDER POINTS ARE EXCITED.

GEORGETOWN, Texas, May 9.—"Company L, Fourth Infantry, Texas National Guard, has been ordered out. Will be in on Wednesday morning train." is a copy of a telegram from Capt. L. O. Shropshire, who has been at Austin encamped at Camp Mabry at the school for officers of the Texas National Guard.

AMARILLO, Texas, May 9.—Captain John B. Golding has received orders from the Adjutant General to have Troop C, Texas National Guard, mobilized and to hold in readiness to move to a point to be designated later. He is ordered to collect all Federal supplies in Amarillo. He will be ready to move in the morning with a full complement of 150 men. The company has been drilling today.

A copy of the orders to Capt. Shropshire from Adjutant General Hutchins follows:
"Capt. L. O. Shropshire,
"Texas National Guard,
"Plainview, Texas.

"The President has directed mobilization of the Texas National Guard for service, having in view the possible further aggression upon the territory of the United States from Mexico and to properly protect the frontier. You are directed to assemble your company at home station at once and await further orders. Prepare all field equipment to accompany your command. Prepare all Federal and State property for shipment to a place to be later designated by the headquarters.

Alpine, Texas, May 7—Villa bandits, some seventy in number, forded the Rio Grande Friday night and, sweeping fifteen miles on American soil, raided the little settlement of Glenn Springs and attacked a detachment of American cavalry, consisting of nine men of Troop A of the Fourteenth Cavalry.

Three troopers and a little ten year old boy were killed, two cavalrymen were wounded and another one is missing. He is believed to be a prisoner of the bandits, who are now fleeing southward into Coahuila, Mexico.

Two American citizens, J. Deemer and a man named Compton, according to reports received here, were carried across the Rio Grande and reports have it that their throats have been cut. A posse of fifty citizens of Marathon tonight went into pursuit of the Villistas.

The dead troopers are:
WILLIAM COHEN, New York City.
STEPHEN J. COLOCK, New York City.

LAWRENCE K. ROGERS, Danville, Ky.

The missing troopers is Roscoe Tyree. The little boy was the son of Compton. He is deaf and dumb and

DR. McCLENDON TO SCHOOL FOR SANITATION OFFICERS.

Dr. and Mrs. E. F. McCleendon left yesterday for Galveston, where Dr. McCleendon will attend the school for sanitation officers of the Texas counties and cities. He goes as an official representative of the City of Plainview. Galveston is the old home of Dr. McCleendon. They will be there two weeks.

THREE CARS LIVESTOCK TO MARKET SATURDAY.

Saturday's livestock shipments were lighter than the usual run. Alex Anderson had two cars of cattle, which were consigned to the Wichita, Kans., market, and W. A. Watson had a load of hogs for Fort Worth. The shipments for the end of this week will be heavier, one shipper having spoken for twelve cars for cattle.

JONES ADDRESSES VOTERS.

Marvin H. Jones, candidate for Congress from this district, addressed the voters here Saturday afternoon. He returned Monday to his home, in Amarillo.

COUNTY BOARD OF EDUCATION TO MEET HERE MAY TWENTIETH.

A called meeting of the county board of education has been announced by Judge W. B. Lewis for May 20. At this time, in addition to routine business, the committee will probably authorize the creation of a new common school district, which will be formed in the territory in the extreme eastern portion of the county, directly north of the Callahan school lands. Members of the county board of education are S. W. Meharg, S. S. Stoneker, R. L. Hooper of Halfway, J. H. Hooker of Hale Center, A. S. J. Martin of Petersburg.

HOLDS QUARTERLY CONFERENCE FOR KRESS METHODIST CHURCH.

Rev. A. L. Moore, presiding elder of the Plainview District, conducted quarterly conference at the Methodist Church in Kress Monday. He preached twice Sunday for the pastor, Rev. L. G. Haggard.

A. A. Hatchell, of Paxton & Oswald's, left Sunday morning for Houston, where he will attend the State Embalmers' Association Convention, which convenes there May 8-9-10.

Motor News of General Interest

DECLARES SOLUTION OF MOTOR FUEL PROBLEM IS KEROSENE.

Professor Lucke, of Columbia, Says Only Permanent Relief Will Be Found in Use of the Heavier Oil.

Prof. Charles E. Lucke, head of the engineering department of Columbia University, says that instead of looking for more gasoline for motor fuel the line of development for the automobile industry and for the oil industry should be the introduction of the kerosene automobile.

"The first step in such a development," said Prof. Lucke, "would be the adoption of a satisfactory method or type of apparatus, and its design in a perfected form by a staff of engineers engaged for that purpose, and the acquisition of such patent rights as might be necessary to permit the manufacture and use of the accepted types of equipment for converting existing gasoline into kerosene automobiles.

"Considering the big gasoline market, which is the automobile field, and assuming that appliances can be made to use kerosene in the automobile engine, then the commercial development of these kerosene appliances is the logical thing to do. There are now large stocks of kerosene for which the demand is so small that the price is low. This kerosene is more widely distributed throughout the world than is gasoline. It can be obtained anywhere, and it is kept in stock everywhere. It can never be withdrawn from the market, because the same demands that originally were responsible for this perfect system of distribution still exist today, and will continue to exist, no matter how far improved distillation for increased gasoline yield may be carried.

"By the introduction of the kerosene-burning automobile an impression can be made on the situation of measurable magnitude immediately, because every gallon of kerosene so used is a sale for a product now difficult to sell, and to an equal degree reduces the demand on the now over-taxed gasoline market."

In regard to the mechanical problems involved, Prof. Lucke said:

"The question boils down in the final analysis to what can be done to make an automobile operate on kerosene, and whether or not the results of such operation can be regarded as satisfactory. This subject is one to which a good deal of attention has been devoted, but in very few cases has this attention been systematic or thorough enough to produce any generally accepted results, and in no case has it been organized. In most cases it has resulted only in a so-called kerosene carburetor, vaporizer, or in some other form of attachment offered to the car owner as a purchaser. In no case has there been any adoption of these kerosene devices or attachments by the big automobile manufacturers. While in many cases successful demonstrations have been made, it is nevertheless true that sufficient numbers of unsatisfactory results have been reported to constitute discouragement and give kerosene a bad name. It must be admitted, even if such devices were entirely satisfactory in use, the method of introduction by sale to car owners by makers whose only profit is to be derived by the selling price could never make an adequate impression on the industry as a whole.

"Some sort of organization must get behind such sales in order that they may be properly installed, and the installations should be sufficiently numerous to affect an appreciable percentage of automobiles in use.

"It is believed from a study of the situation that not only is the sale of such kerosene carburetors or vaporizers alone unable to make an adequate impression on the situation by reason of the method involved, independent of their perfection, but also this is not the right method on technical grounds, because a study of the situation indicates that a device of attachment alone will not suffice. On the contrary, it is equally important that the engine be suitable in certain respects, and the method of attachment and connection is just as important as the suitability of the engine and the goodness of the device proper, all of which means that the equipment, to give satisfactory results, must be installed with due regard to the requirements of the engine by men trained for the purpose and skilled in the work, directed by engineers, and, of course, in the employ of the oil men, at any rate at first.

"The methods proposed for utilizing kerosene in internal combustion engines of all sorts, including stationary as well as automobile and marine, may be divided into two general classes as to the manner of making the working mixture of vapor and air. In the first class, oil is injected by a pump directly into the cylinder, the mixture is made therein by maintaining suitable internal temperature and air-mixing means. In the second class the mixture is made external to the cylinder and is distributed from the point where

made to the several cylinders and introduced as a gaseous mixture.

"All injection systems are unsuitable for the automobile because the quantities of liquid required per stroke for the small cylinders in use are extremely small—only a few drops. At the high maximum and low minimum speeds at which automobile engines must operate in conjunction with the variable amounts of oil to meet the load conditions, the injection oil pump becomes almost hopeless mechanically, though many attempts have been made to force its introduction. This is particularly interesting in view of the fact that most stationary engines using this oil operate in this way, and these include all those engines known as Diesel and semi-Diesel and hot bulb, but normally these are constant-speed engines, operating at speeds that are comparatively low and having materially larger cylinders, so that the conditions are more suitable for pump use.

"In the class of externally made mixtures, the first successful oil engines were those often known as the English type of engine, in which measured and constant quantities of oil and air are led over heated surfaces on the way to the cylinder, the metal temperature being maintained either by a constantly burning torch or by the internal combustion itself. Practically all of these engines, operating in this way, have no graduated oil feed for varying loads, governing by missing instead, so their mixture-making parts can not be directly applied to engines of the automobile type. They have, however, demonstrated the complete and satisfactory vaporization of kerosene in the presence of air, passing over heated surfaces and without deposition of carbon, which is a common accomplishment of the injection type of engine with internal hot bulb or other form of hot surface.

"This class of stationary engine is ample practical evidence of the commercially successful operation of engines by the making of mixtures of kerosene and air externally to the cylinder, so it would seem as if such a plan might be adopted to the automobile engine. To do so there must be provided means for proportioning the air to the oil that will permit of graduating the total quantity per stroke, and some means of applying heat to the mixture from the exhaust gases, for example, that does not involve the maintenance of the continuously burning lamp nor an internally heated part."

Regarding the organization needed for the introduction of the kerosene automobile, Prof. Lucke said:

"While the kerosene car is not at the present date a commercial commodity in the sense that the gasoline car is, it is a reality in the experimental sense, and it needs only the same sort of mechanical perfection and commercial development that the gasoline equipment has received; in fact, very much less of the same order to make it a commercial reality. So simple, straightforward and clear are the steps to be taken that it is easily possible to complete them all within a period of six months with adequate working

force and shop facilities. This, however, must be provided and operated in conjunction with some large interests at present organized. These interests are the automobile manufacturers, on the one hand, and the oil men, on the other."

OVERLAND MAN SAYS LIGHT CAR BEST FOR VACATION TRIP.

With the season of the year approaching when people begin to plan their summer vacation trips, the old question of how and where to go is uppermost in the minds of thousands of motorists. The average car owner, because of the fact that he gets the greatest amount of pleasure and comfort out of his car in the summer time, hesitates about leaving it behind when he starts off to the mountains or seashore.

"The motor car, because of its ability to 'get there,' makes almost any kind of a vacation trip possible," says John N. Willys, president of The Willys-Overland Company, who has covered various parts of the United States, Canada and foreign countries by automobile. "Seashore, mountain, inland lake and rivers, all can be seen to the best advantage by the motor tourist who goes his own way and makes his own time without having to depend upon a railroad schedule or be bothered by the delays and inconveniences to which the average tourist is subjected.

"A small, light car is the type of machine preferred by many people plan to spend their vacations in the mountains. These smaller cars can travel over rough, hilly roads and get to and from places much easier than the big, heavy machines. In fact, the small, light car has every advantage over its big brother when it comes to mountain climbing. Its light weight enables it to get through soft, sandy spots where it would be folly to drive a big, cumbersome car.

"The same is true of rough and rocky roads. The light car threads its way over the bumps without difficulty.

"On hard macadam or asphalt pavement the big car is right at home, but out in the country along the highways and byways, where tourists most enjoy themselves, the small, light car has proved itself the most practical for general use. In addition to being out in the open air and taking in points of interest, the tourist finds traveling in a small, light car inexpensive.

"I'll venture to say that the majority of Overland owners who have spent their vacations touring about the country, have had more real enjoyment at less expense than would be possible had they undertaken any other kind of an outing."

For parcel-post purposes there has been invented a bag sewed to the bottom of which is a flat tag for address and stamp.

According to an official German test, networks of telephone wires over a city tend to diminish the danger from lightning.

WHERE?

Perhaps the washerlady whose mystification over a suit of pajamas is recorded is a relative of her fellow craftswoman new to our family who delivered the wash one day and said: "Say, does yer old man play in a band—or where does he wear them striped uniforms?"—Boston Herald.

LOST: Somewhere between Wayland College and town, a buggy cushion. Return to Herald office. 2t-pd.

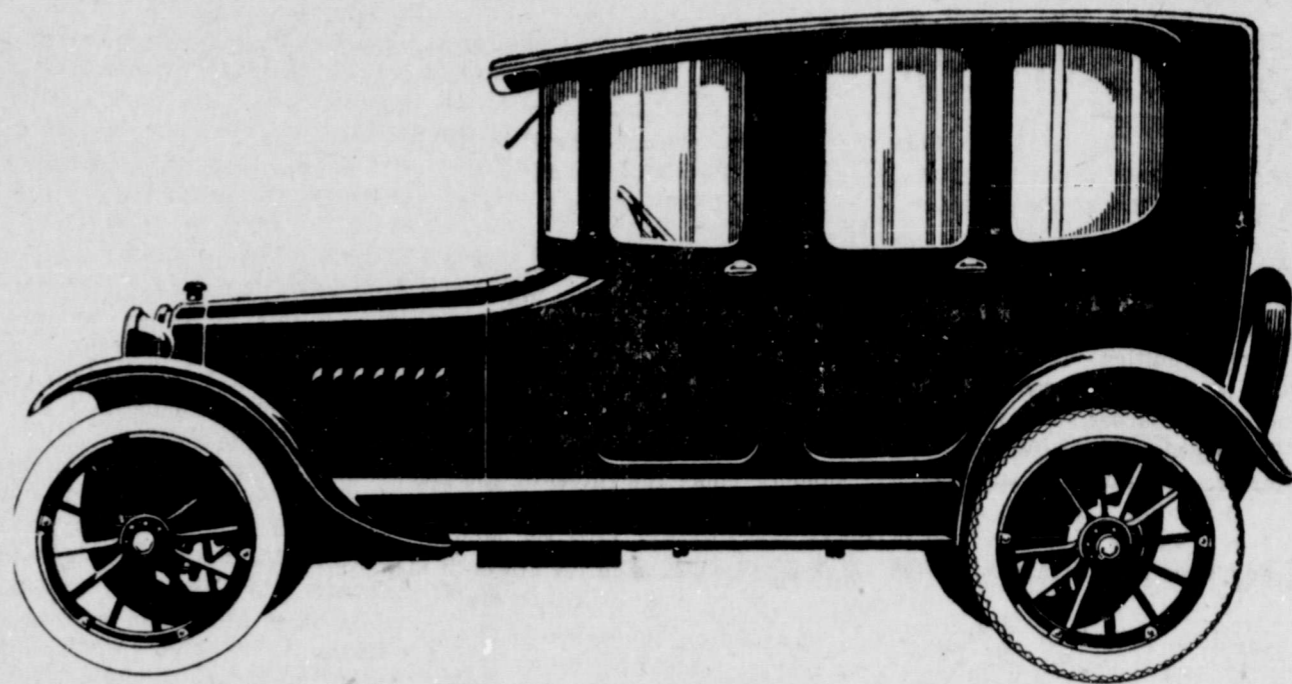

Willard
STORAGE BATTERY

See The Point?

The biggest argument for Willard Battery Service is the fact that it saves a lot of repairs that would be necessary otherwise. Let us show you.

THE T. M. CALDWELL CO.,
Amarillo, Texas.

Free inspection of any battery at any time

The Herald's Review of the Movies

At The Mae I Theatre Thursday will be shown "The Bubbles in the Glass." The play opens in a fashionable restaurant where Kenneth Rintool is giving a select dinner to Barbara Adams, his fiancee, and a few friends. Rintool refuses to accompany the party to the opera. He takes farewell of Barbara, saying that he has business to attend and later that night intends going on a journey. All through "Lohengrin," the girl is haunted by the sense that something is wrong with her fiancee. Rintool sits alone in the cafe over an almost empty bottle of champagne. He will sip that and then end it all. Ruined by his own extravagance, there is little for him to live for. The costly wine before him typifies his chief fault, and the few drops remaining

shall be his last. He pours it into a glass and the bubbles wink at him. "I mean no more to any living soul than one of these bubbles." He draws from his pocket the fatal powder and nerves himself to make the journey. A soft arm finds itself about his neck, pleading eyes and a sweet, imploring voice recalls him to himself. Barbara has slipped away from the opera and now she finds her fears justified. His money is gone, but health and love remain. When they are married she can help him fight his way back to fortune. Realization of his folly and of the suffering he would have caused to his loyal, loving woman sweep over Rintool. Seizing Barbara in his arms, he learns for the first time how love has the power to make a man live.

Another attraction at The Mae I. Thursday is a Falstaff Comedy, "The Optimistic Oriental Occults." Uncle August hated his many relatives and loved his money. He kept his keepers busy throwing the relatives from his grounds. The kinsmen refused to take the hint that they were not wanted. One day the relatives were summoned to the house and informed of the rich man's death. The absence of the funeral was explained by the statement that the late lamented had been amusing himself with a keg of dynamite and all that was found of him after the explosion was his will. The document provided for the division of the estate among the male relatives who joined the Optimistic Oriental Occults, a secret society which the deceased had been very fond of. They consented to join, and the initiation began at once, which was more severe than in most orders. Each relative was tightly packed in a potato barrel. Then the old man's voice was heard, and they knew him to still be alive. Uncle August confessed to his trick and then he set the potato barrels rolling down a steep hill, chased by yelping dogs. They never came back.

Thursday at The Ruby three 1916 releases are shown. "The Prisoner at the Bar," "When Lin Came Home" and "A Ready Made Maid." The first is a murder story, with the defense of home as the theme. The second is a human-interest drama; the third a farce, in which Billie Reeves dons skirts and hires out as a servant girl.

No. 13 of "The Red Circle" series comes to The Olympic Thursday. June Travis has been arrested and released on bail following the death of "Smiling Sam." "A Social Outcast" completes the day's program. This is a three-reel recent release; a political melodrama with a love interest interwoven. It is said that its development is artificial, but interesting.

Bud Duncan as the missing mummy in a film of that title is a part of a varied program at The Ruby Friday. A cartoon film, said to be very funny, and the animated weekly of current events led interest to this program, which closes with "Saved by a Song," a two-reel drama which shows the efforts of an ex-convict to lead a straight life.

"Bred in the Bone," a feature production in four acts, will be presented at The Mae I Friday, portraying the attractive star Dorothy Gish in filming a romance of the stage. Mutual Weekly No. 52 will also be shown at The Mae I. Friday. The third attraction for Friday is another Falstaff Comedy, "Hilda's Husky Helper." Hilda, a smiling young woman, performs wonderful feats of strength on the vaudeville stage. One day she meets Charlie, a meek little clerk, who pours out to her his tale of woe. Charlie is teased by his fellow employees and ignored by Marguerite, his sweetheart, who prefers big, boastful suitors. Hilda, being a kind-hearted woman, promises the clerk that the next night he shall work as her partner in the vaudeville act. Next evening Charlie's sweetheart and the whole staff visit the theatre to laugh at Charlie. They go away considerably sobered. Heavy shackles are placed on the wrists of the clerk. He rends then in twain with a single twist. He brandishes loaded clubs and supports on his shoulders Hilda, two big men and several weights. The audience does not know that the vaudeville star and the two men are suspended from the ceiling and that the weights are of wood. Next day the clerk has a very different reception at the office.

"To Have and to Hold," at The Olympic Friday, should lose none of the thrilling interest felt in the book when it first made its appearance. The film, in five reels, is reviewed by Peter Milne in The Motion Picture News as follows: "When it comes to the point where the story, the acting, the direction and the production are inseparable; when it is impossible to tell where the merits of one begins and the other ends; when one can hardly start to diagnose any of these essentials without dragging in the other three—then the logical and correct way out of such a predicament is to place the picture on one of those selected lists we hear so much about, and the 'selected' in the case can be defined as just about the height of perfection. All this directly applicable to "To Have and to Hold." "It is a lavish and spectacular picture, but there is an immense personal and romantic interest; there is a star, and a real one—Mae Murray—and the supporting cast is of uniform favor and ability.

"The scenario by Margaret Turnbull was based on Mary Johnson's widely read, romantic novel of the same title. It is laid in the early colonial days in Virginia, and is full of the dash and daring, the sword play and the romance of those delightful times.

"The story is full of adventure and overruns with attractive romance. The plot moves swiftly; there is suspense and interest aplenty."

Saturday The Mae I. Theatre will offer the "Hills of Gloria." Justus McCanna, a popular young physician, is attracted to Bettina Purdy, favored by his mother and sister. A telegram from an intimate friend who has been injured in a train wreck takes him to Kentucky. There Matt Sipe, a young mountaineer, hears of Dr. McCanna's skill, and begs him to go with him to see his sick mother. McCanna does his best for Mrs. Sipe. The second day he meets Cherry Blossom, a beautiful mountaineer girl, beloved by Matt. Cherry and Justus fall in love. Matt follows the doctor to a gully and rolls a rock down on him. Cherry hears the crash and rushes to the spot. She helps her stricken lover to her cabin. Justus, believing that he is dying, insists that he and Cherry be married at once, and the ceremony is performed. But his wife nurses him back to health. His love steadily deepened for Cherry, and he devotes much time to educating her. He is called by his mother to Brooklyn. Justus assures his wife that he will soon return. Meanwhile a son is born to Cherry, and as soon as she is strong enough she goes to Brooklyn and finds the home of her mother-in-law. Mrs. McCanna and daughter pity the mountain wife. Cherry goes back to the hills without seeing Justus. Matt presses his attention upon her, and she defends herself with a shotgun. Justus learns from his mother of her visit, and he hurries South. He barely arrives in time to save his wife and son from Matt, who has returned to kill the son and take the woman as his own. "Billy Van Deusen's Shadow," a Beauty Comedy, will be shown at The Mae I. Saturday. Billy, a tennis enthusiast, sends one of his wild returns through the plateglass window of the home of Mrs. Smudge. Billy calls to reclaim his ball, and finds Mrs. Smudge and her daughter Flora very indignant, but when he presents his card and they recognize him as one of the Four Hundred they become exceedingly gracious, for they are social climbers. Billy calls again, and at last he and Flora are engaged. One day Flora sees from her window a young man flirting with a pretty girl. In no happy humor, she enters a cafe with her mother. Both are horrified when they see Billy in waiter's garb, as they suppose, serving the dinners. Flora watches Hans, the waiter, closely, and he, encouraged, chucks Miss Smudge under the chin. At this point the real Billy enters. He is unaware that the world hold a double of himself. Billy makes for the table where Flora and her mother are sitting. The manager thinks that Billy is Hanks coming back by the front door. The young society catch is roughly handled. Next day he goes to the Smudges' home in the hopes of straightening out the mix-up. But the mother and daughter have moved, erasing all traces of their exodus. Also a Cub Comedy is offered on Saturday, "Jerry in the Movies."

Billy Ritchie in a horse-race farce entitled "False Friends and Fire Alarms," opens Saturday's program at The Olympic. The big feature of this day's program is, of course, the next episode of "The Strange Case of Mary Page." This number is sub-titled "The Mark." The mass of evidence submitted at the trial during the fourth episode of the story is along new channels and of great interest. The motive for Mary's hatred of the murdered man is shown. Her father, after forging David Pollock's name to a check, promises to use his influence with Mary in Pollock's behalf if he (Pollock) will not prosecute him. In order to save her father from prison, Mary consents to dismiss Langdon and accept Pollock.

Another important fact is brought out. Mr. Page is addicted to liquor, and while under its influence goes into paroxysms of rage. Just before Mary's birth, he returned home one night, maddened with drink, and began to abuse his wife. When the child was born the print of a hand showed on her left shoulder, and, in after life, she was subject to violent outbursts of temper. Another important point: Mr. Page assaulted his wife shortly before the murder, and Mary flew to her rescue. As her father seized her by the left shoulder she became dazed, acting in the same manner as when found by the reporter at the police station. It is also shown in this episode that she was overheard declaring to Pollock that she could kill him! With such highly spiced food for reflection, the spectator's interest in Mary's fate becomes stronger than ever.

The acting of Edna Mayo, Henry B. Walthall, Sydney Ainsworth, Harry Dunkinson, Thomas Cumberford and their associates, and the work of Director J. Charles Hayden are sustained at the same high level that marked their efforts in the opening episode.

A rather weak tale of the Northwest, "Sunlight and Shadow," finishes this day's offerings.

RUBY

"ALWAYS A GOOD SHOW"

THURSDAY.

"THE PRISONER AT THE BAR"

A three-part Essanay drama, with Darwin Karr and Warda Howard.

Lesson No. 26 is About Salads By Mrs. J. L. Landrum

Our last lesson was on vegetables and vegetable cookery, so I shall give you a lesson on salads, which are very healthful and make very attractive dishes.

There are many plants or parts of plants that may be eaten raw, the most important being the fresh green vegetables, such as lettuce, cabbage and celery. Such vegetables are generally relished and form a part of the diet wherever they can be obtained.

For the present purpose such vegetables may be called salad plants; but it is difficult to make an exact classification, because so many of these plants are used in other ways than as salads, and because salads are often made of cooked vegetables, meats, etc. Peas, beans, potatoes and vegetables such as spinach, which are most commonly served as "vegetables," are often put into salads. Some roots, as radishes, are also very commonly used raw as salads.

Originally the word salad referred to a green plant rather than to a dish prepared from the plant, and its derivation indicates that it meant one which was to be eaten with salt. Now it is applied to a dish served cold with a dressing which always contains vinegar or other acid and usually some kind of oil or fat, and salt, pepper, or other seasoning. The basis of the salad may be vegetables, either raw or cooked, fruit, nuts, eggs, meat or fish—in fact, almost any material or combination of materials of suitable flavor and consistency and the dressing may be simple or elaborate. Many housekeepers in search of novelties make up many curious combinations, not realizing that the most satisfactory salads are usually the simplest, and they forget that fresh cucumbers served with oil and vinegar, or the "greens" left over from dinner and served with vinegar at supper, are just as truly salads as elaborate combinations of all sorts of fruits and nuts and mayonnaise dressing. The fact, too, that small quantities of different materials can be easily combined to make an attractive salad, shows that it is often an economical and sensible dish.

Returning to the vegetables which can be used raw in salads, that is, the salad plants, they are valuable because their freshness and attractive appearance arouse an appetite for the more substantial materials served with them. Moreover, in this shape the body gets all the iron, calcium and other mineral constituents present, and also vitamins, as certain substances are termed which are needed in at least small amounts for normal growth and health, and which may be partly lost or perhaps rendered less useful by cooking. Aside from any question of medicinal value, such plants help to make the diet attractive and give a relish to food, particularly in the spring, when one is tired of the limited variety of the winter table.

It is a very common custom to combine fat with salad plants, fresh or cooked. Fat is a compact food and, weight for weight, is about two and a quarter times as valuable as protein or carbohydrate for fuel in the human body. A tablespoonful of oil would go farther toward supplying energy for keeping the human machinery running than a large head of lettuce. The world over people have instinctively added a condensed dressing consisting mainly of fat (oil, bacon fat or cream) to the salad plants with

meat and bread, which supply protein and carbohydrates.

Lettuce is the principal salad plant for use alone and in combination with other foods. The heart of cabbage combined with other materials is especially good. For instance, combine it with raw apples, pears, radishes or canned fruit, such as pears cut in slices or cubes.

A good salad dressing to use with a combination of vegetables is highly recommended by Farmers' Bulletin No. 712 of the U. S. Department of Agriculture:

One-half teaspoon salt; 2 table-spoons vinegar; few grains cayenne; 6 table-spoons oil (olive, cottonseed; peanut or other).

Mix the ingredients and beat them until they are well mixed.

Cooked Dressing.

Three eggs; 1/2 cup vinegar; 1/2 cup water; butter size of hen egg; a little sugar, salt to taste and pinch of cayenne.

Beat the eggs slightly, add other ingredients and place in a double boiler. Cook until the consistency of cream.

Should you have a little cream to spare, either sweet or sour, whip this and add the dressing when cold.

San Antonio District Convention.

AUSTIN, Texas, May 6.—Dear Club Girls: I will have to tell you about the district convention we held in San Antonio last Friday and Saturday before we take up any other news in this club letter.

There were delegates from Nueces, Cameron, Medina, Bexar and Uvalde counties. They enjoyed all of the convention proceedings and the crowds on the streets. We watched the battle of flowers and the parade with much interest, and the gorgeous floats were much admired. I am sure the girls of the convention have told all their friends about the delightful bacon fry we had in the park and the kindness of the Boy Scouts in assisting us in building camp fires and broiling the bacon. The reception at the lovely Brackenridge home was the culmination of the convention pleasures.

We will have a convention of Collin County clubs next week, and then we will begin to get ready for our canning. Now let us not wait too long to get busy with our plans and canning. Some of the girls are writing me of their intention to can 24 quarts each. I have asked that every girl can 14 quarts in the old clubs and at least 10 quarts in the new clubs before the season is over. I don't mind how much more you can, but let us do that much, at least.

I will be in Houston this week, and will plan and prepare a number of lessons for you. I wonder how many tried the tomato soup and how it came out. That is one of the most delicate of soups and the hardest to make nicely.

I have received so many letters from girls, asking for receipts for biscuits, croquettes and scalloped dishes. These being so numerous, I will have to devote an article solely to receipts in answer to the many requests. I will try to prepare this for next week's issue.

We are now getting ready for the State Farmers' Institute, which is to be held in Austin, July 17, 18 and 19. The Girls' Home Economic Clubs are a division of the Farmers' Institute, and are entitled to the same privileges. With this week's lesson I am

sending you your blank form upon which to enter the names of your delegates. Be very sure to send the post office address of each delegate with her name. Do not delay sending in these forms now, girls, and those of you who have not elected your delegates call a meeting and do so at once.

No, let us hear from you, especially if you don't understand about club matters.

Cordially yours,

MRS. J. L. LANDRUM.

(State Senator)

H. L. DARWIN.

of Delta County

Candidate for

CONGRESSMAN-AT-LARGE Subject to Democratic Primary Election, July 22, 1916.

Your support earnestly solicited.

MY PLATFORM:

I am for Woodrow Wilson for President; I favor Rural Credits, Marketing Bureau, Government aid to Good Roads, Organized Labor, Public Health, Preparedness, Prohibition Flood Control, Levy and Drainage, Improvements of Harbors and worthy Waterways, Competitive Cattle Market, Merchant Marine, and oppose "Pork Barrel" appropriations of every nature.

Yours to serve,

H. L. DARWIN.

Resolutions adopted at Cooper, Texas, March 18th, 1916, at the organization of the Darwin Club:

"Whereas, Senator H. L. Darwin of Delta County is a candidate for Congressman-at-Large in the July Primary, and we, the voters and Democrats of Delta County, know his qualifications to be in every way such as to enable him to make a valuable Representative in Congress; therefore,

"We commend his candidacy to every Democrat in Texas, because he represents the best interest of all Texas, and Texas will be ably and favorably represented in his election. He is broad-minded, liberal and fair in all things.

"He is a graduate of the University of Texas, and the East Texas Normal College. He has represented the Second Senatorial District in the Texas Senate for the past four years, and was an able and conscientious member. Was prominent in advocating Workman's Compensation Act, "Blue Sky Law," Compulsory Education, Good Roads, Levy and Drainage, Property Rights of Married Women, Labor Legislation, Warehouse and Marketing Law, Rural Credits, Pure Seed Bill, Public Health, and opposed useless expenditure of Public funds of every nature. He was loyal to the best interest of the State, whether North, East, South or West, and no section appealed to him in vain when its best interests were involved.

"Senator H. L. Darwin possesses the highest educational training, which, combined with his native ability, energy and courage, will enable him to render valuable service in Congress. He represents the best the State affords in a personal, political and industrial way.

"Therefore, we urge all Democrats in Texas to support Senator H. L. Darwin of Delta County for Congressman-at-Large."

Resolution No. 2.

"We, the Farmers of Delta County, recommend Senator H. L. Darwin to the voters of Texas for their support. "He was raised on a farm in Delta County, and now owns and operates a farm in this county. He has equipped himself with the best education the State affords. As a member of the State Senate he was a supporter of better agriculture, better marketing, better roads, better schools and better public health. He is an active member of the State Corn Growers' Association, the Farmers' Institute, and Farmers' Union. He is one of those who is working to better the condition of the farming interest in every way.

"He will make an efficient Congressman, and we recommend him as one of our number to every farmer and voter in Texas. The business interests will be ably and fairly represented in his election, and the producing class will have one of their number in Congress and one who will faithfully render a service to the State and Nation."

Respectfully submitted, W. S. Miller, W. White, Jack Lemmons, G. Skeen, Arch Hendrix, J. W. Russell, and 800 others.

(Political advertisement.)

MRS. LANDRUM WRITES TO GIRLS OF THE SOUTH PLAINS.

STATE DEPARTMENT OF AGRICULTURE, Austin, Texas.—Dear Girls of the South Plains District: I have received so many lovely letters from my club girls from your district I know I never will be able to answer them individually, so must ask you to accept this club letter as yours and in answer to your questions and reports sent in.

The McWhorter School Club has sent in a good report and has sent me a number of answers to questions issued on the subjects taken up in their lessons. Eula Sharp knows how to furnish a kitchen nicely and how to have a conveniently equipped table; Gladys Keasey sent answers to several questions covering the essential planning of a convenient kitchen—how cleanliness might be secured in the kitchen through the furnishings; the advantage of using the cake and bread mixer over the hand method of beating and mixing; the cost of kitchen equipment; dishwashing; and has sent us a good receipt for biscuit. I wish we could publish each of these, but our department space won't permit that.

Gladys Keasey, of McWhorter School, tried the tomato-soup receipt and had splendid success with it. This club is planning to give an entertainment soon and intends buying more library books with the money.

Mildred Landis, of Plainview, tried the Parker House rolls, and says they are splendid. She gave a very good baking-powder biscuit receipt. Sometime when I can I am going to publish a lot of these receipts.

Fay Marlin, of the East Mound School, sent in a good letter, stating they were going to give a box supper May 6. They have elected two delegates to the State Convention to be held in Austin in July.

Miss Laura Wimberly, of Lakeview School, has made good report of the work of that club, and expects to send in others very soon.

Allie Mae Hooper, secretary of the Runningwater Club, reports that club is meeting twice a week, trying to catch up with the club lessons. They will soon be up with the other clubs. They are going to give a play in May to make money for building sidewalks around their school. This is a splendid cause, and is worthy the support and patronage of the entire community.

Petersburg sends in a list of new officers. I think the girls did not understand that the officers elected are

for one year. One or two of our clubs thought they were to elect officers every month. This is a mistake. They have sent in the names of their delegates who are to attend the State Convention in Austin during July.

Miss Amy Eubanks, president of the Senior Economics Club, Hale Center, made a good report this month of the work of that club.

On yesterday I sent you the lesson for the week and blank upon which to report your delegates. Fill this out, girls, whether or not you have sent in your list before. Be sure to give full post office address with the names.

With love to every club member, and hoping you will all write again,

Sincerely yours,

MRS. J. L. LANDRUM.

Screen Doors

We have a very fine selection of screen doors made of white pine which is the best screen door on the market. Call and let us show these doors before you buy elsewhere. Now is the time to screen before the flies get into your house. See us for anything in the building line.

THIRD NATIONAL BANK
PLAINVIEW, TEXAS

KANSAS CITY STOCK MARKET IN DETAIL.

KANSAS CITY STOCK YARDS, May 5.—Cattle trade revived slightly Thursday, and some sales of steers were reported as high as Monday, which was the high day of the year on all grades. It has been a run of beef this way, total receipts two thousand greater than last week, and outgo of stockers and feeders one thousand less, but demand has been ample, and prices steady except for some weakness on steers Tuesday and Wednesday, and on butcher grades Wednesday.

Native steers reached \$9.60 this week, and bulk of the steers sell at \$8.50 to \$9.25, dogies and short-fed steers \$8.00 to \$8.50. About 100 cars of Western pulp-fed steers have been here, most of them Monday, the high day, and sales were mostly at \$8.90 to \$9.40, these including 7 cars of Idaho pulpers at \$9.00. Pulp-fed cattle are mighty popular with buyers here, as they have been kept on feed longer than usual this year, and all of them are choice to prime finished.

Quarantine arrivals are a disappointment as to volume, only a few loads here this week, medium steers selling at \$8.50 to \$8.90, light steers \$8.15 to \$8.50.

Best heavy cows bring \$8.35, and heifers sold up to \$9.50, baby heeves worth up to \$10.00, veals \$10.50.

Stockers and feeders range from \$7.50 to \$8.50, with choice to prime steers for feeding or grazing upwards to \$9.00, and breeding stock cows and heifers \$6.25 to \$8.00, fancy heifer calves and yearlings \$9.00.

Hog receipts show a gain of 5,000 head over last week, and prices have held up pretty well, average for the week highest this year, and the close today strong to 5 cents higher, top \$9.87½, bulk \$9.60 to \$9.85, light weights up to \$9.77½. Receipts are 4,700 today, and the total for the week has been insufficient for the demand. Packers have been aggressive bidders all week, taking heavy hogs at a premium over butcher weights, because of improved lard prospects. Fresh

pork also goes into distributive channels promptly, and the hog market is on a healthy basis, fluctuations being of small degree, and quickly remedied. Receipts at all market centers have been considerably heavier this week, but the week closes with all hands hungry for hogs.

Sheep and lambs are a quarter higher this week, goats also selling better, especially Angora brushers. Fed lambs sell mostly at \$11.40 to \$11.60, choice spring lambs worth up to \$12, clipped lambs \$9.25 to \$9.85. Texas clipped wethers this week at \$7.85, though not of first grade, killing goats \$5.35 to \$5.75, Angora brushers \$5.15 to \$5.60, Spanish brushers \$4.00 to \$4.75. Total receipts this week 37,000, of which 8,500 were goats.

J. A. RICKART,
Market Correspondent.

WHAT IS THE HOG-POWER OF YOUR FEED GRINDER?

How Swine Grind Their Own Feed and Apply Vermicide By Mechanical Contrivances.

An amusing sight can be witnessed on some of the large farms, where hogs in large quantities are raised, in the South and West, says Popular Science Monthly. Large vertical galvanized iron cylinders may be seen to revolve in the big pens, while the hogs, in numbers of ten or twelve at a time, trot busily around a cylinder, always in the same direction and sometimes at a speed nearly approaching a gallop. At first blush this procedure may seem like a recreation. But the hogs are not playing at some new game; they are preparing their meal of ground grain, and the hog that is too lazy to trot and grind goes hungry.

In the upper part of this revolving cylinder is a hopper or compartment into which the grain is poured. When the cylinder is revolved, a grinding mechanism chops the grain into fine particles suited to the palate of a well-bred hog. To secure this prepared grain the hogs must supply the motive power for grinding; and they supply

it—with their snouts. A ring-like trough is attached to the bottom of the cylinder. Short wooden paddles project from the edge of the tank into the trough, and when pressure is applied to them they revolve the tank, grinding the grain, so that it flows in equal amounts into the spaces between the paddles. This grain feeder is virtually a "one-hog-power" machine, as one energetic hog can revolve it.

Again, if you ever see a number of hogs pushing and postling about a small device standing in the middle of a hog pen, the object of their attentions may well be an apparatus which makes the hogs work to rid themselves of vermin, instead of forcing the farmer to spend weary hours spraying them with an insecticide.

The device consists of a steel roller set in a receptacle which is partially filled with an oily insecticide. The pigs find that when the vermin are troubling them it is only necessary to rub against the roller to end the trouble.

The appreciation of the hogs for these modern conveniences is absurdly comical in its actual working out, but these and similar hog inventions have done as much to make farming profitable in these modern days as many of the much more pretentious machines. The hog pen takes up the slack end of the farm, and any devices which make them need less attention are vitally important. These appliances come the nearest to making hogs work of anything yet discovered.

TOO MUCH.

"Why must you always go out every time one of my women friends calls?"

"Well, my dear," responded her husband, "I am glad to meet your friends. But you must remember that I have heard the story of your Atlantic City trip about seventeen times now."—Indianapolis Star.

For carrying a baby, a California inventor has patented a sling supported by straps around a parent's shoulders and chest.

PRINCE ALBERT
the national joy smoke

YOU'LL find a cheery howdy-do on top no matter how much of a stranger you are in the neck of the woods you drop into. For Prince Albert is right there—at the first place you pass that sells tobacco! The tippy red bag sells for a nickel and the tidy red tin for a dime; then there's the handsome pound and half-pound tin humidors and the pound crystal-glass humidors with sponge-moistener top that keeps the tobacco in such bang-up trim all-the-time!

in goodness and in pipe satisfaction is all we or its enthusiastic friends ever claimed for it!

It answers every smoke desire you or any other man ever had! It is so cool and fragrant and appealing to your smokeappetite that you will get chummy with it in a mighty short time!

Will you invest 5c or 10c to prove out our say-so on the national joy smoke?

R. J. REYNOLDS TOBACCO CO., Winston-Salem, N. C.

Prince Albert gives smokers such delight, because

- its flavor is so different and so delightfully good;
- it can't bite your tongue;
- it can't parch your throat;
- you can smoke it as long and as hard as you like without any comeback but real tobacco happiness!

On the reverse side of every Prince Albert package you will read:

"PROCESS PATENTED JULY 30th, 1907"

That means to you a lot of tobacco enjoyment. Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

Phones 233 and 234

What is the Reason for 250 per cent Increase in Our Business?

The old saying is that goods well bought are half sold. We can go farther than that, ours are exceptionally well bought. Our purchaser is a factory representative with years of experience.

Our goods must be good goods, bought right and sold right, with the confidence of the individual customer behind the purchase, for us to have made anything like the remarkable increase of 250 per cent.

We are today unloading TWO BIG CARLOADS direct from leading factories. Another is rolling. We have received three other cars since January 1st—making six cars so far this year. These heavy shipments added to our already large stock make ours the biggest and most complete stock of house furnishings on the South Plains.

Don't chase rainbows—come and look where every dollar buys a hundred cents worth of value.

"IF IT ISN'T GOOD WE MAKE IT GOOD"

The Plainview Evening Herald
TWICE-A-WEEK

—Published Every Tuesday and Friday Evening by—
THE HERALD PUBLISHING COMPANY,
Corner Broadway and Second Sts.

HERBERT S. HILBURN, Editor E. B. MILLER, Business Manager

Entered as second class mail matter July 1, 1914, at the Post Office at Plainview, Texas, under the act of March 3, 1879

\$1.50 a Year; 75c, 6 Months. Advertising Rates on Application.

Livestock will place a new farm over the old one.

Texas producers lose annually, in round numbers, \$1,000,000 from bad eggs. This is about twelve or fifteen per cent of the total production. It is stated by the State Pure Food and Drugs Commissioner that much of this loss can be prevented by producing infertile eggs.

A QUESTION OF EXPEDIENCY.

Saturday the people of Hale County are to determine at the polls whether they desire a county superintendent of public instruction. As had been previously stated, that service is now being performed by County Judge W. B. Lewis, as ex-officio superintendent, under whose direction the schools of Hale County have progressed.

It is to be remembered that the independent school districts receive little benefit from a county superintendent. His duties are more with the common school districts. Thus he would be of only indirect benefit to Plainview and Hale Center schools and, in case Petersburg common school district is changed to an independent school district, to that school.

About half the scholastic population of Hale County is in the independent school districts. It is a question of whether it is expedient to employ a county superintendent at a salary of \$1,200, when the work is now being done for \$300. The salary is taken from the county available school fund, which, when diminished, gives that much less for the common school instructor. If the benefit to be derived from the county superintendent is worth \$900 more than that which would accrue from the services of the county judge, then Hale County should have the regular superintendent.

And that depends entirely upon the character of man employed for the position. Unless there can be some assurance given the people that a teacher of thorough practical experience, and of considerable executive ability will be appointed by the commissioners' court, Hale County would do well to wait until the time when the county scholastic population will have increased to three thousand, which will allow the payment of a salary of \$1,400 instead of \$1,200. Men are engaged in the teaching profession largely because they like the work and are anxious to serve society, but the salary received for a given service is a consideration, and justly so; for wherein will the payment of a good salary decrease the service he can give society? On the contrary, he has more means at his disposal, which should make him more efficient.

There is such a thing as paying too little salary. An efficient man wants a just recompense for his services, and is entitled to it.

It is largely a question of expediency. If at this time a county superintendent will mean more practical efficiency for the schools of the common districts of Hale County, the people should place the stamp of approval on the measure by voting for it Saturday. If the schools will not be benefited in a measure justifying the expenditure of \$5.7 cents per capita for the rural school children of the county, an increase over the present expenditure for that service of 64.3 cents per capita, the measure should be voted down.

A SHORTAGE IN MEERSCHAUM.

Shortage in many materials has been felt in America on account of the war. If the color or shade of the smoker's pipe were of as much moment as the hue of milady's spring costume the possible shortage in the meerschaum market might have attracted as much attention in America since the beginning of the war as has the shortage of aniline dyes; for the main source of supply of this earthy mineral is in the zone of hostilities. The National Geographic Society, which, incidentally, offers some of the most interesting articles on geographic study available, with headquarters at Washington, in a bulletin recently published gives the following interesting facts about the meerschaum mines of Eski-sehr, the Moslem city of 20,000, which lies 200 miles south of Constantinople on the banks of the Prusak Su, in Asia Minor:

"Meerschaum, which derives its name from the fact that particles of it were discovered floating on the Black Sea, giving rise to the belief that it was petrified sea-foam, has been dug from the alluvial deposits in the plains near Eski-sehr for a thousand years. Some of the meerschaum beds, located about eighteen miles from the city, have as many as 2,000 openings. Here 400 Kurds and Persians, in groups of from three to fifteen, burrow through yard-wide holes to depths of from 20 to 200 feet, working day and night under the flickering light of oil lamps. The lumps of mineral clay which they seek are commercially valuable in nodules as small as a hazel nut, while occasionally pieces as large as apples are found.

"When the meerschaum is first brought to the surface it has a grayish or yellowish tinge, and is so soft that it can be scraped with a knife. In the summer it is left to dry in the sun, but in the winter it is placed in ovens, where it is subjected to a steady temperature for nine days, when it becomes snow white and loses two-thirds of its weight. After being rubbed with flannel and polished with wax it is wrapped in cotton and sent to Austria or America, to be resoled in water until it is so soft that it can be cut like cheese, after which it is sawn into convenient pipe shape, elaborately carved if desired, and fitted with amber stems from Germany. Before the war the value of Eski-sehr's meerschaum exports was more than \$1,300,000 annually.

"Even the most aesthetically inclined of our American millionaires would hardly consider the luxury of living in a palace built of meerschaum as within the range of their fortunes, yet there are many unpretentious houses of this material in the Spanish town of Valecas, near Madrid, where a coarse variety of this substance is to be found. On the other hand, the Moroccans, just across the Straits of Gibraltar, find that still another variety of meerschaum lathers freely, and they use it, perhaps sparingly, as a substitute for soap.

"The chips and sawdust of the meerschaum pipe factories make an excellent cleansing powder for removing stains from costly fabrics. An inferior pipe is also made from these scraps, the fragments being bound together with some solution and then molded into blocks.

"Meerschaum is found in Greece and in Hrubshitz, Moravia, as well as in Asia Minor, and to a limited extent in Pennsylvania, South Carolina and in the upper Gila Valley, near Silver City, N. M."

TROWING TRASH IN STREETS OR ALLEYS A MISDEMEANOR.

Ordinance No. IV.

Be it ordained by the City Council of Plainview, Texas, that any person who commits any of the following acts within the corporate limits of Plainview shall be deemed and adjudged guilty of a misdemeanor, and upon conviction thereof shall be fined in any sum not less than one dollar and not exceeding twenty-five dollars.

Section 1. To sweep, throw, deposit, or cause or permit to be thrown, swept or deposited in any sewer, gutter, ditch, road, bar pit, or on any street, alley, sidewalk, or in front of any occupied premises, any sweepings of

trash, waste paper, rags, boxes, cans, rubbish or filth of any kind.

Section 2. All such rubbish as named in the preceding (Section 1) shall be, by the owner, lessee or occupant of such premises, collected together and placed in a box, barrel, sack or other such receptacle and the same removed beyond the city limits at his or her own expense; provided that such person may burn and consume the same on their own premises if done in such a manner as not to be offensive or dangerous to the adjacent occupants or premises. Adv. 1t.

A new hot water bottle of German invention is made of metal and is hinged in the center and so shaped that it can be fitted to human curves.

THAT'S THE KIND OF CLOTHES I WANT

Ever say that to yourself when you saw a well dressed man?

Of course you have. A well dressed man always stands out prominent above the crowd.

And it's easy to have trim, neat clothes of lastingly good material.

Let us show you how to do it economically with

MICHAELS STERN CLOTHES

They excel in every respect.

Jacobs Bros
THE ONE PRICE SPOT CASH STORE

MARKET DEMANDS THAT EGGS BE INFERTILE.

State Pure Food and Drugs Department Urges Producers to Prevent Loss.

AUSTIN, Texas, May 6.—In an effort to prevent the loss of thousands of dollars to farmers and poultry men of Texas, the State Pure Food and Drug Department is issuing circulars and posters advising farmers to produce infertile eggs, and thereby prevent material losses from the confiscation of bad eggs. According to R. H. Hoffman, Jr., pure food and drugs commissioner, the value of eggs produced in Texas is estimated at from \$12,000,000 to \$15,000,000 annually, and the loss is approximately \$1,000,000 from bad eggs. The loss to the farmers of the United States approximates \$45,000,000 annually by reason of bad eggs.

HE LIBELED WASHINGTON.

TACOMA, Wash., May 4.—A verdict of guilty was returned tonight by a Superior Court jury that for four days had been sitting in the trial of Paul H. Haffer, of this city, accused of libeling the memory of George Washington. Attorneys say the case sets a precedent.

The maximum penalty for the offense under a State statute is one year in the county jail, a fine of \$1,000, or both.

Col. Albert E. Joab, an attorney, caused Haffer's arrest after the latter had sent a letter to a newspaper referring to Washington as a "blasphemer," "slaveholder" and "inveterate drinker."

ADVERTISING.

I asked eight dollars and a half for one fine black Polled Angus calf, which price was not too high; I hoofed it west, I hoofed it east, endeavoring to buy. Day after day I tolled along, and bored men with the same old song, "I have a calf for sale; I ask eight bones and fifty cents for this unequaled critter, gents—who will dig up the kale?" Then said a friend, "Oh, rest your feet, and quit your wearing out the street

and howling by the year. Spend fifty cents and advertise your sawed-off cow of pocket size, and buyers will appear." I followed up the sane advice, and put my jaded feet on ice; and when the ad appeared, ten customers came to my gate; one bought the calf and paid the freight, the others bucked and reared. And thus by printing little ads the wire man gathers in the scads, and rests his aching corn; a little ad will make more noise than fifty-seven busy boys a tooting on their horns.—Walt Mason.

A machine has been invented to accurately record the adhesion between the different plies of canvas used in rubber hose, belting and automobile tires.

The coal in one of the largest new mines in China lies so near the surface of the ground that it will be mined with steam shovels after the covering soil is removed.

Rev. J. M. Harder filled his regular appointment at Post City Sunday.

The Season's Choicest Styles in Wash and Dress Goods at Prices that do Not Admit of Duplication

The almost indescribable sensation, of the fast advancing season hereabouts, has been the enthusiasm with which this store's Styles in Wash and Dress Goods have been received—

We went to unusual pains to maintain our Dress Goods

Department's reputation for variety, quality and practicability of styles this season, and the result is revealed in the endorsement given our offerings not only in Silks and All-Wool Fabrics but in Wash Goods as well.

It matters not what your personal choice may be—whether you desire a suitable material for Dress, Street, Afternoon, Evening or Business wear—

LaPorte

Our displays of Colored Cotton Wash Fabrics, include many styles in gingham, percales, cotton serges, mercerized poplins, kimona crepes.

CARTER-HOUSTON'S

"Goods That Speak For Themselves"

SOCIETY

Telephone Number 72

ANNOUNCEMENTS.

Mrs. L. S. Kinder and daughter, Miss Mae Kinder, will entertain the Tuesday and Wednesday Bridge Clubs tomorrow afternoon, at their home.

LIBERTY SOCIAL CLUB.

The Liberty Social Club met Thursday, May 4th, with Mrs. R. E. Houston. Twenty-seven were present, and a jolly good time was the result of the afternoon.

The hostess served a delicious two-course luncheon.

The next meeting will be with Mrs. T. H. Hickman, June 1.

MRS. McINTYRE ATTENDED

STATE FEDERATION MEETING.

Mr. and Mrs. H. C. McIntyre, who have been visiting at various points in the southern part of the State, returned home last week. Mrs. McIntyre states that she had the pleasure of attending the Fourth District meeting of the Woman's State Federation, held at Brenham.

MRS. CLINKSCALES IS HOSTESS FOR BRIDGE CLUB LAST WEEK.

Mrs. F. W. Clinkscales was hostess to the Bridge Club Tuesday afternoon, at her home, on South Broadway.

In addition to the club members, Mesdames Chas. McCormack, Robert Malone and Wallace Settoon were present. Mrs. Wallace Settoon won high score for the guests and Mrs. E. L. Dye for the club.

The hostess, assisted by Mrs. R. C. Ware and Mrs. Chas. McCormack, served a delicious salad course.

LIBERTY FOR "OLD MAIDS' CLUB" AT LIBERTY.

The program committee has the following characters secured for the "Old Maids' Club," which will be rendered at Liberty Friday evening, May 19th: Messrs. Shelby Leach and Van Boston, and Misses Dorothy and Hazel Wheeler, Ellen and Helen Groff, Geneva, Dora and Frances Seipp, Alice and Alma Boston, Grace Pinson and Estell Cates, and Mesdames Laura Cates, Edgar Johnson and Katherine Tumberg, the latter one being also our instructor.

We will charge no admission, but we kindly ask the ladies to bring pies and also insist that the gentlemen come. The pies will be sold immediately after the play and the proceeds will go for our song books.

We invite you to come and bring your friends. The play will start promptly at 8:30 p. m.

COMMITTEE.

HONORING RUTH TOWERY.

Miss Ruth Towery, daughter of Mr. and Mrs. B. H. Towery, entertained a few of her friends Sunday, the occasion being her fifteenth birthday.

An elaborate five-course dinner was served to the following: Misses Maurine Richards, Gladys Speer; Wilena Winfield, Messrs. Newton Gilbert, William Snell, LeGrey Atmar and Robert Doubleday.

The color scheme of pink and white was carried out. Pink sweet peas were used in the decorations. The place cards were hand painted.

MRS. L. J. WARREN HOSTESS FOR THE B. F. CLUB THURSDAY.

From three to six o'clock Thursday afternoon Mrs. L. J. Warren entertained the members of the B. F. Club. As the busy fingers flew making dainty articles, conversation never lagged. Delightful music was a feature of the afternoon's entertainment. The hostess served delicious refreshments, strawberries, angel food cake and punch.

WITH ST. MARK'S AUXILIARY.

The Woman's Auxiliary of the St. Mark's Episcopal Church met yesterday afternoon, at the church. The new officers elected at the last meeting were present, and the new president, Mrs. J. O. Wyckoff, presided.

A turkey dinner was planned for next Thursday from six to eight at the home of Mrs. J. C. Anderson.

LOCKNEY PERSONAL NEWS.

J. D. Burleson and wife and M. L. Robinett and wife were Plainview visitors Thursday.

Miss Ola Moon returned to Petersburg Thursday, after spending two weeks here visiting her parents, Mr. and Mrs. H. L. Moon.

Rev. W. F. Ledlow left Saturday for San Angelo, where he will hold a revival meeting for the Christian Church at that place.

Roy Teague, of Lovington, New Mexico, came in Saturday on business and to visit his brother and other relatives here. Mr. Teague is well pleased with New Mexico.

—Lockney Beacon.

MONDAY IS MISSIONARY DAY WITH PRESBYTERIAN SOCIETY.

The Ladies' Aid of the Presbyterian Church met yesterday afternoon, at the church, at four o'clock. This being their regular business meeting, plans for the year's work were discussed.

Next Monday will be the missionary meeting, and the aid will meet with Mrs. E. B. Hughes at three o'clock.

THANK HERALD FOR AID IN HOME ECONOMICS WEEK.

We wish to express to The Plainview Evening Herald our sincere thanks and continuing good wishes for having made it possible for the women of Plainview and Hale County to enjoy, without cost to them, the Home Economics Week to be held in Plainview May 15-19.

CITY FEDERATION OF WOMEN'S CLUBS. MRS. J. WALTER DAY, Sec. Plainview, Texas, May 3, 1916.

WAYLAND COLLEGE NOTES.

The girls and lady teachers of Wayland College went to the canyon Saturday on their annual picnic.

The graduating exercises of Wayland College will be held Wednesday morning, May 24th, at the college auditorium. Judge Bolin, of Matador, will deliver the graduating address. Dr. J. E. Gates will preach the commencement sermon, at the Baptist Church, Sunday, May 21st.

Those who will take degrees of the class are: Misses Addie Bourland, Linnie Wimberly, Emma Pool, Verlin Reeves, Flora B. Hopping and Jewell McCall and Robert Reeves. Lester Hartley was forced to withdraw from the class on account of failing health. He will enter Simmons College for the summer term, where he expects to make up lost time.

Wayland hopes for an alumni meeting. All of the former students are expected to return for the exercises.

SPECIAL REVIVAL SERVICES IN THE NAZARENE CHURCH.

The meeting has been in progress a week, with good results and good attendance. The pastor, Rev. W. H. Phillips, is conducting the meeting, assisted by Mrs. Phillips and Rev. Clarey. The revival will continue all this week, afternoon and evening services.

Rev. Oscar and Nettie Hudson, representatives of Nazarene University of Hamlin, will be with us the latter part of this week and will take part in the closing services.

Come and hear the word of God. W. H. PHILLIPS.

LIBERTY SUNDAY SCHOOL CLASS ENJOY PICNIC.

LIBERTY, May 8.—Rev. Holland, of Plainview, filled his regular appointment here Sunday morning and afternoon.

Miss Dorothy Wheeler spent Sunday as the guest of Helen Groff.

E. E. Freeman and wife are entertaining friends from Kansas.

Several from our "neck of the woods" attended the May-Day program in Plainview Friday.

Mrs. J. C. Fuller and husband chaperoned her Sunday School class to the cap rock Wednesday, May 3rd. Thirteen were present on this occasion. Dinner was spread at the noon hour, after which the company went out for a ramble among the hills, rocks and valleys. When they returned from their walks the teacher served ice cream and cake. At a late hour in the evening the class departed for home, declaring a splendid and jolly day throughout had been spent.

H. D. Davis, of Hereford, was here Sunday.

COURT ROOM TO HOUSE HOME ECONOMICS SCHOOL.

The Home Economics School has finally been housed through the courtesy of Judge W. B. Lewis who has granted the use of the county and district court rooms to the County Federated Clubs for the purposes of holding the lectures and demonstrations of the two university experts who will conduct the school.

As has been stated before arrangements have been made by the Herald to make the school sessions free to all the ladies of Hale and adjoining counties who will attend. The lectures and especially the demonstrations, promise to be exceedingly interesting and instructive. The course offers a rare opportunity for the home-maker to get thorough instruction in matters of vital interest to the success of her home.

J. M. Edwards, of Floydada, was here Sunday en route to Dallas for a two weeks' visit.

W. J. Miles left yesterday morning for Lubbock and Littlefield on business.

Mr. and Mrs. Guy Cox left yesterday morning for Oklahoma City, where they will remain some time. Mr. Cox's mother, who lives there, is in very poor health.

A. F. Quisenberry, of Hale Center, spent the week end with his children in Plainview.

Mrs. Frank E. Pearson and son, Frank E., Jr., left yesterday morning for Cleburne, where they will visit with relatives.

Owen Smith returned yesterday from Kansas City, where he went with a shipment of livestock from his father's ranch, in the Runningwater country.

Prof. G. R. Henderson returned yesterday from Clarendon, where he went on business.

Miss Grace Thatcher returned yesterday from Amarillo, where she has been visiting relatives.

W. P. Nichols left yesterday for Fort Worth, where he will remain for the next two weeks on business.

N. G. Humphries, formerly with the Elk Barber Shop here, was here Sunday, leaving Monday morning for Sweetwater, where he has a position.

L. H. Kier left this morning for Amarillo, after a visit with his mother-in-law, Mrs. Q. D. Hoyle.

Don Biggers, representing the marketing and warehouse department of the State Department of Agriculture, left this morning for his home, in Lubbock, after a few days spent here in the interest of the department.

Mrs. F. P. Powell left this morning for a short visit with friends in Amarillo.

Dick Bryan returned this morning from a business trip to Fort Worth.

J. M. Waller left this morning for Belton, where he will meet one of Mrs. Waller's sisters, who will come here for a visit.

P. J. Becker, of the Southwestern Telegraph and Telephone Company, was here today on business.

S. R. Estes, who has been visiting his brother, Dick Estes, left yesterday for his home, in Chickasha, Okla.

C. B. Payne, of Lockney, was here Saturday.

Dr. F. P. Jones, veterinarian in the Extension Service, is here this week on official business.

J. W. Gillon, of Lubbock, had business here yesterday.

W. E. Tandy, of Canadian, was a business visitor in Plainview yesterday.

G. O. Culpepper, of Amarillo, was a business visitor in Plainview yesterday.

W. R. McCluskey, of Spring Lake Ranch, was here yesterday.

Roy J. Frothingham, representing the Curtis publications, is in Plainview on business.

Mr. and Mrs. W. A. Nash will attend the Confederate Reunion at Birmingham.

Sunday morning, at the Christian Church, the cradle roll department gave a program. Mrs. B. H. Towery has charge of this department.

Mrs. M. F. Rook, who has been in Mineral Wells for several weeks, returned home Sunday.

Mrs. H. W. Harrel returned home Thursday from an extended visit with her children in Houston.

Carl Wells spent Sunday in Sweetwater.

J. P. Davis, manager of the Wright Produce Company, spent the week end in Sweetwater.

C. D. Russell left Sunday morning for Fort Worth on professional business.

Dr. J. J. Breaker, of Silverton, was here yesterday on business.

Prof. G. R. Henderson, of Seth Ward College, left Saturday for Clarendon on business.

Rev. G. W. Shearer, of Tulia, was here Saturday on business.

Rev. W. M. Lane was here Saturday en route from Lubbock to his home, in Floydada, where he went to accompany Mrs. Lane home. She has been in a sanitarium at Lubbock.

Nelson Perdue, of Hale Center, came in Saturday for a short visit with his parents.

Conservation of Moisture

Soll Mulch Prevents Soil Moisture from Rising to Surface Through Capillary Attraction.

By G. M. GARREN, Agronomist, Extension Service.

It rained yesterday; it's raining today, Thursday, in the College Station area. The records of the Weather Station have not been consulted, but to the farmer in the field this is the first rain of any consequence since January. For the field crops this is a "long time between drinks." These dates are not of general application, but long dry spells followed by heavy rains are characteristic of the climate of Texas. This weather feature is more marked in the western part of the State. Hence the absolute necessity for the Texas farmer to conserve, by all the arts known to improved agriculture, his soil moisture to tide his growing crops over the long dry spells.

The falling rain affords only temporary relief. There are but a few rainy days during a whole growing season. These would prove wholly inadequate for growing crops. It is the rising water, drawn up by capillary attraction, that nourishes growing plants. Water falling upon the surface is forced by gravitation down, down into the subsoil, and if the force is sufficient it drives the water through the soil to the underground rock. Then the water creeps along the rock surface and collects on the lower levels, whence it escapes in the form of running streams. When the force above is removed, the water remaining in the soil is drawn to the surface by the force of capillary attraction, and here it is evaporated by the heat of the sun and the drying effects of the winds. The only thing a farmer can do to conserve his soil moisture is to cut off this evaporation.

Stopping the force of capillary attraction and thereby cutting off evaporation depends upon one of the simple fundamental principles of physics. This principle is: The smaller the opening, the higher the liquid rises. If the openings are very large, the liquid, for all practical purposes, will not rise at all. The evaporation of soil

water can be stopped by making the openings at the surface too large for the force of capillary attraction to work. This can be accomplished by covering the surface with straw, coarse barnyard manure, or, in the case of small plant-beds, with a tow sack. All of these are impractical in large field operations.

The only thing that can be done in such cases is to stir the top of the soil until the openings are too large to allow the escape of soil moisture.

The practical means of accomplishing this end are fairly simple. Get into the field just as soon after each rain as the conditions of the land will allow teams and tools without puddling the soil. Create a soil mulch and maintain it by frequent plowing throughout the growing period. Use cultivators that stir the soil a uniform depth across the furrow. Make the soil mulch at least two inches deep in humid sections, three or three and one-half in the semi-arid sections. The deeper the better, so long as the roots of the growing plants are not interfered with. In some field experiments that have been made for a period of one hundred days it was found that with no mulch 817.6 inches of water were evaporated; with a one-inch mulch, 407.2 inches; with a two-inch mulch, 366.4 inches; with a three-inch mulch, 307.6 inches; with a four-inch mulch 292.1 inches.

With a one-inch mulch there was a saving of 50.2 per cent of the soil moisture; with a two-inch mulch, a saving of 55.6 per cent; with a three-inch, a saving of 62.2 per cent; with a four-inch, a saving of 64.2 per cent. The efficiency of a soil mulch of whatever depth depends largely upon the frequency of its renewal. A soil mulch can be made and maintained with greater ease in flat cultivation than in ridge.

SOUTHWEST'S CATTLE INDUSTRY TOPIC IN HISTORICAL QUARTERLY

AUSTIN, Texas, May 6.—"The Cattle Industry of the Southwest" is the subject of a cursory sketch by Miss Clara M. Love in the issue of the Southwestern Historical Quarterly which is just from the press.

The article deals with the development of the great cattle industry in Texas and California, and has a strong interest for Texas readers.

This quarterly is the official organ of the Texas Historical Association, of which Mrs. Adele B. Looscan, of Houston, is president; Col. Geo. W. Brackenridge, of San Antonio; Miss Katie Daffin, of Austin, and Hon. R. C. Crane, of Sweetwater, vice presidents; Professor Eugene C. Barker, recording secretary and Librarian and managing editor of the Quarterly; and Professor Chas. W. Ramsdell, corresponding secretary and treasurer.

Another article of absorbing interest in the present issue of the Quarterly is one from the pen of W. E. Dunn, entitled "The Spanish Search for La Salle's Colony, 1685-1689," dealing, as it does, with the excited efforts of the Spanish authorities in Mexico to discover and expel the French who had unintentionally settled on the shores of Texas. Five expeditions were sent by sea and four by land before De Leon was finally successful, in 1689, in finding the abandoned ruins of La Salle's Fort Saint Louis, on the Garcitas River. Mr. Dunn is in an ex-

ceptionally favorable position to obtain first-hand information concerning the early history of Texas, since he is now engaged in transcribing in the archives of Seville, Spain, original documents bearing on this early period for the University of Texas, the University of California and the Library of Congress.

Another article of particular interest to the historian is "British Correspondence Concerning Texas," edited by Ephriam D. Adams, this installment of the article containing letters from Captain Charles Elliott, British Charge d'Affaires to the Republic of Texas, concerning the attitude of General Houston, Anson Jones, and Ashbel Smith toward the annexation of Texas to the United States. It was Captain Elliott's opinion that they preferred the maintenance of Texan independence.

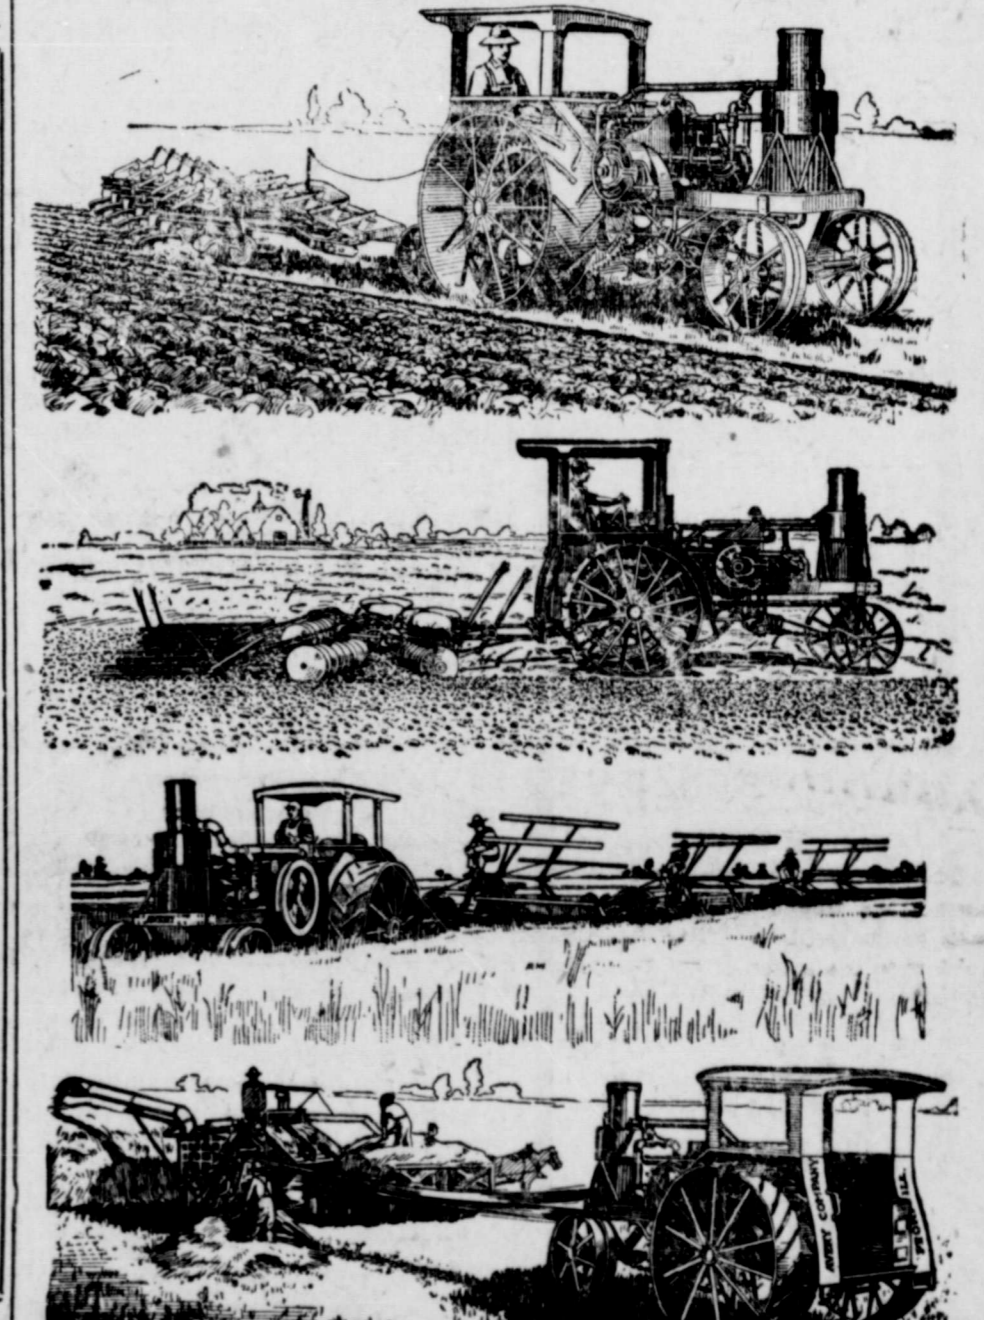

A note by Dr. H. E. Bolton, formerly Professor of History in the University of Texas, now with the University of California, gives some account of the founding of the Mission of Refugio and its original location. It is by the publication of such rich historical material year after year that the Texas Historical Quarterly is maintaining its position as one of the half dozen most influential historical journals published in this country.

A new motor attachment for bicycles is carried behind the saddle and imparts its power by friction against the rear wheel.

ROUND TRIP AND EXCURSION AND SUMMER TOURIST FARES, STATE AND INTERSTATE.

They Stand Up—

Unlike common corn flakes, the New Post Toasties don't mush down when milk or cream is added.

And they have a charming new flavour—delicious, different, the true essence of the corn—not found in corn flakes heretofore.

The intense heat of the new process of manufacture raises tiny bubbles on each delicious brown flake and these little puffs are the identifying feature.

These new flakes are firmer, crisper, and don't crumble in the package—in comparison, ordinary corn flakes are as "chaff."

Your grocer can send you a package of

Summer Cooking Shouldn't Cook the Cook

Getting dinner ready in July is just as comfortable as in November—if you use a FLORENCE OIL COOK STOVE.

The heat goes into the cooking, not into the kitchen. It does your work well and reliably, and keeps you comfortable. It requires less watching and regulating than a coal stove.

You can keep one or four burners at an intensely hot or merely simmering flame. Come in and let us show you how these Florence Automatic Stoves work, how simple and reliable. No Wicks to burn out. No Valves to leak. Once started, each burner will keep going at the same power until you turn it out.

I AM THE WANT AD
MY SCOPE IS UNLIMITED
SOMETIMES I BEAR tidings of life and death, joy and despair, but mostly I am the messenger of hope and happiness. Occasionally I afford first aid to romance.
I AM A WORKER, through whose untiring energy families find homes, buyers and sellers come together, unused commodities give place to those which are desired.
I AM A SUCCESSFUL DETECTIVE. I find anything that is lost and restore that which is found. I comb the crowds, scan the highways and by-ways, peer into remote corners; unerringly I locate the thing or person sought.
I AM A GOOD FRIEND to the employer and the employed. I bring the employer competent aid, I provide the means by which worthy men find fitting employment. BEHOLD ME ON THE WANT AD PAGE THE PLAINVIEW EVENING HERALD.

Special Infant Food

If your baby is not growing every day, no doubt the trouble is lack of proper food. Infant foods should be as nearly like mother's milk as possible. Thompson's Food (Peptonized) contains all the elements necessary to the normal growth and strength of the baby. A food prepared solely for infants deprived of mother's milk. Consists of pure, sweet milk, modified on a large scale in a scientific manner. Ready for use by simply adding water. We suggest that you try a 50c package with our guarantee of satisfaction. Long-Harp Drug Co., Plainview.

EVER SALIVATED BY CALOMEL? HORRIBLE!

Calomel is Quicksilver and Acts Like Dynamite on Your Liver.

Calomel loses you a day! You know what calomel is. It's mercury; quicksilver. Calomel is dangerous. It crashes into sour bile like dynamite, cramping and sickening you. Calomel attacks the bones, and should never be put into your system.
When you feel bilious, sluggish, constipated and all knocked out and believe you need a dose of dangerous calomel, just remember that your druggist sells for 50 cents a large bottle of perfectly harmless and doesn't gripe. Dodson's Liver Tone, which is entirely vegetable and pleasant to take and is a perfect substitute for calomel. It is guaranteed to start your liver without stirring up your inside, and can no salivate.
Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tone straightens you right up and you feel great. Give it to the children, because it is perfectly harmless and doesn't gripe.

A POPULAR VERDICT.

Based on Evidence of Plainview People.

Grateful thousand tell it—
Of weak backs made strong—
Of weak kidneys made well—
Urinary disorders corrected.
Plainview people add their testimony.
They praise Doan's Kidney Pills.
Plainview evidence is now complete.
Plainview testimony is confirmed; Reports of early relief substantiated. Merit doubly proved by test of time. Let a Plainview citizen speak:
Mrs. C. Reven, Plainview, says: "I used Doan's Kidney Pills for backache and other kidney troubles. They gave a wonderful relief when I was so stiff and lame that I could hardly looip. Judging from my own experience with Doan's Kidney Pills, I can recommend them for trouble from the back and kidneys." (Statement given January 18, 1911.)
ABOUT A YEAR LATER, Mrs. Reven said: "I confirm my former endorsement of Doan's Kidney Pills. They have given me wonderful relief whenever I have used them."
Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Reven had. Foster-Milburn Co. Props., Buffalo, N. Y. —Adv.

LAKEVIEW NEWS.

LAKEVIEW, May 6.—Thomas Ellerd, wife and son, Master Reuben Ellerd, of Happy Union, visited at the home of J. T. Ellerd Sunday.

Sunday School as usual at the school house Sunday afternoon.

Paul and Clyde Crawford have finished breaking a quarter section of sod land west of Lakeview school.

Ernest Jones, with his bride, was at the singing at the school house Sunday night. Ernest received the congratulations of his friends like a veteran.

Frank Wirtz and family are established in their new home. They are doing the host and hostess stunt some these days. Mrs. D. H. Stovall and children, with Fredda Bougard, were delightfully entertained at their home Thursday at dinner.

Mrs. Brittain and daughter and Homer Minor were visitors at the home of P. L. Wimberly a few days ago.

Burr Jones took a herd of cattle from Elbert Overton's ranch near Lakeview to Overton's ranch south of Lubbock. Lee Wimberly went along to see that things were well done.

W. L. Harrington and wife, of Plainview, and Mrs. J. C. Anderson and baby, Helen, of Fort Sumner, N. M., were visitors at the home of D. H. Stovall Wednesday night. Mr. Stovall, who had been in Plainview for a few days, went back to Plainview with them.

Dave Neal and little son were in Plainview Saturday.

Mrs. J. H. Lutrick and son Ed and Miss Carrie were in Plainview Monday.

Miss Brittain, daughter of Rev. W. T. Brittain, was a visitor at the pleasant home of J. H. Lutrick Sunday.

Mrs. Brown, daughter of our old friend and neighbor Mr. Fitzgerald, who was hurt in a runaway recently, is reported as getting along very well.

P. L. Wimberly and wife went to Ralls last Friday to attend the fifth Sunday meeting.

H. E. McCabe and family went to Plainview and heard W. J. Bryan a week ago last Friday.

The young people of the community had a royal time Saturday night at the home of Mr. Craig.

The warm days of this month are being used with a vengeance by the farmers. Crops are being put into the ground as fast as things can be made to go.

The Democrats met at Lakeview Saturday, but results of the meeting were not learned by ye scribe.

FOUR CONVERSIONS AT MOUNT VERNON SUNDAY AFTERNOON.

MOUNT VERNON, May 7.—The farmers are busy planting.

Mrs. W. T. Haynes spent last Monday with Mrs. Nix Harp.

Mrs. J. M. Brazele and daughters, Lucile and Kathleen, called on Mrs. Walter Crowley one day this week.

James Duncan has pneumonia. We hope he will soon be up again.

Mrs. Cox and Walter Crowley have been on the sick list this week.

Mrs. Billy Merrell's sister came in from New Mexico Saturday for a visit. Fred Cox is in Littlefield.

Louis Ferguson, from Jacksboro, has come to make Plainview his home.

There was quite a number from this community attended the dance at Ray Young's Saturday night.

Mr. and Mrs. Jim Cook from town Friday.

Brother J. Q. Adam was accompanied by Brother Burnett, field secretary of Wayland College, Sunday afternoon. Brother Burnett preached a good sermon. There were four converted. Brother Adams will preach next Sunday night.

Mr. and Mrs. Hutchings and family, from town, spent the day with Mr. and Mrs. Haines yesterday.

OLTON TWICE DEFEATS TEAMS FROM HALFWAY.

OLTON, Texas, May 7.—Last Saturday afternoon an interesting game of basketball was played between the Halfway and Olton school teams, at this place. The score was 14 to 7 in favor of Olton. There was also a game of baseball played between the Olton school boys and the boys from Halfway, resulting in a score of 16 to 10 in favor of Olton. The Olton teams go to Halfway to play them on their grounds on Friday, May 19.

An entertainment consisting of music, instrumental and vocal, and of readings and recitations will be given at the Olton school house May 20th, beginning promptly at 8:30 p. m. An admission fee of twenty-five cents will be charged, the proceeds to be used for purchasing new lights for the church. We especially request the people of Olton and the neighboring communities to be present.

Seven auto loads of Olton people attended the play given by the school at Halfway Saturday night.

NEWS FROM WHITFIELD.

WHITFIELD, May 8.—Miss Flora Mae Scudder, of Plainview, and Mrs. I. C. Nations were pleasant callers at the Edwards home last Wednesday.

Rev. Smith preached at Providence Sunday morning and at Prairieview in the evening.

The singing at Mr. Stalling's Sunday night was a success. There was a large crowd there.

Mrs. John Edwards and Mrs. I. C. Nations and Miss Florida Pullen motored to Floydada Saturday, returning Sunday evening. While there they were the guests of Mesdames Gamble and Smith.

Little Birdie Garner is quite sick with pneumonia at this writing.

Mr. Real returned from a pleasant trip in Kansas last week.

There was a singing at Clayton Williams' Sunday night.

Mrs. M. E. Nations and two sons went to Dimmitt Saturday on business.

Harris Nations returned from Oklahoma last week.

Miss Scudder and Mrs. I. C. Nations were the guests of Mrs. Starks last Wednesday afternoon.

HALFWAY SCHOOL CLOSES MAY 19.

HALFWAY, May 4.—Another splendid shower fell on Tuesday afternoon, and considerable small hail, but no damage was done.

T. J. Stewart, who has been ill for the past two weeks, is able to be up now.

Bernice Miller, who has been ill with pneumonia, is not doing very well.

Mrs. R. L. Hooper and H. C. Huguley, who were on the sick list last week, have about recovered.

The farmers are planting row crops and sowing millet.

Mrs. J. W. Dye went to Plainview Tuesday to undergo an operation on her eye.

The eighth and ninth grades in school will present the play "A Case in Suspension" on Saturday night, 6th.

On Saturday the Halfway basketball girls go to Olton to play a matched game with the Olton team.

The "Negro Minstrel" given by the Mothers' Club on last Saturday night was well received, but there were not as many in attendance as had been expected, on account of the erroneous report abroad to the effect that the minstrel had been postponed on account of illness in the community.

Mrs. Charley Brown, who has been spending a week with Mr. Brown's parents, near Plainview, returned home last Friday.

Roy Maxey, of Plainview, is here building an addition to Mrs. Nelson Smith's house.

School closes on the 19th of May. A Mr. Smith and wife have been employed to teach next year.

TULLA PERSONAL NEWS.

Judge W. B. Lewis, of Plainview, was in the city Tuesday advertising the coming sale of Hale County's school land. The land is located in Bailey County, and the sale will take place at Plainview on the 13th of June. There are about one hundred tracts of the land, one hundred seventy acres to the tract. Small payments and long terms will be given, and there is no limit on the number of tracts to be sold to any one man.

Miss Kittle Putnam returned Wednesday from a visit of several months with relatives in Jacksonville, Florida.

J. O. Bass and wife attended the W. J. Bryan lecture at Plainview last Friday.

Mrs. Young, of Plainview, is visiting her daughter, Mrs. Ben Hooper.

PEACH CROP WILL AVERAGE BETTER THAN LAST YEAR.

In its report for May 6, The Kansas City Packer summarizes the peach-crop conditions in Texas as follows:

"After a careful survey of the peach orchards throughout East Texas, and what is commonly known as the peach belt, it is the consensus of opinion that the peach crop this season will be fully as large, if not larger than last year. This includes the early peaches, the Elbertas and late peaches. The young trees have more fruit on them than they had last year, but the old or neglected orchards are not bearing so well. There have been some reports of the young peaches falling from the trees in certain districts, but the drop has not been heavy enough to create alarm and the natural thinning will mean better fruit."

Dr. N. L. Williams, of Amarillo, was here today on business.

DEPARTMENT OF AGRICULTURE WILL MAIL BULLETINS FREE.

PRESBYTERIAN CHURCH IS ORGANIZED AT LITTLEFIELD.

LITTLEFIELD, Lamb County, Tex., May 8.—Rev. J. H. Bone was here yesterday and organized a Presbyterian Church, with twelve charter members. C. H. Curl and A. P. Duggan were ordained as elders, and W. G. Street, deacon.

East Mound Girls Receive \$28 at Their Box Supper.

Saturday evening a box supper was held at the East Mound school house by the members of the Girls' Home Economics Club there. The proceeds, \$28.65, will be used in furnishing the new school building, which it is hoped will be made possible by the voters Wednesday, when they pass on the proposed issuance of \$4,000 in bonds for a new brick school building.

Mrs. J. T. Price, of Amarillo, is the guest of Mrs. L. D. Bowen.

One of the newest fashionable models 1916

The Best Style Is Your Style

True style is not a narrow-minded kind of thing that says you must wear one particular kind of a suit, but it meets you half way, for you are yourself and have a right to clothes which best become you.

For over fifty years the mark **Kuppenheimer** has stood for something more than beautiful tailoring and fabrics. It has stood for true clothes style, style expressive of the latest fashion trend, yet style which concedes that the best style after all is that style which most becomes the wearer.

The suit that suits your particular ideas of dress, in a pattern all your own, and a size to fit your particular physique will be found at this store. Clothing men who are good judges of the style for you will fit you at any price from \$20 upward to \$35.

Stadium Special Suits, highly tailored of pure wool and guaranteed by us, \$15

The newest shapes in Hats and Shoes
